Mr. GODWIN of North Carolina. I withdraw the request for the time being.

The SPEAKER. The gentleman withdraws his request.

DIPLOMATIC AND CONSULAR APPROPRIATIONS.

Mr. FLOOD. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 9314) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1919; and pending that motion, Mr. Speaker, I should like to ask the gentleman from Wisconsin [Mr. COOPER] if we can not make some arrangement about time for general debate on this bill.

Mr. COOPER of Wisconsin. Mr. Speaker, I have received requests for time from Members on this side of the Chamber aggregating more than five hours. Before the gentleman makes response to that suggestion I wish to say that among those who have asked to speak—and I think their requests indicate that the debate will be an interesting one—are two of the members of the committee who spent a number of weeks over on the battle front, and another request is from the gentleman who was consul general in Egypt and can speak with first-hand knowledge of the Armenians and Turks. In view of the important character of the bill and of the number who have asked for opportunities to speak, I do not think that five hours on this side is an unreasonable time.

Mr. FLOOD. Could the gentleman get along with four hours?

Mr. COOPER of Wisconsin. We can not get along with four hours, because there are so many who have asked for an opportunity to say something, and they are still coming in. I have had one request this morning, and now I have another from a distinguished Member of the House who asks for 10 minutes. Another equally distinguished and equally insistent gentleman wants 10 minutes more. The gentleman had better hasten to a conclusion before any more requests come in. [Laughter.]

The SPEAKER. What does the gentleman from Virginia say?

Mr. FLOOD. Could we agree to finish the general debate to-day—run on until we finish it to-day?

Mr. COOPER of Wisconsin. Oh, that is utterly impossible. There is no reason for that. I can not understand why we should hasten to a conclusion to-day and then adjourn over. Why can we not let the debate run to-day, Mr. Speaker?

Mr. KITCHIN. That is what I suggest, to let the debate run to-day, and then the gentleman from Virginia and the gentleman from Wisconsin can agree on some time.

Mr. FLOOD. We will agree to let the debate run on to-day.

The SPEAKER. Who is to control the time?

Mr. FLOOD. While we will not need half the time, I ask that the time be controlled, half by the gentleman from Wisconsin and half by myself.

The SPEAKER. The gentleman from Virginia moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the Diplomatic and Consular appropriation bill; and pending that he asks that the time to-day be equally divided between himself and the gentleman from Wisconsin [Mr. COOPER]. Is there objection?

There was no objection.

The motion of Mr. FLOOD was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 9314) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1919, with Mr. HUMPHREYS in the chair.

Mr. FLOOD. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

There was no objection.

Mr. FLOOD. Mr. Chairman, this bill carries a considerably larger amount than the appropriations heretofore made in the Diplomatic and Consular appropriation bill. For that reason I desire to address the House in reference to the splendid work that has been accomplished by that branch of our public service which is supported by the appropriation carried in this bill. Our foreign service is handled by the Department of State.

The Department of State has always been one of the very important governmental departments. It was the first department of our Government created, and has been the center of the stage during most of our history.

It was first known as the Department of Foreign Affairs, and had to do exclusively with our foreign relations; but during the very year in which it was created, 1789, an act was passed charging the Secretary of Foreign Affairs with the safekeeping of the acts and records and seals of the United States and changing the name of the department to its present name.

All through our history, in peace and in war, this department has played a great and important part, but never a more important part than during the present great crisis in the world's history. We have had great Secretaries of State, among them Jefferson, Pickering, Marshall, Madison, Monroe, Adams, Clay, Webster, Buchanan, Black, Seward, Everetts, Blaine, Bayard, Olney, Root, Knox, and Bryan, but none of these distinguished men have discharged the duties of this great office more efficiently than the courtly gentleman, the able lawyer, the dignified official who now holds it. [Applause.] The Secretary of State has a splendid corps of assistants. They have done their work quietly and unostentatiously, but with great efficiency and good to this country and to the cause of humanity. [Applause.]

I feel that at this time when such tremendous burdens and responsibilities have been placed upon the State Department, and when these responsibilities have been so splendidly and successfully met and discharged that some statement of their accomplishment is due to the Secretary and his efficient corps of assistants. [Applause.]

With the entry of the United States into the war there arose at once vital problems of coordination and cooperation between this country and the allies. What America had or could produce in men, supplies, and money had to be determined and then fitted to the needs and requirements of the various fronts. The problems of apportionment were tremendous, necessitating negotiations of great magnitude. The situation led to the sending to this country of diplomatic missions from England, France, Italy, Russia, Japan, Belgium, and a number of other countries. These missions came with intricate problems, questions for diplomatic cooperation and decision, questions of financial arrangements, and of military and naval requirements, and of general policies.

These missions carried on their negotiations through the Department of State. Their military experts were brought into relation with ours; their financial experts were put in contact with the Treasury Department; their economic and blockade experts were taken to the appropriate American authorities. Arrangements of all sorts were speedily made. The Department of State had directly to do with many of these problems, such as those concerning supplies to neutral countries contiguous to Germany, and with military and naval problems, when the military and naval activities assumed a political tinge.

The negotiations begun at the time of America's entry into the war have since been carried on with undiminished vigor, as questions of world importance have one after another arisen. In every new situation the Department of State has measured up fully to the necessities of the occasion and to the very best traditions of our Government and our country. In no instance has it fallen down. [Applause.] In no instance has a single bureau failed to give a good account of itself.

In addition to the diplomatic missions, our State Department officials received and negotiated with special commercial missions from Switzerland, Sweden, Denmark, and Norway, taking up with them the very intricate problems of supplies to be exchanged, based on the part of the United States on a determination to permit nothing to go to these countries without full guarantees that American commodities should not reach the enemy, and on the part of the others of their own welfare and economic and political needs and requirements.

The successful conduct of these negotiations constitutes one of the vital aspects of the war and reflects great credit upon the Department of State. [Applause.]

Under the direction of the Secretary of State, the special war mission, headed by Col. House, went to England and France,

carrying on toward completion the work begun by the special diplomatic and war missions which came to this country. All of us are familiar with the House mission in bringing into the war America's full strength—military, naval, financial, and economic. The discussions in Europe, as did those which took place in this country, led to a thorough and complete understanding of precisely what the allies needed from this country and exactly what this country could furnish, with the equally important decisions as to when and how they could be furnished, and under our great Secretary of the Treasury and our able and efficient Secretaries of War and Navy, we will furnish more in men and means than was expected of us in a far shorter time than had been the fondest hope of our own people or the nations with which we are associated in this war. [Applause.]

The visit of the Japanese mission to this country resulted in the exchange of notes between the Secretary of State and Viscount Ishii, which removed causes of friction between the two countries and works for peace in the Far East, making quite remote the possibility so often discussed of trouble between this country and Japan.

Under instructions from the department, a mission was sent to Russia under the distinguished leadership of the Hon. Elihu Root.

The war, with all of these new activities, has brought upon the department and its corps of workers here and abroad an avalanche of problems, many of them entirely new and most complicated. A very considerable number of these problems affect not only this country but other countries engaged on our side in the war. This makes necessary general negotiations, exchange of views between the several foreign offices and coordination of opinion, and finally unanimous decision. This necessitates a largely increased force of all classes of officials in our Diplomatic and Consular and Secret Services.

To meet these increasing burdens and supply a sufficient force to discharge the demands upon our foreign service, we are asked for a very considerable increase of appropriations over the amounts our bills have carried during the past.

The existing appropriation law carried a total of $5,082,746.66; the pending bill carries a total of $8,206,086.66, making an increase of $3,123,340. This increase is made up largely of allowances for additional clerks at embassies and legations, contingent expenses for foreign missions, the secret fund, post allowances, allowance for clerk hire at consulates, contingent expenses of consulates, relief of American citizens and prisoners of war, and other similar items.

The bill also carries provision for 25 new secretaries to our embassies and legations. When we entered the war there was, of course, a complete cessation of intercourse between Germany and the United States, and later between this country and Turkey and Austria. This meant the withdrawal of the large American embassies in Berlin, Vienna, and Constantinople, as well as the whole of the consular service in Germany, Austria-Hungary, and Turkey. The personnel thus made available was instantly absorbed while the constantly increasing intercourse between this country and the allied nations, as well as with most of the neutrals, caused such a tremendous increase of work that it was found that more secretaries, as well as clerks, in embassies and legations were absolutely necessary.

I believe the House will agree with the committee that in no item of the bill has the committee allowed a larger increase for our foreign service than the exigencies and necessities of the present emergency imperatively demand.

Even during the years before America became an actual participant in the war there was a constant expansion of the work of the State Department. Although we were neutral, the department's problems constantly increased. Caring for the interests of belligerents in various countries was one detail of the new work, while the constantly arising problems of neutrality, as well as those of protecting America's interests abroad, added more work. The department, however, undertook to carry on this work without any very great increase of appropriations, but the time has come when these increases are absolutely necessary in order to do at all efficiently the work that falls to this great department of the Government.

When the United States entered the war some of the problems involving the defense of her neutrality and other similar problems disappeared, but immediately there sprung up greater problems of another character.

Every additional letter and telegram to or from the department or to or from our embassies, legations, and consulates means, of course, additional work for the departmental personnel and for the personnel of the embassies, legations, and consulates.

Owing to the importance of the work done by the Department of State, which is the connecting link between this and all other nations, most of it is conducted by cable. This is more true now than ever before, owing to the war urgency of most of the foreign business and to the irregularity and slowness of the mails caused by the shipping situation. I am told that there has been an increase of nearly 800 per cent in this character of work. In the period from the 1st to the 15th of January, 1914, there were 28,300 words cabled. In the same period in 1918 there were 217,597 words.

Every message sent by telegraph requires the service and receives the attention of a number of high-class officials in the department, and the same is true of the cables sent from our embassies, legations, and consulates. This is only an instance of the increased work in our foreign service. The communications recorded in the Bureau of Indexes show a great increase, while the department's correspondence with the foreign service, and contra, which is carried on in pouches, shows an astonishing increase.

These facts establish the mere volume of work that has been accomplished and which progresses in increasing magnitude.

In addition to all the new war work, the ordinary functions of the department go on. While there is little which happens which does not touch or is not touched by war, there still remains the usual volume of work in connection with the protection of American citizens and interests abroad—less than before the war because of the severance of relations with several large countries, but still enough to occupy the time and attention of a staff equal to that which was maintained prior to August, 1914.

Therefore, the department has as much to do in mere quantity as it had in time of peace, and added to this is all the new war work.

First in importance among the new activities of the department comes, of course, the matter of general diplomatic intercourse between this country and those associated with us in the war, questions of politics and diplomacy, and, where the two go together, of military action and diplomacy. All this falls to the Department of State, and along with it a vast amount of labor in connection with certain coordinate branches of the Government which have vital mutual interests with America's associates in the war and no direct means of communication except through the Department of State.

There exists now the War Trade Board, charged with the enforcement of the trading with the enemy act and making up the enemy trading list. Its chairman, the Hon. Vance C. McCormick, is the department's representative on the board, and the Department of State, under the guidance of this able Pennsylvanian, is largely responsible for the policy of this board. The work of the War Trade Board involves investigation of thousands of firms the world over to ascertain if they have an enemy taint and if they should be placed on the enemy trading list, so that American citizens may not deal with them. Here the American Consular Service is utilized most extensively, consuls in all countries being used to investigate and report on the character of firms and to make recommendations as to whether licenses for exports from the United States shall be permitted. These investigations are running into the thousands.

The War Trade Board comes into close contact with the department in the matter of determining the quantity of supplies permitted to go to neutral countries contiguous to Germany and elsewhere. The questions are complex, involving the necessity, which must be determined, as to American needs as well as those of neutrals, the matter of supply and demand, of expediency and barter, which means arranging that in return for supplies from this country the other party concerned shall furnish us with commodities which they have and we need. The ramification leads to the Food Administration, where the availability of foodstuffs for export as well as the necessity for certain foods abroad is determined, and to the Treasury, where matters concerning money and supplies are settled. The department's business with the War Trade Board alone requires the services of several administrative officers, numerous clerks, and the constant consideration of the actual head of the department. The furnishing of supplies to neutrals and associates almost invariably has a political tinge which requires very careful consideration and action.

Another important work of magnitude which has come to the department is that of distribution of enemy shipping. At the outbreak of the war many enemy ships took refuge in ports which have ceased to be neutral ports. The obtaining of this highly valuable tonnage and its distribution among the allies for war operation has made necessary long and arduous negotiations.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. FLOOD. I will.

Mr. MOORE of Pennsylvania. With reference to the services now being rendered by the War Trade Bureau, I would like to

ask the gentleman whether American merchants are still required to apply to the Textile Alliance for leave to obtain ship space. It was the practice in certain cases for American merchants to go to the British consul general at New York or to the Textile Alliance, a British corporation, to obtain leave to do foreign business. I want to know if that condition still holds?

Mr. FLOOD. I should think not, although I am not prepared to answer the question because it has not come under my observation.

Mr. MOORE of Pennsylvania. The gentleman has referred to the work done by Mr. McCormick, and the question seems important because American merchants were being prejudiced by having to submit their business affairs to foreign agents, due, of course, to the war. In my judgment the practice ought to be discontinued since an American official is presumed to have control of that situation.

Mr. FLOOD. I agree with the gentleman, and I think perhaps he will find that that has been done, but I am not prepared to answer positively.

When we entered the war Canada was the only country in the Western Hemisphere in the war, nor in the Far East was there any country at war except Japan. Since America entered the war, Cuba, Panama, Brazil, China, and Siam have declared war, and Uruguay, Peru, Bolivia, Nicaragua, Honduras, Haiti, Santo Domingo, and Guatemala have severed diplomatic relations with Germany, thus placing themselves on the side of the United States. In the case of these Latin-American countries and China, the example of the United States undoubtedly had a potent influence. The Department of State by the distribution of the President's speeches through the Diplomatic and Consular Service and in other ways did much to bring these countries to a full realization of what the war was about, and in that way exercised a strong influence upon the action those countries subsequently took. [Applause.]

The series of exposures which the department has made, beginning with the Zimmermann note early last year, and followed by the Luxburg telegrams, the Bernstorff telegrams concerning Caillaux, and the secret German censorship regulations showing how the German press is controlled undoubtedly served to bring to the attention of Latin America as well as to the world the precise character of the German Government, with the consequent influence upon the policy of many of these countries toward Germany. Of the department's general secret service work little can be said at this time further than to most highly commend it, and to state that it has been most effective and useful.

Since America's entry into the war her foreign relations, for which the State Department is responsible, have greatly developed, and this in the face of enormous difficulties. The rationing of neutrals, for instance, involving an interference with some of the vital supplies of such countries as Holland, Denmark, and Sweden is a matter calculated to create intense irritation with the tangible risk of its developing into enmity.

Too much can not be said of the splendid manner in which the State Department has handled this delicate situation. There is no friction with any of these neutrals growing out of the course which our Government was compelled to pursue with reference to these matters. [Applause.]

There are innumerable lesser phases of departmental war work which add to the volume of labor. It falls to the department to look after the interests and to assure proper treatment for American prisoners of war in enemy hands. Of these there are now only a few, less than 150, but it is to be expected that there will be more, and elaborate machinery for their care has been created. A committee in Switzerland has been organized under the supervision of the legation at Berne which sends to the Americans in German prison camps food, money, and clothing, without which they would soon be destitute. The history of the war shows that the lot of prisoners in Germany is an unhappy one. Without food from the outside they would starve; without clothing they would freeze. Their welfare demands constant vigilance, instant protest against mistreatment, and firm demand for remedies. The department must also protect other Americans in Germany and property left behind by Americans who have departed.

In turn the Department of State is responsible for the welfare of enemy aliens in this country. Here Sweden represents Austrian interests and Switzerland Germany's, and with the legations of those two countries in Washington there is a constantly growing correspondence, involving much investigation as to the welfare of interned enemy aliens and of prisoners of war. In addition there is much work connected with the handling of enemy property by the alien property custodian.

Another feature of the department's new work concerns the welfare of subject races. In Palestine, Armenia, Syria, Poland, and various other places the plight of the people is pitiable. Several organizations have interested themselves in affording succor, and this is sent through the Department of State. Often the question of sending supplies and money involves diplomatic interchange between this country and the allies and between us and the enemy, through established neutral channels. Proper safeguards must be established to prevent relief supplies sent to occupied Poland from falling into the hands of the enemy. Similarly the department has to do with the relief of Belgium and the occupied portions of northern France.

The American Red Cross is extensively engaged in several places abroad, in Russia, Poland, the Balkans, and elsewhere. The work of the Red Cross receives the support and assistance of the department, without whose machinery the Red Cross would have difficulty in carrying on its work.

A very important and a very complicated feature of the department's work has been the negotiation, still proceeding, of treaties with several nations for reciprocal drafting of nationals. These negotiations are now about concluded.

Information is, of course, the most vital element of war. Prior to America's participation there existed a certain system of interchange of information between America's Diplomatic and Consular Service and the department. This has since been greatly expanded. The missions abroad are now kept fully informed of all essential developments. Each week the various political bureaus collate all information pertaining to their work. When the facts are brought together a review of the week is appended and then the whole is made up into "information series." These are sent to embassies and legations which are entitled to see them. They are confidential and nonconfidential. The nonconfidential contain much information of great value for publicity purposes abroad, leading to a clearer public understanding of America's aims and activities. I am told that the embassy in London receives from the department each week between fifty and seventy-five thousand words of material. In addition to this the department carries on a cabled information service. Facts from London of interest to the embassy in Rome, or possibly the legation in Peking, are speedily transmitted. The department also supervises the exchange of certain information between this country and the cobelligerents.

While war tasks accumulate many questions arise just as in the days of peace. For instance, the department has lately been most busily engaged in an effort to prevent a boundary dispute between Guatemala and Honduras becoming something worse. The questions arising out of the proper distribution of the waters of the Colorado and Rio Grande Rivers between this country and Mexico are being handled so as to avoid any dispute between the two Republics in the future. Negotiations looking toward making the Army's and the farmers' supply of nitrate certain have gone on simultaneously with the efforts to keep peace in the oil fields of Mexico. Steps have been taken for the relief of the earthquake sufferers in Guatemala, while the department was giving careful attention to the situation in Russia.

In addition to all these, the department has been making careful and efficient efforts to watch all developments in enemy countries, and has succeeded in establishing a flow of information which keeps the Government well informed as to what is happening within the enemy lines.

When peace comes the work of the department will be increased. The various problems of peace will need much attention. The Consular Service has to a considerable degree stopped its ordinary commercial work, owing to other important activities and to the disappearance of commerce. With the dawn of peace commercial activities and reports will be of more importance than ever before. For the proper promotion and protection of America's interests during the period of intensified commercial competition which is to follow the war, the Department of State must now during the war prepare for the time that is to follow. This is being done—splendidly and efficiently done. [Applause.]

All of these manifold duties the officials of the State Department, those at home as well as those abroad, under the guidance of the Secretary of State, have performed with a splendid fidelity and a singular degree of efficiency. [Applause.]

The Secretary of State, entertaining a thorough disdain for noisy notoriety, has been content, with arduous toil, to move steadily along the path of duty in the faithful, able, and splendid performance of the labors and responsibilities that appertain to his position. [Applause.]

It is said by Bacon that "the greatest builders are the builders of state." But their most important works are performed

in the closet and not before the public gaze. They are like the silent workers that in the unseen depth of the ocean lay the coral foundations of uprising islands and the enduring beams of mighty continents.

And so the impress of the mind, character, and diligence of Robert Lansing will be left upon the important and far-reaching measures that come under his consideration as an international leader, and will add to the advancement of the cause of humanity and to the prosperity, the glory, and the honor of this Republic. [Applause.]

Mr. FESS. Will the gentleman yield?

Mr. FLOOD. I will.

Mr. FESS. In the interesting review of the activities of the State Department, diplomatically considered, the chairman mentioned the name of Col. House. Would the chairman care to state just what status he possessed while in Europe?

Mr. FLOOD. I would say that Col. House was the personal representative of the President. Men occupying similar positions and having similar functions to those of Col. House have been called confidential agents, secret agents, commissioners, and secret plenipotentiaries.

Mr. FESS. Would that include any authority whatever?

Mr. FLOOD. Yes; such authority as the President conferred upon him.

Mr. FESS. Is there any limit to that diplomatically considered; could such authority go to any extent?

Mr. FLOOD. The President is the organ of our diplomtic intercourse. The authority of his personal representative could only be limited by him.

Mr. FESS. It is rather an unusual procedure in the history of diplomacy.

Mr. FLOOD. No; we have resorted to that character of representation frequently in our history. President Washington did in negotiating a treaty of peace with Algiers. The gentleman will recall that a former President sent Mr. Blount, of Georgia, to Hawaii with paramount authority over our minister there and for the purpose of protecting American lives and interests, to bind this country in any agreement between this country and Hawaii.

Mr. FESS. That was President Cleveland.

Mr. FLOOD. Yes.

Mr. FESS. The reason I ask the question is that there has been a good deal of inquiry by Members as to the exact status, diplomatically considered, that this representative in Europe occupied. It is not that of a minister plenipotentiary nor an ambassador?

Mr. FLOOD. No. As the personal representative of the President. He was appointed in pursuance of a precedent established by Washington and followed by many of our Presidents.

Mr. FESS. Would he be received officially by any country there?

Mr. FLOOD. Theoretically he could not claim full diplomatic privileges, yet practically I assume that any man who went from this country as a personal representative of the President would be received with all the courtesies and honors that are accorded to our ambassadors.

Mr. FESS. The report, if he has one to make, will be made specifically to the President?

Mr. FLOOD. Yes.

Mr. FESS. And that information is not common property?

Mr. FLOOD. When the public interests would not be jeopardized thereby I presume that the President would make the report public; otherwise he would not, as he should not.

Mr. AUSTIN. Will the gentleman yield?

Mr. FLOOD. Yes.

Mr. AUSTIN. Is there any provision made in this bill for increasing the salaries of consular officers located in the Republic of China?

Mr. FLOOD. No; except this: This bill carries what is known as a post-allowance fund.

Under the provisions of this bill that can be used in any country in the world, and the purpose of the department, as we gathered from the hearings, was to make allowances out of that fund to all of our diplomatic and consular officers, attachés, and employees when the increased cost of living justified it.

Mr. AUSTIN. Mr. Chairman, my understanding from a friend in the foreign service in China is that on account of the increased value of the silver coin in China and the high cost of living the old standard of wages or salaries fixed in the consular and diplomatic appropriation bill is not sufficient; in other words, that their salaries were based upon a low valuation of the siver coin or currency in the Republic of China, and therefore they thought that Congress ought to increase their salaries in order to meet the increase in the value of the silver coin and the high cost of living.

Mr. FLOOD. The salaries were not in the first instance based upon the low value of the silver. They were fixed without reference to that, but when these gentlemen get our exchange in China they were able to get a good deal more money in silver than was mentioned in the appropriation. Sometimes they would get $2 for $1 and sometimes $2.25 for $1. Silver has increased in value, and of course that is not now the case with these salaries. They get now just about the salaries that they were thought to be getting all along. But the Department of State realizes that the increased cost of living in China is very great, as it is in all other countries, and it proposes, while there is no increase in the salaries carried in the bill, out of the post-allowance fund, to make allowances to officials there just as they do in other countries.

Mr. AUSTIN. Did the committee consider the question of the Government purchasing the present quarters or purchasing land for the construction of quarters for the American consul general at Hankow, China?

Mr. FLOOD. No; that was not before the committee.

Mr. AUSTIN. Has it ever been considered by the committee?

Mr. FLOOD. It never has.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. Yes.

Mr. MOORE of Pennsylvania. The gentleman from Texas [Mr. SLAYDEN] inquired as to the disposition of alien property taken over by the alien property custodian. I am interested in that matter. I did not catch the answer of the gentleman from Virginia. Did I understand the gentleman from Virginia to say anything about the disposition of the alien property?

Mr. FLOOD. I said where it was not Government property and was not confiscated during the war, I thought it would be returned to the owners after the war.

Mr. MOORE of Pennsylvania. Does not the act creating the alien property custodian provide that Congress itself shall dispose of that property in its own way after the war? That is my recollection of the act.

Mr. FLOOD. I think it does.

Mr. ESCH. Mr. Chairman, if the gentleman will permit, that is correct.

Mr. MOORE of Pennsylvania. The alien property custodian, as I understand it, is merely a custodian.

Mr. FLOOD. Yes.

Mr. MOORE of Pennsylvania. He takes the property over as he discovers it or uncovers it and holds it for the disposition of Congress at the close of the war.

Mr. FLOOD. My view is—and I suppose that is the view of the gentleman—that that property that is here and has not been confiscated and sold by our alien property custodian will be returned to the people who own it after the war. That will be the will of Congress.

Mr. MOORE of Pennsylvania. Subject to the will of Congress.

Mr. FLOOD. Yes.

Mr. MOORE of Pennsylvania. The gentleman from Wisconsin [Mr. ESCH], who is on the committee, refreshes my memory. I merely wanted to know whether I got the gentleman's answer correctly. It is up to Congress to dispose of that property as it sees fit after the war.

Mr. FLOOD. Certainly; Congress could confiscate it all.

Mr. SLAYDEN. Was not that a wise reservation of power, with the thought in mind that the disposition that is made of property of aliens now in charge of our custodian would be dependent somewhat upon the treatment accorded American owners of property in Germany confiscated or taken control of by the Germans?

Mr. MOORE of Pennsylvania. Certainly. I merely wanted to emphasize the fact that the alien property custodian is a custodian merely, and has no power to dispose of property. Congress does that.

Mr. STAFFORD. Mr. Chairman, will the gentleman from Virginia permit me to make an inquiry of the gentleman from Texas?

Mr. FLOOD. Certainly.

Mr. STAFFORD. Mr. Chairman, I want to inquire whether Germany enacted its law concerning the holdings of Americans in Germany after our enactment or prior thereto?

Mr. SLAYDEN. I can not state about that, but I understood the reservation of power of Congress to dispose of the property afterwards was a step to enable us to act properly if there were reciprocity in the matter by Germany.

Mr. BANKHEAD. Mr. Chairman, will the gentleman from Virginia yield?

Mr. FLOOD. Certainly.

Mr. BANKHEAD. Mr. Chairman, the gentleman in his speech made some reference to the committee that had been appointed with headquarters at Berne, Switzerland, to look after the health and comfort of American prisoners of war. Is that a civilian committee, or is it a committee that has governmental jurisdiction from the United States, or what are its functions?

Mr. FLOOD. It is not a committee. It is the American legation at Berne. Of course, that legation has been very much enlarged for the purpose, through the friendly relations of Switzerland with Germany, of bringing about an arrangement by which our legation at Berne and the Swiss foreign office at Berne can provide for our prisoners of war in Germany.

Mr. BANKHEAD. For instance, one of the first prisoners of war captured came from my State, Alabama. Would it be possible through that legation for the relatives or parents of a particular prisoner of war to keep in touch with his whereabouts and whether he is alive?

Mr. FLOOD. As soon as they get in touch with him, certainly. It would be absolutely possible, it would be easy.

Mr. SLOAN. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. Yes.

Mr. SLOAN. I am interested in the colloquy which took place between the chairman of the committee and the gentleman from Ohio [Mr. FESS], with reference to the status of Col. House. I would ask if he is sent as the prerogative of the presidency itself, and not based at all upon any legislation that the Congress of the United States has ever provided? I ask this not as a matter of criticism, but as a matter of inquiry.

Mr. FLOOD. My understanding is that it is the prerogative of the President, that almost since the foundation of the Government Presidents have been sending representatives of this character to foreign nations when vital questions were concerned, to get information and to negotiate for the Executive when this class of appointees could serve a better purpose than the ambassadors and ministers and other regularly appointed and confirmed diplomatic agents.

Mr. HAMLIN. Let me refresh the gentleman's memory. President Roosevelt while President sent a man by the name of Hollander to Santo Domingo, put him on a warship and sent him down as his special representative.

Mr. FLOOD. I thank the gentleman for the reminder. I now recall that case and the debate in the Senate between Senators Bacon and Spooner in reference to it.

Mr. HAMLIN. And President Lincoln also sent one.

Mr. FLOOD. I think it has been done quite a number of times, and it has been thrashed out in the Senate frequently, and the right of the President to make such appointments has always been sustained. There can be no question about the right.

Mr. FESS. I should like to know who President Lincoln sent.

Mr. FLOOD. I said it has been done a number of times. I can not recall any instance in President Lincoln's administration, and I also said it had been thrashed out in the Senate, and the right had been fairly established years ago.

Mr. SLAYDEN. I can remind the gentleman of one very historic instance, in which a man was sent by Mr. Cleveland to Mexico when Gen. Johnson, of Savannah, was minister. It was an unfortunate selection the President made, because this man did not reflect credit. He was sent, however. These people were only sent to advise, and they had no official function to perform in the way of an officer of the Government at all.

Mr. SLOAN. I was not questioning the authority of the President, but it was an inquiry directed as just how he was sent, whether as a prerogative or whether he followed out something that legislation heretofore had paved the way for sending him.

Mr. FLOOD. As a prerogative of the President who has the jurisdiction of our foreign relations, not as the result of power conferred by legislative enactment.

Mr. FESS. Will the chairman please state and insert in the RECORD what particular power, if any, was made public that the commissioner or representative carried with him?

Mr. FLOOD. The gentleman, of course, remembers the unlimited powers given Mr. Blount in the Hawaiian matter.

Mr. AUSTIN. Mr. Chairman, in that connection I wish to ask the gentleman if I understood him correctly a while ago as to President Cleveland sending ex-Congressman Blount to Hawaii with a view to taking over the islands? My recollection of that matter is the administration sent him there to use his influence as a representative of this Government to restore the queen.

Mr. FLOOD. I did not know whether the purpose was to restore the queen or to take over the islands. I was not discussing that phase of the question; but President Cleveland sent Mr. Blount to Hawaii as his personal representative to take in consideration the situation and act in a way that would be to the best interests of this Government and this country and the Hawaiian people.

Mr. AUSTIN. Does not the gentleman well remember in the McKinley campaign following the Hawaiian incident that the charge was that President Cleveland had sent a representative there with instructions to haul down the American flag and restore the queen?

Mr. FLOOD. I would not like to stand sponser for all the things the gentleman has said in his political campaigns.

Mr. AUSTIN. That was said all over the country, and was one thing that aided very largely in creating a sentiment in the United States against the reelection of President Cleveland, that it was the intention of the administration to haul down the American flag in the Hawaiian Islands and restore the queen.

Mr. SLAYDEN. But Mr. Cleveland was not a candidate.

Mr. AUSTIN. Well, that defeated the Democratic Party.

Mr. FLOOD. I know there were charges of that kind, and doubtless the gentleman made them on the stump; but I am not discussing what the President's purposes were in sending Mr. Blount as his personal representative. I am only discussing his right to send such a representative.

Mr. AUSTIN. I misunderstood, perhaps, what the gentleman said when his attention was called to it by the Representative from Ohio, and therefore I wanted the RECORD to state what actually occurred and the reasons why he was sent there.

Mr. FLOOD. Well, I do not know those were the reasons. There were no specific instructions along that line given to Mr. Blount.

Mr. AUSTIN. "Paramount Blount."

Mr. FLOOD. He was sent there with wide and unlimited powers, with paramount authority, and he exercised the powers and authority given him

Mr. AUSTIN. Well, he failed in his mission. The queen was not restored, the Cleveland administration refused consent to take over the islands, they established the Republic of Hawaii, and on the election of President McKinley a treaty was negotiated in the Senate and the islands became a part of the United States.

Mr. FLOOD. I do not know that he failed in his mission. That was not the question asked me and that is not what I intended to address myself to in answer. I know that he had wide and extensive powers and that he exercised the powers. Whether he was successful in exercising them I can not undertake to discuss here.

Mr. GOODWIN of Arkansas. The power conferred upon the President in sending Mr. House to Europe is on all fours with the power conferred upon the President in sending Mr. Root to Russia, is it not, as an advisor in each instance?

Mr. FLOOD. The House mission, of course, was sent with wider powers and——

Mr. GOODWIN of Arkansas. I meant to say that the authority vested in the President is the same in each instance?

Mr. FLOOD. Yes; the authority is the same in each instance.

Mr. FESS. Mr. Chairman, to be perfectly understood, I would like to state to the chairman of the Committee on Foreign Affairs that the Constitution quite specifically defines the powers of the President over these appointments—how our country shall be represented and with what authority in other countries—and by legislation these representatives have been classified in various classes; and Col. House does not fall, as I understand the chairman to state, in any of the classes, either as an ambassador, minister plenipotentiary, resident minister, or any other that we have thus far officially recognized. And what I wanted was, in no captious criticism but inasmuch as there has been a point of dispute, to say that the chairman should put in his remarks the exact status, if we can get it, of Col. House, and what particular authority, if any, he possessed when he went there, in order that the country, which has raised the question as to this particular authority, might be informed. I ask it as a member of the Committee on Foreign Affairs——

Mr. FLOOD. I will do it with great pleasure.

Mr. FESS (continuing). And not at all with captious criticism.

Mr. REED. Will the chairman of the committee yield?

Mr. FLOOD. I will.

Mr. REED. The chairman of the Committee on Foreign Affairs may perhaps enlighten me on this point: I am inter-

ested to know what the gentleman's opinion is as to Germany's position in regard to alleviating the condition of American prisoners. Does he believe that Germany will cooperate in any way to let America, or the prisoners' friends in America, alleviate their condition?

Mr. FLOOD. I believe it has to be carefully watched and the rights and interests of our prisoners insisted upon, and I believe if that is done they will be taken care of for fear of retaliation on our part if they are not.

Mr. COOPER of Wisconsin. Mr. Chairman, I yield 40 minutes to the gentleman from Massachusetts [Mr. ROGERS], a member of the Committee on Foreign Affairs.

Mr. ROGERS. Mr. Chairman and gentlemen of the committee, I desire to address myself to-day in some detail to the status of the mail service between the United States and the members of the American Expeditionary Force in France. The House will remember that a week ago to-day a resolution was adopted without debate, which I had previously introduced, which called upon the Postmaster General to furnish the House with certain information on that subject. On January 31 the Postmaster General made his report to the House, and that report has been printed as House Document No. 892. I have here on the desk a number of copies, in case Members may care to consult it, or, of course, they can get it as usual through the document room.

Here is perhaps the key sentence of Mr. Burleson's report:

> The time required to transmit postal matter from the United States to members of the American Expeditionary Force in France has been found to be from 15 to 30 days, according to the location or frequency of change of the location of the military unit to which the addressee belongs and according to the regularity of the ocean transportation.

Mr. Burleson continues:

> Instances have been reported where letters from the Middle West, mailed so as to make close connection with departing French liner or fast transport, have reached addressees at the front in from 12 to 14 days.

And he proceeds:

> Owing to the irregularity of sailings from New York and constant shifting of military units, about 30 days, on an average, should be allowed for the average letter from the United States to reach the camps in France.

But the substance of the report, as I said, is that the time required to transmit postal matter from the United States to the members of our expeditionary force is from 15 to 30 days.

I confess I was very much surprised at that statement of the Postmaster General. Let me say at the outset that I do not approach this matter in a controversial spirit or in a critical spirit. I have no desire to comment adversely upon the Post Office Department or upon any other department or upon any individual.

But I am impelled to say this: Although Mr. Burleson, of course, believes his statement to be true, there are at least 150,000 American soldiers in France to-day, from Gen. Pershing down to the newest recruit in the American forces, who can testify of personal knowledge that his statement does not represent the usual fact. There are 150,000 homes in the United States who from their own bitter experience know how wide of the mark his statement is.

I had expected that the Postmaster General in his report would recognize that there were very considerable postal delays, would indicate that the usual time of mail in transit was a very much greater period than that which he mentions, and that he would then go on to indicate what changes he proposed to make in order to bring about the sorely needed improvement. But he begins with the hypothesis that it takes from 15 to 30 days for the transit; he continues in a tenor which indicates that he is perfectly satisfied with the conditions to-day, and that in his judgment they are not capable of improvement.

So, under those circumstances, it becomes my first duty to set forth what I believe to be the fact as to the time which is actually required to transmit mail from the United States to members of the American Expeditionary Force in France.

Members of the House will pardon me if I allude to a personal experience which befell me in December when I was in France and on my way from Paris by train to the headquarters of the American troops. I found myself, quite by accident, in a railroad compartment seating six, with five officers of the American forces on their way back from Paris to the front. Three of them happened to be personal acquaintances. And without any suggestion of mine, because at that time I had never heard this question even discussed, they began to talk about the mail service. All of these five men are widely known on both sides of the ocean, so that it can not be argued that their experience resulted from their own obscurity or from difficulty in tracing their whereabouts. These are the facts about their experiences with the mail as jotted down by me in my journal at the time:

Gen. A had sailed from the United States on September 25. The date of this railway journey was December 11. His wife had written him daily during that time. He had received only five of her letters. He had received none by mail for 47 days.

Lieut. B had sailed from the United States on August 25. He was a subscriber to two Boston daily newspapers. He had received but five issues in all and but five letters.

Lieut. C had sailed for France on September 26. His mother had written him regularly twice a week; only four of the letters had reached him, the last dated October 23, about seven weeks prior to the time of our conversation.

Capt. D had been in France since June 1. Although his wife had written to him weekly, as he knew from other sources of information, he had received but one letter from her since his arrival.

Col. E sailed from the United States about September 20. All his wife's letters to him are numbered in the order of her writing. Letter No. 1, dated September 23, reached him November 30. A friend brought over letter No. 15, dated November 11. He had received only one other up to the date of our conversation. He had received none of the second-class mail which had been sent him.

A few days after that time, and about the middle of December, I was at a small town in which a portion of the American troops are undergoing training, not very far from general headquarters. I asked the officer in charge of the military post office if I might examine the letters which were in his post office awaiting delivery, and ascertain for myself the dates when those letters had been canceled in the United States. I secured that opportunity, and I examined, I think, every letter which had come from the United States and which was awaiting delivery to the soldiers. This was the middle of December. Not one of those letters was canceled on a date as late as November 1. In other words, as a minimum—and I can assure the Members of the House that this does not at all indicate the maximum of delay—as a minimum, at least seven weeks had elapsed between the date of cancellation in New York City, for example, and the moment when I examined them as they were there in the post office awaiting delivery.

I talked, of course, with a great many officers and soldiers of the American forces. I talked with them from Gen. Pershing down to the youngest and most recently arrived private. I never saw so uncomplaining a body of men from the top to the bottom. They had no complaint about their equipment, about their food, about their billets, or about the training methods; but almost without exception, and without any drumming up on my part, every man, from major general down, said: "Can anything be done to improve the mail situation?"

Some of them would add, "We do not care so much on our own account, but it troubles the people at home to know that we are not getting their letters." I told them—and I am sure the Members of the House would have told them—that we should and must do everything that can be done in order to bring about an improvement.

Mr. Chairman, of course, we have a war on our hands. Of course, military exigencies must come first. But the condition with which I deal is not a mere sentimental matter. It is not merely a question of the feelings of the soldiers themselves, or of their wives or parents at home. Those considerations are extremely important, but there is the military aspect, also. Upon the morale of an army hangs a very large portion of its utility and excellence. If the morale of these soldiers is suffering, their training and fighting ability will also suffer. I submit to Members of the House that nothing can be easily conceived that will tend to lower the morale of those men more than to feel either that their people at home are neglecting them by not writing or that the Postal Service is so negligent and so slack that the United States is not able to deliver their mail in a reasonable time.

Mr. GREEN of Iowa. Mr. Chairman, will the gentleman yield there?

Mr. ROGERS. Certainly.

Mr. GREEN of Iowa. I had an illustration of that very line called to my attention recently in the case of a soldier who had been sick for a long time, who kept writing home and asking his parents why they did not write to him. He was not able to hear from them for 30 days. At the same time they were continually writing letters to him and were unable to reach him, until I found ways of communicating with him through channels outside of the ordinary.

Mr. ROGERS. The men of the American forces abroad realize that there is a 3,500-mile ocean between their homes and themselves, and that of course they can not expect the kind of service that we demand in this country. I do not think they are unreasonable about it. I do not think that they fail to realize

that war exigencies must come first, or assert that the problem is wholly easy with a submarine-infested ocean between them and their homes.

But they do ask that everything possible shall be done. They have gotten rather beyond the point of expecting packages to reach them. They have gotten beyond the point of expecting that when packages do come they will come in an unbroken condition. Time after time it has happened that when packages arrive the wrappers have been broken and the contents have been rifled, if not altogether removed.

They have gotten over expecting to receive newspapers, simply because newspapers do not come. The soldiers recognize that things which take up bulk in trans-Atlantic liners can not, perhaps, be cared for with the same ease and celerity that letter mail can be. They ask of the American people that at least their letter mail shall be delivered to them as expeditiously and as safely as is possible.

Mr. KNUTSON. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. Yes.

Mr. KNUTSON. Is the gentleman from Massachusetts aware of the fact that the conditions he speaks of as existing in Europe also exist in some of the camps in this country? For instance, Jefferson Barracks mail from Minnesota is 10 to 12 days old when it finally reaches the hands of the soldiers at Jefferson Barracks.

Mr. ROGERS. I have heard statements of that kind. But I think the problem of postal service between here and the expeditionary forces in France is an entirely different one. I prefer to-day to address myself to the over-seas aspect, which will be of even greater importance as time goes by and as our troops in France become much more numerous. If the service has failed to care for the mail of 150,000 men, what will happen when one or two million of our men are in France?

Mr. KEARNS. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. Yes.

Mr. KEARNS. Has the gentleman made any investigation as to whether the trouble is on this side or on the other side?

Mr. ROGERS. I will come to that in a moment.

Mr. GREEN of Iowa. I intended to call the gentleman's attention to a question in relation to the case that I alluded to, which was down at San Antonio, and that is that if the postal authorities are so negligent in a case like that, what will happen to our soldiers abroad?

Mr. COOPER of Ohio. Mr. Speaker, will the gentleman yield?

Mr. ROGERS. Yes.

Mr. COOPER of Ohio. I have received several letters from a gentleman in my district who has a son in France, and he tells me it is almost impossible to get mail to his son. Do you know whether there is any effort being made on the part of the authorities in this country to try to see whether the mail gets to our soldiers boys in France?

Mr. ROGERS. I will give to the gentleman a copy of the report by the Postmaster General which has just been transmitted to the House, and which indicates the present prospect, or rather the lack of prospect.

Now, Mr. Chairman, at the risk of being somewhat wearisome, I am going to read extracts from 15 or 20 of the very many letters which I have received, because they present actual and recent cases. The Post Office Department will tell you, if you take this matter up with it, that it wants specific cases. It is my purpose, so far as possible, to cooperate with the Post Office Deparment by furnishing specific illustration of the conditions which I believe exist.

I shall not read into the RECORD the names of the people who have written me, but I shall be very happy indeed to furnish those names to the Post Office Department if they desire them in connection with any investigation. I shall also be very glad to offer any information that I have and to render any assistance that I can to the Post Office Department in running down the difficulties and in correcting them if possible.

I have here, for example, a letter from a man in Massachusetts, who is chairman of a local draft board. He says:

When the mails are delayed it causes both Mrs. K. and myself some worry. I am inclosing a copy of my son's letter, in which he says his mother's letter of August 12 has just been received November 29. Now, that is the kind of thing that gets on one's nerves. The longest his letters to us have been on the way was four weeks, which is not so bad. Most of them came through in three weeks, which is very good, all things considered. Either Mrs. K., my daughter, or myself write each week in turn. We do not wish to overburden the mails by writing oftener, but how we do wish that our letters could be delivered promptly and that we could feel sure that, barring accidents, he gets them all.

I think that as I proceed the Members will find that almost all the letters which discuss that phase of the case indicate that much the worse delays arise going east to France, and that, on the whole, the service coming from France is as expeditious as can perhaps be expected.

Mr. TILSON. Will the gentleman yield?

Mr. ROGERS. With pleasure.

Mr. TILSON. Does the gentleman intend later in his remarks to speak of the debarkation facilities?

Mr. ROGERS. Yes.

Mr. TILSON. And the congestion of mails at the points of debarkation?

Mr. ROGERS. Yes; I shall come to that in just a moment. I shall be very glad to have the gentleman's observations on that point, because I confess I have not the detailed information which I should like.

Mr. TEMPLE. Will the gentleman yield for a moment?

Mr. ROGERS. With pleasure.

Mr. TEMPLE. With regard to delays to mail coming this way, the letters are not always promptly sent. I have received only two letters from a soldier in France, one of which was 39 days on the way and the other 41 days on the way.

Mr. ROGERS. I was trying to put the best foot forward for the department. I think it is unquestionably true that the service is much less delayed coming this way than going the other way.

Here is a letter from the president of a national bank—and I may say that the only bright spot in this mail situation is that the delays fall upon the just and the unjust, upon the rich and the poor, upon the high and the low alike. The Postal Service favors nobody. It is equally bad to all. [Applause.]

This letter says:

I have a son in the medical branch of the service in France whose mail is sent in care of chief surgeon, lines of communication. It takes from six to eight weeks for him to receive a letter from the United States, and there were sent four Christmas packages on November 5 and about the 15th; that to 6th of January, 1918, had not reached him. These packages were all within the limit of 7 pounds and two wood cased. The first Christmas box, sent November 3, was received December 11, and then the four others not at all up until January 6.

The letters written home from France are received in from 16 to 30 days, usually in about three weeks, but the letters from the States to him are very irregular, and to obtain a reply from a letter sent to France one must figure on about 12 weeks, at the least.

Here is a letter which came to me in my absence on the other side, but which is typical of scores which I have received and of which I shall read only a few:

I am writing this letter in interest of boys in the One hundred and first Regiment now in France.

Every letter I have read, either personal or in the newspapers, the fellows all want to know why people don't write to them. I, for one, have written 35 letters and my husband complains he has only received 2. It can't be on account of the wrong address, for surely some one would write the address correctly.

I think you will agree with me that nothing would make those soldiers happier than to get mail from home.

Here is a letter from a physician in my home city of Lowell, whose son is a lieutenant in the expeditionary force:

Would again ask your help in securing better facilities for reaching the men in France with comforts of various kinds. I have sent seven parcels to him (my son) for personal use and that of his command to the value of about $140. Only one parcel has reached him—December 26—which left here October 2. One of his company received a parcel which had been opened and two or three pairs of heavy socks removed. Cases of this kind seem too frequent to be an accident.

Here is a letter from a neighbor of mine whose son is abroad:

My son has been in France since August, but has received less than a half a dozen letters from home. For the past six weeks in every letter he states the fact, "Still no mail from home." I average writing five letters a week. In his last letter he mentions on that day receiving two letters from me with widely different dates, one dated October 1, the other a date in November.

A Mrs. Quinn writes:

The family and friends have written almost daily to the young man ever since he left with the troops, but all of his letters from the other side express great surprise at not hearing from his friends, and great anxiety because he does not hear. A letter received only a few days ago by one of his friends here in Lowell inquired whether his parents were all right, and wished the friend to tell them that he was anxiously awaiting mail from them.

Mrs. Quinn was greatly distressed that their letters had not been received by the young man, as they had been faithful correspondents, and was wondering if there was any way in which Mr. ROGERS could ascertain why they had not been delivered. Of course, the failure of a single letter (or of two or three letters) to reach the young man could not be wondered at, but she can not understand why all letters from both family and friends have gone astray.

Here is a letter from a Frenchwoman:

Friends of mine who went away with the Eleventh Engineer Corps in July had as many as 15 packages addressed to them, and not one of them has been received. My two sons are on the eve of their departure for dear France to be on Gen. Pershing's staff. Now, a mother's heart is at stake. All I have left is to write and send little delicacies to my dear boys—the only children I have ever had. Yes; my sacrifice is complete, but all for the sacred cause.

A little touch of home is a whole lot to the lonely soldier in the trenches.

And we all know that that is true. [Applause.]

Here is a letter from a man in Lawrence, Mass.:

We took great pains to early forward articles to our boy in Paris, France. To be more specific, on November 8, 1917, I mailed at the Lawrence post office (personally) a package of combination paper and envelopes.

On November 9, 1917, I mailed (delivered personally) at the Lawrence post office one box with Christmas articles from all members of the family.

We have received from my boy during the last two months mail every two weeks on the average, but until he had been away from home two months, from September 12, 1917, he heard nothing from us. Up to January 18, 1918 (the date of his last letter), he had not received the articles I have mentioned.

Here is a letter from a Vermont friend:

Lots of our boys from here have had no letters; and, as I go among people, it is hard to keep spirits up when the lad is writing "no letters; why doesn't mother write?"

Here is a letter from a constituent of the gentleman from Ohio [Mr. LONGWORTH]:

There certainly must be something radically wrong. Packages, Christmas boxes, mailed and packed and examined by the Post Office Department as being in good condition before November 14 have not been received up to December 27.

I am only one who has given up all we have, our two sons, who are in the Rainbow Division. I can fully appreciate that the Government has its hands full, but we feel that some consideration and feeling should be shown those brave boys over there somewhere and those they have left.

You will notice that throughout this correspondence there is no bitterness, no vindictiveness, of attack. We find everywhere an expression of regret that the conditions are as they are, and the expression of a hope that something may be done.

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. ROGERS. Certainly.

Mr. GREEN of Iowa. Recently I received a letter from a number of ladies at Council Bluffs, who are mothers of boys who are across in France, and who sent a joint communication to me. They state that of the parcels that they had sent they were satisfied that at least 90 per cent had never reached the soldiers to whom they were consigned, and never would.

Mr. ROGERS. I had a letter yesterday from Pittsburg, Kans., a town of which the gentleman from Iowa may know the location, but of which I had not previously heard, I regret to say. This letter says:

I have sent my son in France four boxes. Two I sent October 23 via New York, the others we sent since Christmas. I received a cablegram yesterday telling me he had received nothing. Can you imagine, Mr. ROGERS, a boy 19 years of age, away over there among strangers in this terrible conflict? Christmas came and nothing from mother. I do hope you will take this up and investigate this. I am only one among hundreds here in Pittsburg that have had the same experience. We pay all the postage the Government requires, and would be only too glad to insure them if we were allowed to. I insured one box for $5 to Camp Mills, N. Y., before the boys sailed; that was never received. I put in a claim here at the office two months ago. The postmaster told me to-day I might not hear about it for two years, and may never hear.

Mr. COOPER of Wisconsin. What is the date of that letter?

Mr. ROGERS. This is dated January 29.

Mr. SLOAN. Will the gentleman yield?

Mr. ROGERS. Certainly.

Mr. SLOAN. I desire to say that Pittsburg, Kans., is considerable of a city in the southeastern part of the Sunflower State, consisting of houses built almost entirely around the residence of our distinguished colleague, Mr. PHILIP PITT CAMPBELL. [Applause.]

Mr. ROGERS. I apologize to the sunflowers. Here is a letter which the gentleman from Ohio [Mr. FESS] has just handed me, and which I will read at his request:

As I have read in this morning's paper that the question of mail to American troops in France has been brought to the attention of the House of Representatives, I am emboldened to write what I have been wanting to write for some time. And I am writing on behalf of many families of soldiers in France, as well as for myself.

I have an 18-year-old boy with the Rainbow Division in France. I have written to him every three days, or twice a week, ever since he left home. The last letter I received from him was written December 10, and at that time he had received two letters from me after arriving in France. Other boys from this town have written that they had received none of the letters their families were sending in a steady stream.

We have not heard whether our Christmas boxes ever reached the boys, for it is almost a month since we received letters from them, although about 10 days ago every officer's family here received letters; some four and six at once.

We have tried to be patient and uncomplaining, for we know the transportation difficulties and that the Government has so many problems to solve, but it is getting to be very hard. An army of homesick boys abroad and a lot of heartsick mothers at home will not be very efficient aids in winning the war. There surely is need of an investigation of the matter, and I am sure that you will do all in your power to help us keep in touch with our boys.

Here is another letter somewhat in the same vein:

As you have recently returned from the "war zone," I take this liberty to write you concerning my two brothers who are with the American Army in France.

My brothers left the States in the fall of 1917 with the One hundred and first Infantry. Since then my family has written at least two letters a week to them. In addition to this several parcels have also been sent.

I am just in receipt of a letter from my brother Charles, in which he says that he has received no new: from me since he left home. All of his recent letters are written in a disheartened manner as if he were led to believe that the folks at home had forgotten him. This also applies to the letters of my other brother, Thomas.

I have three or more letters of somewhat the same character which I ask unanimous consent to have incorporated in my remarks without reading.

The CHAIRMAN (Mr. HOUSTON). The gentleman from Massachusetts asks unanimous consent to insert letters in the RECORD as a part of his remarks. Is there objection?

There was no objection.

The letters are as follows:

A soldier writing under date of January 1, 1918, to his mother asks why she did not write? Sailed August 8, 1917.

A captain writes his aunt that he has not received her letter nor from his sisters. Packages sent him failed to show up. He also sailed August 8, 1917.

My oldest son has been in France since August 12, 1917, and I have written to him every week since then, but yet he has only received one of my letters. My youngest son landed in France the latter part of last September and he has only received one of my letters and one from his sister, and during the first week of last November I sent my sons each a watch as a remembrance of Christmas and they have not received them yet, and during the second week of December last I sent my younger son a razor and wool socks and he has not received them yet.

—

A letter written in France September 22, 1917, was not delivered to me until November 2, 1917. I wrote a reply at once and posted it the same day, November 2; this was not received in France until December 19, 1917, and the reply, dated December 19, was not received here until January 20, which was, of course, a trifle better time. A member of the United States Engineers informs me that he writes every week. I do not receive one letter in three weeks. During the months of October and November I sent by first-class postage, sealed, 10 packages, the contents of each package being worth from $2 to $6, and the postage costing from 60 cents to $1.67. Not one of these packages had been received on the 19th day of December. I also sent 10 Christmas packages, all by first-class postage, some packages costing as much as $1.64. I, up to this time, have not had one of these packages acknowledged. The Post Office Department refuses absolutely to register any package, so one does not have any recourse whatever, nor any means of tracing. I also gave in October, 1917, $10 to the American Tobacco Co. to furnish 40 tobacco kits to as many soldiers, but only five have so far been acknowledged. Judging from the gratitude expressed on the 5 cards received, the other 35 could not have been received by any soldiers at the front.

What becomes of these packages? I have been informed by persons who have been in France recently that they are appropriated in France by persons handling the mails, but, of course, have no means of proving this statement. No wonder soldiers are losing their morale. Exposed to danger and hardship and then to feel themselves deserted and neglected by people at home from whom they have every right to expect care and consideration. A terrible injustice is being done. In my personal case, many sacrifices were made to send these packages, and then for them not to reach the person for whom they were intended causes one to become very skeptical to say the least.

There certainly can be no justification of delays in transit of from six to eight weeks. It would seem that parcels-post packages, in many instances, do not reach their destination at all.

—

SEATTLE, *January 28, 1918.*

Hon. JOHN F. MILLER, M. C.,
Washington, D. C.

MY DEAR FRIEND JOHN: By unanimous request of the auxiliary of the Signal Corps, which is composed of the relatives of the boys of the One hundred and sixteenth Field Battalion, I am directed to ask you if there is any possibility of our being enabled to hear from our boys who are now somewhere in France and who left Camp Mills supposedly on the 25th or 26th of November, except when we pick up a morning paper and read an obituary notice, as we did Saturday morning when we read that Young Austin, with whom you are well acquainted, died of pneumonia. I have taken this matter up with the Secretary of War to see why we could not at least hear how they are but have had no reply.

Mrs. Dellahn, the police matron, with whom you are acquainted, whose only son is in France with my boy, called me up and said if she did not have some word from her boy she would go crazy. The only word we have had was written on the way over and mailed when they landed. On December 22 the auxiliary sent a Christmas cablegram to the commanding officer of the battalion, but we have never heard from it. We have sent the battalion money, knitted goods, and many other useful articles. We do not expect to have them give us their personal opinion of how the war should be operated, but we do not see why we can't have some word as to how they are getting along.

I appreciate that I can talk to you as a friend and as a fraternal brother, and I am going to ask you if you will endeavor to bring some influence to bear or offer some reasonable excuse why we can not have some word. I know I am not exaggerating when I say that I have 10 telephone calls a day from anxious parents. The maddest man in town is C. B. Bagley. His son Cecil commands Company C of the One hundred and sixteenth Battalion, and he has not had a word from him.

G. M. BUTTERWORTH.

Mr. SEARS. Will the gentleman yield?

Mr. ROGERS. Yes.

Mr. SEARS. Have these letters been called to the attention of the Post Office Department?

Mr. ROGERS. I have sent a copy of the recent letters regularly to the department. Although I have not read the names of the writers, I am willing to give them to the department and to cooperate with any investigation that it may care to make.

Mr. SEARS. Does not the gentleman think it would be well to take this matter up first with the department?

Mr. ROGERS. I have repeatedly done so. Is the gentleman from Florida familiar with the report to the House of the Postmaster General, in which he says that the time required to transmit to France letters is 15 to 30 days? That statement is the basis of my remarks, made upon no less authority than the Postmaster General himself.

Mr. SEARS. The gentleman is aware that the mails are in a congested condition, as we all know.

Mr. ROGERS. I am coming to that now.

Mr. MILLER of Washington. Will the gentleman yield?

Mr. ROGERS. Yes.

Mr. MILLER of Washington. I want to submit to the gentleman a letter along the same lines which I have received from a constituent in Seattle.

Mr. ROGERS. I will take that and print it with others without reading. The inquiry of the gentleman from Florida leads us naturally to a consideration of where this delay arises. The journey of a letter or other piece of mail from its place of posting in the United States until it is delivered to the soldier in France consists, roughly speaking, of four steps. First, the transit from the point of posting to the dock in New York or any other port which may be the embarkation point; second, the ocean voyage; third, the journey of the letter from the point of disembarkation in France to the point where it is delivered over to the military authorities somewhere in the American area; fourth, the handling by the military authorities and the delivery by them to the soldier who is the addressee. I want to take up each of the four stages.

The gentleman from Connecticut referred a few moments ago to the conditions prior to the placing of the mail on the ocean steamer. I have not as definite information on that subject as I should like. I desire, however, to read a letter which I recently received from a correspondent whom I do not know. He signs his name and gives his address:

> I was employed in the capacity of a temporary clerk in the New York post office, Station W, from December 5 to January 1. During my time in Station W was considered sentimental in regards to my care of soldiers' mail. I attributed this to my care of the packages addressed to them; they would be more cherished than the ordinary. Being transferred to the foreign station, I was surprised to find mail stacked as high as the ceiling for the warships and forces in France, so neglected they were using shovels to make passageway for workers to pass, and conditions were such that we walked upon broken packages—their contents such as puddings, candy, mufflers, handkerchiefs, socks, etc., things which would be almost impossible to replace in their respective packages.

That is substantially all the specific information I have as to conditions before letters are actually put on board the mail-carrying vessel. Of course we know that there is a slowing up of mails in this country. We know, as a gentleman suggested a little while ago, that there is difficulty even in sending mail to soldiers in American camps. And yet I think the delay which is consequent upon handling within the United States is, on the whole, rather slight.

The Postmaster General, as I have pointed out, says that the average time from the sender in the United States to the addressee in France is two to four weeks. I have shown that, if my own experience is at all a criterion, the minimum time is nearer seven weeks than two weeks. I do not think that a very large part of that disparity is to be explained by the situation which prevails on this side of the ocean.

So we come to the second stage of the journey of a letter. I had supposed that the Postmaster General would lay a good deal of emphasis upon the time consumed in the ocean transit, because we all know what conditions are on the Atlantic; that war requirements can not be made subordinate to postal exigencies; and that as long as the war lasts and the submarine is a factor delays in the 3,000 miles of ocean voyage will inevitably exist. Here is what the Postmaster General says on this point in his report:

> Mail is dispatched from New York on all available commercial liners and transports. I am informed that letter mail clears entirely with every dispatch, although occasionally, which is exceptional, the lack of space on liners or transports causes parcel post or paper mail to fall back on the next outgoing ship.

In other words, all letter mail goes on the first vessel after its arrival at the port of New York, but occasionally and exceptionally other mail, including newspapers and packages, has to wait one ship, but no more. That, I think, is a very creditable and, to me, a rather surprising state of affairs.

Then the Postmaster General gives a list of the sailings from the port of New York beginning November 1 and ending January 25. I will not read those dates in detail. They appear in his report. There were 10 in November, 5 in December, and 9 in January up to January 25. There was a departure, on an average, every three and a half days, and the maximum time intervening between the departures was seven days. I think, all things considered, that is creditable to the Post Office Department, and it indicates that the fault is not in getting the letters on board of the steamers destined for Europe.

With regard to the time consumed in the ocean transit the Postmaster General says:

> The time that elapses between the loading of the mail on a commercial liner and its arrival at a French port varies from 10 to 14 days, according to the speed of the ship or its route across the ocean. Mail on transports is loaded whenever and to the extent that the Army has space available, but it does not follow that transports sail directly for their destination immediately upon being loaded. Mail placed on transports has arrived in France sometimes in 12 days and sometimes as much as 21 days after being loaded in this country.

In other words, the Postmaster General says that sometimes only 10 days and sometimes as much as 3 weeks is consumed in the actual steamer voyage. That statement should be compared with the minimum of 7 weeks which I found in one military post office in France to have elapsed between the posting in the United States and the time when the letter was ready for delivery. It should also be noted that in the 5 weeks between November 3 and December 7, just prior to my visit to that military post office, 10 mail-carrying vessels had left New York. Yet no letter with a United States post mark as late as November 1 was there. So I think, on the whole, that neither the first step nor the second step can explain any considerable part of the delay.

I doubt, as I said a moment ago, whether the delay from the point of posting to the point of embarkation is very serious or can be very greatly reduced—perhaps a day or two at the outside. I doubt if, as long as the submarine continues to be a menace, we can very materially reduce the time at present consumed in crossing the Atlantic.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. COOPER of Wisconsin. Mr. Chairman, I yield 15 minutes more to the gentleman.

Mr. ROGERS. So we come to the third and fourth stages of the journey, from the point of disembarkation in France to the point where the letters are turned over to the military authorities, and then the time consumed in the handling and delivery by the military authorities. I am frank to say that I have not been able to get any very detailed information why the delay to eastbound mail comes in either of those two places, or both. It is only, you will observe, by the process of elimination that I am forced to the conclusion it must be somewhere either in the third or the fourth stage. Letters coming west frequently come in 3 weeks from the time they are posted by the soldier, and sometimes they come in about 2 weeks. Ocean congestion can not be the explanation of the great difference between 2 or 3 weeks and 7 or 8 weeks. It would seem that the explanation—at least in part—is that the task of collecting the letters from the various points where they are posted by the members of the expeditionary forces is very much less than the task of pushing them out to the almost infinite number of points where the letters have to go in order to be distributed to the addressees. I shall come in a moment to what I conceive to be the way to ascertain exactly what the facts are.

I have said more than once in my remarks that we are at war and that we can not except a smoothness and celerity of service which would be characteristic of peace times. We can not overlook the obstacles which are in the way of perfect service; we can not overlook the paramount things which must be cared for, even prior to the soldiers' mail. But we can fairly compare our military postal service with that of our cobelligerents. Take the case of Great Britain. The very fact that we have an ocean between us and our soldiers is only an additional reason why we should avoid all the avoidable delays. We can not avoid the unavoidable, and ocean transit is one of the unavoidable things. Great Britain, of course, does not have to contend with an ocean. But she has to load every piece of mail upon a cross-channel steamer, carry it across, and unload it at the other end. She has an army on the west front of two or three million men, perhaps twelve or fifteen times the size of ours now in France. One of the members of the British mission who has recently been in this country, and who only a few days ago returned to be surgeon general of the British forces, told me that during the first two years of the war, when he was much of the time in or near the trenches, he habitually received a letter written by his wife in the west of England one morning on the following afternoon—habitually received the letter the day following its posting in Cornwall. That illustrates the wonderful system that has been achieved in the case of Great Britain. While we can not, with an ocean in between which takes from 10 days to 3 weeks to cross, approximate that record, I think we can regard it as our goal, of course making a due allowance for the necessary time for the ocean voyage. The day I sailed home from France,

which was on the 22d day of December, three days before Christmas, the following article appeared in the Paris press. It is a signed letter by Mr. Harold Ashton, with the British Army in France, dated Friday, December 21:

FRIDAY.

Santa Claus has already arrived in the shell holes around the Hindenburg line, and the preliminaries of our fourth Christmas at the front have begun very merrily and in the most seasonable weather. This is, of course, the biggest Christmas of the war for good wishes, good cheer, and good things. It is certainly the best organized, and wonderful things are being performed to this end by the tireless officials of the army post office. It is all sheer wizardly. Regents Park Post office is linked up with the trench line, where our soldiers lie in their fuzzy coats gazing into the mists of Flanders or watching the grim shadows of Bourlon Wood. Forty-five hours ago a lass in Aberdeen posted a pretty card to her lad at the front, she knew not where. This morning it was delivered to him as he crouched watching the frosted towers of Cambrai rising out of the haze.

THIRTY-FOUR THOUSAND BAGS IN A DAY.

The army post office in France has made preparations this Christmas for receiving 200,000 bags above the normal, equaling 25,000 bags per day. This figure has already been exceeded one day this week, 34,000 bags being received from England. Everything is working smoothly, and so well is the machinery running that the whole of the Christmas mail will be delivered to all parts of the battle front before Christmas Day. Normally the Army writes 8,500,000 letters every week. This week the number is doubled, and the lorry service has had to be increased accordingly.

I think we can agree that that was a very remarkable achievement, but I do not think we are willing to agree to that, making due allowance for the geography of our positions, we can not do exactly as well for an Army not one-tenth as large. That is the goal to be sought. We should not content ourselves with the condition which now exists, and which we all know from our correspondence is bringing about so much grief and hardship both to the soldiers and to the fathers and mothers and wives at home.

Mr. GOODWIN of Arkansas. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. Certainly.

Mr. GOODWIN of Arkansas. The gentleman is making a very interesting statement, a part of which unfortunately I have not been able to hear. I believe he has traced the American mail to the point of disembarkation in Europe. After the mail reaches Europe, into the hands of what postal authorities is it distributed, and what suggestion has the gentleman as a remedy as to that?

Mr. ROGERS. Here is what the Postmaster General says upon that point:

The time required for the railways to transport this mail to the camps or stations of the American force is from one to two days, according to the distance or location of the troops.

I am informed that this mail is turned over promptly to the duly designated mail orderlies of the military units to which it is addressed and that no mail for the troops is held at any of the field postal stations. Military orderlies open the lead-sealed sacks and distribute the individual pieces of mail to the soldiers to whom they are addressed, or mail is readdressed by them and forwarded to individual officers or men who may have been transferred to other stations.

That is all that bears on that particular point. Let me repeat this before I yield again: My criticism is not addressed to the Post Office Department or to the Postmaster General or to any other department or individual of the Government. I know what the condition is that exists. I know that the letter of the Postmaster General does not deal with the condition, which I suspect the gentleman from Arkansas and certainly I found to exist on the other side. What I want to find out is how we shall deal with the situation in the light of the facts that we know to exist in order to bring about an improvement. I have stated that in the first and second steps of the journey of a letter to France apparently no great avoidable delay occurs. The Postmaster General says that only one or two days is required to move a letter from the point of disembarkation in France to the point where it is delivered over to the military orderlies. If these statements are all true, the only place that is left for delay is after it reaches the Army in France. Yet a great deal of delay certainly ensues somewhere, because I have proven, I think, that many of these letters, perhaps most of them, take seven weeks as a minimum to reach their destination. If it is the Army that is responsible, let us see how we can help the Army to remedy the defects. If it is the congestion in New York City which is at fault, let us see how we can remedy that. If it is the railroads in France, if it is the handling of the mail by our allies in France or England, let us see what we can do to meet the defect there. But the Postmaster General, and I say this with extreme deference, does not help us very much in his report to know where the fault really is.

My proposal specifically is this: Let us have the Postmaster General or the President or Congress appoint a strong commission, men who are big men in the abstract and men who are big men in postal work. I speak of men of the type of the former First Assistant Postmaster General, Mr. Roper, and former Postmaster General Hitchcock. I do not know that either of them is available in fact. But let us have men who are strong men, men who can look into this problem from the moment the letter is posted in Arkansas or in Kansas or in Massachusetts, who can trace it all the way to New York, who can follow it across the ocean, who can follow it through its disembarkation processes on the other side, who can trace it on its way to the military authorities who receive it, and can follow every step after it passes into the hands of these military authorities. I submit that nothing tangible is being done at this moment to improve the service, and that something ought to be done, something should be done, not only in fairness to these boys and their families but, as a military measure, in fairness to the United States as a whole. We must demand that everything possible be done in order to keep at the crest the morale of our soldiers in France.

Mr. GOODWIN of Arkansas. Will the gentleman yield?

Mr. ROGERS. I will.

Mr. GOODWIN of Arkansas. To what fact does the gentleman ascribe the fault of the fairly prompt delivery of mail after it reaches France? In other words, to what extent are soldiers being shifted from one camp to another, so as to lose their addresses from time to time?

Mr. ROGERS. The gentleman's opinion about that is as good as mine. He, too, has just been in France. Most of the men I happened to encounter, men who are from my neighborhood and whom I know personally, were located at a particular city or town or village, where they remained for a good many weeks or months. At all events, although the Postmaster General properly says that in some cases there are delays arising from the shifting of troops, it does not seem as if the unbroken testimony which my mail and, I suspect, the gentleman's mail reveals can be explained on the theory that the soldiers have been moved. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The time of the gentleman has about expired; he has but one minute more.

Mr. MILLER of Washington. Will the gentleman yield for a question?

Mr. ROGERS. Certainly.

Mr. MILLER of Washington. I would like to ask the gentleman if he did not ascertain that the ordinary mail route of mail for the American expeditionary forces was from the port of disembarkation in France to general headquarters in Paris?

Mr. ROGERS. I think that is true.

Mr. MILLER of Washington. Did not the gentleman ascertain that considerable delay was occasioned through subdistribution at that point in Paris—the Hotel Mediterranean?

Mr. ROGERS. I repeatedly heard that statement, but I did not hear it, as perhaps the gentleman did, from one who had direct knowledge.

Mr. MILLER of Washington. I would like further to ask the gentleman if, while he was at the Hotel Mediterranean, the mail headquarters in Paris, he did not see large quantities of mail there that had not been delivered and had been there for many days and some for many weeks?

Mr. ROGERS. I did not go there. The gentleman is inclined to think, from his experience, that the delay occurs in France?

Mr. MILLER of Washington. I certainly am from my investigation, and I think I will be borne out in that by every gentleman that was with the congressional party who went there.

Mr. ROGERS. That, of course, was my own impression.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COOPER of Wisconsin. I yield the gentleman another five minutes.

Mr. ROGERS. I thank the gentleman. Of course, it is exceedingly difficult for men of the House, with every desire to be fair and to be acquisitive of information, to know exactly how responsibility should be apportioned. I have preferred in my remarks to-day to deal with the facts that I know exist and with the delays which I know occur between the time the letters are posted and the time they are delivered. I do not think it is our function, however interested we doubtless are, to attempt to try to subdivide the blame for these conditions.

Mr. COX. Will the gentleman yield?

Mr. ROGERS. In just a moment. I earnestly hope able men can be appointed to consider this whole matter in an official way, to apportion the responsibility, and to reorganize and readjust as they find necessary. It ought not to be a very difficult matter to obviate all possible delay. If the difficulty arises because of shortage of help, as I heard suggested in France a number of times, that condition can not be tolerated. If the Postmaster General has not enough help for that purpose, or if our military forces have not been assigned enough postal clerks for that purpose, they should only ask Congress for what is needed in order to have it the very next instant. [Applause.]

Mr. COX. Will the gentleman yield?

Mr. ROGERS. I yield to the gentleman.

Mr. COX. To what point in France do the military authorities take charge of our mail?

Mr. ROGERS. Of course, our troops are fairly well scattered over France, but I understand that the great bulk of our letters go to Paris for reapportionment among the several postal sectors which our Army occupies.

Mr. COX. Would the gentleman be permitted to tell the ports at which our vessels are permitted to land over there? Then that will lead me up to the other question.

Mr. ROGERS. I should prefer not to mention the name of the ports, although I think it is a matter of common knowledge that the ports in the Bay of Biscay are the ports which are mainly utilized.

Mr. COX. Then all up to that port the civil side of our Government has charge of our mail?

Mr. ROGERS. Yes.

Mr. COX. Then our Government still maintains charge and custody and control of our mail from that port through to Paris, does it?

Mr. ROGERS. That is true.

Mr. COX. It is distributed in the city of Paris still by the civil side of our Government?

Mr. ROGERS. Yes.

Mr. COX. Then it does not reach the military side of our Government until after it passes on through Paris and to the line somewhere, does it?

Mr. ROGERS. As I understand it, that is true provided the letter goes through Paris. For example, a unit stationed at one of the ports would have its mail segregated so that it would not go to Paris and come all the way back. It would be dropped at the point of disembarkation and be delivered there. But, subject to that qualification, I think the gentleman's statement is true.

Mr. COX. I have been told that we had 38 mail stations from the time that our mail landed in the port until it was finally delivered. Now, where is the main distributing point, or center, of our mail? Is it at the port, in the city of Paris, or on the line? Does the gentleman know?

Mr. ROGERS. I do not feel qualified to answer that with certainty. I should say that the main postal center was Paris. Then we have a number of military postal subdivisions or distributing points, and those are scattered about according to the location of the troops at the moment.

Mr. COX. Let me ask this question; I am trying to get information: Did the gentleman run across Mr. John Clark anywhere over there?

Mr. ROGERS. I did not.

Mr. COX. Does anyone here know where he is located there?

A MEMBER. I think he is on a homestead there. [Laughter.]

Mr. COX. A Member says he is on a homestead there, but he is not. He is a mighty big man. He is a man that has been engaged in the mail transportation for the last 20 or 25 years. In looking for a big man I do not know where you could get a bigger one, unless you could get John C. Koons.

Mr. MILLER of Washington. Will the gentleman yield for a moment? Our information in Paris was that the mail, generally, for the expeditionary force was sent to Paris, and from Paris distributed to the various military sectors.

Mr. COX. Then our mail never reaches distribution at the hands of the military until it passes out of Paris?

Mr. MILLER of Washington. No. As soon as it leaves Paris it is in the hands of the American military forces. That is what we were informed.

Mr. COX. That is just what I wanted to know.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. COX. I want to ask one more question.

Mr. COOPER of Wisconsin. I yield one minute more, in order that the gentleman may answer a question.

Mr. COX. If the fault occurs at the time the mail leaves Paris for the line, the blame attaches to the military and not to the postal department, does it not?

Mr. MILLER of Washington. I was told that while in Paris that Paris was the general distributing center. There are a lot of mail clerks detached from service in this country who are sent there in the Postal Service. At the moment they have their headquarters in Paris, and I was told that there was where the congestion occurred; that the number of clerks detached by the Post Office Department in this country was inadequate to take care of the condition there.

Mr. VAN DYKE. Will the gentleman yield for one question?

Mr. MILLER of Washington. I will.

Mr. VAN DYKE. Is it not true that the largest part of the congestion is in the city of New York at the present time, at the Chelsea terminal?

Mr. MILLER of Washington. I have no information on that.

Mr. VAN DYKE. I think, if the gentleman will look it up, he will find that the greatest congestion is in New York at the present time, because of the inadequate and insufficient force used at that terminal.

Mr. MILLER of Washington. The gentleman from Arkansas [Mr. GOODWIN] was in Paris at the same time we were, and he may give us the benefit of his inquiries.

Mr. FLOOD. Mr. Chairman, I yield 20 minutes to the gentleman from Texas [Mr. SLAYDEN].

Mr. SLAYDEN. Nearly all the world is at war. Mr. Chairman, and quite all the world of importance is talking peace and yearning for it even "as the hart panteth after the water brooks." All the world, absolutely all, is war weary and hardly making an effort to conceal that fact. Even the aggressive, military Empire of Germany, while still boasting itself a conqueror, is not able to deceive the world with a mere camouflage of words, and Austria frankly confesses her anxious longing for peace. In fact, indirect negotiations for peace are on, for the speeches by foreign ministers and chancellors mean nothing less. Gradually Governments seem to be coming together on some important points that must be features of any peace treaty that will be made. Two-sevenths of the President's plan have been accepted unreservedly. When we get Von Hertling's irreducible minimum we will, I believe, be much nearer an agreement, and in the end all the great features of the plan set out in his address on January 8 in 14 specifications will be accepted as the basis of the future relations of Governments.

Mr. Chairman, I am going to venture to use the 20 minutes allotted to me by the courtesy of the chairman of the Committee on Foreign Affairs to direct attention to an agency for peace known as the Interparliamentary Union. The oldest peace organization in the country, the oldest in the world, so far as I am informed, is the American Peace Society. It has been working since 1815, the year of the Battle of Waterloo, to spare the human race such horrors as are now their daily portion.

But age is not the only measure of service. There was organized in Paris on the 21st day of October, 1888, another society that has the same purpose in view and whose services entitle it to the gratitude of the civilized world. I refer to the Interparliamentary Union for the promotion of arbitration.

It owes its existence to the initiative of William Randal Cremer, a Labor member of the British House of Commons, and to Frederic Passy, a French parliamentarian who had a long, distinguished, and useful life. From the day it was founded the Interparliamentary Union commanded the sympathy and respect of the parliaments of Europe, and it grew rapidly.

I may say in passing, Mr. Chairman, that it has been considered in Europe as of vastly more importance than in this country, due no doubt to the fact that our isolation has put us out of the theater of war. Unless we shall, as a consequence of the present war, throw ourselves into the affairs of Europe and bear a part in the solution of the problems of international boundaries, as, for instance, those of the Balkans, our position will be one of comparative freedom from the dangers that threaten the nations of Europe as it has been heretofore and as I hope to see it continue to be.

The work of the humble Labor member of the British Commons, who was the admitted author of the movement, was so much appreciated that France admitted him to membership in the jealously guarded and restricted Legion of Honor. For the same service that brought him the decoration of the Legion of Honor he was knighted by King Edward of England. Still later he received the highest honor that can come to a worker for peace. In 1903 he was given the Nobel peace prize, which carries with it a money award of about $37,000.

Although Cremer was a poor man, a carpenter and cabinetmaker, with an income less than a thousand dollars a year, he promptly gave the whole sum to the Arbitration Society of England.

The spirit that controlled the founder is the spirit that has directed the Interparliamentary Union since its foundation. It stands for the arbitration of international disputes. It does not scatter its fire and lessen the value of its work by trying to put over all sorts of reforms. This forethought of the founder has kept the union from wasting its time on Utopian projects. Its members are parliamentarians, and the work to which it is dedicated is the work of parliaments. That fact has kept it wonderfully free from the annoyance of association with some excellent but impractical people who have found nearly every other society with similar aims a happy hunting ground.

Although arbitration alone was the purpose in view when the Interparliamentary Union was organized, it has studied and resolved about the laws of war, neutrality, and kindred subjects. The influence of its more than 3,000 members in Europe has been exercised through legislative bodies and in executive councils. Great international lawyers and practical, constructive statesmen, whose names are on the membership roll of the Union, have devoted years to the effort to find a way for nations to live in amity with one another.

To-day they are studying these questions more earnestly than ever before, for there is greater need. Even those who are citizens of neutral countries are working with tremendous energy and earnestness at the solution of this great problem, for they are among the innocent victims of the barbarities of war. Being innocent and neutral helps very little. Norwegians, Danes, and Swedes have suffered nearly as much from an inadequate supply of food and other necessaries as the Germans and Austrians.

It is small wonder, Mr. Chairman, that under such circumstances the statesmen of neutral countries are submitting requests for a central organization to maintain peace throughout the world.

It was the Interparliamentary Union that put the thought of the first Hague conference into the Czar's head. That started a movement that has developed slowly, that at times has even been arrested, but has never gone backward. No country, not even militaristic Germany or Austria, would consent to see The Hague idea abandoned.

Since the union was organized there have been 18 conferences, in each of which hundreds of delegates from about two dozen parliaments sat and discussed world affairs from the point of view of national legislators.

At the seventeenth conference, held in Geneva in 1912, faith in arbitration as the means of settling certain classes of international controversies was reaffirmed and agreed to in a resolution calling for the establishment of a permanent court, presided over by professional judges, to determine judicial questions according to the rules of law and equity, and a special commission to study the question and report at the next conference was appointed.

Among the members of that commission of study was a former associate of ours on the floor of this House. I refer to Theodore Burton, to serve with whom was a privilege and honor. In his long and eminent career here he always stood for the better things in legislation and international matters.

Unfortunately the nineteenth, the conference to which the report was to have been submitted, did not assemble at Stockholm in 1914 for reasons perfectly well known.

As long ago as 1892 the fourth conference of the union, sitting at Berne, demanded international agreements to respect the inviolability of private property at sea and also suggested the neutralization of certain sea routes. As you know, President Wilson, in one of his most notable addresses, has called attention to these same questions.

The tenth conference of the union, at Brussels in 1910, asked through The Hague for reforms in the rules of naval war as follows:

(a) Abolition of the right of capture.

(b) Limitation of the right of blockade to fortified ports or places.

(c) Limitation of contraband to arms, ammunition, and instruments of war addressed to one of the belligerents.

(d) Prohibiting the destruction of vessels carrying contraband and of goods found on board, except the contraband articles themselves.

The resolution containing these demands called on the British, French, and Russian groups to urge their Governments to change their attitude with relation to this question, and urged a modification of the Declaration of London in that respect.

In 1906, at the conference in London, the union declared for the limitation of armaments. This is the language of the resolution agreed to at that time:

> The Interparliamentary Conference, considering that the increase of military and naval expenditure which weighs upon the world is universally held to be intolerable, expresses the formal wish that the question of the limitation of armaments be included in the program of the next conference at The Hague.
>
> The conference decides that each group belonging to the Interparliamentary Union shall without delay place this resolution before the Government of its country and exercise its most pressing action on the parliament to which it belongs, in order that the question of the limitation be the subject of a national study necessary to the ultimate success of the international discussion.

The last conference held, that at The Hague in 1913, was distinguished by the number of eminent men who had a part in its proceedings, the quality of the debate, and the earnestness with which opinions were pressed. The limitation of armaments was most earnestly urged. Distinguished Frenchmen, Englishmen, Italians, and Germans spoke for disarmament.

I remember well the pathetic earnestness with which representatives from some of the smaller countries pleaded for it. Belgium and delegates from the Balkan countries and Scandinavia spoke as if already in the shadow of the great social crime of 1914.

Dr. L. Quidde, of Bavaria, a member of the Diet in that country, submitted a proposal to reduce the size of the armies and navies of all countries. He presented his views so eloquently that the executive council of the union took up the study of his resolution and appointed a special commission for its consideration, headed by Tydeman, of Holland, one of the finest and wisest men I ever knew, with Erzberger, of Germany, whose name you have been made familiar with recently, and with representatives on the commission from Austria, Great Britain, France, Denmark, Sweden, Norway, and Russia.

The debate in the conference was eloquent and convincing and many distinguished men for the first time declared themselves supporters of the policy.

Prof. Quidde, by the way, has not ceased to work for peace because of the war, and has been so open about it that I fear he may be in trouble with the Kaiser.

Mr. Chairman, I have taken a few paragraphs from the history of the Interparliamentary Union just to give you an idea of what its work has been and what are its aims.

No doubt every Member of this body read the speech of the German chancellor a few days ago and saw with pleasure his declaration that he could accept unreservedly the first 4 of the 14 conditions of peace laid down by Mr. Wilson in his address to the Congress on the 8th of January.

These four demands were:

First. Open covenants of peace and no secret treaties.

And I may say in passing, Mr. Chairman, that any Member of this House who has read the secret treaties that were exposed to the horrified gaze of an amazed world by the Bolsheviki group in Russia, no matter what his previous opinion may have been, will agree with that of the President, that there should be no longer covenants of peace of a secret nature or treaties not known to the world at large. Every treaty between two great governments involves the peace and happiness of the rest of mankind as well as of the two parties directly concerned with the contract.

Second. Freedom of the seas, outside territorial waters, in peace and war alike.

Third. Equality of trade conditions for all countries.

Fourth. Reduction of armaments to the lowest point consistent with domestic safety.

These, Mr. Chairman, are all such reasonable conditions that I can not believe they will be rejected by any country with a civilized government. They are very like the terms set out in the great speech of the British premier, David Lloyd-George, and they are strikingly like those of the Bolshevikist government of Russia, and not entirely out of harmony with those put forward by France and Austria. In fact, they are conditions of permanent peace on which all can agree in principle and without which nothing worth while can be done. The President's powerful and convincing phrases will force their consideration by all belligerents whether allies or enemies.

The extracts from the history of the Interparliamentary Union that I have given you show that these four peace conditions have been demanded by that organization for years.

In 1913 there were 3,300 members of the union scattered through the parliaments of about two dozen countries. These parliamentarians have labored with their respective governments to have them agreed to.

Shall we not, in the interest of humanity, support our colleagues in other parliaments in a campaign for their acceptance? [Applause.]

Mr. COOPER of Wisconsin. Mr. Chairman, I yield one hour to the gentleman from Minnesota [Mr. MILLER].

The CHAIRMAN. The gentleman from Minnesota is recognized for one hour.

Mr. MILLER of Minnesota. Mr. Chairman, I want to talk to such portion of the membership of the House as finds it possible to be here at the present time on what to me is the most important subject connected with the great war. In other words, I propose to direct attention to the question of transportation from the United States to the sea, across the sea to the point of debarkation in France, and across France to the front.

We are apt to direct our attention first to the spectacular features of preparation for war. We like to dream of thousands of aeroplanes flying in the sky, smothering the enemy. We like to think of thousands of massed cannon speeding death and destruction against the enemy. We like to think of embattled millions marching beneath our flag against the foe. These are all interesting and vitally important. But before these aeroplanes can fly, before these cannon can breathe fire and destruc-

tion, before the men can attack, you must get all to the place where the foe is. Were it that Germany is coming to fight us in America the situation would be different. Germany is not coming here. We are going there, and we are going to fight the most powerful nation that has ever existed. Our problem is to mass these instrumentalities of war at the exact point at the right time to defeat Germany in the field. Now, therefore, let me direct your attention to some of the elements of the problem.

In determining to make active war on Germany this country of ours has undertaken the most stupendous military task ever undertaken by any nation. Having regard to the fact that Germany is the most powerful military nation the world has ever known, our task would be of huge proportions, taxing severely our strength, if Germany were at hand so that our Army immediately could strike her. But Germany is not at hand. Germany is not coming here. We are going there. To reach her with a fighting force which, joined with the allies, will accomplish Germany's defeat, is our problem. With due respect to the importance of training camps, proper equipment of guns and munitions, clothing, hospitals, aeroplanes, our greatest problem is transportation. Observe the elements in the problem.

First, it is necessary to gather our troops from all sections of the United States and transport them to an Atlantic port. This in itself is a great undertaking.

Many of those men must travel more than 3,000 miles. The railroad transportation system of the United States has before it a severe strain to transport these men, munitions, and supplies. There must be provided at the Atlantic ports abundant docks and terminal facilities, so that men and freight can be transferred to seagoing vessels.

It is then necessary to transport across 3,000 miles of ocean to the French port. The French port must be a suitable place of debarkation, provided with docks, terminal facilities, and railway transportation. From this port transportation must be provided entirely across the country of France to the eastern line or battle front. From the end of the railway system in France there must be provided motor and other transportation right up to the trenches. Every link in this great chain of transportation must be as good as every other link. Every feature of this transportation must be equal to our military needs. A moment's thought respecting this produces a realization that is somewhat staggering. Were our problem to transport across the Atlantic Ocean with a complete control of the sea in our hands, it would still be a tremendous one, but the sea is not exclusively ours and our allies. Our right to use the sea is disputed by the submarine, and our capacity to use it is vastly diminished by the submarine activities.

On the high seas there are hardly sufficient ships to carry on the commercial and industrial traffic essential to maintain England, France, and Italy at a point of efficiency. We must in some way secure ships sufficient to transport our troops to France and carry through all the supplies they need. In addition, we must assist England and France very materially in the production of ships to replace those being sunk by submarines. In order that we may transport our troops and supplies from this country to France with minimum loss, it is necessary that our ships be protected against submarine attacks. Providing this protection necessarily reduces very greatly the efficiency of our ships. Ships can not sail freely. They must move under conditions calculated to preserve them from harm. In no other war has transportation been so vital. In this war it forms more than 60 per cent of the entire problem.

Some officers in France told me both in the British and French Armies that transportation is 90 per cent of the job. It is necessary that we fully realize this in order that our conduct may be shaped accordingly. An army in the battle front to-day, should its supplies be cut off, would perish in 48 hours, probably in much less time. A stream of supplies coming to the men on the fighting front is as vital to the life of that army as the blood that flows through human arteries is vital to human life. Cut these streams of transportation and your army withers and dies immediately. We recall with pride, those of us who live in the North, how Gen. Sherman cut loose from his communications and marched to the sea. Many other armies have done this during the ages that are past. No army can do it to-day. The severance of communication means the immediate destruction of the army. An army in the field to-day is a greedy monster. It requires a great variety of things and in untold quantities. Its voracity is a matter of wonder, even to those accustomed to life on the front. In many sections of the English front the artillery have orders to fire every day 100 rounds. This during a quiet day, so called. During days of attack or defense against attack the number of shots is greatly multiplied. Some French guns at Verdun fired fifteen hundred, and even two thousand, rounds in a single day. These guns are always consuming ammunition and always hungry. To get this ammunition to them is a tremendous task. One of the most peculiar attacks that has been made since this war began was made by the French in their advance at Malmaison during the early days of November. That advance gave to the French victory over the Germans in a struggle for the Chemin des Dames. The advance did not cover a large area. In fact, it was very, very small. During the artillery preparation that preceded the attack in this restricted area the French fired 2,000,700 shells. Many trains were required to haul this munition to the advance depots. From these depots it had to be conveyed up to the guns. In some of the advances that have been made during the past year as many as six and seven million shells have been fired within a very few days' time. To one who goes to the front perhaps the most striking thing is the inconceivable quantity of this ammunition. There comes to him view after view, and in wonder and amazement he beholds there enormous quantities of ammunition piled up; train after train hauling it in and armies of men piling it up at the end of the railway in a great pile—millions and millions of pieces. At these advance points small dinkey railway tracks lead up as close to the front line as they can go. On these are little cars that are loaded with shells. Sometimes there is a small engine to haul them a distance, but almost always not. They are pushed up by the men, right up to the big guns, and then for a distance on, to get them as near the small guns as possible. But there eventually comes a time when all the shells must be carried up by mules or by hand, as is almost constantly done. This continuous supply of ammunition to the guns at work is absolutely essential to life for a day or a night. Cut it off and your army is paralyzed and destroyed. We have never thought in terms of transportation in America such as is necessary for us to think if we are going to carry on this war in the way that it must be fought to win.

I desire to call attention to the distinction between the conditions in France and England and those in the United States with respect to transportation. All that is necessary in France is to produce the ammunition and transport it a short distance by rail; also that the food and supplies necessary to her army be placed on trains somewhere in France and hurried to the army at the front. The total distance does not exceed three or four hundred miles, probably much less. The problem in England is relatively small. In a single day a person can leave the front trenches of the English Army in Belgium or France and go to the heart of England.

In fact, I accompanied some men who left the trenches at Paschendale at 4 o'clock in the morning, with mud on their persons from their heads to their feet, who had been wallowing in it clear up to their armpits, but to them had come the glorious hour for relief. They left the trenches at 4 o'clock one morning and they were in London that night. This gives you some idea of the small problem that England has faced in transportation compared to the one that confronts us. Across the English Channel there are two great streams of transports from Dover to Calais and from Folkstone to Boulogne.

In fact, these two great lines of commerce are closed to everything except the military needs of Great Britain, and there are those two great streams going back and forth day and night, protected by an abundance of destroyers, so that you have many constantly in view, not only those that are accompanying the boat that you are on but those that are accompanying other boats going or returning. Mine layers and mine sweepers everywhere; aeroplanes frequently at work. Thus does Great Britain adequately protect these two great lines of transports, so essential to her military needs.

Every day 10,000 men go from the front trenches of the English Army in France back to England, and 10,000 return from England to France. This is all in the carrying out of an essential program, to give the men who are living the life at the front frequent opportunity to breathe a different air and to enjoy other surroundings. A large number of ships make the transit each day carrying supplies. The efficiency of this ship transportation is splendid to behold. It has been systematized so that it moves at great speed and with no friction. In fact, this transportation, as well as production in England, has been so perfected that the British Army in its most active days has never lacked for food or munitions.

We in this Congress remember the early days of 1914, when England sent to us the Macedonian cry, "Sell us guns, sell us uniforms, sell us ammunition, shells, everything we must have to build a great army. Time is short. America must come to our relief." England looked to the United States for the great part of those things essential to the building of an army. In the time that has elapsed since then England has made herself

entirely independent of the United States as far as manufactured products are concerned. She needs raw materials. Great Britain has raised and marched into the field over 7,000,000 men and now has an army of approximately 6,000,000 men. And yet as I journeyed among the munition factories of England I found that here and there it was necessary to close parts of them down for a short period of time now and then because their production was even greater than the necessities of her army at the front. That is somewhat illuminating to us while we are in the midst of the early days of our struggle here in this country. In fact, the guns have always more ammunition than they need. It is only a few hours from any part of England and Scotland to Calais, one hour from Dover to Calais, and a very few hours from Calais to the front.

Compared to the American problem, this is a small one, indeed. America's problem has Great Britain's problem multiplied ten times. While we must remember again and again to give thought to the production of rifles, cannon, aeroplanes, clothing, and the like, we must never for a moment lose sight of the greatest problem of all, and that is transportation. This transportation is basic to our success. It is basic to our entire effort. It must be perfected before we can even start to win. It must be kept perfect in order that we may continue our military operations in an effective manner.

He who has studied the military situation during the past year knows that the United States must take the place of Russia among the allies. We must do more than that. We must turn the tide of battle distinctly in favor of the allies, and that means we will have to be stronger than Russia ever was.

At the time Russia collapsed I am reliably informed she had 10,000,000 trained men ready for battle. I do not believe this war will ever be won by the allies unless the United States at the earliest possible date places upon the western front not less than 3,000,000, and we should place there 5,000,000. We will never win the war by a revolution in Germany.

Let us not allow ourselves to be fooled all the time. There is no more chance for a revolution in Germany than there is that the devil will give up his command in hell, and so says every man that speaks with knowledge of conditions in Germany. The German Army is not weak, composed of youths and old men; the German Army is marching 9,000,000 strong, and just as strong as it ever was, to the extent of 9,000,000 men, and the German Nation is back of its army.

We are going to win this war, but it will be won only in one way, and that is by destroying the military power of Germany in the field, and unless we do that we are lost. Unless we can make our plans commensurate with that task we might as well never have started.

Some slight eruptions may occur in that country, but not sufficient to be of any particular value.

There is just one way to beat Germany, and that is to beat her army. Unless Germany is thoroughly beaten, all the men that die, all the money that is spent, will be wasted. Germany has not less than 9,000,000 men, perfectly trained, and splendidly equipped. Let no one think they consist of old men, young men, and half-starved men. I saw hundreds and thousands of prisoners, some as they were freshly taken and others that had been taken years before. They are about all alike—big, strong, husky fellows, in splendid condition. We are in a war, a hard blow-giving and blow-receiving war. We must strike a harder blow than Germany can stand. We can not hope to do it with less than 3,000,000 men. To sustain a man across the sea requires at the lowest 6 tons of shipping each year. To sustain 3,000,000 soldiers, therefore, will require 18,000,000 tons of shipping.

Mr. REAVIS. Will the gentleman yield?

Mr. MILLER of Minnesota. Yes.

Mr. REAVIS. I noticed in the Washington Post that they say we require 10½ tons per man. Did the gentleman see that?

Mr. MILLER of Minnesota. I have not seen it. It has been estimated at 9 tons, but I think 6 is the quantity that England is using.

Mr. REAVIS. In the article written by a shipping expert it is stated that it requires 10½ tons.

Mr. MILLER of Minnesota. That is higher than I ever heard of.

Mr. REAVIS. England uses 7 tons, which is the amount required in crossing the channel.

Mr. MILLER of Minnesota. Between 6 and 7 tons. But I want to put this down in a conservative way.

This must be secured in two ways—by the construction of additional ships and by increasing the efficiency of all our ships. To secure maximum efficiency on the part of shipping during these days of submarine war is extremely difficult, but vital to success.

The question is asked, Where is the port of disembarkation? I am not going to give the name to you, but I will point it out on the map. There is more than one port, but there is one port that 90 per cent of our troops arrive at. The problem, as I tried to state it a little while ago, is to gather throughout the United States soldiers and then supplies and equipment, and transport all to the Atlantic seaboard, and then by ship across the sea. It is, in round numbers, 3,600 miles from New York to the spot in the Bay of Biscay to which I am pointing, and that is the spot at the mouth of an important river where the American troops are landed. It is possible by rail transportation direct from that point to go to the American expeditionary force in the field where it now is without going through Paris. That is a very important and vital matter.

Mr. PLATT. Will the gentleman yield?

Mr. MILLER of Minnesota. Yes.

Mr. PLATT. Is it true that that particular port has been partially made over?

Mr. MILLER of Minnesota. I am going to discuss that in a few minutes, and then if I do not answer the gentleman's question he may bring it up again. I want to discuss for a few minutes the question of submarine activity. I stated a while ago that the Government had undertaken the greatest task in its history when it undertook to put 3,000,000 men, or even 1,000,000 men, on the fighting front in France and keep them supplied. We have got to ship them across the sea, a sea that is not ours by a long, long way. The only thing comparable to our problem—and it is not really comparable—is when Great Britain fought the South African war 18 years ago. They had to ship troops about as far or a little farther, but their problem was extremely simple compared with ours. In the first place they controlled the sea, and in the second place sent a highly trained army of organized men against an army not organized, not united, not well led, not well equipped, and of a small number in South Africa.

I do not intend to give away anything of any military value to the enemy and do not believe I will. We can not expect our people in this country to fight this war, long drawn out as it is almost certain to be, entirely on faith. They must have some facts. They must have some information as to how the battle is going. My information has been received from the most trustworthy source, and I consider it absolutely authentic. The high priest of ruthless submarine warfare—in other words, Admiral von Tirpitz—confidently told the Kaiser and his people—told them last January—that if unrestricted submarine warfare should be inaugurated England would be starved within three months and the war ended within that time.

The people of Germany were so elated at the prospect of a great victory and an early end of the war that they gave no heed to the savagery, brutality, and depravity associated with that kind of warfare. You will recall the German Admiralty planned to sink 1,000,000 tons per month. Knowing the number of tons available to the shipping of the world, it was relatively easy to predict how soon starvation must come to England. This warfare was inaugurated almost exactly a year ago. Three times four months have come and gone and the war is still going on. The only thing this year has made certain is that the constant effort and untiring energy of the allies on the sea, if continued, will end in defeat for the submarine, but the battle is a long one and a close one. All told, the Germans have constructed and placed in operation about 265 submarines. Those first sent out were relatively small.

The difficulties of navigation had not then been solved, and many of those submarines sailed away, never to return, having been lost at sea. The number of ships sunk by submarines increased enormously with the beginning of unrestricted warfare a year ago, particularly. The number of submarines destroyed during this past year likewise enormously increased. In fact, during the past 10 months three times as many submarines have been destroyed as were destroyed during the previous two and a half years of war. All told, there have been destroyed to a certainty about an even hundred submarines. A dozen more probably have been destroyed; definite figures are not obtainable; but it is hoped, and fairly probable, that submarines are just now being destroyed as fast as they are being manufactured by the Germans. We know that during the months of April and May last year the submarine sank 1,700,000 tons of English shipping alone. During these months the Germans practically made good their boast. Increased skill and effort in combating the submarine have greatly reduced the sinkings, until now it can be said the situation is fairly well in hand. These sinkings each month have gone down through 600,000 tons to 400,000 tons and for a time down to 260,000 or 270,000 tons. During the last month there has been a marked decrease in the number of

ships sunk. We do not want to be deceived by this and think the war is over. The British and the American admiralty are not deceived. The submarines can operate only with great difficulty during the long nights and stormy weather of the winter season. Most of the merchant ships are now armed, so the days have passed when the submarine can open up a combat with a merchant ship firing shells from the surface. The truth is the only ships now being sunk, or practically the only ones, are being sunk by submarines that are never seen at all. In a heavy sea a submarine that is all submerged excepting its periscope can only see a very short distance and in a very uncertain manner. Ideal weather for the submarine to operate exists when the sea is calm and the days are long. When spring returns increased sinkings will recur. It is a matter now of quite common knowledge that the moments of grave danger are just about sunrise in the morning and sunset at night, especially if the sea is calm. Why? Because during that twilight period, which is long, especially during the summer, there is that uncertainty of light which makes it, first, difficult to discover the periscope of a submarine, but, on the other hand, makes it easy for the submarine to see the hulk of the ship in bold relief and to send in a deadly shot.

The beginning of successful resistance to the submarine was coincident with the coming of the first American destroyers into the war zone. Mind you, I do not say that successful operation against the submarine only began by and was exclusively confined to the Americans that went over with the destroyers, but I say the coming of the American destroyers was coincident with the beginning of successful operation against the submarine. [Applause.] The Americans were not the sole cause of the successful warfare, not by any means, but they made a marked contribution to it. Admiral Sims at an early date insisted upon the convoy system; first, to secure protection to the ships; and second, to bring the submarine where the destroyer can get at him. The submarine is of no value unless it seeks and tries to destroy ships. If the enemy of the submarine is in the vicinity of the ships, then it finds itself in the vicinity of the submarine, where it wants to be. That was the logic of Admiral Sims in May of last year. He said, "What is the use of sending destroyers and ships of your navy scouring the seas, hunting for the submarines? The seas are vast and the submarine is small. They may seek for days and weeks and find not their quarry, but you group your ships together and put your destroyers about your ships, and you are bound to have your destroyers meet the submarine. The submarine must find the ships, and in finding the ships he meets his deadly enemy." [Applause.]

Mr. Chairman, I myself think, layman as I am, that that was the most important contribution to the successful combating of the submarine that has been made. Its significance soon become apparent to the British Admiralty, because they adopted it and have followed it, and while I may be stepping possibly to one side and digressing, I can not refrain from making this remark: Of all the able men who are now working for the United States day and night, with brain and energy and skill, we have not a better one or a more successful one than Admiral Sims across the sea [applause]; and it is the duty of this Congress and it should be the duty of the Navy of this country—and I think I am speaking in such a way as meets their approval—to give him absolute carte blanche. Whatever he recommends, carry that out.

Our naval officers when they first went over naturally received from the English the many important lessons the English had learned from experience. Admiral Sims insisted upon the value of the convoy system and in addition our destroyers put unheard pep and ginger into their work. The minute a submarine was located the American destroyers were out and made for it at full speed. No quicker is a dog of prey to scent and follow the scent with lightning speed to the quarry than the destroyer when a submarine is sighted to dive full blast at the spot where the submarine is. The convoy system has certain disadvantages, however. It decreases the efficiency of shipping for the reason that it is necessary for a ship to wait until it can be joined by other ships going to the same port and the whole supported by the convoy. The problem is to make these delays as small as possible. The essential feature is to have a liberal supply of convoying ships. The destroyer is the natural enemy of the submarine, consequently we must have many destroyers for convoy purposes. Experience has shown that raiders are not infrequently met with on the high seas during this war. I am going to go a step further and I think I will put something with that sentence after the revelations that have been coming out. Thirteen ships convoyed by two destroyers from Norway going to England were sunk and the two destroyers were themselves destroyed and sunk in a few moments' time. Why? Why, everyone knows it was not because the Germans sent the ordinary submarine or destroyer after them. The admiralties of Great Britain, America, and France know that the Germans have constructed a lot of raiders of terrific speed, probably 25 knots, mounted with large or relatively large cannon. You can draw your own conclusions as to what happened on the North Sea when they started out. At least three of them got out into the ocean. I do not know what has happened to them since. I do not know whether they have been destroyed or whether they are still afloat, but they got out and it was expected during the winter months more would come out, a real menace and peril. Protection against craft of this character must be provided for groups of ships carrying soldiers. This protection can only come from the cruiser or the battleship. For a long time Admiral Sims was compelled to patrol that part of the ocean beginning west of the coast of Ireland, extending down across Ireland, down across the western entrance of the English Channel, clear across the western coast of France and Ireland, the coast of Spain, down to the Azores Islands.

The most important thing for us to do is to furnish protection by convoy of destroyers to the ships coming from the United States carrying troops and munitions across to France. And how many destroyers do you think Sims had with which to do the whole job? I can tell you, because it is not the number now. It was just 36—not one-fifth enough—and the success that accompanied the work of Admiral Sims and the splendid officers and men under him testify to their capacity to use such instrumentalities as they are provided with to do splendid and gigantic work. That is not the number of destroyers we now have over there. I can give that without giving aid to the enemy. This number was grossly insufficient. Fortunately our Navy realized the mistake made in failing to increase the destroyer building program in large proportions at the very outbreak of the war, and some months ago started upon a very vigorous program that will produce any needed destroyers at a day I hope not too far away. Some of these new destroyers are being delivered. Permit me to insist that the first duty of our Navy is to protect the line of communication from France to America. Disaster has been narrowly averted more than once. We can not expect Providence to be with us all the time. We must fight our own battles part of the time. We must be prepared to give full protection to our ships going to France and returning from France. We have a few cruisers engaged in this work of convoying. It is most unfortunate we have not several times their number; but we have them not, and we can not get them. We have a substitute that I submit should be used. We are congratulating ourselves in this country that our Navy has manifested such a high efficiency. The Naval Committee of this House is purring sweetly in splendid satisfaction of the Navy in the war. I do not say that in any disrespectful sense. It has been rather sweetly delicious, however, to note its self-congratulation constantly. Far be it from me to take away any of that pride or any of that satisfaction. Let me suggest this Navy will never help win the war if it is locked up and hermetically sealed in some safe harbor of the United States. We have many old battleships not considered first class. They have sufficient speed and seaworthiness that they could and should be used in the place of cruisers for this convoy work. It is the duty of the Navy to send them abroad immediately and to keep them there. What I have just said is not exclusively my views. I am the mouthpiece of many men in the Navy who are doing this work. I hope somebody will hear these words and heed them. I can speak where they can not. Transportation across the Atlantic is the neck of our military bottle——

Mr. MADDEN. I suppose it would not be any secret to disclose the number of these ships that are not being used, for it would not help the enemy any.

Mr. MILLER of Minnesota. Not the slightest; and we can turn to any report of the Secretary of the Navy and find the entire list. They are now in Philadelphia; they are now in New York; they are now at Hampton Roads; and God knows they ought to be on the high seas.

Mr. MADDEN. It seems to me it might be well enough for the enemy to know that we have discontinued locking them up, but have put them in the water where they can do some destruction.

Mr. HICKS. Will the gentleman yield?

Mr. MILLER of Minnesota. Yes.

Mr. HICKS. Does the gentleman know how many first-class battleships of ours are on the other side now?

Mr. MILLER of Minnesota. Yes, sir. I was informed at the time the request was made over there that they be sent over, and, frankly, I was afraid our Navy would not do it, but I made par-

ticular inquiry and followed it up and found that they have been sent, and some day they may write a glorious chapter into American history.

Mr. HICKS. We have first-class battleships abroad and——

Mr. MILLER of Washington. And no better battleships ever floated on a sea. I am here speaking of the second-class battleships now at home that have no place in the first line.

Mr. MOORE of Pennsylvania. Would the gentleman include any of the old monitors that he has referred to, that now happen to be in the Philadelphia Navy Yard, in the cross-seas service?

Mr. MILLER of Minnesota. I do not think so. England might want them to go up against the shore batteries on the North Sea, I am not speaking of all the ships that are not now on the high seas. I am speaking of a single class, and that alone, and the job that is just hungry for them out there on the high seas.

I submit that some radical reforms are necessary if we are going to secure reasonable military efficiency. Certain transports now operating across the Atlantic are under control of the Army and operating strictly under the War Department. I hope you will bear this analysis in mind. Others, and a greater number of transports, are being operated by the Navy. And it is no secret that these transports are those interned German ships that we took over, a splendid fleet of boats. The Shipping Board, in addition, is operating some merchant ships and desires to operate all the transport ships.

Now, what is it we have? We have the Army operating one line of transports, the Navy operating another line of transports, the Shipping Board operating certain merchant ships carrying supplies, and trying to get the job of operating all the transports and all the merchant ships. In other words, they wish to have charge of all this most important branch of our military service.

Now, let us just face the truth. The reason the desire exists that the Shipping Board shall operate all these ships is that it will necessitate the taking off of the American sailors that are working for $30 a month and put in their places other sailors that will be getting $90 to $125 a month. Now, you and I might possibly be willing to go the length necessary to accomplish that if we are helping American citizens. I was on the high seas a year ago, on two ships under the American flag, and I went through those ships from time to time, and there was not an American citizen in the entire crew. On this trip which I took lately across the water I went on one kind of a transport over and I came back on another. The one going over had a crew that had been picked up in New York, the best they could do, but I could not find an American citizen in the outfit below the officers. And they are getting fabulous sums. They were West Indians and Portuguese and South Americans, a rag-tag crowd from everywhere under the sun.

So, whenever anybody writes you or asks you to support a bill that will put all our transports and shipping on the high seas under our Shipping Board, do not let them fool you by stating that by so doing you are going to give some American citizen a job. You will be simply giving to some South American or some West Indian in one month more money than he or any of his ancestors earned in a year's time.

Mr. TOWNER. I would like to ask the gentleman if it is not his judgment that they should be put under one control?

Mr. MILLER of Minnesota. It is. These three systems do not work in harmony, and, doing the best they can, they only result in decreasing the efficiency of our ships to a very low point. They can not work in harmony. With the different heads and different systems and different personnel, they can not work well together, and they do not. The Army has been running transports to Hawaii, to the Philippines, Porto Rico, and Panama for 20 years now and have acquired a system and operatives that make these Army transports the best handled and most efficient that we have now. All these ships should be placed under one authority, run by one man, and under one system. We can not afford to lose a single day in making this change.

I would say that the Army should be the department having exclusive charge of all this transport system were it not for one thing, namely, that going across the Atlantic is a part of fighting the battle with the submarines, and the Navy alone can do that work. [Applause.] I do not care what kind of a master you have on your ship, whether he is an Army officer or a civilian; I do not care what you pay him; the master mind that guides that ship from the time it leaves New York until it finds a safe refuge in a harbor in France is a naval officer, as he should be, because the crossing of the sea to-day is 1 per cent navigation and 99 per cent fighting the submarine.

Mr. LONGWORTH. While the gentleman is on that subject, can he state what is the speed of the latest type of the German submarine?

Mr. MILLER of Minnesota. I can tell the gentleman what our best authority on the submarine told me, and I presume it is correct. On the surface it is not to exceed 16 knots; under the surface they can make from 8 knots down, with capacity to move very slowly under the sea, from probably 1½ to 2 knots. In other words, they have a wide range, from the slowest under the sea to their highest speed on the surface.

Mr. LONGWORTH. Can the gentleman tell me how many torpedoes the submarine can carry?

Mr. MILLER of Minnesota. They carry from 20 to 24.

Mr. LONGWORTH. Can the gentleman state, they now being able to carry 20 torpedoes, how long they can stay on the voyage from their base of supplies?

Mr. MILLER of Minnesota. I will be pleased to answer. The main base is at Zeebrugge on the North Sea. The main area of operation is across the northern part of Scotland and the upper part of Ireland and then the English Channel. Continuing, their field is the Bay of Biscay, then along the coasts of Spain and Portugal, and then out to the Azores. All trade routes from South America going to the north of Europe really converge through the Bay of Biscay. For the submarine to get into this area of operations or the western entrance to the English Channel it is necessary to make the trip from Zeebrugge around Scotland, which I am informed takes 10 days. They have a period of activity which depends somewhat upon how active they are. That is, if they fire many torpedoes and meet many ships, or fire many torpedoes at one, as soon as they have used up their 20 torpedoes they have got to stop and go home. Or if they see few ships and conserve their ammunition they have a period of activity limited by fuel and food, probably about 20 days on the average. It then takes them 10 days to go back. It then takes them about 10 days to refit at Zeebrugge. So that you have a period of activity of about two to three, or 20 days activity to 30 days of preparation. That is the latest type and their best submarine.

Mr. PLATT. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Minnesota yield to the gentleman from New York?

Mr. MILLER of Minnesota. Certainly.

Mr. PLATT. I wish to ask a question on the point the gentleman was just speaking of a few minutes ago. I crossed a part of the Pacific Ocean a few weeks ago from Honolulu to San Francisco in a ship that was making its last trip and which was about to go into service as an Atlantic transport. The captain of that ship told me he was a Naval Reserve officer and that all the other officers of the ship were Naval Reserve officers, and that none of the crew had been enlisted in the Naval Reserve. He said he did not know whether he was to be subjected to the Shipping Board or to the Navy, and he was going into the Federal service under those circumstances.

Mr. MILLER of Minnesota. He will be lucky if he finds out. He will probably be amenable to the Army. I think that transport has been chartered by the Army and not by the Navy.

Mr. HUMPHREYS. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Minnesota. Yes.

Mr. HUMPHREYS. Going back to the point the gentleman just left, about the length of time a submarine can remain away from its base, is it true that they have ships like the *Deutschland* and that character of submarine to carry supplies out on the sea for the submarines, or is it necessary for the submarine to return to base for its supplies?

Mr. MILLER of Minnesota. I imagine it is necessary for the submarine frequently to return to its depots. There is some question as to whether there are mother submarines or not. It is thought that the *Deutschland* and one or two more may be engaged in that work, but their capacity is so limited that it makes no perceptible effect on the situation. There are very many submarine-mine layers in all this field whose sphere of activity is, of course, determined entirely on the amount of fuel they have and supplies.

Mr. SLOAN. Mr. Chairman, will the gentleman yield right there?

Mr. MILLER of Minnesota. Yes.

Mr. SLOAN. Do these recently commissioned submarines carry other means of offense and defense than these torpedoes that the gentleman was speaking of? That is, do they carry guns?

Mr. MILLER of Minnesota. Yes. Heretofore a 3-inch gun has been considered a pretty formidable weapon against the submarine. The larger submarines now have probably 4 and possibly 5-inch guns; anyhow 4-inch.

It is ridiculous to have a ship with two captains, one for the ship and the other a naval officer, who really has complete control. We can not do without the Navy. The Navy must

have charge of the operations of these ships so far as the defense against the submarine is concerned. I believe the Navy can develop efficiency in the pure transportation feature of the problem. The Shipping Board has no business to inject itself into this problem at all. [Applause.] This is a military matter, and should be handled in a strictly military fashion. Let the Shipping Board run those merchant ships that are engaged in commercial business. Consequently I am strongly of the opinion that there should be turned over to the Navy all the ships crossing the Atlantic engaged in military work, and the Navy should be put in charge. There should very likely be some one in charge of the movements of the ships—by that I mean their dispatch from port to port—one man, a civilian, selected by the President, who will operate under the Navy and who is himself skilled in transportation.

The Navy does not understand the transportation of ships to save time. Naval officers have never developed that faculty; but men whose business it has been to make money or lose money in accordance with whether their ships load or unload rapidly and move speedily or not are qualified for this kind of work and that class of men should be utilized as the directing force for the management generally of the big fleet. But Navy officers can take charge of the actual operation of the ships on the sea. Therefore from the minute one of these ships leaves port until it arrives in the next port it would be exclusively under the control of naval officers. What we want is a master mind, accustomed to weigh the value of his ship's time and to drive that ship to its highest efficiency all the time. The Army can loan to the Navy its personnel developed in transportation work.

This one change will increase the efficiency of our ships many, many times.

The delays that now occur are sufficient to fill one with serious alarm. The Army loads its boats. The Navy loads its boats, and then they have to get the two groups together, somewhere, if they can, and then they start out. It may be that the Army has loaded such boats as it has on hand, but they are insufficient to constitute a convoy. Therefore they hold those boats until more Army boats come in and there is a sufficient number to send them across. In the meantime the Navy boats are going through the same program. If you had all the chickens under one hen they could all be looked after by the same superior power. Days and even weeks pass in assembling a sufficient number of ships to be convoyed, whereas as a fact not more than a day or two at most should ever be lost.

I wish to emphasize the necessity of these ships being placed in charge of a civilian skilled in transportation, for the reason that naval officers do not appreciate the value of time and the necessity of keeping the cargoes moving.

I wrote this a week ago, and when I picked up the paper last night I was interested to see that this view which I have here expressed is that of a very distinguished retired admiral of the Navy, who wrote an article on it and published it yesterday.

Let me illustrate. Two ships were ready to start across the Atlantic on the homeward voyage, and sailed from a port in France a distance of 40 or 50 miles. This is an actual illustration that I know of personally. They were told to stop for some additional boats that were coming, and they received this order after they had got out 40 miles; not on the high seas exactly, but up the coast and to leeward of an island, but with all communication between them and the shore shut off. The minute a boat leaves its base and goes on the high seas to-day it is lost to the world. Its wireless can not operate. If it does, its location is made known to submarines. The ship sets sail in silence and in darkness, lost to humanity and the world until next it reaches a port. Now, these two boats stayed there day after day, being joined at the end of the third day by the other boats. On the fifth day the destroyers that were to escort them through the submarine zone appeared. For some unaccountable reason the ships did not sail even then. The destroyers fooled around, going back and forth for further orders for two more days. On the eighth day, under the most unfavorable conditions that at any time existed as far as submarines are concerned, this group set forth. Why, submarines had been for a week spotting exactly where they were.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COOPER of Wisconsin. I yield to the gentleman 10 minutes more.

Mr. MILLER of Minnesota. Submarines knew exactly the channel out of which they had to come; and is it any wonder that they were attacked twice before they got through the zone? These were all very large ships, among the very biggest and best in our Navy at the present time. I made a computation one day to see what the loss of the United States was on this delay, which nobody could explain or account for. The loss amounted to about $300,000. This is but one of many others that I could cite. This delay of eight days was due first, to the fact that two different authorities were in charge of two different classes of ships; second, it was due to an insufficient number of destroyers and to slow action on the part of those destroyers that finally were available. You remember that in this transportation business we can not afford to lose a minute. Every hour is precious. If our shipping is run at 50 per cent efficiency, it is exactly the same as though a submarine had sunk one-half of our entire tonnage. We must not only keep our ships afloat, but we must keep them moving with all possible speed. Then, too, we must build an enormous fleet of cargo ships. We made a bad start in this work. It now looks as if we were going ahead under high pressure, and yet we hear constantly that the efficiency of the shipyards here in the United States is very low, due to labor troubles. A vigorous policy is fundamentally essential in this crisis. Every man at work building a ship in this country is as much a soldier for Uncle Sam as though he stood in a front trench with a rifle and bayonet in his hand. If he fails in the performance of his work, the loss to our country is as great as though a soldier turned yellow on the firing line. Good working conditions and good pay should be given these workmen. In return they should give the utmost effort in their power to the construction of these ships. We need literally hundreds of ships to carry our supplies to France. We must have them. We have in the United States several hundred thousand troops ready to go to France. We can not send them on account of the lack of equipment and lack of ships. The great reason is lack of ships. Our attention must be focused on these vitally essential factors of our military situation if we are going to win. We have made very respectable progress in the construction of appropriate docks, warehouses, and the securing of terminal facilities at seaports in the United States. This part of the problem was right here under our eyes, and we recognized all of its elements and of its importance. It is singular that we did not have the same vision respecting the problem of debarkation in France. We got off on the left foot in France as far as port facilities are concerned, and we are still hobbling around on that one foot. What I am about to say of conditions of transportation in France I say with the utmost reluctance. As a matter of fact these ideas were forced on me against my will. These deductions are impelled by what any man can see who follows this line of transportation as I did with our troops from this country to the firing line in France.

The port of debarkation, as I stated a time ago, is where I have my pointer now on the map. That is the large port assigned to us for our use. You will observe that railway transportation must cross France almost directly to the front line. My pointer is now on the exact spot where the American boys are in the trenches, near the fortress of Toul, not far from Nancy, and I am mighty glad that at last the authorities have the good judgment to tell the truth to the American people where these men are. The Germans naturally learned early. They learned while I was there, because they pulled off a raid that captured some of the Americans. So the Germans have known it for weeks and months. The American people ought to know, and it will be satisfying to them to know exactly where their men are.

We must not be too critical of those in charge of the administration of this war program, and I hope that will be distinctly understood. We had to set sail on an unknown sea. We had to block out our way amidst difficulties and conditions that had never confronted us before. You can not expect perfection to be attained at the first jump. If we are working toward it rapidly, that is all we can expect.

Mr. KNUTSON. Will the gentleman yield?

Mr. MILLER of Minnesota. Certainly.

Mr. KNUTSON. Does not the gentleman think we have needlessly repeated blunders made by our allies in the first years of the war?

Mr. MILLER of Minnesota. I am not convinced that perhaps we have been inexcusable in many of our blunders, but I prefer not to discuss that feature of it now.

Many of the things we are now trying to do have unexpectedly arisen as the situation has evolved. In the first place, when the war started we did not expect to send any troops to France at all until the middle of the summer 1918, when we expected to send a huge army. We changed our plan by sending a division for inspirational effect. We are now trying to get into France at the earliest possible date as large a fighting force as we can. In the first days, therefore, we failed to recognize some of the needs that would arise when the big movement was on. This matter of a port in France is one of them. We have largely for our use an important port in France. It, however, is grossly inadequate for our needs. In the first place, dock facilities were

constructed for a commerce not more than one-third of that we are pouring into the place now. Fearful congestion immediately resulted when we began to send many ships across. These ships have to lie there awaiting a chance to unload. Many of them have been there for weeks before they could be unloaded. In fact, while I was there there was one ship that had been at the dock 50 days trying to unload steel billets consigned to the French. It had got some off, but in despair of ever getting it unloaded it took the balance away, carrying them back to this country, a part of its cargo.

A vastly greater dock space is needed, and I am glad to say a very considerable development in this regard is now taking place. Terminal facilities, including warehouses, railway tracks, and the like are seriously needed. Men have been doing the best they can and considerable development has occurred, but the facilities still are grossly inadequate, even for existing needs. One hesitates to contemplate a picture of conditions there should no additional facilities be provided when we have 3,000,000 men in France. The truth is we simply never can get 3,000,000 men in France, and we could not keep them there a week unless we have different port facilities. Difficulties have arisen because the French do not understand us and we do not understand the French. Their ways are not our ways. It is the height of absurdity for us to continue to use this port and have the port completely under the control of the French.

I want to repeat that for emphasis. We might as well stop now and decide on one or two things that have got to be done. This port is not our port at all. We are permitted to use it by the French Government. We are going with such a force and such a purpose that we must have a port exclusively for ourselves, under our control, one we can develop, one where we can increase the docking facilities and where we can increase the channel depth. We want one that will accommodate the largest ships, one where we can build docks and terminal facilities and not be compelled to use the antiquated, out of date, inadequate facilities provided by the French Government at this time.

This port should be turned over to us absolutely and be exclusively under our control with full permission to make all needed changes. Enormous charges are now being made because American ships are using the facilities of this port. We should make it a condition precedent to sending another ship to France that that port be turned over to us. And what I say reflects the settled conviction of the men upon whose shoulders rests the responsibility of making this war a success in the field.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. MILLER of Minnesota. Yes.

Mr. MOORE of Pennsylvania. This is very important, indeed, and I should like to know whether the United States is at all responsible for the congestion prevailing at the French port.

Mr. MILLER of Minnesota. Yes, partly; but they have been trying to do the best they could with a system that is wrong.

Mr. MOORE of Pennsylvania. Then it is not our fault.

Mr. MILLER of Minnesota. Well, it is partly our fault. Gen. Pershing has tried man after man, trying to clear up and get these supplies moving, and as man after man has tried he has been removed. Gen. Pershing gives a man one chance, and if he does not succeed out he goes. And that is the way it ought to be. But these men were up against conditions beyond their control, and the greatest transportation expert in the world could not bring order out of chaos. An Army officer who is one of the most skilled transportation experts our Army has developed, with high rank in the Army, went over on the same boat that I did to take care of the transportation inland when the time arrived that he was needed. He was not quite needed at the time on the inland transportation, and he stopped at this port. Having nothing to do, he spent his time voluntarily working night and day trying to bring order out of chaos, and when I saw him at the end of the month he said, "My God, it is hopeless unless the Americans are in full and absolute control of this port and all the facilities here."

Mr. AUSTIN. Will the gentleman yield?

Mr. MILLER of Minnesota. Yes.

Mr. AUSTIN. Let me ask the gentleman, Has it not been decided upon to open three ports to be used exclusively for the Americans?

Mr. MILLER of Minnesota. I am quite confident that that is not so. Three ports are not necessary, but one is absolutely necessary, with part use of another, as circumstances require.

Now, I want to let that sink in with some insistence. The French Government is making heavy charges for the use of this port. These charges in some instances are positively fabulous.

Mr. MADDEN. Will the gentleman yield?

Mr. MILLER of Minnesota. Yes.

Mr. MADDEN. Has any effort been made by any member of the Government of the United States to get the French authorities to turn this port over to the United States?

Mr. MILLER of Minnesota. I have no way of knowing, but I hope that some one is taking that course. If they have not done so, it should have been a condition precedent to sending an Army over there in the first place.

Mr. MADDEN. It seems to me that all we would have to do would be to ask for it. The Government of France certainly could not refuse to grant that request.

Mr. MILLER of Minnesota. I would say to the gentleman——

Mr. MADDEN. If we have not asked for it, I think we are very derelict.

Mr. MILLER of Minnesota. I will say to the gentleman that I think we have asked for it, and I can not put it any stronger than that. The men operating the ships are not able to understand why many of these charges are made, but they are made, and up to date there seems to be no disposition other than to pay them. There could not be any other disposition. If necessary, let us pay France a reasonable rental for the use of this port—a good rental.

Mr. COOPER of Wisconsin. Will the gentleman please tell us what those charges are for?

Mr. MILLER of Minnesota. I do not like to, but inasmuch as the gentleman has asked it I shall do so.

Mr. COOPER of Wisconsin. If there is anything that ought not to be said, do not do so.

Mr. MILLER of Minnesota. I do not want to injure the feelings of any of our friends.

Mr. COOPER of Wisconsin. Then I would not mention it.

Mr. MILLER of Minnesota. That is the only reason I refrain from giving them; but I will say to my friend that I have a list which I shall be very glad to show him privately.

Mr. MADDEN. They are the usual charges for docking——

Mr. MILLER of Minnesota. And other things.

Mr. MADDEN. And port fees and pilot fees and all that.

Mr. MILLER of Minnesota. And other things.

Mr. LONGWORTH. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Minnesota. Yes.

Mr. LONGWORTH. Is it not true that we ourselves built a large number of those docks?

Mr. MILLER of Minnesota. We have built some extensions to those already there.

Mr. LONGWORTH. I happened to hear the Secretary of War the other day before a committee of another body devote a great deal of time to showing what magnificent work this Government had done, and the enormous amount of docks it had built, and the enormous amount of lumber necessary to transport, and the number of forests had to be cut down in France to provide lumber with which to build the docks.

The CHAIRMAN. The time of the gentleman from Minnesota has again expired.

Mr. MILLER of Minnesota. Mr. Chairman, I have been an awful transgressor, but I will state to the gentleman from Wisconsin that I think I can finish in 10 minutes.

Mr. COOPER of Wisconsin. I yield the gentleman 10 minutes more.

Mr. GOODWIN of Arkansas. Will the gentleman yield?

Mr. MILLER of Washington. Does the gentleman contend that we should have the exclusive use of the port to which he refers?

Mr. MILLER of Minnesota. Absolutely we should have control of it. We could permit French use of it as needed; but I will say that there is mighty little need that the French have for this port. What I mean is that we must have it under our absolute control.

Mr. MILLER of Washington. Does the gentleman know what arrangements are made between the British and the French regarding the port of Calais?

Mr. MILLER of Minnesota. I do not. I did not get interested in this port business until after I had been to England and to the English front or I should have made some inquiry in respect to it.

Mr. ROSE. Mr. Chairman, I would like to know the answer of the gentleman to the question of the gentleman from Ohio [Mr. LONGWORTH].

Mr. MILLER of Minnesota. I know they have been doing the best they can, but I sincerely trust the Secretary of War will find time to go over there and make a personal investigation of many things in France.

This brings me to the next step: There are not proper facilities for unloading the kind of cargo that certain ships carry. In the third place, stevedores could not be readily found for the work. In our anxiety to secure a force of stevedores to send

to this port in France, we seemed to think it was unnecessary to secure skill or experience. I do not know where these stevedores came from, but as near as I could make out they were recruited from various sections of the South—all of them colored—their main qualifications having been that at some time in their early youth they had sat on a dock and seen a steamboat pass by. Army officers who are working themselves down to skeleton form in a frantic effort to bring order out of this chaos at this port told me that in unloading ships these stevedores, by their carelessness and lack of experience, have destroyed 20 per cent of the cargoes that have been sent over. They would drop sugar and flour into the sea. They were clumsy, awkward, slow, inefficient.

I am inclined to think that conditions have improved since I left there the middle of November. God knows, I hope so, but I am speaking of it as I saw it during that period of two months and a half. I watched these men for many hours. I have never seen such inefficiency in my life on any kind of a job. Furthermore, there did not seem to be any desire to improve their efficiency. I am speaking now of the men themselves. Never was greater contrast noted than when I left this port and a few days later stood in another French port under the control of the English, and observed how the English handled their shipping and unloaded their boats. It was most humiliating to me as an American. To unload a boat does not require military training or skill. It is just plain, ordinary industrial work. Then, too, there were nowhere enough of these negro stevedores. An efficent corps of workmen of this class should be recruited in this country and sent over under military discipline and operated as a military unit. They began that just as I was leaving. If we have to pay high wages, let us pay them, but let us get efficiency. Why, I saw men there at the front, I saw the boys as they were putting their packs on their backs, getting ready to step into the trenches, and some of them did not have the kind of hats they should have—the kind adopted for the trenches. This hat was a new thing. They had not yet had a chance to get these hats, and perhaps could not have gotten them had they stayed there two weeks. Transportation from the port was pretty nearly blocked. Oh, if I could, if I felt at liberty to give you details of transportation from this port, even after it gets out of this congestion, then you would understand that we need to direct our attention to transportation in France.

This brings me to another thing. In order to get our men to the front and supplies to them, we have to ship all by a French railroad. The railroad we are using is exclusively under French control. The equipment is under French control; the trains are operated by the French. The cars that we are using are such as the French from time to time let us have.

And, by the way, our needs have to be supplied by the French. They take care of their own needs, and they are pretty certain to take care of their own needs first. It is no secret to the world, but every country in Europe is short of transportation on railways for their own needs. The cars that we use are such as the French from time to time let us have. Here again is manifested the unfortunate situation of our working in a strange land among strange people.

Mr. BLAND. Will the gentleman yield?

Mr. MILLER of Minnesota. Let me finish this; then if I can I will yield to the gentleman. The ways of the French and the Americans are not the same. The French Government should be required, as a condition precedent to our sending an army to France, to turn over to us not only this port but also a line of railroad from the port to the army in the field. This can be done, having a regard to the railway system in France. If it can not be done, we should build a railroad and build it at once; but it can be done, because from this particular port the railway facilities are such that one railroad system can be turned over to us. The condition is absolutely intolerable and prohibitive of success. We know that the German railways have been allowed to decline in efficiency to a very marked degree. Rolling stock and the roadbeds have not been kept up. The heavy wear and tear during these war years have seriously impaired the whole railway system. To a degree this has also occurred in France and England, particularly in France. The French railroad tracks are in good shape. The rolling stock is inadequate and out of repair. The gauge of the railroad is such that American rolling stock can be utilized. The United States should send to France for the use of our troops and of our Army at the earliest possible minute upward of a thousand locomotives, and many, many thousand cars. Efforts to supply the locomotives have been going on for many months, but we should have the direction and control of this railway system in our own hands. We can afford to pay the French Government liberally for the use of this railway system, and the French people must see that our exclusive control over this system is essential to our military success.

Why, at one time—it is no great secret now—15,000 of our choice troops, the Rainbow Division, if you please, put on the finest ships in our Navy, the fastest, the biggest, the grandest and best, the cream of those that Germany so kindly let us have—against their will—went to a certain port in France. When it got there the rolling stock which had been promised to unload those troops and take them to the front had been obliged to be diverted to haul French and English soldiers, more than 200,000 of them, down to the Italian front, and these men were practically cut off, were practically obliged to stay on board their ships for two weeks, lying out there at sea, short of water, short of food, and short of everything. That was not the fault of anybody on earth but the system under which we are trying to work.

In the matter of motor trucks we have not made a practical start. I say this with deliberation, notwithstanding what some gentlemen recently have said. The type of motor truck first sent over was not the one best adapted to the roads of France. The British and the French use a truck that is several times larger than the one we first sent over, and they use an enormous number of them. Back of the British lines one seems to see nothing but endless streams of motor trucks. It is hard to believe there are so many motor trucks in the world. As yet we have an insufficient number of motor trucks over there. Visiting the various camps where the American troops are located, I was everywhere met with the concern about the need of motor transportation.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. MILLER of Minnesota. I will not ask for further time.

Mr. FLOOD. Mr. Chairman, I yield 30 minutes to the gentleman from Missouri [Mr. HAMLIN].

Mr. HAMLIN. Mr. Chairman, I hardly think I will occupy all the time that the gentleman from Virginia has so generously yielded me. We have just listened to a very interesting address, one that I think it would be well for us all to consider and ponder carefully because it is this first-hand information that is most valuable in these times when we ought to be careful not to make mistakes.

I was very much interested in the address delivered this morning by the distinguished chairman of the Committee on Foreign Affairs outlining somewhat the history and the work of the State Department. I think we will all agree with him that it is one of the greatest departments of the Government. In one sense it is both the eyes and the ears of the President—it is through that department that he both sees and hears what is going on throughout the world and he is thus enabled to protect the rights of all the people of the United States. I sometimes think, and I have some knowledge of that department, that people fail to realize the tremendous importance of that particular department of government. I have not the slightest doubt that wars have more than once been averted by the activities of the State Department. Great questions have been settled through that department in a few days that bid fair to cost the people in treasure immense sums of money and cause rivers of blood to flow. Sometimes we are inclined to be a little niggardly when they ask for appropriations to carry on their work. Nothing that I shall say this afternoon must be construed as a criticism of the present administration of that department.

I had not thought of saying anything at all in relation to a matter that arose during the time the gentleman from Virginia [Mr. FLOOD] was addressing the House this morning. I refer to the matter raised by the gentleman from Ohio [Mr. FESS] in regard to the work of Col. House. I have heard the question asked frequently, and usually put in the nature of a criticism, as to the status of Col. House on his missions to Europe. I hold no brief for him. I do not even know him; if I ever saw him I do not remember it, and I shall not attempt to say anything either for or against him. The fact that President Wilson trusts him gives me confidence in the man. I am surprised at anybody who would question the right or the expediency of the President in these critical times to select whomsoever he might choose to go any place or anywhere at any time to ascertain for him and through him for the people of the United States vital information, first hand, that is necessary for him to have in the proper management of the affairs of this Government. That has been the practice, if I read the history of my country correctly, throughout all of its history. Other Presidents have done it. I called attention this morning when that question was raised to the fact that President Roosevelt in 1905 had designated or selected a man by the name of Jacob Hollander to

go as his special representative to Santo Domingo on a certain mission. That this designation was made by President Roosevelt appeared in a hearing had by the Committee on Expenditures in the State Department a few years ago when that committee was investigating the State Department. I have looked up that record briefly, and I find Mr. Hollander when he was before that committee stated:

The President of the United States asked me to go to Santo Domingo in March, 1905, as his agent to ascertain just what conditions were and to report to him as to the advisability of sending a mission to make a full study and a written report.

This question was asked Dr. Hollander:

You speak of this trip to Europe. Did you make more than one trip to Europe?

Dr. HOLLANDER. I made two. The first trip of investigation was made in June, 1905, while I was the representative of the President.

And then he went on to tell for what purpose he made the trip. Again he said in the course of that examination, when his attention was called to a date that the committee thought he was mistaken about:

Dr. HOLLANDER. I moved it one year later; it should have been "until I was again invited in June, 1906"; that is to say, I was sent by the President in March, 1905; I made a verbal report to him in May, 1905; I went to Europe and on my return from Europe I was sent in a cruiser to the West Indies and given this proper dignity, and when I returned I submitted my report, in September, and remained subject to the orders of the President until December 31, 1905, after which my compensation and connection terminated, and I was not employed in any wise until the conference of which I spoke in June, 1906.

There was no criticism of that. I might doubt the necessity for that appointment, but I do not doubt President Roosevelt's right to make it.

Mr. CAMPBELL of Kansas. Will the gentleman yield?

Mr. HAMLIN. Yes.

Mr. CAMPBELL of Kansas. Does not the gentleman recognize the difference between that mission and the mission upon which Col. House last went to Europe, when he went to meet the chief statesmen of the belligerent countries allied with us—the premier of England, the premier of France, and the premier of Italy?

Mr. HAMLIN. I do not.

Mr. CAMPBELL of Kansas. They being officially recognized and Col. House being an unofficial representative of the President and not of the country?

Mr. HAMLIN. When Col. House represented the President, he represented the whole country, and I do not think the United States suffered any by reason of the fact that he may not have gone there with his pockets full of commissions or his breast decorated with all sorts of jewels and insignia.

Mr. CAMPBELL of Kansas. He was well known.

Mr. HAMLIN. He is certainly becoming well known.

Mr. CAMPBELL of Kansas. Would it not be in keeping with the dignity of this country to have had a representative of this country occupying an official position equal to those of other countries?

Mr. HAMLIN. The dignity of the United States undoubtedly has not suffered. The approval placed upon Col. House by President Wilson, by intrusting him with a great mission, is sufficient dignity to give him standing in any country and among any people or dignitaries on the face of the earth, and he needed nothing more. [Applause on the Democratic side.]

Mr. HARDY. I will ask the gentleman if the treatment accorded to Col. House did not show that he was fully recognized?

Mr. HAMLIN. Absolutely. There is no question about it.

Mr. FESS. Will the gentleman yield?

Mr. HAMLIN. Yes.

Mr. FESS. As I understand from the hearings, the gentleman was paid out of what fund?

Mr. HAMLIN. Now, I am coming to that—I am leading right up to it. You mean Dr. Hollander?

Mr. FESS. Yes. I was about to say I did not raise that question this morning, and it is a question that was pertinent.

Mr. HAMLIN. And the question I rose to discuss was the expenditure of certain moneys by the State Department, and my reference to this matter at all was occasioned by the question raised this morning by the gentleman from Ohio [Mr. FESS].

Mr. FESS. However, the gentleman will remember I did not raise the question of money matters.

Mr. HAMLIN. Not at all.

I hardly feel it is necessary to go into the question of the compensation of this man Hollander inasmuch as that is past history. Since the gentleman has asked me, however, it did develop that this fellow Hollander was paid something like $50,000 by our Government for his services and $100,000 by the Santo Domingo Government, the propriety of which transaction our committee questioned.

I do not think there was ever a time, even in times of peace, when it is not necessary for the President to have a fund from which he can pay through the State Department certain expenses incident to a certain class of official duties that it would not be policy to make public to the world. We all recognize that, and we have recognized it ever since the organization of the Government. Every other Government in the world does the same thing. The reason for it is perfectly apparent. It frequently becomes necessary, in addition to all the information the President can gather through the ordinary sources—the ambassadors, consuls, and so forth—for him to select some man in whom he has absolute confidence, as to his integrity, intelligence, and his judgment, to go on a mission and obtain first-hand facts so that when the President acts he can know that he has the actual facts. The importance of this is apparent, I think, to everyone of us. Of course, this work cost something and must be paid out of some fund. It would not do perhaps to make public the purpose of this expenditure, because if published to the world just what had been done international complications would in all probability arise from such publication. Therefore in this bill and in every other similar bill there is carried a lump sum of money—$700,000 in this bill, I see—out of which the President may pay these kind of expenses, and then report the expenditure to the Treasury Department under section 291 of the Revised Statutes by what is called a secret certificate, without specifying, without itemizing, and without disclosing the vouchers showing for what this money has been expended.

Mr. FESS. Will the gentleman yield?

Mr. HAMLIN. Yes.

Mr. FESS. I think the gentleman does not want that statement to go into the RECORD at this place, to the effect that the $700,000 in this bill is intended to pay expenses of this sort.

Mr. HAMLIN. Oh, no. I say there is carried in this bill, under the item of emergencies, and so forth, $700,000——

Mr. FESS. Which may arise out of the war and which nobody can foresee.

Mr. HAMLIN. I do not mean to say that the entire $700,000 will be thus expended, but under that emergency item of the bill there is carried the sum of $700,000.

Mr. FESS. But specifically because under the war there are situations developing in various parts of the world that we can not foresee now.

Mr. HAMLIN. There is no question about that. In ordinary peace times the appropriations under that item averaged only about $90,000, and at times, I think, it has been cut down to $50,000.

There is another thing I wish to refer to. At the time my committee made the investigation of the State Department a few years ago it went into these matters very carefully. There was then no war; there was not even a war cloud in sight; and we recommended that the amount carried under this particular item which we have been discussing in the Diplomatic and Consular appropriation bill be cut down below $90,000. But I realize that conditions have radically changed since this administration went into power in 1913. At that time there was trouble brewing in Mexico. There was an ugly situation down there. Then, in August, 1914, this awful war broke out in Europe, multiplying many times over the necessity for the performance of just such services as would be paid for out of a fund of this kind and not to be specifically reported to the Treasury Department. Under the general law every dollar that the different executive departments expend must be represented by a voucher, and all may be made public, excepting this particular kind of expenditure that I am now speaking of.

And that brings me to the real point in the case: There has been a tendency to take advantage, it seems to me, of the fact that the Secretary of State or the State Department has the right, under section 291 of the Revised Statutes, to expend money out of this fund, and then, in settlement with the Treasury, cover the purpose of the expenditure by a blanket certificate of secrecy and forever foreclose the world from a knowledge of the purpose for which this money was expended. This statement in nowise refers to the conduct of the State Department under the Wilson administration, for I have no information covering that point.

Mr. LONDON. Mr. Chairman, will the gentleman yield there for an inquiry?

Mr. HAMLIN. Yes.

Mr. LONDON. Has not a fund of $100,000,000 been put at the disposal of the President out of which such expenses could be paid?

Mr. HAMLIN. That is a different fund entirely. That is purely a war emergency fund. I am talking now about the fund that is carried in all of these Diplomatic appropriation bills, either in time of war or in time of peace.

Now, I want to call the attention of the committee to what appears to be a discrepancy in the report as compared to cer-

table data which I have. The distinguished chairman of the Committee on Foreign Affairs, in the frank and fair way in which he always deals with the House, has published in the report filed with this bill a tabulated statement, on page 9, which was undoubtedly furnished him by the State Department, showing the amount of money appropriated during the different years, running from 1905 to 1918, inclusive, and the amount expended out of that appropriation during each of these years, and which expenditures were undoubtedly covered by secret certificates in the Treasury such as I have been talking about. I have here with me some of these so-called secret certificates. I will call your attention to one, so that you may understand it. They read like this:

By direction of the President and in pursuance of section 291 of the Revised Statutes of the United States, I hereby certify that ——— ———, the disbursing officer, has expended the sum of $——— during the period from ——— to ———, 19—, from the appropriation for emergencies arising in the Diplomatic and Consular Service, 19—, for expenses incurred during the fiscal year 19—, NATURE AND OBJECT OF WHICH EXPENDITURE IT IS DEEMED INEXPEDIENT TO MAKE KNOWN, and I hereby request the accounting officers of the Treasury, in the settlement of the accounts of the said ——— ———, to allow him in the amount above named $———.

That is what we call the secret certificate which they are permitted to file with the Treasury Department under section 291 of the Revised Statutes. That is perfectly all right. I have no criticism to make of that at all, provided that expenditure is limited to things that should really be kept secret.

But let me give you an illustration of the practice which seemed prevalent in the department several years ago. We make an appropriation in this bill each year of a certain amount of money for bringing home criminals. There is no secrecy about this item. The amount is specified always; and yet I have certificates on file in the committee room, such as the one I have read, showing that for money expended in bringing home criminals they solemnly certified that the expenditure was of a nature and for a purpose that ought not to be disclosed and covered it into the Treasury by secret certificate. We appropriated some years ago $20,000, with no secrecy about it in the world, to enable this Government to participate in the celebration of the tercentennial at Lake Champlain. That amount of money was expended and the report of it was covered by one of these secret certificates in the Treasury; and yet there was absolutely no reason for it to be kept secret.

I can name 15 or 20 different expenditures covered by secret certificates in the Treasury as to which there could be possibly no kind of reason for it. The truth is, if a Secretary of State were disposed to do it, he could go out here on the street and buy an automobile for $5,000 and pay for it out of this fund and then solemnly declare that the purpose of that expenditure was of such character and nature that it ought not to be made public, and put the certificate in the Treasury and absolutely foreclose any knowledge on the part of the public as to the purpose for which that money was expended.

Now, I am not accusing anybody of doing that. I am simply pointing out the danger. I do know that this fund has been utilized for purposes which ought not to be kept secret, but in settlement was covered by a secret certificate.

Let me point out here what seems to be misleading. I have not got the report up to date. I have tried to get it, but so far it has not come to me. In 1911 my committee made a very exhaustive examination of conditions in the State Department. At that time I wrote the Secretary of the Treasury and asked him to send me, among other things, a statement of all the money paid out of this emergency fund and covered in settlement by so-called secret certificates under section 291, Revised Statutes.

Here is his reply:

TREASURY DEPARTMENT,
Washington, August 2, 1911.

Hon. C. W. HAMLIN,
Chairman Committee on Expenditures in State Department,
House of Representatives, Washington, D. C.

SIR: In compliance with the request contained in your letter of July 18, 1911, there is submitted below a statement prepared by the Auditor for the State and Other Departments showing all moneys disbursed by the Department of State and accounted for by certificates of the Secretary of State under section 291, Revised Statutes of the United States, from July 1, 1905, to March 31, 1911:

July, 1905	$2,589.84
August, 1905	4,226.01
September, 1905	11,078.47
October, 1905	14,019.77
November, 1905	16,924.24
December, 1905	7,716.85
January, 1906	8,630.08
February, 1906	4,680.94
March, 1906	11,739.26
April, 1906	10,570.36
May, 1906	10,871.40
June, 1906	14,389.41
Quarter ended Sept. 30, 1906	29,304.72
Quarter ended Dec. 31, 1906	$16,131.98
Quarter ended Mar. 31, 1907	33,629.94
Quarter ended June 30, 1907	29,667.34
Quarter ended Sept. 30, 1907	32,677.79
Quarter ended Dec. 31, 1907	29,896.96
Period from Jan. 1 to Apr. 6, 1908	18,063.92
Period from Apr. 17 to June 30, 1908	21,682.36
Quarter ended Sept. 30, 1908	27,195.60
Quarter ended Dec. 31, 1908	21,958.25
Quarter ended Mar. 31, 1909	49,876.00
Quarter ended June 30, 1909	27,602.73
Quarter ended Sept. 30, 1909	26,561.45
Quarter ended Dec. 31, 1909	29,566.71
Quarter ended Mar. 31, 1910	32,806.49
Quarter ended June 30, 1910	15,611.16
Quarter ended Sept. 30, 1910	43,272.60
Quarter ended Dec. 31, 1910	100,081.96
Quarter ended Mar. 31, 1911	16,991.15

Respectfully,

FRANKLIN MACVEAGH, *Secretary.*

You will observe that this letter only brings it up to March 31, 1911. Recently I asked the Secretary to give me a statement of the disbursement from April 1, 1911, to June 30, 1911, so as to complete the statement for the full six fiscal years—from July 1, 1905, to June 30, 1911:

TREASURY DEPARTMENT,
Washington, October 28, 1911.

Hon. C. W. HAMLIN,
Chairman Committee on Expenditures in State Department,
House of Representatives.

SIR: Replying to your letter of October 24, 1911, I have the honor to inform you that the sum of $13,505.72 was expended by the Department of State and accounted for by certificates of the Secretary of State under section 291, Revised Statutes United States, for the period April 1 to June 30, 1911, as shown by the files of this department.

Respectfully,

J. F. CURTIS, *Acting Secretary.*

Mr. KNUTSON. Has the gentleman any figures available since 1913?

Mr. HAMLIN. I prefer not to stop to answer that now, but if the gentleman will remind me of it I will do so a little later on. You will observe, if you have the report on this bill before you, that they say that for the fiscal year 1906 there was expended under section 291, Revised Statutes, $112,080.78. As a matter of fact, unless I made a mistake in addition, and I do not think I did, there was expended $117,496.72, as that much was reported to the Treasury by secret certificates under section 291, Revised Statutes.

For 1907 they say there was expended $76,925.12. As a matter of fact there was expended, covered by these secret certificates, $108,133.98.

In 1908 they say there was expended $80,620.52. There was actually expended $102,321.03.

In 1909 they say there was expended $47,865.67. There was actually expended $126,632.58.

In 1910 they say there was $79,744.20 expended. There was actually expended $104,545.81.

For 1911 they say there was expended $89,466.63. As a matter of fact there was actually expended $173,851.43.

Mr. FLOOD. Will the gentleman permit me to ask him a question?

Mr. HAMLIN. Yes.

Mr. FLOOD. The gentleman stated that these figures were furnished to the Committee on Foreign Affairs by the State Department. The gentleman is right about that?

Mr. HAMLIN. I said I supposed they were furnished by the State Department.

Mr. FLOOD. I should like to know how the Secretary of State could expend as much money as the gentleman said in 1911, something over $173,000, when the appropriation was $90,000 and the unexpended balance $10,000, a total of $100,000?

Mr. HAMLIN. The Secretary of the Treasury in 1911 stated that they spent $173,851.43. I think I can explain it. I am not criticizing, but trying to call attention to a dangerous situation that ought to be regulated.

Mr. FESS. How was the difference made up?

Mr. HAMLIN. In a moment I will answer the questions of both the gentleman from Virginia and the gentleman from Ohio. Let me give you the total first, though. The sum total for these six years, as shown by the report of the committee, aggregates $157,419.79, whereas by the reports of the Secretary of the Treasury for the same years there was expended $615,485.23, or a difference of $458,065.44. You ask how I explain it. I will tell you how I explain it, and yet I may be wrong. There can be no kind of mistake about the figures furnished by the Secretary of the Treasury, because there came along at about the same time, or at least I have them, certified copies of the secret certificates filed by the Secretary of State with the Treasury Department covering those amounts. Now I will tell you where I think the discrepancy comes in. I take it for granted that the amount printed in the report by the committee and furnished by the State Department is in all human probability actually and truly the amount expended for secret

work that ought not to be made public. I am not saying that is not true. I apprehend that is true. But covered in the same way in the Treasury Department by these secret certificates were items aggregating $458,065.44 that were not secret and ought not to have been reported under secrecy.

Mr. FLOOD. Does the gentleman think that the Comptroller of the Treasury would permit the payment of a warrant on that fund when all the fund had been exhausted? An appropriation was made for that fund in 1911 of $90,000; there was an unexpended balance of $10,000, making $100,000. Does the gentleman think the Treasury Department would pay warrants aggregating $173,000 on that fund? Surely the gentleman does not think that there could be spent of that fund a larger amount than the fund itself.

Mr. HAMLIN. They have a system of bookkeeping down there by which in some way they borrow from one fund and pay it back out of another, and switch around until it takes a better bookkeeper than I am to know how it is done. But it is like the fellow that said a rabbit could not climb a tree; but the other fellow said that it did climb a tree, because it had to. Here is the report of the Treasury Department, with the certificates.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. HAMLIN. May I have five minutes more?

Mr. FLOOD. I yield to the gentleman five minutes more.

Mr. HAMLIN. I have the certificates for those years, and here are the figures. Any gentlemen can take them. I will print them in the RECORD. Any gentleman can figure it out for himself. This amount of money was solemnly certified to by the then Secretary of State. He said that the purposes of the expenditures ought not to be made known, and it aggregates the amount that I give you. Now, whether the fund was there or not——

Mr. FLOOD. The gentleman has just said that at times the department borrows from this fund for other funds and subsequently reimburses the fund. That seems to be the explanation.

Mr. HAMLIN. The gentleman has listened indifferently to me, or else he knows that that is not the only explanation I suggested. I do not attempt to explain. It is up to the department to make the explanation. I give the facts as they were given me by the Treasury Department.

Mr. FLOOD. Does the gentleman think that since 1912 a better system has been inaugurated?

Mr. HAMLIN. I certainly hope so. There is absolutely no partisanship in this with me. I have not yet got a report from the Secretary of State. I wrote him as soon as I got the report of the committee and saw the figures published therein. You know that under the law the executive departments must report their expenditures annually, and these reports are referred to the Committee on Expenditures for the different departments. When the Secretary of State's report came in and was referred to my committee I failed to find the usual report of the amount of money expended from the emergency fund. I called the department up on the telephone and they assured me that they would furnish me that information. I got busy and forgot it, and I presume they did. Nothing more was said about it until I got hold of the report published by the committee on this bill, and I immediately wrote the Secretary of State, asking him to kindly furnish me the amount of money spent out of the emergency fund for the years 1912–1918 covered by secret certificates in settlement with the Treasury. I told him I wanted this information, if possible, by last Saturday. On yesterday I received the following letter from him:

DEPARTMENT OF STATE,
Washington, February 2, 1918.

The Hon. COURTNEY W. HAMLIN, *Chairman,*
Committee on Expenditures in the State Department,
House of Representatives.

MY DEAR MR. HAMLIN: I have received your letter of January 29, 1917, requesting a statement of the amount of money which this department has expended, under the provisions of section 291 of the Revised Statutes, from the appropriation designated as "Emergencies arising in the Diplomatic and Consular Service" for the fiscal years 1912, 1913, 1914, 1915, 1916, 1917.

In view of the fact that there is an Executive order providing that no information of any kind shall be furnished by the Secretary of State in regard to money expended and accounted for by certificate, in pursuance of section 291 of the Revised Statutes, except upon due direction in writing from the President, I have submitted your request to the President for his direction and will take pleasure in communicating with you further as soon as his reply shall have been received.

I am, my dear Mr. Hamlin,
Very sincerely, yours,

ROBERT LANSING.

Now, then the Executive order referred to I suppose is an order issued by President Taft some years ago when we were making an examination of the State Department.

I think that it is only fair to state that I on yesterday replied to the Secretary as follows:

FEBRUARY 4, 1918.

Hon. ROBERT LANSING,
Secretary of State, Washington, D. C.

DEAR MR. SECRETARY: I am somewhat surprised at the statement in the first paragraph of your letter of date the 2d instant, in view of the fact that what purports to be information asked for by me, and which you declined to furnish without special permission from the President, has been made public in the report on the Diplomatic and Consular appropriation bill now on the Calendar of the House. Certainly if they have been furnished with the information, then I see no reason why the Committee on Expenditures in the State Department, whose duty it is to look into the expenditures of money in that department, should be denied this information.

I will state very frankly that the immediate cause of my preferring the request for this information contained in my letter of January 29, 1918, was that I had seen the report filed by the Committee on Foreign Affairs covering the expenditures made by the Department of State under section 291, Revised Statutes, for the years 1905 to 1918, and from information which I have covering a portion of this time I am led to conclude that that statement, to say the least, is misleading. However, the information which I have does not cover all the years mentioned in that report, and I was anxious to get direct information from the department so as to compare it with the statement published.

I trust that you will not hesitate to furnish it and would be glad to have it at the earliest possible time.

Very respectfully.

Mr. PLATT. Will the gentleman yield?

Mr. HAMLIN. Yes.

Mr. PLATT. Did I understand the gentleman to say that $20,000 of an appropriation openly made was put in under one of these certificates?

Mr. HAMLIN. Yes.

Mr. PLATT. Then that did not come out of this fund.

Mr. HAMLIN. No; it did not come out of this fund, and that may explain somewhat how they seemed to have expended more than was appropriated. Twenty thousand dollars was a special appropriation, but it was covered by a secret certificate in settlement with the Treasury. Why it went in under that and finally got over, I do not know. We found that about $5,000 was paid out on a banquet, hack hire, telephone, sleeping berths on the train, railroad fare, and so forth.

Mr. MOORE of Pennsylvania. I thought it was for rope and other refreshments. That is the way it is generally charged.

Mr. HAMLIN. No; they gave us the hotel bill itemized. There was plenty of wine in it.

Mr. MOORE of Pennsylvania. There is always a great reluctance to tell of the good times we have had when they spend the public money in having it.

Mr. HAMLIN. Now I am not seeking to criticize only. I want to try to correct an evil.

Mr. MOORE of Pennsylvania. I think the gentleman is doing his full duty.

Mr. PLATT. Will the gentleman yield?

Mr. HAMLIN. Yes.

Mr. PLATT. Under what law could a secret certificate be issued for a fund made by an open appropriation?

Mr. HAMLIN. There is no law for it. I could give you another instance, but I rather hesitate to do it because I have spoken of it here so often. We discovered that a portrait of Justice Day, as ex-Secretary of State, was painted at public expense as was customary. Mr. Rosenthal, of Philadelphia, was the artist. The chief clerk of the State Department called on the disbursing officer for $2,500, telling him it was to pay for painting Justice Day's portrait. The disbursing officer turned the money over to the chief clerk. Eight hundred and fifty dollars was paid to Rosenthal, he having signed a blank receipt in advance, and over his signature they filled in $2,450, but $850 only was given to Rosenthal. Where the balance of the money went we have never been able to say.

Mr. MOORE of Pennsylvania. Was that before or after we made the appropriation for the Shipping Board? [Laughter.]

Mr. PLATT. That was paid out of the emergency fund.

Mr. HAMLIN. Yes; out of the emergency fund.

Mr. KNUTSON. What year did that take place?

Mr. HAMLIN. In 1907, I believe. This is the point I am trying to make, that we ought to safeguard in every way we can the expenditure of this money. The practice to which I have referred opens the floodgates, gentlemen, and there is no question about that in the world. Mr. KNOX was Secretary of State when we made this investigation. He came before our committee and was defending in a way the practice under section 291, Revised Statutes—not defending this particular thing of which I spoke a while ago, of course, but insisting that the Secretary of State should have full leeway in these matters. He said they were bound to have this fund and bound to have this leeway, but I put this question to him: "Mr. Secretary, under your construction of that statute could you not go down town and buy you a span of matched horses and a fine carriage

and equipment out of this fund and then cover it with a secret certificate in the Treasury by saying that the purpose of this expenditure ought not to be made known?" And he answered yes, that there was no question in the world about that. I say that is not right, and there ought to be some kind of a brake or safeguard thrown around this fund.

I expect that the department will need all the money that is carried in this bill for emergency purposes, but I hope that the President and the Secretary of State will be more careful than some of their predecessors; and I ought to say for Mr. Knox that after we made this exposé he came before our committee and granted that we had rendered the country a real service, and he said that he had issued an order that not one dollar should be drawn out of this fund until the items for which the money is to be paid out shall have been stated and laid on his desk and his attention had been specifically called to it. I applauded him for that. Then when Mr. Bryan came along as Secretary of State I went down to his office and spent an afternoon with him, and called his attention to all of these things, and I said: "I hope, Mr. Secretary, that you will hold a tight hand upon the expenditure of this money that may be covered by secret certificates in the Treasury." He assured me that he would. I have not said anything to the present Secretary of State, but I am hoping—and I have no reason to think otherwise—that he is following the rule established by Mr. Knox and followed by Mr. Bryan.

Mr. PLATT. Is it not true that all of the unexpended balance are carried right along in this fund?

Mr. HAMLIN. Only during the past few years is that true. That was not the early practice. I think in 1911 or 1912 was the first time the unexpended balance was reappropriated. Before that time what was not expended went back into the Treasury, but I am inclined to think that there never was any not unexpended.

Mr. MOORE of Pennsylvania. As I understand the gentleman's statement and his reading of this letter, he rather indicates the present Secretary of State, Mr. Lansing, is holding to the secrecy method, just as it has been held to heretofore.

Mr. HAMLIN. Mr. Lansing evidently felt that he was bound by that Executive order that was issued, I presume, by Mr. Taft.

Mr. MOORE of Pennsylvania. That is to say, he was hiding behind the error that had been previously made.

Mr. HAMLIN. I have not said that it was an error, although I think it was.

Mr. MOORE of Pennsylvania. I do not understand the gentleman that way, and I put the question to him. It seems to me, from the letters the gentleman has read, that Mr. Lansing rather referred the gentleman's inquiry to the President, thinking perhaps he ought not to tell the chairman of the Committee on Expenditures in the State Department how the money had been expended until he had consulted the President.

Mr. FLOOD. I think that is not a fair statement as to Mr. Lansing.

Mr. MOORE of Pennsylvania. The letter so states.

Mr. HAMLIN. The letter just simply stated that, on account of the Executive order on file in the department requiring the Secretary of State to refer these matters to the President, he had done so.

Mr. MOORE of Pennsylvania. Exactly; and I think the gentleman was extremely diligent in trying to obtain information about these secret expenditures. He has not yet obtained the information, owing to the conditions that prevail.

Mr. HAMLIN. I do not claim credit for myself for extreme diligence. Some time ago I called up the department, and they promised me the information. I presume they forgot it; I know I did, and never thought of it until a few days ago, when I read this report. Then I sent the letter to Mr. Lansing and, if he had to refer the matter to the President, he has not had time yet to get the information to me.

Mr. MOORE of Pennsylvania. I think the gentleman has done his duty in calling the attention of the House to the fact.

The CHAIRMAN. The time of the gentleman from Missouri has again expired.

Mr. FLOOD. I yield five minutes more to the gentleman.

The gentleman from Pennsylvania [Mr. MOORE] will recall that the letter from the Secretary of State to the gentleman from Missouri was dated last Saturday. The gentleman from Missouri replied to that letter yesterday, and the Secretary of State has not had time to reply to that letter. I will say, in connection with this fund, in justice to the present occupant of that position, that last year he requested—it was, of course, before we were engaged in this war—that that fund be reduced from $200,000, which it has been for some years or prior to that time, to $150,000, and I know from statements he has made to the Committee on Foreign Affairs that he would not object in the least, beyond the fact that he is bound by the order issued by President Taft, to make any of these disclosures to the gentleman from Missouri, who is chairman of the Committee on Expenditures in the Department of State. He has invited members of the Foreign Affairs Committee to visit the State Department and go over the vouchers with him.

Mr. MOORE of Pennsylvania. But he declined to give the gentleman who is chairman of the Committee on Expenditures in the State Department information at the present time. He stated that he is bound by a law issued by President Taft some seven years ago.

Mr. FLOOD. That order has not been rescinded.

Mr. MOORE of Pennsylvania. If there is an improper practice prevailing, the gentleman who is chairman of the committee which ought to have the information is denied the information.

Mr. FLOOD. I think the Secretary of State surely would be bound by the order directed by the President to him until that order was rescinded.

Mr. MOORE of Pennsylvania. My point is the President has been conducting affairs now at least five years, and he has had opportunity to observe whether this order was a good or a bad one, and he has permitted it to prevail, and when the authorized committee asks for information the Secretary of State falls behind this order to the extent of declining the information.

Mr. FLOOD. And during these five years there has been no request made of the Secretary of State that would draw this order into question or call his or the President's attention to it.

Mr. HAMLIN. That is true. I was just going to say no criticism can be inferred from that, because I, as chairman of that committee, have not from that time until now made this request. Perhaps the Secretary's attention was never directed to this Executive order until he got my letter the other day. Now, I want to say this in conclusion, as I do not wish to trespass upon the patience of the committee.

Mr. DYER. Does the gentleman know the Executive order was that of President Taft and not that of the present President?

Mr. HAMLIN. The present President, I am satisfied, has made no such order. President Taft did make such an order, and I was served with a copy of it.

Mr. PLATT. This table covers the expenditures from 1905 until 1918?

Mr. HAMLIN. Yes.

Mr. PLATT. And each year shows the balances subtracted, the expenditures made, and the appropriations made? If these balances are carried on they are available for expenditures—that is, if they have been available only from 1911, there must be $300,000 more in the fund than appears on the surface.

Mr. HAMLIN. That was not true until 1911 or 1912. Prior to that time the unexpended money, if there was any, was automatically turned back into the Treasury.

Mr. PLATT. Are these balances added to the appropriation?

Mr. FLOOD. The gentleman does not understand that all these amounts should be added together.

Mr. PLATT. I understand these balances on the right hand had to be added to the appropriations.

Mr. FLOOD. One balances each time. The whole balance for all the year is added to the appropriation.

Mr. PLATT. Is the balance of each year carried in the appropriation of the next year? It does not show balances carried.

Mr. HAMLIN. If there were any.

Mr. PLATT. Then the balances are available to be expended in that year?

Mr. FLOOD. No; we appropriate a certain amount and the unexpended balance.

Mr. PLATT. This is carried in the table of the expenditures and the balance is to be added in each time?

Mr. FLOOD. For instance, in 1917 $200,000 and the unexpended balance was appropriated. This unexpended balance was $31,830.85 left over from the preceding year. That is to be added to the $200,000, and that is the case as to all these amounts.

Mr. WHEELER. Will the gentleman yield?

Mr. HAMLIN. I will.

Mr. WHEELER. I inferred from what the gentleman said that an order issued by former President Taft has been directed by President Wilson to be still carried out?

Mr. HAMLIN. Oh, no; I said nothing like that. We went over that a few moments ago. Perhaps the gentleman was not in the Chamber at the time.

President Taft issued an Executive order years ago to the effect that the Secretary of State could not furnish——

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. FLOOD. I yield to the gentleman five minutes more.

Mr. HAMLIN (continuing). That the Secretary of State should not furnish our committee with any further information unless first submitted to him and permission granted. And that order, of course, went into the archives of the department, and that is evidently the order referred to by Mr. Lansing.

I introduced a bill and kept introducing it for a year or two, but I could not seemingly interest anybody especially. My bill provided that there should be a permanent standing joint committee of the House and Senate, composed of three men from each House, to whom should be submitted each year all the items for which this money had been expended. If, in their judgment, some of this money was expended for something not necessary to keep secret, they could make it public. Otherwise they could keep it secret. I believed that three men in the House and three men in the Senate could be selected who would be loyal and true and patriotic, and would go over these things and never disclose anything that ought not to be disclosed. I believe something of that kind ought to be done in order that this privilege can not be abused.

I thank you very much. [Applause.]

Mr. COOPER of Wisconsin. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. HICKS].

Mr. HICKS. Mr. Speaker and gentlemen of the Congress, I am going to speak directly during the time allotted me on the question of manning the merchant ships of the United States, those under Government control as well as those traversing the war zone, with Navy crews. I have obtained permission to use here to-day some of the testimony that was given before the Navy investigating committee. The permission was given me by Secretary Daniels, by Admiral Palmer, and by the chairman of our committee, and, with the permission of the House, I will insert that testimony in my remarks.

Ocean transportation is to-day one of the prime factors in the successful prosecution of the war. Every vessel carrying supplies across the Atlantic is in actual war service, for this over-seas traffic is a part of the line of communication from the base—the American ports—to the front and should be operated just as efficiently as any other part of our war activities. The lives of our men on the battle line and the lives of those en route depend upon the quick, safe, and certain operation of our ships. Our entrance into the great conflict has brought to America both a great responsibility and a great opportunity. We shall not shirk the one and should not fail to take advantage of the other. Our responsibility is to build and operate a merchant marine of sufficient tonnage to transport our troops to France, with the supplies of munitions and food to maintain them at the front, as well as to carry a large percentage of the foodstuffs needed by our allies. Our opportunity is to place this mercantile fleet on a permanent footing and make it American in personnel as well as in ownership and operation.

Let me quote from Commodore Miller:

In the days before the Civil War the United States had a merchant marine which was the envy of the greatest commercial nations of the Old World. The great mass of the population lived within a few miles of the coast and the desire of nearly every small boy was to run away and become a sailor. Among a seafaring people it was not difficult to find good crews for all the ships that could be built. But for the last few decades our development has been landward. We were, as a people, devoted to the mighty task of conquering a continent for civilization. We permitted a good part of our foreign trade and most of our shipping tonnage to be captured by our European rivals. It is now of no avail to lament this long neglect of the world's great waterways. In fact, it was not wholly an evil, for by concentrating on the development of the inland States we have created a remarkable railroad system, and this made possible the opening of the great agricultural region of the Mississippi.

The great question which confronts us now and which with increasing force will confront us as we augment the number of our ships is the personnel of the crews operating them. The Navy Department has no controversy with the Shipping Board in this matter. It is their desire and aim to cooperate, not combat; to assist, not retard. Only as a part, though a very important part, of the great national organization charged with the duty of carrying forward America's purposes are they concerned in the manning of merchant ships not directly under the control of the Navy. But the Navy Department, ever alert to the exigencies of every situation, stands ready to enlist and train men for this service. With the same foresight that prompted them to order supplies and contract for munitions in anticipation of their immediate needs at the outbreak of hostilities, they suggested as long ago as last summer the advisability of manning the ships to be built by the Shipping Board by naval crews. In this connection let me offer this letter from the Secretary of the Navy:

NAVY DEPARTMENT,
Washington, November 30, 1917.

DEAR MR. HURLEY: With reference to your letter of November 23, 1917, the principal question involved, relating to the placing of men trained by the Navy on the inactive list in order that they might enter the merchant marine in a civilian status, has been discussed in a conference of representatives of the Navy Department and of the Shipping Board with the result that it was mutually agreed that such plan was impracticable.

As was brought out in the conversation on Wednesday, the chief question at the present time is, of course, the efficient conduct of the war. In other words, the handling of ships crossing the war zone in the most efficient manner possible. This is, of course, the principal desire, not only of the Navy Department but of the Shipping Board and the country as a whole. The question, therefore, resolves itself into a consideration of what method shall be arrived at in order to carry out this purpose. It seems to us essential that all ships crossing the war zone should be officered and manned by men who are subject to naval discipline.

Merchant ships in the war zone are almost as vital a factor in naval operation as the regular vessels of the Navy, and it is of the highest importance that the officers and crews of these merchant ships have such training as will fit them for these military duties and be subject to naval control and discipline.

I know you will understand that the Navy is interested solely in the military and naval work ahead of us in getting troops, munitions, and supplies of all kinds across the Atlantic, and that in cooperatnig with the Shipping Board toward this end we want to do so in such a way as to assist the Shipping Board, not only in this work but in helping it to build up an American merchant marine for the future.

Limiting the question, therefore, to vessels crossing the Atlantic, as suggested at the recent conference, crews can be specially qualified for this work and be under the necessary discipline and control if recruited and trained as Naval Reservists. Under existing laws members of the Naval Reserve must be either American citizens or citizens of friendly nations who have taken out their first papers. We realize, of course, that a large percentage of the crews of American ships are now foreigners who do not come within this category, but it is probable that with the increasing number of ships these men would find ready employment on vessels not engaged in trans-Atlantic voyages.

In regard to those now serving in the merchant marine, who would be eligible for the Naval Reserve, it is hoped that a large percentage of them, both officers and men, will be willing voluntarily to be enrolled in the Naval Reserve and some satisfactory arrangements can undoubtedly be made between the Navy Department and the Shipping Board for the enrollment of a large proportion of them.

In regard to the officers who are now on American merchant vessels, short courses of training can be established in order to instruct them more fully in the procedure necessary to make the voyages safe through the war zone.

If given ample notice in advance as to the numbers and types of vessels for this trans-Atlantic trade, with the dates of readiness, we believe that the Navy Department can obtain sufficient men under present laws governing the Naval Reserves. While the Navy has already increased its training facilities, an additional call of this nature will require certain extensions of our stations which should be taken up at once. The manning of these vessels by Naval Reserve officers and crews should not in any way interfere with any plans of the Shipping Board to have the operation of these vessels while in port conducted by private companies or by the Shipping Board.

Sincerely, yours,

JOSEPHUS DANIELS,
Secretary of the Navy.

Let me also include this letter from Admiral Palmer, of the Bureau of Navigation:

DECEMBER 18, 1917.

To: Secretary of the Navy.
Subject: Personnel preparation for taking over merchant ships.

1. It is recommended that the following proposed letter be sent to the chairman of the Shipping Board. It is important that the chairman of the Shipping Board fully understand that in case the Navy is to be called on to man ships that several months' notice will be necessary:

"MY DEAR MR. HURLEY: It appears that the Shipping Board has issued the following statement to the public press:

"'The bulk of vessels under the American flag, whether engaged in trans-Atlantic trade or elsewhere, so long as they retain their character as merchantment, will continue to be manned by merchant sailors. Troopships and vessels carrying whole cargoes of munitions or supplies for the Army and Navy, however, for military reasons, will be manned by naval crews.'

"It is requested that this be verified.

"I am of the opinion that the personnel difficulties are going to be much greater than contemplated. From our own military history, where large forces have been called on for short-time enlistments, it has been impossible to have a properly trained force. For example, during the War of 1812 over half a million men were enlisted in the Army, practically all being short-time enlistments. This force was never able to effectively oppose the 16,000 British on tais continent. For inexperienced men the life at sea is a greater hardship than life in the Army, and at the present time the war-zone dangers are much greater than has been the danger of our troops in previous wars.

"I believe the only method by which men of the merchant marine can be held until they become efficient, and afterwards held and detailed to the best advantage of the service, is to make enlistments in a military service for this duty for the duration of the war. This plan also conserves man power, in as much as an armed guard in addition to the regular crew would be unnecessary. I hope the plan you have decided upon will prove successful, but I think I should point out that if the Shipping Board finds it necessary to change its policy the Navy will be unable to properly take over any large increase along the line of manning and officering additional ships in less than six months, as the length of time required to build the necessary additional training stations must be added to the time required to train the first detail of crews, and there will be constantly increasing difficulties encountered in rerecruiting the personnel.

"Very sincerely, yours,

"(Signed) L. C. PALMER."

I understand no answer to these communications has been received.

Let me emphasize the point raised by both Mr. Daniels and Admiral Palmer, that of the necessity of knowing in advance what will be expected and required of the Navy Department, for the recruiting and training of a large number of men will take time, and time is all essential in our military program. I think it fair to assume that the Army will need all the ships

launched by the Shipping Board, and that they will naturally ask the Navy Department to man and operate them. Without, however, knowing the requirements in advance, the Navy can not supply the men when needed.

It is not my purpose to build up an argument which may safeguard the Navy from any just criticism or to relieve it of responsibility. The Navy will do its part. My purpose rather is to show that the war forces of the Nation can best be concentrated on the task by having a definite program announced in advance which will be steadfastly adhered to. I feel that all vessels traversing the war zone and all vessels operated by the Government should be manned by naval crews.

Briefly, the advantages to be derived from naval crews would embrace:

1. The enlistment of American seamen.
2. Continuous service for the war.
3. Creation of a marine service that would continue after the war.
4. Military control, training, and discipline.
5. Permanency of crews on particular ships, thereby insuring familiarity with the vessel, with time for drills and the establishing of cooperation between officers and crews.
6. Certainty of departures from ports.
7. Safety of ship and passengers in the war zone, due to discipline and practice.
8. Increased speed of ship.
9. Saving of fuel, due to better handling.
10. Coordination between ships and convoys.

It may be asked, Can the Navy secure a sufficient number of men for this service? Admiral Palmer says "yes," if given time to recruit and train them. Will they enlist for this service as readily as for battleship service? Those best qualified to answer, with whom I have talked, are of the opinion that they will, for to-day every merchant ship mounting guns and carrying a gun crew is in reality a battleship. Will men enlist for this merchant service knowing that the men they supplant were receiving a higher compensation? The answer to this is that the Navy has no difficulty in enlisting men now in competition with the mercantile marine. It must be remembered that this service will be on the same footing as that of the regular Navy.

It will be a different class who will come forward, men actuated by patriotic motives. It is no experiment that is being advocated—merely an enlargement of the present system, with the sailors and soldiers on the same footing as to pay, rations, allowances, and benefits.

Mr. SHERWOOD. Mr. Chairman, I would like to ask the gentleman a queston. How many of these ships have been sunk?

Mr. HICKS. I have a record of them here, which I shall be very glad to give to the gentleman if he will allow me to do so privately.

Mr. SHERWOOD. Well, I have a list of those that have been sunk.

Mr. HICKS. If the gentleman cares to make that public, he is at perfect liberty to do so, of course; but I do not want to do it, because I have been asked not to make it public.

Vessels of the merchant marine taken over by the Navy will be held for the duration of the war. They are taken over, wherever possible, with the officers who have been running them, and these officers are not transferred out of them, except for cause. It should be the endeavor to place on them a crew of reservists, rather than regular Navy men, in order that at the expiration of the war the ship, its officers, and its crew may be released from service simultaneously and no hiatus occur in the smooth operation of the vessel. This will create such a splendidly trained and disciplined body of men in the merchant marine as would not be possible to create in any other way.

Merchant crews are shifted each trip. They are in many instances untrained to seamanship and poorly qualified for the duties and indifferent to their own safety or that of the ship. Probably 70 per cent of our merchant crews are aliens, many of whom can not speak English, and are therefore unable to understand the orders given them. Owing to the above reasons and the fact that they shift after each trip it is impossible to bring them to any state of proficiency. A Navy crew would be permanent, and would improve each trip. The ship would steam faster, load more quickly, be more certain in departures, and be handled more efficiently and with greater safety given a permanent crew. Each additional knot in speed is not only a defense against the submarine but a distinct gain for the allied armies, for by cutting down the running time between ports a greater number of round trips could be made, thereby increasing to an appreciable extent the annual tonnage carried. Time saved on a voyage is tonnage added to transportation. A fundamental military maxim is "not to advance unless the train of supplies is assured." The Army can not place more men in France than it can be assured will be supplied by munitions and food as well as supported by reenforcements. No positive assurance can be given with civilian crews. They are under no definite enlistment or military authority, and could not be compelled to remain throughout the war. They could leave the service at any time, no matter how critical the situation.

Mr. PLATT. Mr. Chairman, will the gentleman yield for a question?

Mr. HICKS. Certainly.

Mr. PLATT. What prevents a little corrective discipline? Is it the provisions of the seamen's act?

Mr. HICKS. They are not enlisted men.

Mr. PLATT. Why can not a sailor at sea get drunk, whether he is an enlisted man or not?

Mr. HARDY. I think I know about the seamen's act. It does not affect it at all; not one bit.

Mr. MOORE of Pennsylvania. Under the war-risk insurance act are not these civilian seamen insured by the Government?

Mr. HICKS. Yes; my friend from Pennsylvania is correct; but instead of the Government insuring them the owners of the ships on which they serve are required to do it at the discretion of the Secretary of the Treasury. I will insert the provisions of the law:

SEC. 3a. That whenever it shall appear to the Secretary of the Treasury that the effecting of such insurance is desirable in the national interest in the case of vessels engaged in any trade, the owner of every American merchant vessel engaged in such trade shall insure the master, officers, and crew of such vessel against loss of life or personal injury from war risks as well as for compensation during detention by an enemy of the United States following capture.

Such insurance shall be effected either with the Bureau of War Risk Insurance or in insurance companies, and on terms satisfactory to the Secretary of the Treasury.

Any attempt to man ships without regularly enlisting the crews would be similar to trying to fill a bottomless pit. Men would be signed on, but there would be no certainty that they would remain with the ship after the first trip. Even if they continued in the service, many of them would not be ready to go back on the return trip, which would mean the shipping of new men unaccustomed to the ship. Regardless of the great factors of discipline and control, the above condition is inefficiency in its worst form.

It can not be pointed out too strongly or too often that personnel, with all that it implies—training, discipline, and control—is always the vital element in military operations. We will undoubtedly be able to build ships, but an efficient merchant marine is far more than a fleet of vessels. The men who man them are vital factors in their successful operation. The objects desired are to put the maximum shipping into service, to make the maximum number of trips with that shipping, and to lose the fewest ships, and also to destroy as many enemy submarines as possible. The transportation of supplies is an arm of the service, just as much as the Army autotruck and mule team which accompany the army at the front. The existence, maintenance, and efficiency of this branch of the service is immediately essential to our most effective carrying on of this war, to the success of our cause. With civilian crews the highest degree of efficiency can not be attained, for in most instances crews gathered in a haphazard manner can not become familiar with the ship, and there is no time for drills and practice. Discipline and training are both essential factors in the safe and speedy operation of a ship, and these can not be secured under civilian seamen.

Let me quote from a speech delivered by Secretary Redfield before a conference of shipping interests August 1, 1917:

The most serious factor that this country faces is that of merchant ships. There are other serious factors, but that is the most serious factor. Every call to duty comes most loudly to him who can move a ship quickly. The man who delays a ship over a day for any cause whatever, howsoever personal or intimate to himself, does wrong to his country now. It is altogether within reason to say that a single day's delay in this war, that which causes it to last another day longer than it otherwise would, may readily mean to this country 1,500 of her sons and $15,000,000 of her money wasted.

Let me also quote from Mr. Andrew Furuseth, president of the International Seamen's Union of America:

According to a census which we have taken there are about 5,000 Germans sailing under the American flag in different capacities. It may be said that they are among the highest skilled men, whether they sail in the forecastle, in the fireroom, or in the galley. Of these men, about 5,000 all told, 3,721 are in the organizations of the seamen, and figuring it up on the same basis of those outside the organization there should be at least 5,000.

For the sake of argument let us assume that 95 per cent of the Germans on our merchant ships are friendly to the United States, or at least indifferent to their native country, what about the other 5 per cent who are dangerous? How can they be weeded out of the service under the existing system of securing crews? It is suicidal for any Government knowingly to place

itself above a volcano merely because that volcano has been quiescent for a few weeks or months. Under any civilian status, after men enroll, there is no hold on them, they may leave at any time, and will not remain on the same ship. On board the vessel these men are not under naval discipline, they work only when they choose. On each watch there are men who decide not to work, and the engineer must find volunteers from other members of the crew. This reduces the speed of the ship to a great extent when speed is a vital factor in the war zone.

Every officer and every member of a crew navigating a ship in the war zone under the American flag should be an American citizen and all of them should wear the uniform of their country's service.

Testimony of Admiral Palmer, Bureau of Navigation, before the Navy investigating committee, January 8 and 9, 1918, on the subject of naval auxiliary crews.

Mr. HICKS. Mr. Chairman, I would like to take up the matter of Naval Reserves in relation to the manning of merchant ships. Admiral, I understand from newspaper reports and from other sources that there is to be a distinction drawn—a classification made, as it were—between ships doing commercial work and those performing military duties, with the former manned by civilian crews and the latter by naval crews. Can you give us any information on this subject?

Admiral PALMER. I have heard that that is to be the case, but we have not received any definite information on the subject. Admiral Benson in the Advisory Council of the Navy Department some weeks ago stated that a representative of the Shipping Board—I think it was Commissioner Donnell—that the representative of the Shipping Board had said to him they did not want the Navy to man the merchant ships, and that there was no probability of them ever doing so. Admiral Benson made that statement in the Advisory Council the other day.

I might explain that the subject was brought up by my asking for some information as to whether any steps had been taken for the Navy to take over the vessels of the merchant marine. And that inquiry was made by me for the reason that if there was anything in the air along that line we wanted to know it, because provision must be made for it immediately. It is just another case of preparation, and without preparing for it, of course, we would not be able to take care of it. As I see it, the merchant marine, if manned by the Navy, and if it includes all new ships being turned out, will require a great deal of preparation on our part in getting quarters in which to house the men and additional places and ships and instructors to train them.

Mr. HICKS. Admiral, do you think such a classification would be satisfactory, having merchant ships engaged in commercial work manned by civilians while those ships doing military service would be manned by Naval Reserves?

Admiral PALMER. I will answer that in my opinion it would be most unsatisfactory.

Mr. HICKS. It is reported that about 60,000 men will be required to man these ships. Is it possible to supply these men through the Navy Department by increasing the present authorized strength? In other words, would you be able to get enough men to man these ships?

Admiral PALMER. I can get enough from the reserves, but it would take time, and I must get definite information about it well in advance.

Mr. HICKS. But can you do it?

Admiral PALMER. Yes; the Navy can do it better than any other organization.

Mr. HICKS. Do you think that the same patriotic impulse would prompt our boys to enlist for merchant service that causes them to enlist in battleship service?

Admiral PALMER. Yes; we haven't the merchant service at present, but it is just as important as the battleship service. They are eager to get on these ships, for they are going into the war zone.

Mr. HICKS. Would you recommend that all merchant ships, whether coastwise or going into the war zone, should be manned by naval officers?

Admiral PALMER. I think that is a little beyond my province. I think more of carrying on this war, and am only thinking of vessels going to the war zone.

Mr. HICKS. All Government-owned vessels should be manned by naval officers?

Admiral PALMER. Yes.

Mr. HICKS. No matter where they ply?

Admiral PALMER. Yes.

Mr. HICKS. Now, Admiral, I wish to ask: If we could man all our ships with naval reserves, we would have more efficient crews, would we not?

Admiral PALMER. We would, undoubtedly. We would also have additional men in every ship for armed guards, whose pay would be in addition to that of the regular crew. The additional trained men will put the vessel through the zone. In peace times they would come down to whatever was the regular crew.

* * * * * * *

Mr. HICKS. Ships manned by naval reserves would have larger crews than if manned by civilian crews, would they not?

Admiral PALMER. No: even if civilian crews were put on ships, we would increase them to a number sufficient to handle the ship. That is the trouble now; they haven't sufficient men. They go off port 10, 12, and in some cases 25 men shy. They can not make the speed. We would not be thinking only about saving money for the company in expense of upkeep and in manning the ships, but mainly about the final delivery of goods safely through the war zone.

Mr. HICKS. I agree with you that efficiency is the main consideration. I think some of the seamen's unions claim that the larger number of crews required under Government service would make up the difference in wages of civilian crews.

Admiral PALMER. I do not know what they claim. They made some claim of that kind the other day to the Secretary of the Navy. In fact, the head of the seamen's union was in to see him, and Mr. Daniels told this representative of the union, after he had stated that we needed so many more men to man these ships in order to make them safe, that the cost would be approximately the same, or words to that effect. I asked Mr. Daniels to get that statement from them so that we might answer it intelligently, but so far we have never gotten any statement.

Mr. HICKS. In your opinion it does not seem reasonable, does it?

Admiral PALMER. I do not know how many they have.

Mr. HICKS. To train 60,000 officers and men, the facilities of the Navy, with a system already in operation, must be far better than it is possible for any other organization to establish?

Admiral PALMER. Oh, yes.

Mr. HICKS. Would it not conduce to the safety of convoyed fleets to have all ships, whether merchant or war, officered and manned by naval reservists, thereby establishing a closer community of interest?

Admiral PALMER. Undoubtedly. We have a great many officers in the merchant marine now who are naval reservists. They are not on active duty, because their ships have not been taken over, but we know that there are some fine officers in the merchant marine. We have a great many of them enrolled in the reserves now at a dollar a month. We would take them over bodily and put them right in the positions they have now, and then all the officers and all the crews would be reservists, with the discipline that goes with the service.

Mr. HICKS. I would like to read a letter, and put it in the record, which was given me by an officer of a big liner I met in Liverpool. I talked to a number of merchant officers when abroad, and they were all of the same opinion, but this officer put his views in writing for me. With the permission of the committee, I will read it: "If all the officers and men in the merchant marine were enrolled into the Naval Reserve, the Government then would have full control of their services, where it would do most good. For instance, Navy men who are competent ocean navigators are doing coastwise work when their services are urgently needed in the vessels trading to the war zone with troops and supplies. Then, again, the officers and men, who are actually in the merchant ships going to the war zone, are in an awkward position. In all fights with submarines the merchant crews on these ships take an active part in the manning of the guns. In this case, should they be captured, they would take on the status of a noncombatant attacking a war vessel and according to the rules of warfare, lay themselves liable to execution."

Admiral PALMER. That is right.

Mr. BRITTEN. Mr. Hicks, may I interrupt you right there?

Mr. HICKS. Certainly.

Mr. BRITTEN. Admiral, what part does a merchant crew take in the manning of the guns in case of attack by submarine?

Mr. HICKS. They might help pass ammunition for one thing.

Admiral PALMER. Yes; they could help pass ammunition and they would help with the lookouts, but they are not qualified as lookouts and are not qualified as gun crews.

Mr. HICKS. Proceeding with the letter: "Under the laws of war a civilian may never engage in hostilities. Another thing, should any member of the crew of these ships lose an arm or a leg in one of these engagements, his career at sea is ended. In this case he can not look to the Government for any help, and shipowners are under no obligations to look after the crews of their ships injured in this way. Now, the ships running through the war zone change nearly all the members of their crews, except officers, every trip. This is not very serious in cargo ships, where man, more or less, has only himself to look after. But this takes on another aspect when taking passenger ships into consideration. There is the crew, who number 400 to 500 men, which may be 500 to 700 passengers, a total of 1,000 to 1,200 men, women, and children. Not much imagination is required to know what would happen in a ship, with that number of people on board, when torpedoed, with a new crew unfamiliar with the ship, her life-saving equipment and the means of getting to the different parts of the ship in the quickest manner. Should a Naval Reserve crew be on board, they would be attached to one ship permanently, and in an instance where the ship was in port, a good deal of time could be given to drilling the crews thoroughly in the use of life-saving appliances and in different parts of the ship. Then in case of an accident of any kind, every man would know his place without any confusion and the quickest way to get there."

Admiral PALMER. When you are speaking about Naval Reserves, the thing to keep in mind is that they all belong to the Navy and it is the discipline that counts in the Navy.

Mr. HICKS. Let me conclude the letter now: "Another thing, as things are at present, the officers in the merchant service haven't the power over the crews they should have to maintain discipline. An occurrence that happens often is this: When leaving a European or English port it is only a matter of two or three hours from the dock to the sea or war zone where the submarines are operating, often as much as half the crew are drunk lying in their bunks unfit for duty and absolutely of no use in work of any kind much less an accident. The only punishment that can be inflicted on these men for this offense is a fine of two days' pay. As these men get $2 a day and a bonus of $1 a day, in all $3 a day, and as the bonus can not be touched by fine, the man only loses $4 for this offense. Needless to say, this does not impress him very much. For a similar offense committed by a man in the Naval Reserve the punishment may be as much as two years' imprisonment, which would be something to think of."

This concludes the letter, which expresses, it seems to me, very conclusive arguments in favor of manning merchant ships engaged in trans-Atlantic trade by naval crews. There can be no question of the importance of transportation in this great conflict, and the officers who command these ships are doing war service and are entitled to have those services recognized. Naval rank would also give them the standing on shore commensurate with the duty performed. Ocean traffic is vital to the winning of the war, we must not minimize its direct or positive relation to the success of our arms, and all vessels carrying cargoes across the seas are in war service, an extremely dangerous war service. There should be no chance of a breakdown in the line of communication. It seems unwise in the extreme to man ships carrying to the fronts men as well as supplies with haphazard crews that can desert with impunity or without fear of severe punishment or render themselves unfit for service.

Mr. PETERS. Is that a hypothetical case?

Mr. HICKS. No; it is a statement of my opinion and I want to see if the admiral agrees with it in a large measure.

Admiral PALMER. I agree with it, absolutely.

Mr. HICKS. What would you do, Admiral, in order to make provisions for the manning of ships in case the Army desired the Navy to operate transports and supply ships? Suppose you were called upon to furnish, say, 10,000 men, what would you do at once? You would have to build barracks, training quarters, etc., wouldn't you?

Admiral PALMER. We would have to have barracks in which to house the men, and we would have to train them.

(In reply to inquiries in reference to the probability of being called upon to furnish a large number of men to man Army transports and supply ships the admiral said: "We must have immediate notice. I made it perfectly clear that we must have a prompt and definite statement from the War Department, if that is their intention, so that we may make arrangements and know when ships will probably be turned over so we may secure and train the men.")

Mr. OLIVER. Has the service which you have been called upon to perform, in supplying armed guards for the many ships engaged in transporting munitions and provisions, been altogether satisfactory from the Navy standards; and if not, why not?

Admiral PALMER. Previous to the United States entering the present war it was decided to put armed guards on certain merchant vessels. The Navy, when called upon for this duty, immediately furnished trained gun crews from the battleship fleet. In the beginning a few ships were armed, especially the fast United States mail steamers of the American Line, and very shortly afterwards other vessels. This initial step was gradually increased until at the present time about 186 ships have been armed and furnished with an armed guard, consisting of approximately 20 men, in command of a chief petty officer.

The important duty of command of the naval armed guards has been put in the hands of trained and experienced officers, warrant officers, and chief petty officers, who have lived up to the best traditions of the service in the performance of their difficult duties. How well these men have done is amply testified to in the numerous reports of engagements with enemy submarines and of their rise to emergency when the merchant crews, through panic or insubordination in many cases, left their stations. As a typical example of the foregoing, the case of the steamship ——— is cited. In this case, upon fire being opened upon an enemy submarine, some member of the merchant personnel passed the word to "abandon ship," and all of the engineer's force came up from below. Through the fact that the chief petty officer, Mr. ———, promptly rose to the emergency and drove the men below to their stations at the point of a revolver was due the fact that the vessel was enabled to proceed and thus escape. I will cite the case of the steamship ———: This ship, loaded with a cargo of gasoline, was attacked by gunfire by an enemy submarine. Shortly after the engagement opened bursting shells of the submarine set the ship on fire. Notwithstanding this, and with the fire burning fiercely, the armed guard fought for one and one-half hours, until the men who were passing the ammunition from forward to aft were driven from their stations by the flames. They then fought with the one remaining gun as long as it was serviceable. In the meantime the merchant crew, with the exception of the master, abandoned the ship. The master remained until the last, and it was not until the last remaining boat was actually on fire and the ship a mass of flames that the ship was abandoned by the guns' crews. They were later called alongside the submarine and the commanding officer thereof congratulated them upon the fight they put up, which he stated was the best fight he had ever seen a merchant ship give. These accounts are but a brief outline of a large number of efficient and brave performances of the dangerous duty, and are such as the country and the Navy has the right to expect from its men. In numerous instances, particularly in the first part of the war, there have been cases of friction between the merchant personnel and the armed guard. Every case of friction has been carefully investigated by a board of naval officers. In practically every instance the friction arose from the failure of the merchant personnel to carry out the orders for the safety of the ship which the Navy Department considers essential while in the war zone, and which the Navy Department has instructed the commanding officer of the armed guard to carry out. The orders of the commanding officer of the armed guard are clear and explicit.

From various steamships came the reports in particular relative to the attempt to instruct the merchant crews in gunnery: "One drawback to this instruction is that upon arrival in port the majority of the ship's force is discharged and fail to come back to the ship, and in most cases they have to teach them American before they are able to understand the orders given. As the merchant crews generally make but one trip, and as they are mostly of foreign nationality, it is difficult to train them to handle a gun." You will understand that I am quoting the language of the reports. The question of the low quality of the merchant crews is repeatedly commented on in the reports of the fast American mail liners, where, owing to the inexperience or poor quality of the firemen, they are unable to make proper speed. Not only is this most serious from the point of view of larger exposure in the danger zone but it also adds in a large degree to the amount of fuel consumed, which in these days of fuel scarcity is most important. More and more as time goes on reports come in stating that a fine spirit of cooperation exists between the merchant personnel and the members of the armed guard. One of the early causes of friction between the ship operators and the Navy Department and masters was due to the fact that the living quarters of the merchant crews were of much lower standard than those which the Navy provides for its enlisted men, and the Navy Department insisted, and correctly, that proper sanitary and cleaner accommodations should be provided for its men. The men of the Navy are of an entirely different standard from the men in the merchant marine. On the one hand, the crews of the merchant marine are mostly foreigners of a low class collected from the seven seas, about 70 per cent of whom are aliens. On the other hand, the men of the Navy are clean, well-disciplined young Americans from good American homes. In conclusion it is confidently stated that the 6,000 men of the Navy now at sea performing armed guard duty have performed this duty to the entire satisfaction of the Navy Department and have arisen to every emergency, adding to the effectiveness of the merchant marine, undoubtedly saving many ships by their presence, judgment, skill, and quick action.

Admiral Palmer, after citing numerous instances of heroism and efficient discipline on the part of gun crews, many of them thrilling in the extreme, then referred to a report made by the president of the International Seamen's Union of America.

He (the president of the seamen's union) ascertained the nationality of those who were members of the union and then arrived at the nationality of the merchant sailors who had not joined the union. Those of American nationality were 12,219 out of a total of 42,407, or less than 30 per cent. In another part of the report he states:

The number of Spaniards found in the total is 1,369. It is, however, a matter of common knowledge that Spaniards and Spanish-speaking South Americans constituted more than 50 per cent of the total number of firemen on the Atlantic Ocean. They object to the language clause of the seaman's act, and are to a large extent organized under the I. W. W. Comparatively few of them can understand any English and they make no effort to learn.

* * * * * * *

Admiral PALMER (continuing statement made up from the combined reports of the armed guard officers). Merchant crews are shifted each trip. Many of the crew are untrained, not qualified, ignorant, degenerate, drunken, totally careless as to their own safety or that of the ship. Owing to the above reasons and the fact that they shift after each trip, it is impossible to bring them to any state of efficiency. A Navy crew would be permanent and would increase in efficiency with each trip, coal faster, load more quickly, and be handled more efficiently, given a permanent crew. Each additional knot in speed is not only a defense against the submarine, but a distinct gain for the allied armies, as it, with the cutting down of running time to port, operates to permit a greater number of round trips to be made and thereby increased the amount of tonnage carried to as appreciable an extent as though additional ships were added to the merchant marine. A fundamental military maxim is not to advance unless the train of supplies is assured. The Army can not under any circumstances place more men in France than it can be assured will be supplied. It is impossible to give any assurance under present conditions. A strike might occur at any time. Only with crews of the vessels under military control can it be guaranteed that the vessels will run properly. Military control may be Army, Navy, or some military organization established by the Shipping Board. Of the three, the Navy alone is equipped to handle the situation.

* * * * * * * *

Admiral PALMER. After conference between the Navy Department and the Shipping Board on November 30, 1917, Mr. Daniels, in a letter to Mr. Hurley, said in part [read letter already quoted].

Admiral Palmer stated that up to January 8 no reply had been received to this letter.

Mr. HICKS. Does it not seem from the fact that the Shipping Board has not replied to your letters, and also that they have made statements without consulting the Navy Department, that there is not very much cooperation between the department and the board?

Admiral PALMER. Well, I understand, as the chairman of the subcommittee mentioned here a little while ago, that Mr. Hurley is in favor of the Navy taking this work over, but the Shipping Board is evidently not a unit on that.

Mr. HICKS. May I ask you as to the radio men in the merchant service? On the merchant ships that are manned by naval gun crews, I understand at the present time that the wireless operators are not enlisted men. You contemplate, I understand, taking them over into the Navy or having the radio department at least under naval control?

Admiral PALMER. We contemplate having all the men that go through the war zone regular naval radio men. We were asked by Gen. Goethals, when he was in the Shipping Board, to arrange for a supply of radio men for all the new merchant shipping, and we started a school for that purpose. We now have about 3,000 men at this school at Harvard College, Massachusetts, training for this very work.

Mr. HICKS. How many months does it take to perfect a man in that service?

Admiral PALMER. They are enlisted or enrolled in the regular service or in the reserves in any district, and are then selected by the commandant on account of their special qualifications and are sent to the school at Harvard.

* * * * * * *

Admiral PALMER (continuing about Naval Reserves). I sent three officers from our bureau over in charge of armed guards, so that I would have first-hand information as to what was good and what was not good and what to do in order to increase the efficiency of the service. When they returned they made a few notes, and one of them says: "On sailing from New York the storekeeper, lamplighter, boatswain, and boatswain's mate were drunk. The forecastle crew of this particular ship (and I understand it is not different from any other; in fact, much better than some) being made up almost entirely of foreigners who could not even speak broken English. There was no one available to talk to them in their own language until the second day out from New York. I personally saw a great many of the crew under the influence of liquor, in fact, to such an extent as to be incapacitated for duty. No disciplinary action can be taken in these cases; the only recourse for the captain of this ship is to log these men for a day's pay while they are unfit for duty." Then he proceeds further on in his report: "On one occasion it was necessary to partly lower the lifeboats while in the war zone and hold "abandon ship" drill as required by law and also by the Bureau of War-Risk Insurance. It so happened that the vessel entered the war zone on Sunday, and, although the vessel was holding abandon ship drill for the safety of the passengers and crew, it was necessary to pay the crew while standing by this drill 40 cents per hour overtime. On several occasions while passing through the war zone it was necessary for me to go below, at the request of the corporal of the guard, in order to stop members of the engineer's force from smoking on exposed decks, this being against the law in the war zone. These people in every case were foreigners and could not understand a word of English, and in order for me to make them understand it was necessary for me to forcibly extinguish the cigarettes. All in all, they were the most illiterate and unkempt bunch of human beings it was ever my duty to deal with. The first hour of the watch the speed of the ship was reduced from one-half to a full knot per hour. This is very dangerous in the war zone, speed being the main factor of safety. The reason for this reduction of speed is explained as follows: If any members of the engineer force decide that they do not care to go on watch they can not be made to do so. The only recourse in this case is for the engineer officer to send a representative among other watches and obtain volunteers to stand the watch of these men. The pay of the men who do not go on watch is then checked, and the men who take their watches are paid from such funds as are checked against the former. As the watches always relieve at the meal hour, after volunteers have been secured they then go below and get their meal, and this usually takes them about an hour. As a result they get pay for a four-hour watch, while actually they stand a three-hour watch, the first hour of their watch being short of men.

To the best of my knowledge this happened with every watch on the particular ship in question from New York to Liverpool, and on the return trip. I saw as many as eight names reported to the captain of the ship in one watch for this reason, the engineer officer being required to inform the captain of the number of men absent from every watch

without leave, in order that their pay may be checked. On sailing from New York the vessel was short about 12 or 15 men of the complement, it being impossible to get men before sailing. The captain of the ship stated to me that this happened on every voyage, and in many cases he sailed with as many as 20 or 25 vacancies in the ship's complement. It is a known fact that speed is the greatest factor of safety to the merchant vessel passing through the war zone, and the impaired efficiency in the engine-room force results in reduced speed. The class of personnel in the forecastle that composed the deck force was most illiterate, and the majority of them foreigners, although a great many of them had affidavits, etc., to the effect that they were citizens of the United States. One man we called on the bridge and questioned stated that he secured his affidavit from a "Dutchman," who kept a boarding house, with whom he was living. This man spoke very poor English; in fact, it was very hard to understand him at all at times. Apparently he was a Greek. The second factor of safety in the war zone is efficient lookouts. These can not be had from the crew of a vessel, as was clearly demonstrated to me. On one occasion when it was necessary to remove the passengers from this vessel after she had struck a mine, the passengers were being lowered and removed to another vessel, one of the crew of a boat transferring the passengers on coming alongside the relief ship jumped out of the boat and went aboard the relief vessel, refusing to return to his ship in order to assist in bringing off the remaining passengers. This man was declared a deserter. However, the Seaman's Union took the case up with the steamship company, and the decision that the man was a deserter was overruled. The officers of this vessel stated that almost an entire new crew took the vessel to sea on every voyage, and that there never was an opportunity to instruct any of them properly before sailing, as they reported on board at the last minute before sailing, and then many of them under the influence of liquor, and some very drunk.

* * * * * * *

Admiral PALMER. Now, gentlemen of the committee, I have just a few more cases. These are specific instances of faulty conduct of personnel, United States and allied merchant vessels, illustrating the necessity for all tonnage trading through submarine areas being manned and operated by the Navy:

Steamship *Navajo*, August 1, 1917, 800 miles west of Ireland, shelled by submarine. Ship caught fire. Five minutes after alarm of fire crew abandoned ship. No effort made to put out flames. Boats lowered without stopping engines. Captain left ship. Third engineer took wheel and kept ship into wind. Later crew returned on board. Flames then beyond control, so captain alleged. Reabandoned her. She was afloat next morning.

Steamship *Wico*, August 6, 1917, near Isle of Gurnsey. Ship convoyed by British destroyer. Submarine sighted 500 yards distant. One shot fired immediately and submarine submerged. Captain, immediately on sighting submarine, gave orders to "abandon ship." Engines stopped as soon as alarm was sounded and deportment abandoned. Armed guard prevented ship being abandoned and at point of pistol drove the engineer force, including chief, below. Engines were started and ship resumed her voyage uninjured. Her escape undoubtedly due to presence of British destroyer. Merchant complement did everything possible to lose her. This captain did not zigzag, did not properly darken ship, did not maintain maximum speed when convoy left him; allowed unidentified vessel to close him.

Steamship *Campania*, August 6, 1917, after four-hour engagement captain stopped, turned broadside to submarine, and surrendered, abandoning vessel. He stated he was afraid there might be casualties. Submarine approached ship on surface within 500 yards before she was abandoned. Ship sunk by Germans going aboard and placing bombs in various places.

Steamship *Finland*, October 27, 1917. Torpedoed in convoy. Did not see torpedo or periscope. Did not see torpedo. Greatest confusion of merchant complement. Started to abandon ship immediately. Only loss of life caused by boat falling while lowering, spilling people into water. When manifest ship would float, people returned aboard and she made her way to port under own steam.

Steamship *Luckenbach*, October 11, 1917, in convoy. Sighted submarine 3 miles ahead of ship at 5.15 p. m. Thought it a buoy. At 5.55 sighted periscope distant 200 yards ahead. Captain avoided attack and proceeded at maximum speed. Got ahead of convoy; at dark slowed from 10 to 7 knots. Did not zigzag. Continued to show screened wake light. At 8 p. m. ship torpedoed. Submarine evidently trailed along, guided by screened wake light and assisted by slow speed without zigzag. Submarine appeared close 10 minutes after firing torpedo; could probably have been destroyed had the crew stuck to their station.

Admiral PALMER. In this statement of the president of the International Seamen's Union of America it is stated that approximately 3,300 Germans are in the merchant marine now, and I do not know how many men from the central powers.

Steamship *J. D. Archbald*, June 16, 1917, 4 p. m. Making passage from Brest to New York. Had been warned by radio that a certain locality was infested by submarines. Persisted in course through that area. Sighted submarine disguised as a fishing vessel, sail set, at 3.15 p. m., distant 7 miles. Closed it, though it was well known that submarines frequently adopted this disguise. Did not zigzag until 4.15 p. m., when submarine submerged. When ship was torpedoed crew abandoned her at once. Said they were afraid of another torpedo. This was a gross disregard of warnings and ordinary precautions.

British steamship *Idocmonus*, September 15, 1917, 3 p. m., torpedoed near land, all hands immediately abandoned ship. Ship floated. British patrol vessels arrived and towed ship where she could be beached. Otherwise would have been lost through hasty abandonment.

French steamship *Mississippi*, from Havre to New Orleans, not in convoy, but a convoy and escort in sight within distance. Torpedoed and submarine made off immediately, undoubtedly on account of convoy escort. Crew abandoned ship at once. Later a British patrol vessel happened by, put a crew aboard and brought her in. This is a typical case of hasty abandonment and only by luck was she saved.

Italian steamship *Edo*, attacked by gun fire middle of night and struck by a shell. Master and crew abandoned her at once. Next morning ship discovered by British patrol, totally abandoned. She was manned and brought into Queenstown. Crew was picked up later. Otherwise she would have been lost. If crew had stuck by ship there is not one chance in a million of that particular submarine capturing or destroying her.

Mr. HICKS. Admiral, the whole trend of your statement here shows, in fact proves, that naval men are more efficient than the ordinary merchant crews?

Admiral PALMER. Unquestionably. The outstanding fact apparent to anyone who goes thoroughly into the history of submarine sinkings is the great number of ships that have been literally thrown away by incompetent and ignorant management. Lloyd's investigations lead to the conclusion that of all ships mined or torpedoed and subsequently lost, 15 per cent could have been saved had proper use been made of the means existing on ships to keep them afloat. The percentage of vessels that never ought to have been captured or destroyed had they been manned by competent people who observed fundamental precautions must be much higher. In conclusion, I must give one more example, that while no harm resulted, most clearly illustrates present unsatisfactory conditions.

American mail steamer, first night out of Liverpool, about 10 p. m., British patrol signaled "You have bright light on port bow." Armed guard commander and chief officer investigated. They found a member of crew reading in his berth, port wide open, high-power incandescent light tied up squarely in open port. Man said he wanted to read and was entitled to fresh air, anyway. He had jeopardized lives of 800-odd people. Was not at all impressed with enormity of his crime. Only punishment he could be made to suffer was a fine of four days' pay. It is understood that even this was remitted by the shipping commissioner on arrival of vessel in an American port. The law must be strengthened to cover such cases.

Mr. COOPER of Wisconsin. I yield to the gentleman from Missouri [Mr. DYER].

Mr. DYER. Mr. Chairman, this bill carries an appropriation of some $8,000,000. During this session we have already passed the Indian appropriation bill, carrying about $12,000,000; the Post Office appropriation bill, carrying $332,000,000; and the Agricultural appropriation bill, carrying $27,000,000. These figures are in round numbers. The debate during to-day upon the Diplomatic and Consular appropriation bill, while most interesting and informing, has touched upon many other subjects besides the bill in question. This is so practically with all of the appropriation bills, so far as the general debate is concerned. This, to my mind, is an evidence that the Members of Congress generally do not and can not fully acquaint themselves with the necessities of the large amounts of money that they annually vote from the revenues of the United States. We have yet to consider some nine other appropriation bills, all of them carrying large amounts. In the last session of this Congress we appropriated about $21,000,000,000. It is quite evident that this session will appropriate an equally large amount. In view of these very large appropriations, covering a multitude of items, I feel that the present system of having so many committees dealing with appropriations is wrong, and that we ought to resort to the more up-to-date and scientific method now in use mostly in other countries, of having one committee on appropriations. To such a committee ought to be given the responsibility of making recommendations to the House for all needed money for the operation of the Government. To such a committee also ought to be sent all estimates. Such a committee should also be given authority to employ all needed assistance in the way of experts in finance and operations of government. Such a system, in my judgment, would result in saving vast sums of money that are now needlessly appropriated and uselessly expended. The budget system, Mr. Chairman, that I suggest is not a new one. It has been urged for many years. The present chairman of the Committee on Appropriations, the gentleman from Kentucky [Mr. SHERLEY], has been an urgent advocate of it. On February 28, 1913, he delivered an able address in this House in advocacy of it. The former chairman of the Appropriations Committee, the Hon. John J. Fitzgerald, of New York, was another one who favored a budget system. His address on June 24, 1913, in the House was a most convincing argument as to its need. Both of these addresses discussed the question from a constitutional, historical, and necessity standpoint. I commend the careful reading of both of these addresses to the Members of the House. Another distinguished former chairman of the Committee on Appropriations as well as former Speaker of this House, and present Member, the gentleman from Illinois [Mr. CANNON], is another strong supporter of this proposition. In fact, it is my judgment that all who have given careful study of the question agree that it is most important and necessary. The opposition that comes to it is from the committees that now have to do with appropriations. Let me suggest to the chairman of the Committee on Appropriations, the gentleman from Kentucky [Mr. SHERLEY], that he could hasten the actual consideration of this matter in the House by calling together the chairmen of all the committees that have to do with appropriations and see if they can not get together upon a resolution to provide that all appropriations shall originate in and be reported from a single committee. Other governments have been using the budget system for years and with success. It seems time for the United States to take similar action, and especially so during the war, when our appropriations are so large.

Mr. LITTLE. Will the gentleman yield?

Mr. DYER. I yield to the gentleman.

Mr. LITTLE. Does the gentleman think a budget system would be serviceable and practicable if there were not on the floor a responsible ministry to present the budget and answer questions in regard to it?

Mr. DYER. I take it that the members of the committee themselves would in that instance be able to answer the questions of Members. Of course, the gentleman is referring to the system in the English Parliament; but if we had the budget system here, and had a substantial committee charged with this great work, they would be able to give to the Members of the House information gathered from the best experts in finance, as well as a careful study of the subject and of the estimates which would have to be submitted to them and concerning which they could make diligent inquiry before reporting the bills. Mr. Chairman, this matter has been given consideration by the people of this country as well as by Members of Congress. It is my judgment that the people generally want a budget system adopted, which is well proven by many indorsements which I have here and which I include in my remarks:

SHALL WE CONSERVE REVENUE?

[From The West at Work. Paul W. Brown. St. Louis, June 21, 1917.]

The Government is very properly conserving man power, food, ships, iron, and steel. Why not conserve revenue as well? The need of the hour is for a national budget system. Every successful private business cuts its coat according to its cloth and proportions its expenditures to each other in full view of both its means and its needs. For 20 years our Government has had no machinery to do this. Now is the time to supply it. It is easier than food conservation and just as needful.

WANTED—A NATIONAL BUDGET.

[From The West at Work. Paul W. Brown. St. Louis, June 21, 1917.]

Shall the American people, at a time when they are introducing new order and new system into the distribution of grain, meat, iron, and steel fail to follow the same common-sense procedure with respect to the distribution of Government revenue? * * *

For many years we have had every ordinary reason which consideration of economy and good sense could urge for adopting a budget system. To these the war has added two extraordinary reasons of the first importance—one touching us as individuals, the other as citizens of the Nation. * * *

The demand for a budget system is much more than the demand of the taxpayer that he be not taxed unnecessarily in a time of special difficulty in the carrying on of business; it is the demand of the patriotic business man that every dollar thrown into the war chest be made to yield its utmost to add to the offensive power of the armies of democracy. * * *

The business men of America should enlist the support of every public-spirited citizen in a demand that a budget system be immediately put in operation in the Federal Government, so that expenditures may be intelligently and economically made in this time of extraordinary demands on the resources of Government, and our economic power be used with maximum effectiveness in a world war for democracy.

WOULD INCREASE PUBLIC CONFIDENCE.

[By J. Lionberger Davis, president St. Louis Chamber of Commerce.]

The magnitude of the tasks which confront our Government makes it important to systematize its expenditures of money. A budget system, if adopted, will not only conserve the financial resources of the Government, but will have a tendency to increase the confidence of the people, who will feel that every dollar raised by taxes will purchase a dollar's worth of service to the Nation.

THE NEED FOR A BUDGET.

[By Charles Nagel, former Secretary of Commerce and Labor.]

* * * The time is most appropriate for the painstaking study of a budget system. More than that, such consideration has become imperative. If our political system is not adapted to such a scheme, then that system will have to yield, as it is being made to yield at every other point. The Executive is being charged with powers and obligations that are very foreign to Democratic conception. Combinations of industries which our courts denounced six months ago our Executive now invites, both acting in the name of public interest. In times of such tremendous peaceful revolution it can not be possible that mere inadaptibility of political machinery will stand in the way of the employment of a system which every housewife is admonished to respect. The problem is to make ends meet—as simple as that; and hard as may be the lesson, perhaps no greater benefit has ever come to us than this awakening to the responsibilities of our task.

ESSENTIAL TO JUDICIOUS EXPENDITURES.

[By B. F. Bush, president Missouri Pacific Railroad Co.]

I believe it is essential to judicious expenditure, prudential economy, and wise taxation that a budget system should be inaugurated by the Government. The experience for many years back of the business world unerringly points to the wisdom of the Government adopting the budget system, whereby its anticipated requirements and expenditures for a given period are properly classified and conditioned commensurate with the income to be derived from a conservative taxation.

It is highly important that a wise economy should govern at all times in Government affairs but more particularly so under the conditions which now obtain, when enormous disbursements are being made. * * *.

All large and important business enterprises, as well as other Governments, have established the budget system and find it a safe and reliable guide under which to conduct their operations, and with this record before us I fail to see any good reason why business principles of tried and known worth, such as underlie this system, should not be adopted and applied by our Federal Government in its important operations with regard to expenditures and collection of revenue. * * *.

NEVER NEEDED AS SORELY AS NOW.

[By John F. Shepley, president St. Louis Union Trust Co.]

* * * I consider this an opportune time for the adoption by the Federal Government of the budget system; I have no hesitation in saying that I do. * * * Our Government is making and contemplating the expenditure of sums of enormous size for purposes extraordinarily diverse and has never needed as sorely as now the aid of this system, without which the economical and judicious use of these funds is practically impossible. It is curious that a people so progressive and enlightened as our own should suffer its affairs to be administered in so haphazard and unscientific a manner.

HAPHAZARD METHODS INTOLERABLE.

[By J. F. Downing, president New England National Bank, Kansas City.]

I think it is high time that the people of the United States were demanding a budget system for the business of our Government. The haphazard methods now employed in making appropriations would not be tolerated in any well-organized business house in the United States. * * *.

This plan will never be adopted unless the people demand it insistently, and I am sure every business man in the country feels that the time has arrived when there should be economy in the expenditures of the Government and business methods employed the same as for individuals and corporations.

TIME FOR ACTION.

[By Philip B. Fouke, president Funston Bros. & Co.]

With respect to the question of a national budget the time for discussion is past—the time for action has arrived. Under the pressure of war the business of the Government is being enormously expanded. While we were at peace to do without a budget was merely disgracefully wasteful. Now, when every dollar should be made to do its utmost toward the winning of the war, our carelessness becomes peril and our wastefulness a crime.

THE PRIVILEGE OF SPECIAL APPROPRIATION.

[By Jackson Johnson, chairman International Shoe Co.]

* * * In order to provide means for the payment of the enormous liability incurred by the Government for war purposes the necessity of economy in expenditures for other purposes becomes vital and makes it imperative that the Government's expenditures be handled under a budget system. Otherwise burdens of taxation will be imposed which will seriously impair business progress and development.

The disinclination of our national lawmakers to surrender their present unrestricted privilege of special appropriations for their States and districts is the only reason which will stand in the way of this so very necessary reform in our Government's system of expending its income.

HARD TO REDUCE EXCESSIVE TAXATION.

[By W. G. Lackey, vice president Mississippi Valley Trust Co.]

It has long been a matter of amazement to business men that the greatest and wealthiest business institution of the world, the United States Government, should administer its finances without a definite and prearranged budget.

* * * The time was never more opportune, I think, than now to emphasize the need of greatest scrutiny of Government expenditures, and to this end the establishment of the budget system. * * *

If we are not thoroughly systematic in handling these expenditures, the prospects of our tax burden being materially lightened after the war are not encouraging.

WHEN EVERY CITIZEN ECONOMIZES.

[By Luther Ely Smith, attorney.]

A national budget system should be established without delay. Every citizen in the land is economizing and conserving and practicing rigid self-denial to furnish the Nation with the sinews of war. Should not the Nation adopt every device possible to conserve the sinews thus furnished? Immediate installation of the most approved methods of budget making adapted to our national needs should be insisted upon earnestly and emphatically by every organ of public opinion and every citizen, to the end that all opposition and indifference may be completely dispelled. * * *

SHOULD COMMAND GENERAL SUPPORT.

[By Frederick N. Judson, attorney.]

I certainly agree that there is an urgent need for the adoption of a budget system in the administration of the financial affairs of the Federal Government. * * * The need is urgent, especially now that the Federal Government is going into such enormous expenditures and is searching out ways and means for a tremendous expansion of the Federal power of taxation.

Now is the time when such a measure should receive the support of all who are interested in the wise conduct of our governmental affairs.

DUPLICATION CREATES JOBS.

[By Sam D. Capen, former president St. Louis Business Men's League.]

The measure introduced by Senator KENYON, of Iowa, providing for a national budget should be unanimously supported. Every business man would support the measure actively if it were not for the fact that the average business man works as an individual, is not nationally organized, and the politicians know this. * * *

When we, as citizens of the United States, begin to realize—and heavy taxation will bring it close home—that we must plan our expenditures according to our income, then we will interest ourselves in forcing the politician to coordinate the work that is done by the Government in several departments in one department, and the budget system will then have a beginning.

SPECIALLY NECESSARY.

[By George W. Simmons, vice president Simmons Hardware Co.]

I am very heartily in favor of a budget system for the United States Government, and the present emergency emphasizes its need at this time to a greater extent than ever before in our history. There is so much more money now going into the hands of the Government than ever before that the average man has less of an idea than under normal conditions of how much it is going to spend. He is entitled to know in general terms how much is to be spent.

THE MINIMUM OF INEFFICIENCY.

[By C. E. Schaff, receiver, M., K. & T. Ry.]

Aside from the business considerations which have always suggested a budget system for the Federal Government, special conditions urge the adoption of such a system now that we are engaged in a war which

imposes heavy burdens. Government expenditures are certain to be tremendous during the war, and the load of taxation will be correspondingly heavy. The public is prepared to bear whatever burdens national necessities impose, but there is a special reason now that every department of Government be so organized as to discharge its functions with a minimum waste and inefficiency. A heavy burden of taxation speedily becomes irksome if public funds are not expended with practical economy. It therefore seems to me that the time is opportune for the establishment of a Federal budget system.

THE MOST EXTRAVAGANT GOVERNMENT.

[By S. E. Ragland, president, Central State National Bank, Memphis, Tenn.]

* * * This Government is in no way responsible for the holocaust that is bleeding Europe white, but since it has been forced to take a hand it has pledged its entire resources to an enterprise, the proportions of which are staggering to contemplate. The ultimate end of this enterprise is a democracy in which men, women, and little children may be free in the pursuit of happiness, but let no man deceive himself about the burdens of taxation that he will have to shoulder in the future. It, therefore, is imperative that every citizen demand that his Representative in Congress immediately start the machinery for retrenchment in the expenses of the Government. Congress should at once provide for a Government budget.

We are ready and willing to be taxed to attain our great aims, but there must from now on be no lost motion in the application of these funds. Let us immediately adopt the budget system.

[From Yale Review. The task before the country, by MEDILL MCCORMICK. July, 1917.]

The present structure of government—whether of the Nation, the States, or their subdivisions—was not built for such responsibilities, nor can the country bear the cost of the new activities, unless its Government be so reorganized as to secure a greater return to the public in proportion to the cost of public administration. During the decade preceding our entrance into the war the cost of the National Government had doubled, while the cost of government in the great industrial States had increased threefold. The ratio of taxation to the national income was so small and direct taxes formed so small a part of the sum of taxation that there was very little interest in public finance or in the efficiency of public administration. Bureaus multiplied at Washington and commissions at the State capitals. There have been no budgets, no careful and scientific methods of estimate and appropriation. With the growth of direct taxation there has come a sudden and inevitable interest in both. * * * The National Government must follow this road, and quickly; they must adopt necessary accounting and fiscal reforms, no less than a rational coordination of public administration. * * * At Washington there is no budget, no coordinated method of appropriation, no modern and uniform system of accounting, no homogeneous division of departmental responsibilities. * * *

[From the New Republic, July 14, 1917.]

* * * The inability of the House to preserve intact its power as sole originator of financial legislation is not, to be sure, a product of the war. It is an inability which has been in existence for some time, but which has for the most part been screened by parliamentary procedure. Where the House has not initiated a financial measure it has at least derived a modest satisfaction in giving to it a mock legality. * * *

* * * With the revision now made in the revenue bill, there is not an important piece of financial war legislation which has not to a great degree been initiated in the Senate.

This development, given such impetus in the three first months of the war, has not been disadvantageous in the matter of securing funds for an American offensive, but it has revealed unmistakably that present practices completely disappoint the expectation of checks and balances which the designers of the Constitution had in mind. In the Federalist, No. 58, Madison declared: "The House of Representatives can not only refuse but they alone can propose the supplies requisite for the support of the Government. They, in a word, hold the purse." Such a theory is no longer tenable. The House of Representatives does not hold the purse; it has fallen between the House, the Senate, and the administrative leaders, whose influence is wielded from the outside, until it is no longer held by anyone. At best, the lodging in the House of powers to initiate financial measures is an only partly responsible device, less accurate and less adjustable than a budget system. Opponents of such a system have heretofore demanded further proof of the need of resorting to an innovation, and that proof the war is rapidly furnishing them.—Charles Merz.

ECONOMY AND A NATIONAL BUDGET.

[From the Republican platform, 1916.]

The increasing cost of the National Government and the need for the greatest economy of its resources, in order to meet the growing demands of the people for Government service, call for the severest condemnation of the wasteful appropriations of this Democratic administration, of its shameless raids on the Treasury, and of its opposition to and rejection of President Taft's oft-repeated proposals and earnest efforts to secure economy and efficiency through the establishment of a simple, businesslike budget system, to which we pledge our support, and which we hold to be necessary to effect a needed reform in the administration of national finances.

ECONOMY AND THE BUDGET.

[From the Democratic platform, 1916.]

We demand careful economy in all expenditures for the support of the Government, and to that end favor a return by the House of Representatives to its former practice of initiating and preparing all appropriation bills through a single committee chosen from its membership, in order that responsibility may be centered, expenditure standardized and made uniform, and waste and duplication in the public service as much as possible avoided. We favor this as a practicable first step toward a budget system.

WOODROW WILSON.

[From a letter to Senator TILLMAN, Jan. 30, 1913, in CONGRESSIONAL RECORD, 63d Cong., 1st sess., Mar. 17, 1913.]

Ever since I was a boy I have been deeply interested in our methods of financial legislation. Ever since then I have insisted upon the absolute necessity of a carefully considered and wisely planned budget, and one of the objects I shall have most in mind when I get to Washington will be conferences with my legislative colleagues there with a view to bringing some budget system into existence. This business of building up the expenses of the Nation piece by piece will certainly lead us to error and perhaps embarrassment.

I was very much pleased by your reelection and shall look forward to the greatest interest to being associated with you in counsel.

Again thanking you for your splendid letter,

Cordially, yours,

WOODROW WILSON.

CHARLES E. HUGHES'S ACCEPTANCE SPEECH.

[From Republican Campaign Textbook, 1916.]

* * * It is time that we had fiscal reform. We demand a simple, businesslike budget. I believe it is only through a responsible budget, proposed by the Executive, that we shall avoid financial waste and secure proper administrative efficiency and a well-balanced consideration of new administrative proposals. * * *

WILLIAM HOWARD TAFT—THE BUDGET.

[From message to Congress, Jan. 17, 1912.]

The United States is the only great Nation whose Government is operated without a budget. This fact seems to be more striking when it is considered that budgets and budget procedures are the outgrowth of democratic doctrines and have had an important part in the development of modern constitutional rights. The American Commonwealth has suffered much from irresponsibility on the part of its governing agencies. The constitutional purpose of a budget is to make government responsive to public opinion and responsible for its acts.

THE BUDGET AS AN ANNUAL PROGRAM.

A budget should be the means for getting before the legislative branch, before the press, and before the people a definite annual program of business to be financed; it should be in the nature of a prospectus both of revenues and expenditures; it should comprehend every relation of the government to the people, whether with reference to the raising of revenues or the rendering of service.

In many foreign countries the annual budget program is discussed with special reference to the revenue to be raised, the thought being that the raising of revenue bears more direct relation to welfare than does government expenditure. Around questions of source of revenue political parties have been organized, and on such questions voters in the United States have taken sides since the first revenue law was proposed.

WILLIAM G. M'ADOO.

[From the Outlook, Mar. 7, 1917.]

Writing to The Outlook concerning the importance of a national budget Mr. McAdoo, Secretary of the Treasury, says:

"I am distinctly of the opinion that it would be well for Congress to consider the establishment of a budgetary or other fiscal plan for the purpose of more scientific treatment of the problem of Government expenditure in relation to Government income, and in this connection permit me to say that I recently submitted to the chairman of the House Committee on Ways and Means, for the consideration of that committee, a suggestion of the appointment of a joint committee of the two Houses of Congress with direction to cooperate with the Secretary of the Treasury in studying and evolving such a plan for the consideration of Congress."

ASSISTANT SECRETARY OF THE TREASURY.

[From the Nation's Business, Oct. 15, 1915.]

WASHINGTON, D. C.

EDITOR OF THE NATION'S BUSINESS: The financial methods of the Federal Government must be reorganized. The present manner of making appropriations can never be made a part of an efficient system for handling the finances of our Government. One of the greatest weaknesses of democracy is lack of responsibility and tendency to extravagant and ill-advised expenditures. We now are seeking greater efficiency in all our daily problems, and the Government needs particularly to have a body whose responsibility it shall be to consider the sources of revenue and estimate them for a result, and then itself to set a limit on the appropriations which shall be available from the estimated income to be received. The ever-increasing expenditures of the Government make most urgent demand for a budget committee.

ANDREW J. PETERS.

PRESIDENT HADLEY, OF YALE.

[From the World's Work, December, 1915, p. 198.]

"We are the only civilized Nation of importance," he says, "that attempts to carry on its public business without a budget. The result is waste, lack of coordination of expenditures, and opportunity for pushing unimportant or transient things into the foreground to the exclusion of more important or more permanent ones."

DR. NICHOLAS MURRAY BUTLER, PRESIDENT OF COLUMBIA UNIVERSITY, AN ADVOCATE OF SCIENTIFIC BUDGET MAKING.

[From the World's Work, December, 1915, p. 198.]

Congress at present "dissolves itself into nine little legislatures," each of which has almost autocratic control over expenditures and independently "appropriates money with no reference to the ability of the Government to spend."

A. L. LOWELL, PRESIDENT OF HARVARD UNIVERSITY.

[From the New York Constitutional Convention, 1915.]

Dr. LOWELL. My feeling is simply this, that the budget is a public matter. It is not a collection of private matters. It is a public matter; therefore it would be wiser to have it originate by public officials and not by a lot of people who represent private and local interests. That is really the argument I wish to make upon it, that what the public wants is somebody who represents the public. As a friend of mine said once, and I think there is some truth in it, and I think it explains a great deal of the movements in our Government, that the characteristic defect of democracy is that there is nobody whose business it is to represent the public, and to some extent that is true. That is, people represent fractions of the public. The reason for having our budget originate in our State with the governor is that he is the one

official who represents the whole public, whereas the members of the house are, in each instance, representing small sections of the public; therefore, as a body, their combined good sense is very well, but if you give each of them a chance to originate the budget you are putting that in the hands of a lot of people who represent individual interests and not the public interests. I believe myself that the reason that the power of the Government and the President, etc., has increased so much in the last 50 years is because they come nearer representing the public than a representative assembly does. If you can get the representative assembly to work as a whole, or representing all the public, on questions affecting the whole country, that would be admirable, but when you get them looking at points which affect fractions of the public they cease to represent the public and they only represent a lot of scattered interests.

Mr. CULLINAN. Our legislature and our Congress impose the tax.

Dr. LOWELL. Yes.

Mr. CULLINAN. Ought they not to say something, or have something to say, about how the tax should be appropriated in the different phases of governmental activities?

Dr. LOWELL. Perfectly so, and they do. That is, if your Government proposes an appropriation which they do not like they ought to have the right to reject it. In other words, there is no doubt they ought to have the right to refuse to vote any tax which they do not believe to be right or do not favor, but that is a very different thing from giving individual members the right to propose an expenditure which a man may think in the interests of the whole public when, in fact, it is not.

Mr. CULLINAN. You would eliminate the log-rolling feature?

Dr. LOWELL. Yes, sir; I would eliminate the log-rolling features. As it is now, we have said that each individual member shall have the right to initiate, but the governor may veto. I think the governor should initiate and the legislature should veto, so far as appropriations are concerned.

FRANK J. GOODNOW, PRESIDENT OF JOHNS HOPKINS UNIVERSITY.

[From New York State Constitutional Convention, 1915.]

* * * Each head of department wants to extend his department, and naturally is apt to overestimate the importance of that particular branch of their work, and his check, through an efficient and effective administrative supervision, has been of value in keeping the estimates down, and also in keeping them within the revenue which is available.

There is another reason why it seems to me that there ought to be a provision for an administrative supervision of the estimates, and that is to prevent a thing that a popular government seems to be liable to, wherever you find it, and particularly where, as is usually the case, the representatives in the legislature represent local districts. That is, there is an irresistible tendency, which is to my mind one of the most dangerous tendencies of popular government, toward useless expenditures in localities for the purpose of influencing locally the influence and standing of the representatives in the legislature. There is not any use enlarging upon it. Any of you men who have been members of the legislature know what pressure is brought to bear, and how difficult it is to resist; but if you are looking at the general question of popular government, as you are, and you must in the constitutional convention, from the point of view of necessity, if popular government is to continue, as it has, as to the guarding against the evils which are apparently inevitable, it seems to me that it is necessary to provide some offset to this tendency, and that can be secured, it seems to me, only by having the estimates determined upon before they are submitted to the legislature by somebody who is representative not of this locality or of that locality but who is representative of the State as a whole. And therefore it seems to be an absolute necessity, if we are to keep down the expenditures of the State government, which are increasing at such a tremendous rapid rate, we must provide, in the first place, to check the tendency of administrative bodies toward magnifying their importance, and, secondly, to check the tendency of localities to demand the expenditure of State money for local purposes, and purposes which are not consistent with the interests of the general State as a whole.

JOHN J. FITZGERALD, CHAIRMAN HOUSE COMMITTEE ON APPROPRIATIONS.

[From New York State Constitutional Convention, 1915.]

Our great trouble is this: That as long as times are good and money is easy and revenues are plentiful nobody cares particularly what the legislative body does in expending money, but as soon as the expenditures increase so that taxation becomes burdensome there is a general controversy as to who is at fault and who should be held responsible for the condition that embarrasses the public by levy of taxes.

We ought to have some way in the system of our Government to fix direct responsibility, and you can not fix responsibility if the power is too greatly scattered. We must concentrate the power and concentrate the responsibility. We must have some one to whom the people can go. If you have it too diffuse, while the agitation may be great, you never reach anybody.

The CHAIRMAN. And where do you suggest that concentration be put in the way of initiating these estimates?

Mr. FITZGERALD. I would put it in the executive. I would make him responsible at the outset.

* * * * * * *

If the House of Representatives and the Senate had been operating under a provision that they could not have included, except by a two-thirds vote, an item that had not been requested by the Executive, there would have been a very great difference. Mr. Gladstone, in one of his great budget speeches, laid down the principle to which I referred in this speech. He said that the proper functions of a legislative chamber—here, I will find it—"is not to augment but to decrease expenditures." Of course, he was speaking largely, with the view largely in mind of their peculiar system of government.

The CHAIRMAN. That is what it means to hold the purse strings, generally, to shut them, and not to open them.

Mr. FITZGERALD. Some persons object that we should not deprive the Representatives of the people of this right to loosen up the purse strings, but the universal condition in this country to-day is not that we must safeguard the rights of the people to get money for things. The whole curse of our condition is that everybody is doing their utmost to get it, and succeeds, and the evil that must be corrected—the evil that must be corrected is the evil of excessive expenditure.

* * * * * * *

Now, if there were some way by which that could be stopped—and it is difficult to stop it; I don't think I am immune from any of these vices or evils; I am just as human as anybody else in Congress, and I don't particularly criticize the man who does resort to these things—but we must in some way eliminate the temptation of the possibility of this kind of action; and when a man is unable to do things of that character, along that line, when he can not force up appropriations, why, then his only interest is in seeing that they appropriate properly, and it does this: It would do what is done in the governments where they had a responsible government with the budget system. If my constituents are keenly interested in some matter that requires an expenditure of public money, I would be compelled to present that matter to the department that had charge of it. They would make their investigation. And they would determine whether it was one of those things that should be included, and they would have to take the responsibility for requesting it.

They could not say John Smith forces that on us. And then the total of these submissions would be contrasted, and the administration should be compelled, to save time, to make definite and concrete recommendations as to how the money should be obtained to meet these drafts on the Treasury.

* * * * * * * *

Mr. PARSONS. As far as the Federal Government is concerned, would you have the budget made up by the Executive in connection with the river and harbor improvements and public buildings, and so on, all those things?

Mr. FITZGERALD. Well, I would very radically change our method of public buildings. We don't provide public buildings for the public service. [Laughter.]

In the great mass of cases we provide them to meet certain political exigencies of a locality. You might as well be perfectly frank about this. Congress has authorized public buildings that can not be completed within six years. Some can not be completed within four or five years after they are authorized, unless we very greatly augment the capacity of the Supervising Architect's office to turn out public buildings. Now, we spend about $20,000,000 a year for public buildings. The Supervising Architect's office is geared to turn out about $12,000,000 a year, it claims. Up to about 1900 we had authorized from the beginning of the Government about four hundred and some odd public buildings, I think. Since that time we have authorized about five hundred.

The CHAIRMAN. I saw a statement that in 1909 Congress appropriated $20,000,000 for post offices which the Postmaster General had not recommended.

Mr. FITZGERALD. Well, of course, he never recommends post offices at all.

The CHAIRMAN. Well, which he stated were unnecessary.

Mr. FITZGERALD. But I say the Postmaster General does not recommend. But I don't think there is any serious question; they have been doing that ever since I have had any knowledge of it. This is what happens on public buildings in the Federal Government: Suppose I suppress a community or district which has no large city; perhaps the largest town in it may be twenty or fifteen thousand. I may have one or two communications like that. And none of them has a public building, but across the line in some other district the town of equal size has a public building that costs $50,000 or $75,000. Now, I am a candidate for office, and I go to that town, and in my speech I announce that I propose to have a public building put there. In most of these places, unless you have a good-size city, a thousand dollars furnishes ample for postal facilities, and then they have an authorization to buy a site. And they pay New York prices out in the sagebrush country for lots, and the Government buys post offices. And then, in a community of eight or nine hundred, based upon the theory that there is a tremendous postal business, they will authorize a building of $50,000—nothing less than $50,000 and up. Then, in order to get a better building, a Member of Congress will pass a bill providing that there shall be a term of court held in this town, and maybe the court—the Federal court—will sit there three terms a year, and maybe it will take two days each term to do all the Federal court business in the town; and then, because a Federal court is to sit in that town, they need a court room and additional facilities, and they increase the amount to be expended in the building, and some other governmental activity will be provided, and the result is that you can go all over the United States and find buildings costing from $75,000 to $150,000 in communities ranging from 1,000 to 5,000 people.

JOHN J. FITZGERALD.

[From CONGRESSIONAL RECORD, 63d Cong., 1st sess., June 24, 1913.]

If the principle enunciated by Mr. Gladstone be accepted as sound, that the constitutional duty of a legislative chamber is not to augment but to decrease expenditure, the solution of all problems confronting us may readily be solved. A few simple changes in our system will completely establish the system of responsible executive control of our budget while retaining complete control of the Treasury in the representatives of the people.

To bring about this result two things are necessary: The duty should be imposed upon the Secretary of the Treasury to revise the various estimates to be submitted to Congress, and Congress should be deprived of the power to augment any request for money or to originate legislation imposing obligations upon the Treasury. Such is the rule in Great Britain, as well as in Switzerland, where this system has been developed to its highest perfection.

These suggestions are radical, but not shots at random. When the Democratic members of the Committee on Rules had been selected for the Sixty-second Congress, I proposed a rule prohibiting amendments to appropriation bills which would increase the committee recommendations above the departmental estimates or which proposed appropriations for which no estimates had been submitted. It was a suggestion along lines that reform in the House must eventually follow; but it was not adopted, as the committee was unwilling to recommend a rule that would have deprived the individual Member or the Committee of the Whole House on the state of the Union of rights enjoyed by committees which prepare appropriation bills. I should have supported such a rule if it extended to the committees, and I am convinced that in time even more radical changes will be imperative, even though the individual Member be deprived of many privileges which he now enjoys.

[From "Constitutional Aspects of a National Budget System," by Charles Wallace Collins, in the Yale Law Journal, March, 1916.]

The provisions of the Constitution of the United States relating to public finance are as follows:

"All bills for raising revenue shall originate in the House of Representatives; but the Senate may propose or concur with amendments as on other bills. (Art. I, sec. 7.)

"The Congress shall have power to lay and collect taxes, duties, imposts, and excises; to pay the debts and provide for the common defense and general welfare of the United States * * *; to borrow money on the credit of the United States; to raise and support armies, but no appropriation to that use shall be for a longer term than two years; to provide and maintain a Navy. (Art. I, sec. 8.)

"No money shall be drawn from the Treasury, but in consequence of appropriations made by law and a regular statement and account of the receipts and expenditures of all public money shall be published from time to time. (Art I, sec. 9.)

"The Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several States, and without regard to any census or enumeration. (Art. XVI.)"

As bearing indirectly on the subject of public finance the following provisions may also be cited:

"The Congress shall have power 'to make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all the powers vested by this Constitution in the Government of the United States or any department or officer thereof.' (Art. I, sec. 8.)

"Each House may determine the rules of its proceedings. (Art. I, sec. 5.)

"The President 'shall from time to time give to the Congress information of the state of the Union, and recommend to their consideration such measures as he shall judge necessary and expedient; * * * he shall take care that the laws be faithfully executed.' (Art. II, sec. 3.)"

—

NEW YORK CHAMPER OF COMMERCE ON NEED FOR CONTROL OF GOVERNMENT EXPENDITURES.

[From the Commercial and Financial Chronicle, Feb. 3, 1917.]

"The following resolution, reiterating the conviction of the New York Chamber of Commerce 'that there is need of a sound economic control of public expenditures based on an authoritative examination in advance of the actual needs of each department of the Government,' was adopted at Thursday's meeting of the chamber:

"* * * In February, 1916, this chamber unanimously adopted the report of the Committee on Finance and Currency in favor of a budge policy in public financing, whereby proposed expenditures should be subordinated to the limitations of previously determined sources of income.

"* * * Therefore, be it

"*Resolved*, That the Chamber of Commerce of the State of New York reiterates its conviction that there is need of a sound economic control of public expenditures with due regard to established sources of revenue, including a uniform system of public expenditure based on an authoritative examination in advance of the actual needs of each department of the Government.

"*Resolved*, That copies of this preamble and resolution be forwarded to the Federal officials and to members of congressional committees immediately concerned."

FRANK A. VANDERLIP (*Chairman*),
WILLIAM SLOANE,
JAMES S. ALEXANDER,
For the Committee on Finance and Currency.

—

A BUDGET SYSTEM.

[From the Outlook, Mar. 7, 1917.]

The need of a national budget system was never more clearly demonstrated than in the final days of the Sixty-fourth Congress. At this writing, only a few days before the session of Congress expires by legal limitation, there are several enormous and highly important appropriation bills waiting to be passed. If they are not passed there will probably have to be an extra session of Congress in order to obtain the necessary money to run the Government during the ensuing fiscal year. It is now the 28th of February and Congress must adjourn on March 4, and yet no man knows just what appropriation bills Congress will pass, if any.

* * * The only way in which Government finances can be managed in a businesslike way is by the establishment of a budget system.

* * * That this is not a visionary idea is proved by the fact that not long ago the United States Chamber of Commerce held a referendum on the question of its plan for a national budget. One hundred and fifty-two boards of trade, chambers of commerce, and similar organizations of business men in 34 States took part in the referendum. There were 573 votes in favor of and only 10 votes opposed to the budget plan. We are not here discussing the details but only the general principle of a national budget. The executive and legislative method of putting it in operation should be determined by experts, following the analogy of the Federal reserve law.

—

A NATIONAL BUDGET.

[From the Outlook, Mar. 14, 1917.]

It was only a few years ago when the Sixty-second Congress appropriated for the annual expenditures of the Government over a billion dollars. The country was so astounded that the Congress was called in the newspapers "the billion-dollar Congress." We have now passed in our national expenditures the two-billion-dollar mark. Few citizens understand how this enormous growth in our expenditures and the enforced income from taxation has come about. We imagine that few Members of Congress quite understand. This is the main reason why there should be introduced into our Federal Government a budget system. * * *

—

A LEGISLATIVE BUDGET.

[From the Commercial and Financial Chronicle, Mar. 3, 1917.]

* * * A financial budget has often been proposed, and if we shall ever be able to introduce modern business "system" into the processes of government this will work a vast advantage and economy in public affairs.

* * * Well, "Congress is to blame," we often say. And it is true that it could practice more, and vastly more, economy than it does. But the blame rests also on the people, and heavily, too, who make and are the Government, that system, irrespective of parties and Congresses, is not introduced into public affairs. It may be, it is, a tremendous task, but unless it is accomplished the time will not be long in coming when the "poor o'erburdened wight" will rebel. No free people can make bricks without straw, and no people can remain free who allow their own Government to oppress them. Labor alone pays the cost of Government. And for all its wealth of resources, a profligate nation will at some stage become bankrupt. If a spendthrift is one who buys anything and everything that comes in sight, a thrifty man is one who measures his need by what he can earn and what he can save.

The most significant fact of to-day in relation to government is that we have reached the limit of fair and just taxation without ever relating national need to national income.

—

NEED OF A NATIONAL BUDGET.

[From Journal of Commerce, Feb. 8, 1916.]

Nothing could more forcibly emphasize the need of a national budget system in this country than the condition brought about by the war in Europe. It puts in a striking light the contrast between the Government of the United States in this respect and that of other civilized nations.

* * * * * * *

This Nation has grown from its small beginning as a union of States on a margin of the continent, with a few million inhabitants and little wealth or power, to the imperial domain from ocean to ocean and a hundred million people, without any system of responsibility for estimating the financial needs of government and proposing measures for meeting them. Every other nation of any standing has a system which requires those responsible for the administration of different branches of the Government to submit to the legislating body intelligent and intelligible statements of their needs for revenue and the purposes to which it is to be applied. They must present their estimates and their proposals for raising the revenue to meet them. Appropriation bills and revenue bills must be based upon these estimates and proposals and submitted for action by those responsible for administration, to be considered, modified under fixed rules and duly adjusted and adopted. Individual Members and groups can not bring in a flood of appropriation bills, have them referred to different committees, and logroll them through the processes of legislation by bargains and compromises, exchanging favors, and virtually trading in votes. This American practice, which ought to be particularly un-American, has insidiously grown to monstrous proportions, and it is time it were seized by the throat and strangled.

—

[From "A national budget and why we need it," in the Nation's Business, Oct. 15, 1915.]

The demand for a systematic accounting of our national revenues and expenditures has grown rapidly. The national chamber has consistently stood for the principle of the budget. Its first referendum (sent out on Nov. 30, 1912), was approved almost unanimously by its members. Since that time the chamber has consistently and upon all appropriate occasions advocated the adoption of a national budget. From time to time the Nation's Business has published articles on the subject, together with opinions by eminent public men in favor of it. As we pointed out in these pages last month, President Wilson has already stated to a committee of the national chamber, who conferred with him late in May on the subject, that he expects the matter will be thoroughly discussed at the opening session of Congress.

—

WHY THE UNITED STATES HAS NOT A BUDGET.

[From the Nation's Business, Oct. 15, 1915.]

A scientific summary of expenditures and revenues, in short, a national budget, has been heretofore difficult, if not practically impossible, in the United States, because, in the first place, the President, as executive head of the Nation's business, has not been directly responsible to the Nation itself for the efficiency of the departments under him; second, because heads of departments and establishments report estimates direct to Congress through the Secretary of the Treasury, which are thereupon assigned to nine different committees; third, because appropriation bills are not considered at related to each other or to the entire amount of anticipated public income; fourth, because minor officials in departments can approach committees direct for special favors for bureaus or for special legislation in an appropriation bill.

—

INCREASING EXPENDITURES MAKE AN EFFECTIVE BUDGET PROCEDURE A POLITICAL AND ECONOMICAL NECESSITY.

[From "Budget making and the increased cost of government," in the American Economic Review, March, 1916.]

The political necessity for the adoption of a budget procedure lies in the fact that it is the only effective means which has ever been devised for enforcing accountability and responsibility on an executive who has sufficient power to make him a leader, i. e., to make him effective in the preparation and submission of plans proposed for adoption and to enable him efficiently and economically to execute them after they have been approved and financed. The economic necessity for the adoption of a budget procedure lies in the fact that demands for service by the Government are going to continue to increase and with this the necessity both for careful, intelligent planning by the management, and a strict censorship on the part of those who pay the bills.

FREDERICK A. CLEVELAND.

—

[From "Creating Government efficiency," in the New Republic, July 29, 1916.]

The people in the States are becoming alive to the need for this sort of thing. As a result of the fact that the States have already reached a condition of deficit financing, there is an increased demand for a budget procedure which will put responsibility on the executive, not only for giving an account of himself but for preparing and submitting to the legislature a well considered finance plan based on the needs of the service. New Jersey has just passed such an executive budget law. The Maryland Legislature has submitted to voters a constitutional amendment that will come before them at the next election. Several States have like measures under consideration. But neither statutes nor constitutional amendments can have force without a militant public opinion which will insist on a procedure requiring finance measures to be considered, criticized, discussed, approved, or

disapproved openly and publicly in the legislature—the established forum of democracy and the only form in which public business can be adequately considered with due regard to all parties in interest.

FREDERICK A. CLEVELAND.

—

[From the World's Work, December, 1915.]

The public knows that the United States Government wastes money. The promises of economy made by both parties have proved equally valueless. Congressmen of both parties use the Federal Treasury as a "pork barrel" from which to satisfy the desires of their constituents—get the Treasury to pay for public buildings, Army posts, and pensions in the hope of reelection.

The public is becoming heartily sick of the pork barrel, both because of its essential dishonesty and because of its waste and inefficiency. But the pork barrel can not be abolished so long as the present system of making appropriations lasts. It is an integral part of that system. To change the existing wasteful system of appropriations necessitates a change in the Government of the United States—a much needed change from the irresponsible committee system to a system in which the Executive can be held responsible for the expenditures of his administration.—The Editors.

—

[From the World's Work, December, 1915.]

* * * We should establish the budget system. This would not actually curtail the scope of Congress. That body would still retain control of the purse. It would vote money only in obedience to a request from the administrative branch, but it could grant or refuse this request as conditions justified. Its business would be that of criticism, of investigation, and of veto. This would greatly enhance the character of both chambers. It would weed out those Members whose reelection depends chiefly on their ability to get local appropriations—certainly they would be no loss to the Nation. The more serious Members—and there are plenty of them—who are really interested in the Nation's business and would like to spend their time in it, are now tormented constantly by the importunity of their constituents. The budget system would relieve them of this. They would, therefore, have all their time for serious work. Thus the Nation would not only save millions of wasted money, but would get a higher type of lawmakers. And the patriotism of localities would find more worthy outlets than campaigns to secure a lot of useless and expensive architecture.

—

[From "Budget making," in American Economic Review, March, 1916.]

The time for action has now come. World events have forced upon our Government the necessity of undertakings with which our appropriating system is totally unable to cope. It is imperative that we disregard the haphazard methods we have followed hitherto and install a budget plan adapted to our governmental machinery. Whether such a change leads us from our Federal form toward the parliamentary one with its responsible ministry, as fiscal reforms in England from Magna Charta to the Lloyd-George budget have introduced the successive development to the parliamentary system of our day, need not alarm us. The truest progress in government has been through the incorporation from time to time of expedients for curing particular evils rather than in the adoption of a large scheme as a conscious experiment. The expedient most needed to-day is a device which will permit careful planning in the raising and expenditure of the public funds. This is the function of the public budget.

—

[From "Constitutional aspects of a national budget system," by Charles Wallace Collins, in the Yale Law Journal, March, 1916.]

From the foregoing situation it appears quite feasible to adopt a complete national budget system without making any change in our written Constitution. A few amendments to existing statutes and few changes in the rules of the House and Senate would provide the necessary modus operandi. The transition, so far as its legal phases are concerned, could be made easily and quickly.

There are, however, practical difficulties besetting the inauguration of so radical a change in our methods of procedure in financial legislation. We have always clung to the constitutional theory of separate and coordinate governmental powers. The Constitution was framed under that influence. It has been handed down as a tradition. It has made itself felt in the governmental organizations of our States and even in the lesser units of counties and cities. How, then, could we reconcile the apparent giving over to the Executive a part of the legislative power, with our traditional theories of constitutional government?

There is a point of contact in our governmental practice where this tradition may be reexamined and clarified. It lies in the extra legal field of party activity. The development of the political party as a determining factor in national legislation has been considered largely from the practical rather than the philosophical point of view. We have never legally recognized party responsibility for legislation, yet we do hold the party in power responsible, in a loose sort of a way, for whatever legislation is passed. From the party standpoint the President and his Cabinet have one and the same interest with the Members of the majority party in the Congress. The President is recognized as the leader of his party. To his party he has a very definite function and responsibility. In consultation with his Cabinet and other members of his party he formulates the party program. He assumes the responsibility to the country for the work of his party. He does actually participate in the legislation of the Congress by having bills introduced which are regarded as administration bills and by insisting on certain legislative measures to which he considers his party pledged.

Now, here is the point of contact with the budget system. It involves a closer application of party responsibility in the particular field of public finance. Recognize the party as the working unit in legislation and legalize the position of the Executive as party leader in financial legislation. The party in power is already, in fact, held responsible for the taxes it levies and the money it spends. It is only a short step to localize this responsibility on the shoulders of the Executive and give it a definite constitutional status.

In this manner we could effectively adopt the budget system without adopting the so-called parliamentary form of government. The Congress would not lose any of its constitutional powers. It would retain a strict control over the Nation's finances, since no money could pass into or out of the Treasury without its ratification. It would also see that no money was diverted from the purpose for which it was granted. The actual financial program would be given over to the Executive to prepare, to initiate into the Congress, and to execute after the Congress has given its formal approval.

[From Financial Administration of Great Britain. Willoughby. 1917.]

* * * A budget is a definite plan or proposal for financing the business of a future period both with respect to revenues and expenditures. It is usually prepared and submitted by the executive to the legislative branch of the government for its approval, together with such collateral and supporting information as is needed to sustain the conclusions reached. Through a budget the experience of the past is made available to the legislature and to the people as a basis for consideration and arriving at determinations for the future.

It is of the utmost importance that this fundamental character and purpose of the budget should be clearly apprehended. It is the one thing which binds detached operations into a logical and harmonious system and permits consideration of the activities and the cost of the government as a whole. Without it a country can scarcely be said to have a financial system; certainly not a scientific system.

—

[From Financial Administration of Great Britain. Willoughby. 1917.]

* * * The basic principle underlying the use of a budget as the central instrument for correlating all of the financial transactions of the government so that the whole problem of financing the government may be considered at one and the same time is hardly understood in this country, much less acted upon. Though the Executive is called upon to keep account of receipts and expenditures, to make reports and to submit estimates, the technical problem of having them so kept and submitted as to constitute a comprehensive report of past transactions and a work program for the future has not been satisfactorily worked out. The result is that Congress does not get before it a statement of the financial and work program of the Executive in such a form that it can clearly see its full purport. The fact that Congress does not get the information to which it is entitled is evidenced by the necessity that its committees having the consideration of appropriation bills are under of holding elaborate hearings for the purpose of securing information regarding estimate proposals. Most important of all, Congress, and not the Executive, is deemed to be the body that should formulate the definite program of receipts and expenditures. The reports and estimates that are submitted to it are not looked upon as an Executive program, but rather as data to enable Congress to perform its function as a program-framing body. The audit of accounts, instead of being made by an officer of the body granting the funds, is made by an officer of the branch of the Government whose operations are to be passed upon. Though early provision was made by the House for committees on expenditures in the executive departments, these committees have never attempted to make any thorough or systematic examination of the financial transactions of the Executive as revealed in the audited accounts. Congress thus has no effective machinery for the exercise of supervision and control over the manner in which the Executive performs its duties such as is possessed by the British Parliament in its comptroller and auditor general and its standing committee on public accounts. In respect to the granting of funds, the general principle is followed that all appropriations are morally, if not legally, obligatory; that they represent an order given by Congress to the Executive, and that it is the duty of the latter to act upon such order. The result is that the Executive feels called upon to expend all the funds voted to it, whether it deems such expenditure to be wise or not. Nothing approaching the British system of securing flexibility in the expenditure of funds by distinguishing between appropriation heads and subheads and of permitting of transfers to be effected between subheads is to be found in the American system. Finally, there is totally lacking in the National Government any organ having the duty of exercising a day-to-day supervision and control over the financial transactions of the Government such as the British Government possesses in its treasury department.

—

[From Financial Administration of Great Britain. Willoughby. 1917.]

To recapitulate, it would therefore seem highly desirable to distinguish clearly between the three basic factors of the budgetary problem: (1) The formulation of a budget; (2) action upon the budget; and (3) the provision of organs and a procedure through which budgetary control may be secured.

As a matter of practical expediency, it would further seem that greater progress in the direction of reform can be anticipated if for the present attention is concentrated upon the first and last of these three factors. To neither of these can the most ardent advocate of the system of legislative determination of appropriations find any objection. So great would be the improvement resulting from proper action in respect to these factors that they may well be regarded as necessary intermediate steps before the American public is prepared to pass judgment on the second, which can only arouse intense opposition, and thus might jeopardize any progress at all. With the principle of an executively formulated budget and the principle of a proper machinery for exercising budgetary control once firmly established, the basis will be laid for a change in procedure in respect to the second—that having to do with action upon the budget—if such change is then deemed to be desirable.

—

[From Need for a National Budget. H. Doc. No. 854, 62d Cong., 2d sess.]

If we follow the accepted usage of most civilized nations, we must conclude that a budget is a collection of documents assembled by an officer who is at the head of or is responsible for the administration and submitted to the legislative branch of the Government. Whatever else such a budget contains, in every case it carries with it an estimate of expenditures to be made by the Government during the coming financial period. While each nation has a revenue policy, the lack of emphasis which has been laid by nations in their budget upon the revenues and the relation of expenditures thereto has probably been due to the fact that by far the larger part of the revenues have come into the public treasury as the result of the operation of permanent law. No regular periodical action upon the part of the legislative authority has been necessary in order that revenues might be collected. As a consequence, the budget has been regarded primarily as an estimate of expenditures.

Inasmuch, however, as no nation can safely adopt for a long period a policy of expenditures which has no regard to the amount of its revenues, it has been usual in most national governments to fix the amount of the expenditures in view of the expected revenue. Where, as is the case in this country, the estimates have been a matter of legislative rather than executive responsibility, the legislature has imposed upon the treasury the duty of acquainting it with the estimated revenue for the coming budgetary period. It thus is the case

that even in political systems in which revenues are based on permanent law rather than on periodical legislative action the demands of a conservative financial policy require that expenditures shall be estimated in view of revenue possibilities. We may say, therefore, that a budget should consist of estimates of revenue as well as of expenditures.

It has been said that a budget is primarily an estimate of the expenditures made necessary by the operations of the Government. That is, it is assumed that a government already exists which operates in a given way. A budget is based upon the theory that the government for whose operations expenditures must be made is already organized and discharges certain activities whose number and extent have already been determined. The purpose of a budget is thus to finance an existing organization in order that it may successfully prosecute defined lines of work. In case it is thought desirable to have changes made in organization and in number and extent of activities, as compared with the organization and activities financed in the preceding budgetary period, these changes should be indicated at the time the budget is drawn, and in any case the changes must be determined before or at the time that appropriations are granted, since the appropriation is primarily a method of financing the existing organization and predefined activities.

Nevertheless since changes in organization and in number and extent of activities can hardly fail to affect expenditures, a budget, while primarily having to do with the expenditures made necessary by the defined operations of an existing governmental organization, must in the nature of things be concerned secondarily at any rate with questions of governmental organization and activities. It is, of course, to be borne in mind that other financial considerations primarily control the decision of these questions, but it can not be forgotten that no State can enter upon an administrative program, however desirable, the expense of which its financial resources do not admit it to assume. Thus, a comprehensive naval program is entered upon for military and not for financial reasons. But if the resources of the country are insufficient the Nation will have to forego the advantage of such a program, however marked they may be.

In this sense it may be said that a budget is in the nature of a prospectus and that its purpose is to present in summary form the facts necessary to the shaping of the policies of the Government so far as they affect its finances.

—

WILLIAM HOWARD TAFT.

[From message to Congress, June 27, 1912.]

Notwithstanding these specific constitutional requirements there has been relatively little attention given to the working out of an adequate and systematic plan for considering expenditures and estimates for appropriations; for regularly stating these in such form that they may be considered in relation to questions of public policy; and for presenting to the Congress for their consideration each year, when requests are made for funds, any definite plan or proposal for which the administration may hold them responsible.

Regular committees on expenditure have been established by the Congress for the purpose of obtaining knowledge of conditions through special investigations. During the last century over 100 special congressional investigations have been authorized to obtain information which should have been regularly submitted, and much money as well as much time has been spent by the Congress in its effort to obtain information about matters that should be laid before them as an open book; many statutes have been passed governing the manner in which reports of expenditures shall be made; specific rules have been laid down giving the manner in which estimates shall be submitted to the Congress and considered by it. From time to time special investigations have been made by heads of executive departments. During the last century many such investigations have been carried on and much money has been spent in the conduct of those, as well as by the Congress, for the purpose of obtaining facts as a basis for intelligent consideration of methods and procedure of doing business with a view to increasing economy and efficiency. From time to time Executive orders have been issued and reorganizations have taken place.

Generally speaking, however, the only conclusions which may be reached from all of this are that—

No regular or systematic means has been provided for the consideration of the detail and concrete problems of the Government.

A well-defined business or work program for the Government has not been evolved.

The reports of expenditures required by law are unsystematic, lack uniformity of classification, and are incapable of being summarized so as to give to the Congress, to the President, or to the people a picture of what has been done and of cost in terms either of economy of purchase or efficiency of organization in obtaining results.

The summaries of expenditures required by law to be submitted by the Secretary of the Treasury, with estimates, not only do not provide the data necessary to the consideration of questions of policy but they are not summarized and classified on the same basis as the estimates.

The report on revenues is not in any direct way related to the expenditures, except as the Secretary of the Treasury estimates a surplus or a deficiency, and this estimate is based on accounts which do not accurately show expenditures or outstanding liabilities to be met.

Instead of the President being made responsible for estimates of expenditures, the heads of departments and establishments are made the ministerial agents of the Congress, the President being called on only to advise the Congress how, in his opinion, expenditures may be reduced or revenues may be increased in case estimated expenditures exceed estimated revenues.

The estimates do not raise for consideration questions which should be decided before appropriations are granted, nor does the form in which estimates are required by the Congress to be presented lay the foundation for the consideration of: Subjects of work to be done; the character of organization best adapted to performing work; the character of expenditures to be made; the best method of financing expenditures.

The present law governing the preparation and submission of estimates, requiring them to be submitted each year in the same form as the year before, was passed without due consideration as to what information should be laid before Congress as a basis for action, the result being that the unsystematic and confused method before in use was made continuous.

The rules of the Congress do not provide for the consideration of estimates in such manner that any Member of Congress, any committee, or either House of Congress as a whole may have at any time the information needed for the effective consideration of a program of work done or to be done.

The committee organization is largely the result of historical development rather than of the consideration of present needs.

Inadequate provision is made for getting before each committee to which appropriations are referred all of the data necessary for the consideration of work to be done, organization provided for doing work, character of expenditures, or method of financing.

Following the method at present prescribed, the estimates submitted by each organization unit may have to be split up for consideration by Appropriation Committees of the Congress and be made the subject of several different bills; in few places are all of the estimates or appropriations asked for by a single organization unit brought together.

The estimates for appropriations requested for a single class of work are similarly divided, no provision being made for considering the amount asked for, the amount appropriated, or the amount spent for a single class of governmental activity.

Generally speaking, the estimates for expenses (or cost of each definite class of service to be rendered) are not separately shown from estimates for capital outlays (or cost of land, buildings, equipment, and other properties acquired).

While the classification and summaries of estimates do not indicate a proposed method of financing, these summaries do not show classes of work or the character of expenditures provided for and therefore can not lay the foundation for the consideration of methods of financing as a matter of governmental policy, as is contemplated under the Constitution.

The appropriations are just as unsystematic and incapable of classification and summary as the estimates; in fact, follow the same general form, making it difficult and in many cases impossible to determine what class of work has been authorized, how much may be spent for each class, or the character of expenditures to be made; nor does any one bill cover the total authorization for any particular general class of work.

Bills for appropriations—the authorizations to incur liabilities and to spend—are not considered by the committee to which measures for raising revenues and borrowing money are referred, nor are revenues and borrowings considered by committees on appropriations in relation to the funds which will be available.

So long as the method at present prescribed obtains neither the Congress nor the country can have laid before it a definite, understandable program of business, or of governmental work to be financed; nor can it have a well-defined, clearly expressed financial program to be followed; nor can either the Congress or the Executive get before the country the proposals of each in such manner as to locate responsibility for plans submitted or for results.

—

RECOMMENDATIONS.

[From Need for a National Budget, H. Doc. 854, 62d Cong., 2d sess.]

The commission recommends:

1. That the President, as the constitutional head of the executive branch of the Government, shall each year submit to the Congress, not later than the first Monday after the beginning of the regular session, a budget.

2. That the budget so submitted shall contain:

"(a) A budgetary message setting forth in brief the significance of the proposals to which attention is invited.

"(b) A summary financial statement setting forth in very summary form (1) the financial condition, (2) a statement of the condition of appropriations and other data pertaining to the 'general fund' as well as to the other funds of the Government, (3) an account of revenues and expenditures for the last completed fiscal year, and (4) a statement showing the effect of past financial policy as well as of budget proposals on the general-fund surplus.

"(c) A summary of expenditures, classified by objects, setting forth the contracting and purchasing relations of the Government.

"(d) Summaries of estimates setting forth (1) the estimated revenues compared with actual revenues for a period of years, (2) estimated expenditures compared with actual expenditures for a period of years.

(e) A summary of changes in law, setting forth what legislation it is thought should be enacted, in order to enable the administration to transact public business with greater economy and efficiency, i. e., changes in organic law, which, if enacted, would affect appropriations as well as the character of work to be done.

3. That the Secretary of the Treasury be required to submit to the Congress the following detailed reports supporting the general summaries and Executive conclusions or recommendations contained in the budget, as follows:

(a) A book of estimates, containing the supporting details to the summaries of estimates of expenditure contained in the budget.

(b) A consolidated financial report, containing a detailed statement of revenues and a consolidated statement of expenditures by departments and establishments for the last five fiscal years, with such explanatory matter as is necessary to give information with respect to increases or decreases in revenue or expenditure or other relations to which it is thought that the attention of the Executive and legislative branches is to be given.

4. That the head of each department and independent establishment should be required to submit to the Secretary of the Treasury and to the Congress annual reports, which, among other things, would contain detailed accounts of expenditures, so classified as to show amounts expended by appropriations as well as by classes of work, together with the amounts of increases or decreases in stores, equipment, property, etc., including lands, buildings, and other improvements, as well as such other data or operative statistics and comment in relation thereto as may be necessary to show results obtained and the economy and efficiency of doing Government work, as well as of contracting and of purchasing.

5. That the President and heads of departments issue orders which will require that such accounts be kept, such reports be made, and such estimates be prepared as will enable them to obtain the information needed to consider the different conditions, relations, and results above enumerated before the estimates are submitted; that the President recommend to the Congress the enactment of such laws as will enable the administration to comply with the requirements of the Congress.

6. That the President recommend for the consideration of the Congress such changes in the form of appropriation bills as will enable the Government to avail itself of the benefits of the exercise of discretion on the part of the Executive in the transaction of current business in order that the Government may do work and accomplish results with economy and efficiency and as will definitely fix responsibility for failure so to exercise such discretion.

[From "Why we have a pork barrel," in the New Republic, July 22, 1916.]

The executive budget is the procedure of control over the purse that has been employed with increasing success by every country that has an efficient government and every nation that has a government which is responsible to the people; it is in harmony with the principles and precepts of democracy; it corresponds to the best practices that have been worked out in both public and private enterprises; it has been evolved by centuries of progressive experience in making management efficient; it makes the executive responsible for careful planning; it makes the legislature responsible for careful review and criticism of executive plans; it provides for full publicity in review and discussion of plans; and through this enables the people themselves to follow discussion and criticism, and makes the electorate effective in determining whom they shall trust with the conduct of affairs.

The so-called legislative budget has been urged for adoption by those who would protect the supremacy of the legislature and retain a weak executive in matters of administration; by persons who are opposed to executive leadership. In recognition of the popular unrest certain Members of Congress and leaders in State legislatures are offering this as an "American" method of doing things in contradistinction to a "foreign" or "European" or "monarchial" method. The fact is that it is not American except to this extent: That America is the only great Nation that is still continuing practices which European nations have had the wisdom to get rid of after having suffered all the evils which we have continued to suffer for a century. Stourm in his great work, "Le Budget," vividly portrays the result of giving to individual members and committees of the French Parliament the right to initiate finance bills; and in this he tells the story of logrolling methods and the "pork barrel" as faithfully as if he had been describing a session of Congress or of our State legislatures. * * *

FREDERICK A. CLEVELAND.

[From New York Constitutional Convention, 1915.]

Mr. PELLETREAU. I would like to ask the same question as to the auditor.

Dr. LOWELL. I think your auditor must be independent. Your auditor has to be a man who is wholly independent. I remember a case which I could tell you about that I came across in business myself when I was a comparatively young man.

It so happened that the auditor, who had been employed by the treasurer of a cotton mill, came in to a member of the committee of the stockholders on auditing the accounts and said to him, "The treasurer has been stealing. I thought I was employed by him to look after his subordinates, but I have learned that I was employed by the stockholders to report to them, and I report that the treasurer has been stealing."

This is not a case where we are seeking for fraud but seeking for irregularity. But in any case your auditor ought to be appointed clearly; he ought to owe his appointment to a party outside.

Mr. STIMSON. And his duties ought not therefore to be mixed up with executive duties?

Dr. LOWELL. Not in the least. He is to inspect and he ought to have no other duties, because otherwise he is investigating himself.

Mr. PELLETREAU. Should not he be appointed by the governor?

Dr. LOWELL. I should feel it would be a pity to mix up your auditor with your executives in any way. You do not want to mix these things together.

Mr. WAGNER. You have got to put the appointive power somewhere.

Dr. LOWELL. Certainly, but it ought to be outside of the executive. You may put it in your house, you may elect him, put him anywhere, but not in the hands of your executives. The probability is the best place to put him is in the legislature, but whatever you do you do not want to put him in the executive and you do not want to give him executive power.

Mr. STIMSON. And you do not want to put him in a position where he would be criticizing himself.

[From testimony of William Howard Taft before finance committee of the New York State Constitutional Convention, 1915.]

Mr. RHEES. Might I ask one question? What auditing function is there in the United States Government which has any independence of the Executive?

Mr. TAFT. Practically none. The Comptroller of the Treasury is at the head of the auditors. There are appeals from the six auditors of the Treasury to the Comptroller of the Treasury, who puts the final audit, and there is practically nothing independent of the Executive.

* * * * * * *

Mr. RHEES. Is the Comptroller of the Treasury—does he change ordinarily with the change of the administration?

Mr. TAFT. Yes; ordinarily he does. He did not change in my day; but, then, very few did. [Laughter.]

[From "The coming of the budget system," by Charles Wallace Collins, in the South Atlantic Quarterly, October, 1916.]

In order the more rigidly to enforce the provision of the Constitution that "no money shall be drawn from the Treasury but in consequence of appropriations made by law," Congress would establish a system of definite control over the expenditure of the budget items. They would, by minute examination of the accounts, as well as by checks on the method of payment, see that the executive branch of the Government in no way exceeded the authority given by the budget. This would prevent the shifting of items or the spending of any of the money for a purpose other than that specified.

The adoption of a budget system would eliminate "logrolling" entirely. Invisible government would disappear. The whole financial system of the Government would be run for the public benefit alone. The procedure would be open and aboveboard, democratic, and businesslike. The people would know where and how the money was going. The budget would give them a concrete plan for criticism and discussion. It would bring their public business hom to them. What is now a mystery to the average man would become a topic of daily conversation. The sovereign citizen would be in a position to keep a closer watch on his public servants. Efficiency and economy would be practiced and democracy furthered on its way.

Mr. COOPER of Wisconsin. Mr. Chairman, I do not see the gentleman from Virginia [Mr. FLOOD] present; but I will ask the leader of the House, the gentleman from North Carolina [Mr. KITCHIN] if it would not be well to rise now? I will say to him that there are a number of gentlemen who have asked for time on this side, aggregating possibly two hours.

Mr. KITCHIN. I think we can very well arrange it to-morrow. The gentleman from Virginia [Mr. FLOOD] has entered the Hall.

Mr. COOPER of Wisconsin. I will say to the gentleman from Virginia that I was just saying that gentlemen have asked me for time, which, taken altogether, will amount to two hours. In view of the fact that this debate has been absolutely without a tinge of partisanship and exceedingly interesting and instructive, I hope that these gentlemen will have an opportunity to speak to-morrow.

Mr. FLOOD. I have a request for 20 minutes, and if the gentleman can get along with 1 hour and 50 minutes, I will take 20 minutes.

Mr. COOPER of Wisconsin. The gentleman from Virginia is not to control one-half of that time?

Mr. FLOOD. No; I will control 20 minutes and the gentleman will control 1 hour and 50 minutes.

Mr. COOPER of Wisconsin. That will be satisfactory.

Mr. MCFADDEN, by unanimous consent, was given leave to extend his remarks in the RECORD.

Mr. FLOOD. Mr. Chairman, I want to say for the benefit of gentlemen who heard the clear and able speech of the gentleman from Missouri [Mr. HAMLIN] that I called on the State Department a moment ago, and they stated to me, through Mr. Woolsey, the Solicitor, that they had got Mr. HAMLIN's letter of yesterday and immediately took the matter up with the President, and the President had given authority to give Mr. HAMLIN all the information he desired; that they had prepared a letter this morning and sent it down, and it was supposed to be in Mr. HAMLIN's office at the time he was addressing the committee. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HUMPHREYS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 9314, the Diplomatic and Consular appropriation bill, and had come to no resolution thereon.

LEAVE TO EXTEND REMARKS.

Mr. HAYDEN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the liberty loan.

The SPEAKER. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. SNOOK. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the liberty loan.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. EDMONDS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by submitting a compilation of addresses delivered in the House and Senate by the various war commissions of the allied nations visiting the House.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

CALENDAR WEDNESDAY.

Mr. FLOOD. Mr. Speaker, I ask unanimous consent that the business on Calendar Wednesday to-morrow be dispensed with.

The SPEAKER. The gentleman from Virginia asks unanimous consent to dispense with the business on Calendar Wednesday to-morrow. Is there objection?

Mr. BURNETT. I object.

ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 3081. An act to extend the time for the completion of the municipal bridge approaches, and extensions or additions thereto, by the city of St. Louis, within the States of Illinois and Missouri.

DANIEL W. COMSTOCK.

Mr. DIXON. Mr. Speaker, I ask unanimous consent that Sunday, February 17, be set aside for addresses on the life, character, and public services of the Hon. DANIEL W. COMSTOCK, late a Representative from Indiana.

The SPEAKER. Is there objection to the request of the gentleman from Indiana? [After a pause.] The Chair hears none.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. FLOOD. Mr. Speaker, I ask unanimous consent that when the Diplomatic and Consular appropriation bill is taken up again general debate shall be limited to 2 hours and 10 minutes, 20 minutes to be controlled by myself and 1 hour and 50 minutes by the gentleman from Wisconsin [Mr. COOPER].

The SPEAKER. The gentleman from Virginia asks unanimous consent that when the diplomatic and consular appropriation bill is again taken up general debate shall be limited to 2 hours and 10 minutes, 20 minutes of that time to be controlled by himself and 1 hour and 50 minutes by the gentleman from Wisconsin [Mr. COOPER]. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. FLOOD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 20 minutes p. m.) the House adjourned until to-morrow, Wednesday, February 6, 1918, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Acting Secretary of Commerce submitting a deficiency estimate of appropriation required by the Lighthouse Service for repairing and rebuilding aids to navigation on the Atlantic coast damaged by ice or storm (H. Doc. No. 911); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting a supplemental estimate of appropriation required by the Quartermaster Corps for the construction of Army quarters, storehouses, etc., Panama Canal, fiscal year 1919 (H. Doc. No. 912); to the Committee on Appropriations and ordered to be printed.

3. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Umpqua River, bar, and entrance, Oreg. (H. Doc. No. 913); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

By Mr. CARAWAY, from the Committee on the Judiciary, to which was referred the bill of the House (H. R. 9354) to amend the practice and procedure in Federal courts, and for other purposes, reported the same without amendment, accompanied by a report (No. 284), which said bill and report were referred to the House Calendar.

By Mr. WEBB, from the Committee on the Judiciary, to which was referred the bill of the House (H. R. 9504) to amend section 4067 of the Revised Statutes by extending its scope to include women, reported the same without amendment, accompanied by a report (No. 285), which said bill and report were referred to the House Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 9534) granting a pension to Edward P. Rae, and the same was referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. DYER: A bill (H. R. 9563) fixing the grades of the commissioned officers of the Medical Corps and of the Medical Reserve Corps of the United States Army on active duty, and for other purposes; to the Committee on Military Affairs.

By Mr. AUSTIN: A bill (H. R. 9564) for enlistment and appointment of officers in the National Guard, District of Columbia, during the period of the war; to the Committee on Military Affairs.

By Mr. BLACK: A bill (H. R. 9565) granting increased compensation to certain officials, employees, and laborers in the Post Office Department and Postal Service, and for other purposes; to the Committee on the Post Office and Post Roads.

By Mr. GARLAND: A bill (H. R. 9566) providing that an imprint shall be placed on all articles manufactured in the United States and becoming the subject of interstate commerce, and providing that no manufactured articles or goods shall be admitted to the United States unless bearing an imprint; to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 9567) appropriating $50,000 for payment of operating forces of public buildings for services performed; to the Committee on Appropriations.

Also, a bill (H. R. 9568) appropriating $50,000 for the erection of a monument to the memory of Robert Morris; to the Committee on the Library.

By Mr. DENT: A bill (H. R. 9569) to create in the Army the grades and establish the pay of first-class bugler and corporal bugler, to increase the pay of buglers, and for other purposes; to the Committee on Military Affairs.

Also, a bill (H. R. 9570) to amend articles 52 and 53 of section 1342 of the Revised Statutes, as amended by an act entitled "An act making appropriations for the support of the Army for the fiscal year ending June 30, 1917, and for other purposes," approved August 29, 1916, and for other purposes; to the Committee on Military Affairs.

Also, a bill (H. R. 9571) to authorize the appointment of officers of the Philippine Scouts as officers in the militia or other locally created armed forces of the Philippine Islands drafted into the service of the United States, and for other purposes; to the Committee on Military Affairs.

By Mr. BRODBECK: A bill (H. R. 9572) to provide for the permanent improvement of part of the Taneytown public road within the limits of the Battle Field of Gettysburg; to the Committee on Military Affairs.

By Mr. VAN DYKE: A bill (H. R. 9573) to regulate the hours of duty of the officers and members of the fire department of the District of Columbia; to the Committee on the District of Columbia.

By Mr. ALEXANDER: Resolution (H. Res. 243) for the consideration of S. 3389; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER: A bill (H. R. 9574) granting a pension to Reuben Phillips; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9575) granting a pension to Asa Daniel; to the Committee on Invalid Pensions.

By Mr. ASHBROOK: A bill (H. R. 9576) granting an increase of pension to Samuel McQuate; to the Committee on Invalid Pensions.

By Mr. AUSTIN: A bill (H. R. 9577) granting an increase of pension to Baty Cecil; to the Committee on Pensions.

By Mr. BORLAND: A bill (H. R. 9578) granting an increase of pension to Benjamin C. Bridges; to the Committee on Invalid Pensions.

By Mr. CAMPBELL of Kansas: A bill (H. R. 9579) for the relief of Dr. F. C. Cady; to the Committee on Claims.

By Mr. ELLIOTT: A bill (H. R. 9580) granting a pension to Orivilla Carter; to the Committee on Invalid Pensions.

By Mr. FRENCH: A bill (H. R. 9581) granting an increase of pension to John W. Dickens; to the Committee on Invalid Pensions.

By Mr. GODWIN of North Carolina: A bill (H. R. 9582) granting an increase of pension to Mrs. M. C. Shell; to the Committee on Pensions.

By Mr. HAMILTON of New York: A bill (H. R. 9583) granting an increase of pension to W. K. Wakefield; to the Committee on Invalid Pensions.

By Mr. HILLIARD: A bill (H. R. 9584) granting a pension to George F. Taylor; to the Committee on Pensions.

Also, a bill (H. R. 9585) granting a pension to Bion Jay Dillon; to the Committee on Pensions.

By Mr. KEARNS: A bill (H. R. 9586) granting an increase of pension to William Richardson; to the Committee on Invalid Pensions.

By Mr. LITTLEPAGE: A bill (H. R. 9587) granting an increase of pension to A. J. Carter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9588) granting an increase of pension to James O. Batten; to the Committee on Invalid Pensions.

By Mr. McANDREWS: A bill (H. R. 9589) for the relief of Margaret Barstith Stover; to the Committee on Claims.

By Mr. McCULLOCH: A bill (H. R. 9590) granting a pension to Willard Kolp; to the Committee on Pensions.

Also, a bill (H. R. 9591) granting a pension to Harry C. Miller; to the Committee on Pensions.

Also, a bill (H. R. 9592) granting an increase of pension to Jesse W. Shaw; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9593) granting an increase of pension to Raymond E. Fisher; to the Committee on Pensions.

Also, a bill (H. R. 9594) granting an increase of pension to John F. McDowell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9595) granting an increase of pension to John M. Robison; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9596) granting an increase of pension to Eli Shidler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9597) for the relief of David B. Turnipseed; to the Committee on Military Affairs.

Also, a bill (H. R. 9598) to complete the military record of Theodore Silas Steffy and for an honorable discharge; to the Committee on Military Affairs.

By Mr. POWERS: A bill (H. R. 9599) granting a pension to Joel Bryant; to the Committee on Invalid Pensions.

By Mr. SCHALL: A bill (H. R. 9600) granting an increase of pension to Henry Stephan; to the Committee on Invalid Pensions.

By Mr. SELLS: A bill (H. R. 9601) granting a pension to Elizabeth Jones; to the Committee on Pensions.

By Mr. SLEMP: A bill (H. R. 9602) for the relief of George T. Larkin; to the Committee on Claims.

Also, a bill (H. R. 9603) granting an increase of pension to Edward Collinsworth; to the Committee on Pensions.

By Mr. CHARLES B. SMITH: A bill (H. R. 9604) for the relief of Nathan B. Wilber; to the Committee on Military Affairs.

By Mr. SNELL: A bill (H. R. 9605) granting an increase of pension to Thomas O. Forbes; to the Committee on Invalid Pensions.

By Mr. STEENERSON: A bill (H. R. 9606) granting an increase of pension to Edwin Andrews; to the Committee on Invalid Pensions.

By Mr. TEMPLE: A bill (H. R. 9607) granting an increase of pension to James H. Johnson; to the Committee on Invalid Pensions.

By Mr. WOODS of Iowa: A bill (H. R. 9608) granting an increase of pension to James B. Ingalls; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9609) granting a pension to Robert J. Henderson; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Resolution of the Maryville (Mo.) Commercial Club, protesting against the second-class postage rates in the war-revenue act; to the Committee on Ways and Means.

Also (by request), petition of citizens of Louisiana, Mo., in favor of H. R. 5531, creating a pharmaceutical corps; to the Committee on Military Affairs.

By Mr. BACHARACH: Petition of Charles H. Borican, Bridgeton; Chester McWilliams, Bridgeton; J. E. Stackhouse, Medford; Everett B. Townsend, Cape May Court House; William Carr, Moorestown; George R. Elwell, Bridgeton; O. D. Willis, Bridgeton; Samuel McCormick, Burlington; and A. S. Parker, Burlington, rural letter carriers, all in the second congressional district of New Jersey, asking for increase in compensation; to the Committee on the Post Office and Post Roads.

By Mr. COOPER of Wisconsin: Petition of citizens of Beloit, Wis., urging congressional action on legislation to provide for uniform physical training in public schools; to the Committee on Education.

By Mr. DALE of New York: Memorial of the Merchants' Association of New York, favoring the passage of the daylight-saving law; to the Committee on Interstate and Foreign Commerce.

By Mr. FULLER of Illinois: Petition of the Edward Hines Lumber Co., of Chicago, for the Sims bill, H. R. 8172; to the Committee on Interstate and Foreign Commerce.

Also, memorial of the Maryville (Mo.) Commercial Club, for the repeal of the second-class postage provisions of the war-revenue act; to the Committee on Ways and Means.

By Mr. HILLIARD: Papers in support of House bill 6693, granting an increase of pension to Francisco Brown; to the Committee on Invalid Pensions.

Also, papers to accompany House bill 9584, granting an increase of pension to George F. Taylor; to the Committee on Pensions.

Also, memorial of the Hesperian Club, of Denver, Colo., urging the immediate repeal of the act increasing postage rates on periodicals; to the Committee on Ways and Means.

By Mr. McANDREWS: Evidence in support of a bill for the relief of Mrs. Margaret B. Stover; to the Committee on Claims.

By Mr. NOLAN: Petition of W. S. Scott, secretary Master Plasterers' Association, San Francisco, Cal., and four other organizations, favoring the Madden bill (H. R. 1654); to the Committee on the Post Office and Post Roads.

By Mr. O'SHAUNESSY: Memorial of Newport Lodge, No. 119, International Association of Machinists, urging the passage of H. R. 7356, the Keating bill; to the Committee on Appropriations.

By Mr. REED: Evidence in support of H. R. 9075, granting a pension to Arzanna Nesbitt; to the Committee on Invalid Pensions.

By Mr. SCHALL: Resolution of the Minneapolis branch of Women's Foreign Missionary Society, protesting against increasing postage rate on periodicals; to the Committee on Ways and Means.

By Mr. SNELL: Petition of members of First Baptist Church, Plattsburg, N. Y., favoring immediate nation-wide prohibition for the duration of the war; to the Committee on the Judiciary.

By Mr. WEBB: Petition of the Pastors' Association of Washington, D. C., for passage of resolution requesting President to ask British and French Governments to forbid their people to sell or give beer, wine, or other intoxicants to American soldiers; also to enact joint war prohibition with us, so that American grain sent abroad at our sacrifice may not be used to make intoxicants or in place of grain so used; to the Committee on the Judiciary.

SENATE.

WEDNESDAY, *February 6, 1918.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we rejoice in the abundance of Thy blessings to us, in the vast resources that Thou hast put at our command, in the institutions that we hold dearer than life, in the privilege of building upon the noble work of our forefathers who laid the foundations of our civil institutions. We pray that we may be kept true to the highest and best in our national history, and with visions for the future may we press on to accomplish the Divine will in us as a Nation. For Christ's sake. Amen.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. OVERMAN and by unanimous consent, the further reading was dispensed with and the Journal was approved.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by G. F. Turner, one of its clerks, announced that the House had passed a bill (H. R. 5489) to authorize the Secretary of the Interior to exchange for lands in private ownership lands formerly embraced in the grant to the Oregon & California Railroad Co., in which it requested the concurrence of the Senate.

PETITIONS AND MEMORIALS.

Mr. JONES of Washington presented a telegram in the nature of a memorial from Federal Employees' Union No. 34, of Blaine, Wash., remonstrating against the adoption of the so-called Borland amendment to the Agricultural appropriation bill increasing the hours of labor of Government employees, which was referred to the Committee on Agriculture and Forestry.

Mr. PHELAN presented a petition of the Alameda Citizens' Committee, of Berkeley, Cal., praying for the Government ownership of railroads, munition factories, shipyards, etc., which was referred to the Committee on Interstate Commerce.

He also presented a memorial of the German-American Central Verein, of Spokane, Wash., remonstrating against the rescinding of the charter of the National German-American Alliance of the United States of America, which was referred to the Committee on the Judiciary.

Mr. WARREN presented resolutions adopted by the Wyoming Woolgrowers' Association at its fourteenth annual convention, held at Douglas, Wyo., January 9 to 11, 1918, favoring a Federal dog tax and appropriation for work of exterminating predatory wild animals, which were referred to the Committee on Agriculture and Forestry.

He also presented resolutions adopted by the Wyoming Woolgrowers' Association at its fourteenth annual convention, held at Douglas, Wyo., January 9 to 11, 1918, favoring the use of pure wool for soldiers' clothing, which were referred to the Committee on Military Affairs.

REPORTS OF COMMITTEES.

Mr. VARDAMAN, from the Committee on Post Offices and Post Roads, to which was referred the bill (S. 3689) authorizing the Postmaster General to cancel or readjust the screen-wagon contract of H. H. Hogan at Kansas City, Mo., reported it without amendment.

Mr. ASHURST, from the Committee on Indian Affairs, to which was referred the bill (S. 3481) to authorize the logging of timber on the Red Lake Indian Forest, Minn., under the direction of the Department of the Interior, reported it with an amendment and submitted a report (No. 243) thereon.

TEACHERS' RETIREMENT BILL.

Mr. HOLLIS. Mr. President, I report back favorably without amendment from the Committee on the District of Columbia the bill (S. 3648) for the retirement of public-school teachers in the District of Columbia, and I submit a report (No. 244) thereon. I should like to ask unanimous consent for its consideration, but I do not because certain Senators in favor of the bill think it ought to be considered further. I shall ask that it go to the calendar and that the report be printed. It is the same bill which was favorably reported last year, with no substantial change. I shall ask for early action upon it.

The VICE PRESIDENT. The bill will be placed upon the calendar.

REMOVAL OF SNOW AND ICE.

Mr. SMITH of Maryland. From the Committee on the District of Columbia I report back favorably without amendment the bill (S. 3317) providing for the removal of snow and ice from the paved sidewalks of the District of Columbia, and I submit a report (No. 245) thereon.

Mr. GALLINGER. This bill comes at a very opportune time, and I hope the Senator will ask present consideration for it. A similar bill passed the Senate once before, at least.

Mr. SMITH of Maryland. This bill was introduced by the Senator from Vermont [Mr. DILLINGHAM]. He is not here. I understood that he wanted to ask for its present consideration, and I ask it in his name.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered as in Committee of the Whole, and it was read, as follows:

Be it enacted, etc., That it shall be the duty of every person, partnership, corporation, joint-stock company, or syndicate in charge or control of any building or lot of land within the fire limits of the District of Columbia, fronting or abutting on a paved sidewalk, whether as owner, tenant, occupant, lessee, or otherwise, within the first four hours of daylight after the ceasing to fall of any snow or sleet, to remove and clear away, or cause to be removed and cleared away, such snow or sleet from so much of said sidewalk as is in front of or abuts on said building or lot of land.

SEC. 2. That it shall be the duty of the Commissioners of the District of Columbia, within the first four hours of daylight after the ceasing to fall of any snow or sleet, or after the accumulation of ice on the paved sidewalks within the fire limits of the District of Columbia, in front of or adjacent to all public buildings, public squares, reservations, and open spaces in the said District owned or held by lease by said District, to cause such snow, sleet, and ice to be removed, and also to cause the same to be removed from all crosswalks of improved streets and places of intersection of alleys with paved sidewalks, and also from all paved sidewalks or crosswalks used as public thoroughfares through all public squares, reservations, or open spaces within the fire limits of said District owned or held by lease by the District of Columbia; but in the event of inability to remove such accumulation of snow, sleet, and ice without injury to the sidewalk, by reason of the hardening thereof, it shall be their duty, within the first four hours of daylight after the hardening thereof, to make reasonably safe for travel, or cause to be made reasonably safe for travel, by the sprinkling of sand or ashes thereon such paved sidewalks, crosswalks, and places of intersection of alleys with paved sidewalks, and shall, as soon thereafter as the weather shall permit, thoroughly clean, or cause to be thoroughly cleaned, said sidewalks, crosswalks, and places of intersection of alleys with paved sidewalks.

SEC. 3. That it shall be the duty of the Chief of Engineers of the United States Army, within the first four hours of daylight after the ceasing to fall of any snow or sleet, or after the accumulation of ice upon the paved sidewalks within the fire limits of the District of Columbia, to remove or cause to be removed from such sidewalks as are in front of or adjacent to all buildings owned or leased by the United States, and from all paved sidewalks or cross walks used as public thoroughfares in front of, around, or through all public squares, reservations, or open spaces within the fire limits of the District of Columbia, owned or leased by the United States, such snow, sleet, and ice; but in the event of inability to remove such accumulation of snow, sleet, and ice, by reason of the hardening thereof, without injury to the sidewalk, it shall be his duty, within the first four hours of daylight after the hardening of such snow, sleet, and ice, to make reasonably safe for travel, or cause to be made reasonably safe for travel, by the sprinkling of sand or ashes thereon, such paved sidewalks and cross walks, and shall, as soon thereafter as the weather shall permit, thoroughly clean said sidewalks and cross walks.

SEC. 4. In case the snow, sleet, and ice can not be removed from so much of the paved sidewalks within the fire limits of the District of Columbia as front upon or abut such buildings or lots of land as are not owned or held by lease by the District of Columbia or the United States without injury to said sidewalks, because of the hardening thereof, the person, partnership, corporation, joint-stock company, or syndicate in charge or control of such buildings or lots of land, whether as owner, tenant, occupant, lessee, or otherwise, shall, within the first four hours of daylight after the same has formed, make reasonably safe for travel, or cause to be made reasonably safe for travel, by the sprinkling of sand or ashes thereon, said sidewalks, and shall, as soon thereafter as the weather shall permit, thoroughly clean said sidewalks.

SEC. 5. That in the event of the failure of any person, partnership, corporation, joint-stock company, or syndicate to remove or cause to be removed such snow or ice from the said sidewalk, or to make the same reasonably safe for travel, or cause the same to be made reasonably safe for travel, as hereinbefore provided, it shall be the duty of the Commissioners of the District of Columbia, as soon as practicable after the expiration of the time herein provided for the removal thereof, or for the making of the said sidewalks reasonably safe for travel, to cause the snow and ice in front of such building or lot of land to be removed or to cause the same to be made reasonably safe, as hereinbefore, directed to be done by such person, partnership, corporation, joint-stock company, or syndicate in charge or control of such building or lot of land, and the amount of the expense of such removal or such work of making the said sidewalks reasonably safe for travel shall in each instance be ascertained and certified by the said Commissioners to the corporation counsel of the District of Columbia.

SEC. 6. That the corporation counsel is hereby directed and authorized to sue for and recover from such person, partnership, corporation, joint-stock company, or syndicate the amount of such expense in the name of the District of Columbia, together with $3 penalty for each offense, with costs, and when so recovered the amount shall be deposited to the credit of the District of Columbia.

SEC. 7. That in order to enable the said Commissioners and the Chief of Engineers of the United States Army to comply with their duties under this act and to carry it into effect there is hereby appropriated the sum of $10,000, one-half out of the general revenue fund of the District of Columbia and the other one-half out of any moneys in the Treasury not otherwise appropriated.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

THE COMMITTEE ON EDUCATION AND LABOR.

Mr. THOMPSON, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate resolution 195, submitted by Mr. SMITH of Georgia on the 31st ultimo, reported it favorably without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the Committee on Education and Labor, or any subcommittee thereof, be, and hereby is, authorized during the Sixty-fifth Congress to send for persons, books, and papers, to administer oaths, and to employ a stenographer at a cost not exceeding $1 per printed page to report such hearings as may be had in connection with any subject which may be before said committee, the expenses thereof to be paid out of the contingent fund of the Senate, and that the committee, or any subcommittee thereof, may sit during the sessions or recesses of the Senate.

THE COMMITTEE ON POST OFFICES AND POST ROADS.

Mr. THOMPSON, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate resolution 180, submitted by Mr. BANKHEAD on the 11th ultimo, reported it favorably without amendment, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the Committee on Post Offices and Post Roads, or any subcommittee thereof, be authorized during the Sixty-fifth Congress to send for books and papers, to administer oaths, and to employ a stenographer at a price not to exceed $1 per printed page to report such hearings as may be had in connection with any subject which may be pending before the said committee; that the committee may sit during the sessions or recesses of the Senate; and the expense thereof shall be paid out of the contingent fund of the Senate.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. HARDWICK:

A bill (S. 3753) to amend an act entitled "An act to repeal section 3480 of the Revised Statutes of the United States"; to the Committee on the Judiciary.

By Mr. JONES of Washington:

A bill (S. 3754) to amend an act entitled "An act for making further and more effectual provision for the national defense, and for other purposes," approved June 3, 1916; to the Committee on Military Affairs.

By Mr. CULBERSON:

A bill (S. 3755) to authorize the Supreme Court to prescribe forms and rules and generally to regulate pleading, procedure, and practice on the common-law side of the Federal courts; to the Committee on the Judiciary.

A bill (S. 3756) referring certain claims against the Choctaw and Chickasaw Nations of Indians to the Court of Claims; to the Committee on Indian Affairs.

By Mr. ASHURST:

A bill (S. 3757) to authorize the sale of certain lands to school district No. 28, of Missoula County, Mont.; to the Committee on Indian Affairs.

By Mr. SHEPPARD:

A bill (S. 3758) to prohibit the sale, manufacture, and importation of intoxicating liquors in the Territory of Hawaii

unless the qualified electors thereof repeal the provisions hereof; to the Committee on the Pacific Islands and Porto Rico.

By Mr. HOLLIS:

A bill (S. 3759) granting a pension to Emily E. Fitzgerald (with accompanying papers); to the Committee on Pensions.

By Mr. KENYON:

A bill (S. 3760) granting an increase of pension to David A. Sawyers (with accompanying papers);

A bill (S. 3761) granting a pension to Elizabeth J. Edson (with accompanying papers);

A bill (S. 3762) granting a pension to George McDowell (with accompanying papers); and

A bill (S. 3763) granting a pension to Willis Hood; to the Committee on Pensions.

By Mr. HALE:

A bill (S. 3764) granting a pension to Hattie E. Richardson (with accompanying papers); to the Committee on Pensions.

By Mr. REED:

A bill (S. 3765) to place the name of Thomas W. Purcell upon the Army and Navy medal of honor roll; to the Committee on Military Affairs.

A bill (S. 3766) granting a pension to Thomas Higgins;

A bill (S. 3767) granting a pension to Catherine L. Nixon Rogers (with accompanying paper);

A bill (S. 3768) granting a pension to Sarah J. Rollins;

A bill (S. 3769) granting a pension to Mary S. Dulin (with accompanying papers); and

A bill (S. 3770) granting an increase of pension to William J. Nelson (with accompanying papers); to the Committee on Pensions.

By Mr. OVERMAN:

A bill (S. 3771) authorizing the President to coordinate or consolidate executive bureaus, agencies, and offices, and for other purposes, in the interest of economy and the more efficient concentration of the Government; to the Committee on the Judiciary.

By Mr. SMITH of Maryland:

A bill (S. 3772) for the relief of the East Lafayette Savings & Loan Association of Baltimore City, Baltimore, Md. (with accompanying papers); to the Committee on Claims.

By Mr. SIMMONS:

A joint resolution (S. J. Res. 128) granting to certain persons in the active war service an extension of time within which application for insurance may be made under section 401 of the act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, as amended by the act approved October 16, 1917; to the Committee on Finance.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. SMITH of South Carolina submitted an amendment providing that any moneys heretofore or hereafter received by the United States for or in connection with disposition of nitrate of soda, pursuant to section 27 of the act approved August 10, 1917, may, in the discretion of the President, be used as a revolving fund, etc., intended to be proposed by him to the Agricultural appropriation bill, which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. KELLOGG submitted an amendment proposing that the sum of $12,000, or so much thereof as may be necessary, of the tribal funds of the Chippewa Indians in the State of Minnesota may be appropriated to pay the expenses of the general council of that tribe in looking after their affairs, etc., intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

He also submitted an amendment relative to the settlement of the claims of the Chippewa Indians of Minnesota, etc., intended to be proposed by him to the Indian appropriation bill, which was referred to the Committee on Indian Affairs and ordered to be printed.

THE COMMITTEE ON INDIAN AFFAIRS.

Mr. CURTIS submitted the following resolution (S. Res. 201), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Indian Affairs, or any subcommittee thereof, be, and hereby is, authorized, during the Sixty-fifth Congress, to send for persons, books, and papers; to administer oaths; and to employ a stenographer, at a cost not exceeding $1 per printed page, to report such hearings as may be had in connection with any subject which may be pending before said committee, the expenses thereof to be paid out of the contingent fund of the Senate; and that the committee, or any subcommittee thereof, may sit during the sessions or recess of the Senate.

Mr. THOMPSON, subsequently, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred the foregoing resolution, reported it favorably without amendment, and it was considered by unanimous consent and agreed to.

NEGLECTED WATERS OF THE PACIFIC COAST.

Mr. POINDEXTER submitted the following resolution (S. Res. 202), which, with the accompanying papers, was referred to the Committee on Printing:

Resolved, That the document entitled "Neglected Waters of the Pacific Coast, Washington, Oregon, and California," by E. Lester Jones, Superintendent of the United States Coast and Geodetic Survey, be printed as a Senate document.

BENJAMIN E. ROBERTS ET AL. (S. DOC. NO. 170).

Mr. SMOOT. A copy of the findings of the Court of Claims in the case of Benjamin K. Roberts and others against the United States was ordered printed by the Senate on February 4, 1918. It develops that there are certain illustrations in the findings, and I therefore ask an order of the Senate that the illustrations may be printed in connection with the document.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

The order was reduced to writing, as follows:

Ordered, That the illustrations accompanying the letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Benjamin K. Roberts, Harris L. Roberts, and Helen F. C. Roberts, guardian of Benjamin S. Roberts, jr., heirs of Benjamin S. Roberts, deceased, be printed with said document.

SOLDIERS' AND SAILORS' CIVIL-RIGHTS RELIEF.

The VICE PRESIDENT. The morning business is closed and the calendar, under Rule VIII, is in order.

Mr. OVERMAN. I move that the Senate proceed to the consideration of House bill 6361, the soldiers' and sailors' civil relief bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 6361) to extend protection to the civil rights of members of the Military and Naval Establishments of the United States engaged in the present war.

Mr. OVERMAN. Mr. President, this bill has been read through at the desk. It has passed the House of Representatives. It was introduced in the Senate last September by the Senator from Oregon [Mr. CHAMBERLAIN], the chairman of the Committee on Military Affairs. Simultaneously the bill was introduced in the House of Representatives. It has been considered by the Judiciary Committee of the Senate for some months. It was considered by the House, and passed the House practically as it is before the Senate. Then, after passing the House, it was considered by the Judiciary Committee of the Senate, and as to its merits and main features and details of the bill there is very little division of sentiment. There is some objection to the bill as to its constitutionality, but the committee thought——

Mr. HARDWICK. Will the Senator let me suggest to him that both the Senator from Tennessee [Mr. SHIELDS] and the Senator from Missouri [Mr. REED], who are interested in the measure, are now absent from the Chamber.

Mr. OVERMAN. First let me make my statement.

Mr. President, the purpose of the bill is to stay temporarily legal proceedings against soldiers who have been drafted into the military service. The stay is only temporary and is to protect the soldier against the impairment of his civil rights and contracts and property. It provides for staying an action, allowing the court to appoint in his absence an attorney to represent him, in case of default a stay of proceedings, if an attachment is issued. Also the court can stay the attachment and have an attorney appointed to represent the soldier. It stays the statute of limitations and is a stay of the collection of rent and installments on contracts and mortgages. It also provides for taking care of the soldier when he has taken out a policy of life insurance, and prevents the policy from lapsing in his absence fighting for his country, and to generally free persons in the military and naval service of the United States from harassment and injury to their term of service and make them more efficient soldiers.

Mr. GALLINGER. May I ask the Senator how long does this stay continue?

Mr. OVERMAN. Until six months after the war. It gives an opportunity for the soldier to come back and be heard in these matters in his own behalf that have been taken against him in his absence.

Mr. GALLINGER. If the Senator will permit me, I have not been able to give consideration to the bill, but one objection has been suggested to me, and that is that it will destroy the credit of the family. The wife will not be able to get the consideration that she might get under different conditions. So it may work a hardship.

Mr. OVERMAN. That was one objection urged, but I think the burdens upon the creditor are so insignificant when compared with the good it will do in this war that objection is very rarely urged now. The bill has been recommended by the Secretary of War and the Secretary of the Navy.

Mr. GALLINGER. That might be, and yet it might not be a good bill.

Mr. OVERMAN. That might be, but I am going to give you an example of the hardship that will come to the soldier in his absence. The Secretary of the Navy appeared before the Judiciary Committee and stated one case which will surprise the Senator. A man in the Navy, a sailor on the *Mayflower*, had gone to a foreign country. His property was advertised for sale under a mortgage. His wife wrote to the Secretary of the Navy and told him that the savings of a lifetime were about to be taken away. The sailor's property was advertised for sale. He owed a small balance on it. She came in person to see the wife of the Secretary, and she arranged to protect her. We have such cases as that. I have had a digest made of the letters received by the War Department showing the cases of soldiers who have been appealing to the Government to take care of their interest while they were abroad.

From Camp Gordon we have a letter of this kind:

Camp Gordon: Purchased a lot on installments. Can't pay anything on it now because his pay goes all to his mother. Fears he will lose his title.

Camp Grant: Owes $250 on a mortgage, payable $100 a week; is threatened with foreclosure, thus "losing my entire life savings of 11 years sunk in the business."

Camp Funston: Homestead claim; hopes that it will be protected.

Camp Funston: Bought a 200-acre tract on installments and can not make payments now. "It looks to me as though all the soldiers serving their country should be given at least as much time after the war to meet their obligations as they had at the time of their enlistment. It looks only fair that those who stay at home should not be allowed to take their property away from them on account of their serving in the Army."

Camp McClellan: Supports aged parents and motherless children by paying their rent. Landlord summoned mother to court for $45 rent unpaid, and threatened eviction; they will soon be put out, and his children go to an orphan asylum. He can only send $20 a month. Landlord is wealthy. The soldier wants a discharge. "Our great United States stands for everything I love, but my parental love means more."

Camp Sherman: Owes $1,000 on his house; $230 now due to bank, and doesn't know what he can do to save his home.

Fort Harrison: Has homestead claim, which will be ruined if a road is put through it as now threatened by county commissioners; can not be there nor pay lawyer to save his rights.

Camp Lewis: Payment due on 160 acres adjoining homestead, and he can not meet it. "A soldier should not be foreclosed while he is doing his bit; it gives the land sharks too good a chance. A law to this effect would benefit a great number of soldiers here."

Camp Lewis: Owes on life insurance policies, mortgage, and four personal notes, all due between January and December, 1918; has only a private's pay, now that his salary has stopped. "The failure of Congress to make provision for these cases will mean the undue sacrifice of my property, and many others."

And so on. There are hundreds of such cases.

Mr. SMITH of Michigan. Will the Senator from North Carolina let me interrupt him?

Mr. OVERMAN. Certainly.

Mr. SMITH of Michigan. Many cases have come to my notice, and I suppose to the notice of other Senators, of the absolute failure of the allotments to reach the beneficiaries. I do not know what causes the delay, but scores of beneficiaries or supposed beneficiary of the soldier's allotments have not reached them, and they do not reach them in regular orderly precision at all. They can make no calculation as to the time when they will receive their part of the soldier's pay.

Mr. OVERMAN. This has nothing to do with the allotments.

Mr. SMITH of Michigan. I know it has not, but much of the difficulty that the Senator complains of, not all of it, however, would be obviated if the beneficiaries could get their part of the allotments.

Mr. OVERMAN. I will read a digest from some other letters:

Camp Funston: Has a 60-acre farm and $550 due, besides $2,000 other debts. Since being in the Army he can't make payments, and is afraid of foreclosure. "Mind, I am not kicking on being here, but would like to have my rights if I have any coming."

Camp Wadsworth: Father ill, and mother works at $7 a week. Two months' rent due. How can he save them?

Camp Funston: Has a homestead claim. "I don't count on making any money while we are in this war, but would like to keep what little I have, so I may return at the end of the war."

Camp Lewis: Owes $100 on furniture, payable $5 a month; has paid $140 already; pays $25 a month to his wife, who is ill. "Can they take the furniture away if I fail in a payment? I do not want to beat them out of a cent, but my wife is sick."

Mr. SMOOT. In relation to the homestead of soldiers Congress has already passed legislation taking care of all such cases. No soldier will ever lose on a homestead entry by entering the war.

Mr. OVERMAN. If anybody should attempt to take it away from him, all the bill provides is that the court shall appoint some one to take care of his interests and stay any proceeding. I do not think anyone will make the attempt.

Mr. SMOOT. I am not speaking against the bill.

Mr. OVERMAN. I do not think anyone will object to the details of the bill.

Mr. GRONNA. Mr. President——

Mr. OVERMAN. I yield to the Senator.

Mr. GRONNA. I should like to state in reply to the Senator from Utah that the legislation to which he refers has reference only to the protection of the homestead rights of a soldier. I understand this is a bill providing that a homestead mortgage can not be foreclosed.

Mr. SMOOT. That is only one part of it. The case the Senator from North Carolina referred to was the case of a homesteader entering land and losing it by going into the Army. I simply answered that question by saying that Congress had taken care of that kind of a case.

Mr. OVERMAN. That particular case should be taken care of, and I hope it has been done.

Mr. SMOOT. I did not speak against the bill in any shape or form.

Mr. GRONNA. I did not understand the Senator from Utah to speak against it, but I was asking for information, if this bill does not go further than the homestead bill which was passed?

Mr. OVERMAN. Yes, sir.

Mr. GRONNA. It really protects the man's home if he has a mortgage on it. Is that correct?

Mr. OVERMAN. That is correct.

Mr. President, so far as the constitutionality is concerned, when that point was raised in the committee, a subcommittee composed of the Senator from Connecticut [Mr. BRANDEGEE], the Senator from Florida [Mr. FLETCHER], the Senator from Missouri [Mr. REED], the Senator from Vermont [Mr. DILLINGHAM], and myself concluded that there was no use to consider this bill if the Judiciary Committee should say it was unconstitutional, as one member contended. So we took the matter before the Judiciary Committee to consider the constitutionality of the bill, and the following resolution was passed by a large majority of the committee, the resolution having been introduced by the Senator from South Dakota [Mr. STERLING]:

Resolved, That it is the sense of the Committee on the Judiciary that the Congress has the power to enact a reasonable stay law, which may control the processes and proceedings of State courts, and that the subcommittee shall draft a bill accordingly.

Accordingly we proceeded to consider the bill, and we reported it back practically—

Mr. HARDWICK. Mr. President, will the Senator from North Carolina yield to me?

Mr. OVERMAN. I yield to the Senator.

Mr. HARDWICK. The Senator's committee, then, is of the opinion that Congress may impair the obligation of contracts?

Mr. OVERMAN. Not at all.

Mr. WOLCOTT. May I interrupt the Senator? In line with the suggestion which the Senator from Georgia has made, I suggest to the Senator in charge of the bill that the Judiciary Committee is of the opinion that Congress may impair the obligation of contracts.

Mr. OVERMAN. That has nothing to do with this case, as I see it. This bill only provides for a stay or delay.

Mr. HARDWICK. I understood the Senator from North Carolina to say that the committee was of the opinion that Congress could not impair the obligation of contracts, while the Senator from Delaware says the committee was of opinion that Congress could do so.

Mr. OVERMAN. I think it is the opinion of the committee that there is nothing in the Constitution to prevent Congress impairing the obligation of contracts.

Mr. HARDWICK. I wanted to get the view of the committee. For this reason, or some other reason, there is no doubt in the mind of the committee that Congress can impair the obligation of contracts whenever it pleases?

Mr. OVERMAN. That was the sense of the committee.

Mr. HARDWICK. Does the Senator entertain that view?

Mr. OVERMAN. I do not say whether I entertain that view or not, but I do say there is nothing in the Constitution that prevents Congress from impairing the obligation of contracts.

Mr. HARDWICK. All right.

Mr. OVERMAN. There is nothing in the Constitution to prevent that. I read the resolution of the Judiciary Committee, and the committee are supported by authorities from Eleventh Wallace down, to the effect that we have a right to pass this legislation.

Mr. HARDWICK. I have not heard any authorities read.

Mr. OVERMAN. I call the attention of the Senator, as he seems to want the authority, to the case of Stewart against Kahn, which seems to settle this case. That was a case on appeal from the State of Louisiana, which is reported in Eleventh

Wallace, on page 506. Has the Senator examined that case? If not, I will read an extract from it and call it to his attention.

Mr. HARDWICK. I am really asking for information more than anything else, but I assume, if the Senator pleases, that it would not be seriously contended that either Congress or any State could impair the obligation of contracts.

Mr. OVERMAN. I will not discuss that question, because I do not think it comes in here. This is only a provision for a stay.

Mr. HARDWICK. Now, following that, under State constitutions, containing provisions somewhat similar to the one I have in mind of the Federal Constitution, the State courts in many States have held that any stay law delaying the collection of debts was an impairment of the obligation of contracts.

Mr. OVERMAN. If the Senator will examine the decisions, I think he will find that most of the States have decided otherwise.

Mr. HARDWICK. No; I am not wrong about that.

Mr. OVERMAN. We have a list of the stay laws passed during the Civil War, from which it appears that nearly every State of the Union enacted a stay law, and such laws were upheld in all the courts. That is true of Pennsylvania and of a great many of the other States. Now, here is what the Supreme Court says in the case of Stewart against Kahn, which I have cited to the Senator, which is in regard to staying the statute of limitations. The case arose in Louisiana, and a constitutional question was raised. The supreme court of Louisiana upheld the law. From there it came to the Supreme Court of the United States. In deciding this case, Stewart *v.* Kahn (11 Wall., 493), the Supreme Court of the United States said:

> The Constitution gives to Congress the power to declare war, to grant letters of marque and reprisal, and to make rules concerning captures on land and water, to raise and support armies, to provide and maintain a navy, and to provide for calling forth the militia to execute the laws of the Union, suppress insurrection, and repel invasions.
>
> * * * Congress is authorized to make all laws necessary and proper to carry into effect the granted powers. The measures to be taken in carrying on war and to suppress insurrections are not defined. The decisions of all such questions rests wholly in the discretion of those to whom the substantial powers involved are confided by the laws.
>
> In the latter case the power is not limited to victories in the field, and the dispersion of the insurgent forces. It carries with it inherently the power to guard against the immediate renewal of the conflict, and to remedy the evils which have arisen from its use and progress. This act falls within the latter category. The power to pass it is necessarily implied from the powers to make war and suppress insurrection. It is a beneficent exercise of this authority. It only applies coercively the principle of the law of nations, which ought to work the same results in the courts of all the rebellious States without the intervention of this enactment. * * * The act is within the canons of construction laid down by Chief Justice Marshall in McCulloch *v.* Maryland (4 Wheat., 316).

I will also read an extract from the case of McCulloch versus Maryland (4 Wheat., 316):

> But we think the sound construction of the Constitution must allow to the National Legislature that discretion, with respect to the means by which the powers it confers are to be carried into execution, which will enable that body to perform the high duties assigned to it in the manner most beneficial to the people. Let the end be legitimate, let it be within the scope of the Constitution, and all means which are appropriate, which are plainly adapted to that end, and which are not prohibited but consistent with the letter and spirit of the Constitution, are constitutional.

Mr. HARDWICK. Mr. President, if the Senator will pardon me a moment, I think possibly there is a line of distinction in those decisions, between the one the Senator has read and the ones I have in mind. It may be—and that is the reason I am asking this question—that either Congress or a State may impair the obligation of a contract as a war measure, in order to secure the prosecution of war; but I am quite confident that it has been held in a number of cases by the courts of last resort that it can not be done if a period of depression or panic came on, for instance, in order to avoid or postpone the payment of debts. The legislatures of some States, or possibly the Congress of the United States, might enact certain legislation as a war power.

Mr. OVERMAN. The Senator can not find a decision of the United States Supreme Court, can he, declaring that Congress can not impair the obligation of a contract?

Mr. HARDWICK. No; I can not. That is to say, I do not think there is any express provision of the Constitution on the question, unless the fifth amendment be construed to cover it.

Mr. OVERMAN. The Senator from Georgia undoubtedly remembers the celebrated Gettysburg case, in which the Supreme Court in its decision laid down a principle which I think governs this case, although it is not exactly in point; but the case from which I read a moment ago was exactly in point, because it upholds a stay law passed by Congress.

Mr. HARDWICK. Was it not a law passed by the legislature of a State?

Mr. OVERMAN. No; it was a law passed by Congress, and it was upheld both by the State court and the Supreme Court of the United States. That case, Stewart *v.* Kahn, has been cited with approval many times since, and I say the principle laid down should govern in this bill. It is also laid down in the case of McCulloch *v.* Maryland. I call the attention of the Senator to this language, which is in line with the great speech made here by the Senator from Pennsylvania [Mr. KNOX] on this subject, taking the position that wherever it is necessary for the efficient prosecution of the war to win the war all powers should be subordinated and all constitutional limitations fade away when we consider them in conjunction with the power granted in the Constitution to Congress to declare war and the President as Commander in Chief to fight the war.

Mr. HARDWICK. The Senator, of course, is referring to the Gettysburg case?

Mr. OVERMAN. Yes.

Mr. HARDWICK. I do not think the Senator will contend for one moment that he himself believes in that doctrine.

Mr. OVERMAN. I believe in the doctrine laid down here, which I will read, and I think the Senator will also agree to it.

Mr. HARDWICK. Just a moment. Let me call the attention of the Senator to the case cited by the Senator from Idaho [Mr. BORAH]—the Milligan case—in which it was held that the Constitution of the United States was the same in war as in peace. That opinion was rendered by the same court, although I presume at an earlier date.

Mr. OVERMAN. Let us see what the court has decided about that. Listen to this language:

> It results from the powers that are given and it is implied because of its necessity or because it is appropriate in exercising those powers. Congress has power to declare war and to create and equip armies and navies. It has the great power of taxation to be exercised for the common defense and general welfare. Having such powers, it has such other and implied ones as are necessary and appropriate for the purpose of carrying the powers expressly given into effect. Any act of Congress which plainly and directly tends to enhance the respect and love of the citizen for the institutions of his country and to quicken and strengthen his motives to defend them, and which is germane to and intimately connected with and appropriate to the exercise of some one or all of the powers granted by Congress must be valid.

Any power exercised by Congress which is necessary for the protection of the Army or to make the Army more efficient is constitutional.

Mr. HARDWICK. Now, the Senator has gotten exactly to what I wanted to find out. Would the Senator contend that Congress could do that if it were not in the exercise of the war power?

Mr. OVERMAN. I think not.

Mr. HARDWICK. That is all I wanted to ask the Senator.

Mr. OVERMAN. In the exercise of the war powers granted to the President he can do anything necessary in order to win the war and preserve the Constitution, and Congress can pass any law that is necessary to preserve the Constitution.

Mr. President, I think the decisions I have cited are in point—certainly one of them is—and the principle laid down in the Gettysburg case is a principle which ought to govern us. The Judiciary Committee themselves, with probably two exceptions, think this bill is constitutional.

Mr. HARDWICK. Mr. President, in the absence of the junior Senator from Missouri [Mr. REED], I suggest the absence of a quorum. I think he desires to speak on this bill.

The VICE PRESIDENT. The absence of a quorum being suggested, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hardwick	Norris	Smith, Ga.
Borah	Henderson	Nugent	Smith, Md.
Brandegee	James	Overman	Smith, Mich.
Calder	Jones, Wash.	Phelan	Smith, S. C.
Culberson	Kellogg	Pittman	Smoot
Cummins	Kenyon	Poindexter	Sterling
Curtis	King	Pomerene	Swanson
Fernald	Kirby	Saulsbury	Thomas
France	Knox	Shafroth	Thompson
Gallinger	McLean	Sheppard	Townsend
Gronna	McNary	Shields	Trammell
Hale	Myers	Simmons	Vardaman
Harding	Nelson	Smith, Ariz.	Wolcott

Mr. GERRY. I desire to announce that the Senator from Mississippi [Mr. WILLIAMS] and the Senator from Arkansas [Mr. ROBINSON] are detained by illness.

Mr. MYERS. My colleague [Mr. WALSH] is still detained from the Senate on account of the condition of his health.

Mr. GRONNA. I have been requested to announce that the Senator from Wisconsin [Mr. LA FOLLETTE] is absent on account of sickness in his family. I ask that this announcement may stand for the day.

Mr. McNARY. I desire to announce the unavoidable absence of the junior Senator from California [Mr. JOHNSON] and of the senior Senator from Vermont [Mr. DILLINGHAM] on official business.

Mr. SHEPPARD. I desire to announce that the Senator from Oregon [Mr. CHAMBERLAIN], the Senator from Nebraska [Mr. HITCHCOCK], the Senator from Kentucky [Mr. BECKHAM], the Senator from Missouri [Mr. REED], the Senator from Florida [Mr. FLETCHER], the Senator from Tennessee [Mr. MCKELLAR], the Senator from Wyoming [Mr. WARREN], the Senator from New Jersey [Mr. FRELINGHUYSEN], the Senator from New York [Mr. WADSWORTH], and the Senator from Indiana [Mr. NEW] are detained on the Committee on Military Affairs.

The VICE PRESIDENT. Fifty-two Senators have answered to the roll call. There is a quorum present.

Mr. HARDWICK. Mr. President, if I may have the attention of the Senate for just a moment, I desire to say to the Senator in charge of the bill that I am not opposing the bill, because I am in sympathy with the motive that prompts the committee to report this bill and the motive that prompts Congress to pass it. I understand full well that when men go into the military or naval service of the country they ought not to be required to look after their estates or to attend court, and that there is ample reason and justification for this sort of law as a military matter—that is, if the bill does not go further than that. I am inclined to agree with the Senator just offhand—I have neither read the bill carefully nor studied the constitutional question—that under the war power Congress might, in order to insure the efficient prosecution of the war, adopt whatever provisions of this sort were necessary; but as I heard the resolution of the Committee on the Judiciary read, I want to enter my emphatic dissent to the proposition announced. It is true that in express words the Constitution of the United States does not limit the power of Congress to impair the obligation of contracts.

Mr. OVERMAN. Mr. President, I desire to say to the Senator that the resolution was not considered from every standpoint. The subcommittee reported this bill to the full committee after requesting instructions from the committee as to whether or not we had the power to pass this bill. I hope the Senator will not construe the resolution strictly, because the question the Senator is now discussing was not discussed. The only question before us was whether we ought to go ahead and enact such legislation.

Mr. HARDWICK. I am glad to hear the Senator say that, and I think that explanation ought to be made in justification of the committee's language, because if the fifth amendment of the Constitution of the United States means anything Congress can not, unless it is in the exercise of the war power, impair the obligation of contracts or pass a stay law. I do not believe that, on reflection, there are any Senators in this body who would take such a position now.

On this other question, I can say that I can see every reason why, in order that the men who have enlisted and have rallied to the colors, both in the military and the naval service, may be unvexed in mind and estate while they are risking their lives in the service of the country; they should not be troubled with lawsuits; and I am in as hearty sympathy with the Senator from North Carolina and with any other Senator on that question as I possibly can be; but I do not believe that either any State or the Congress of the United States can impair the obligation of a contract or pass a stay law, unless it be as a part of the military power conferred under the Constitution.

Mr. OVERMAN. I agree with the Senator as to that.

Mr. BRANDEGEE. Mr. President, as one member of the Judiciary Committee, I did not claim, and I do not now claim, that Congress has the right to pass a law which will impair the obligation of a contract. My claim is that this kind of a law does not impair the obligation of a contract.

I think the most illuminating decision that was before the committee when this question was up was that of Judge Woodward, of the Supreme Court of the State of Pennsylvania, in construing a State statute which was a stay law passed by that State during the Civil War.

I send to the desk, and will ask the Secretary to read, commencing where I have marked, on page 39 of the hearing before the committee, a small excerpt from the decision of Judge Woodward.

The VICE PRESIDENT. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

The highest court of Pennsylvania suggested that "stay laws" were not within the prohibition of the Constitution against the impairment of the obligation of contracts if the suspension of the remedy was reasonable and for a definite term, and so considered constitutional a law the effect of which was to give a maximum stay of 3 years and 30 days. (Breitenbach v. Bush, 44 Pa. St., 313 (1863); cf. Clark v. Martin, 3 Grant (Pa.), 393 (1863).)

The opinion of Mr. Justice Woodward in this case embodies the principal arguments in favor of the constitutionality of such statutes. He says:

"The principal question upon the record is whether this section be constitutional. * * * It is a stay for a term—the term for which he (the soldier) shall be engaged. The act of Congress of the 22d of July, 1861 * * * fixed the term at not more than three years nor less than six months * * *. The term of engagement, therefore, during which the above act meant that the defendant should not be subject to civil process was three years from the date of his muster, if the war should last so long, and if not, then until it should end.

"Was the legislature authorized to enact this section?

"We have often said that stay laws, exemption laws, and limitation laws are ordinarily constitutional, though applied to existing and prior contracts, and we have followed the distinction which prevails in the Supreme Court of the United States between the obligation of a contract and the remedies furnished by law for enforcing the obligation. We understand the rule to be that whilst the legislature may not impair the obligation they may modify the remedy. * * * The time and manner in which stay laws shall operate are properly legislative questions and will generally depend * * * on the sound discretion of the legislature according to the nature of the titles, the situation of the country, and the emergency which leads to the enactment. Cases may occur where the provisions of a law may be so unreasonable as to amount to a denial of right, and call for the interposition of the court. * * * It may be inferred that in respect to contracts which do not treat of remedies we hold any law to be constitutional which gives a stay for a time that is definite and is not unreasonable, but unconstitutional if the stay be for an indefinite time, or for a time that is unreasonable, though definite. The present stay is a long one—longer than is usual—longer than can be justified except by most peculiar and pressing circumstances. * * * The enforced delay of a civil right, the deterioration of the mortgaged estate, and the consequent pecuniary loss are entitled to great consideration in judging of the reasonableness of the law.

"Yet it is impossible to separate this question of reasonableness from the actual circumstances in which the country found itself at the date of the law. Eleven States had seceded or revolted. * * * In the judgment of the President and Congress, * * * the occasion required an immense increase of the Army and Navy.

"Now, if a stay of execution for three years would not be tolerated in ordinary times, did not these circumstances constitute an emergency that justified the pushing of legislation to the extremest limit of the Constitution? * * * In the nature of things there is nothing unreasonable in exempting a soldier's property from execution while he is absent from home battling for the supremacy of the Constitution and the integrity of the Union. * * * If the term of indulgence seems long in this instance, it was not longer than the time for which the President and Congress demanded the soldiers' services. * * * Basing ourselves on what they did, constitutionally the question for us is whether the stay granted by our legislature to our citizen soldiers was unreasonable. In view of the extraordinary circumstances of the case, we can not pronounce it unreasonable. We see in it no wanton or careless disregard of the obligation of contracts, but only a sincere effort to enable the General Government to prosecute with success a war which, in its exclusive right of judgment, it resolved to wage.

"Another circumstance which bears on the reasonableness of the enactment is the provision which suspends all statutes of limitation in favor of the soldier during all the time that he is exempted from process. The provisions were reciprocal and both were reasonable."

Mr. BORAH. Mr. President, may I ask the Senator the date of that decision?

Mr. KNOX. I think that was in 1862.

Mr. BRANDEGEE. It was during the Civil War.

Mr. KNOX. Mr. President, I only want to add that this opinion is by perhaps one of the greatest chief justices that Pennsylvania has ever had—perhaps, next to Gibson and Charles, the most eminent justice that ever sat upon our bench—and it is worthy of consideration, not only because of the character of the man but, in my own judgment, because of the logic of the opinion itself.

While I am on my feet I can not refrain from stating that not only has Pennsylvania, through her courts, first pronounced for the constitutionality of this class of legislation, but that Pennsylvania was the first to enact this class of legislation for the benefit of men who had been called out in the service of their country; for in less than a week after Sumter was fired on the Legislature of Pennsylvania passed the first stay law for the benefit of the soldiers.

Mr. BORAH. Mr. President, may I ask if there is any dissenting opinion in the case in which this decision was rendered by the chief justice of Pennsylvania?

Mr. BRANDEGEE. Mr. President, I read the decision in the committee several months ago, and I do not remember; but I think there was no dissenting opinion. I think it was the unanimous opinion of the court.

Mr. BORAH. Several States of the Union have passed upon the same question, holding that the stay for a certain length of time is not the impairment of the obligation of a contract; but I was wondering if that was a unanimous opinion.

Mr. BRANDEGEE. I think it was. The Senator will find the reference on page 39 of the testimony.

Mr. NELSON. Mr. President, I will say that during the Civil War it is my recollection that many of the Northern States, if not all of them, passed such stay laws, with various modifications, and so far as I recall they were all held to be constitutional. They were held not to impair the obligation of contracts, but to be simply in the nature of a statute of limitations limit-

ing the action during the service of the soldier in the Army. The contract remains in the same force that it always did, and the same principle that allows a legislative body to pass a statute of limitations would apply in this case.

I want to say, moreover, while I am on my feet, that this statute is carefully framed so that in all cases the matter comes within the jurisdiction of the court. I call the attention of Senators to just one paragraph of the law which shows how careful the law is, and the scope of the remedy. I refer to an action where it is sought to stay the cancellation of a contract based on the installment plan. For instance, property is sold on the installment plan and a few installments are paid, but the purchaser is unable to pay the balance on account of his military service. An attempt is made to cancel the contract and the intervention of the court is sought. In connection with that I want to read this provision so that the Senate can see the scope of it, and what latitude it allows to the court. It is on page 12, paragraph (2):

Upon the hearing of such action the court may order the repayment of prior installments or deposits or any part thereof, as a condition of terminating the contract and resuming possession of the property, or may, in its discretion, on its own motion, and shall, on application to it by such person in military service or some person on his behalf, order a stay of proceedings as provided in this act—

Now, I call the attention of Senators to this paragraph—

unless, in the opinion of the court, the ability of the defendant to comply with the terms of the contract is not materially affected by reason of such service; or it may make such other disposition of the case as may be equitable to conserve the interests of all parties.

Here, then, the court has three courses open to it. It may cancel the contract and order the money that has been paid on it restored; or it may grant a simple stay of proceedings; or, if it finds that the soldier, for instance, in this case is able to pay, has the necessary resources, it may order the payment of the debt. So that I think when you come to examine this law in all its details it will be found to be carefully guarded; and it is certainly a law that we ought to pass in this emergency for the protection of our soldiers. It is needed more for soldiers that are taken from our large cities and manufacturing centers, perhaps, than it is in the country, for in the country, among the rural communities, there is very little in the way of sales on the installment plan. That takes place more in the large cities and in the manufacturing centers, where laborers and mechanics buy furniture and other household goods and a lot of items on the installment plan because they are unable to buy them in any other way. This law will be a great protection to them. It will also be a protection in the case of farmers who have given mortgages on their lands with a power of sale who are threatened with foreclosure. The security is there, unimpaired, and the bill simply gives a stay during the war.

Another thing in this connection——

Mr. CALDER. Mr. President, will the Senator permit an interruption right there?

Mr. NELSON. Yes, sir.

Mr. CALDER. As I understand the basis of this bill, it would cover a case of this kind: A farmer purchases a farm, and at the time of its purchase it is free and clear. He gives a mortgage back on the farm for half of its value. Let us assume that the farm is worth $10,000. Subsequently he sells the farm, and the purchaser enters the military service. The man holding the mortgage against the farm demands the interest from the soldier. He is unable to pay it. He then demands the principal. Under the terms of this bill he can not collect the principal, but he can collect the interest from the man who made the mortgage and gave his personal bond to secure it. Now, in some cases that man may be a poor, unfortunate fellow who has a few hundred dollars invested in that mortgage. Is not that a great hardship upon the man who made the original guaranty?

Mr. NELSON. No; the man who sells the land subject to the mortgage can easily protect himself at the time of selling it.

Mr. CALDER. I am assuming that this is a mortgage made before the war.

Mr. NELSON. It depends on how he sold it—whether he sold it subject to the mortgage, or whether he made the purchaser guarantee the payment of the mortgage.

Mr. CALDER. Having some knowledge of real-estate mortgages in the large cities of the country, I know of tens of thousands of cases in the city of New York where people have bought small homes of the value of five, six, or seven thousand dollars, and have given a mortgage back for half of its value. Subsequently they have sold the property subject to the mortgage. That is quite a common practice in New York City. The purchaser enters the military service. The mortgagee can collect the interest from the original drawer of the mortgage, who has no relief that I can see under the terms of this measure. Ought not something be done to have the Government take the obligation off his hands? Is it just that we should enact legislation that will require a man, under those circumstances, to stand the burden?

Mr. NELSON. It is no more unjust in his case than it is in the other case. We are protecting the soldiers, and in a certain measure this bill will prove a burden. It will prove a burden on all creditors, because it will delay the collection or the enforcement of their obligations; but this is a burden that we ought to stand in behalf of our soldiers, because the burden they bear is relatively light compared with the burdens that are borne by the soldiers in the trenches.

Mr. CALDER. If the Senator will permit me, I quite agree with the principle; but I would have the measure arranged in some way by which, instead of having the burden fall upon and perhaps destroy a man of very moderate means who happens to have originally owned property and gone on the bond of a mortgage, it will fall upon the Government.

Mr. NELSON. Would the Senator have the Government pay it?

Mr. CALDER. I would have the Government relieve the man who made the mortgage originally, who now has no interest in the property, and who ought not to be held accountable.

Mr. NORRIS. Mr. President, will the Senator yield there?

Mr. NELSON. Certainly.

Mr. NORRIS. I should like to say, in reference to the suggestion made by the Senator from New York, that in the case he puts if there had been no war, if the man had remained at home and had not been a soldier, the holder of the mortgage could disregard him, if he wanted to, and sue the original mortgagor.

Mr. CALDER. Undoubtedly.

Mr. NORRIS. So he would be in the same position now that he was before. The other man could sue him if he wanted to. He could not be required, first, to exhaust the second owner of the property. Under the law as it stands to-day, without any war, he can entirely ignore that transfer of property, if he wants to, and sue the first signer of the note on his note.

Mr. CALDER. Undoubtedly he could.

Mr. NELSON. I want to say to the Senator that unless the purchaser buying the land that is mortgaged assumes in the instrument of conveyance the obligation of the mortgage, and agrees to it, he is not personally holden in any case.

Mr. CALDER. The Senator states the case correctly; but——

Mr. NELSON. He is not personally holden in any case; and even if there were no war, as the Senator from Nebraska has well said, if the purchaser fails to take care of the mortgage, the payee of the note can go on and enforce the obligation regardless of the war.

Mr. OVERMAN. Mr. President, will the Senator yield to me?

Mr. NELSON. Certainly.

Mr. OVERMAN. A representative of these great mortgage companies from the Senator's State of New York came before our committee, and at his suggestion we put in this amendment, which, I think, will cover the case referred to by the Senator:

Whenever, pursuant to any provision of this act, the enforcement of any payment or the performance of any act is stayed, postponed, or suspended, or the entry or enforcement of any judgment or determination is stayed, postponed, or suspended, or liable to be set aside, then, with respect to the obligation or liability of any person who may be secondarily liable by reason of such contract or obligation, including guarantors, sureties, and indorsers, during the time of such stay, postponement, or suspension, or while such judgment or determination can be set aside, on the application of the person thus secondarily liable, by leave of court, such contract or obligation shall be construed as if such payment were not due or the time for the performance of such act had not arrived, provided that any interest falling due in the meantime be paid.

Mr. CALDER. That is correct, Mr. President. I have read the amendment to which the Senator refers, but the proviso at the end of that amendment is of such a character that the foreclosure will not be stayed in the case of a mortgage unless the interest is paid.

Mr. OVERMAN. I do not see it.

Mr. CALDER. The language is:

Provided that any interest falling due in the meantime be paid.

Mr. OVERMAN. Well, that is a small amount. It only refers to the interest. That was suggested, I think, by the representative to whom I have referred.

Mr. CALDER. I know it was, and I see it in the hearing; but, Mr. President, where the interest is not paid the obligation can be foreclosed.

That would seem to provide that the original guarantor will be required to pay the interest. He has no protection otherwise, and if this runs on for years it may destroy the man who in

good faith sold his property. He has no relief whatever. It seems to me that to that extent at least this measure will be unjust.

Mr. OVERMAN. The attorney the Senator knows to be a very prominent man, who represented the great mortgage companies, and it is his own suggestion.

Mr. CALDER. This language protects the savings bank and other concerns loaning money, but it does not protect the little fellow who purchases or builds a home and makes a mortgage for part of the purchase price and then subsequently disposes of the property. He may have only two or three thousand dollars of interest in the property; some one else takes the property over, and then he is compelled, even if the mortgage was made years ago, to take care of the interest charges while the soldier is at the war.

I submit it appears to me that the Senator in charge of this bill should prepare an amendment that will protect the little fellow who may become so badly involved.

Mr. BRANDEGEE. I do not see the hardship the Senator refers to. Why should not the man pay the interest if he has not paid the principal?

Mr. CALDER. But it is a man who has no further interest in the property that I am referring to. I purchase a piece of property from you and give you a mortgage on the property with an accompanying bond. I sell the property subject to the mortgage you hold against it. The man to whom I sell the property joins the Army or the Navy. Four years after I sold the property and before the mortgage is due he fails to pay the interest. You can not foreclose the property under the terms of this bill, but you can collect your obligation against the guarantor. Unless he pays interest he has no relief at all. That is the point I make.

Mr. BRANDEGEE. Of course, as the Senator from Minnesota [Mr. NELSON] says, this operates equally upon all. Why should that man be allowed to foreclose his mortgage or enforce contracts if other people are not allowed to enforce their contracts during the absence of the soldier? Judge Woodward said in this opinion:

> Yet it is impossible to separate this question of reasonableness from the actual circumstances in which the country found itself at the date of the law. Eleven States had seceded or revolted. * * * In the judgment of the President and Congress, * * * the occasion required an immense increase of the Army and the Navy.
>
> Now, if a stay of execution for three years would not be tolerated in ordinary times, did not these circumstances constitute an emergency that justified the pushing of legislation to the extremist limit of the Constitution? * * *

Of course it is a hardship to say that if a man owes you money you can not collect it for three years, you can not sue him for it for three years; but, as the Senator from Minnesota says, it is a hardship for the debtor to be dragged out of the country and put in the trenches in a foreign land, and you can not allow his creditors to go on and ruin him financially while he is away risking his life. Somebody has to bear a part of this burden besides the men in the trenches.

Mr. BORAH. Mr. President, as I understand the proposition of the Senator from New York, I do not know that I am clear about it, but what he complains of is that the stay is not sufficiently wide in all its purposes as a stay in the proceedings as to the collection of debts against a man who has stepped out from under the obligation of the mortgage, in a sense, by selling the property. It is not the fact that it does stay it, but it is the fact that it does not stay it as against that man. If the soldier has gone to the war and left property behind, you can not proceed against it. Should there not be a clause inserted in the bill that you could not proceed to enforce the law against the first party who was interested in the stay and who stepped out by reason of selling the mortgage?

Mr. OVERMAN. That is a question of law, and I ask the Senator if the courts would not hold that the delay of the principal would not delay the mortgage. I think we have taken care of that situation.

Mr. BORAH. If you have taken care of that it is what the Senator from New York wants taken care of.

Mr. OVERMAN. As a matter of law would it not be taken care of anyway in case the principal is protected? Would not that protect the mortgagor, the indorser, or the insurer in law?

Mr. NELSON. The Senator from Idaho [Mr. BORAH] is a very good lawyer and he knows if the court grants a stay after the mortgage given to secure a note, if you want to stay a portion of the mortgage he has to stay the note also. My opinion is that it will operate on both. If the court stays the enforcement of a real-estate mortgage that implies a stay of the note as well as of the mortgage. One is a part of the other.

Mr. BORAH. Is there not a clause in the bill which excepts from the operation of it a legal stay of interest?

Mr. NELSON. Yes; there is such a provision here.

Mr. BORAH. That is what the Senator from New York is complaining of.

Mr. NELSON. If the Senator will examine the part of the bill that has been quoted in italics I do not think it covers the class of men the Senator from New York refers to, because the man who signs the note accompanying the mortgage in the first instance is neither mortgagor nor surety of any kind, and he does not come under that paragraph at all.

Mr. CALDER. He is the guarantor of the mortgage.

Mr. NELSON. No, sir.

Mr. CALDER. He gives a bond to accompany the mortgage, agreeing to pay the mortgage.

Mr. NELSON. That is a personal obligation. That does not guarantee anybody in the first instance. He owns a piece of land. He gives a note and a mortgage bond with the mortgage. As security for his note he gives a mortgage on the land and he is neither guarantor nor surety, and when he sells the land subject to the mortgage there is no guarantee. He does not guarantee to pay the mortgage.

Mr. BORAH. He is still liable on the note. Selling the land does not relieve him from the note.

Mr. NELSON. He is liable on the note?

Mr. BORAH. Exactly.

Mr. NELSON. And if there is a collection of the mortgage it operates as a stay of the note.

Mr. BORAH. I think that is correct. As I understand this language it excepts from legal——

Mr. NELSON. But I claim this paragraph does not apply to those cases, as the Senator will see if he will read it, because the man who signs the mortgage in this case is neither guarantor, surety, or indorser. He is a principal on that note. If the Senator from Idaho will read it, he will see that the case the Senator from New York puts does not come under that category.

Mr. BORAH. I am inclined to agree with the Senator from Minnesota.

Mr. CALDER. If the Senator from Minnesota is correct in his conclusion, then I have no further complaint.

Mr. NELSON. Undoubtedly, if the Senator will read it and stop to reflect a minute, he will see. Let me put a case. Suppose the Senator owns a piece of land and borrows a thousand dollars from me. He gives his note and a mortgage to secure it. Then, after he has done that, he sells that land, subject to the mortgage, to my friend from Idaho. That is all there is in the transaction. What are you in that case? You are simply the maker of the note—neither a mortgagor nor surety nor an indorser. You are nothing but the principal on that note, and so this provision does not apply.

Mr. CALDER. If the Senator is correct in that, I am satisfied; but it would be most unjust if from the man who made the original mortgage and gave his bond to insure collection there is to be collected interest on it and he has no recourse afterwards.

Mr. NELSON. If you would assume the property subject to the mortgage, if you guaranteed in the deed the payment of the mortgage, then you would come under this provision. That is not the case the Senator puts.

Mr. CALDER. There are very few such mortgages.

Mr. NELSON. You are neither a guarantor nor a surety nor an indorser. You are a principal in respect to that note.

Mr. CALDER. I hope the Senator is correct about it, and I have no doubt he is, if he says so, because he has had large experience in matters of this kind. I have been very anxious that in preparing a measure of this kind you should not destroy some poor, unfortunate people who are interested in property, who have given a mortgage at the time of the purchase, and are then compelled to pay interest on the mortgage when the soldier could not do so.

Mr. NORRIS. If the Senator will permit me, I should like to say to him that in the illustration he gives to the Senator from Idaho [Mr. BORAH] of the purchase of property subject to a mortgage, and when a man has gone into the Army he could not foreclose the mortgage, and if he undertook to do it there would be a stay on the note and mortgage both, he does not want to foreclose a mortgage. He can ignore the mortgage entirely. He has the note of the original mortgagor and can go into court and sue on that note without saying anything about the mortgage. If the case put by the Senator was good and the Senator from Minnesota wanted to get his money right away, instead of foreclosing the mortgage he would bring a civil action on the note against the Senator, and I do not see how he would be relieved from the payment of that note.

Mr. BORAH. Does the Senator from Nebraska understand that you can proceed to sue upon a note and waive the security under such a condition as that?

Mr. NORRIS. No; my understanding is that if a man holding a note secured by a mortgage desires, he can commence an action on the note, just the same as though there had been no mortgage given, and he can prosecute it to judgment and collect it without regard to the mortgage proper; that the mortgage is only a security, and he does not even avail himself of it if he does not want to do so.

Mr. NELSON. If there is a statute permitting it, that may be true; but under the general principles of equity and under the general provisions that govern courts of equity in these matters he must exhaust his security first.

Mr. NORRIS. Yes, if the statute requires it. Of course I do not doubt that the statute could require that in the case of a note secured by a mortgage he would have to exhaust the property first; but, as a matter of fact, unless there was some affirmative requirement, I do not see any reason why he could not go into court and sue on a note without saying a word about the mortgage. It would not be any defense for a man to say that a note was secured by a mortgage.

Mr. BORAH. Mr. President, the section to which the Senator from North Carolina refers is section 103, which provides:

SEC. 103. Whenever, pursuant to any provision of this act, the enforcement of any payment or the performance of any act is stayed, postponed, or suspended, or the entry or enforcement of any judgment or determination is stayed, postponed, or suspended, or liable to be set aside, then, with respect to the obligation or liability of any person who may be secondarily liable by reason of such contract or obligation, including guarantors, sureties, and indorsers, during the time of such stay, postponement, or suspension, or while such judgment or determination can be set aside, on the application of the person thus secondarily liable, by leave of court, such contract or obligation shall be construed as if such payment were not due or the time for the performance of such act had not arrived, provided that any interest falling due in the meantime be paid.

I believe the Senator from Minnesota is correct in his construction that the party would not be guarantor or surety. In popular parlance, he might be so regarded, but in law he would not. However, the Senator from Nebraska states a different proposition, and that is whether the party in whom you are interested might not be proceeded against directly by the party suing upon the note and waiving the mortgage. My opinion is, without recent investigation, that under such circumstances the court would compel him, first, to exhaust his remedy upon the property, and if he could not exhaust his remedy upon the property by reason of the stay of proceedings the entire matter would be suspended until such time as he could.

Mr. CALDER. Another word on the subject, Mr. President. It would seem to be true, under the conclusion of the Senator from Idaho, that in a case of this character a proceeding might be taken to collect rent and other profits on real estate so that the interest might be paid before the original guarantor—the original maker of the mortgage—was called upon to pay.

Mr. BRANDEGEE. I think the Senator from New York, if I may be pardoned for saying so, is laboring under a misapprehension. This section applies only to those secondary liabilities—mortgagors, sureties, and indorsers. It has nothing to do with the original maker of the note or the original borrower. It simply provides that the person secondarily liable by reason of the contract may go into court and ask that the contract be considered as not falling due at that time, provided he pays the interest.

Mr. CALDER. I am anxious to do justice to the man secondarily liable. I do not want that man to be compelled to meet an obligation he ought not to be called upon to meet. If the lawyers in this body are certain in the matter, and I am not a lawyer, I shall say nothing further.

The PRESIDING OFFICER (Mr. POMERENE in the chair). The amendments of the committee which have been passed over will be stated.

The SECRETARY. On page 4, at the instance of the Senator from Delaware [Mr. WOLCOTT], the following amendment was passed over: In line 3, after the words "military service," insert "or with reference to a person secondarily liable under such right," so as to make the paragraph read:

(3) The term "person," as used in this act, with reference to the holder of any right alleged to exist against a person in military service or with reference to a person secondarily liable under such right, shall include individuals, partnerships, corporations, and any other forms of business association.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The SECRETARY. The next amendment passed over is, at the bottom of page 4, to insert a new section, as follows:

SEC. 103. Whenever, pursuant to any provision of this act, the enforcement of any payment or the performance of any act is stayed, postponed, or suspended, or the entry or enforcement of any judgment or determination is stayed, postponed, or suspended, or liable to be set aside, then, with respect to the obligation or liability of any person who may be secondarily liable by reason of such contract or obligation, including guarantors, sureties, and indorsers, during the time of such stay, postponement, or suspension, or while such judgment or determination can be set aside, on the application of the person thus secondarily liable, by leave of court, such contract or obligation shall be construed as if such payment were not due or the time for the performance of such act had not arrived, provided that any interest falling due in the meantime be paid.

The amendment was agreed to.

The next amendment passed over was, on page 9, line 15, after the word "others," to insert:

Where the person in military service is sued as a principal or as primarily obligated for any debt or damages, along with others who are sued as surety or as secondarily liable for such debt or damages, then such others not in military service may be proceeded against to final judgment if it shall be made to appear to the court that such person primarily liable has been adjudicated a bankrupt prior to the commencement of his military service.

The amendment was agreed to.

Mr. STERLING. On page 4, at the end of line 23, I move to amend by inserting the words "of competent jurisdiction."

Mr. OVERMAN. Mr. President, I think that is covered by the definition of the word "court" as being "any court of competent jurisdiction"; but if there is any doubt about it, I will accept the amendment.

Mr. STERLING. I hardly think it is covered. I should not have offered the amendment unless I thought it was not covered by the previous language of the bill.

Mr. OVERMAN. I will make no objection to the amendment.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. THOMPSON. Mr. President——

Mr. OVERMAN. One moment. I have not yet concluded offering amendments on behalf of the committee. I want to offer another amendment. In section 409, at the bottom of page 19, after the word "lien," on line 26, I move to add:

That before any loan or settlement is made the written consent of the Bureau of War-Risk Insurance must be obtained.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. OVERMAN. At the end of section 408, on the same page, I move to add the words "an insurer shall furnish semi-annual statements to the Bureau of War-Risk Insurance."

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. THOMPSON. Mr. President, I should like to ask the Senator from North Carolina, who is in charge of the bill, what provision there is in the bill, if any, for the protection of the rights of the plaintiff while he is in the military service in case there should be some defendant who desires to press him to a trial in his absence?

Mr. OVERMAN. The bill provides that wherever a plaintiff is absent the court will appoint an attorney to represent him and preserve his rights, in the discretion of the court.

Mr. THOMPSON. But the language of the bill seems to indicate that it applies all the way through to the defendant only. That objection could be met by the insertion of a very few words in section 201 to make it clear. I think there should be a provision to protect the plaintiff who has litigation pending. I have in mind now a case my firm has for a soldier, in which I have wondered how we could get his testimony in the prosecution of an action in which he is interested, the defendant now insisting upon a trial in his absence.

Mr. OVERMAN. The Senator means where a man sues a soldier?

Mr. THOMPSON. No; I mean where a soldier has sued some one else, where he may have a suit pending.

Mr. OVERMAN. In that case he would have a lawyer to represent him, I suppose.

Mr. THOMPSON. Certainly; but the question is, Is there any provision in this proposed law that will protect him in his civil rights in case a court should desire to force a trial in his absence? I think this is a highly important matter.

Mr. OVERMAN. In the case of a soldier who is at the front who is being sued or being pressed by the plaintiff in a case, I take it for granted he will have an attorney who will protect him, and the court would protect him without any provision in the bill. This is a stay law.

Mr. THOMPSON. That is true as to the defendant, but is not correct as to the plaintiff under the present language of the bill.

I can not understand why section 201 can not be amended so as to include the plaintiff as well as the defendant, so that the plaintiff, who may be at the front and who is prosecuting an action, might have the full protection of this proposed law.

Mr. OVERMAN. But the plaintiff is represented whenever he has a representative in court, and there is no use in seeking to protect him, because he is protected by his attorney.

Mr. THOMPSON. But supposing that the defendant in the action should try to force a trial in his absence and the court should feel inclined to permit it?

Mr. OVERMAN. He has a lawyer to protect him just as if he were present, and no court in this world would force a trial under those circumstances.

Mr. THOMPSON. I hope that is true, but for fear that there might be such a court, it does seem to me that in section 201 the plaintiff might just as well be protected as the defendant is protected and have the proceedings stayed on application, if he desires to do so. If the Senator will notice the language in section 201 he will observe that it provides—

That at any stage thereof any action or proceeding commenced in any court against a person in military service * * * may * * * be stayed.

If the language were "commenced by a soldier in the service or prosecuted against him" it would include both plaintiff and defendant. Then it would force the court, without any further consideration, to grant a continuance until the plaintiff, who may have a very important case, can be present in court. I can not see the force of any objection to such an amendment.

Mr. OVERMAN. Suppose an attorney were to make an affidavit that the plaintiff was in France and unable to be present, does the Senator suppose that any court would force an action to trial?

Mr. THOMPSON. I hope there is no such court, but I have had some difficulties along that line in the past, and I do not want to take any chances on it in the future. I do not see why the bill should not apply both to the plaintiff and the defendant in the stay of proceedings in their absence at the front.

Mr. WOLCOTT obtained the floor.

Mr. THOMPSON. Mr. President, in that connection, if the Senator from North Carolina does not see the importance of it, I desire to offer a slight amendment to section 201, which I hope he will accept, so that it will read:

That at any stage thereof any action or proceeding commenced in any court by or against a person in the military service * * * proceedings may be stayed.

I can not see what possible objection there could be to such an amendment. Will the Senator from North Carolina accept the amendment?

Mr. OVERMAN. I can not accept it.

Mr. THOMPSON. Then, Mr. President, I offer the amendment, if it is in order.

Mr. WOLCOTT. I was recognized, Mr. President.

The PRESIDING OFFICER. The Chair thought the Senator from Kansas [Mr. THOMPSON] had taken his seat, and the Chair recognized the Senator from Delaware.

Mr. THOMPSON. If the Senator from Delaware desires the floor, I certainly shall yield to him; but I had the floor.

Mr. WOLCOTT. Go ahead.

Mr. THOMPSON. No; the Senator may proceed.

Mr. WOLCOTT. Mr. President, I wish to offer an amendment to the bill. On page 9, line 3, I move to strike out the words "Vacate or" and to commence the paragraph with the word "Stay."

Mr. OVERMAN. I accept that amendment.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Delaware.

The amendment was agreed to.

Mr. THOMPSON. I offer the amendment I suggested a moment ago, namely, on page 7, section 201, line 20, to insert the words "by or" after the word "court." I think this amendment with another amendment on page 8 will take care of the situation I have in mind.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 7, line 20, after the word "court," it is proposed to insert the words "by or," so as to read:

Commenced in any court by or against a person in military service.

The PRESIDING OFFICER. Is there objection?

Mr. WOLCOTT. I call the attention of the Senator from Kansas to the fact that if the paragraph be amended as suggested by him at the point named, there will have to be another amendment suggested at the top of page 8.

Mr. THOMPSON. That is true. I have another amendment to offer to make it read properly.

Mr. WOLCOTT. So as to make the whole thought harmonious.

The PRESIDING OFFICER. Is there objection to the amendment of the amendment of the Senator from Kansas? If not, it is adopted.

Mr. THOMPSON. To make the section read properly, and to include both plaintiff and defendant, on page 8, in line 1, after the word "of," I move to insert the words "plaintiff to prosecute the action or."

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 8, line 1, after the word "of," it is proposed to insert the words "plaintiff to prosecute the action or."

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. THOMPSON. With these amendments it now makes it perfectly clear that its provisions apply to both the plaintiff and defendant in any action in court. I think the bill is very important as a war measure, and that there should be no objection whatever to its passage.

Mr. CALDER. Mr. President, I desire to make an inquiry of the Senator in charge of the bill regarding section 300, which deals with the matter of rent. The first paragraph of that section provides:

That no eviction or distress shall be made during the period of military service in respect of any premises for which the agreed rent does not exceed $50 per month, occupied solely for dwelling purposes by the wife, children, or other dependents of a person in military service, except upon leave of court granted upon application therefor or granted in an action or proceeding affecting the right of possession.

There is no doubt, Mr. President, that this is an excellent provision so far as it affects the soldier or the soldier's family; but I have wondered in reading over the provision how it might affect the small home owners throughout the land. In every village and city in the country there are many industrious working people who have saved a little money, have bought homes for two families, or perhaps own two little houses, in one of which the owner lives and the other he rents. In many cases there are mortgages on the property of perhaps 60 per cent of its value. As I understand, under the terms of this provision in the bill it will be impossible for the owner to collect the rent for the premises if for any reason the soldier finds he is unable to pay it. Am I correct in that, I will ask the Senator?

Mr. OVERMAN. In reply to the Senator I will call his attention to the second section, which provides:

(2) On any such application or in any such action the court may, in its discretion, on its own motion, and shall, on application, unless in the opinion of the court the ability of the tenant to pay the agreed rent is not materially affected by reason of such military service, stay the proceedings for not longer than three months, as provided in this act, or it may make such other order as may be just.

It leaves it in the discretion of the court to do what is right between man and man.

Mr. CALDER. I have read the paragraphs and sections following the one to which I have just called the Senator's attention.

Mr. NELSON. Mr. President——

Mr. CALDER. Just a moment, please.

Mr. OVERMAN. Paragraph 4 of section 300 also provides:

(4) The Secretary of War or the Secretary of the Navy, as the case may be, is hereby empowered, subject to such regulations as he may prescribe, to order an allotment of the pay of a person in military service in reasonable proportion to discharge the rent of premises occupied for dwelling purposes by the wife, children, or other dependents of such person.

Mr. CALDER. That is correct; I have observed the provision to which the Senator refers; but let us assume that a soldier's family are living in a home for which they are paying $45 a month rent. The head of the family is drafted, as I know that some men have been drafted under the terms of the draft act, although they had wives and mothers to support, and finds himself unable to meet the rent. The soldier's income in the service amounts to about $45 a month, including his allotment, and he is paying $45 a month rent. An allotment may be made by the War or the Navy Department of $10 or $15 a month for rent. The man who has purchased a little home in good faith is compelled to stand the burden of that unpaid rent during the period of the war. I think the Government and not an individual should stand it——

Mr. OVERMAN. The exemption only extends over a period of three months.

Mr. CALDER. Some one should stand it, but it should not be the small home owner; it should rather be this great Government, which can afford to do it, instead of the small home owner, who is struggling to accumulate a little property.

Mr. OVERMAN. I presume the Senator knows the owner will not have to stand the burden during the period of the war, but only for three months at the outside.

Mr. CALDER. There is a hardship even in that to a person of small means.

Mr. OVERMAN. There may be some hardship involved here; I have no doubt about that; but this measure is designed to take care of the soldiers.

Mr. CALDER. I will say to the Senator that I sympathize completely with the object he is endeavoring to accomplish in

this measure; it is a most commendable bill, and I am going to vote for it; but I think these little matters to which I have called the Senator's attention should be considered, believing that the Government should meet these burdens, rather than the people who are themselves making a struggle for existence.

Mr. WOLCOTT. Mr. President, may I call to the attention of the Senator from New York the fact that even in the extreme case the Senator has just put there would not be visited such a great hardship upon the owner of the premises. I do not know upon what statistics the fact has been deduced, but it appears in the testimony that three months of rents, ordinarily speaking, represent just about the amount of profit that comes to the landowner from a year of tenancy. If that be true, if there is a loss of rent for the extreme period of three months, the only thing that is taken from the landowner is what might be called profit, and certainly that can not be said to be a severe hardship.

Mr. CALDER. I will say in reply to the Senator that in the case of thousands—yea, tens of thousands and perhaps hundreds of thousands—of little home owners throughout the land even the holding out of a month's rent may imperil their ability to meet their obligations to those to whom they owe interest on their mortgages and their ability to meet the taxes imposed by the city authorities. While I am in sympathy with the idea of taking care of the soldier, I am also in sympathy with the frugal workingman who has accumulated a little money and put it in a home, and whom it seems the Government is about to ask to bear a burden which the Government itself ought to bear.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The question is, Shall the bill pass?

Mr. OVERMAN. On the passage of the bill I ask for the yeas and nays, having been requested to do so by several Senators who are absent and who desire to be recorded.

The PRESIDING OFFICER. The Senator from North Carolina demands the yeas and nays on the passage of the bill.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. TILLMAN (when his name was called). I transfer my pair with the Senator from West Virginia [Mr. GOFF] to the Senator from Louisiana [Mr. BROUSSARD] and vote "yea."

The roll call was concluded.

Mr. GRONNA. I wish to announce that the Senator from Wisconsin [Mr. LA FOLLETTE] is absent on account of sickness in his family. If present, he would vote "yea."

Mr. JAMES. I have a general pair with the junior Senator from Massachusetts [Mr. WEEKS], which I transfer to the senior Senator from Arkansas [Mr. ROBINSON] and vote "yea."

Mr. PENROSE (after having voted in the affirmative). I observe that the senior Senator from Mississippi [Mr. WILLIAMS] has not voted. I have a general pair with that Senator, but I am informed that were he present he would vote "yea." As I have already voted "yea," I will permit my vote to stand.

Mr. HARDING (when his name was called). I have a general pair with the junior Senator from Alabama [Mr. UNDERWOOD]. I am informed that if he were present he would vote as I shall vote. Therefore I am at liberty to vote. I vote "yea."

Mr. FRELINGHUYSEN. I have a general pair with the junior Senator from Montana [Mr. WALSH]. I am informed that he would vote as I intend to vote on this measure. I therefore vote "yea."

Mr. WOLCOTT (after having voted in the affirmative). I have a general pair with the senior Senator from Indiana [Mr. WATSON]. I observe that he has not voted. I transfer that pair to the junior Senator from Arkansas [Mr. KIRBY] and will let my vote stand.

Mr. MYERS. I inquire if the junior Senator from Connecticut [Mr. MCLEAN] has voted?

The PRESIDING OFFICER. He has not voted.

Mr. MYERS. I have a pair with the junior Senator from Connecticut, which I transfer to the Senator from Illinois [Mr. LEWIS], and vote "yea."

I wish also to announce that my colleague [Mr. WALSH] is necessarily absent on account of illness. He is paired with the Senator from New Jersey [Mr. FRELINGHUYSEN]. If my colleague were present, I am satisfied that he would vote "yea."

Mr. BECKHAM. Has the junior Senator from West Virginia [Mr. SUTHERLAND] voted?

The PRESIDING OFFICER. He has not voted.

Mr. BECKHAM. I have a pair with that Senator, which I transfer to the Senator from Nebraska [Mr. HITCHCOCK], and vote "yea."

Mr. GERRY. I desire to announce that the Senator from Mississippi [Mr. WILLIAMS] and the Senator from Arkansas [Mr. ROBINSON] are detained by illness.

Mr. FLETCHER. I wish to announce that the members of the Military Affairs Committee are detained on official business.

Mr. THOMPSON. I desire to announce that the Senator from Illinois [Mr. LEWIS] is detained on official business.

Mr. CURTIS. I wish to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from New Mexico [Mr. FALL] with the Senator from Wyoming [Mr. KENDRICK]; and

The Senator from Pennsylvania [Mr. KNOX] with the Senator from Oregon [Mr. CHAMBERLAIN].

The result was announced—yeas 65, nays 0, as follows:

YEAS—65.

Ashurst	Henderson	New	Smith, Mich.
Beckham	Hollis	Norris	Smith, S. C.
Borah	James	Nugent	Smoot
Brandegee	Johnson, Cal.	Overman	Sterling
Calder	Johnson, S. Dak.	Penrose	Stone
Cummins	Jones, N. Mex.	Phelan	Swanson
Curtis	Jones, Wash.	Pittman	Thomas
Dillingham	Kellogg	Poindexter	Thompson
Fletcher	Kenyon	Pomerene	Tillman

Colt	Kirby	Robinson	Weeks
Culberson	Knox	Saulsbury	Williams
Fall	La Follette	Smith, Ga.	
Fernald	Lewis	Sutherland	
Goff	McLean	Underwood	

So the bill was passed.

ADDITIONAL JUDGE, SOUTHERN DISTRICT OF FLORIDA.

Mr. FLETCHER. Mr. President, on the call of the calendar yesterday I was necessarily absent on account of a hearing before the Committee on Commerce. That committee has been engaged for some weeks in investigating the Shipping Board. In my absence a bill came up and was passed over which I should like to ask unanimous consent to consider at this time. It is Senate bill 1735, to create an additional judge in the southern district of Florida.

The PRESIDING OFFICER. Unanimous consent is asked for the consideration of the bill referred to by the Senator from Florida. Is there objection? The Chair hears none.

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 1735) to create an additional judge in the southern district of Florida, which had been reported from the Committee on the Judiciary with an amendment.

Mr. SMOOT. Mr. President, yesterday I asked that this bill go over, as I thought there was no one in the Chamber who could explain it satisfactorily. Besides, the acting chairman of the committee made the statement that he believed the committee was unanimous in reporting the bill creating an additional judge for the State of Arizona, but was not unanimous in reporting the bill now under consideration. For that reason I asked that the bill go over.

I should like to ask the Senator from Florida now, in view of the fact that nearly every State in the Union is getting additional judges, whether there is any real necessity for the creation of another judicial district in Florida?

Mr. FLETCHER. Mr. President, in answer to the Senator's inquiry I will say that in the first place I believe the Senator from North Carolina [Mr. OVERMAN], who answered the Senator's question yesterday, was not in the committee room when the bill was acted upon; but there was no dissent in the committee from recommending the passage of this bill. It comes here with the approval of the committee as a whole. This bill was discussed at the same time that the bill of the Senator from Arizona was discussed. I will say that his plea in support of his own bill was used by me in supporting this bill, and it makes a showing that the judicial business in the southern district of Florida far exceeds the business in the whole State of Arizona. I am not saying this by way of criticizing the action there. I think it was entirely right. In fact, I was a member of the subcommittee that reported in favor of that bill.

I think they undoubtedly need the judge in Arizona; but certainly the additional judge in the southern district of Florida is needed to even a greater extent than the additional judge in the State of Arizona.

To call this the southern district of Florida is really a misnomer. Instead of the southern district of Florida it would better be called the eastern district, because it takes in the entire east side of the State. The State is really divided in a north-and-south direction instead of an east-and-west direction.

The territory embraced in this district extends over 500 miles, from the northern part of the State to Key West. The court is required to sit in five different places in that district. The business of the court has increased enormously in recent years, and it is utterly impossible for one judge to attend to the business of that court. The judge has not had a vacation in years. He is greatly behind in the civil docket. The bar associations of the district, the members of the bar, the judge himself, the court officials, and all, have appealed for this relief.

The bill does not create another district. It does not involve any expense other than the salary of the judge. It simply provides that there shall be an additional judge in that district, and it is absolutely necessary in order that the public business may be properly attended to.

Mr. BRANDEGEE. Mr. President, I should like to ask the Senator a question. I should think that in these extraordinary times, with the increase of the shipping business and the enormous extent of seacoast there in Florida, the admiralty business of that court would have increased very largely. I will ask the Senator if that is the fact?

Mr. FLETCHER. That is true; and in addition to that the legislation passed here in connection with the Army, the provisions of the draft law, and all those things add considerably to the business of that court.

Mr. STONE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Missouri?

Mr. FLETCHER. I do.

Mr. STONE. Who is the judge of the southern district of Florida?

Mr. FLETCHER. The present judge is Rhydon M. Call.

Mr. STONE. How long has he been the judge of the court?

Mr. FLETCHER. He was circuit court judge in the State for some 18 or 20 years. He has been judge of this court since 1912, I think.

Mr. STONE. Altogether, approximately, 25 years?

Mr. FLETCHER. Yes; precisely. He is not an old man. He is in vigorous health and strength. It is simply physically impossible for one man, no matter how strong he may be mentally and physically, to take care of the business of the court. There is not time enough.

Mr. STONE. I am not opposing the Senator's bill; but my State is interested in a bill of like kind, and I was just getting some comparisons for my own information, intending to vote for the Senator's bill, as I shall expect him to vote for the other one when it is brought before the Senate.

Mr. FLETCHER. I do not like to commit myself, Mr. President.

Mr. STONE. I am not asking the Senator to commit himself. I am not making any bargain with him. I am simply expressing the expectation that he will do it, and that there will be some reciprocity.

Mr. FLETCHER. I shall be very glad to give the Senator any information I can. The brief submitted by the Senator from Arizona is quite full and compares the business in various districts, and I think it includes Missouri. I am not sure. It does, however, happen to include the business of Florida by way of illustrating the enormous amount of business that these judges are required to attend to.

Mr. STONE. Then the whole ground upon which this additional judge is asked is that the business of the district has grown beyond the capacity of the present judge to attend to it?

Mr. FLETCHER. Precisely; yes.

Mr. THOMPSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Kansas?

Mr. FLETCHER. I do.

Mr. THOMPSON. Will the Senator state about how many cases are now pending, and about how far behind they are on the docket?

Mr. FLETCHER. I can not state the number of cases that are pending. I do not believe I have that data. The business transacted in Florida, in the southern district, is given in this brief, on page 8, as 357 United States civil cases, 439 United States criminal cases, and 391 cases to which the United States is not a party. I can not state exactly the number of cases that are pending, but some 1,622 cases were disposed of in 1913, 1914, 1915, and 1916.

Mr. THOMPSON. So that the court is a year or two behind?

Mr. FLETCHER. Yes.

Mr. TOWNSEND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Michigan?

Mr. FLETCHER. I do.

Mr. TOWNSEND. I have noticed what seems to me to be rather a growing tendency to increase the number of judges in the United States, and I am simply indulging the hope that they may be at least above the draft age, so that we shall not seriously interfere with the formation of an army such as it is necessary to send abroad. It occurs to me that at this time these matters are being brought forward in a manner that indicates to some of us, at least, that possibly something besides the good of the judicial service is in mind. I assume that the committee has acted in good faith; but it is difficult for some of us to understand why, in the cases that have been brought forward, it is necessary to create an additional office at this time.

Mr. FLETCHER. I will say in reference to that briefly, Mr. President, that this measure was pending long before we entered into the war. There has been a demand for some years past and the increased business put upon the court makes an addition necessary at this time.

Mr. THOMAS. Mr. President, I do not oppose the pending bill, but propose to vote for it, after the explanation of the Senator from Florida of the condition of the docket in his State, and he undoubtedly believes that an additional judge is necessary for the transaction of the business. For my part I do not believe it is necessary, to speak broadly, to increase the number of judges either in our State or in our Federal courts. The dockets are large, they are becoming larger, perhaps, and I believe that business can be transacted and transacted competently and capably if the judges will attend to their business as men in other departments of life are supposed to do. In my early years of practice it was the custom of the judges of the court in times of active business, and especially when a jury trial was to be had, to meet at 9 o'clock, adjourn for an hour for the midday meal, and then run until 6 or 7. By that means the dockets were rapidly cleared of business, and they seldom got ahead of the judges. Nowadays such a practice is, I think, virtually obsolete everywhere. The hours of court are generally from 10 to 12 o'clock and from 2 to 5, and during those hours much of the time is devoted to the consideration of objections and preliminary matters, which might better be disposed of arbitrarily than after discussion. As a consequence the dockets are getting ahead of the judges. The remedy is not more judges, but more work.

Of course, there are exceptions to all rules. There are a great many hard-worked judges in the United States. I have been requested a number of times to introduce measures for the appointment of an additional judge in my district. I represent a State having in round numbers a million people, and we have one judge, one district. When the docket becomes congested or threatens to become congested the circuit court of appeals assigns an additional judge from some other district to aid in the transaction of business, in consequence of which we keep along pretty well. The judge of the district court in my district at all times is fairly able to take care of the business of 1,000,000 people. He is a hard-working man, and I think he is doing it very well.

I noticed in the papers the other day that an effort is being made to increase the number of judges of the Supreme Court of the District of Columbia, so that business could be expedited. Mr. President, England transacts an enormous business in the courts, yet the number of judges in England are less than the judges in Illinois. When we consider that England has 40,000,000 people and Illinois six or seven million, we may draw our own conclusion as to the manner in which our judicial business is transacted.

We know that about the greatest misfortune, outside of war itself, that can befall a citizen is to be involved in some important litigation in these modern times. The mass of testimony that is taken, the number of appeals liable from court to court—those delays which Hamlet, I think, assigned as one justification for suicide and which were bad enough in his day but are ten times as bad now—are due not entirely to the courts, because the responsibility must be divided by the legal profession.

If we should give judges to understand that they must clear their dockets and that they can not expect Congress to go on appointing judges and judges for the purpose of transacting business which has accumulated and which has been retarded, I believe we would save ourselves a great deal of expense and

at the same time we would stimulate the judiciary of the country to endeavor themselves to transact business in the good old way.

Of course, there is the question of expense. The salary of one judge does not amount to much, but every little helps to increase the expenses which now, of course, we ought to minimize.

As far as this bill is concerned, I shall not oppose it; but as to the creation of additional judges, from now on, especially during the war, I for one shall do what I can to prevent it.

Mr. GALLINGER. Mr. President, it will be recalled that in the last Congress the senior Senator from Georgia [Mr. SMITH] very earnestly advocated a bill that proposed to create somewhere from 14 to 20 additional judges. The Senator was very insistent upon the passage of that bill, but it did not receive the sanction of the Senate.

Mr. SMITH of Georgia. Yes; it was passed by the Senate.

Mr. GALLINGER. Well, it passed the Senate, but did not become a law.

Mr. SMITH of Georgia. No; it was rejected in the House.

Mr. GALLINGER. I accept the correction, because that is accurate.

Now, Mr. President, I have been watching the trend of things since that time, and I am quite well satisfied that the purpose which was behind that bill is going to be secured in a different way. In place of appointing in one bill from 14 to 20 judges—there was some controversy as to the exact number—we are going to appoint that number in separate bills.

Mr. THOMAS. But not by wholesale.

Mr. GALLINGER. Yes; we have changed from a wholesale method of appointing judges to a retail method, and the same purpose, in my judgment, will be secured as was contemplated by the bill the Senator from Georgia so ably advocated.

But, Mr. President, in this particular case I observe that the Committee on the Judiciary has made what seems to be a unanimous report. At any rate there is no report from a minority of the committee. If the committee had divided and the minority of the committee had reported against this bill I should not vote for it, but as it comes here with the assent of the committee as a whole I shall not feel at liberty to vote against it. However, I want it to be understood that while I believe the creation of these additional judges in some instances may be very much needed, it is going to reach a point where it will become a very questionable matter. When one State gets an additional judge, another State not having perhaps as much business, or perhaps having more business, immediately thinks that that State ought to have an additional judge. I believe it is in contemplation to have one for the State of New Hampshire. It may be needed, I do not know whether it is or not, but it will become an epidemic, and, as I said in the beginning, the purpose the Senator from Georgia had in mind, and he was sincere undoubtedly in that purpose, will be accomplished in a different way.

Mr. SMITH of Georgia. Mr. President, the Senator from New Hampshire has referred to a bill the passage of which I urged during the last Congress. I desire to call attention to the differences between that bill and those that are now being presented.

The bill which I urged was predicated upon the theory that the average judge of 70 years of age was not fit to perform efficiently the work of his office, and it provided that wherever a judge had reached 70 years of age, unless the President found that he was capable mentally and physically of performing all the duties of his office, or rather I believe it provided where the President found that he was not mentally and physically capable of performing all the duties of his office, then the President should appoint an additional judge.

My own opinion is that that bill was improperly drawn in that respect. It cast the burden of finding that the particular occupant past 70 years was not prepared to do all the work of his office efficiently upon the President, and then he could appoint an additional judge. I think the rule should be that where a judge has passed 70 years the burden should be on him to show that he is still capable of performing the duties of the office, and I think the rule should be in the Federal court that where a judge has reached 70 years of age the President should appoint an additional judge in all cases, unless it is made to appear that the judge on the bench is still mentally and physically capable of performing the duties of the office.

My own interest in the bill had been produced especially by the condition of the circuit court of my circuit. We had had only two circuit judges for years to preside in the circuit court of appeals. One died a few months ago, pending that bill, at the age of 82. He had not been upon the bench for nearly 10 years, and we had been compelled to try our cases in the circuit court of appeals before two circuit judges and a district court judge. Since that time we had barely been relieved from that situation when another one of the circuit court judges, about 78 years of age, was stricken down by sickness. He has not been on the bench for nearly 12 months, and probably never will be again, and yet he will not retire and allow the appointment of an additional judge.

I believe the Federal judiciary would be strengthened if we followed the view suggested when we first had the bill up, and which was urged in our committee by the very able Senator from New York—Senator Root. He took the position that our bill ought to require whenever a judge had reached 70 years that a new judge should take his place, unless clearly it was shown that the judge past 70 could still perform all the duties of the office.

I believe the bill was a desirable measure, but would have been better had it gone to the extent I have suggested. I have not pressed it, because I thought it useless to take the time of the Senate with it if the House would not pass it; but I am ready to support such a bill whenever the opportunity is given, and I think it will strengthen the Federal judiciary. If I learn there is a reasonable prospect for its passage by the House, I will again bring the measure to the attention of the Senate.

Mr. SHIELDS. Mr. President, I am going to vote for this bill, and I am led to do so because my observation of the delays in court and the cost of the administration of justice in the courts of the country, both State and Federal, is different from that of the Senator from Colorado [Mr. THOMAS]. I practiced law for more than 20 years and I was upon the bench of the highest court of my State for about 12 years. I had considerable experience in the courts both at the bar and on the bench in that way. I was a country lawyer and practiced chiefly in the country, though I had some practice in the cities of my State. At that time I practiced in several counties and knew the manner of doing business in different circuits and in different courts. In Tennessee we have circuit courts which have law jurisdiction and chancery courts which have equity jurisdiction, both in the same territory. As a judge of the supreme court for about 12 years I found it necessary, as every member of the court did, to work about 14 hours a day in order to dispose of the business of the court and keep up with the docket, which the court did, trying from 1,000 to 1,100 cases in a year. We have about 12 chancery divisions and I think 18 judicial circuits in that State. Several of them were created while I was on the bench, and I observed the benefits to the public that accrued from it.

I believe that the cause of the delays of litigation grew more out of the insufficient number of trial judges than from any other cause, and for that reason I have supported every bill since I have been in the Senate to increase the number of trial judges. I found that where a lower court had more time to consider and deliberate upon the cases which came before it there were fewer appeals from that circuit and less work for the appellate court to do, but where the business was congested and the judge had more than he could do the cases were hurriedly tried and the majority of them appealed, and in many instances there were errors found in the record, for which they had to be reversed and sent back for another trial and the whole thing gone over again.

I repeat, the great trouble in this country which has caused more cost to litigants and more delays in adjudging the rights of litigants grows out of a want of a sufficient number of trial judges to give the cases that careful and deliberate consideration which they ought to have.

Mr. GALLINGER. Mr. President, I want the Senator from Georgia to understand that I did not mean to imply that his bill was not from his viewpoint a necessary and a good bill. The Senator argued it with great force and to the satisfaction of a majority of the Senate and it passed the Senate. But, nevertheless, I look with a great deal of suspicion upon the creation of additional judges unless the matter is inquired into with the greatest possible care as to the necessity of their appointment.

I wish that we had some method whereby a judge who was either physically or mentally incapacitated for the performance of his duties would be forced to resign at the age of 70 years, the age set by the Constitution at which he can resign if he sees fit to do so. I presume there are a good many such cases in the country, but I could not at the time the Senator from Georgia had his bill before the Senate bring myself to believe that the exigency was such that we ought to place in the hands of the President the power to appoint such a large number of judges, retaining the incompetent judges upon the bench and

multiplying the number in that war—duplicating them, practically.

But as I said, Mr. President, this bill comes here with the indorsement of the Committee on the Judiciary, composed of members of both political parties; and that being the fact, and there being no minority report, I do not feel that it is my duty to vote against it, and I shall support it.

The PRESIDING OFFICER (Mr. HOLLIS in the chair). The question is on the amendment of the Committee on the Judiciary, which will be stated.

The amendment was, on page 1, line 7, to strike out the words "term of office," before the word "compensation," so as to make the bill read:

Be it enacted, etc., That the President of the United States be, and he is hereby, authorized and directed, by and with the advice and consent of the Senate, to appoint an additional judge of the district court of the United States for the southern district of Florida, who shall reside in said district, and whose compensation, duties, and powers shall be the same as now provided by law for the judge of said district.

SEC. 2. That this act shall take effect immediately.

The amendment was agreed to.

The bill was reported to the Senate as amended and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ADJUDICATION OF PRIVATE CLAIMS.

Mr. SMITH of Georgia. I move that the Senate proceed to the consideration of Senate bill 1795.

Mr. GALLINGER. Let the bill be read by title.

The PRESIDING OFFICER. It will be read by title.

The SECRETARY. Order of Business 202, a bill (S. 1795) to relieve Congress from the adjudication of private claims against the Government.

Mr. GALLINGER. Mr. President, this is an important bill, and we ought to have more Senators present. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from New Hampshire suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Beckham	Henderson	Phelan	Thomas
Calder	Hollis	Poindexter	Thompson
Culberson	James	Ransdell	Tillman
Curtis	Johnson, S. Dak.	Shafroth	Townsend
Dillingham	Jones, Wash.	Sheppard	Trammell
Fletcher	McKellar	Shields	Vardaman
France	McNary	Smith, Ariz.	Warren
Frelinghuysen	Myers	Smith, Ga.	Wolcott
Gallinger	New	Smith, Md.	
Gerry	Norris	Smoot	
Hardwick	Overman	Sterling	

Mr. CURTIS. I desire to announce the absence of the Senator from Arizona [Mr. ASHURST], the Senator from Nevada [Mr. PITTMAN], the Senator from Oklahoma [Mr. OWEN], the Senator from Idaho [Mr. NUGENT], the Senator from New Mexico [Mr. JONES], and the Senator from North Dakota [Mr. GRONNA] on official business.

The PRESIDING OFFICER. Forty-one Senators have answered to their names. There is not a quorum present. The Secretary will call the roll of absentees.

The Secretary called the names of the absent Senators, and Mr. PITTMAN, Mr. REED, and Mr. SIMMONS answered to their names when called.

Mr. BANKHEAD, Mr. KENYON, Mr. WADSWORTH, Mr. KIRBY, Mr. JONES of New Mexico, and Mr. POMERENE entered the Chamber and answered to their names.

The PRESIDING OFFICER. Fifty Senators have answered to their names. There is a quorum present. The Senator from Georgia has moved that the Senate proceed to the consideration of Senate bill 1795. The Secretary will restate the title of the bill.

The SECRETARY. A bill to relieve Congress from the adjudication of private claims against the Government.

The PRESIDING OFFICER. The question is on the motion of the Senator from Georgia.

Mr. SMOOT. Mr. President, I believe if Senators knew the history of the provision that it is now sought to be repealed, commonly known as the Crawford amendment to the Tucker and Bowman Acts, they would not agree to any such proposition. The bill the Senator from Georgia has undertaken now to bring before the Senate has for its purpose the repeal of that amendment.

I want to call the Senate's attention to section 5 of the act of March 4, 1915, which reads as follows:

SEC. 5. That from and after the passage and approval of this act the jurisdiction of the Court of Claims shall not extend to or include any claim against the United States based upon or growing out of the destruction of any property or damage done to any property by the military or naval forces of the United States during the war for the suppression of the rebellion; nor to any claim for stores and supplies taken by or furnished to or for the use of the military or naval forces of the United States, nor to any claim for the value of any use and occupation of any real estate by the military or naval forces of the United States during said war; nor shall said Court of Claims have jurisdiction of any claim which is now barred by the provisions of any law of the United States.

This is the so-called Crawford amendment.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Colorado?

Mr. SMOOT. I yield to the Senator.

Mr. THOMAS. I think the Senator is perfectly right in his statement of the law; but the section which the Senator has just read was the result of an agreement or understanding, was it not?

Mr. SMOOT. I will say to the Senator that later I shall refer to that in detail; but shall content myself at this time with simply saying that there was an agreement to this provision.

Mr. THOMAS. That is my recollection.

Mr. SMOOT. I will quote the language of the Senator having the bill in charge. Mr. President, there is no Senator here who does not know that the claims which have been made against the Government of the United States under those two acts have been in some respects indefensible; in some cases it has been proven that the claims have been paid more than once; and in one case that the Government of the United States had paid three times for one building.

Before this amendment was adopted, and after I had served on the Claims Committee for some 10 years, I took occasion to secure information from the Treasury Department as to the number of mules the Government had paid for, and I was surprised, Mr. President, to find that we had paid for nearly as many mules as were ever used in the Civil War.

Mr. WOLCOTT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Delaware?

Mr. SMOOT. Yes; I yield to the Senator.

Mr. WOLCOTT. The Senator from Utah speaks of paying for mules "under those two acts." May I inquire to what two acts he refers?

Mr. SMOOT. I refer to the Bowman and the Tucker Acts. In the last claims bill we had under consideration, to which this amendment was adopted, there was a claim for $3,500 for a church in a little town in Arkansas. I received a letter from a leading citizen of that little town stating that there never had been a church and there was not at that date a church which had cost a thousand dollars, and yet the claimant was paid under that bill $3,500.

Mr. President, there were attorneys in Washington who every year took a trip to the South; that was their annual vacation. They would descend upon a city perhaps where no person had an idea that he had a claim against the United States Government and work up claims against the Government and have them presented to the Court of Claims through Congress under the provisions of the Tucker and Bowman Acts. There was one item in an omnibus claims bill, where the evidence showed a claim for some 481 fence rails; there was also a claim for eight hundred and some odd bushels of corn estimated as growing in the field, and there were some 15 or 16 pigs, as I remember. There was also a claim for so many hogsheads of tobacco. When I examined into the evidence I found that the sworn testimony was from a man who could not possibly have been more than 10 years old at the time the property was supposed to have been taken by our Government. Is it possible that a boy 10 years old could have known that there were exactly 481 fence rails destroyed?

Mr. GALLINGER. And that he should have remembered it for 50 years.

Mr. SMOOT. Yes; and that he should know, when he was only 10 years old, that there were eight hundred and some odd bushels of corn growing in the field as estimated by him?

Mr. OVERMAN. That bill was passed?

Mr. SMOOT. That bill was passed and the claim was paid.

Mr. President, it was just such abuses as those which caused even the Senators from the South to reach the conclusion that such legislation ought to cease at some time or other. When this omnibus claims bill was before the Senate, Senator Bryan was the chairman of the Claims Committee, and before the Crawford amendment had been adopted, an agreement had been reached that if that bill passed the Senate there would be no other omnibus claims bills presented to Congress.

Mr. SMITH of Georgia. Who made the agreement?

Mr. SMOOT. Well, I will say to the Senator from Georgia that members of the Claims Committee upon both sides of the

chamber had such a distinct understanding upon this question that I am surprised it is even questioned.

Mr. SHIELDS. Mr. President——

Mr. SMOOT. Just a moment, and then I will yield to the Senator. Senator Bryan made this statement to the Senate when the bill was under consideration:

Mr. President, this is perhaps the last omnibus claims bill that will ever be passed by Congress.

He based that statement, Mr. President, upon the fact that we had agreed that the Crawford amendment should be adopted to that claims bill. When that amendment was offered there was not a Senator upon the floor of the Senate who objected to it; there was no discussion whatever; it was adopted unanimously; and every Senator believed at that time that that was the last of these omnibus claims bills.

Now, I yield to the Senator from Tennessee.

Mr. SHIELDS. Mr. President, I was present at a late hour on the last day or night of the session of Congress when that bill was passed. I took a considerable interest in it, for a very large number of these claims was from my State, and I knew the history of the claims. I know that, as a rule, they were honest; that honest people were presenting them; and I supported the bill. Perhaps the RECORD will show that I discussed some claims that were allowed or disallowed. I think I was entirely familiar with what was going on at that time, but I never heard the suggestion that that claims bill should be the final one. I do not care whether there was an agreement of that kind of not; neither the Senator from Utah [Mr. SMOOT] nor the then Senator from Florida, Mr. Bryan, had a right to stand here and agree that the just claims of creditors of the United States should never be paid and that no legislation should be introduced for that purpose.

I did not make any objection to the Crawford amendment. Without any reflection upon any Senator, or upon ex-Senator Crawford, I was of the opinion that he stood there with that amendment and a number of others which he offered in order to talk that bill to death; and as we had that much reported here, after many years, of just claims, and believing in the justice of future Congresses, we were willing to accept his amendment rather than to see him talk the bill to death. That is the truth about the whole transaction, and everybody here in the Senate favoring that bill knew it.

Mr. SMOOT. Well, Mr. President, the Senator from Tennessee has stated his understanding of the Crawford amendment. I want to say to the Senate of the United States that for 10 years before this amendment was agreed to on that omnibus claims bill the advisability of repealing the law authorizing such claims to be presented to the Court of Claims had been considered by the Committee on Claims of the Senate. I think upon one occasion it was voted upon and defeated. What Senator who was here when that bill was passed but can remember the position that was taken by the then senior Senator from Arkansas, Mr. Clarke? Who criticized these claims more than he? He was in favor of fixing a time when these claims should cease, not that the Government of the United States was not willing to pay its just debts; but I undertake to say now, Mr. President, that the Government of the United States has not only paid every dollar of just debts against it for the destruction of property in the South during the Civil War, but that it has paid many hundreds of thousands of dollars more.

Mr. GALLINGER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from New Hampshire?

Mr. GALLINGER. Will it interrupt the Senator from Utah if I shall read exactly what the then Senator from Arkansas said when this matter was under discussion?

Mr. SMOOT. I am perfectly willing to yield to the Senator for that purpose.

Mr. GALLINGER. On December 16, 1910, a bill of this kind was under consideration, and the then Senator from Arkansas, now dead, made this observation:

Mr. CLARKE of Arkansas. Any moment Congress may refuse to pay these church claims and be within its rights. They are not preferred here as a matter of absolute legal liability. They are not brought here on the right or wrong of the proposition, but in the nature of benevolence, on the ground that the persons who were engaged in these vocations were not engaged in war.

Mr. GALLINGER. Does the Senator from Arkansas contend that the seven or eight hundred thousand dollars of southern claims involved in this bill are to be appropriated as a matter of benevolence?

Mr. CLARKE of Arkansas. Absolutely, so far as these church claims are concerned.

Mr. GALLINGER. Then we ought to stop it.

Mr. CLARKE of Arkansas. Stop it here and now, and I will vote with you.

Mr. SMOOT. That was five years before the passage of the bill to which I have been referring.

Mr. GALLINGER. Yes. On the 4th day of December, 1912, Mr. Clarke of Arkansas said:

I speak of claims for the destruction and consumption of property by the Army. I have said repeatedly that at this late day and time it is utterly impossible to get at the right of 1 per cent of them, and they are worked up by claim agents and constructive claimants, persons who are constructively and remotely interested in them.

Mr. SMOOT. Mr. President, when I first came to the Senate, not knowing the ins and outs of legislation here in Washington, I felt it my duty to admit every man who came to my office and to give him all the time he wanted in which to present his case. The result was that I was simply overburdened with claim agents; in fact, conditions got so bad that I would not have been able to do anything else if I had listened to the claim agents in Washington who were interested in presenting claims.

Mr. McKELLAR. Mr. President, will the Senator yield to me?

Mr. SMOOT. Yes; I yield to the Senator.

Mr. McKELLAR. All of these claims are prosecuted before the courts, and no claim is authorized to be paid unless a court having jurisdiction of the matter has passed in favor of that particular claim. Is not that true?

Mr. SMOOT. There are many claims that have been paid, as provided in omnibus-claims bills, that never passed through the Court of Claims.

Mr. McKELLAR. I differ with the Senator. I want to say to him that I am very familiar with the last omnibus-claims bill, and I think that is the only bill of that character that has passed here in many years—probably the only one since the Senator has been a Member of the Senate, however long that may be. In other words, the bill that was pending in 1910 was the bill that was finally passed in 1915; and I desire to say to the Senator, about that measure, that there were only two claims in it which had not been passed upon by the court, and they got in the bill by an amendment, I think, put on at this end of the Capitol. The House, however, only permitted to go upon the bill those claims upon which there had been a judgment existing against the United States Government for years.

Mr. WARREN. Not a judgment.

Mr. McKELLAR. It is substantially the same thing.

Mr. WARREN. A finding of facts.

Mr. McKELLAR. A finding of facts under the provisions of the acts providing for the adjudication of the claims. Of course, a judgment can not be given against the United States, as we all know; but, under the provisions of the law, the court had found in favor of the claimants and had found, as a matter of law and right, that they should be paid. Now, why should not the United States Government pay claims when its own courts have determined that they are just claims against the Government?

Mr. SMOOT. Mr. President, the Senator knows that the United States to-day has to depend entirely upon some attorney to look up the evidence in any given case, and the older the case the harder it is to find anyone that knows anything about it. The evidence is all one-sided; the claims are worked up; the evidence in many cases is manufactured; and in many instances the evidence submitted to the Court of Claims comes from people who, I know, could not have been more than 10 years old at the time the alleged property was taken.

Mr. President, the Court of Claims does not render judgment; it sends to Congress findings of fact, and I know that there have been claims paid under the provisions of omnibus claims bills when even upon the face of the findings of the court there was no justification for their payment.

The Senator from Tennessee says that the act of 1915 was perhaps the only omnibus claims bill that has passed Congress since I have been a Member of this body. Why, Mr. President, I have been a Member of the Senate for over 15 years; I was on the Claims Committee for the first 12 years of my service; I did my duty as a member of that committee, and served for a longer period than I would ever ask any Senator to serve upon that committee. Not only that, but I was conscientious from the beginning and carefully examined every claims bill. I knew them like I knew my A, B, C's, and when the old, hoary-headed things were presented at every succeeding session of Congress I knew that there was no justification for the payment of a great majority of them.

Mr. McKELLAR. I will ask the Senator if it is not a fact that they were based on the same judgments or substantially the same judgments that the court had rendered in times gone by and were the same claims that Congress had refused to pay after judgment had been rendered against the Government?

Mr. SMOOT. Mr. President, I presume the Senator does not know of the rule we adopted at this end of the Capitol.

Mr. McKELLAR. No, sir; I was not a member of this Chamber at that time.

Mr. SMOOT. I will tell the Senator of the rule we adopted. The Committee on Claims found that there ought to be some kind of limitation upon the reference of claims bills to the Court of Claims. So we agreed that each Senator should be allowed to refer two claims to the Court of Claims each year. That was the first agreement. Then, Senators insisted that there ought to be more than two; and finally we increased the number. I know, so far as my own experience goes, that southern Senators came to me and said, "You have none of these claims; allow me to take your share for the reference of claims in which I am interested to the Court of Claims. Those claims, Mr. President, were referred, and when the omnibus claims bill was passed nearly every one of them was found included in the bill, and, as I have said, many, many others.

Under omnibus claims bills there have been paid claims for no telling how much more than the real value of the property involved. I cited a moment ago the case of a church in Arkansas, in connection with whose claim I had a letter stating that there never was a church in that little town that cost $1,000, and yet we paid $3,500 for the destruction of one there. Why, Mr. President, we have actually paid claims to church organizations for throwing up earthworks, in order that our soldiers might protect themselves from attack.

Mr. McKELLAR. Has the Senator always entertained the view he now entertains about claims?

Mr. SMOOT. What view, I will ask the Senator?

Mr. McKELLAR. The view that all these claims are wrong.

Mr. SMOOT. I did not say that they were all wrong.

Mr. McKELLAR. I notice that in the last omnibus claims bill there was a claim for $4,078.75 allowed to one of the constituents of the Senator.

Mr. SMOOT. I think that is right. There was such a claim allowed.

Mr. McKELLAR. Well, the Senator did not think that that was wrong, did he? The courts of the land had passed on the validity of that claim, which was that of Martin C. Fox, of Salt Lake City. The Senator does not think that that claim should not have been paid, does he?

Mr. SMOOT. Mr. President, that claim came to the Senate like all other similar claims come.

Mr. McKELLAR. Yes, sir.

Mr. SMOOT. And does the Senator think that, as a representative of the State of Utah, I was going to ask to have eliminated from the bill the claim because the claimant once lived in Utah—whose claim came in as all other claims come in?

Mr. McKELLAR. No; I think the Senator was exactly right in being for that claim, in standing by the court that allowed the claim, and in voting for the bill that permitted the claim to be paid, as I understand the Senator voted for the omnibus claims bill that passed on March 4, 1915.

Mr. SMOOT. Mr. President, I do not know whether I voted for the bill or not; I do not think the roll was called; but I know that I spoke against a number of the claims in that bill, and I want to say that that bill never would have passed the Senate without section 5 being incorporated in it. The bill carried an appropriation of nearly $2,000,000.

Mr. KENYON. Mr. President, I desire to ask the Senator if he will not again read section 5? In the light of his remarks I think we can understand it better now.

Mr. SMOOT. Very well; it is as follows:

That from and after the passage and approval of this act—

That is the act of March 4, 1915, the omnibus claims bill—

the jurisdiction of the Court of Claims shall not extend to or include any claim against the United States based upon or growing out of the destruction of any property or damage done to any property by the military or naval forces of the United States during the War for the Suppression of the Rebellion, nor to any claim for stores and supplies taken by or furnished to or for the use of the military or naval forces of the United States, nor to any claim for the value of any use and occupation of any real estate by the military or naval forces of the United States during said war; nor shall said Court of Claims have jurisdiction of any claim which is now barred by the provisions of any law of the United States.

Mr. KENYON. May I ask the Senator another question?

Mr. SMOOT. Certainly.

Mr. KENYON. Subsequent to the passage of that provision were a large number of cases dismissed in the Court of Claims?

Mr. SMOOT. There were large numbers of cases before the Court of Claims which had been referred.

Mr. KENYON. And they were dismissed?

Mr. SMOOT. Many before and many after the passage of that act.

Mr. KENYON. And if the pending bill passes it will revive those cases?

Mr. SMOOT. All of these cases.

Mr. THOMAS. And a great many more.

Mr. GALLINGER and Mr. WARREN addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Utah yield; and if so, to whom?

Mr. SMOOT. I yield first to the Senator from New Hampshire.

Mr. GALLINGER. The Senator from Utah might well put in the RECORD the statement—and, with his permission, I will put it in myself—that the bill to which the Crawford amendment was attached carried 1,032 claims.

Mr. SMOOT. And $1,987,000, as I remember.

Mr. GALLINGER. That was 50 years after the war. They had found in some way 50 years after the war that 1,032 claims had not been paid for this class of property. They had been looking for these claims for 50 years, and at the end of 50 years they discovered that there were 1,032 that had been overlooked, and the Government paid them; and some of us yielded our opposition to this bill because of the fact that the Senators on the other side of the Chamber were willing to accept the amendment which has been read.

That is the history of the matter.

Mr. WARREN. Mr. President——

Mr. SMOOT. I yield to the Senator from Wyoming.

Mr. WARREN. In response to the inquiry of the Senator from Iowa, I will state that at one time, some 10 years ago, perhaps, the accumulation of cases before the Court of Claims under the Tucker Act was very large, particularly cases brought by attorneys who did not proceed to prosecute their claims or perfect them. A change in Court of Claims attorneys brought into office an advocate for the Government who believed that those claims should be either prosecuted or stricken from the Court of Claims docket; and I think something over 5,000 were stricken off at one time, and others followed.

There has been an inquiry as to the number of these so-called omnibus bills. I will take but a moment, if the Senator from Utah will allow me.

Mr. SMOOT. Yes; I shall be glad to have the Senator continue.

Mr. WARREN. When I returned to the Senate in 1895 the fact was brought before me that a great many of these supplies claims were unpaid, embraced in bills that had passed the Senate repeatedly as separate claims, and some had passed the House, and also there were the unpaid French spoliation claims. I offered an amendment to the regular annual deficiency bill to pay some three-quarters of a million dollars of French spoliation claims, and the Senator from Tennessee, Mr. Harris, amended my amendment by attaching southern claims of about the same amount. The matter went on and was allowed in the deficiency bill. There had been trouble at various times with regard to covering deficiency bills with claims, notwithstanding the Senate rule against that practice. Following that there were further attempts, and in one year, under the administration of President Cleveland, when there was a veto of sundry bills, the river and harbor bill among others, the deficiency bill was vetoed because it had on it several hundred thousand dollars of these claims. Senator Hale, then in charge of that bill, proposed that the Committee on Claims—of which at the time I was a member and the Senator from Colorado, Mr. Teller, was the chairman—in order to get comparative peace and to get the deficiency bills through, and to get matters smooth again between the Executive and the Senate, which was about to adjourn, at the end of a session should employ sufficient help to make an index of claims, and to bring in an omnibus bill covering claims that had passed either the House or the Senate, and some of which had passed both, but not contemporaneously; and so the committee proceeded along that line.

The first bill of that kind, amounting to about $9,000,000, was introduced by Senator Teller before he left the committee. I am frank to say that it was prepared with some haste, and, while I made no outcry against it, I felt that we could hardly get it all through. It went over to the House and was cut down there—also in conference—and finally it went through in the sum of three or four million dollars.

About that time I became chairman of the committee, and we followed as nearly as we could the principle of taking bills that had passed the scrutiny of the committees of both Houses, and I think during my incumbency we passed three omnibus bills of about three to five million dollars each. I remember that in one instance it affected several thousand people. I would not like to say positively that it was 17,000, but it runs in my mind that it affected about 17,000 persons, because in many cases, or claims, whole families, and indeed whole communities, would be represented in one compound claim.

These bills were very largely made up of southern claims, with a few of the French spoliation claims and a few of the ordinary later-date claims. From that time there seems to have been a

lapse of some years in omnibus-bills legislation, when it was again taken up, and two or three bills were tried out and failed. I remember that Senator Fulton, of Oregon, failed with one; and Senator Crawford, if I remember rightly, with another; and the one now being alluded to was the next and last one.

It had been the intention of the committee, back there when we proposed these several bills, to bring the matter up to a point where we felt that we had covered the ground sufficiently. We thought that the Government could not longer protect itself in those isolated localities where it could hardly find witnesses. The court seemed to be overburdened with the task, and, differing somewhat from the statement of the Senator from Tennessee, the court simply stated the facts as they found them. There was no recommendation that the claims should be paid, as a general thing, and they were cases arising largely under the Tucker Act.

It was the intention, away back in those times—and it was the intention of all members of the Committee on Claims, without regard to locality—that there should be a time when these things should be discontinued. In fact, away back years before any man who now stands on this floor was a Member of the Senate, the door had been closed legally as many as three or four times to the further consideration of such claims. The Tucker Act, as well as the Bowman Act, grew out of that fact.

That is the situation, and it was for a long time considered that we must finally shut the door on this class of claims, as those remaining seemed to be very indefinite and with but slight evidence to support them. I know nothing of the particular agreement mentioned in this discussion, because it is some years since I have been a member of the committee, but that was the condition in early times.

Mr. McKELLAR. Mr. President, I will say to the Senator that there was a committee of four Members of the House that came over here to the Senate on the night of March 3, 1915, when this bill was passed. The committee was composed of Judge GREGG of Texas, Mr. BYRNES of South Carolina, Mr. CARLIN of Virginia, and myself. We were here when the bill passed; and, of course, our States being very largely interested in these claims, we took a very active interest in getting the bill passed as far as we could. I never knew of any agreement at all. Senator Crawford offered this as an amendment, and it was adopted; but I knew of no agreement. If there was any agreement, it was not disclosed to me at all.

Mr. REED. Mr. President, I presume the Senator from Utah intends to speak at some length upon the bill?

Mr. SMOOT. I will say to the Senator that the motion now is simply to take up the bill. I do not think I will speak more than 15 minutes longer upon it, and then a vote can be had upon taking it up.

Mr. REED. Very well. I was going to ask permission to take up a bill, and I was going to ask the indulgence of the Senate, because I felt it necessary to leave before very long; but in view of the Senator's statement I will not do that.

Mr. SMOOT. I will say to the Senator that if he wants to proceed now I am perfectly willing to yield the floor, and then resume it after the Senator is through.

Mr. GALLINGER. Mr. President, will the Senator from Utah yield to me?

Mr. SMOOT. Yes.

Mr. GALLINGER. It is proper that I should say to the Senator from Missouri that when the Senator from Utah concludes his observations against taking up the bill I shall occupy a little time along the same line, but not a great while. I shall have something more to say if the bill shall be taken up.

Mr. REED. Mr. President, the matter I have in mind is merely a private bill. I think it could be passed in five minutes by unanimous consent. I think a mere statement of it to the Senate will be sufficient; but if the Senator is going to conclude within anything like the time he states, I will not ask him to yield. After he concludes I will ask the Senator from New Hampshire to indulge me for the purpose I have stated.

Mr. GALLINGER. Which I will gladly do.

Mr. SMOOT. Of course, I would gladly grant the Senator's request at this time.

Mr. President, the statement was made the other day that Senators thought these claimants ought to have their day in court. Have they not had their day in court? Has there been any action by Congress to prevent them in any way from presenting their claim during the last 53 years? I say now that the great majority of all of the claims contained in the omnibus claim bill passed on March 4, 1915, were worked up by attorneys living in Washington. Until a law was passed limiting the percentage that could be charged by an attorney, these claim hunters charged, in some cases, as high as 75 per cent of the amount realized. I would not support legislation that would do an injury to any citizen of this country; but, Mr. President, there is no one but that must admit that every claimant against the United States under the Tucker and Bowman Acts has had ample chance for his day in court.

Mr. TOWNSEND. Mr. President——

Mr. SMOOT. I yield to the Senator from Michigan.

Mr. TOWNSEND. I have been very much interested in what has been going on, because I recall very clearly that I was a member of the Committee on Claims at the time this bill and other bills were prepared, and was a member of the committee of conference between the two Houses. The agreement as to that bill in the Committee on Claims was a compromise. I do not believe there were a half dozen Senators on the committee who believed that all of those claims, or even a majority of them, were justifiable. It was discovered that a claim 50 years old could be better proven than it could immediately after the war.

Mr. THOMAS. And one 75 years old could be better proven than one 50 years old.

Mr. TOWNSEND. Yes. It was very easy, under the methods that were employed, to establish claims. The question was discussed very fully by the committee as to when we were going to have an end of this class of bills, and there was an agreement had in the committee with the understanding that these claims would not be presented again. Of course it was well understood that we could not bind subsequent committees or subsequent Congresses; but the Senators from the South who were most interested in these claims without any hesitation acknowledged that it was time to quit this kind of business, and that these claims were of such doubtful value that they themselves would insist upon no further bills of the kind being introduced.

I have no hesitation in saying that that bill would not have passed if we had not felt that there was some binding force in that agreement; that the Senators from the South, representing the committee—and it was supposed that many of them would remain on the committee, and would therefore dominate it—would impress that feeling upon their successors, and that no similar bill would come up in the future. Therefore it was agreed that we should have a limitation placed upon these matters. The senior Senator from Mississippi [Mr. WILLIAMS], the senior Senator from Arkansas [Mr. ROBINSON], and others spoke on this floor in opposition to this kind of business, feeling that it was an organized raid upon the Treasury of the United States.

I was one of the Senators who believed in paying our debts. As the Senators on that committee will well understand, I voted for a good many claims because I thought possibly there was a shadow of doubt in the matter that should be resolved in favor of the claimants; but every such claim went into that bill. The others, I think almost without a dissenting vote in the committee, were set aside as being unworthy of consideration.

As the years go by, I repeat, it is easier to prove these claims. There is no way to dispute them, if we permit an ex parte trial, as there is in the court, practically. Of course the Attorney General or somebody representing the Department of Justice is supposed to represent the people, but he has a difficult job. These bills have been considered over and over since the war. The Congress has dealt very liberally with them. I think at this time it would be almost criminal for Congress to draw a million or two dollars out of the Treasury to pay these claims that have been repudiated when the facts were close at hand and the people understood what the situations were. Now, after a lapse of time, to revive these claims, to my mind, is absolutely unwarranted.

Mr. SMITH of Georgia. Mr. President, will the Senator from Utah yield to me for just a moment?

Mr. SMOOT. Yes; I yield to the Senator.

Mr. SMITH of Georgia. I want to say that this bill originated in the House. It was introduced by the Republican leader, Mr. MANN. It is known as the Mann bill. It passed the House at the last session of Congress and was referred to the Judiciary Committee, and I was appointed chairman of a subcommittee of the Committee on the Judiciary to consider it. That is the way in which I became connected with it. I do not know a constituent of mine who has a suit pending or who desires to bring a suit under this bill. I have not been appealed to by a constituent of mine to introduce a bill that would enable him to bring a suit.

Mr. TOWNSEND. Mr. President, I hope the Senator does not believe that I would be any more in favor of the bill because some Republican happened to advocate it. The facts are not changed by that circumstance.

Mr. SMITH of Georgia. I understand that; but the suggestion of the Senator was that southern Senators committed

themselves not to press this legislation further, and I wanted to show what the origin of this legislation was. It passed the House, and came to me in the way I have stated. I failed to get a hearing in the Senate at the last session, and I reintroduced it by request, and was again appointed chairman of the subcommittee; and I am going to do what I can to get the Senate to pass on it at this time.

So far as I am concerned, I would be perfectly willing to see this bill amended so as to allow no new suits to be brought, and limit its effect to the suits that have been pending and were pending when the Crawford amendment suspended the jurisdiction of the court. I really think that a man who has not brought his suit yet, with the opportunity that has been afforded to him, ought to show to Congress some special reason why he did not do it; and that amendment I myself would be perfectly willing to see placed on the bill. But as to those suits that are pending there, brought under authority of Congress, in some of which the parties have taken their testimony, but a good many of them have not, so that they would be abandoned forever, I think they ought to have their day in court.

Mr. THOMAS. Mr. President, will the Senator allow me to interrupt him for a moment for the purpose of inquiring why this bill should have gone to the Committee on the Judiciary instead of to the Committee on Claims, which was familiar with it and with its history, as has just been stated so succinctly by the Senator from Michigan?

Mr. SMOOT. Mr. President, we have a habit in the Senate now of introducing bills and referring them to the committee of which the Senator introducing the bill is a member. I do not say that that is the case with this particular bill, but I know that for 15 years this subject matter has been before the Claims Committee. We know it from A to Z. We have studied those claims until nearly every member of the committee knew them on sight.

Mr. TOWNSEND. Every one of them was briefed.

Mr. SMOOT. Yes; as the Senator says, every one of them was briefed.

Mr. SMITH of Georgia. Mr. President, the Mann bill was a bill which simply applied to judicial procedure; and the Vice President, or whoever was presiding, referred it to the Judiciary Committee when it came over from the House. So far as I can recollect, I never heard of it until I was made chairman of a subcommittee of the Judiciary Committee to look into it.

Mr. SMOOT. I do not care whether Representative MANN or any other living soul introduced the bill. The bill is not right. It never ought to pass. Why, for years in the Claims Committee, whenever the question arose, and when claimants were appealing to be heard on old claims that every member of the committee knew were unjust, we would always say, "Well, here is another pork-barrel measure."

Mr. KENYON. Mr. President, I should like to ask the Senator a question. Was there any report from the Judiciary Committee on this bill? I have not been able to find any.

Mr. SMOOT. There is none in my file.

Mr. SMITH of Georgia. There is no written report. There was a full report on the original bill in the House by the chairman of the committee. When we reported this bill at the last Congress we adopted that report, and we made no additional report.

Mr. KENYON. Was the Judiciary Committee unanimous concerning this bill?

Mr. SMITH of Georgia. I do not think there was any objection to it. Senator Sutherland, of Utah, served on the subcommittee at the last Congress. I think it was unanimous. I would not say positively that it was unanimous, but there was no——

Mr. KENYON. Did the Judiciary Committee really give it any consideration, outside of the subcommittee?

Mr. SMITH of Georgia. Yes; the subcommittee did.

Mr. KENYON. But did the Judiciary Committee, outside of the subcommittee, give it any consideration?

Mr. SMITH of Georgia. Not any lengthy consideration.

Mr. KENYON. I should judge not.

Mr. SMITH of Georgia. They were all familiar with the measure, though, it having been before them at a prior date.

Mr. SMOOT. I do not think any member of the subcommittee or full Judiciary Committee has studied this question as the Claims Committee has studied it, and perhaps the great majority of them knew nothing about what the repeal of section 5 really means.

Mr. President, this is no time to raid the Treasury of the United States. If the claims were just I would not object. I think, however, that every just claim has been paid by the Government of the United States, and some of them more than once.

Mr. President, I know that pressure has been brought to bear upon the Senator from Georgia and other southern Senators to have this matter opened again. Let the Senate of the United States now vote against taking up the measure. Defeat the proposition, and give the Senators a chance to tell the people who are crowding them to have this question opened up again that the Senate of the United States has spoken and the matter is sealed forever.

Mr. GALLINGER. Mr. President, the Senator from Missouri [Mr. REED] stated some time ago that he wished to take up a small bill. I do not see him present, however.

Mr. KENYON. If we are to vote on taking up this measure, I think we should have a quorum. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Dillingham	Jones, Wash.	Ransdell	Smoot
Fletcher	Kenyon	Reed	Thomas
Gallinger	McNary	Shafroth	Tillman
Gerry	Martin	Sheppard	Townsend
Henderson	Norris	Shields	Trammell
Hollis	Overman	Smith, Ariz.	Warren
James	Pomerene	Smith, Ga.	Wolcott

The VICE PRESIDENT. Twenty-eight Senators have answered to the roll call.

Mr. GORE, Mr. VARDAMAN, Mr. HALE, Mr. NEW, Mr. FRANCE, and Mr. PHELAN entered the Chamber, and answered to their names.

Mr. PHELAN. Mr. President, I desire to state that the Senator from Washington [Mr. POINDEXTER], the Senator from Virginia [Mr. SWANSON], and the Senator from Nevada [Mr. PITTMAN] are attending a session of the Committee on Naval Affairs, and that is the reason of their absence.

Mr. JONES of Washington. I move that the Senate adjourn.

The motion was agreed to; and (at 3 o'clock and 30 minutes p. m.) the Senate adjourned until to-morrow, Thursday, February 7, 1918, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *February 6, 1918.*

The House met at 12 o'clock noon.

The Rev. William Couden offered the following prayer:

O Lord, let us not forget Thy commandments, that our duties may be clear and all our relationships right. Make us ever mindful of Thy love, that our lives may answer Thy providence and grace with free, joyful, and complete service.

We praise Thee, O God, for the gift of Thy Son. May we all in unity of spirit strive to make our land and all other lands the home of the eternal principles of the Kingdom of Heaven which He came to establish among men. Amen.

The Journal of the proceedings of yesterday was read and approved.

EXTENSION OF REMARKS.

Mr. SHERWOOD. Mr. Speaker, I ask unanimous consent to print in the RECORD two brief resolutions, one by McKinley Post, of Canton, Ohio, and the other by General Canby Post, of Hood River, Oreg.

The SPEAKER. The gentleman from Ohio asks unanimous consent to extend his remarks in the RECORD by printing therein certain resolutions. Is there objection?

Mr. WALSH. Mr. Speaker, I object.

The SPEAKER. The gentleman from Massachusetts objects.

HOUSING EMPLOYEES EMERGENCY FLEET CORPORATION.

Mr. ALEXANDER. Mr. Speaker, I renew my request of yesterday that the bill (S. 3389) to authorize and empower the United States Shipping Board Emergency Fleet Corporation to purchase, lease, requisition, or otherwise acquire improved or unimproved land, houses, buildings, and for other purposes, be given a privileged status, its consideration to follow the disposition of the Diplomatic and Consular appropriation bill.

The SPEAKER. The gentleman from Missouri asks unanimous consent that Senate bill 3389 be made privileged, to follow the disposition of the Diplomatic and Consular appropriation bill; of course, not to interfere with conference reports or anything of that sort. Is there objection?

Mr. MONDELL. Mr. Speaker, reserving the right to object, I shall not object, and I trust no objection will be made, but I want to suggest to the gentleman in charge of the bill the great importance of the legislation, and I hope there will be no disposition to deprive the House of opportunity to discuss the matter thoroughly when it is brought up.

Mr. ALEXANDER. There is no disposition of that kind on my part.

The SPEAKER. Is there objection?

Mr. STAFFORD. Reserving the right to object, will the gentleman be willing to couple with his request that the committee substitute be considered in lieu of the Senate amendment, and that it be considered by paragraphs under the five-minute rule, so as to permit liberal opportunity for consideration of the bill, rather than in its entirety?

Mr. ALEXANDER. Mr. Speaker, I have no objection to that request. Adopting the suggestion made by the gentleman from Wisconsin [Mr. STAFFORD], I couple with my request the further request that the House substitute for the Senate bill be considered in lieu of the Senate bill, and that it be considered by paragraphs and not as one section, under the five-minute rule.

The SPEAKER. The gentleman from Missouri asks unanimous consent that the Senate bill 3389 be made privileged to follow the disposition of the Diplomatic and Consular appropriation bill, with the usual qualifications, and that the House substitute be considered in lieu of the Senate bill, and that it be considered by paragraphs instead of as one amendment, under the five-minute rule. Is there objection?

Mr. LENROOT. Mr. Speaker, reserving the right to object, to make sure that amendments will be in order, as if it were an original bill, will the gentleman modify his request so that the substitute shall be considered under the five-minute rule as an original bill?

Mr. STAFFORD. That was my purpose in suggesting that the substitute be considered in lieu of the Senate bill.

Mr. ALEXANDER. I agree to that suggestion, Mr. Speaker.

The SPEAKER. To be considered as an original bill under the five-minute rule by paragraphs. Is there objection?

There was no objection, and it was so ordered.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, its enrolling clerk, announced that the Senate had passed with amendment the following resolution, in which the concurrence of the House of Representatives was requested:

House concurrent resolution 33.

Resolved by the House of Representatives (the Senate concurring), That there shall be printed 350,000 extra copies of the Income-Tax Primer, prepared by the Bureau of Internal Revenue for the information and assistance of taxpayers, 100,000 copies for the use of the Senate and 250,000 copies for the use of the House of Representatives, the same to be distributed through the folding room.

The message also announced that the Senate had passed bills and joint resolutions of the following titles, in which the concurrence of the House of Representatives was requested:

S. 2180. An act to approve mutual cessions of territory by the States of Wisconsin and Minnesota and the consequent changes in the boundary line between said States;

S. 1004. An act to provide for a retirement system in the Lighthouse Service;

S. 1005. An act to regulate the salaries of keepers of lighthouses;

S. 993. An act to authorize aids to navigation and for other works in the Lighthouse Service, and for other purposes;

S. 632. An act to provide for stock-watering privileges on certain unallotted lands on the Flathead Indian Reservation, Mont.;

S. 634. An act authorizing the State of Montana to select other lands in lieu of lands in section 16, township 2 north, range 30 east, within the limits of the Huntley irrigation project and the ceded portion of Crow Indian Reservation, in said State;

S. 636. An act to authorize the Secretary of the Treasury to convey to the city of Bozeman, Mont., certain land for alley purposes;

S. 637. An act to amend an act entitled "An act to amend sections 2291 and 2297 of the Revised Statutes of the United States relating to homesteads";

S. 955. An act providing for noncontiguous homestead entries within the former Fort Peck Indian Reservation, Mont., of land of the character described in the enlarged homestead act of February 19, 1909;

S. 389. An act to extend the time for cutting timber on the Coconino and Tusayan National Forests, Ariz.;

S. 44. An act granting additional rights to settlers on reclamation projects;

S. 26. An act authorizing the cutting of timber for mining purposes by corporations organized in one State and conducting mining operations in another;

S. 1555. An act to repeal the last proviso of section 4 of an act to establish the Rocky Mountain National Park, in the State of Colorado, and for other purposes, approved January 26, 1915;

S. 95. An act to provide for agricultural entries on coal lands in Alaska;

S. 102. An act relating to the temporary filling of vacancies occurring in the offices of register and receiver of district land offices;

S. 352. An act granting pensions to certain members of the former Life-Saving Service;

S. 994. An act extending the benefits of care and treatment by the Public Health Service to seamen on vessels used in the service of the United States;

S. 1462. An act to establish a fog signal at the Port Washington Pierhead Light Station, Wis.;

S. 1463. An act to establish aids to navigation at Fond du Lac Harbor, Wis.;

S. 1849. An act permitting minors of the age of 18 years or over to make homestead entry of the public lands of the United States;

S. 2886. An act for the relief of Albert O. Brown;

S. 940. An act to provide for the payment for certain lands within the former Flathead Indian Reservation in the State of Montana;

S. 1084. An act for the relief of J. G. Scupelt;

S. 2487. An act permitting Frances Mack Mann to purchase certain public lands;

S. 3470. An act to amend section 35 of the Criminal Code of the United States;

S. 3471. An act to authorize the Secretary of War to grant furloughs without pay and allowances to enlisted men of the Army of the United States;

S. 3472. An act to authorize the Secretary of War to provide and issue distinctive buttons or badges to men drafted or volunteering for enlistment in the military forces who are exempted or rejected, and to provide a penalty for unlawfully wearing, procuring, or manufacturing the same;

S. 3526. An act to amend section 11 of an act entitled "An act for making further and more effectual provision for the national defense and for other purposes," approved June 3, 1916;

S. 935. An act for the relief of settlers on certain railroad lands in Montana;

S. 302. An act authorizing the Secretary of the Navy to make donation of condemned naval guns and cannon balls to the John Wannebo Camp, No. 9, United Spanish War Veterans, Everett, Wash., to be placed in public parks;

S. 3446. An act to amend an act entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1918, and for other purposes," approved March 4, 1917;

S. 179. An act for the relief of Fred C. Konrad;

S. 2784. An act to authorize the purchase by the city of McMinnville, Oreg., of certain lands formerly embraced in the grant to the Oregon & California Railroad Co. and revested in the United States by the act approved June 9, 1916;

S. 3225. An act to reserve as a part of the Oregon National Forest certain lands that were revested in the United States pursuant to the decision of the Supreme Court of the United States in the case of the Oregon & California Railroad Co. against the United States;

S. 2315. An act to extend the time within which final proof is required to be submitted upon any lawful pending desert-land entry made prior to July 1, 1915, such extension not to exceed three years from the date of allowance thereof;

S. 97. An act authorizing the exchange of certain lands in the State of Utah for the protection of the water supply of Salt Lake City;

S. 94. An act to amend section 3 of an act entitled "An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1902, and for other purposes," approved March 3, 1901 (31 Stat. L., p. 1133);

S. 2931. An act for the relief of Thomas Sevy;

S. 972. An act to authorize an exchange of lands with Henry Blackburn;

S. 388. An act for the relief of Alfred Cluff, Orson Cluff, Henry E. Norton, William B. Ballard, Elijah Hancock, Mrs. Susan R. Saline, Oscar Mann, Celia Thayne, William E. Cox, Theodore Farley, Adelaide Laxton, Clara L. Tenney, George M. Adams, Charlotte Jensen, Sophia Huff, Peter H. McBride, David Edward Adams, Mrs. M. J. Ellsworth, and the heirs of J. H. Frisby;

S. 101. An act to authorize the consolidation of Government lands and of privately owned lands, and for other purposes;

S. 3128. An act to amend section 1422 of the Revised Statutes authorizing additional pay for enlisted men of the Navy and Marine Corps detained beyond the expiration of their terms of enlistment;

S. 714. An act providing for an additional judge for the district of Arizona;

S. 922. An act for the relief of Orion Mathews;

S. 3403. An act for the relief of Paymaster Alvin Hovey-King, United States Navy;

S. 92. An act to authorize the Secretary of the Interior to issue patent for certain lands in the State of Utah to E. D. Partridge;

S. 387. An act for the relief of John Flanigan;

S. 2865. An act for the suspension of payments on public lands by entrymen in the military or naval service of the United States;

S. J. Res. 24. Joint resolution to permit of the disposition of certain lands in Montana ceded by the Crow Indians; and

S. J. Res. 104. Joint resolution authorizing the assistant to the Secretary of the Interior to sign official papers and documents.

INCOME-TAX PRIMER.

Mr. BARNHART. Mr. Speaker, I ask unanimous consent to take from the Speaker's table House concurrent resolution 33, providing for the printing of the income-tax primer, with Senate amendments thereto, agree to the Senate amendments, and that the resolution be passed.

Mr. SLAYDEN. Mr. Speaker, may I ask the gentleman a question?

Mr. BARNHART. I yield.

Mr. SLAYDEN. How soon will we get those, if this is agreed to?

Mr. BARNHART. Just as soon as the Government Printing Office can turn them out.

Mr. SLAYDEN. I know; but the gentleman understands that penalties are imposed if all of the returns are not made by the 1st of March.

Mr. GARNER. I will say to the gentleman from Texas that the plates are there and the Public Printer, in obedience to the suggestion of the House of Representatives, gives that printing preference.

Mr. BARNHART. He is holding the forms, and they are ready to start as quick as we can get this through.

Mr. GARNER. That is one of the reasons the Treasury Department asked the House of Representatives to do this, because we can get it done so much more quickly.

Mr. SLAYDEN. It ought to be done right away if it is to be done at all.

The SPEAKER. The gentleman from Indiana asks unanimous consent for the consideration of Senate amendments to House concurrent resolution 33, which the Clerk will report, together with Senate amendments.

The Clerk reported the resolution and the Senate amendments.

The SPEAKER. Is there objection?

Mr. WALSH. Mr. Speaker, reserving the right to object, I have no objection to the immediate consideration of the resolution, but I do object to unanimous consent to agree to the Senate amendments.

Mr. GARNER. The gentleman from Indiana asked unanimous consent to take it from the Speaker's table——

Mr. WALSH. No; he asked unanimous consent to agree to the Senate amendments also. I do not object to agreeing to the resolution, but——

The SPEAKER. To what does the gentleman object?

Mr. WALSH. The gentleman from Indiana, when he first made his request, asked for the consideration of this resolution and unanimous consent to agree to the Senate amendments. I have no objection to his request in so far as it goes to the consideration of the resolution, but I do object to agreeing to the Senate amendments.

The SPEAKER. He would have to ask unanimous consent anyhow.

Mr. BARNHART. Mr. Speaker, in order to get at it promptly, I will withdraw my request and ask unanimous consent to take from the Speaker's table the resolution——

The SPEAKER. But the Chair has already laid it before the House, and the question is on agreeing to the Senate amendments.

Mr. STAFFORD. Will the gentleman yield?

Mr. BARNHART. I will.

Mr. STAFFORD. There is some dispute whether the House received 200,000 or 250,000 copies.

Mr. BARNHART. It is 250,000. That is what the printed report says.

Mr. WALSH. Will the gentleman yield further?

Mr. BARNHART. I will.

Mr. WALSH. Will the gentleman give some reason why this reduction was made?

Mr. BARNHART. The gentleman from Indiana can not undertake to say what was in the minds of the Committee on Printing in the Senate, but any delay here would simply delay the publication of the primer, and unless this is done promptly it will be of no use whatever.

Mr. WHEELER. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. WHEELER. I desire to ask the gentleman a question. How many would that be, distributed among the Members; about 600?

Mr. BARNHART. A little more than that.

Mr. ROBBINS. When will they be available if this resolution passes?

Mr. BARNHART. Just as quickly as they can be printed.

Mr. ROBBINS. That is rather indefinite. March 1 is the time, and if we do not get it before that it will be of no good.

Mr. BARNHART. It has been stated already that the Government Printing Office has the plates, and everything is ready to rush the work.

Mr. ROBBINS. I hope it will be passed.

The question was taken, and the Senate amendments were agreed to.

CALENDAR WEDNESDAY.

The SPEAKER. This is Calendar Wednesday.

Mr. FLOOD. Mr. Speaker, I make the point of no quorum present.

The SPEAKER. The gentleman from Virginia makes the point of no quorum present, and the Chair will count. [After counting.] One hundred and forty-nine gentleman are present, not a quorum.

Mr. KITCHIN. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The SPEAKER. The Doorkeeper will lock the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed to respond to their names:

Campbell, Pa.	Fairchild, G. W.	Kreider	Sanders, La.
Cantrill	Flynn	LaGuardia	Sanders, N. Y.
Capstick	Focht	Lee, Ga.	Scott, Pa.
Carlin	Fuller, Mass.	Lever	Scully
Carter, Mass.	Gallagher	Linthicum	Sears
Chandler, N. Y.	Garland	Lunn	Shackleford
Costello	Gillett	McKinley	Slemp
Curry, Cal.	Gould	Maher	Smith, Mich.
Darrow	Gregg	Mann	Smith, T. F.
Davidson	Hamill	Nicholls, S. C.	Steagall
Davis	Haskell	O'Shaunessy	Sullivan
Dooling	Haugen	Parker, N. Y.	Tague
Doremus	Heintz	Price	Vare
Doughton	Hollingsworth	Ragsdale	Ward
Drukker	Hutchinson	Rainey	Wilson, La.
Dunn	Johnson, S. Dak.	Riordan	Winslow
Eagle	Jones, Va.	Rodenberg	
Estopinal	Kelley, Mich.	Rowland	
Fairchild, B. L.	Kennedy, R. I.	Sanders, Ind.	

The SPEAKER. On this call 355 Members have answered to their names, a quorum.

Mr. FLOOD. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The SPEAKER. The Doorkeeper will open the doors.

DEPORTATION OF CERTAIN ALIENS.

Mr. FLOOD. Mr. Speaker, I desire to move to dispense with Calendar Wednesday for to-day.

The SPEAKER. The gentleman from Virginia moves to dispense with Calendar Wednesday business for this day.

Mr. FLOOD. And I desire to know if there will be any debate allowed on that?

The SPEAKER. Five minutes on a side.

Mr. FLOOD. I make the motion to dispense with Calendar Wednesday business of to-day.

The SPEAKER. The gentleman has five minutes.

Mr. FLOOD. Mr. Speaker, I have made this motion because if the House resolves itself into the Committee of the Whole House on the state of the Union for the consideration of Calendar Wednesday business, what is known as the "alien slackers'" bill will come up. I am not opposed to the principle of that bill, but I am opposed to its consideration at this time, because I have been informed by the officials of the State Department that the consideration of that measure now would greatly impede the progress of negotiations going on between this country and Italy and France which would accomplish much better than this bill does the purposes of this bill. Already we have concluded negotiations with Great Britain and Canada and are in process of concluding negotiations with Italy and France, which would be interfered with and the negotiations practically destroyed if this measure is passed to-day. I am opposed to the measure because it violates the treaty we

have with Italy and the treaty we have with Japan and with Serbia.

We are denouncing Germany every day for disregard of its treaties with other nations, for treating its solemn obligations as a scrap of paper, and yet the proposition is made here to have this House enact a law that violates the treaties with three nations.

Mr. CAMPBELL of Kansas. Will the gentleman yield for a question?

Mr. FLOOD. Just a question.

Mr. CAMPBELL of Kansas. What advantage would the treaty now under negotiation have over the provisions of this bill, if any?

Mr. FLOOD. The treaty, if concluded and ratified, would provide that the nationals of these countries in this country would be subject to the draft law of this country and subject to be drafted into our Army. The purpose of this bill is to accomplish that result. The treaty method is regular and fair and honorable. This bill proposes the old Rob Roy method—

> That they should take who have the power,
> And they should keep who can.

I am opposed to this measure because it violates the general practice of nations not to draft into its naval and military service the nationals of neutrals and friendly nations.

And I am opposed to it, Mr. Speaker, because it will not accomplish its purpose. The provisions of this bill authorize the President to draft into the industrial service of this country the nationals of these people with whom we are negotiating these treaties, either in the military service or in the industrial service, and great pressure will be brought to bear upon the President by the Governments of our cobelligerents to put their nationals in our industrial service instead of our military service, and the very object of this bill will be defeated by its enactment.

For these reasons I hope the House will vote to dispense with Calendar Wednesday.

I reserve the balance of my time.

The SPEAKER. The gentleman reserves two minutes.

Mr. BURNETT. Mr. Speaker——

The SPEAKER. Is the gentleman opposed to this motion?

Mr. BURNETT. I am. [Laughter.]

Mr. Speaker, if the statement of the gentleman is correct, that this bill is in violation of treaties, why not face it and discuss it for a longer time than five minutes. Why undertake by this indirection to enact this species of camouflage so as to sidetrack the bill in this way?

The bill does not violate any treaty. I desire to say that so far as section 2 is concerned, which seeks to impress men into civil service, that at the proper time I expect to make a motion to strike that out.

In regard to what the State Deparment has been doing, gentlemen, away back on the 1st day of August the McCumber resolution was passed in the Senate urging the President and the State Department to negotiate with other countries in this very direction. They, I supposed, started that negotiation. A little later the Chamberlain resolution was passed, which provides for conscription of aliens. That resolution came over to the Committee on Military Affairs. In the meantime the Committee on Immigration and Naturalization had authorized the report of this bill, which violates no treaty, because it gives to these aliens the opportunity either to withdraw their claim of exemption and subject themselves to the draft, like the American boys have to do, or else be deported and get out of this country. [Applause.]

Mr. FLOOD. Will the gentleman yield?

Mr. BURNETT. Just for a question.

Mr. FLOOD. Does not that force these men to do what we guaranteed in this treaty they need not do?

Mr. BURNETT. No; it does not. International law, all the way down, says that a country has the right to deal with undesirable aliens by their deportation, and that the convenience of a country, public policy, and public good, is the only limitation in regard to that matter.

Now, what have we a right to do? Will you stand here and on five minutes of discussion, upon a statement that the State Department does not want this bill, suppress a debate that will show what the State Department has done? I am not making any criticism of the State Department. I said to Mr. Secretary Lansing, when the Chamberlain bill was before the Committee on Military Affairs, that I did not desire to criticize his department. I knew that it took a long, long time to accomplish these things, and I have not criticized them. But, gentlemen, when the Chamberlain bill came over I had a resolution before the Rules Committee asking the Rules Committee to give us a rule on my bill. They said we had better wait, and I said, "That is all right." I have no pride of authorship of this bill. I am willing for the Military Affairs Committee to act on the Chamberlain bill. It is not as good a bill as this, but we can get it before the House and amend it. Then it was that the Secretary of State came before that committee and made the statement that they were negotiating, and, gentlemen, they have been negotiating ever since, and yet not a treaty has been submitted to the Senate. That was away back in September that the Secretary of State assured the Committee on Military Affairs of the House that the negotiations with the cobelligerent countries would be concluded by December.

If a treaty should be submitted when this bill is sent over to the Senate and ratified, how easy it will be for the Senate to amend it so that this law shall not abrogate a treaty that has been made to the same purport and effect.

Before that Committee on Military Affairs, Mr. WISE, an able member of that committee, said to me:

> Here is the thought which struck me, Judge BURNETT, as a way to get around the whole proposition and do it without running counter to anybody. In view of the fact that we are certain—at least I believe we are certain—not to have a second draft before December, would it not be right and proper, in view of what the Secretary said, to wait and not draft cobelligerents until December, and if they have not accomplished anything by that time, we can go ahead.

[Applause.]

The SPEAKER. The time of the gentleman from Alabama has expired.

Mr. FLOOD. Mr. Speaker, I yield the balance of my time to the gentleman from Wyoming [Mr. MONDELL].

The SPEAKER. The gentleman from Wyoming is recognized.

Mr. MONDELL. Mr. Speaker, the gentleman from Virginia [Mr. FLOOD] predicates his proposition to dispense with Calendar Wednesday business to-day largely on the objections that he has suggested to the bill for the deportation of aliens who may claim exemption under the draft. I think the arguments he made with regard to that matter are conclusive. Most of us are in favor of action looking to the enrollment of aliens for service, but all of us, I believe, desire to have the action taken in a proper and orderly way. Steps are being taken by the State Department to bring this matter to successful conclusion by treaty action. The administration admonishes us that the action proposed in that bill will prejudice the treaties now under negotiation. I do not want to embarrass the administration. But I am looking at the matter of dispensing with Calendar Wednesday from a somewhat different viewpoint from that of the present status of public business. We have before us a very important appropriation bill. This morning, by unanimous consent, we provided for the consideration of a very important bill providing for the housing of the men engaged in shipbuilding after this bill is disposed of. We must consider very soon an even more important measure relating to the railways of the country, recently taken under public control. These great measures, of vast importance, are all pressing for consideration. They should be considered. By considering them we do not delay the final settlement of the question of the alien of military age, but we rather promote it by giving the State Department an opportunity to conclude treaties which will enable us to meet and settle this question in an effective and legal way without offense to the nations by whose side we are fighting in this war.

The SPEAKER. The question is on agreeing to the motion made by the gentleman from Virginia [Mr. FLOOD].

Mr. BURNETT. On that I demand the yeas and nays.

Mr. LONERGAN. Mr. Speaker, I rise to a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LONERGAN. Is it permissible under the rules for a Member to be given two minutes at this time?

The SPEAKER. If the House agrees to it; yes.

Mr. FLOOD. I ask unanimous consent, Mr. Speaker, that the gentleman be given two minutes.

Mr. EMERSON. I would like to have two minutes.

The SPEAKER. Is there objection?

Mr. WALSH. I object, Mr. Speaker.

The SPEAKER. The question is on the motion of the gentleman from Virginia [Mr. FLOOD], and on that motion the gentleman from Alabama [Mr. BURNETT] demands the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. The question is on the motion of the gentleman from Virginia [Mr. FLOOD] to dispense with the business of Calendar Wednesday. Those in favor of the motion will, when their names are called, answer "yea"; those opposed will answer "nay."

The question was taken; and there were—yeas 112, nays 255, not voting 61, as follows:

YEAS—112.

So two-thirds not having voted in the affirmative, the motion to dispense with Calendar Wednesday was rejected.

The Clerk announced the following pairs:

Until further notice:

Mr. FLYNN with Mr. HEINTZ.

Mr. WILSON of Louisiana with Mr. ROWLAND.

Mr. SULLIVAN with Mr. SANDERS of New York.

Mr. SCULLY with Mr. DUNN.

Mr. GALLAGHER with Mr. PARKER of New York.

Mr. MAHER with Mr. GEORGE W. FAIRCHILD.

Mr. PRICE with Mr. BENJAMIN L. FAIRCHILD.

Mr. LINTHICUM with Mr. GILLETT.

Mr. HAMILL with Mr. HOLLINGSWORTH.

Mr. DOUGHTON with Mr. CARTER of Massachusetts.

Mr. CAMPBELL of Pennsylvania with Mr. CHANDLER of New York.

Mr. DOOLING with Mr. MCKINLEY.

Mr. RAYBURN with Mr. DARROW.

Mr. CHURCH with Mr. DRUKKER.

Mr. ESTOPINAL with Mr. GARLAND.

Mr. JONES of Virginia with Mr. DAVIDSON.

Mr. DOREMUS with Mr. HASKELL.

Mr. GLASS with Mr. COSTELLO.

Mr. GREGG with Mr. FOCHT.

Mr. NICHOLLS of South Carolina with Mr. KELLEY of Michigan.

Mr. O'SHAUNESSY with Mr. CURRY of California.

Mr. RAGSDALE with Mr. KENNEDY of Rhode Island.

Mr. RIORDAN with Mr. SMITH of Michigan.

Mr. SANDERS of Louisiana with Mr. SWITZER.

Mr. CHARLES B. SMITH with Mr. VARE.

Mr. TAGUE with Mr. KREIDER.

Mr. THOMAS F. SMITH with Mr. RODENBERG.

Mr. STEAGALL with Mr. SCOTT of Pennsylvania.

The result of the vote was announced as above recorded.

CALL OF COMMITTEES—CALENDAR WEDNESDAY.

The SPEAKER. This is Calendar Wednesday. The Clerk will call the committees.

The Committee on Immigration and Naturalization was called.

DEPORTATION OF CERTAIN ALIENS, ETC.

Mr. BURNETT. Mr. Speaker, I am authorized by the Committee on Immigration and Naturalization to call up the alien slacker bill—H. R. 5667.

The SPEAKER. The Clerk will report the title.

The Clerk read the title of the bill (H. R. 5667) to provide for the deportation of certain aliens, and for other purposes.

Mr. LONDON. Mr. Speaker, I make the point or order that there is no quorum present.

The SPEAKER. The vote completed less than two minutes ago showed a quorum present.

Mr. LONDON. But there is no quorum present now.

The SPEAKER. No business has been transacted since the presence of a quorum was disclosed. The point is overruled. The House automatically resolves itself into the Committee of the Whole House on the state of the Union with the gentleman from Missouri [Mr. RUSSELL] in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of H. R. 5667, which the Clerk will report by title.

The Clerk read the title of the bill.

Mr. FLOOD. Mr. Chairman, I desire to make a preferential motion.

Mr. BURNETT. Mr. Chairman, I believe that having charge of the bill I am entitled to recognition.

The CHAIRMAN. The Chair understands the gentleman from Virginia [Mr. FLOOD] is entitled to make a preferential motion.

Mr. FLOOD. Mr. Chairman, I move that the consideration of this measure now pending be postponed until February 27, the third Calendar Wednesday from to-day.

Mr. STAFFORD. Mr. Chairman, a question of order.

The CHAIRMAN. The gentleman from Virginia moves that the consideration of this bill be postponed until three weeks from to-day, February 27.

Mr. BURNETT. Mr. Speaker, I make the point of order that that motion is not in order on Calendar Wednesday.

Mr. DOWELL. I desire to raise the further point of order that that motion is not in order in the Committee of the Whole.

Mr. SHERLEY. If I understand the motion of the gentleman from Virginia, it is that the committee rise and report the bill with that recommendation.

SEVERAL MEMBERS. Oh, no!

Mr. FLOOD. I want to modify my motion.

Mr. BURNETT. I make the point of order that the gentleman has made his bed and must now lie on it. If he withdraws his motion, then I demand recognition.

Mr. SHERLEY. Mr. Chairman, I rise to make a preferential motion.

The CHAIRMAN. The gentleman will state it.

Mr. SHERLEY. I move that the committee do now rise and report the bill with the recommendation that its consideration be postponed until February 27.

Mr. BURNETT. Mr. Chairman, I make the point of order that there is already a motion pending.

Mr. SHERLEY. My motion is preferential.

The CHAIRMAN. The gentleman from Kentucky has made a preferential motion which is in order.

Mr. LITTLE. Mr. Chairman, I rise to a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. LITTLE. Is the motion to rise a preferential motion?

The CHAIRMAN. On Calendar Wednesday this is a preferential motion.

Mr. LITTLE. Is the motion that the committee rise a preferential motion?

The CHAIRMAN. Not the simple motion that the committee rise.

Mr. LITTLE. That is the motion, that the committee rise.

The CHAIRMAN. The motion is to postpone the consideration of this bill——

Mr. LITTLE. I beg your pardon. The gentleman made a motion that the committee rise.

The CHAIRMAN. And that the consideration of this bill be postponed, and that is a preferential motion.

Mr. LITTLE. The motion does not amount to anything at all, except the part of it that says that the committee shall rise. The rest of it simply goes to that. If the motion to rise is a preferential motion, then this motion is in order. If it is not, then it is not in order. I make the point of order that this is not a preferential motion, because it is a motion that the committee rise.

The CHAIRMAN. The Chair holds that the motion made by the gentleman from Kentucky is a preferential motion.

Mr. BURNETT. Will the Chairman state the motion?

The CHAIRMAN. The motion is that the committee rise and that the bill now under consideration be reported to the House with the recommendation that it be postponed until February 27.

Mr. BLACK. Mr. Chairman, a parliamentary inquiry. If that motion carries, will this bill be the first in order on Calendar Wednesday on February 27?

The CHAIRMAN. It will. The question is on the motion made by the gentleman from Kentucky that the committee rise and report this bill to the House with the recommendation that the further consideration of it be postponed until the 27th day of February.

The question being taken, the Chairman announced that the noes appeared to have it.

Mr. FLOOD and Mr. SHERLEY demanded a division.

The committee divided; and there were—ayes 61, noes 106.

Mr. SHERLEY. I ask for tellers.

Tellers were ordered; and the Chairman appointed Mr. SHERLEY and Mr. BURNETT.

The committee again divided; and the tellers reported—ayes 58, noes 110.

Accordingly the motion was rejected.

The CHAIRMAN. The Clerk will read the bill.

The bill was read, as follows:

Be it enacted, etc., That any alien eligible by existing law to become a naturalized citizen of the United States, who is a native or subject of a country that is engaged in war with Germany, or with any of the other central powers of Europe, and who but for his alienage would be subject to the selective draft under the act of May 18, 1917, or under any subsequent modification or change of said act, who by himself or by anyone else has heretofore claimed, or shall hereafter claim, exemption from said selective draft on account of being an alien, shall forever be denied the right of becoming a citizen of the United States, or of any of its possessions, and shall as soon as practicable be deported to the country of which he is a subject or citizen.

Any alien who may have been exempted from said selective draft on account of his alienage prior to the passage of this act may, within 60 days after the passage of this act, withdraw such exemption and submit himself to the operation of said selective draft, and in that event shall not be held to be within the operations of this section as to the forfeiture of citizenship and deportation: *Provided*, That the President is hereby authorized to make such rules and regulations as may be necessary to enforce the provisions of this section.

SEC. 2. That after the expiration of 60 days from the passage of this act the President of the United States is authorized and empowered, under such rules and regulations as he may prescribe, to draft any alien in the United States to perform such mental or physical labor on the farms, in the manufacturing establishments, or other enterprises in the United States as he may deem necessary or proper: *Provided*, That the President may exempt from the draft authorized by this section such individuals or classes of aliens as he may believe for the best interests of the United States: *Provided further*, That the expenses of carrying out the provisions of this section shall be paid out of the Treasury of the United States.

SEC. 3. That after 30 days from the passage of this act no alien who is a native or subject of any country that is engaged in the war with Germany, or with any of the central powers of Europe and who is subject to military duty in the country of his nativity or of which he is a subject, shall be permitted to enter the United States except by permission of the President of the United States, and any such alien so entering in violation of this section shall be deemed unlawfully in this country and shall be deported at the expense of the steamship company, railroad company, or other transportation company by which such alien entered the United States. Any steamship company, railroad company, or other transportation company of any nature whatsoever, or any individual who brings in or aids or assists in bringing in any alien excluded by this section shall be fined not less than $1,000 or by imprisonment for not exceeding one year, or both such fine and imprisonment, and any steamship or other water transportation company against which this fine is assessed shall not be granted clearance papers until such fine is paid or secured in such manner as the Secretary of Labor shall prescribe.

The Secretary of Labor is empowered to hear and pass on all violations of this section and to assess and collect the fine provided herein, and to adopt such rules and regulations as may be necessary to carry out the provisions of this section.

SEC. 4. That this act shall not apply to accredited officials of foreign Governments nor their suites, families, guests, or servants.

SEC. 5. That this act shall only remain in force during the continuance of the war with Germany, except as to the provisions of section 1 hereof.

The CHAIRMAN. The gentleman from Alabama [Mr. BURNETT] is recognized for one hour.

Mr. BURNETT. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BURNETT. I desire to ask if I have a right to give some of that hour to other Members on the same side of the question.

The CHAIRMAN. The gentleman has a right to yield any of that time he pleases to any other Member of the House.

Mr. JOHNSON of Washington. Is the debate limited to one hour?

The CHAIRMAN. Two hours; one hour on a side.

Mr. BURNETT. Mr. Chairman, if the agreement could be made in the committee, which I believe can not be made, I would be willing to extend the time. There are quite a number of gentleman who want to speak, and if we could agree on an hour and a half on a side I would be glad to do so. I do not want, however, to do anything that will imperil final action on the bill to-day; but I believe that agreement can not be made in the committee.

The CHAIRMAN. That agreement can not be made in the committee.

Mr. BURNETT. Even by unanimous consent of the committee—that is true.

Mr. JOHNSON of Washington. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. JOHNSON of Washington. It is understood that after one hour occupied by the gentleman from Alabama [Mr. BURNETT], there is another hour for the opponents to the bill.

The CHAIRMAN. The rule provides that the proponents of the bill are entitled to an hour, and then some one opposed to the bill is entitled to an hour. If there is anybody on the committee opposed to the bill he would control that hour.

Mr. STAFFORD. As I understand, Mr. Chairman, the gentleman from Washington [Mr. JOHNSON] is opposed to the bill and is a member of the committee, and is therefore entitled to an hour at any time when the gentleman from Alabama reserves the balance of his time.

Mr. BURNETT. Mr. Chairman, I would like to agree to an hour and a half on a side.

Mr. JOHNSON of Washington. It has just become known that I might control the time in opposition, and I have had requests to use an hour and a half on this bill. This is a controverted subject, and I think we ought to have two hours on each side.

Mr. BURNETT. I could not agree to two hours, for that would mean a postponement of the bill to another day. I guess we had better let it run along for the present.

The CHAIRMAN. The gentleman from Alabama is recognized for one hour.

Mr. BURNETT. I will ask the Chair to notify me when I have used 15 minutes.

Mr. LITTLE. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. LITTLE. The gentleman from Alabama is supposed to occupy one hour, and then some one opposed to the bill to occupy an hour, which consumes all the time.

The CHAIRMAN. Either one has a right to yield any part of his time to anyone else.

Mr. BURNETT. Mr. Chairman, the bill which we are considering, H. R. 5667, is short and I shall very briefly call atten-

tion to what its purposes are. The first section of the bill simply says:

That any alien eligible by existing law to become a naturalized citizen of the United States, who is a native or subject of a country that is engaged in war with Germany, or with any of the other central powers of Europe, and who but for his alienage would be subject to the selective draft under the act of May 18, 1917, or under any subsequent modification or change of said act, who by himself or by anyone else has heretofore claimed, or shall hereafter claim, exemption from said selective draft on account of being an alien, shall forever be denied the right of becoming a citizen of the United States, or of any of its possessions, and shall as soon as practicable be deported to the country of which he is a subject or citizen.

Mr. Chairman, the necessity for this bill is obvious. The section of the country from which I come is not so seriously affected by the alien slacker as other parts of the country. We are interested in it in a general way because there are more than a million aliens in this country, according to the statement of the War Department, between 21 and 31 years of age that have registered. A large majority of these claim the benefit of their exemption, and under the new classification those who claim it have been put in class 5, which means that they will never be called.

The question for us to consider is whether that is right and just to men in America, native born and naturalized, who are fighting the battles, to a great extent, for the very existence of the countries from which these slackers come. I understand that more than 200,000 Italians alone have been registered who are aliens and not subject to draft. So, in a general way, the whole country is interested, because suppose in the next draft we get three or four hundred thousand who have escaped the draft so far, that would materially reduce the number of our own people who would have to be called.

Now, as to our right to do this: This bill does not conflict with any treaty. The argument to the contrary is far-fetched. The right to deport an undesirable alien is inherent in the sovereignty.

Mr. FLOOD. Will the gentleman yield?

Mr. BURNETT. No; I can not; I have only 15 minutes.

Mr. FLOOD. I thought the gentleman had an hour.

Mr. BURNETT. But I have asked to be called down in 15 minutes.

Mr. FLOOD. The gentleman makes an assertion that it is not in conflict with the treaty but will not discuss the proposition. Will the gentleman read the treaty with Italy in 1871?

Mr. BURNETT. I have not it before me, and the gentleman can read it in his own time.

Mr. FLOOD. I have no time.

Mr. BURNETT. The gentleman can get time from the gentleman who is on the same side that he is and controls that time.

Mr. FLOOD. The gentleman announced that he had an hour and a half to give away, but I am not in it.

Mr. STAFFORD. Would the gentleman permit me to make a suggestion not to be taken out of his time. Would it be agreeable in the discussion of this proposition to have the time allotted into four parts of three-quarters of an hour each, one part to be controlled by the gentleman from Alabama [Mr. BURNETT] in favor of the proposition, one part to be controlled by the gentleman from Virginia [Mr. FLOOD], on the Democratic side, in opposition, one part to be controlled by the gentleman from Washington [Mr. JOHNSON] in opposition, and one part to be controlled by the gentleman from California [Mr. HAYES]?

Mr. BURNETT. That would amount to three hours. I would have no objection; I would be perfectly willing to have three hours' debate if there is not going to be any filibuster conducted.

Mr. STAFFORD. I am no party to any filibuster; I am trying to allot the time so as to be divided equally on both sides.

Mr. BURNETT. Mr. Chairman, I hope this will not be taken out of my time.

Mr. RAKER. Can we get unanimous consent, Mr. Chairman, to extend the time beyond two hours in the committee?

The CHAIRMAN. By unanimous consent and no point of order being made against it.

Mr. RAKER. That is it; no point of order being made against it. Let us take the two hours and then take the bill up and pass it.

Mr. BURNETT. Mr. Chairman, I want to say that I will yield to my colleague, Mr. HAYES, the ranking member of the minority of the Committee on Immigration and Naturalization, one half of the hour allotted to me.

The CHAIRMAN. The gentleman has the power to do that.

Mr. BURNETT. Now, Mr. Chairman, I am going to read one little paragraph from Moore's International Law, page 68, on our right to deport aliens:

It is a sovereign right belonging to every independent power to determine whether it will or will not receive foreigners within its territorial limits as residents, and having granted such permission, it has the same right to determine whether it will or will not revoke it and send such persons out of its country.

Justice Fields, in the Chinese-exclusion cases (130 U. S., on page 130, says:

The power of exclusion of foreigners being an incident of sovereignty belonging to the Government of the United States, as a part of those sovereign powers delegated by the Constitution, the right to its exercise at any time when, in the judgment of the Government, the interests of the country require it, can not be granted away or restrained on behalf of anyone. The powers of government are delegated in trust to the United States, and are incapable of transfer to any other parties. They can not be abandoned or surrendered, nor can their exercise be hampered when needed for the public good by any considerations of private interest. The exercise of these public trusts is not the subject of barter or contract.

Mr. Chairman, every year we are deporting aliens. The present immigration law, and the law that has been in existence for years, permits the deportation of an alien who has become a public charge within a certain time, and we can do that under the present law at any time before they have been here five years. If they become public charges for any matter that occurred before they came into this country, we have that right; and, as I said a moment ago, it is inherent in sovereignty to deport undesirable aliens at any time.

This bill does not contravene the treaty with Italy or with any other country which says there shall be no compulsory military service. This bill puts the matter up to the alien. It says, "If you claim exemption while your neighbors, American and naturalized boys, are going to fight for the very existence of your countries, you are undesirable aliens, and sovereignty will exercise its right of deportation." [Applause.] The bill further says that such a man shall be forever barred the right of becoming an American citizen. My good friend upon the committee, Judge SABATH, has suggested an amendment which strikes me as being fair and right, which he will offer, and that is to give these people 60 days in which, after the passage of this law, they may voluntarily leave the country. These very questions came up during the Civil War. Secretary Seward then acted under the law which authorized the drafting of aliens with first papers. A man simply declaring his intention of becoming an American citizen is not a citizen until he has made his final proof and final renunciation of allegiance to foreign kings and potentates. That power inheres in sovereignty, and certainly with the provision that Judge SABATH says he intends to offer, there can be no controversy over it.

I think the second section should be stricken out. That allows the President the right to draft for civil service neutral aliens and alien enemies. The Secretary of State, in discussing that proposition before the Committee on Military Affairs thought that it would involve us in very serious controversies with neutral countries, and in that view I think he is correct. For that reason, at the proper time, I expect to move to strike out section 2.

The third section provides that there shall be no admission of aliens who are subject to military service in the cobelligerent countries during the period of the war. Suppose their military duty extends to 40 or 50 years, as it does in some countries, they ought not to shirk that military duty, but ought to stay there and perform it. For that reason we make it a violation of this law for them to come in, and steamship companies will be fined for violating it. The immigration authorities, of course, can not impose imprisonment, although they have the right to collect the fine, if transportation companies bring people here who are subject to military duty on the other side in cobelligerent countries.

All that the first section of this bill does is to say that these aliens who claim exemptions when our boys are being sent to the trenches fighting for the very existence of their countries shall not be permitted to become citizens and shall not stay here. We are fighting to make democracy safe. Their countries are fighting for their very existence; and shall we allow those men to sit back and sneer at the American boys and say, "Me no fight; me take your job, and you go fight," just as hundreds of gentlemen from the North and from all over this country have heard said and thrown in the faces of their constituents. [Applause.] It is a question of inherent justice to our own flesh and blood.

As to deferring this matter until the State Department shall act, the Chamberlain bill, of a somewhat similar character, was passed on the 4th of August in the Senate. This bill was reported about the same time to this House. I went before the Committee on Military Affairs and told them that I had no pride of authorship in the bill, and that my committee had none, and asked them to report the Chamberlain bill and get it on

the floor of the House, where it could be amended, if it was not right, and passed. Because of the fact that it had already passed the Senate, it had a parliamentary advantage over our bill.

Mr. QUIN. Did not the State Department tell that Committee on Military Affairs that if it would hold the bill off they would get these negotiations all through and have it fixed by the 1st of December?

Mr. BURNETT. Exactly; and yet they have not done so. I am not criticizing the State Department. I know that it sometimes takes long years to negotiate great treaties on important matters, and if we pass this bill and send it over to the Senate, and in the meantime these countries in their negotiations with the State Department speed up, and there are some treaties effected, then the Senate can easily amend the bill and leave out those countries that have agreed to the like purposes as those embraced in this bill. It is merely for the purpose of getting early action that I am trying to hurry the passage of this bill. We have been delayed. It was away back in September when the Secretary of State was before the Committee on Military Affairs and made that statement. The gentleman from Virginia [Mr. FLOOD] said the other day that Wednesday after Wednesday had passed and that I had not called the bill up. My committee has not been called Wednesday after Wednesday. I was not, so far as I am concerned, waiting on the State Department, because I knew, without criticism of that department, that it would take time, and I did not believe they would ever get an agreement with the Italian Government. I believe that the Italian Government does not desire that their aliens shall be sent back. They do not want them drafted here, because it is more to their interest to have them take the jobs of American boys at increased wages and send the money back to replenish the depleted exchequer of that country than it is to have these men fight either in their armies or in our own. Will we stand idly by and see this done?

These aliens throw themselves back here and say, "We will get the protection of this country, we will get the benedictions of a great and free land," but when it comes to standing side by side with the boys you are sending to the trenches, they throw themselves back in the harness and say, "We are aliens, and therefore we can not be compelled to fight." This bill puts the option up to the alien. It simply allows him to choose whom he shall serve. We have the right to deport them. It must not be done in a harsh manner, and therefore it is left to the President, and the bill provides that as soon as practicable these deportations shall be made. Knowing many of them, as I and as you gentlemen do, I do not believe there will have to be many deportations, because when they know that the option is up to them either to fight or go back, they will withdraw their claims of exemption and take their places side by side with the boys of our constituents back home. [Applause.] They do not want to be sent back home.

Mr. GORDON. Mr. Chairman, will the gentleman yield?

Mr. BURNETT. I can not. All of this bill, except the first section, ends with the war. The purpose of that was that if we could not provide ships during the period of the war to deport them, then that after the war these men who have made themselves so disagreeable and undesirable must be sent out of this country and forever forfeit the right to become American citizens.

Mr. Chairman, I have the authorities here that I could read on these various questions, but they are so well established that I deem it unnecessary at this time to further call attention to the law giving us the right to deport undesirable aliens. A question of international law is involved as well as the question of treaty, but, gentlemen, this bill is so framed that, in my humble judgment and in the judgment at least of a large majority of my committee, there is no infraction of a treaty and no violation of international law. [Applause.]

Mr. Chairman, I reserve the balance of my time.

Mr. JOHNSON of Washington. Mr. Chairman, I desire to yield five minutes to the gentleman from New Jersey [Mr. PARKER].

Mr. PARKER of New Jersey. Mr. Chairman, I think anyone would have to oppose this bill in its present form in spite of the fact that it has a very good purpose. It has mixed up deportation and naturalization. They stand on entirely different principles. Deportation ought, in courtesy, to be done only by treaty, especially with our allies; but even on deportation this bill has been drawn so that it only deports men who belong to a nation that is at war with Germany and bars from entry only those who are subject to military service. The effect of that is odd. An Englishman would be barred because he is subject to military service; an Irishman would not, because he is not subject to military service. A Canadian, as long as he is not subject to military service, would not be barred, neither would an Australian or a New Zealander, but you send a Frenchman or an Italian or an Englishman back. Those are the only ones who would be barred from entry under the third section. And again, if there are enemy subjects here they are now given full power to stay here and do as they please and they will not be deported; they can not be, in fact. We have not got the tonnage to deport, and "as soon as practicable" means after the war, and that provision ought to be left out. It is amenable to objection and is objected to by the State Department.

The other part of this bill, to bar those who claim exemption from naturalization, nobody can object to, neither the State Department nor any foreign country. This bill would say that an Englishman or Frenchman or Italian who comes from countries that are really fighting and have military service shall not be naturalized. Now, there is a broad principle. If there are any men in this country, even enemy subjects, Austrian or German—I know boys who came here when they were six months old and who tried to get into the United States Army and fight—those boys after the war is over or even now ought to be allowed to become American citizens, men who have been here and have become Americanized. Besides there are a great many people here from neutral countries, from Holland and other countries. They have a right to stay here. They can not be deported. No agreement would be made to deport them. But those neutrals who are here and do not want to become American citizens in this time of stress or fight under the flag of the United States or any of its allies ought not to be allowed to be American citizens hereafter, neutrals though they be. They can carry on business here, but they shall not become American citizens unless in this critical time they are ready to do a citizen's duty. Mr. Chairman, we want to get at the good purposes of this bill and to do nothing that would interfere with treaties for deportation and the settling of that matter through the State Department in a proper way, and therefore I have prepared a bill to amend the naturalization laws so that no alien in this country who says he will not perform the duties of a citizen shall hereafter become a citizen. I will read this, although I do not know whether I have the time to do so:

Be it enacted, etc., That hereafter the privilege of naturalization and of becoming a citizen of the United States shall not extend to any person who shall claim exemption from military service by reason of his not being a citizen of the United States unless such person within 30 days after making such claim shall actually enlist in this or some other country for military service against the nation with whom the United States is at war.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PARKER of New Jersey. The second section provides for past cases in the same way.

Mr. BURNETT. Will the gentleman yield some of his time? I believe I used 14 minutes.

Mr. JOHNSON of Washington. Mr. Chairman, I shall only take a few moments at this time to say I am compelled to oppose this bill. Since I have had the honor of a seat in Congress I have worked in every way possible to restrict immigration. We now see some of the penalties of a large and a loose immigration, and I venture to assure those who are on this floor that this sort of legislation will not cure the present trouble, but will make the present situation, in fact, infinitely worse and more confused. Further, Mr. Chairman, I dislike to hear any Member of this House say he proposes to pass a bill here as a scare, to scare people, and send it to another body, there to be corrected when treaties now under negotiation come into force.

Mr. Chairman, I am opposed now and forever to letting it be known for one hour that the United States makes any of its treaties mere scraps of paper. I am firm in the conviction that this legislation proposes to violate the treaty solemnly entered into by the United States with Italy.

Further, I have firmly resolved, and have so stated on the floor, that I would support the President of the United States during this war. I mean to do it. To fly in the face of the State Department is not to support the President. We know that when treaties are made through our State Department and that we have but one means of communicating with foreign countries, and that is through the President of the United States, it can not be right in my opinion for this House to attempt legislation of this kind, which will throw us into turmoil at once with certain countries and possibly later with countries now neutral—Sweden, Norway, and possibly others. I am sincere in my opposition. I hate to oppose certain features of the bill. I know this is a great hue-and-cry measure. It has been unfortunate that the alien who had not even taken out his first papers was able to laugh and jeer at the alien next door who had taken out his first papers and was subject to the draft.

I have not time just now to read the document from the State Department before me, but I am satisfied that the passage of this legislation even by one body would throw not only the forth-

coming draft into confusion and disturbance, but would create a round of misunderstanding throughout the country among those who have come here to enjoy our liberties and to whom we have not yet given the full rights of citizenship.

Mr. CHARLES B. SMITH. Will the gentleman yield?

Mr. JOHNSON of Washington. I will be glad to yield.

Mr. CHARLES B. SMITH. I wanted to ask how this measure would affect our relations with foreign countries?

Mr. JOHNSON of Washington. It certainly will affect the Finnish population of this country and the Polish population.

Mr. STAFFORD. Will the gentleman yield?

Mr. JOHNSON of Washington. I will.

Mr. STAFFORD. I take it the second paragraph of section 1 is liable to the construction given by the gentleman from Washington. But if the committee will accept an amendment by inserting after "any," in line 5, the word "such," then it would be limited to those aliens only who are citizens or subjects of countries that are at war. Under the present phraseology of "any alien who may have been exempted" it is not limited to aliens who are subjects of countries that are at war with Germany.

Mr. JOHNSON of Washington. Mr. Chairman, I desire now to yield five minutes to the gentleman from Missouri [Mr. BORLAND].

The CHAIRMAN. The gentleman from Missouri is recognized for five minutes.

Mr. BORLAND. Mr. Chairman, there is not any good reason that can be advanced why citizens of a country at war with the central powers should not serve either in the armies of their own country or in the armies of the country where they may chance to be residing. That, as I understand, is the purpose aimed at by this legislation, and with which most of us are in sympathy. I have repeatedly had that subject up with aliens in my own district, and I have uniformly told them it was their duty to serve with our Army or their own army. The only question is as to the best and most effective means of accomplishing that purpose. I do not believe this bill will accomplish its supposed purpose.

This bill is simply a species of retaliatory legislation, which is a very bad species of legislation. In all respects retaliatory legislation is bad. While we might have the power to say that an alien must serve, or, refusing to do so, may be deported, for every nation has the right to exclude, in the last analysis, from its own society members whom it does not desire. It would simply invoke retaliatory legislation against Americans who happened to be residing abroad. Every nation would have the same right to pass retaliatory legislation against our citizens who happened by any reason to be in those countries.

Mr. COX. Will the gentleman yield?

Mr. BORLAND. Yes.

Mr. COX. Does not the gentleman feel that if we have American citizens abroad that are unwilling to come home and join our Army over here and fight with our troops, we ought to be permitted to go abroad and draft them?

Mr. BORLAND. Not in all cases. I know many young men who are engaged in driving ambulances over there, and doing other necessary and humane work, many of them with credit, and lots of them would have to come home. Some of them might be drafted into other armies, who are not liable to military service in this country at all.

There are many reasons why that form of retaliatory legislation should not be indulged in. I understand the State Department is working out a plan whereby the resident aliens in this country will be subject to military service, and if that can be done it is infinitely preferred to this method of retaliatory legislation. It is infinitely to be preferred to have a treaty with our allies in Europe to the effect that their citizens resident in this country shall be subject to our draft law, and thereby get the military service of the man himself rather than to go to the retaliatory extremity of deporting him in case he refuses voluntarily to submit to the draft. Now, with that kind of a solution, a solution by treaty, the rights of Americans resident abroad can be properly protected. In this kind of legislation they can not be. According to my judgment, there is infinitely more argument in favor of the treaty method of dealing with this subject than the retaliatory legislative method of dealing with the subject. I can not believe but what the treaty method will be much more effective. Under no circumstances, it seems to me, ought we to pass this law until Congress is satisfied that the countries involved will not enter into an effective treaty on the subject.

But the very reverse is the case. We are told by the State Department that the countries involved are making every effort to enter into a satisfactory treaty. Manifestly it is not an easy thing to do. Manifestly it must contain exceptions of certain rights, certain occupations, of certain classes of citizens. There are many complications we can easily foresee in the terms of such a treaty, and I have no doubt that the nations in good faith are trying to work that out. I am confident our State Department is attempting to work it out in the utmost good faith and for the express purpose sought to be reached in this bill. I have not any reason to doubt that representatives of other countries are working with equal diligence to bring about a satisfactory solution of the question. Now, as long as that is true, as long as we have the assurance that both sides are anxious and willing to solve this problem in the most effective way it can be solved, it seems to me it would be entirely hasty and improper for Congress to pass this law and then send it over to another body and say that if in the meantime it develops we have violated any treaties we will let another body correct our mistakes. That is not the way in which we ought to approach this question. We ought to solve this problem so as to get the men into the ranks, and I believe this bill will not do it. [Applause.]

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. BURNETT. Mr. Chairman, I yield to the gentleman from California [Mr. HAYES] 30 minutes. We have divided the time.

The CHAIRMAN. The gentleman from California is recognized for 30 minutes.

Mr. HAYES. Mr. Chairman, I desire to use only a small portion of my time.

I am very much surprised, Mr. Chairman, to hear the gentleman from Missouri [Mr. BORLAND] state that this is "retaliatory" legislation. That is not the spirit of it at all. It is not the purpose, and it can not have that result. Whenever an alien comes to this country and enters our industries the presumption is that he comes here to form a part of our population, whether he intends ever to become naturalized and become in a legal sense a citizen or not; and, if so, it seems to me he owes the same obligation to the country which extends to him protection and of whose opportunities he has taken the fullest advantage—he has the same duty that the man who was born upon the soil has.

But this bill does not even go so far as to include all such aliens. It aims only to include those who owe a double duty to get into the war and to defend the rights not only of this country but of the country from which he came and to which he owed allegiance. He has a double duty. That is the only class of aliens that this bill affects—those aliens who are citizens or subjects of the countries at war with Germany or the central powers of Europe; and if a man has the right sort of manhood in him it seems to me he would not desire to be exempted from military duty, but would be willing to serve either in the armies of this country or of the country of his birth. This bill gives him an opportunity to do military duty either in this country of which he is a resident or in the country of his birth. He may take his choice.

Now, Mr. Chairman, the State Department has had months—six months, at least—to negotiate any treaties that may be necessary. I feel certain that no treaties are necessary in this case. They have not done it, and it seems to me it is about time that these young men in the United States who have this double obligation should be made to take their places shoulder to shoulder with our own boys who are going out to fight for the rights of America.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. HAYES. I yield to the gentleman.

Mr. COX. Last summer Congress passed a bill, did it not, empowering our allies to come here and voluntarily recruit their own people?

Mr. HAYES. It did.

Mr. COX. Does the gentleman know how England, France, and Italy are getting along in this country, recruiting their own men in this country, to go back and fight for their own country?

Mr. HAYES. I think they have made some progress, but I presume not great progress from the experience I have had in my own district.

Mr. COX. About the time Congress adjourned, three months after we had passed that law, I wrote to the English Embassy here in Washington to know how many men they had recruited under the law that Congress had passed giving them the power to come here and recruit their own men. If I recollect correctly, it was about 2,200 men, all they were able to muster; and yet it is conceded that England has 400,000 men in this country subject to military duty.

Mr. HAYES. Mr. Chairman, many of them have volunteered. I do not want to put any slurs upon Englishmen who are resi-

dent in this country. I know from my personal knowledge that there are a great many men who ought to be willing to fight and ought to be included in the first draft who are claiming exemption as aliens when their own country and when this country are at war with Germany.

Now, Mr. Chairman, I have so many requests for time that I do not intend to take up much myself to discuss this question. But I want to say that this bill does not affect those mentioned by the gentleman from Missouri [Mr. BORLAND], who are here temporarily. If they have not a permanent residence in this country or a fixed place of abode, of course, they are not obliged to register, and they will not be listed among those who are to be drafted and included in the armed forces of the United States. This bill does not reach those at all. It reaches only those who are permanently here, who intend to be citizens of the United States, and who ought not to be here if they do not so intend.

Mr. JOHNSON of Washington. Mr. Chairman, will the gentleman yield?

Mr. HAYES. Yes.

Mr. JOHNSON of Washington. Assuming that there is a large section of Finnish revolutionists somewhere on the Pacific coast, does the gentleman fancy making them into a United States regiment of troops?

Mr. HAYES. No; but I would favor enlisting them in a regiment of American boys among whom they reside, and placing upon them the duties that devolve upon every citizen of military age, or else oblige them to get out. That is the way I feel about it. [Applause.]

Now, Mr. Chairman, I reserve the balance of my time. How much time have I consumed?

The CHAIRMAN. The gentleman has consumed six minutes.

Mr. GRAHAM of Pennsylvania. Mr. Chairman, will the gentleman yield before he closes?

Mr. HAYES. Yes.

Mr. GRAHAM of Pennsylvania. Will the gentleman point out in his bill where there is any discrimination created by the language of the bill against those who are here temporarily and those who are here permanently as residents?

Mr. HAYES. There is nothing in the bill, I think, that expressly makes any distinction between the two classes of aliens. A man who is only temporarily in this country is not obliged to register, and so will not be included in the selective draft.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. HAYES. Yes.

Mr. SNYDER. Will the gentleman define what a "temporary resident" here means?

Mr. HAYES. If a man is here as a traveler or on business temporarily, and intends when his business is completed to return to his own country, of course he is not a resident of this country, and he would not be included.

Mr. SNYDER. That would not contemplate including any man who is a single man working here in an industry and living with some man who is a resident?

Mr. HAYES. He would be a resident.

Mr. SNYDER. And he would be included?

Mr. HAYES. He would be included, of course.

Mr. JAMES. Mr. Chairman, will the gentleman yield?

Mr. HAYES. Yes.

Mr. JAMES. If you wait until a treaty has been negotiated between the United States and Russia regarding the Finnish, it will mean that we will never get the Finnish in either army, because there is a treaty between the Grand Duchy of Finland and Russia which exempts them from military duty.

Mr. McKENZIE. Mr. Chairman, will the gentleman yield?

Mr. HAYES. Yes.

Mr. McKENZIE. Is it not a fact that all aliens here temporarily, as suggested by the gentleman from Pennsylvania [Mr. GRAHAM], would have 60 days to get out, even if this law went into effect?

Mr. SCOTT of Michigan. The third line in the bill, it seems to me, thoroughly explains the inquiries of the various gentlemen in regard to the language used. It is, "That any alien eligible by existing law to become a citizen." It seems to me that solves it. If he is not a resident, he would not be included.

Mr. HAYES. No.

Mr. SNYDER. Mr. Chairman, will the gentleman yield again?

Mr. HAYES. Yes.

Mr. SNYDER. Will the gentleman explain further how long a man could maintain a temporary residence in this country without becoming eligible to citizenship?

Mr. HAYES. He might maintain it for a lifetime.

Mr. SNYDER. That would not be a temporary residence, if he was here for a lifetime.

Mr. HAYES. If he is here expecting to return, he does not become a permanent resident here. The gentleman is an attorney and is familiar with the law in regard to residence.

Mr. SNYDER. No; I am not an attorney.

Mr. HAYES. If a man goes to a place not intending to make it his home, he never becomes a resident.

Mr. SNYDER. I am in favor of this bill and I am looking for information. I have in my employ quite a number of aliens who ought to be citizens, and I want to know how long these men can remain in this country and be considered temporary residents and not subject to this act.

Mr. HAYES. Mr. Chairman, as a matter of law, the residence of a man is controlled entirely by his intention, as manifested not by what he says but by the things that he does—by his acts. If his actions indicate that he is here only temporarily, he never becomes a resident, and therefore he would not be liable under this law at all.

Now, Mr. Chairman, I yield three minutes to the gentleman from Ohio [Mr. EMERSON].

Mr. EMERSON. Mr. Chairman and gentlemen of the House, I am strongly in favor of this bill. I did not know that we had to have a treaty with any other country in order to expel from this country an undesirable alien; and if there is any alien in this country who will not fight for this country in this hour he is undesirable and should be expelled. [Applause.]

If there is any alien now living in this country who feels that he would be better off somewhere else I would suggest that he immediately go to such a place.

Why did these aliens leave their native land; why did they leave their fathers, mothers, sisters, brothers, wives, and children and come across the Atlantic to live in a new land? Why did they give up old associations that were dear to them, old friends, old scenes? They did these things because they wanted to better their condition. They did these things to get better wages, better living conditions, a better form of government; in fact, they came here to find liberty, as they had been oppressed in their own countries.

They found here an asylum where they could enjoy liberty, religious and civil; where they could work and receive sufficient compensation for their labor. They have received all these blessings, all these privileges, all these opportunities in America. We are now engaged in the greatest war this country has ever known, and the result of this war will determine whether these liberties which they have enjoyed shall be continued or whether the world shall be ruled by the form of government that caused many of them to leave their native land. If there are any aliens living in this country who have lived here long enough to become citizens, and who have enjoyed all these privileges they should either be subject to military service or they should leave the country. [Applause.]

Mr. HARDY. Will the gentleman yield for a question?

Mr. EMERSON. I have not the time. If I had the time I should be glad to yield. The citizen or alien who will not stand up and fight for the institutions of this country should not enjoy the privileges of being an American citizen.

If this country is not strong enough and intelligent enough to make these aliens do their duty then we are not strong enough and intelligent enough to win this war.

Statistics show that in the city of Cleveland, where I live, that in many precincts 3 aliens have registered to 1 citizen. These aliens sit quietly by, enjoy this liberty, this prosperity, this great advantage of living in America and yet they owe no obligation to defend these liberties when they are endangered. And besides, they laugh at the American boy who has to be sent across 3,000 miles of ocean and fight. But while I believe we should make aliens fight for this country, I believe if the alien does fight for this country he is good enough to become a citizen of this country without further act of naturalization. [Applause.]

This war is no pink-tea affair. We see the possibilities of defeat staring us in the face unless we use every ounce of energy we have. Three thousand miles of ocean may be all that saves us from having the enemy on our own soil. The allies' fleet may be all that keeps the foe from our door. Suppose then the allies' fleet is removed from between us and the enemy, are we prepared to meet the enemy? We should have every available man possible. Our large cities are filled with aliens who work at our high wages, enjoy our privileges, and drink of our prosperity, but share none of the responsibilities. Will it always be thus?

If we permit the alien to do this, he is willing, as long as we will permit him to do it. How long will we continue? But

it is an outrage upon the young men of this country who are called upon to bear this extra burden. How long will we continue to be the laughing stock of the world. [Applause.]

If we do not do something now, how are we going to ask the fathers and mothers of this country to buy liberty bonds, to buy Red Cross stamps, to buy all these other things we are asking them to buy? How are we going to ask them to have wheatless days, meatless days, heatless days, workless days, and perhaps worse than this even before this war is over?

Let us pass this alien-slacker bill and force Mr. Alien to pay back in part for the privilege of living in this land of the free, where he can educate his children, where he can worship God as he pleases, where he can work for high wages, where he can have all the comforts of an orderly home.

These privileges we give to every alien who seeks shelter under the protection of the Stars and Stripes, but we ask the alien to uphold the institutions of this country in peace and in war. After we have given him all these privileges, I feel it is not asking too much if we insist that he pay back some of this obligation. This is a war of efficiency more than a war between countries. The question to be determined is, Which is the more efficient—a democracy or an autocracy? That will be the question that is settled by this war, and there should be no draw. If the Kaiser wins, then autocracy will be classed as the more efficient form of government; if the allies, with our aid, win, then a democracy will be considered the most efficient form of government.

If we win, then it will be considered best for all citizens to vote and have a voice in the Government. If the Kaiser wins, then it will be considered that the few are better qualified to have a voice in the Government.

It seems to me that if I were an alien and had fled from a land of militarism, a land of oppression, a land where the few governed the many, and had come to a land where I could speak and act as I felt, where I could enjoy liberty in its fullest sense, where I could take a part in the running of the Government; if I could have all these privileges, and came here because I could have them, after I had been here and enjoyed these same privileges for many years, and I found these privileges and these liberties endangered, I would be willing to fight for these liberties and privileges that I might hand them on to my children and those who came after me. [Applause.]

Many aliens are willing to do this; many aliens have enlisted voluntarily; many aliens have waived these exemptions and have entered the Army. They are just as good as if they were Americans, and I am willing to welcome to our great American family those who make this sacrifice.

But the contemptible alien slacker who has enjoyed all these privileges belongs in the first-line trench, and there is where he should be placed. [Applause.]

Mr. BURNETT. I yield five minutes to the gentleman from California [Mr. RAKER].

Mr. RAKER. Mr. Chairman and gentlemen of the committee, the chairman of the committee [Mr. BURNETT] has answered, I think sufficiently, the question as to treaties, so far as it affects this bill and its provisions. I will not go into that phase of the question at this time.

There are but two provisions in the bill. The committee will ask to strike out section 2. The first provision is that no one shall remain in the United States who is subject to the provisions of the draft law and will not participate in the war, either in this country or his native land, or withdraw his exemption claim, or who hereafter makes application for exemption under the draft law. In other words, the effect of the first section of the bill is to prohibit aliens eligible by existing law to become naturalized citizens of the United States who are natives or subjects of countries which are at war with Germany or with any of the other central countries of Europe from ever becoming American citizens when they have claimed or shall hereafter claim exemption from the selective draft. The section also requires the deportation of such aliens as soon as it is practicable to do so.

Second, which are the provisions of section 3 of the bill, those who are fighting with us and are natives of England, France, or Italy, should not be permitted to come to this country pending the war. In other words, their draft limit is higher than ours, and the man over 30 should remain in his own country and give the service to his country where he belongs in its hour of need and distress. We should not open the doors for a man of that kind who will not fight for his own country, but seeks to come to America, where we can not draft him. [Applause.]

I want to call the attention of the committee to the fact that among those registered under the draft last year there were 1,275,907 men who were aliens.

The total number registered under the provisions of the selective draft act of May 18, 1917, was 9,649,938, of which 1,229,259 were classified as aliens. According to the summary sheets in the office of the Provost Marshal General, this latter number does not include those subjects of foreign countries who have declared their intention of becoming citizens of the United States but who have not completed their citizenship here. There are, therefore, a large number of registrants not classified as aliens who, under treaty stipulations, if exercised, would be exempt from compulsory or other military service. Below is given a table showing the total number of registrants by States and Territories and the number of such registrants classified as aliens:

	Total of all registered.	Aliens.	Alien enemies.
Alabama	181,614	1,183	77
Arizona	36,932	14,652	193
Arkansas	149,444	517	73
California	297,532	67,464	3,948
Colorado	88,874	9,323	472
Connecticut	159,955	58,631	1,111
Delaware	21,864	2,883	92
District of Columbia	31,930	1,569	70
Florida	84,683	5,682	208
Georgia	231,418	1,224	120
Idaho	41,117	3,970	176
Illinois	672,498	95,145	6,051
Indiana	255,145	13,651	1,140

Under the selective-draft law quotas from the States and Territories and subdivisions were based upon the estimated population thereof, and in many subdivisions the registration returns showed a very large percentage of registrants classified as aliens. In some cases the percentage of those classified as aliens exceeds 65 per cent of the total number registered. This situation works a hardship on the citizen population of a community, and the man who under the laws of his native country may be obligated to render military service is resting here answerable to no one. I want to state to start out with, and to suggest that possibly 50 or 60 per cent of those men claimed their exemptions because they were advised by counsel or by their friends that if they made the claim that they were aliens they would be exempt. Having this advice and the facts being with them they took advantage of it. Among American boys I understand that the percentage has been very high of those who claimed exemption. The other 40 per cent of the aliens who are intent upon avoiding service are the ones who spoil the whole basket of apples, and we should enact a law that will reach all of them. If a man will not enter the service of this country in its present need—and here we have more than 1,200,000 of them—if he will not go to his own country and assist his own country in making the same fight that we are making, there can be no distinction between them. We are

all fighting for the same cause, fighting the same common enemy. If one wins, we all win. These men should beyond cavil be ready and willing to give their service. If not, they do not belong in the United States and the sooner we get rid of them the better.

Mr. GARD. Will the gentleman yield?

Mr. RAKER. I would be pleased to if I could, but not at this time. I have only five minutes. Now, we say to these men, "Gentlemen, you have come to this country to receive its benefits. You are beyond the pale of the law of your own country. They can not reach across and bring you back to France, England, or Italy." These other countries are willing that we should pass a law that will prevent these men claiming exemption, or that if they claim the exemption they will be deported. That is all there is in this bill. Place this law on the statute books, so that everyone may understand that there is no exemption for an alien of England or France or Italy, and that if he does claim that exemption he will be deported. Further, he can never become a citizen of America. When you do this we will find that there will be a ready response and but few will ever be in a position to be deported. We hope 95 per cent, at least, will withdraw their claims to exemption and will enter the service of this country, because they know that the very moment they are deported and landed on the shores of England, France, or Italy, if they are within the military age, they will be drafted and placed in the armies of their own native country, where they ought to be. From one end of this country to the other complaint has been made that here is an American boy who has been drafted, while here is an alien who is exempted, without any effort on the part of the American Congress to fix it so that the alien shall serve either in this country or his native land. There is dissatisfaction with the father, mother, and relatives of our boys that this alien who is receiving the benefits of this exemption does not participate in this country or in the service and army of the country to which he belongs. [Applause.] This bill should pass. It is workable. Good results will follow its enactment.

Mr. BURNETT. I ask the gentleman from Washington [Mr. JOHNSON] if he will use some of his time?

Mr. JOHNSON of Washington. Mr. Chairman, how much time have I occupied?

The CHAIRMAN. The gentleman has 46 minutes left.

Mr. JOHNSON of Washington. Mr. Chairman, I presume that under legislation such as this any alien can be forced to become a drafted soldier of the United States and then to become a citizen. That would end that. It might be said that any man, alien or otherwise, who was good enough to fight for this country, even when drafted, is entitled to become a citizen. In the brief inquiry I have made I had difficulty in finding the status of an alien in the United States Army. It may be interesting to some of the Members to know that in 1894 an act was passed limiting enlistments in time of peace to citizens or persons who have made their legal declaration of their intention to become citizens. In 1898 enlistments in the Reserve Corps were limited to citizens or persons who have made legal declaration of their intention to become citizens.

The act of 1917: Voluntary enlistments under act of May 18, 1917, subject to the same qualifications as under existing law, except as to age.

Enlistments in Navy: Revised Statutes, 1420, as amended by act of August 22, 1912 (37 Stat., 356, sec. 2), certain disqualifications for enlistment prescribed, but nothing said with respect to citizenship. There is apparently no law restricting the enlistment of aliens during either peace or war. Aliens are, however, excluded, even if they have declared their intention to become citizens, under article 3524 of the Navy Regulations of 1913.

Naturalization of enlisted men (Rev. Stat., 2166): Aliens who have enlisted in the Regular or Volunteer Army may become citizens after honorable discharge without having made declaration of intention to become citizens.

The act of July 26, 1894 (28 Stat., 124): Aliens who have enlisted in the Navy or Marine Corps may become citizens after honorable discharge without having made declaration of intention to become citizens.

The act of June 30, 1914, is practically the same as the act of July 26, 1894.

All that this bill is for is to camouflage the people and satisfy the hue and cry about Americans who submit to the draft while their alien brothers are here and do not have to submit.

Mr. HAYES. Will the gentleman yield?

Mr. JOHNSON of Washington. Yes.

Mr. HAYES. Did the gentleman find any law of the United States that would affect the status of these draft aliens after the war?

Mr. JOHNSON of Washington. The first-paper citizens who go into the draft now? What would happen to a man drafted into the Army when he came back here after the war?

Mr. HAYES. He would make his proof as usual.

Mr. JOHNSON of Washington. After fighting for the United States?

Mr. HAYES. Yes; under force.

Mr. JOHNSON of Washington. And the man would not have a right to vote, and yet he fought for America, came back, and has to apply for papers for helping to defend this country under force.

Gentlemen, is it legal, is it in keeping with the democracy of America, to force a man of military age to give up his country, his nationality, or else leave the country and be classed as an undesirable criminal after he has lived in America, to give up his citizenship?

Mr. BURNETT. And yet the present draft law includes them. That is an assault on the present draft law.

Mr. JOHNSON of Washington. Personally, I am sorry the draft did not require the registration of all aliens.

Mr. BURNETT. It does, between the ages of 21 and 31.

Mr. JOHNSON of Washington. I mean all aliens, whether of draft age or not—aliens and alien enemies of all ages.

Mr. SHALLENBERGER. What does the gentleman from Washington say to the second section, which provides that the President is authorized and empowered, under such rules and regulations as he may prescribe, to draft any alien in the United States to perform such mental or physical labor on the farm, in the manufacturing establishments, or other enterprises as he may deem necessary or proper?

Mr. JOHNSON of Washington. I am told that that section is to go out. At the time I took my original position against this bill that preposterous section was supposed to be one of its star features.

Mr. Chairman, I have here a letter from the Secretary of State, giving his objections to this legislation at this time. In his letter he does not call attention to the fact that the President, through the State Department, is the agency through which the United States deals with other countries, but we all know that to be the fact. But in the letter written to me some time ago—and he has since written letters to other Members—the Secretary of State begs that this legislation be not taken up while his department is engaged in negotiating "draft" treaties. Mr. Chairman, that we have passed much important war legislation because it has been requested by the President of the United States and that the President wanted the legislation as a war measure has been enough. And now, when the Secretary of State in a dignified way requests Congress to withhold legislation on this subject, it is, in my opinion, the least this body can do to give heed to the request of that department, which is organized to deal with the foreign governments.

Mr. BARNHART. Will the gentleman read that letter to which he refers?

Mr. JOHNSON of Washington. I will be glad to read it. This letter is dated September 17, 1917. I think that anyone who has given attention to the matter will know that it takes time to negotiate treaties, and I have wondered where the Congress of the United States would have stood if before the war its Members had read that the allies had proposed to draft citizens of the United States. I can hear the voices ringing now calling for protection of American citizens.

Mr. McLAUGHLIN of Michigan. Is the letter the gentleman refers to from the State or the War Department?

Mr. JOHNSON of Washington. It is from the State Department, from the Secretary of State. The letter is as follows:

MY DEAR MR. JOHNSON: I have received your letter of September 15, in which you request an expression of my views regarding the provisions of H. R. 5667, which provides for the deportation under certain circumstances of citizens or subjects of the countries who are at war with the "central powers of Europe"; for the drafting of "any alien in the United States" to perform certain classes of "mental or physical labor on the farms, in the manufacturing establishments, or other enterprises in the United States," and for other purposes.

You are doubtless aware of the provisions of Senate resolution No. 108 of July 31 (calendar day Aug. 1), 1917. Acting in pursuance of the provisions of this resolution, the department has undertaken to initiate negotiations with each of the allied powers looking to the conclusion of agreements providing for the drafting of the citizens or subjects of either of the contracting parties who may be residing in the territory of the other country. These agreements, it is hoped, will cover the various needs and desires of each country with respect to military service of the citizens or subjects of those countries who may be residing in the United States, as well as of the citizens of the United States residing in those countries.

That is the argument, statement, and request of the Secretary of State, Mr. Robert Lansing.

Mr. SNYDER. I would like to ask the gentleman if he has anything nearer the present time than that letter?

Mr. JOHNSON of Washington. I understand that the chairman of the Committee on Foreign Affairs, which, in my opinion, is where this bill ought to have been considered and not in the Committee on Immigration, has such a letter, dated only one week back.

Mr. SNYDER. That is five months ago.

Mr. JOHNSON of Washington. And in the meantime treaties have been negotiated with Great Britain and Canada and are in process of negotiation with Italy and France.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Washington. Yes.

Mr. WALSH. I would like to ask the gentleman if he has any information showing that the State Department has ceased to live in a state of hope and has gotten down to some actual realities?

Mr. JOHNSON of Washington. I just stated that negotiations for two treaties were announced as concluded with Great Britain and Canada.

Mr. WALSH. Simply the negotiations; but does the gentleman not understand that it is the purpose of the State Department to wait until all the cobelligerent nations have accepted treaties before any of them are sent to the Senate?

Mr. JOHNSON of Washington. It is not the purpose of this legislation to help the State Department; it is being passed for the purpose of scare and camouflage. I reserve the balance of my time.

Mr. WALSH. I do not think that is a proper statement for the gentleman to make.

Mr. JOHNSON of Washington. I believe that to be the fact, nevertheless. From the statements made at the very beginning of this debate, I think it is apparent that no one expects this bill to do more than pass the House of Representatives. Here we can make great talk for it, please our constituents, and offend only those in our districts who can not vote. No wonder the bill is popular. But is it right? If it was really desired to enact legislation to catch the alien slacker, why not turn this bill inside out, and make it read so that our allies may come to the United States and draft their nationals? That would get the slackers of our allies who may be, and doubtless are, hiding out in the United States in very considerable numbers. Such legislation would violate no treaty, and, as a matter of fact, would be in accord with the treaties now in process of negotiation by the State Department.

Mr. Chairman, I have not discussed, nor shall I discuss, the other paragraphs of this bill—the deportation and other clauses. We are told that section 2 is to be taken out. The sections following that one may be all right, but I base my objection to the bill on the fact that the State Department, which has the right to say, requests that the bill be not passed.

Mr. BURNETT. Mr. Chairman, I yield three minutes to the gentleman from Massachusetts [Mr. GALLIVAN].

Mr. GALLIVAN. Mr. Chairman, in view of the fact that on another occasion I addressed myself to the subject matter of this bill at length in this House, I do not propose to burden the House with any extended remarks at this time. I have watched the attempts of those who oppose this legislation to base their opposition on some reasonable grounds, but everything that has so far shown itself has been a fishing expedition since we started this discussion up to the present time, and it has reached nowhere. Not a single reason has been advanced against the passage of this legislation. I am one of those who believe that thousands of men in this country who will come under the operation of an act such as this are not so anxious to evade service, but they have been assured that there is a grave doubt whether or not they shall ever be subject to service; and if we pass legislation now, I believe a great percentage of those men will speedily respond to the call, not because they have been scared but because a doubtful question has been settled. That is so in Boston, and I believe it is so in every large city in the country. I said before that not an argument has been advanced against the passage of this bill. My friend from Alabama [Mr. BURNETT] has said that no treaty rights are involved. I think he is a pretty good constitutional lawyer, and his judgment on that point is good enough for me. The gentleman from Washington [Mr. JOHNSON] tried to find an argument that Sweden and Norway and other neutral countries were brought in under this bill, and it is evident that he has not read the bill.

Mr. JOHNSON of Washington. Will the gentleman let me state the countries that are included under this bill?

Mr. GALLIVAN. I have only three minutes.

Mr. JOHNSON of Washington. I will yield the gentleman an additional three minutes.

Mr. GALLIVAN. Very well; go ahead.

Mr. JOHNSON of Washington. I think I have a statement here. Foreigners have the right to live here as long as they wish without being citizens of the United States of America, exactly as Americans have the right to live, as they do, in Mexico, Cuba, Venezuela, Turkey, China, Canada, Spain, France, without, for that matter, becoming Mexicans, Venezuelans, Turks, and so forth. That is just one of the difficulties you get into. I yield the gentleman three minutes of my time.

Mr. GALLIVAN. I am grateful to the gentleman. I do not believe the gentleman made clear what he attempted to make clear. At any rate I can not connect his observation with anything I have said. I am fearful that he was not following me. I repeat what I have already said. Not a single argument has been advanced against the passage of this bill, and even the men who stood here an hour ago trying to filibuster and prevent its consideration have all taken to the woods. [Laughter.] Like the Arabs, they have folded their tents and have silently stolen away.

I hope the committee will finish the discussion of this bill in the two hours provided by the rule, and that under the five-minute rule we shall go to work speedily and that before this House adjourns to-day the bill will have been passed by an overwhelming majority of this House. [Applause.]

Mr. MEEKER. Mr. Chairman, will the gentleman yield?

Mr. GALLIVAN. Yes.

Mr. MEEKER. Would that entitle this to be called the Flood elimination bill, inasmuch as the gentleman has said that all of its opponents have taken to the woods?

Mr. GALLIVAN. Not coming from the regions near the Mississippi, I do not quite gather what this has to do with "floods." Mayhap the gentleman from Missouri refers to the gentleman from Virginia.

Mr. MEEKER. I rather think the gentleman got the point.

Mr. GALLIVAN. Let us waste no more time. We have been asked by the War Department to hurry through an amendment to the selective draft which will compel the registration for service of all American boys who have passed the age of 21 years since June 5 last. And in the same breath we are besought to delay the passage of this bill which will force the alien "welcher" to get on the line or get out of this country. For myself, unless this bill passes, I shall hesitate in giving my support to the first proposition which I have mentioned; if we get the aliens, we may not need the others, and pray God we may never need them. [Applause.]

Mr. Chairman, pass this bill to-day and help to correct what would otherwise be a gross injustice. Pass this bill and the mothers of the boys now in France and in the camps and the cantonments will feel sure that there is no discrimination—that rich and poor, high and low, citizen and noncitizen, are all within the power of the Government. This Nation will then truly stand as a symbol of inviolable justice. [Applause.]

Mr. JOHNSON of Washington. Mr. Chairman, I yield five minutes to the gentleman from Illinois [Mr. DENISON].

Mr. DENISON. Mr. Chairman, I would not be in favor of this bill at this time if I knew that the State Department would negotiate treaties with other Governments at war with Germany in time to get their subjects who are in this country into the military service in time to do some good, but in the absence of knowledge that they will negotiate such treaties in time to get those subjects into the military service so that they can accomplish some good, and particularly in the first draft, I feel justified in voting for the bill. I think that the subjects of other Governments at war with our enemies who are in this country should be compelled to come into our military service or into the service of their own country. It has been a great injustice to our own people, I think, that the subjects of other countries fighting with us against a common enemy should be counted in the quota of men to be furnished under the draft law, and yet should be exempted from military service and be permitted to remain at work here when our own boys were compelled to go to war to fight for their Governments as well as ours.

But I rose particularly to ask the chairman of the committee a question in regard to section 3 of the bill. That section provides that after 30 days from the passage of the act no alien who is a native or the subject of any country that is engaged in war with Germany or the central powers shall be permitted to enter the United States "except by permission of the President of the United States." In view of the fact that the House and the country well know the views of the President of the United States on admitting foreigners to this country, he having been persistently opposed to the Burnett immigration bill and having vetoed it after both Houses of Congress had passed it, does not the chairman think that that exception in section 3 will absolutely destroy the effect of this section of the bill, be-

cause the President, unless he changes his views entirely on the immigration question, will permit all foreigners, regardless of their illiteracy or other undesirable qualifications to come into the country. The President's views on that question are well known. And unless that exception is stricken out he will probably nullify the section by a general Executive order permitting them all to come in.

Now, if that is true, does not the chairman think that exception ought to be taken out of section 3?

Mr. BURNETT. I will say to the gentleman that the purpose of that is because we are constantly getting foreigners over here from those countries who do not come within the scope of section 4, which says it shall not apply to accredited officials of foreign Governments nor their suites, families, guests, or servants. There are frequently men who come here not accredited but for the purpose of consultations, negotiations, and so forth. I do think the suggestion of the gentleman should not prevail, because the purpose of this would be to keep those men who are subject to military duty over in their own country, and while the President was opposed to the immigration bill, I do not believe that he would oppose the idea that these people who are subject to military duty should stay over in their own country and fight its battles. That was the reason that this authority was given the President.

Mr. DENISON. In view of the President's position on this matter, and this will permit foreigners to come in here, that he did not want to exclude even those who are illiterate and could not read or write; in view of the well-known position of the President, does not the chairman think it would give him a blanket permission under this exception?

Mr. BURNETT. I do not think so.

Mr. DENISON. Why not? The chairman certainly does not think the President would change his mind on the question?

Mr. BURNETT. No; that was a peace measure. Of course, the President would certainly be in accord with the principle that these men over there who are subject to military duty ought not to be allowed to come into this country, and this is to keep them out unless the President, for some good reason, should permit individual cases to come in.

Mr. DENISON. Does not the chairman think the bill ought to specify any reason which would permit them to come in and let the law be specific and take this extraordinary power out of the hands of the President?

Mr. BURNETT. We could hardly——

Mr. MADDEN. Stop the President from changing his mind?

Mr. DENISON. We would like to, if we could.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BURNETT. Will the gentleman from Washington yield some more of his time?

Mr. JOHNSON of Washington. I yield to the gentleman from Virginia [Mr. FLOOD].

The CHAIRMAN. How much time?

Mr. JOHNSON of Washington. How much time have I remaining?

The CHAIRMAN. The gentleman has 25 minutes.

Mr. JOHNSON of Washington. I yield the gentleman 15 minutes.

Mr. FLOOD. Mr. Chairman, I am in full sympathy with the proposition that aliens living in this country and enjoying the blessings of our free institutions and American prosperity should do their share of the fighting to uphold the American cause and the American flag, but I am opposed to this House or this Congress or this Government taking any action or enacting any law that violates a provision or provisions of treaty or treaties which we have with our cobelligerents or any other nation and I am opposed to this House passing a bill that violates the accepted principles of international law which have been accepted by civilized nations and for a violation of which we entered this war. [Applause.]

Mr. DENISON. Will the gentleman yield?

Mr. FLOOD. I will.

Mr. DENISON. In view of the fact the Constitution makes the treaties as well as the Constitution the supreme law, how could this House enact a law violating a treaty?

Mr. GORDON. We could do it the same as we do when we pass a law violating the Constitution.

Mr. FLOOD. We could do it. Right now the gentleman has a concrete demonstration of how this House proposes to enact a law violating a number of treaties.

Mr. DENISON. We may pass a law, but it would not have any effect because——

Mr. FLOOD. The gentleman means the law would not have any effect?

Mr. DENISON. That is what I mean.

Mr. FLOOD. Perhaps the President might protect the honor of this Nation under the provisions of the Burnett bill by not exercising the power given to him under it, and the Supreme Court would certainly declare it violative of some treaties we have entered into with our cobelligerent nations.

Mr. DENISON. He could do it by ignoring the act of Congress.

Mr. GORDON. He could veto the bill, too.

Mr. FLOOD. He could veto the bill. I am opposed, I will say to the gentleman, to the House itself going on record as being willing to violate the provisions of a treaty that we solemnly entered into with one of the great nations of this world and one that is our cobelligerent——

Mr. GORDON. Will the gentleman yield?

Mr. FLOOD. I will.

Mr. GORDON. It has been repeatedly denied by speakers here on this floor within the last half hour that this bill violates any treaty. Will the gentleman be kind enough to advert directly to the language of those treaties which are violated by this proposed legislation?

Mr. FLOOD. I will. I do not see how anyone with an impartial mind could put any other construction upon the language of the treaty we have with Italy than that it is a violation of the treaty. The bill does not purport to violate a treaty. It does not do it in a brave and manly way. It resorts to subterfuges and evasions, but nevertheless it violates these treaties.

Mr. MADDEN. Will the gentleman yield?

Mr. FLOOD. I will.

Mr. MADDEN. Is it the gentleman's opinion that if this bill should become a law it would provide authority under which the Government of the United States could draft aliens of our allies, or nationals of our allies, who are not subject to draft at home?

Mr. FLOOD. I had not considered it with reference to that phase, but I think so. I should think you could draft any aliens under the provisions of this bill.

Mr. GORDON. I call the attention of the gentleman to the fact that the Irish are not liable to conscription in their own country, but that they would be under this bill.

Mr. FLOOD. I will say to the gentleman it is not necessary to discuss that, because our Government has entered into a treaty with Great Britain and also with Canada to provide for the drafting of their nationals, and they are in process of negotiating a treaty with Italy and France.

Mr. LONGWORTH. Will the gentleman yield?

Mr. FLOOD. I will.

Mr. LONGWORTH. Would the gentleman state just what provision of our present treaty with Italy he believes this violates?

Mr. FLOOD. Article III of our treaty of commerce and navigation, negotiated in 1871, provides that our citizens shall be exempt from compulsory military service either on land or sea in the regular forces or the national guard or militia. We have practically a similar treaty with Japan and Serbia.

Mr. MOORE of Pennsylvania. That is, Italians in the United States.

Mr. FLOOD. Yes; that is what this bill refers to.

Mr. MOORE of Pennsylvania. The treaty says that?

Mr. FLOOD. Yes.

Mr. PHELAN. Will the gentleman yield?

Mr. FLOOD. Yes.

Mr. PHELAN. Will not that same section apply just as well against our drafting of Italians who have taken out their first papers and whom we have already voted to include in our draft bill?

Mr. FLOOD. We ought to regard our treaty. Whatever is the proper and honest construction of a treaty is what we ought to be bound by. Simply because we find it is convenient or it is to our interest to do a certain thing does not justify us in violating a treaty. We solemnly entered into this treaty with this great nation. We should live up to the obligations assumed under them until we are released in a regular and orderly and legal and honorable way.

Mr. LONGWORTH. Will the gentleman yield?

Mr. FLOOD. I will.

Mr. LONGWORTH. I am asking for information. Does the taking out of the first papers or the declaration of an intention to become a citizen of the United States thereby remove that individual from the operation of that clause of the treaty?

Mr. FLOOD. It would not.

Mr. LONGWORTH. If it does not it is not a violation, but if it does it is a violation. That is the vital point.

Mr. KAHN. If the gentleman will yield, I wish to say that Gen. Crowder was before the Military Committee yesterday

and stated that that provision of the law which takes in those who have declared their intention to become citizens was not being enforced.

Mr. FLOOD. Regarding the treaty?

Mr. KAHN. Yes, sir.

Mr. FLOOD. The Military Establishment of the Government is observing the laws of nations and is respecting the treaties the Government has made.

Mr. DENISON. I have the highest respect for the gentleman's opinion, and that is the reason I asked the question awhile ago. If we should pass this law and the State Department should advise the President that it contravenes the treaty, the practical result would be that the State Department would probably do so and would be justified in ignoring the law?

Mr. FLOOD. I think the gentleman is correct about that, but I do not think that fact would justify us in passing a law that we thought violated a treaty.

Mr. GALLIVAN. I would like to ask the gentleman from California [Mr. KAHN], who made the statement that Gen. Crowder said that that provision of the draft law was not being enforced, whether or not he can state——

Mr. FLOOD. Mr. Chairman, I have limited time, and I can not yield for that purpose.

Mr. GALLIVAN. I will make it brief. Does the gentleman from California insist that none of these persons are now at the camps?

Mr. KAHN. Oh, no; if they go voluntarily.

Mr. FLOOD. If this bill becomes a law and the President exercised the powers conferred by it, he would be forcing compulsory military service upon aliens of the United States by threat of deportation or threat of being denied the right of ever becoming citizens of this country, and that would be compulsory military service, just as if we had by physical force compelled such service. And that would be a plain, absolute violation of the treaties we have with Italy and other countries.

Mr. MOORE of Pennsylvania. Mr. Chairman, the gentleman is chairman of the Committee of Foreign Affairs, and ought to know what he is talking about. I would like to have him answer this question: In his opinion, would the passage of this bill violate a treaty we have with any other nation?

Mr. FLOOD. In my opinion, it would violate the treaty with Japan and Serbia, and it looks to me as if the purpose of this bill is to violate the treaty with Italy.

Mr. MOORE of Pennsylvania. This bill does not meet with the approval of the Secretary of State at the present time, does it?

Mr. FLOOD. It does not. The Secretary of State, through some of his friends on the floor here, asked for a delay of three weeks, in which our Government might negotiate treaties with some of our cobelligerents, just as we have with England and Canada.

Mr. MOORE of Pennsylvania. Would the passage of this bill in its present form embarrass the Secretary of State or the President of the United States in their negotiations?

Mr. FLOOD. I was informed last Wednesday by the Solicitor of the State Department that it would not only embarrass them in the negotiation of treaties with Italy and France, but it would probably break off the negotiations.

Mr. MOORE of Pennsylvania. And this during the period of the war, when they have the responsibility?

Mr. FLOOD. Yes.

Mr. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. Yes; but I would like to get along.

Mr. ROGERS. If this bill should be so amended as to eliminate the subjects of countries with which we at present have a treaty, and if it should further be so amended as to eliminate the subjects of countries with which we might in the future make reciprocal agreements, would that overcome the objection of the gentleman from Virginia?

Mr. FLOOD. I think so.

Mr. MADDEN. That would beat the bill, would it not?

Mr. FLOOD. I would have no objection to it.

Mr. HAYES. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. Yes.

Mr. HAYES. The gentleman, I know, would not knowingly make a misstatement. By its terms this bill would not affect the Japanese at all in this country.

Mr. FLOOD. We have a provision in the treaty with Japan similar to the one I read in the treaty we have with Italy.

Mr. HAYES. The gentleman would not claim that by its terms at least this bill undertook to include in the draft any aliens?

Mr. FLOOD. No. I said that it did not. I said that by subterfuge and evasion they——

Mr. HAYES. How would you then violate the treaty?

Mr. FLOOD. You would accomplish it not by direct and plain language but, as I said just now, by evasion and subterfuge. You force compulsory military service on these aliens in plain violation of the treaty.

It is idle to argue, as the gentleman from Alabama [Mr. BURNETT] has done, that such aliens are free to leave the United States or free to remain and not enter the military service upon being denied the right of becoming citizens of the United States, or of being deported as soon as practicable. Everyone knows that these threats of denial of the rights to become citizens and of deportation are the pressure of force being brought to bear upon persons exempted from the military service by treaty in order to compel them to join the Army.

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. Yes.

Mr. WINGO. As I understand, the gentleman's objection is that this law will violate the terms of the treaties we have with these nations?

Mr. FLOOD. Yes.

Mr. WINGO. Does the gentleman contend that the present relations that exist could reasonably have been within the contemplation of the contracting parties at the time the treaties were made?

Mr. FLOOD. This treaty with Italy was made in 1871, and I do not think that the fact that the contracting parties did not then contemplate this great world war at this time or at any time, and that the two countries would be engaged as a cobelligerent in this war, is any justification for violating the explicit terms of that treaty.

Mr. WINGO. What I want to get is the gentleman's viewpoint as an expert on international law. The gentleman did not directly answer my question. Does the gentleman contend that the contracting parties at the time they made that treaty could reasonably have had in contemplation the conditions that exist now?

Mr. FLOOD. The great war?

Mr. WINGO. Yes.

Mr. FLOOD. I suppose not; but they had this in contemplation, that Italy might be engaged in war and we might have our nationals there, and this country might be engaged in war and they might have their nationals here. It provided that we should not draft or by compulsory force enlist Italians in any branch of our service in any war that we might be engaged in.

Mr. WINGO. That was in contemplation by the parties, and I agree with the gentleman; but does the gentleman believe that at that time the Italian Government and this Government had in contemplation a condition whereby we would be allied with them, fighting with Italy?

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. JOHNSON of Washington. Mr. Chairman, I yield to the gentleman five minutes more time.

The CHAIRMAN. The gentleman from Washington yields to the gentleman from Virginia five minutes. The gentleman from Virginia is recognized for five minutes more.

Mr. BARNHART. When the gentleman has answered other questions, I ask that he yield to me.

Mr. FLOOD. Let me go a little further, and then I will yield. Of course it is desirable that these aliens should join the Army, and I have no doubt that the treaty being negotiated between this country and Italy will make provision for the drafting of these very aliens, but because it is desirable that they should become a part of our fighting forces will not be considered justification for our violating the provisions of our treaty with reference to them, and it certainly is not an excuse for denying the State Department, which is negotiating this treaty on our part, a period of three weeks within which to complete the negotiations.

The gentleman from Alabama stated that the reason this bill had not been taken up sooner was because the Committee on Naturalization and Immigration had not before had the call on Calendar Wednesday. The gentleman then had not had a suggestion from the State Department for postponement of the consideration of this bill until either this Wednesday or last Wednesday, and when that request came, with the statement that it would greatly impede if not render impossible satisfactory completion of the negotiations, the gentleman refused to give that delay and the House sustained him. That is past, and I have nothing more to say about it.

I am glad the gentleman has determined to strike out section 2. I called attention, in the few remarks I made this morning, to the fact that the bill in its present shape would defeat the very object that its patrons and supporters had in view in reporting and passing it. It was reported on August 4, 1917—six months ago. I do not know whether I am entitled to the

credit for enlightening the gentleman from Alabama upon the serious defect in his bill. If I am, I am compensated for the efforts I have made with reference to this bill to-day. I presume I am entitled to this credit, as there was no suggestion from the gentleman from Alabama to amend it until I addressed myself to the second section of it earlier in the day. Besides being unconstitutional that section is obnoxious to the very purposes of the bill.

Many neutral countries other than those having treaties of military exemption have protested to the United States against the incorporation of their citizens or subjects into the National Army. One class of our cobelligerents based their protest upon treaty stipulations. The other class based their protest upon the general practice of nations, a practice observed by all civilized nations, not to compel neutral aliens to serve in the armed forces of a belligerent.

If this bill had become law as it was reported, cobelligerents of the United States could have protested upon both of these grounds, and the President would probably have been forced by the pressure from the nations with whom we are associated in this war, and who have suffered more than we have, and neutral nations also, to exercise the power given him under the second section of this bill and draft such aliens to perform menial or physical labor, and these aliens would have been pressed into industrial establishments of the country, while Americans would be sent abroad to the battle field. Precisely the condition which the opponents of this bill desire to avoid, and precisely the condition which will be avoided by the treaties which are being negotiated with our cobelligerents. I again express the gratification that the opposition of myself and those who voted to dispense with Calendar Wednesday has accomplished this much, so that if acting either under this law or under the treaties, the aliens of this country will be forced, in return for the blessings and benefits which they have received from America, to take their stand in the ranks by the side of American boys and help uphold the American cause and carry its flag to victory. [Applause.]

Mr. GARD. Mr. Chairman, will the gentleman yield there?

Mr. FLOOD. Yes.

Mr. GARD. Is there any distinction in the Italian treaty between the state of affairs whereby we might be at war with another country at the present time when we are an ally with Italy?

Mr. FLOOD. None in the world. There is a clear, straight, positive treaty to the effect that we will not draft or compel any of their nationals to enter any branch of our military service.

Mr. GARD. Even though we be their allies?

Mr. FLOOD. Even though we be their allies; under no circumstances without their consent.

Mr. LONERGAN. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. I will.

Mr. LONERGAN. Is the gentleman, as the chairman of the Committee on Foreign Affairs, in a position to state positively for the State Department the maximum time required to complete the negotiation of the treaties?

Mr. FLOOD. I do not believe any statement could accurately be made. I talked with the Solicitor of the State Department this morning. I was informed that the final draft of the treaty between this country and Italy had been made, and some time ago sent to the Italian ambassador here, and transmitted to the Italian foreign office, and they expected a reply in a few days; but he could not say definitely when, because that depends upon the Italian Government. [Applause.]

The CHAIRMAN. The time of the gentleman from Virginia has again expired.

Mr. BURNETT. Mr. Chairman, I yield five minutes to my colleague on the committee, Mr. SABATH.

The CHAIRMAN. The gentleman from Illinois is recognized for five minutes.

Mr. SABATH. Mr. Chairman, I was indeed pleased to hear from the gentleman from Washington [Mr. JOHNSON] that he is pledged to the support of the President of the United States. I was greatly pleased to hear that he is desirous of being of service to the Department of State, and I wish to assure him that it is not my desire to do anything that would in any way conflict with the aims and efforts of the President or of the State Department.

Mr. Chairman, I am of the opinion that even if this bill be in contravention of the treaty with Italy, as claimed by several gentlemen, Italy, I am sure, shall not or can not interpose objection to it for the reason it will be of as great, yes, even greater, benefit to that nation than to our own country, and consequently we do not by our vote here to-day do any injury to Italy or any other country with which we have a treaty on this subject.

Mr. VENABLE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from Mississippi?

Mr. SABATH. I have only five minutes, and I desire to make a few observations on the bill.

The CHAIRMAN. The gentleman declines to yield.

Mr. SABATH. That is all I desire to say about the treaty. I disagree with the chairman of the committee as to the designation of the bill. He calls it an alien slacker bill. I do not. I call it an alien service bill. Personally I have had no requests from any of these aliens to be exempted from service; but, on the other hand, I have had thousands of requests from aliens who desire to be of service to the country, but who, owing to the provisions of our law, are prevented from serving. Therefore I think it manifestly unfair that we should call this a slacker bill. Some gentleman shakes his head. I wish to say that we have to-day over 76,000 aliens in the service of the United States who have not claimed exemption, who are there to serve, but who, because of their alienage, are deprived of the privilege of being sent to the front. I hope that within a day or two we will be able to pass a law that will eliminate that provision which prevents the War Department from sending them to the front, where they desire to serve.

Mr. GORDON. Will the gentleman yield?

Mr. SABATH. I yield to the gentleman from Ohio.

Mr. GORDON. Tell me what provision there is in the law that prevents any alien from volunteering in the service of the United States, except alien enemies.

Mr. SABATH. We have thousands of designated alien enemies, so called, who have volunteered and are now in the service.

Mr. GORDON. Of course, you do not think we ought to fight this war with alien enemies in our ranks, do you?

Mr. SABATH. But the fact that they are designated alien enemies does not make them so. They are just as anxious to fight for this country as is the gentleman from Ohio. They have volunteered. They have refused to claim exemption, and are volunteering to-day; because not only are they fighting for the principles that we are fighting for but they have other reasons to fight, namely, to help their brothers across the sea who have been domineered by Prussian and Austro-Hungarian misrule and by the Hapsburg and Hohenzollern Governments. They desire to aid in bringing freedom to thousands of their oppressed brethren across the sea. [Applause.] That is the reason they are fighting; they have a double reason for fighting. I say we should not designate them as alien enemies. [Applause.]

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. BURNETT. I will ask the gentleman from California [Mr. HAYES] to use some of his time.

Mr. HAYES. Mr. Chairman, before yielding time to any other gentleman I want to say just one word in reply to the gentleman from Virginia. Two of the universally recognized elements of sovereignty are that a nation may determine the character of the aliens that it permits to reside within its borders, and that it has the right to determine under what conditions aliens shall be admitted to citizenship.

Mr. FLOOD. Does the gentleman address his remarks to me?

Mr. HAYES. This bill says that any man in this country who is so lacking in manhood as to shirk the most responsible, the highest duty of citizenship to his own country and to this country is not fit to become a citizen of the United States. That is what this bill says, and that is all it says. It does not undertake to force any alien into the drafted army or into any other arm of the service of the United States or of any other country.

Mr. FLOOD. Do you not provide for their deportation if they do not?

Mr. HAYES. Surely; we regard them as undesirable citizens. I now yield three minutes to the gentleman from Tennessee [Mr. AUSTIN].

Mr. AUSTIN. Mr. Chairman, the other day in discussing the question of the new draft with an official of the Provost Marshal General's office, he stated that that office would ask the Military Committee to change the existing draft law so as to enable the War Department to secure the requisite number for the second draft without pro rating the number among the respective States. In other words, where a State on account of its alien population has failed to provide a sufficient number, the States which are without foreign or alien population are compelled to make up that deficit.

I have spent several days in camp with 30,000 American soldiers, 10,000 of whom are from Tennessee, and every one of them to a man desires and expects the American Congress to

pass this legislation. The fathers, mothers, and the wives of the men who have already been drafted or who volunteered and those who are going to be drafted during this month, those here ready to sail, and those now fighting in France to-day expect every Member of the American Congress to vote for this legislation. There is not a more serious piece of legislation which has been submitted to us for our consideration and action. You can not escape responsibility before your constituency upon a technicality or a so-called treaty over 40 years old in this matter. This bill puts the law in the hands of the President to execute. If he thinks it evades a treaty, he can prevent its execution. If new treaties are successfully negotiated that are now pending, he will have the machinery already upon the statute books to carry out this draft and make the aliens do their just share of the fighting. A foreigner in America who will not accept American citizenship, and who will not fight now for his native country for bleeding France or for suffering Italy, or to save England, to restore Belgium, for the freedom of the world and to destroy autocracy, is unworthy of the blessings of our American Government. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAYES. I yield two minutes to the gentleman from Massachusetts [Mr. ROGERS].

Mr. ROGERS. Mr. Chairman, when this bill is reached under the five-minute rule I propose to offer the following amendment:

After the word "citizen" on page 2, line 4, insert the following:
"*Provided, however,* That this act shall not be construed to supersede the provisions of any existing treaty with such country the terms of which stipulate that the United States shall not subject the subjects of such country to compulsory military service."

I think I do not need to say to this House that I am and have been for many months as much interested as any Member of the House, or any person outside of the House, in reaching the alien slacker wherever he may be found. On the other hand, we have obligations which we can not be too scrupulous in observing. We are an honorable Nation engaged in a great war to-day because the word of another nation could not be accepted and could not be relied upon. Therefore where we have a treaty, where there is a treaty stipulation, we must be most eager and most earnest to be guided by the terms of that treaty. We must lean over backward, if necessary, in order to do our full international duty.

One point of view in this House is to the effect that the Burnett law does not violate any treaty. If that be true, why not expressly say in the bill that it shall not be so construed. Another point of view in the House is that the Burnett bill does violate some treaty. Without admitting it violates any treaty, let us declare, as an honorable Nation should, that we will not to that extent regard this law as operative, but that we may be depended upon to observe our solemn international promises. [Applause.]

Mr. BURNETT. Mr. Chairman, I yield to the gentleman from Mississippi [Mr. QUIN] one minute.

Mr. QUIN. Mr. Chairman, when the Senate alien-slacker bill was before the Committee on Military Affairs last August the State Department said to the committee, "Hold this up and we will have treaties negotiated by December." The committee stood by the State Department, and here it is on the 6th day of February, 1918, and still the department talks about negotiations being in progress. This bill is to make these alien cobelligerents fight in our Army or move back to their own countries and help their own governments in this war. I am for that very thing being done now. We have to-day a million four hundred and odd thousand volunteer soldiers in the Army, and only 76,000 of them are alien cobelligerents. We have in addition to that 500,000 drafted men in the Army. Our entire Army is now 1,940,000. All full-fledged Americans except the 76,000 stated. Here are these aliens of our cobelligerents in this war, all over the country, whom we are feeding, who enjoy the hospitality of the people and enjoy the privileges of this great Government of democracy, who are doing nothing to help us in this great war, and gentlemen oppose this bill because they say it violates a treaty. It violates no treaty. Our Government can withdraw from any treaty with these nations fighting on our side in this war for the solution of all. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. Mr. Chairman, in behalf of the gentleman from Washington [Mr. JOHNSON], I wish to yield the time at his disposal. I would like to inquire how the time now stands?

The CHAIRMAN. The gentleman from Washington [Mr. JOHNSON] has nine minutes, the gentleman from Alabama [Mr. BURNETT] has two minutes, the gentleman from California [Mr. HAYES] has nine minutes.

Mr. STAFFORD. Mr. Chairman, I yield two minutes to the gentleman from Mississippi [Mr. VENABLE].

Mr. VENABLE. Mr. Chairman, I do not think any man seriously contends that the treaty with Italy specifically denies the United States the right to compel military service by the nationals in this country. Now, it is argued, in the first place, that this bill is not a violation of that treaty—first, because the compulsion which is sought to be exercised is a moral compulsion instead of a physical one.

I do not think that the United States Government can be placed in the attitude of taking this position. These nationals have their homes, their families, their business here; and when you say to them that they must leave the country and sacrifice everything they have in the world unless they enter the Army you have as fully and completely coerced them as if you applied physical force or the pains and penalties of a penal law.

In the next place, it is urged and argued that this treaty, as I understand it—the gentleman from Illinois implied the argument, and it was also implied by a question by the gentleman from Arkansas [Mr. WINGO]—that because the situation is different now from what it was at the time the parties entered into the contract—and a treaty is a solemn contract—that therefore the treaty or contract is not now binding, and that one of the parties passing on the question that conditions are different can be relieved from the operation of that contract and suffer no moral guilt if he attempts it.

There is a rule of law which is a rule of common sense, and that is that when any contract is clear and explicit in terms that it means what it says literally and is not open to construction. It seems to me that it would put the United States Government in a sorry position if it, through the legislative branch, declared and ignored a solemn contract made with a foreign country, pleading in excuse that circumstances had changed, and for that reason one of the parties to the contract could pass upon that question and relieve itself.

Again, it is argued, as I understand, that this contract should be violated because a coordinate department of the Government has not succeeded thus far in getting a new agreement with the parties by which the old and binding contract is removed. Now, we all desire these national alien slackers to serve, and they ought to serve. We all appreciate the necessity of their service and the moral right to their services, but we are not to be blamed if, in order to get their services, we are unwilling to violate a solemn governmental contract, and so violate our national honor. [Applause.]

Mr. BURNETT. Mr. Chairman, I yield two minutes to the gentleman from Massachusetts [Mr. PHELAN].

Mr. PHELAN. Mr. Chairman, I favor this legislation, and I hope it will pass immediately so that it may be enacted into law in time to permit the drafting of aliens for subsequent drafts. I have for months exerted every effort to get action on this necessary legislation. I spoke before the Military Affairs Committee of the House as long ago as last September, urging the report of some bill providing for the drafting of aliens residing in this country. For months past I have repeatedly conferred with the Secretary of State—Mr. Lansing—and with the Solicitor of the State Department, and also with Gen. Crowder, Gen. Bliss, and other officials in the War Department in an endeavor to bring about the enactment of legislation which will include aliens under our draft law.

I favor the passage of this bill, which will remedy an injustice and inequity which, however unavoidable in the past, can and should now be remedied.

It is an injustice to permit aliens living in the United States to avoid military service and stay at home while our American boys are fighting in the trenches. These aliens have thus far not only been permitted to escape their just burdens of the war, they have actually benefited by stepping into the jobs at home left vacant by the departure of our American soldier boys for the front. More than that, they and their families have been entirely relieved from the anxiety and sorrow attendant upon the departure of our American boys from their home circles and their families. Indeed, they have been entirely free from the danger and peril which our Nation at war has found it necessary to impose upon her sons. The time has come when we must demand that these aliens perform similar duties and assume equal burdens with our own American citizens.

I certainly do not want to see any of our treaty obligations violated. I am convinced they will not be violated by the passage of this bill. The President has full authority, even if any question arises, to prevent any violation of our treaty obligations. In the time allotted me I can not elaborate, but I am confident in the soundness of the position I assume.

I again urge the speedy enactment of this necessary legislation. The people of the country are right in their demand that

aliens be drafted. It has resulted in an inequitable distribution of the burdens of war all over the country, but especially in those communities where there is a large alien population such as the congressional district which I represent and, indeed, in the entire Commonwealth of Massachusetts. Over 30 per cent of the registrants called in Massachusetts were aliens, and approximately 25 per cent of the registrants called were exempted as aliens. In the city of Lawrence, which is a part of the district which I represent, there were so many aliens exempted that it required the calling of over 42 per cent of the total number registered to get the required quota. The Provost Marshal General's report shows that it required the calling of 1,302 registrants to get the quota of 558. The great percentage of those exempted were exempted on the ground that they were aliens. The passage of this bill will tend to rectify the inequity imposed upon such communities.

I hope, moreover, that the passage of this bill will be supplemented by legislation which I have already advocated before the Military Affairs Committee of the House designed to give credit to communities for the unduly large number of American citizens called to service and to provide that aliens already exempted shall, so far as practicable, be called in advance of American citizens.

The justice of the purpose of this bill to include aliens in our draft is so apparent that I hopefully anticipate favorable action by this House without delay.

Mr. BURNETT. Mr. Chairman, how much time have I left?

The CHAIRMAN. The gentleman has no more time left. The gentleman from California has nine minutes.

Mr. HAYES. Mr. Chairman, I yield two minutes to the gentleman from New York [Mr. SIEGEL].

Mr. SIEGEL. Mr. Chairman, we declared war 10 months ago, and about 8½ months ago we passed the selective-draft law. The figures for a part of New York City are as follows:

NEW YORK COUNTY.

Assembly district.	Election registration, 1916.	Registration for draft.
First	5,363	7,491
Second	6,600	10,221
Third	6,840	9,766
Fourth	6,190	8,657
Sixth	7,021	10,494
Seventh	6,940	6,218
Eighth	6,484	11,273
Ninth	5,806	6,862
Tenth	6,730	12,512
Eleventh	7,752	6,961
Twelfth	6,193	8,698
Thirteenth	6,559	6,457
Fourteenth	7,110	6,440
Sixteenth	7,117	6,473
Eighteenth	7,954	7,479
Twenty-fourth	5,950	7,804
Twenty-sixth	8,781	9,367
Twenty-eighth	5,697	7,765
Thirtieth	9,613	pt 10,369

BRONX COUNTY.

Thirty-third	13,146	11,812
Thirty-fourth	17,481	24,240

KINGS COUNTY.

Second	5,818	7,403
Third	5,861	7,636
Fourth	9,254	7,965
Seventh	7,922	7,285
Eighth	6,979	10,556
Ninth	10,512	17,523
Thirteenth	7,245	6,190
Fourteenth	6,528	8,367
Fifteenth	8,154	7,549
Nineteenth	7,955	8,925
Twenty-first	5,846	13,387
Twenty-third	19,831	21,903

HARLEM AND HEIGHTS REGISTRATION.

Assembly district.	Registration.	Per cent alien.	Per cent enemy.
Fourteenth	6,449	0.22	0.03
Thirty-first	7,969	.17	.01
Twenty-eighth	7,765	.12	.01
Nineteenth	8,992	.17	.03
Twenty-first	9,625	.18	.02
Twenty-third	11,121	.14	.02
Twenty-fourth	7,804	.38	.02
Twenty-sixth	9,367	.35	.01
Thirtieth	10,369	.36	.01

In the city of New York one boy out of every six is in the service under the selective-draft law. In the States where the alien population is very meager only one person out of ten is in the service. That is what we claim is the unfair and discriminatory feature of the selective-draft law. There has been no protest filed by the Italian Government against this proposed legislation, and at every other time, whenever any legislation is sought wherein citizens of Italy are to be affected, the Italian Government has protested, exercising the right which it has to do so.

Mr. FLOOD. Does the gentleman say that the Italian Government has not protested against this proposition?

Mr. SIEGEL. According to my information, I say it has not.

Mr. FLOOD. Does the gentleman know that the State Department says that the Italian Government has protested?

Mr. SIEGEL. I want to say to the gentleman that I have had correspondence with a gentleman who is in Italy, and who knows what the conditions are in Italy, and who has stated that there has been no protest against it.

Mr. FLOOD. But such a protest is not filed in the newspapers of Italy, but is filed through the Italian ambassador in America.

Mr. SIEGEL. But the same gentleman was the gentleman who transmitted the request from Italy to the United States Government that it was desirable that war be declared by the United States against Austria, in order that the war might be more effectively fought and more quickly won.

Mr. Chairman, there has been considerable said here to-day about the Italian residents of the United States. There seems to prevail here an impression that the men who came here from Italy have not responded to the call of Italy for military service. The contrary is true. More than 100,000 Italians have left this country to respond to the colors.

In the selective National Army you will find that the men of Italian descent have given their proportionate share, and in many instances have given more than there share.

It is about time that men would carefully consider the fact that the men who came from Italy have done their share in building up the country, and at the same time are just as patriotic and loyal to the United States as any there be among us.

Mr. Chairman, in conclusion let me read the following editorial from the New York Globe:

NO ROOM FOR ANY SLACKERS.

Senators LODGE and CHAMBERLAIN, who are urging the passage of a law to prevent alien residents natives of the countries of our allies from shirking military duty, should not delay bringing the question before Congress a moment longer than necessary. All slackers should be rounded up irrespective of their nationality and compelled to do their bit. Either let them serve under the Stars and Stripes or under the colors of their own country. To allow slackers of our companion nations in arms to find refuge here while their fellow men are giving their all in the struggle for world freedom is not doing our utmost for our allies. We are all one in the great fight, and we must stand together if we are to hope for victory. There must be no room in this country for the slacker, and the sooner he is given to understand this the better it will be for the cause.

Mr. HAYES. Mr. Chairman, I yield two minutes to the gentleman from Massachusetts [Mr. WALSH].

Mr. WALSH. Mr. Chairman, it seems that in the unusual condition of affairs in this world it is a sad commentary upon our ability to provide for a war in behalf of smaller nations that we should be obliged to throw the cloak of protection around the nationals of the very nations for whose very existence, according to the President, we have entered this war, and say to those nations that while we are willing to draft our own citizens and compel them to bear arms in behalf of our own Republic and incidentally these other countries, we will say to the nationals of those countries that they can abide here in peace and comfort and fill the industrial positions that have been created by reason of the fact that large numbers of our young men have been taken out of the industries and sent to war. If we pass this measure we will give notice, as representatives of the people, to the treaty-making and the treaty-confirming power that if treaties stand in the way under conditions such as exist now it is time that those treaties be abrogated and that new treaties be entered into, so that in the future, if similar conditions arise, we would not be precluded from compelling military service on the part of those who reside here, those aliens who are willing to work here and receive our moneys for their hire, and yet do not think enough of this country and its institutions to become its citizens, but who, when their country is involved in war, seek to hide behind the protecting arm of the provisions of treaties. [Applause.]

Mr. STAFFORD. Mr. Chairman, I yield two minutes to the gentleman from Indiana [Mr. BARNHART].

Mr. BARNHART. Mr. Chairman, I scarcely understand whether I have secured my time from the side of this question on which I wish to speak, for I am really on both sides. There

seems to be practical unanimity in the House that the provisions of this bill ought to prevail, and yet the statement is made by the chairman of the Committee on Foreign Affairs that he has been advised by the State Department that it would expedite matters if the consideration of this bill could be postponed for three weeks. If there is any one thing that the Congress of the United States ought to be doing at this time, it ought to be seeking to encourage compliance with treaty obligations with our friends. [Applause.] If, on the other hand, we want to hasten this matter of amending treaties so as to draft foreigners in our country, it seems we are going contrary to the powers that be who understand all the conditions prevailing at this time. I fully realize that it is an awful misfortune that our own boys must go to the front and that our alien allies are being permitted to remain in this country and take the jobs left by our soldiers; but we are also advised that already two treaties have been perfected and that two others are in course of negotiation, and evidently from the report of the Secretary of State they will be completed within three weeks. Also it is stated in the letter that premature action here might embarrass the situation so that the very thing we want to accomplish by this bill might be defeated. The provisions of the bill are important as justice to our soldiers who are going to the front, but the real question here is, Will we hasten matters by this action now or may we delay it by not complying with the opinion of the State Department? I think we could well afford to wait the three weeks they ask and that we ought to do it.

Mr. GOODWIN of Arkansas. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the gentleman's request? [After a pause.] The Chair hears none.

Mr. STAFFORD. Mr. Chairman, there will be only one more speech on this side, and I understand the gentleman from California will have two speeches.

Mr. HAYES. How much time have I remaining?

The CHAIRMAN. Five minutes.

Mr. HAYES. I yield one minute to the gentleman from Illinois [Mr. MCKENZIE].

Mr. McKENZIE. Mr. Chairman, with the adoption of the amendment suggested by the chairman of the committee, to strike out section 2, I am emphatically in favor of this legislation. In my judgment it does not violate any treaty that we have with any country in the world. I should be glad to see treaties entered into that would make it possible to follow our slackers into Canada and the other countries and compel them to serve under their flag or under our flag. [Applause.] But of course Congress can not do that; but we can go as far as this bill goes and say to those aliens in this country, "You can either fight to help the people in your native land and help our boys fight or you can get up and get out." [Applause.] It is simply to compel them to do justice to the American boy and the heroic French citizen at home, the brave Italians, and the Englishmen who are fighting for their lives and their countries, and I have no patience with a treaty or a law that will permit these fellows to come into this country and escape the service that they owe either to their native land or to their adopted country. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAYES. Mr. Chairman, I yield three minutes to the gentleman from Pennsylvania [Mr. ROBBINS].

Mr. ROBBINS. Mr. Chairman, on the 18th day of May we passed the selective-draft law and we, with great acclaim, said that 9,500,000 men had registered for military service; but when we come to analyze the character of the men who have registered we find a very large part of them claimed exemption from military service because they are aliens. For instance, take the twenty-second district of Pennsylvania, where I live and which I represent and about which I know. Forty-three thousand two hundred men registered. Out of that number 10,292 claimed exemption from military service because they were citizens of another country. We have two classes of aliens—aliens that belong to the enemy and aliens that belong to our friends. Now, gentlemen, we have a duty here to enforce against every man who comes into the United States and enjoys the benefits of our country, its schools, its opportunities to live and educate his children, and acquire a fortune, that they also bear some of the burdens of our Government. The statistics show that over 80 per cent of those who claimed exemption in western Pennsylvania have been here sufficiently long to become naturalized if they wish to be, but they did not intend to become citizens. They propose to escape the obligations of citizenship and enjoy all of the benefits of our Government, and I am against that proposition. And how do they seek to do it? It is urged on this floor that they are entitled to do it because of a treaty existing between their native country, for instance, and the United States. The Supreme Court of the United States has said something upon this question of the validity of treaties. Every treaty that is entered into, gentlemen, is made with the distinct understanding of all the high contracting parties that it is subject to the sovereignty and the inherent power of the nation to control its own internal affairs, and no foreign treaty is contracted that will impair that inherent right of sovereignty. In the case of Fong Yue Ting *v.* United States (149 U. S., p. 698) it is said:

> The right to exclude or expel aliens, or any class of aliens, absolutely or upon certain conditions, in war or in peace, [is] an inherent and inalienable right of every sovereign and independent nation, essential to its safety, its independence, and its welfare.

Under this decision, at the time our treaties were made with France, England, and Italy, who are now our allies, these were made subject to the right of the United States to regulate its own internal affairs. That was understood by us, just as it was reserved by the other signatory parties to such treaty to themselves, and all treaties must be so read and so understood.

This evil of the alien slacker is an internal evil. It faces us. Every able-bodied alien male citizen between the ages of 21 and 30 is subject to the sovereignty either of our country or of our allies above named, and should be required to perform military service either for us or for their native country. They have no right to escape entirely. That proposition is admitted by all. Yet the registration has disclosed that practically one-fourth of the men in the district which I represent can claim exemption because they are alien residents.

The effect of this is that while the registration of men subject to military service is large, the actual quota must be filled from less than three-fourths of the registrants, and to that extent falls heavier upon the native-born Americans and those already naturalized. The effect has been to compel our native Americans to go into the service and fight this war, while this large number of foreign residents who are aliens remain at home, enjoy the protection of peace, and succeed to the good jobs made vacant by the Americans.

This situation is not only unfair, unjust, but it is intolerable, and is becoming more so with each recurring draft call.

Now, this bill proposes briefly as follows:

It is entitled "An act to provide for the deportation of aliens, and other purposes," and was introduced in this House August 3, 1917, and has been pending since that date.

Section 1 provides that any alien liable to become a citizen of the United States who is a native or subject of any country at war with Germany or any of her allies and who but for his alienage would be subject to the draft under the act of May 18, 1917, and who has claimed exemption on the ground that he is an alien, shall be hereafter barred from becoming a citizen of the United States and shall be deported as soon as practicable, but permits any alien who has been exempted on account of his alienage within 60 days after the passage of this act to submit himself to the operation of the selective draft, in which event he shall not be within the operation of this section and forfeit his citizenship or be deported.

Section 2 provides that 60 days after the passage of this act the President is authorized to draft such aliens to perform mental and physical labor on the farms and in manufacturing establishments, or he may make such disposition of such aliens as he deems best to the interest of the United States.

Section 3 provides that after 30 days from the passage of this act no alien who is a native or subject of any country at war with Germany, or with any of the central powers of Europe, who is subject to military duty in his native country, may be permitted to enter the United States, except on permission of the President, and provides penalties against steamship companies violating its provisions.

Section 4 exempts foreign representatives in our country.

Section 5 limits the operation of the act to during the war.

In brief, then, this act is an effort upon the part of Congress to pass a law which will prohibit aliens who are eligible to become American citizens, by reason of having resided in the United States the time required and having the other qualifications for citizenship, from longer remaining here and at the same time escape military service during the present war. If they have not been here a sufficient length of time, then this act will compel them to work on farms or manufacturing plants under military supervision or be sent back to their native country, to become soldiers and fight with our allies.

This act does not deal with the "alien enemy" who is compelled to register under another law—the Government will deal with him according to its provisions—but this act deals specifically with the alien who is the subject of a country which is at war with Germany or her allies.

We have already passed a law permitting England and France to establish recruiting stations in the United States and enlist

their subjects, but this has not worked very well, as few have volunteered, and they could only be taken if they volunteered to go.

This act can work no hardship on those who have resided in the United States a sufficient time and are otherwise qualified, because they can file their declaration and become citizens, and be subject to the draft law, and be relieved from the penalties of this act.

Section 2 of the act of May 18, 1917—the draft law—provides:

* * * Such draft as herein provided shall be based upon liability to military service of all male citizens or male persons not alien enemies who have declared their intention to become citizens between the ages of 21 and 30 years. * * *

Hence, an alien who has resided in the United States for two years and upward and has failed to take out his naturalization papers, after this act becomes a law, must either file his declaration at once and become subject to the draft or be deported. He can no longer claim exemption from military service and continue to reside in the United States, enjoy the protection of our laws, the unequaled liberties and opportunity for gaining a livelihood and making money, and bear none of the burdens of our citizenship, as they now are doing.

This act therefore works no hardship. The urgency for this legislation must necessarily rest upon the conditions that prevail throughout the country. I know such conditions in my own congressional district, composed of Westmoreland and Butler Counties, Pa., and the great demand for this legislation that these conditions present.

At the time of the registration held June 5, 1917, 48,492 men appeared there and registered as being within the military age. In detail this registration showed as follows:

In Westmoreland County, Pa.:	
Total registrants	26,940
Total alien registrants	9,666
In Butler County, Pa.:	
Total registrants	10,260
Total alien registrants	1,626

SUMMARY.

Total twenty-second congressional district registrants	48,492
Total twenty-second congressional district alien registrants	11,292

This shows that about 25 per cent of the registrants claimed exemption by reason of being citizens of a foreign country, and have obtained discharge from military service on that ground. And 90 per cent of these according to the facts disclosed by the registration have been in the country over two years and are entitled to make declaration of their intended citizenship and thereby escape the penalties of this act and become subject to the draft law, and 80 per cent of these have been in the country over five years and could have attained full citizenship had they a desire to do so. Therefore, according to these statistics, there is in the twenty-second congressional district approximately 8,000 foreign-born aliens of military age who do not desire to become citizens for the deliberate purpose of escaping the burden of military service, payment of taxes, and other duties incumbent upon the citizens of our country. They do, however, enjoy the privileges of our schools, and in Pennsylvania can own real estate and engage in any lucrative employment and practically enjoy all the privileges and benefits of full citizenship and yet bear none of its burdens.

Mr. Chairman, this is unfair, unjust, inequitable, and wrong. It should not be longer tolerated. These men are now permitting the native-born Americans and the naturalized Americans to go off to Europe and fight their battles while they remain at home, not only to enjoy the blessings of liberty here but to take their places in business and civil life and enjoy the good wages and salaries formerly earned by these patriotic Americans. To continue to allow this condition to prevail is little short of outrageous. It is certainly unfair and discriminatory toward native Americans.

It is stated that this legislation ought not to pass because the Secretary of State fears that it would cause retaliatory measures in other countries. What other countries? In Germany and Austria which are the only countries with which we are at war. Very few Americans are in either of these countries, and if there are any why should we think of them when they have had three years and one-half to get out and come home? Any American citizen who is now a resident of those countries has forfeited his citizenship here, or at least has some attachment greater there than here, and why should we concern ourselves about him? He has probably married a native wife and assumed citizenship there or at least he has deserted us. He has not shown any desire to come to the rescue of his former country and help us in this time of peril.

On the other hand, there must be in the Commonwealth of Pennsylvania, with its 7,665,111 population in 1910, at least 500,000 who have claimed exemption from the draft as aliens, judging the population from the proportion of those residing in the twenty-second congressional district of Pennsylvania.

Is it possible that all of these are to escape? Are they to be permitted to remain at home and enjoy all the privileges of our country and yet not help us at this time of distress and danger?

The State Department now informs us that we should not pass this legislation, because it will interfere with treaty rights and prevent negotiations now pending with these foreign States.

Mr. Chairman, how long are we to wait?

This bill was introduced on the 3d of August last. We were then told that the State Department had the matter up and would either abrogate or modify these treaties. Now, we still have the same report that they are yet negotiating, with no promise of ultimate success, and certainly no time limit as to when such negotiations will be concluded. In the meantime the draft has gone on and another call has been made for a quota to be filled February 15, and the alien slackers are still asserting their right to be exempted and our American boys are still being taken.

Mr. Chairman, I am not in favor of extending the time any longer or waiting a single day for the State Department. Let us pass this act and stop this unfair and demoralizing practice under which the alien slackers are claiming exemption and escaping the draft entirely and our gallant American boys are taken to fight our battles. [Applause.]

Mr. STAFFORD. Mr. Chairman, if no negotiations were on with representatives of the allied governments we might feel justified in taking this extreme step of legislating as to nationals of other countries who are residing and domiciled in this country, but the uncontroverted testimony here is that the State Department is negotiating treaties that are about to be consummated; that the State Department has negotiated treaties with Great Britain and also Canada and has about completed negotiations with France and will shortly complete negotiations with Italy. I am unwilling by my vote, on the showing that is thus made, to invite the foreign Governments by our action to reciprocate and take control of the nationals of the United States under such conditions that their legislatures may see fit to enact and subject them, regardless of age, to military service in those countries.

I am willing, however, for our diplomatic representatives, in conjunction with the diplomatic representatives of foreign countries, to negotiate and compel the services of Americans abroad who for one reason or another are not at this time obligated for service.

I am just as much in earnest to have the slackers of Canada, who have come across our border by the thousands before the declaration of war, do service in behalf of Great Britain as I am for the slackers of Italy or any other country, but I want it done in a legal way, the legally constituted way which has been recognized for all time, of having the representatives of the Foreign Affairs Department collaborate with the diplomatic representatives of the foreign Governments in negotiating treaties that will cover our nationals and the nationals of their respective countries. That is in progress. What is the occasion for haste and impatience?

This bill amounts to nothing. It is nothing more than an immigration bill, and every person here who has been opposed to immigration of foreigners to this country is in favor of this bill, because he knows in his heart it will not result at all in getting persons into the Army who are opposed to going into the Army, as there is no compelling sanction, but it will postpone aliens going into the Army if these treaties are going to be stopped by the negotiations, which the Secretary of State says will be stopped and checked. For those reasons, Mr. Chairman, I am opposed to this bill.

Mr. HAYES. Mr. Chairman, I yield two minutes to the gentleman from Massachusetts [Mr. TREADWAY].

Mr. TREADWAY. Mr. Chairman, during the consideration of the immigration bill in the Sixty-third and Sixty-fourth Congresses I favored an amendment requiring either compulsory naturalization or deportation. That was before war measures were under consideration. And it is, in my mind, very much more important that the same sort of law should become effective to-day. The only objection heard in our section of the country at all to the draft law is the fact of the very large percentage of aliens that are not only escaping the draft but are taking the positions made vacant by our boys that are called into the service. [Applause.] It works wrong in both ways.

Let me call to your attention the registration of Massachusetts under the selective-draft act. The total was 359,323, according to the statistics furnished by the Provost Marshal General. Of this number 106,014, or nearly one-third of the total number, were exempt under the alien clause. In the four

western counties of Massachusetts, where my district is located, the total registration was 54,006; aliens, 16,772. The same proportion has prevailed throughout the State, nearly one in every three escaping under the alien provision.

I believe most thoroughly in the elimination of section 2 of this bill. There should be no discrimination shown these aliens who remain in this country. Let them take the same chances as our boys do, and there will not be this opposition to the selective draft. [Applause.]

The district I represent is about half urban and country population. In the cities the young men who have been taken from trades and occupations are the sons of our own citizens, while the alien population stands on the street corners watching the men march to the service of their country, and then enter the mills or factories in the positions the boys with the colors have held.

In the country sections farms are being abandoned for the lack of men to cultivate them. Fathers and mothers have seen their boys leave the plow, or the rake, or the hoe; leave their firesides and homes, being deprived both of their labor and their needed companionship. You can not expect increased production of the farm when the only ones not affected by the selective-draft act are those who have not sufficient interest in the welfare of our country to become citizens of it.

One in every three men in Massachusetts of draft age is exempted; one in every eight in the entire United States. Such a condition is intolerable. I appreciate the desire of many Members not to act contrary to the wishes of the State Department and infringe on any treaty rights, but there can be no argument raised against prompt action either through legislation or through treaty agreements on a subject so vital to the interest of our people. Within a short time the next draft will be called out, and either this bill should become law before that call is issued or treaties with the various countries should become operative for the same purpose.

The CHAIRMAN. The time of the gentleman has expired. All time has expired.

Mr. HAYES. Mr. Chairman, I ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. TREADWAY. Mr. Chairman, I make the same request.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. GALLIVAN. Mr. Chairman, I make the same request.

Mr. SABATH. Mr. Chairman, I ask the same privilege.

Mr. BURNETT. Mr. Chairman, I make the same request. Would it be in order now to ask that all gentlemen may have the privilege of extending their remarks?

The CHAIRMAN. Not in committee.

Mr. JOHNSON of Washington. Mr. Chairman, I make the same request.

Mr. BARNHART. Mr. Chairman, I make a similar request.

Mr. ROMJUE. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

Mr. STAFFORD. Mr. Chairman, would it not be in order for a motion to be considered to extend the remarks of all who have spoken?

The CHAIRMAN. Not in the committee.

Mr. STAFFORD. Oh, yes. All those who have spoken on the bill, because if the Members individually can get that permission, they can get it collectively.

The CHAIRMAN. No general leave, the Chair is informed by the parliamentary clerk, can be granted.

Is there objection to the request made by the gentlemen to extend their remarks in the RECORD? [After a pause.] The Chair hears none.

The Clerk will read the bill under the five-minute rule.

The Clerk read as follows:

Any alien who may have been exempted from said selective draft on account of his alienage prior to the passage of this act may, within 60 days after the passage of this act, withdraw such exemption and submit himself to the operation of said selective draft, and in that event shall not be held to be within the operations of this section as to the forfeiture of citizenship and deportation: *Provided*, That the President is hereby authorized to make such rules and regulations as may be necessary to enforce the provisions of this section.

Mr. MCCULLOCH, Mr. ROGERS, Mr. WALSH, Mr. SABATH, and Mr. BURNETT rose.

The CHAIRMAN. The Chair will recognize the gentleman from Alabama [Mr. BURNETT].

Mr. BURNETT. Mr. Chairman, the gentleman from Illinois [Mr. SABATH], a member of the committee, desires to offer an amendment.

The CHAIRMAN. The Chair will recognize the gentleman from Illinois, a member of the committee, to offer an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SABATH: Insert at the end of line 4, on page 2, the following:

"*Provided*, That any alien subject to deportation under this section may for a period of not more than 60 days from the passage of this bill be permitted to voluntarily leave this country."

Mr. MOORE of Pennsylvania. Mr. Chairman——

The CHAIRMAN. The gentleman from Illinois [Mr. SABATH] is recognized.

Mr. MOORE of Pennsylvania. Is the gentleman from Illinois going to speak?

Mr. SABATH. Just briefly. I desire to explain this amendment.

There is nothing in this bill as originally drafted that would give these aliens who might here and there claim exemption, or refuse to do it, a right to leave this country. My amendment, which has been agreed to by the chairman of the committee and the other members of the committee, gives such alien the right to leave this country within 60 days.

Mr. MOORE of Pennsylvania. Mr. Chairman——

The CHAIRMAN. Will the gentleman from Illinois yield to the gentleman from Pennsylvania?

Mr. SABATH. I will yield to the gentleman.

Mr. MOORE of Pennsylvania. Suppose the gentleman's amendment were to apply to an Italian alien who would go back to Italy under circumstances that would subject him to imprisonment, if not to death; what would the gentleman say, then, as to the effect of his amendment?

Mr. SABATH. Oh, if that would be the case, I would not offer nor would I favor such an amendment; but in view of the fact that the Italians across the sea are fighting for the same cause as those Italians that have enlisted here, I believe such man belonging to that country or any other country should not refuse his services to the country of his adoption nor to the country of his birth. And in view of the fact that he has been legally and lawfully in the United States he is not guilty of any offense against his country if he should return.

Mr. MOORE of Pennsylvania. The gentleman would have him sentenced to death there or sentenced to Army service here. That is about the situation.

Mr. SABATH. No; he would not be sentenced to death there, because he is legally and lawfully in the United States, and I take it for granted that he has secured leave of absence or secured a passport from his Government before leaving Italy to come to this country.

Mr. MOORE of Pennsylvania. Then leave out the Italian side of it altogether, and if he is in this country legally and lawfully, as the gentleman from Illinois says, he would either send him into the Army or send him back to Italy.

Mr. SABATH. He would have the right not only to go to Italy, according to my provision, but he would have the right to go to Mexico or to Canada or to any other country. If he would be subjected to prosecution or to the charge of treason, naturally he would not go home to fight for his country. But my amendment will cure that, so that he will not be deported, but will have the privilege of going home to his own country and fighting for his country.

Mr. MOORE of Pennsylvania. The gentleman wants to punish him one way or the other. That is the idea.

Mr. SABATH. No. I want him to serve. [Applause.] That is what I want. I want him to serve the same way as our boys, as the American boys, and all other boys who have any red blood in their veins would do, to serve their country. [Applause.]

Mr. MOORE of Pennsylvania. And would not the gentleman's amendment permit him to go to Mexico, where he would not serve at all

Mr. SABATH. Well, if he is such a coward, we do not want him here. Let him go.

Mr. MOORE of Pennsylvania. The gentleman would send him there?

Mr. SABATH. Well, that is as good a place as I know of to send him. [Applause.]

Mr. MOORE of Pennsylvania. I know the gentleman has a warm, tender spot in his heart for the immigrant.

Mr. SABATH. The gentleman from Pennsylvania is correct; but at this time I want the immigrant to have a warm spot in his heart for this country. That is all I desire to say on this amendment, Mr. Chairman.

Mr. MOORE of Pennsylvania. Mr. Chairman, I desire to oppose the amendment.

The CHAIRMAN. The gentleman is recognized for five minutes.

Mr. MOORE of Pennsylvania. Mr. Chairman, I do not think this amendment should pass, because it admits of a subterranean

method by which an alien may escape service altogether—even the labor service he performs here. It permits him to go into Mexico, as the gentleman from Illinois has already indicated. It permits him to avoid the United States, and to avoid his own country, no matter whence he comes.

I do not think the amendment ought to pass; neither do I think the bill ought to pass at this time. I do not believe the Congress of the United States should challenge the Secretary of State and the President of the United States on so vexatious a problem during the pendency of the war. I do not believe we should invite every nation on earth to adopt harsh measures with regard to Americans who happen to be under their jurisdiction after the manner proposed here with regard to aliens who happen to be in the United States. I believe we would talk "war" to Italy or any other country if, in violation of treaties, it should pass a law like this in regard to Americans who happened to be in the jurisdiction of such a country.

Mr. WALSH. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. WALSH. Are those Americans that the gentleman is talking about in that country there to avoid the military laws of this country?

Mr. MOORE of Pennsylvania. If they are there to avoid service here, I am not defending them; but——

Mr. WALSH. What are they doing there? They are within draft age.

Mr. MOORE of Pennsylvania. I am assuming that Americans may be there on lawful business, just as the gentleman from Illinois said that some of these aliens were lawfully in the United States. I do not want Americans seized and impressed into the war service of a foreign country without our approval. I am bringing to the mind of gentlemen the fact that we may be throwing a boomerang by passing this law. We may be inducing other nations to retaliate by the passage of similar laws affecting Americans abroad.

There is danger in this bill of unhappy international complications. We propose to violate existing treaties. We propose to violate treaties that exist between this country and Italy as though they were "scraps of paper." Let me tell you, my American friends, the duty of keeping good faith with our allies rests upon all Americans just now. It has been our custom to charge bad faith against Germany. We are constantly holding Germany up to scorn for treating a treaty as a "scrap of paper." We ought not to put ourselves in a position to be charged with bad faith. We should let it be known that our treaties, our bounden words, our international agreements, mean something. I fear our haste in this matter is due largely to the opportunity to carry a little German blood back into our districts. The opportunity is here to "crush the Hun" in the House of Representatives. Even so, I do not think we should adopt the methods of those whom we denounce and treat as "scraps of paper" existing international agreements which we have made in good faith.

We are informed that the President is against this proposition; that the Secretary of State is now in negotiation with foreign nations to meet the very propositions you propose by this bill to anticipate. If that is so, you are embarrassing the State Department by this legislation. If you are embarrassing the President and contemplating a violation of your plighted word as Americans given in your international agreements, this bill should be defeated. [Applause.]

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. ESCH. Mr. Chairman, as I understand, the amendment has used the words "this bill." I move to amend by striking out "this bill" and inserting "this act."

Mr. SABATH. I understood it was this section.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Wisconsin [Mr. ESCH].

The Clerk read as follows:

Amend the amendment by striking out the word "bill" and inserting in lieu thereof the word "act," so that it will read "not more than 60 days from the passage of this act be permitted to voluntarily leave this country."

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Wisconsin to the amendment offered by the gentleman from Illinois [Mr. SABATH].

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is now on agreeing to the amendment as amended.

The question was taken, and the Chairman announced that the noes seemed to have it.

Mr. SABATH. A division, Mr. Chairman.

The CHAIRMAN. A division is called for.

The committee divided; and there were—ayes 56, noes 55.

Mr. HAYES. Mr. Chairman, I demand tellers.

Mr. MOORE of Pennsylvania. Mr. Chairman, I demand tellers.

The CHAIRMAN. Tellers are demanded. All those in favor of taking this vote by tellers will rise and stand until they are counted. [After counting.] Twenty-five gentlemen have voted for tellers. Tellers are ordered. The Chair appoints the gentleman from Illinois [Mr. SABATH] and the gentleman from Pennsylvania [Mr. MOORE] to act as tellers.

The committee again divided; and the tellers reported—ayes 57, noes 58.

So the amendment was rejected.

Mr. ROGERS. Mr. Chairman, I have an amendment, which is at the Clerk's desk.

Mr. WALSH. I have an amendment.

Mr. SIEGEL. I have an amendment.

The CHAIRMAN. Does any member of the committee desire to offer an amendment? If not, the Chair will recognize the gentleman from Massachusetts [Mr. ROGERS].

Mr. ROGERS. I offer the amendment which is at the Clerk's desk, which I ask to have read.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. ROGERS: Page 2, line 4, after the word "citizen," insert the following:

"*Provided, however*, That this act shall not be construed to supersede the provisions of any existing treaty with such country the terms of which stipulate that the United States shall not subject the subjects of such country to compulsory military service."

Mr. ROGERS. Mr. Chairman, I offer this amendment as a friend of this legislation and not as an enemy of the legisaltion. I hope that this bill, when perfected, will pass the House to-day. I hope that it, or something like it, may become a law. But, as I said in the course of general debate, it seems to me of the utmost importance that we shall not lightly pass a bill which violates or even arguably violates the provisions of an existing treaty. The United States, speaking through its House of Representatives, can not afford to go on record as deliberately passing a bill which is violative of the provisions of a treaty. If we do not like the treaty that is on the books to-day, let us proceed in an orderly way to abrogate it. But let us not proceed by indirection and by subterfuge to pass a law which, in the opinion of the Secretary of State, is directly violative of the language of at least one existing treaty. Frankly, I for myself, do not think that the Burnett bill does violate any existing treaty, although I say that, of course, with great deference to the expressed opinion of the Secretary of State to the contrary. But if it violates the treaty we ought by our own language to-day to exclude the intent which, in the opinion of the Secretary of State, is manifest in the language. If it does not violate the language of any treaty, then it can do no possible harm to incorporate the proposed amendment in the bill.

Mr. MOORE of Pennsylvania. Mr. Chairman, I did not hear the gentleman's amendment read. I want to know whether it proposes to lodge discretion in the Secretary of State as to the enforcement of this act.

Mr. ROGERS. Of course, all questions of treaty interpretation depend very largely upon the judgment of the State Department. No doubt in the last analysis this law will be interpreted by the State Department and ultimately, perhaps, by the United States Supreme Court. But I should suppose that there could be no valid objection to it for that reason.

Mr. MOORE of Pennsylvania. The gentleman proposes to leave the questions at issue to the Secretary of State?

Mr. ROGERS. The language of the amendment speaks for itself. The gentleman can determine that as well as I can.

Mr. TOWNER. May the amendment be reported again?

The CHAIRMAN. The gentleman from Iowa asks unanimous consent that the amendment be reported again. Is there objection?

There was no objection.

The amendment was again read.

Mr. BURNETT. Mr. Chairman, I ask unanimous consent that all debate on this amendment close in 10 minutes.

The CHAIRMAN. The gentleman from Alabama asks unanimous consent that all debate on this amendment close in 10 minutes. Is there objection?

Mr. SHERLEY. Mr. Chairman, I trust the gentleman will not do that.

Mr. BURNETT. I will yield five minutes to the gentleman.

Mr. SHERLEY. But the gentleman will not have the power to do that. I think this is a matter that goes to the crux of the thing and that debate now will probably simplify all of the proceedings later on. I trust the gentleman will not undertake to limit debate on this matter now.

Mr. BURNETT. Very well; I shall wait for a short time. We want to finish this bill this afternoon.

The CHAIRMAN. Debate upon this amendment is now exhausted under the rule.

Mr. SHERLEY. Mr. Chairman, I move to strike out the last word, if I may get recognition.

The CHAIRMAN. The gentleman from Kentucky is recognized for five minutes.

Mr. SHERLEY. Mr. Chairman and gentlemen of the House, the amendment just offered serves to illustrate the difficulty of our proceeding wisely now with this character of legislation, and it was because of an appreciation of that situation that I had hoped the House might have seen the wisdom of postponing consideration for some little time. It did not, and that is behind us. There is no question in the mind of any man who is informed of the sentiment of this House or of this country that the people of America propose, in the last analysis, to see to it that those who have claimed the hospitality and the benefit of this Government shall bear their fair share of the burden of this Government in fighting to uphold it against its enemies. No man will go further than I along that line. No man who knows the position I have taken touching the prosecution of this war can question the sincerity of my statement in that regard.

But there is an orderly and a decent way of doing things that a great Nation standing for law over the wide world must always consider, and it was because of that that I did not desire that this House should wantonly disregard treaty obligations until that position was forced upon it. If the time should come and we so determine when this country can not put upon aliens their proper burden without abrogating treaties because the other nations with whom we had treaties are not willing to negotiate with us, then I would be willing in a matter of such extreme importance to take the responsibility of declaring that, having given to that nation an opportunity in an orderly way to deal with the subject matter, we proposed to legislate openly, in disregard of rights claimed, that we think no longer ought to be claimed under such treaties. But in advance of opportunity to bring about an adjustment with other nations, to take that position is to take a position that, to say the least, is unheard of on the part of nations of the first magnitude. Therefore I for one shall support the amendment offered by the gentleman from Massachusetts [Mr. ROGERS]. We will by the action here to-day clearly indicate what is in the mind of the people of America and the Congress of the United States, but we ought not at this stage of the proceedings to declare that, without regard to our pledged word, without regard to the honor of the Nation as expressed in a treaty, we propose to disregard those things and to legislate. I think the House can afford to think soberly and deeply before it takes such a position. I know the feeling of the thoughtless. I know the criticism that a public man sometimes subjects himself to when he seems not to be willing to do as quickly and as ruthlessly what is desired by some of his constituents as they wish, but I say again what I have said before to the House; this is a time for courage in public men. No man is going to be misunderstood by his vote here who is a real patriot. We do not propose to let the slacker continue to slack, whether he be citizen born or foreign born, but we do propose decently and in order to legislate and to not disregard entirely our international obligations under the whip and the press and the spur of some men who are willing to demagogue about the subject. [Applause.]

Mr. BURNETT rose.

Mr. REED. Mr. Chairman, I desire to offer a substitute for the amendment.

Mr. TOWNER. Mr. Chairman, I desire to oppose the pro forma amendment.

The CHAIRMAN. The Chair will recognize the gentleman from Iowa to oppose the pro forma amendment.

Mr. BURNETT. But, Mr. Chairman, I rose to oppose that.

The CHAIRMAN. The Chair will recognize the chairman of the committee, the gentleman from Alabama [Mr. BURNETT].

Mr. BURNETT. Mr. Chairman, another call will be made in a short while. The papers stated some time ago that it would be in the middle of February. I have seen it stated in the last few days that 75,000 or 76,000 were still uncalled from the first draft, and the 23d of February was the time fixed for completing that draft. There can hardly be another call made before, possibly, the 1st of May. Of course, I have no information in regard to the matter. If this bill is passed now and goes to the Senate and is quickly acted on there, these men who have been relegated to the fifth class can be embraced within that call. Certainly this is a time for action. The war has been going on almost a year. Conscription began on the 5th day of June, seven or eight months ago. Negotiations with our co-belligerents were started in early September or in August, and still not a single treaty has been consummated and sent to the Senate. In the name of the American boys who will be in this next call I insist that the emergency that the gentleman from Kentucky [Mr. SHERLEY] has referred to is now upon us.

Mr. MONDELL. Will the gentleman yield?

Mr. BURNETT. In a minute. My objection to the amendment offered by the gentleman from Massachusetts [Mr. ROGERS] is that the State Department, according to assertions made by gentlemen upon this floor to-day, has already prejudged the bill. They have already passed judgment upon the question of whether it is in conflict with a treaty. I say it is not. The doctrine laid down by authorities on national law say that it is not. Moore on International Law says:

> Some writers have essayed to enumerate the legitimate causes of expulsion. The effort is useless. The reasons may be summed up in a single word—"the public interests of the State."

When the second call is about to be made, when the men of America and the naturalized citizens of America are about to be called to fight the battles not only for democracy but for the very existence of England, Belgium, Italy, and Russia, it seems to me, Mr. Chairman, that the emergency is here. If we postpone it three weeks, and the State Department does not negotiate the treaties, then we are three weeks further off, and possibly it will be beyond the next call before any action can be had by Congress or by the State Department. Mr. Chairman, if these negotiations are concluded even with Great Britain or Canada or France or with any nation, when this bill goes to the Senate that body can so amend it so as to say that it shall not apply to treaties that reach the same purpose and intent as this law.

Mr. MONDELL. Will the gentleman yield?

Mr. BURNETT. So I hope there will be no postponement. I hope we will not adopt the Rogers amendment, because it simply leaves it to the State Department, and you had as well have no bill at all. I yield to the gentleman from Wyoming.

Mr. MONDELL. What is there in the bill which subjects any man to the draft except he voluntarily submits himself to it? [Applause.]

Mr. BURNETT. Not a thing.

Mr. MONDELL. Then why does the gentleman say that if the bill is passed in the House and Senate these men would be drafted? [Applause.]

Mr. BURNETT. Oh, I do not say they would be drafted, but I said they would withdraw their claims of exemption. I have here a letter from Gen. Crowder, stating that where no claim of exemption is made they are drafted. If this bill is passed, instead of being in the fifth class, they will fall either in the first, second, or third just like the American boys fall. They will either have to do that or get out. This terrible source of irritation that perhaps the gentleman from Wyoming does not feel, will be avoided by other gentlemen who do feel it, especially gentlemen from those districts where so many of these alien slackers are.

Mr. VENABLE. Will the gentleman yield?

Mr. BURNETT. I do.

Mr. VENABLE. In the event this bill becomes a law, and for illustration, half a million Italians would signify that they chose deportation rather than enlistment in the Army and would calmly sit down and say, "Deport us," in the first place, how is the Government going to deport them without ships, and, in the second place, would it not be better, that being the possible effect of this war, to wait until some treaty is entered into which will not only render these men liable for service but enforce that service?

Mr. BURNETT. Mr. Chairman——

The CHAIRMAN. The time of the gentleman has expired.

Mr. BURNETT. Mr. Chairman, I ask unanimous consent for five minutes more.

The CHAIRMAN. The gentleman from Alabama asks unanimous consent for five minutes more. Is there objection?

There was no objection.

Mr. BURNETT. The case the gentleman from Mississippi [Mr. VENABLE] attempts to suppose is not a supposable case. Those Italians are not going, and the Russians will not, and many thousands of others that left their country—and some of them for the country's good—are not going to run the chance of being deported, and they are going to withdraw their claims of exemption and submit to the draft. The gentleman overlooks one feature of this bill, and that is that this question of refusing naturalization and of deportation does not end with the war. Now, does he believe that these men, with that emergency hanging over them, would subject themselves to deportation? But even if the Italians could not be deported at once, there are thousands of renegade slackers from Canada that could be and ought to be. I heard a gentleman from New England say a few days ago that more than 10,000 Canadian slackers were there, and certainly we can at least get rid of those fellows that

have come from just across the border, and surely we could get rid of the others in time.

Mr. FLOOD. The gentleman recalls that we have negotiated a treaty with Canada?

Mr. BURNETT. Will the gentleman show that it has either been adopted or ratified by the Senate? Away back yonder in September it was stated that it was just to be negotiated, and when Congress met in December the papers were full of articles that had been given out, no doubt by the State Department, saying that they were just about to be negotiated. That was more than two months ago, and yet, here they are, still negotiating, and have not negotiated anything yet.

Gentlemen, you are dealing with fire when you give the State Department the power to construe this law in regard to the violation of treaties if you adopt the Rogers amendment.

Mr. DALLINGER. Will the gentleman yield?

Mr. BURNETT. I will.

Mr. DALLINGER. I want to ask the gentleman from Alabama if there is anything in this bill, without any amendment being adopted, which in any way violates the terms of any treaty we have with any nation in the world?

Mr. BURNETT. None whatever.

Mr. GORDON. The Secretary of State does not agree with you about that.

Mr. BURNETT. That is a fact. And the distinguished gentleman from Ohio does not. But it is not the first time I have had the honor of differing with the gentleman from Ohio and even with the executive departments themselves. [Applause.]

Mr. HARDY. Will the gentleman yield for just one question?

Mr. BURNETT. I will.

Mr. HARDY. Since there is such a difference as to whether this law does violate a treaty, and the gentleman does not want a law to violate a treaty and does not believe it does, why did he object to a paragraph amending it by saying that it shall not be construed to violate a treaty?

Mr. BURNETT. That leaves it up to the State Department, which has already prejudged it and says that it does. I do not want any department that has already prejudged my case to try the law we want to make.

Mr. HARDY. Does the gentleman think the adoption of that amendment would give his construction to it?

Mr. BURNETT. When the Immigration Bureau goes to enforce the deportation it will, no doubt, refer the question as to treaty violations to the State Department. That department, according to the statement of the gentleman from Virginia [Mr. FLOOD], has already decided that question, although the Supreme Court in the One hundred and thirtieth United States case has decided that it not only does not violate a treaty, but that no treaty could be made which could deprive this country of the right of deportation.

In the case in One hundred and thirtieth United States, Chinese who had resided here for years before the law was passed were required to register, and on failure to do so were to be deported. The court held that this law was not in violation of any treaty rights.

Mr. REED. Mr. Chairman, I offer a substitute to the Rogers amendment.

The CHAIRMAN. The gentleman from West Virginia offers a substitute, which the Clerk will report.

The Clerk read as follows:

Page 2, line 4, after the word "section," add the following:

"*Provided*, That whenever any country or countries engaged in war with Germany shall consummate a treaty with the Government of the United States which, in the opinion of the President of the United States, substantially accomplishes the purposes of this act, then said treaty stipulations shall apply as to such country or countries in lieu of the provisions of this act."

The CHAIRMAN. The question is on the substitute of the gentleman from West Virginia [Mr. REED].

Mr. REED. Mr. Chairman, there is a difference of opinion among my colleagues here as to the authority of the Congress to go ahead of a treaty; that being true, and in view of the divergent opinions of distinguished parliamentarians and constitutional lawyers here as to the effect of this proposed act, I believe the substitute I have offered may hasten negotiations now pending relative to new treaties. The provisions already in the bill, Mr. Chairman, are liberal enough to give the President of the United States ample time to deal with the countries affected and for the State Department to treat with the other countries. Mr. Chairman, if within 60 days the countries of the world who are at war with Germany can not consummate treaties that will secure the results sought by this act, then we have this law on the statute books to take care of the situation.

Mr. HAYES. Will the gentleman yield for a question?

Mr. REED. I will.

Mr. HAYES. Does not the gentleman know that if we pass this law without his amendment and the treaty should be subsequently negotiated and approved by the Senate of the United States, that would, ipso facto, repeal any provision of this law that was in conflict with it, and that, therefore, his amendment has no force and is not necessary at all?

Mr. REED. Then, would not existing treaties nullify this law if we should pass it?

Mr. HAYES. The last expression of the legislative will is controlling, and this law will control in the matter of any treaty.

Mr. REED. Then let this act serve notice on the countries affected as to what we expect of them. We have waited a long time for action and if treaties are not made along this line in a reasonable time we ought to have this law.

Mr. PLATT. Mr. Chairman, I rise to oppose the amendment.

The CHAIRMAN. The Chair would like to state to the gentleman from West Virginia [Mr. REED] that his substitute reads "after the word 'section,' in line 4." There is no such word there.

Mr. REED. It is a substitute for the Rogers amendment, wherever his substitute appears.

Mr. PLATT. Mr. Chairman, I rise to oppose the amendment.

The CHAIRMAN. The gentleman from New York is recognized in opposition to the amendment.

Mr. PLATT. Mr. Chairman, I am in sympathy with the general purpose of this bill, but it seems to me that it is not right to do something that is wrong in order to cure something else that is wrong. The thing that is wrong is in the draft act, the provision that provides that the draft quotas are based on the whole population, including aliens.

That is wrong. It ought to be changed. Some of us tried to have it changed when the draft bill was pending. I understand the Committee on Military Affairs are making an effort now to change it. If that amendment is made, I do not believe we shall want to pass this bill and undertake to fill up our Army with foreigners. A good many of them have volunteered and many who were drafted did not claim exemption, but I do not think we ought to compel a lot of foreigners to fight out battles for us. At least, I do not see how we could expect them to be a very good army to fight for America.

It might do to pass the bill if the amendment offered by the gentleman from Massachusetts [Mr. ROGERS] prevails, so that we can be sure that the bill does not violate any treaty, but without that it seems to me clear that it ought not to pass.

Mr. BURNETT. Mr. Chairman, I ask for a vote.

Mr. ROGERS. Mr. Chairman, I want to ask unanimous consent that my amendment be again reported after the substitute is disposed of.

The CHAIRMAN. The question is on agreeing to the substitute.

The question was taken, and the substitute was rejected.

Mr. GREEN of Iowa. Mr. Chairman, I offer an amendment to the amendment offered by the gentleman from Massachusetts [Mr. ROGERS]. I move to amend by striking out all after the word "treaty."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Iowa [Mr. GREEN] to the amendment of the gentleman from Massachusetts [Mr. ROGERS].

The Clerk read as follows:

Amendment offered by Mr. GREEN of Iowa to the amendment: Strike out all after the word "treaty," so that the amendment as amended will read:

"Page 2, line 4, after the word 'citizen,' insert the following: '*Provided, however*, That this act shall not be construed to supersede the provisions of any existing treaty.'"

Mr. GREEN of Iowa. Mr. Chairman, I offer this amendment partly because I believe that the language I seek to strike out unnecessarily complicates this whole question.

If this bill that we are about to pass contravenes any treaty it ought not to pass. But that will not be decided, as the gentleman from Alabama [Mr. BURNETT] seems to intimate, although I do not believe he would so state, by the Secretary of State. It is not a fact that the Secretary of State can adjudicate that question. Under this amendment the question of whether this bill will contravene any treaty would have to be decided by our Supreme Court. The court will be the tribunal to pass upon this question and determine whether or not it violates any treaty.

Now, that matter can be safely left to the court with this provision as I seek to have it amended. If there is anything in this bill that contravenes the treaty, we ought not now to put ourselves in the position of passing it. If, on the other hand,

it violates no treaty, then this amendment as amended will not affect its provisions in the least, and under this amendment it will not be left to the State Department to decide. They will be compelled to be governed by whatever the Supreme Court decides as to what the law will then be.

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. MOORE of Pennsylvania. The amendment of the gentleman from Massachusetts [Mr. ROGERS] proposes to first consult the Secretary of State, so far as treaties relate to military matters. The gentleman's amendment proposes to strike out that portion which is specific and make the amendment apply to any existing treaty?

Mr. GREEN of Iowa. Yes; to any existing treaty, which would leave it to the Supreme Court to decide whether it was in violation of any existing treaty or not.

Mr. MOORE of Pennsylvania. I think that is a good amendment.

Mr. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. ROGERS. Does the gentleman's amendment change the amendment originally proposed in regard to the body interpreting this provision in the last analysis? In other words, does the amendment propose that it may not require the interpretation of the Supreme Court finally, just as does the amendment proposed by the gentleman from Iowa?

Mr. GREEN of Iowa. The gentleman from Massachusetts is correct, but it will obivate the difficulty in other directions. If amended as I propose, the court will put such a construction on it that it will not contravene a treaty.

Mr. SCOTT of Michigan. Mr. Chairman, will the gentleman yield?

Mr. GREEN of Iowa. Yes.

Mr. SCOTT of Michigan. The gentleman is aware of the fact that whenever a matter of this character comes up a ruling is made by the Department of State or by the Department of Justice?

Mr. GREEN of Iowa. Yes. The Department of Justice undoubtedly would make a ruling on this question, and the War Department would undoubtedly be governed by that ruling.

Mr. SCOTT of Michigan. They would be until the matter got to the courts. The gentleman is a lawyer. I judge so from the way he talks. How long does the gentleman think it will take to get the question settled in the Supreme Court?

Mr. GREEN of Iowa. Not very long, in the way that we have had matters of that kind advanced recently. There would be no trouble in the courts taking it up. It would soon get into the courts, and the question would be very plain and very easy to decide. This, gentlemen, is the only proper way to put this matter. I believe we can not afford to put ourselves in the light of taking any chances, even of abrogating any treaty or of passing a statute in violation of a treaty. We are at war largely because Germany proceeded to treat treaties as scraps of paper. That is something we can not afford to do, and which I am sure no one in this House wants to do. By leaving this amendment as it would be with my amendment striking out all after the word "treaty," we are in no danger of getting into any conflict of that kind, or of subjecting ourselves to any criticism.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa [Mr. GREEN].

The question being taken, on a division (demanded by Mr. BURNETT) there were—ayes 73, noes 83.

Mr. GREEN of Iowa. Tellers, Mr. Chairman.

SEVERAL MEMBERS. Oh, no!

Mr. GREEN of Iowa. I withdraw the demand.

The CHAIRMAN. The demand for tellers is withdrawn. The amendment of the gentleman from Iowa [Mr. GREEN] is rejected. The question is on the amendment offered by the gentleman from Massachusetts [Mr. ROGERS].

The question being taken, on a division (demanded by Mr. BURNETT) there were—ayes 99, noes 80.

Accordingly the amendment was agreed to.

Mr. WALSH. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Massachusetts.

The Clerk read as follows:

Amendment offered by Mr. WALSH: Pages 1 and 2, strike out all of section 1 and insert the following:

"That during the existing emergency the duly accredited military representatives of any country engaged in war with any country with which the United States is now, or during the continuation of said emergency"——

Mr. BORLAND. Mr. Chairman, I rise to a point of order. An amendment to perfect the existing section is in order before an amendment to strike out and insert. I offer an amendment to perfect the section. This is a motion to strike out the section.

Mr. WALSH. Mr. Chairman, this is a motion to strike out the section and insert, and if it prevails I shall move to strike out the other sections of the bill.

Mr. BORLAND. I offer an amendment to the existing section.

Mr. WALSH. Has the gentleman any objection to my amendment being read and pending?

Mr. BORLAND. I think it should come in later.

The CHAIRMAN. The Chair understands that a motion to strike out and insert is a motion to amend the section.

Mr. BORLAND. But my point is that a motion to amend the existing section takes precedence over a motion to strike out and insert.

The CHAIRMAN. If this were simply a motion to strike out, that would be correct; but this is a motion to strike out and insert, which is offered for the purpose of perfecting the section.

Mr. BORLAND. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. BORLAND. Will a motion at this time to amend the existing section as reported by the committee, in the bill, have precedence over the amendment offered by the gentleman from Massachusetts [Mr. WALSH]?

The CHAIRMAN. It will not. It may be offered as a substitute.

Mr. TOWNER. Let me suggest that the gentleman from Massachusetts himself says that his amendment is in the nature of a substitute, and that following it he proposes to offer a substitute for the other sections.

Mr. WALSH. No; I did not say that.

Mr. TOWNER. I understood the gentleman to say that.

Mr. WALSH. I said I would offer a motion to strike out the other sections.

Mr. PARKER of New Jersey. I have given notice of a motion——

The CHAIRMAN. The Clerk will first report the amendment offered by the gentleman from Massachusetts.

The Clerk read as follows:

Amendment offered by Mr. WALSH: Pages 1 and 2, strike out all of section 1 and insert the following:

"That during the existing emergency the duly accredited military representatives of any country engaged in war with any country with which the United States is now, or during the continuation of said emergency may be hereafter, at war may, subject to the provsions of this act, draft into the military or naval service of their respective countries such of their citizens or subjects domiciled or resident in the United States as are not already in the military or naval service of the United States, and for the purposes of said draft of aliens domiciled or resident in the United States the President shall, on the request of said countries presented through their diplomatic representatives, furnish to said representatives a full and complete list of all the citizens or subjects of the country making the request who registered under the provisions of an act entitled 'An act to authorize the President to increase the Military Establishment of the United States,' approved May 18, 1917. The President is further authorized and empowered to procure within 90 days of the passage of this act the registration of all other male aliens between the ages of 18 and 45, both inclusive, domiciled in the United States, and upon the completion of such supplemental registration shall, on request, furnish a full and complete list thereof to the respective diplomatic representatives of said countries of which the said aliens may be citiens or subjects. For the purposes of said supplemental registration the President shall have all the authority conferred by said act of May 18, 1917, and he may prescribe such terms, conditions, and regulations for the operation of said draft as he may deem necessary.

"SEC. 2. That within 15 days after the passage of this act the President may notify all countries engaged in a war with any country with which the United States is now or may be hereafter at war of the enactment of same, and through appropriate diplomatic channels shall ascertain what action said countries may desire to take under the provisions of this act.

"SEC. 3. That the President is authorized to detail such officers and men of the military forces of the United States to cooperate with and assist the military representatives of foreign countries in the operation of the draft as he may deem expedient, and he may cause aliens drafted to be summoned and to be detained temporarily at such places of concentration as he may designate, and may render such assistance in transporting or deporting such aliens as he may think proper.

"SEC. 4. That the penalties prescribed in the aforesaid act of May 18, 1917, shall apply to violations of this act.

"SEC. 5. That any alien who shall willfully refuse or fail to present himself for registration, or to submit thereto, or to appear in answer to any summons issued under authority of this act, shall be taken into custody, and delivered either to the military representatives of the country of which he may be a citizen or subject, or to such commanding officer of the United States military forces as the President may direct.

"SEC. 6. That should any country fail or decline to take advantage of the provisions of this act within 60 days after notification of its enactment, as provided in section 2, the United States may proceed to draft the citizens or subjects of such country domiciled or resident in the United States in accordance with the provisions of existing law."

Mr. BURNETT (interrupting the reading). Mr. Chairman, I think the reading has proceeded far enough to show that this is altogether out of order, and I make the point of order that it is not in order.

Mr. WALSH. Mr. Chairman, I would like to be heard on the point of order.

The CHAIRMAN. Does the gentleman from Alabama desire to be heard on it?

Mr. BURNETT. Mr. Chairman, it is clearly a conscript-draft provision. There is no such provision in this bill. It is an entire departure and brings in a whole lot of things that are not germane.

Mr. GOOD. Will the gentleman yield?

Mr. BURNETT. Yes.

Mr. GOOD. It provides for the very thing that the gentleman's bill provides for, deportation of these men.

Mr. WALSH. Mr. Chairman, I have offered this amendment because I am in sympathy with what the gentleman from Alabama desires to accomplish by his measure, and I believe that action should be taken by the House, as I stated before when I had the floor.

The measure I offer as a substitute provides for the President, through the State Department, proceeding in exactly the same manner apparently in which that department has proceeded in negotiating treaties or agreements to cover the question of getting these aliens into the military service. The measure I offer to take the place of the bill reported by the gentleman from Alabama obviates, in my opinion, every one of the objections that have been raised here by gentlemen who have opposed the bill. It obviates the objection raised by the distinguished gentleman from Kentucky [Mr. SHERLEY]. It obviates the objection raised by the gentleman from Ohio [Mr. GORDON]. It obviates the other objections that have been raised because it seeks to do through diplomatic negotiations in the first instance what has already been started by the State Department, namely, to enlarge the authority which we have conferred on cobelligerents so as to permit their military representatives who may be here, and who have in due form filed or presented their credentials to draft their nationals into their own military service. We have already given them authority to recruit them. We would further provide in my amendment that they may draft them, and the President is authorized by the measure which I submit to designate representatives of the United States military and naval forces to assist in that work and to prescribe the rules and regulations under which that may be done.

Furthermore, Mr. Chairman, the amendment which I have offered permits the President to furnish to the allied nations a list of their aliens which have been registered under the selective-draft act, and also permits the further registration of all these aliens between the ages of 18 and 45 years. He first notifies the diplomatic representatives of these various nations that we have so many of the nationals domiciled in this country, registered under our selective-service legislation, and if any such country does not desire within 60 days to take them such country is notified that we have enacted this legislation; and if it does not desire to take them into its own military service, it is hereby notified that we, the United States Government, will take them into our military or naval service. Thereby we give them notice and give them the option of volunteering or being drafted into the military service of these cobelligerent nations, or the other option of being put under the provisions of our selective-service law. It authorizes the President to have these men assembled at such places as he may designate for that purpose, to be delivered over to the representatives of these belligerent nations, and if they seek to avoid registration it subjects them to the penalties of the provisions of the selective-service act or to deport them and send them back under guard of military representatives of this Nation or under the guard of her own officials.

The CHAIRMAN. The time of the gentleman has expired.

Mr. WALSH. But, Mr. Chairman, I am speaking to the point of order.

The CHAIRMAN. The Chair is informed that in Committee of the Whole the five-minute rule applies to points of order.

Mr. STAFFORD. Oh, Mr. Chairman, that is not correct. The Chair has control of the time.

The CHAIRMAN. The Chair will ascertain in a moment. In the meantime the gentleman may proceed.

Mr. WALSH. And furthermore, Mr. Chairman, I have offered in this proposed amendment a section which reads as follows:

SEC. 1. That citizens or subjects of the enemy country or of countries allied with the enemy may be drafted for and assigned to such nonmilitary occupation as the President may prescribe.

This would seem to be of great advantage under present conditions.

I will admit that that provision goes beyond the provisions in the bill under consideration; but the other section, which I call to the attention of the Chair, is to the effect that the provisions of this measure shall not apply to citizens or subjects of countries who by provisions of the treaty with the United States are protected from draft for military purposes.

The whole intent and purpose, Mr. Chairman, of the measure as offered by the distinguished gentleman from Alabama, is to get these men to perform military service and withdraw their claims for exemption, or, in the event of not doing that, to be sent back to the countries from whence they came. The whole purpose of the measure which I have offered is to accomplish that same purpose, only through a different procedure and by different machinery.

Mr. GARRETT of Texas. Mr. Chairman, will the gentleman yield?

Mr. WALSH. Yes.

Mr. GARRETT of Texas. Does the gentleman think that his amendment in so far as the age limit is concerned, which he fixes at from 18 to 45, is in accord with our draft law?

Mr. WALSH. Oh, the age limit as fixed in the amendment which I suggest goes beyond the age limit fixed in the selective-draft law, but it is similar to the age limit fixed by these various countries of which these aliens are citizens or nationals; and so we say to them, "We put you under the same liability for military service in our ranks, if you are not drafted by your own nation, as you would be if you were residing at home and not within our borders." I submit that we should look beyond the title of the measure under consideration, we should look beyond the title of the bill introduced and reported by the gentleman from Alabama [Mr. BURNETT], and consider its intention. We should read the entire measure and see what it is designed to accomplish. The amendment which I submit, as I before stated, seeks to accomplish the very same thing by a little different machinery, and follow out in large measure the very operation, the very plan and scheme which we have been given to understand has been followed by the Secretary of State, as indicated by the letter read by the distinguished chairman of the Committee on Foreign Affairs, the gentleman from Virginia [Mr. FLOOD], the other day, when he called attention to the fact that under the agreements which are being negotiated these aliens, resident in this country, are given an option to enter the service of their own country or the service of the United States, and we simply give the option under my amendment to those nations to say, "We call you back to fight within the ranks of your own country, or, not calling you back, we leave you over there subject to the operations of the laws of the United States."

Mr. GOOD. Mr. Chairman, will the gentleman yield?

Mr. KEARNS. Mr. Chairman, a parliamentary inquiry.

Mr. WALSH. I yield to the gentleman from Iowa.

Mr. BANKHEAD. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BANKHEAD. I desire to ask whether or not an amendment which proposes to perfect the subject matter of the section, which the gentleman's substitute proposes to strike out entirely, would not be in order before the consideration of the substitute? If so, I desire to offer an amendment to perfect.

Mr. KEARNS. Mr. Chairman, a parliamentary inquiry.

Mr. SAUNDERS of Virginia. Mr. Chairman, I rise to maintain the proposition that an amendment that seeks to perfect the original text is in order before a substitute.

Mr. WALSH. The Chair has already ruled on that question.

The CHAIRMAN. There is no doubt that an amendment that proposes to perfect the section is in order before an amendment to strike out is in order. The amendment pending is to strike out and insert.

Mr. SAUNDERS of Virginia. I understand that. Will the Chair hear me for two minutes on that?

The CHAIRMAN. The gentleman from Massachusetts has the floor.

Mr. GOOD. Mr. Chairman, I rise to a point of order.

Mr. SAUNDERS of Virginia. I did not understand that the gentleman from Massachusetts had the floor.

The CHAIRMAN. The gentleman from Massachusetts had the floor when this parliamentary inquiry was submitted.

Mr. KEARNS. Mr. Chairman, a parliamentary inquiry.

Mr. WALSH. Mr. Chairman, I have the floor?

The CHAIRMAN. Yes.

Mr. WALSH. Then I yield to the gentleman from Iowa [Mr. GOOD] for a question.

Mr. KEARNS. Mr. Chairman, I think I was recognized to submit a parliamentary inquiry.

The CHAIRMAN. The gentleman from Massachusetts has the floor.

Mr. KEARNS. But I desire to submit a parliamentary inquiry.

The CHAIRMAN. The gentleman from Massachusetts has the floor and the gentleman can not take him off the floor for that purpose.

Mr. KEARNS. I rise to a parliamentary inquiry.

Mr. SHERLEY. I make the point of order that the gentleman from Ohio can not take the gentleman from Massachusetts off the floor for that purpose.

Mr. SAUNDERS of Virginia. Mr. Chairman, the gentleman from Ohio can not take the gentleman from Massachusetts off the floor in order to submit a parliamentary inquiry.

The CHAIRMAN. That is what the Chair is holding now—that the gentleman from Massachusetts has the floor.

Mr. WALSH. Mr. Chairman, I thank the chairman of the committee for the protection he has afforded me to discuss this point of order. Does the gentleman from Iowa desire to ask me a question? I yield for a question.

Mr. GOOD. I desire to call the gentleman's attention to section 2 of the bill under consideration, and to call his attention to the following language:

That after the expiration of 60 days from the passage of this act the President of the United States is authorized and empowered, under such rules and regulations as he may prescribe, to draft any alien in the United States to perform such mental or physical labor on the farms, in the manufacturing establishments, or other enterprises in the United States as he may deem necessary or proper.

The gentleman from Alabama has made the point of order that the gentleman's amendment is not in order.

Mr. WALSH. If the gentleman from Iowa has concluded his question, I will undertake to answer it, although I do not understand it yet.

Mr. GOOD. The question I intended to propound to the gentleman from Massachusetts was for the benefit of the Chair.

The CHAIRMAN. The Chair is ready to rule.

Mr. SAUNDERS of Virginia. I do not want to take up the time of the Chair, but I would like a few minutes to address myself to the point of order raised by the gentleman from Alabama.

The CHAIRMAN. There is a point of order now pending in the committee, and that should be disposed of before another point of order is raised.

Mr. SAUNDERS of Virginia. This is in immediate connection with that.

The CHAIRMAN. The Chair would like to decide this point of order, and then he will hear the gentleman.

Mr. WALSH. Did I understand the Chair to say he was ready to rule?

The CHAIRMAN. The Chair is ready to rule.

Mr. WALSH. Then I shall desist.

The CHAIRMAN. This is an amendment offered to the first section of the bill. The first section of the bill provides for denying citizenship to aliens and provides for their deportation. The amendment offered by the gentleman from Massachusetts is on a different subject. It provides that they may be drafted, which the Chair thinks is not germane to the first section of this bill, and therefore the Chair sustains the point of order.

Mr. BANKHEAD. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 1, line 5, and just after the word "Germany," strike out the words "or with any of the other central powers of Europe" and insert in lieu thereof "Austria-Hungary, Bulgaria, or Turkey."

Mr. BANKHEAD. I understand the chairman of the committee has no objection to accepting the amendment.

Mr. BURNETT. Mr. Chairman, I am of the opinion that the words "central powers" are sufficiently specific, but I do not want to take any chances on that, and as the gentleman from Alabama, my colleague, has submitted an amendment I have no objection to it.

The CHAIRMAN. The question is upon the amendment offered by the gentleman from Alabama.

The question was taken, and the amendment was agreed to.

Mr. GOOD. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GOOD. There was so much confusion here when the amendment was offered and read, did I understand that "Turkey" is included? We are not at war with Turkey or Bulgaria, and it would be a mistake certainly to adopt an amendment of that kind.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that the amendment may be again reported.

The CHAIRMAN. The amendment has been agreed to.

Mr. MADDEN. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MADDEN. I want to know when the amendment offered by the gentleman from Alabama was considered? I was sitting here and all the rest of us down here and we did not even hear the amendment read.

The CHAIRMAN. The amendment was read. The Chair recognized the gentleman from Alabama [Mr. BURNETT] and he stated that the amendment was not objectionable to him, and the Chair submitted the vote to the House, and it was carried.

Mr. MADDEN. The House did not vote on it.

The CHAIRMAN. Oh, yes; the gentleman from Illinois is mistaken.

Mr. MADDEN. Mr. Chairman, I submit that it is not fair to decide questions in that way.

Mr. FLOOD. The gentleman from Iowa certainly heard it read.

Mr. MADDEN. I did not hear it read, and I was sitting here and no one else.

Mr. FLOOD. The gentleman from Iowa certainly heard it read and called attention to some words in it.

Mr. MADDEN. Mr. Chairman, I am going to protest against that kind of ruling.

Mr. SABATH. Mr. Chairman, regular order.

Mr. MADDEN. I want it distinctly understood we are not going to submit to it.

The CHAIRMAN. The gentleman will please take his seat.

Mr. MADDEN. I want the Chair to rule right and submit questions to the House. I want to hear what the record is. I ask for the record on it. I call for the record on this motion.

Mr. BANKHEAD. If the gentleman will allow me to make a statement, I will say to the gentleman from Illinois I have no objection in the world to having the matter fully considered.

Mr. MADDEN. It ought to be submitted to the House.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent that the proceedings by which the amendment of the gentleman from Alabama [Mr. BANKHEAD] was agreed to be vacated.

The CHAIRMAN. The gentleman asks unanimous consent to vacate the proceedings by which the amendment of the gentleman from Alabama was agreed to. Is there objection?

Mr. JOHNSON of Washington. I object.

Mr. MADDEN. I ask for the record of the proceedings.

The CHAIRMAN. That is out of order.

Mr. MADDEN. Mr. Chairman, I submit I have a right to ask for the record of the proceedings by which this vote was taken.

The CHAIRMAN. And the Chair understands that he has a right to decide it out of order also.

Mr. MADDEN. I appeal from the decision of the Chair.

The CHAIRMAN. The gentleman from Illinois [Mr. MADDEN] appeals from the decision of the Chair.

Mr. SABATH. As to what?

The CHAIRMAN. Because the Chair will not permit him to have the record read of the adoption of the amendment a while ago. The Chair has ruled it out of order, and the Chair can not have the record read.

Mr. SABATH. The Chair was right.

The CHAIRMAN. The gentleman from Illinois [Mr. MADDEN] appeals from the decision of the Chair.

Mr. LENROOT. Mr. Chairman——

Mr. FLOOD. Question, Mr. Chairman.

The CHAIRMAN. Does the gentleman from Wisconsin [Mr. LENROOT] desire to be heard?

Mr. LENROOT. Yes, sir. I merely desire in discussing this appeal to say that this entire controversy can easily be settled and in fairness to everybody. It can be disposed of in one-half minute.

The CHAIRMAN. Does the gentleman from Wisconsin submit any question for unanimous consent?

Mr. LENROOT. I ask unanimous consent that the record be read.

The CHAIRMAN. The gentleman from Wisconsin [Mr. LENROOT] asks unanimous consent——

Mr. LENROOT. That the record be read.

The CHAIRMAN. That the record be read touching the amendments offered by the gentleman from Alabama [Mr. BURNETT]. Is there objection? [After a pause.] The Chair hears none.

Mr. RAKER. Mr. Chairman, reserving the right to object——

The CHAIRMAN. The Clerk will read the record.

Mr. BURNETT. Mr. Chairman, I move to lay the appeal on the table.

The CHAIRMAN. It is too late now.

Mr. HEFLIN. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. HEFLIN. What was the request which the gentleman made a while ago?

The CHAIRMAN. That the record of the proceedings touching on the amendment offered by the gentleman from Alabama [Mr. BANKHEAD] be reported to the House.

Mr. HEFLIN. And was consent granted?

The CHAIRMAN. Unanimous consent was granted, and the Clerk is now preparing the record.

Mr. MOORE of Pennsylvania. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MOORE of Pennsylvania. Did not the gentleman from Alabama [Mr. BURNETT] move that the appeal lie on the table, and is not that now the question pending?

The CHAIRMAN. Unanimous-consent request has been made and granted by the committee since that time. The Clerk will read the record of the committee on the amendment.

The Clerk read as follows:

The CHAIRMAN. The question is upon the amendment offered by the gentleman from Alabama.

The question was taken, and the amendment was agreed to.

Mr. MADDEN. Mr. Chairman, I submit that that does not make the record complete. There is no record of any negative vote on the question at all. It is merely a statement of the Chair to the effect that the amendment was adopted. There is no evidence to show that both sides voted on the question at all. The question of whether the amendment would be adopted was the only question put to the House.

The CHAIRMAN. The record does say that the vote was taken, the vote on the amendment being a vote on both sides, and the Chair knows, and nearly everybody else in the House knows now, that the question was submitted to the committee, and the yeas and nays were called for.

Mr. MADDEN. The yeas and nays were not called for.

The CHAIRMAN. The aye-and-no vote was called for.

Mr. MADDEN. The negative vote was not called for.

The CHAIRMAN. The Chair begs the gentleman's pardon. The Chair knows that it was.

Mr. BURNETT. Mr. Chairman, I demand the regular order.

Mr. BORLAND. I ask that the amendment be read that I send to the Clerk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. BORLAND: Page 1, line 3, after the word "alien" strike out the following——

Mr. MADDEN. Mr. Chairman, I submit before this amendment is in order my motion to take an appeal from the decision of the Chair should be considered.

The CHAIRMAN. The Chair thought that was withdrawn.

Mr. MADDEN. It was not withdrawn and is not going to be withdrawn.

Mr. REAVIS. Mr. Chairman——

The CHAIRMAN. The gentleman from Illinois [Mr. MADDEN] insists upon having his appeal submitted to the committee.

Mr. REAVIS. A parliamentary inquiry, Mr. Chairman.

Mr. BURNETT. Mr. Chairman, I make the point of order that it is too late.

The CHAIRMAN. Does the gentleman from Illinois [Mr. MADDEN] desire to have his appeal from the decision of the Chair submitted?

Mr. MADDEN. Certainly.

Mr. BORLAND. Mr. Chairman, I move to lay the appeal on the table.

Mr. REAVIS. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman from Illinois [Mr. MADDEN] moves to appeal from the decision of the Chair.

Mr. BORLAND. Mr. Chairman, I move to lay it on the table.

Mr. WALSH. Mr. Chairman, I raise the point of order.

The CHAIRMAN. I understand that can not be done in committee. As many as favor the decision of the Chair will answer "aye." [After a pause.] Those opposed will answer "no." [After a pause.] The ayes seem to have it. [After a pause.] The ayes have it.

So the decision of the Chair was sustained as the judgment of the committee.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Missouri [Mr. BORLAND].

The Clerk read as follows:

Amendment offered by Mr. BORLAND: Page 1, line 3, after the word "alien," strike out the following: "eligible by existing law to become a naturalized citizen of the United States."

Mr. BORLAND. Mr. Chairman, the first section of this bill provides that any alien eligible by existing law to become a naturalized citizen of the United States who is a native of those countries engaged in war with Germany, and so forth, and who, but for his alienage, would be subject to the selective draft, shall be subject to this law. I have not heard any explanation as to why he must be both subject to the selective draft, but for his alienage, and also eligible to become a citizen of the United States. This law does not seem to reach anybody, except those who are eligible to become citizens of the United States.

Now, that word "eligible" would extend to all of the provisions of the naturalization law, one of which is a residence of two years before he can declare his intention, and five years before he can make his final declaration.

Now, how long must these resident aliens be in the United States before they become subject to this law? Either one of these two periods is too long for the purposes of this bill. Such a bill would not catch the alien slackers. It would not catch the large number of aliens who might have come here to avoid military service during this war. It would only catch men who were eligible to become citizens of the United States, and all who were not eligible to become citizens of the United States, because they have not been here long enough to become citizens of the United States, would continue to be slackers. We would here furnish a harbor of refuge by which a man could leave his own country to avoid military service there and come to this country and not be eligible to military service here.

Mr. RAKER. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. BORLAND. I can not yield.

The CHAIRMAN. The gentleman declines to yield.

Mr. BORLAND. That is one of the reasons why this matter ought to be settled by treaty, rather than by this crude attempt at legislation. It is possible by treaty to make every alien slacker in the United States who belongs as a national to any of the belligerent powers liable to military duty. He can be made by treaty liable here to military duty, and that is exactly what we want. But we are permitting a large number of them to escape under this definition of the alien-slacker law.

Mr. RAKER rose.

Mr. BORLAND. Oh, I know what my friend is going to say. [Laughter.] There is no use in taking up time. He will say it is going to exclude the Japanese.

Mr. RAKER. No. That is not what I am going to say. Is it not a fact that the gentleman is against the whole bill and is doing everything to beat it?

Mr. BORLAND. I am showing the weakness of it, and showing that it will not do what can readily be accomplished by treaty. We ought to catch these men who are not eligible to become citizens of the United States. Those are the ones whom we ought to catch; and if this word "eligible" means anything, and the alien has lived here two years, it is too long, and if he has lived here five years everybody must admit that the bill is worthless for any purpose.

Mr. GORDON. In other words, it exempts all the slackers?

Mr. BORLAND. Yes; it exempts all the slackers.

Mr. LENROOT. Mr. Chairman, will the gentleman yield?

Mr. BORLAND. Yes.

Mr. LENROOT. Does the gentleman contend that in order to be eligible to citizenship in the United States he must have taken out his first papers?

Mr. BORLAND. You can say that in order to be eligible to be a citizen in the language of this bill a man must first have declared his intention. Now, if the bill does not reach anybody but those who have declared their intention it will reach very few of the alien slackers in this country.

Mr. GORDON. And they are covered by the draft law.

Mr. BORLAND. Yes; they are covered by the draft law, as the gentleman from Ohio says. These questions can all be determined by treaty and reciprocal agreements with the other countries by which those countries will subject their nationals to military service in the United States, and by which we will subject our nationals to military service abroad. But the aim can not be accomplished by this bill, and this amendment ought to be adopted and the bill defeated. [Applause.]

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. McCULLOCH rose.

The CHAIRMAN. For what purpose does the gentleman from Ohio rise?

Mr. McCULLOCH. I want to submit an amendment.

The CHAIRMAN. An amendment is pending now. The question is on agreeing to the amendment.

Mr. BURNETT. Mr. Chairman, I desire to be recognized in opposition to the amendment.

The CHAIRMAN. The gentleman from Alabama is recognized in opposition to the amendment.

Mr. BURNETT. Mr. Chairman, the argument of the gentleman from Missouri [Mr. BORLAND] is an absurdity. As to the word "eligible," that is an expression that is used all the way through in regard to these immigration matters. A man is eligible to become a citizen who belongs to the nationality that may become citizens. The Japanese, the Chinese, the Asiatics are not eligible to become citizens by naturalization. White people under the law are; and the complete answer to the argument of the gentleman is that it does apply to the Japanese and Asiatics, who are not eligible to become citizens.

How else could you express the idea that anybody was ineligible to become a citizen? If you want to speak of the Japanese, he can not become a citizen by naturalization. You may also say that they are ineligible to become citizens by naturalization. It is a term that occurs in the immigration and naturalization laws all the way through, and the gentleman has stirred up a mare's nest for the purpose of trying to throw clogs in the way of the passage of this bill.

Mr. GORDON. Will the gentleman yield?

Mr. BURNETT. Do gentlemen believe that if the committee did not mean anything this bill would have been reported? We reported it because we believe it has got teeth in it, and that is one of the objections of some of these obstructionists, because it has got teeth in it, and they want to defeat it because it has teeth.

Mr. GORDON. Will the gentleman yield?

Mr. BURNETT. Yes.

Mr. GORDON. I want to ask the gentleman, who is authority on the question, whether any foreign-born alien is eligible to citizenship before two years, having declared his intentions?

Mr. BURNETT. He is eligible to become a citizen whenever he comes over if he is white, but he has to stay here for the period of five or not more than seven years before he can apply for citizenship; but that does not destroy his eligibility to apply. We are willing to stand on that.

The CHAIRMAN. The question is on the amendment.

The question was taken, and the amendment was rejected.

Mr. McCULLOCH. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 2, line 11, after the word "deportation," insert the following: "*Provided*, That the local draft board shall call for service all such aliens liable to military service under the provisions of this act in the order of their registration, and all such shall be called in the same order as they would have been called if no claim had been filed for exemption on account of alienage."

Mr. McCULLOCH. Mr. Chairman, this bill or some bill providing that aliens shall serve in this war either in the army of the country to which they owe allegiance or in the American Army should have been passed before the first draft went into effect. [Applause.]

It is an injustice to the American boy who has responded to the call to the colors that these aliens are not required to serve somewhere. Delay in this matter has resulted in thousands upon thousands of aliens remaining here at the homes of our boys, taking their positions and benefiting by their absence while they are fighting at the front—fighting, if you please, the battles of these aliens who remain here. [Applause.]

The delay in this matter has resulted in more adverse comment than any one act of omission or commission by Congress since this war began. I, for one, want to see Congress act in harmony with the departments in carrying on this war. I believe firmly in the effectiveness of unity of action.

But the responsibility, after all, gentlemen, is with us. We are the representatives of the people and they look to us to safeguard their interests. We are the ones who must go back to the people and give an account of our trust and receive either approval or disapproval at their hands. It is not the State Department. What is going to be the result if you do not pass this bill or some bill that makes the alien serve somewhere? The result is going to be that these aliens are not going to war. They are not going to be called in the next draft. They will still be exempt; and when that draft comes and the American boys are taken, if you men have not seen to it that the aliens are taken, you are going to have to answer to the people, and all the camouflage about international law and all the arguments about treaties and all the technicalities in the world will not save one of you. [Applause.]

For my part, I would rather go on record against almost any other measure than this one and go back to my people. Results, after all, are what count. The American people want these aliens to serve somewhere, and they are right; they should serve somewhere. Technical arguments will not take the place of results, and if the next draft comes on and the alien still stays here, free from all obligations to serve, it will not be the State Department, but you, who will answer.

I do not want to be one to go on record that the American boys must go and the alien slacker can stay. The amendment I proposed will make the aliens who have not been taken in the first draft take their regular order just as though they had not been exempted. The chairman of the committee has said that this can be provided for by the regulations. I do not think there should be any doubt about the intent of Congress on the subject. We should say clearly that the aliens must now take their turn in the order of their original registration.

Let us say to our boys over there and to those who are getting ready to go that the Congress is back of them, dealing fairly with them, and that we will see to it that they are not discriminated against in favor of alien slackers, who are physically fit, by requiring the American boy to go and permitting the alien to stay here and take the American boy's job and benefit by his absence. The State Department only asked until the 1st of December to take care of this matter by treaty. It is now February and the next draft is upon us and nothing definite has been accomplished. Congress should act, and act at once.

Mr. BUTLER. Will the gentleman yield?

Mr. McCULLOCH. I will.

Mr. BUTLER. In the gentleman's opinion, what is the effect of this bill if the Rogers amendment remains in it?

Mr. McCULLOCH. The Rogers amendment emasculates the bill and destroys its effectiveness.

Mr. BUTLER. Then we will have a roll call on it.

Mr. BURNETT. Mr. Chairman, I ask unanimous consent that all debate on this amendment close in five minutes.

The CHAIRMAN. The gentleman from Alabama asks unanimous consent that all debate on this amendment close in five minutes. Is there objection?

There was no objection.

Mr. GORDON. Mr. Chairman, I rise in opposition to the amendment. The frankest speech that we have heard here to-day is the one just delivered by the gentleman from Ohio [Mr. McCULLOCH]. It is "results" he says that we want. He admits that you have already emasculated this bill and absolutely destroyed it, and what he means by "results" of course is political results, and that is all there is of this bill.

Mr. McCULLOCH. Mr. Chairman, will the gentleman yield?

Mr. GORDON. I decline to yield. Mr. Chairman, that is all there is of this bill. I have listened patiently to all the debate here, to all the arguments on the proposition.

Of course, we have been advised that the State Department and the able counselors who advise that department on behalf of the Government and people of the United States do not know anything about international law. Of course, this committee did not agree with that conclusion, and by a vote of 99 to 80 inserted a provision here which, of course, destroys this bill, as it ought to be destroyed. We have heard something about verbal camouflage, and this talk about drafting aliens to war for the United States makes me sick and tired of men who claim to be American citizens. Which alien nation did the United States enter the European war to assist? I would like to hear some men name the particular foreign nation, to aid which we declared a state of war with the Imperial Government of Germany. I deny it. I voted for that declaration of war, but I did not do it to help any foreign nation nor all of the foreign nations in Europe. That exposes the utter hypocrisy of the whole proposition of drafting aliens into the military service of the United States. [Laughter.]

I voted for this declaration of war to vindicate the sovereignty of the United States and the rights of her people under international law. [Applause.] I did not vote for this war to help some alien nation or any alien in the United States. We are not fighting this war in the interest of any alien nation or any alien people anywhere on the face of the earth. The declaration of war which Congress adopted expressly recited the reasons for that declaration—that the rights of citizens of the United States, the rights of the Government of the United States, had been unlawfully assailed upon the high seas in violation of international law, and a state of war existed because of those unlawful acts.

Of course, a lot of fellows here are making speeches for home consumption. That is perfectly obvious. You know aliens do not vote in Ohio, and, of course, it is a nice, convenient thing to get up here and lambast aliens. We have heard something about whether or not this violates treaties. I do not care whether there is a treaty in existence which prohibits conscripting aliens into our military service or not. Any man with any sense who knows anything about international law knows that even in the absence of any treaty you have no right to draft aliens into your military service. There is no

respectable authority on international law who ever wrote on the subject that will contend that you have—there is absolutely no authority in support of the proposition that you can draft aliens, especially to fight a foreign war. We have no lawful right to lay hands on aliens for such a purpose. Of course, aliens can only appeal to any foreign government through the government to which they owe allegiance. Advantage is taken of that fact, but I want you gentlemen when you vote for this bill to remember that there is not an alien in the United States to-day who is not here by the invitation of the Government and the Congress of the United States through a treaty or by a law enacted by this body—not one. An alien has no right to go into a foreign country except by the consent of that country, and no alien is in the United States to-day who is not here by the consent of the Government and the people of the United States.

The operations of this bill are confined by its opening paragraph, beginning on line 3, page 1, to "any alien eligible by existing law to become a naturalized citizen of the United States"; this limitation excludes in express terms all "alien slackers," because it excludes from the operation of the bill everyone who has come to the United States since the outbreak of the European war.

Webster's new international dictionary defines "eligible" as follows: "Fitted or qualified to be chosen or elected; legally or morally suitable; as an eligible candidate." From this definition of the term "eligible" it will at once be seen that all aliens are excluded from the operation of the bill who have not been in the United States at least five years preceding the date of the final enactment and approval of the law.

For the information of the committee I desire to quote from a report, No. 15, first session, Sixty-fifth Congress, of the Committee on Foreign Affairs, through the gentleman from Massachusetts [Mr. ROGERS], submitted to the House on August 1, 1917, House joint resolution 115, in which report are collected provisions from our treaties with foreign nations prohibiting us from requiring compulsory military service of citizens of other countries and also extracts from communications of our own State Department challenging the right of all nations to draft American citizens into their military service, even where no treaty existed prohibiting it. Also citations from the leading authorities upon international law denying the right, in the absence of treaties, of any nation to conscript aliens into its military service:

APPENDIX A.

PROVISIONS IN TREATIES ENTERED INTO BY THE UNITED STATES WITH OTHER COUNTRIES RELATING TO RIGHT OF EITHER COUNTRY TO EXACT COMPULSORY MILITARY SERVICE OF CITIZENS OF THE OTHER COUNTRY RESIDING THEREIN.

It will thus be seen that in at least 17 treaties entered into between the United States and foreign Governments the policy of mutual exemption from compulsory military service of the citizens or subjects of one of the contracting parties, residing in the territories of the other, has been established. At least 10 of these treaties are still in full force and effect.

The following treaties between the United States and other countries contain a "most-favored-nation" clause which would probably be deemed to include a similar exemption from compulsory military service even if not otherwise existing by treaty or by international law:

Algiers, 1816, article 12.
China, 1858, article 30.
Korea, 1882, article 14.
Hanseatic Republic, 1827, article 9.
Japan, 1854, article 9.
Morocco, 1880, article 17.
Persia, 1856, article 3.
Samoan Islands, 1878, article 6.
Spain, 1902, article 2.
Tonga, 1886, article 3.
Japan, 1911 article 4.

APPENDIX B.

MAY THE UNITED STATES, EVEN WHEN TREATY STIPULATIONS DO NOT PREVENT, EXACT COMPULSORY MILITARY SERVICE OF ALIENS?

In 1804 Mr. Madison, then Secretary of State, wrote to Mr. Monroe, then our minister to England: "Citizens or subjects of one country residing in another, though bound by their temporary allegiance to many common duties, can never be rightfully forced into military service * * *."

Naturally many cases involving the question arose during the Civil War. Secretary Seward had occasion to express himself a number of times. In 1862 he said: "I can hardly suppose that there exists anywhere in the world the erroneous belief that aliens are liable here to military duty." Later, the same year, he wrote to the governor of Indiana: "There is no principle more distinctly and clearly settled in the law of nations than the rule that resident aliens not naturalized are not liable to perform military service. We have uniformly claimed and insisted upon it in our intercourse with foreign nations." In 1864 he wrote to Mr. Stanton, Secretary of War: "In a case of alleged fraudulent enlistment of an alien his government has an undoubted right and duty to ask for a prompt investigation and satisfactory answer; and if it appears that he was improperly enlisted and he has fallen in battle, his family ought to have some compensation." In Halleck's International Law it is stated: "In 1861, during the American Civil War, the British Government declared that if enforced enlistments of British subjects for the war were persisted in the Government would be obliged to concert with other neutral powers for the protection of their respective subjects, but neither in the Northern or Southern States was the discharge of any British subject enlisted against his will refused on proper representation." (Vol. 2, p. 6.)

In 1874 Secretary Fish wrote: "We did not claim the right to impress aliens into our forces during the late Civil War, but it is understood that in one instance at least, in the case of a siege, we sought to justify such an impressment."

The United States has been very positive indeed in its action when Mexico has sought to impose military service upon citizens of the United States. The most notable cases, however, occurred in 1880, at the time when the treaty of 1831, forbidding compulsory military service, was still in force. The American authorities, however, appear to have put their protest upon grounds of international law as well as upon treaty obligations. The American minister to Mexico was instructed that there was "scarcely any act of which a nation should be less tolerant than that of a neighboring power forcibly impressing its citizens into their military service, perhaps to be obliged, at some future time, to fight against their own flag." Mr. Evarts later in the same year wrote that whenever protest was made by Mexico during our Civil War it was the practice of the State Department to bring the subject at once to the attention of the Secretary of War, and that "no single instance is met with in which the Mexican citizen's claim to exemption from military service in the armies of the United States was not promptly recognized and respected by this Government." The following year Mr. Blaine, then Secretary of State, wrote: "It is notorious that the impressment of American seamen into the naval service of a foreign power was at one time a serious grievance, not to be acquiesced in, and raised a question upon which all parties in this country were unanimous in regarding as one of international character. Public sentiment here in regard to that subject was borne in mind during the late Civil War. The number of persons of foreign birth, especially in the large cities, led to the accidental or involuntary enrollment of unnaturalized aliens in the military or naval service. These, however, as is shown by the large space in the records of the department at the time, were at once discharged upon complaint made and in the absence of proof of their naturalization. It is hoped, therefore, that in considering this subject the Mexican Government will not only have due regard to the unlawfulness of the impressment but to the universal and strong sentiment upon the subject which pervades this country."

In 1888 Mr. Bayard summed up the situation thus: "It is well settled by international law that foreigners temporarily resident in a country can not be compelled to enter into its permanent military service. It is true that in times of social disturbance or of invasion their services in police or home guards may be exacted, and that they may be required to take up arms to help in the defense of their place of residence against invasion of savages, pirates, etc., as a means of warding off some great public calamity by which all would suffer indiscriminately. The test in each case as to whether a foreigner can properly be enrolled against his will is that of necessity. Unless social order and immunity from attack by uncivilized tribes can not be secured except through the enrollment of such a force, a nation has no right to call upon foreigners for assistance against their will."

APPENDIX C.

MAY THE UNITED STATES, EVEN WHEN TREATY STIPULATIONS DO NOT PREVENT, EXACT COMPULSORY MILITARY SERVICE OF ALIENS WHO HAVE DECLARED THEIR INTENTION TO BECOME CITIZENS OF THE UNITED STATES?

Revised Statutes of the United States, section 2165, provides in part as follows: "An alien * * * shall declare on oath * * * two years at least prior to his admission that it is bona fide his intention to become a citizen of the United States, and to renounce forever all allegiance and fidelity to any foreign prince, potentate, State, or sovereignty. * * *."

It will be observed from the language of the above statute that a declarant for citizenship neither takes a present oath of allegiance to the United States nor disclaims allegiance to the country of his origin. It would seem natural to expect, therefore, that the authorities would regard his citizenship status as absolutely unaffected and would settle the question of his liability to compulsory service exactly as if he had never taken even the first step toward becoming a citizen of the United States.

Mr. Seward wrote to the governor of Indiana in 1862: "The law of Great Britain holds that a native British subject owes allegiance to the British Government until he has completely effected his naturalization in the United States under the laws of Congress. * * *." From the foundation of the Government the Department (of State) had refused to grant passports as citizens to aliens who had merely filed the preliminary declaration of intention and who had not effected their naturalization under the United States laws, and had informally recognized the passports granted to them by the proper authorities of the Governments of which they had been born subjects.

In 1863 Mr. Seward stated the rule as follows: "No alien-born person is liable to render military service unless either he has been naturalized on his own application or has made a voluntary declaration, on oath, of his intention to become a citizen by naturalization according to law, or has claimed and actually exercised the political right of voting as a citizen of the United States."

While this language does not expressly state that a declarant is liable to render compulsory military service, it evidently squints in this direction. Doubtless Mr. Seward, in writing it, had in mind the language of the act of Congress of March 3, 1863—the conscription act—which expressly declared that the levy should include "all persons of foreign birth who shall have declared, on oath, their intention to become citizens."

In 1863 certain able-bodied male persons of foreign birth, who had declared, on oath, their intentions to become American citizens, were called upon for military duty by the United States. The British Government suggested that British subjects who had merely declared their intention to become American citizens but had not exercised any political franchise in consequence of such declaration ought to be allowed a reasonable period after the passing of the act to exercise the option of leaving the United States or of continuing residing therein with the annexed conditions. The United States Government thereupon allowed 65 days to such persons to exercise their option, and the British Government refused to interfere on behalf of any intended citizens who had not availed themselves of the opportunity. (Parliamentary Papers, 1863, No. 337.)

By the act of March 3, 1863, aliens who had made a declaration of intention and who were under specified conditions liable to military duty were permitted to obtain passports, but this privilege was repealed in 1866. Switzerland objected to President Lincoln's proclamation concerning the liability of Swiss in the United States to perform military service. Mr. Seward suggested that a just interpretation of the war measures of Congress constituted a new and additional law of Federal naturalization. "But," he adds, "it was foreseen that some emigrants who had declared their intention might complain of surprise if they were immediately subjected to conscription. To guard against this surprise the proclamation was issued, giving them ample notice of the change of the law, with the alternative of removal from this country if they should prefer removal to remaining here on the footing on which Congress had brought them. Surely no foreigner has a right to be naturalized and remain here in a time of public danger and enjoy the protection of the Government without submitting to general requirements needful for his own security."

In Moore's Digest of International Law, volume 3, pages 336 to 353, will be found the precedents conclusively establishing that the declaration of intention to become a citizen neither confers citizenship in the United States nor divests citizenship in the country of origin.

The CHAIRMAN. The time of the gentleman from Ohio has expired. All time has expired. The question is on the amendment offered by the gentleman from Ohio [Mr. MCCULLOCH].

The question was taken, and the amendment was rejected.

Mr. BURNETT. Mr. Chairman, I ask unanimous consent that all debate upon this section now close.

Mr. PARKER of New Jersey. Mr. Chairman, I have given notice of an amendment.

Mr. EMERSON. Mr. Chairman, I desire to have two minutes.

Mr. BURNETT. I withdraw the request.

Mr. PARKER of New Jersey. Mr. Chairman, I offer the following amendment in the form of a motion to strike out.

The Clerk read as follows:

Amendment offered by Mr. PARKER of New Jersey: Page 1, line 3, after the words "that any alien," strike out the words "eligible by existing law to become a naturalized citizen"; also all of lines 4, 5, 6, 7, 8, and 9; and also the word "said," in line 11, after the words "exemption from"; also, on page 2, line 3, strike out "and shall as soon as practicable be deported"; also strike out all of line 4 and the words "and deportation" in line 11.

Mr. BURNETT. Mr. Chairman, I make the point of order against the amendment that it is not germane.

Mr. PARKER of New Jersey. It strikes out; that is all.

The CHAIRMAN. The gentleman from Alabama made a point of order against the amendment offered by the gentleman from New Jersey. Does the gentleman from Alabama desire to be heard on his point of order?

Mr. BURNETT. I understand the amendment was to strike out and insert.

Mr. PARKER of New Jersey. No.

Mr. BURNETT. Is it to strike out something?

Mr. PARKER of New Jersey. That is all.

The CHAIRMAN. It is to strike out.

Mr. BURNETT. Then I think the point of order is not well taken, Mr. Chairman, and I withdraw it.

The CHAIRMAN. The gentleman withdraws his point of order.

Mr. RAKER. Mr. Chairman, I think I have a point of order to make against the amendment.

The CHAIRMAN. The gentleman will state it.

Mr. RAKER. I make a point of order on the first part of the amendment that the committee has already disposed of that, and the gentleman can not include part of that and then strike out other parts scattered through the bill. On lines 3 and 4 the committee has already acted, and I make the point of order on that ground.

Mr. STAFFORD. That is a very novel point of order, Mr. Chairman, which has never been before submitted to any Committee of the Whole House on the state of the Union.

Mr. RAKER. Mr. Chairman, I desire to be heard, if it is novel.

Mr. STAFFORD. It has never been made before, and I would like to hear the gentleman cite the authority for making the point of order.

The CHAIRMAN. The Chair will hear the gentleman for a moment.

Mr. RAKER. I want to call the Chair's attention to the fact in lines 3 and 4 the gentleman from Missouri made a motion to strike out. Now the gentleman from New Jersey comes back and makes a motion to strike out the same language in the bill, and surely the committee will not sit here and hear a dozen motions to strike out the same language in the bill. It is not novel; it is ordinary sense, and I ask the Chairman to sustain the point of order on the ground it has already been passed upon by the committee.

The CHAIRMAN. This amendment does not propose to strike out anything that has been inserted, and all the matter proposed to be stricken out by this amendment has not been acted upon in any way by the committee, and the Chair overrules the point of order. The gentleman from New Jersey is recognized for five minutes.

Mr. PARKER of New Jersey. Mr. Chairman, may I have the first part read as it will read after the language has been stricken out without coming out of my time? However, I will take my time now.

The CHAIRMAN. The gentleman is recognized for five minutes.

Mr. PARKER of New Jersey. Mr. Chairman, I need only say to those who did not hear me before that I am thoroughly in sympathy with the objects of this bill, but it has two means proposed. One is to bar people from naturalization, and the bill limits that to our allies. I think any alien who is here and says he does not want to serve the United States in this crisis ought not hereafter to have the right to be naturalized and become a citizen, and I therefore strike out all referring to his special nationality. As amended, the first section is very simple. It says that any alien who by himself or by anyone else has heretofore claimed or shall hereafter claim exemption from the selective draft on account of being an alien shall forever be denied the right of becoming a citizen of the United States or any of its possessions. That is much broader than the bill. It is within our power and it is right to say that a man, say a native of Holland and a neutral, may be here and have the right to do business, but that even if a neutral in this our time of crisis says he does not want to be made an American citizen and perform those duties he should not ask that after the war. Much less men who are subjects of an enemy country. There

are some born abroad who came here when they were 6 months old. If those claim they are exempted from draft because they are born, for instance, in Austria, we do not want to naturalize them. If they do not so claim we want to do so, especially if they go into the Army.

Mr. MONDELL. Will the gentleman yield?

Mr. PARKER of New Jersey. I can not yield now. I will in a moment.

Now, as to deportations. Some of these men of our allies ought to be deported, but deportation is not the same class as naturalization. It is limited. It is not very troublesome now to prevent people from coming in. It will be very troublesome to deport, inasmuch as it is pretty hard to get transportation and still harder to get passports. But for convenience, for courtesy, and for the present that must be left to the State Department. As to naturalization, we have the power and we ought to pass a bill that is broad, far broader than that introduced by the gentleman from Alabama [Mr. BURNETT]. It is entirely within our power to allow no alien who says he is not a citizen to become a citizen.

Mr. MONDELL. Do I understand that it is the intention of the gentleman to provide for the drafting of alien enemies?

Mr. PARKER of New Jersey. Not at all. I said that if any aliens, for instance, who are born in Austria, who are 18 years old and who have been here since they were 6 months old, wanted to enlist, they may. And I take it if they do not claim exemption they ought to be drafted. If they do claim exemption they ought not to be citizens.

Mr. LUFKIN. Mr. Chairman, I oppose this amendment because I am opposed to all amendments offered by Members of this House who are opposed to the Burnett bill itself, because I believe that any amendment from that opposition is offered with the idea of weakening the bill rather than strengthening it.

I am one of the six Members of this House who have been elected since the United States entered the European war last April. I campaigned four months during the summer of 1917 for my nomination and then six weeks for my election. I was among the people of my district practically every day and night. Consequently I am perhaps in a better position to realize what the people are thinking about in connection with this war than are Members who have not faced their constituents for nearly two years, and I say to this House to-day, and I say it without hesitation, that the main thought in their minds is this very question of making use of the millions of aliens in our country during the present international crisis.

I made this question of the exemption of aliens the main issue in my campaign, and while my district is composed of men of all nationalities, the discussion of this problem never failed to be received with sympathy by my audiences.

I have no doubt that the conditions are the same in other parts of the country and that the thought of the man in California is not so much different from the thought of the man in Massachusetts on this particular question. The intensity of the feeling, of course, depends to some extent on the number of aliens in the communities. In my own State, where the aliens constitute practically one-third of the total registration for the draft, the Americans, whether by birth or by adoption, are particularly incensed. Last summer while the first draft was going on I visited city after city and town after town. I attended the exercises incident to the departure of these drafted men to their respective camps, and the sight presented was always the same. Four of the five young men who marched away from their homes and families were American young men, whereas four of the five who remained at home to enjoy the peace and comfort of this great land of ours, to live in what was to them almost luxury by receiving the wages formerly paid to their American brethren now in the service, were unnaturalized aliens. Do you wonder that the people are incensed at this state of affairs? Do you wonder that they refuse to be patient any longer and to wait upon the deliberations of our State Department? Six months ago we were told that Congress must be patient, that the people must be patient, and that the diplomatic negotiations were proceeding favorably. Now we are asked to be patient once again, but have been given no intimation as to how much longer the wait will be. If it takes as long for the State Department to conclude the negotiations with all of our allies as it has to conclude the negotiations with a single one of them, every American man of military age in this country, whether he be married or single, whether he has dependents or not, will be in the trenches months before we can stretch forth our hands and drag a single alien into the firing line.

I want to support the administration in their every effort, but I can not do it in this particular instance. One of our greatest problems at this time is to so conduct the affairs of the war as to make it popular with the rank and file of the country. The exemption of aliens has done more than any one other thing to make it unpopular. Let us remedy this at once. Let us pass this legislation and show to the people of this great land that we believe as they do and that this is a time when every man must do his part, regardless of his birth, regardless of his nationality, regardless of anything else except that his country and our country are fighting for the same purpose. These aliens have come to the United States, and to all intents and purposes they are a part of us. They have enjoyed the benefits of the American standard of wages, they have enjoyed the privileges of our splendid system of education and of our high standard of living in every respect. To me it is abominable that, having shared our blessings, they should not likewise be called upon in this crisis to share some of our responsibilities. We have put them on the same plane, so far as everything else in this country is concerned. Let us put them on the same plane, therefore, when it comes to fighting for our very existence, which, after all, is their existence. And, Mr. Speaker, if they refuse to do this, if they claim exemption through treaty rights with their mother countries, let us deny to them forever the right of obtaining citizenship in America, and let us, if possible, force them to go back where they came from and help to fight the battles there—make them do their part somewhere, whether it be in the land they were so anxious to come to or in the land they were so anxious to leave. This is no time for slackers of any kind.

Mr. GRAHAM of Pennsylvana. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Pennsylvania is recognized for five minutes.

Mr. GRAHAM of Pennsylvania. Mr. Chairman, I will only occupy a moment or two, but I would like to have the attention of the chairman of the committee and the members of the committee who are present to a suggestion that I would like to make with reference to the language of this bill.

I feel sure that the great majority of the Members of this Congress are heartily in accord with the purpose of this bill, while there are many of us who will hesitate to vote for it because, in our judgment, it comes in conflict with a treaty stipulation. But I wish to pass from that and ask your attention to the language which you have used in this bill.

I listened with attention to the remarks about what constituted a proper definition of the word "eligible," and it was asserted that a man admitted to this country was eligible to citizenship; that Japanese and Chinese were not, but other nationalities were. That is what "eligible" meant as used in this bill. I am sorry to say that I differ absolutely and totally from that construction and use of the word. A man who is eligible to the office of mayor, for instance, must have resided in a district for so many years. He must have been a citizen, and that constitutes his eligibility. When a man applies to a court and asks for his naturalization paper the judge says to him, "Are you legally eligible?" The judge asks the question. He must proceed then to show legal fitness to be declared a citizen. What are the steps of legal fitness? First, he must have come to this country; second, he must have resided here for two years; third, he must have declared his intention to become a citizen; and, fourth, he must have made application for naturalization papers. When all of these things are done, then, and not until then, is the man eligible to be a citizen.

Now, I want to read this language. I quote from the first paragraph of the bill:

That any alien eligible by existing law to become a naturalized citizen of the United States—

By the use of that language you limit the application and operation of this bill to persons who are ripe—that is the word—for citizenship. In other words, they must be eligible to be elected. All the conditions precedent as a qualification must have been complied with, and then, and not until then, are they eligible for citizenship.

Now, the next sentence puts a limitation upon that proposition—

and who but for his alienage would be subject to the selective draft.

Who is subject to the selective draft? A man that has declared his intention to become a citizen is subject to the selective draft. Hence this bill would be utterly inoperative as to every alien in the United States unless he was eligible in the full legal sense to be a citizen or, in the limited application of it, that he was subject to the selective draft.

Mr. MADDEN. In other words, he would have to be between 21 and 31 years of age and be eligible in all other respects?

Mr. GRAHAM of Pennsylvania. Absolutely. [Applause.]

Mr. BURNETT. Mr. Chairman, I think perhaps we can make an agreement as to this bill going over until next Wednesday. I think there is no question about our having the right of way on that day. However, we do not want to have any trouble about that question, and if we can have that matter settled now so that by unanimous consent it is understood that we have the right of way next Wednesday, I am willing to make a motion to rise at this time. I would like to know whether there will be any objection or not.

Mr. JOHNSON of Washington. Mr. Chairman, at the proper time I shall want to move to recommit.

Mr. BURNETT. Oh, no; this would not cut that off at all.

Mr. FLOOD. I understand from the gentleman's request that you are waiving no rights to continue to offer amendments or substitutes, or whatever you please. There will be no question raised as to whether or not the committee has next Calendar Wednesday?

Mr. STAFFORD. I understand the gentleman's motion to rise at the present time is predicated upon a gentleman's agreement that no one will raise the question on next Wednesday that the Committee on Immigration and Naturalization is not entitled to another day?

Mr. BURNETT. Exactly; and that the bill will be right where it is now as regards status.

Now, Mr. Chairman, I merely called attention to that in order to see whether there was going to be any objection. I now move that the committee rise, with that understanding.

Mr. GORDON. Mr. Chairman, I ask unanimous consent to extend my remarks.

The CHAIRMAN. The gentleman from Ohio asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. LONERGAN. Mr. Chairman, I make a similar request.

The CHAIRMAN. Is there objectiton to the gentleman's request?

There was no objection.

Mr. WINGO. Mr. Chairman, I wish to revise and extend my remarks.

The CHAIRMAN. The gentleman from Arkansas asks unanimous consent to revise and extend his remarks. Is there objection?

There was no objection.

Mr. TAGUE. Mr. Chairman, I make the same request.

The CHAIRMAN. The gentleman from Massachusetts makes the same request. Is there objection?

There was no objection.

The CHAIRMAN. The gentleman from Alabama [Mr. BURNETT] moves that the committee do now rise. The question is on agreeing to that motion.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. RUSSELL, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 5667) to provide for the deportation of certain aliens, and for other purposes, and had come to no resolution thereon.

Mr. BURNETT. Mr. Speaker, while the House was in committee the question as to the priority of this committee, the right of way of this committee next Wednesday, was informally discussed and referred to. It was understood that when we went into the House, in order to obviate any question—I think there should be none on that matter—it was agreed that this committee have the right of way next Wednesday. I ask now for a ratification of that agreement in the House. I ask unanimous consent that the agreement be made.

The SPEAKER. The Chair will state, without putting that question, that it would unquestionably be in accordance with the rule that the gentleman's committee should have next Wednesday. Any gentleman who wants to appeal from that decision can do it then.

Mr. BURNETT. All right. Then I will withdraw that request.

Mr. MONDELL. I suggest to the gentleman from Alabama that he withdraw his request.

Mr. BURNETT. I do withdraw that request.

ENROLLED BILLS SIGNED.

The SPEAKER announced his signature to enrolled bills of the following titles:

S. 1418. An act to authorize the President of the United States to appoint Harry Graham captain of Infantry; and

S. 3006. An act to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Dominican Republic, and for other purposes.

EXTENSION OF REMARKS.

Mr. JOHNSON of Washington. Mr. Speaker, I ask unanimous consent to extend my remarks on the bill.

Mr. LANGLEY. Mr. Speaker, I make the same request.

The SPEAKER. The gentleman from Washington [Mr. JOHNSON] and the gentleman from Kentucky [Mr. LANGLEY] ask unanimous consent to extend their remarks in the RECORD. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. BAKER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 20 minutes p. m.) the House adjourned until to-morrow, Thursday, February 7, 1918, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting a supplemental estimate of appropriation required by the War Department to increase the salary of the chief clerk, Office of Chief of Staff, from the present rate of $2,250 per annum to $2,750 per annum for the six months ending June 30, 1918 (H. Doc. No. 916); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting a supplemental estimate of appropriation required by the War Department to increase the salary of the chief clerk, Office of Chief of Staff, from the present rate of $2,250 per annum to $2,750 per annum for the fiscal year 1919 (H. Doc. No. 917); to the Committee on Military Affairs and ordered to be printed.

3. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of waterway between Port Townsend Bay and Oak Bay, in Jefferson County, Wash., with a view to increased width and depth (H. Doc. No. 918); to the Committee on Rivers and Harbors and ordered to be printed.

4. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of intracoastal waterway from Calcasieu River, La., to Sabine River, Tex. and La., with a view to securing such width and depth as will meet the demands of commerce (H. Doc. No. 919); to the Committee on Rivers and Harbors and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. ASHBROOK, from the Committee on Invalid Pensions, to which was referred the bill (H. R. 9612) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, reported the same without amendment, accompanied by a report (No. 286), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 7389) granting a pension to Hiram Dillon, and the same was referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. SABATH: A bill (H. R. 9610) providing admission to members of Army, Navy, or Marine Corps to citizenship of the United States; to the Committee on Foreign Affairs.

By Mr. JOHNSON of Washington: A bill (H. R. 9611) authorizing the Cowlitz Tribe of Indians residing in the State of Washington, to submit claims to the Court of Claims; to the Committee on Indian Affairs.

By Mr. KEATING: A bill (H. R. 9613) amending section 12, Federal farm-loan act, approved July 17, 1916; to the Committee on Banking and Currency.

By Mr. HULL of Tennessee: A bill (H. R. 9614) providing that certain National Guard officers in Federal service shall be

allowed the equivalent of three months' intensive training before discharge or dismissal on finding of efficiency boards; to the Committee on Military Affairs.

By Mr. SIMS: A bill (H. R. 9615) to provide for the operation of transportation systems while under Federal control, for the just compensation of their owners, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. SCHALL: A bill (H. R. 9616) to provide for refund or abatement under certain conditions of penalty taxes imposed by section 2 of the act of October 3, 1913, known as the income-tax act; to the Committee on Ways and Means.

By Mr. KEATING: A resolution (H. Res. 244) asking for information from the Secretary of Labor; to the Committee on Foreign Affairs.

By Mr. SABATH: A joint resolution (H. J. Res. 236) authorizing the readmission to the United States of lawfully resident aliens applying therefor after having been enlisted or conscripted for the military service of the United States, or who have enlisted and joined the Czecho-Slovak or Polish Army waging war against any of the central powers or one of the nations cobelligerents of the United States; to the Committee on Foreign Affairs.

By Mr. AUSTIN: A joint resolution (H. J. Res. 237) authorizing and directing the discharge from the United States Army camps of drafted men upon their own application supported by proof that they have dependents; to the Committee on Military Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 9612) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war; committed to the Committee of the Whole House.

By Mr. AUSTIN: A bill (H. R. 9617) granting an increase of pension to Judge B. Cecil; to the Committee on Invalid Pensions.

By Mr. BOWERS: A bill (H. R. 9618) granting an increase of pension to Albert Teets; to the Committee on Invalid Pensions.

By Mr. GOULD: A bill (H. R. 9619) granting an increase of pension to Henry C. Carr; to the Committee on Invalid Pensions.

By Mr. HARRISON of Mississippi: A bill (H. R. 9620) to carry into effect findings of the Court of Claims in case of Emily E. Bishop; to the Committee on War Claims.

By Mr. LANGLEY: A bill (H. R. 9621) granting an increase of pension to Henry G. Gardner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9622) granting a pension to Isaac Daniel Gibson; to the Committee on Pensions.

By Mr. MOON: A bill (H. R. 9623) granting an increase of pension to Erastus A. Kelly; to the Committee on Invalid Pensions.

By Mr. PURNELL: A bill (H. R. 9624) granting an increase of pension to Lancetta Byram; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9625) granting an increase of pension to Samuel L. Thompson; to the Committee on Invalid Pensions.

By Mr. SCHALL: A bill (H. R. 9626) granting a pension to Wilmot Stevens; to the Committee on Pensions.

By Mr. SHOUSE: A bill (H. R. 9627) granting an increase of pension to Alonson Walker; to the Committee on Invalid Pensions.

By Mr. SNOOK: A bill (H. R. 9628) for the relief of the estate of John H. Piatt, deceased; to the Committee on Claims.

Also, a bill (H. R. 9629) granting an increase of pension to Jacob Shinnebarger; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9630) granting an increase of pension to David E. Tussing; to the Committee on Invalid Pensions.

By Mr. VESTAL: A bill (H. R. 9631) granting a pension to Roberta R. Havelick; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9632) granting an increase of pension to John P. Rounds; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9633) granting an increase of pension to Levi Welch; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9634) granting an increase of pension to Nathan N. Spence; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9635) granting an increase of pension to John F. Thompson; to the Committee on Invalid Pensions.

By Mr. WELTY: A bill (H. R. 9636) granting an increase of pension to Isaac F. Allread; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9637) granting an increase of pension to Henry C. Jones; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9638) granting a pension to Alva C. Foster; to the Committee on Pensions.

Also, a bill (H. R. 9639) granting an increase of pension to Francis M. Wall; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9640) granting an increase of pension to William C. Wagoner; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. FULLER of Illinois: Memorial of the City Council of Chicago, for maintenance of the pneumatic-tube mail service; also a memorial of the Federal Employees' Union, No. 2, opposing the Postmaster General's recommendation against affiliating with labor organizations; to the Committee on the Post Office and Post Roads.

Also, memorial of the Farmers' Educational and Cooperative Union of America, opposing all measures for universal military training; to the Committee on Military Affairs.

Also, memorial of the Haverhill (Mass.) Chamber of Commerce for the repeal of the postal provisions of the war-revenue act; to the Committee on Ways and Means.

By Mr. HARRISON of Mississippi: Resolution of the Mississippi Annual Conference of the Methodist Episcopal Church South, urging legislation that will give to the Choctaw Indians of that State their interest in the tribal funds and property of the Choctaw Nation; to the Committee on Indian Affairs.

Also, memorial of citizens of Indianola and Sunflower County, Miss., declaring their loyalty and confidence in the administration and deploring the recent criticisms of the conduct of the war; to the Committee on Military Affairs.

By Mr. KELLY of Pennsylvania: Petition of citizens of Pittsburgh, praying for the passage of a constitutional amendment forbidding polygamy; to the Committee on the Judiciary.

By Mr. LINTHICUM: Petition of W. S. Childs, Baltimore, Md., opposing putting a freight yard or track opposite the Sibley Hospital on North Capitol Street, Washington, D. C.; to the Committee on the District of Columbia.

Also, memorial of the legislative board of the Brotherhood of Railroad Trainmen, State of Maryland, favoring strengthening the employers' liability law and opposing House bill 8172; to the Committee on Interstate and Foreign Commerce.

Also, petition of Albert H. Beachley and Emory F. Stoltzemayer, formerly of Frederick County, Md., urging increased compensation for Federal employees; also a memorial of the Federal Employees' Union, No. 21, Baltimore, Md., opposing the Borland amendment and urging increase of salaries; to the Committee on Appropriations.

By Mr. MADDEN: Resolutions of a mass meeting of Magyars held in Chicago, Ill., expressing approval of the President's war-aims message, and asserting the loyalty of American citizens of Magyar blood, and of those Magyars not yet citizens; to the Committee on the Judiciary.

By Mr. MOON: Papers to accompany a bill for the relief of Erastus A. Kelly; to the Committee on Invalid Pensions.

By Mr. RAKER: Petition of Mrs. Emily M. Sherman, secretary Woman's City Club, Long Beach, Cal., urging repeal of amendment to revenue law as it relates to increase in postage; to the Committee on Ways and Means.

Also, resolution adopted by Chamber of Commerce, San Jose, Cal., in re extreme penalty provided for acts of treason to be enforced upon aliens who commit them; to the Committee on the Judiciary.

Also, petition of Mrs. Harriet W. Myers, chairman, and Mrs. F. T. Bicknell, chairman, both of Los Angeles, Cal., indorsing the migratory-bird treaty act; to the Committee on Foreign Affairs.

Also, petition of Roy C. Barmore, R. F. D. No. 1, Newcastle, Cal., in re increased compensation for rural mail carriers; to the Committee on the Post Office and Post Roads.

By Mr. SIEGEL: Resolutions of the Republican Club of the City of New York, favoring a bill for universal military training; to the Committee on Military Affairs.

Also, resolutions of the Republican Club of the Nineteenth Aldermanic District of New York City, indorsing H. R. 1654 and S. 709; to the Committee on the Post Office and Post Roads.

By Mr. SNYDER: Petition of residents of Dolgeville, N. Y., praying for the enactment of an immediate war emergency prohibition bill; to the Committee on the Judiciary.

Also, petition of residents of Rome and Vernon, N. Y., for relief in the matter of help for farm workers; to the Committee on Military Affairs.

By Mr. TILSON: Petition of Lithuanian citizens of New Haven, Conn., against a union with Poland, etc.; to the Committee on Foreign Affairs.

SENATE.

THURSDAY, *February 7, 1918.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we bless Thee for the marvelous provision that Thou hast made for us as a free people, for the boundless wealth of our fields and forests, for the mountains and widespreading plains, for all these resources at our command. Now, as we come to test their power for the spread of the doctrines of truth and liberty we know that all must prove ineffective unless the people do justly, love mercy, and walk humbly with their God. So we turn to Thee for the deeper inspiration that we may be enabled to transmute the physical forces that Thou hast put at our command into spiritual powers to win the victory for truth and righteousness. We ask Thy guidance, for Christ's sake. Amen.

The Journal of yesterday's proceedings was read and approved.

HOUSE BILL REFERRED.

H. R. 5489. An act to authorize the Secretary of the Interior to exchange for lands in private ownership lands formerly embraced in the grant to the Oregon & California Railroad Co. was read twice by its title and referred to the Committee on Public Lands.

ALLOWANCES TO SOLDIERS' FAMILIES (S. DOC. NO. 171).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, in response to a resolution of the 5th instant, certain information relative to payments of allowances to the families of soldiers, which was referred to the Committee on Military Affairs and ordered to be printed.

DISPOSITION OF USELESS PAPERS.

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Secretary of Commerce, transmitting, pursuant to law, lists and schedules of useless papers in the Department of Commerce which have no historic value, and requesting action looking to their disposition. The communication and accompanying papers will be referred to the Joint Select Committee on the Disposition of Useless Papers in the Executive Departments, and the Chair appoints the Senator from Maryland [Mr. FRANCE] and the Senator from New Hampshire [Mr. HOLLIS] the committee on the part of the Senate. The Secretary will notify the House thereof.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice President:

S. 1418. An act to authorize the President of the United States to appoint Harry Graham captain of Infantry;

S. 3006. An act to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Dominican Republic, and for other purposes; and

S. 3081. An act to extend the time for the completion of the municipal bridge approaches, and extensions or additions thereto, by the city of St. Louis, within the States of Illinois and Missouri.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT. The Chair presents certain resolutions passed by the Grand Army of the Republic, which will be inserted in the RECORD and referred to the appropriate committees.

Resolutions were referred to the Committee on Military Affairs and ordered to be printed in the RECORD, as follows:

GRAND ARMY OF THE REPUBLIC,
Indianapolis, Ind., February 4, 1918.

To the honorable the PRESIDENT OF THE SENATE,
Washington, D. C.

SIR: Inclosed we hand you copies of resolutions adopted by the Fifty-first National Encampment of the Grand Army of the Republic at its last annual session, all of which ask for action by your honorable body on the matters presented therein.

It is our hope that the Senate may take favorable action on all of them.

Respectfully,

ORLANDO A. SOMERS, *Commander in Chief.*
ROBERT W. MCBRIDE, *Adjutant General.*

—

Resolved, That the National Encampment, Grand Army of the Republic, respectfully and most earnestly requests the Congress of the United States for an enactment under which aliens who, as members of the American Army and Navy, serve in any war shall, because of that service, become citizens, with all that the term implies, of the United States.

Resolved, That we urge upon Congress the enactment of such legislation as will authorize the return to the United States for final rest of the remains of all United States soldiers and sailors who die abroad, that they may rest beneath the flag for which they gave their lives and not under a foreign flag.

Resolutions were referred to the Committee on Pensions and ordered to be printed in the RECORD, as follows:

Whereas the soldiers and sailors of the Civil War have been receiving their pensions from the Government in quarterly payments; and

Whereas this is to them a very great inconvenience, for the reason that they are in so very many cases compelled to ask credit, and because of that fact are therefore compelled so many times to pay higher prices than if they could pay cash for their necessities; and

Whereas all departments of our Government are paid monthly: Be it

Resolved, That we ask Congress to pass a bill that will enable these worthy pensioners of our Government to receive their pensions in monthly payments instead of quarterly, as heretofore, and by this means enable them to do so much better and at the same time avoid the unpleasant necessity of asking credit until the quarterly payment becomes due.

—

Whereas the Sixty-fourth Congress having failed to act on the bill in aid of our blind comrades: Therefore be it

Resolved, That we reaffirm the action of the Forty-ninth National Encampment of the Grand Army of the Republic and direct the incoming commander in chief to have the same measure introduced at the regular session of Congress early in December, and use all honorable efforts to have the respective Pension Committees of the Senate and House report favorably on the same, that our needy and worthy comrades may have relief that will enable them to pass their few remaining years with some degree of comfort; and be it further

Resolved, That we solicit the aid of our allied patriotic associations in support of this measure, and the incoming adjutant general is hereby directed to send a copy of this resolution, together with the action of the Forty-ninth National Encampment, as printed on page 122 of the journal, to the presidents of the Woman's Relief Corps, Ladies of the Grand Army of the Republic, Sons of Veterans, and Sons of Veterans' Auxiliary, and the commander in chief of the Sons of Veterans, asking them to write the various Senators and Representatives to vote in favor of the bill to aid blind veterans.

Mr. LODGE presented resolutions adopted by the Spanish-American War Nurses' Association, favoring the enactment of legislation granting the rank of second lieutenant to nurses serving during the war, which were referred to the Committee on Military Affairs.

Mr. THOMPSON presented a petition of the War Council of Defense, of Decatur County, Kans., praying for the enactment of legislation to prohibit local dealers and storekeepers from making excessive charges of purchases made by the soldiers at the Army camps of the country, which was referred to the Committee on Military Affairs.

Mr. FLETCHER. I present a communication in the nature of a petition. As it is very brief and similar to numerous others I have received, I ask that it be printed in the RECORD.

There being no objection, the communication was ordered to be printed in the RECORD, as follows:

NEW SMYRNA, FLA., *January 31, 1918.*

Senator FLETCHER,
Washington, D. C.:

I am writing to ask you to do all in your power to secure the passage of the Federal suffrage amendment.

The women of Florida, the women who are doing all in their power to aid the Government—in the Red Cross, food conservation, thrift stamps, liberty loan, etc.—they are the women that ask you, as their Senator, to support the suffrage amendment.

Hoping this will receive your earnest attention and that you will have the interest of the women of Florida at heart, that we may be proud of the stand our Senator takes in this great question.

Please have this read into the CONGRESSIONAL RECORD.

With greatest hope for the passage of the Federal suffrage amendment.

Yours, truly, HANNAH DETWILER BONNET.

Mr. PHELAN. I present resolutions adopted by the Chamber of Commerce of Los Angeles, Cal., which I ask may be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

Whereas a great leader in the development of the West has been lost to the country by the recent death of Senator FRANCIS G. NEWLANDS, whose years of devotion to the cause of national reclamation and river regulation contributed so largely and were so indispensable to the success of the campaign for the United States reclamation act, passed in June, 1902, and the Newlands river regulation amendment, passed as section 18 of the rivers and harbors bill in August, 1917: Now, therefore, be it

Resolved, That the Los Angeles Chamber of Commerce hereby expresses its deep appreciation of the public services rendered by the late FRANCIS G. NEWLANDS in his long career as a Member of the House of Representatives and the Senate of the United States, and its profound regret that his death should have brought that career to an end; and be it further

Resolved, That a copy of this resolution be spread upon the records of this chamber and a copy thereof sent to the family of the deceased and to the President of the Senate.

I hereby certify that the above is a true and correct copy of resolution adopted by the board of directors of the Los Angeles Chamber of Commerce at their regular meeting on Wednesday, January 2, 1918.

OSCAR C. MUELLER,
Vice President.

Attest:

FRANK WIGGINS, *Secretary.*

Mr. McNARY. I have received several petitions signed by a large number of citizens of Oregon, respectfully petitioning Congress, through the proper authorities, to request the Government of France to prohibit the sale of all forms of intoxicating liquors, including wine and beer, to American soldiers and sailors. I move that the petition be referred to the Committee on Military Affairs.

The motion was agreed to.

REPORTS OF COMMITTEES.

Mr. SHAFROTH, from the Committee on Public Lands, to which was referred the bill (S. 2552) to provide for leave of absence for homestead entrymen in one or two periods, and for longer times, reported it with an amendment and submitted a report (No. 248) thereon.

Mr. MYERS, from the Committee on Public Lands, to which were referred the following bills, reported them without amendment and submitted reports thereon:

A bill (S. 947) validating certain homestead entries (Rept. No. 250); and

A bill (S. 951) to provide for the sinking of artesian wells, and for other purposes (Rept. No. 251).

He also, from the same committee, to which was referred the bill (S. 41) to authorize the sale of certain lands at or near Yellowstone, Mont., for hotel purposes, reported it with amendments and submitted a report (No. 249) thereon.

RAILROAD CONTROL.

Mr. SMITH of South Carolina. Mr. President, on behalf of the Committee on Interstate Commerce, I report back favorably with amendments the bill (S. 3752) to provide for the operation of transportation systems while under Federal control, for the just compensation of their owners, and for other purposes, and I submit a report (No. 246) thereon.

I should like to state, Mr. President, that not later than Monday or on Monday I shall endeavor to have this bill taken up, looking to its final disposition. All Senators realize the necessity for as expeditious action on the measure as may be. I hope they will acquaint themselves in the meantime with the provisions of the bill, so that we may begin on Monday and continue its consideration until it is disposed of.

Mr. CUMMINS. Mr. President, in connection with the report which has been made by the chairman of the Committee on Interstate Commerce, I desire to give notice that not later than Monday next I will, with the consent of the Senate, present a minority report or minority views. To avoid all misunderstanding I think I ought to say also that the minority report, so far as I am concerned, will not be based upon opposition to the possession or operation of the transportation systems of the country. Indeed, I believe that the step taken recently by the President ought to have been taken long ago. The objections which I shall offer to the bill as reported relate to other things than the policy of possession and operation of our systems of transportation by the Government; they relate to compensation largely, and other things will be added.

For myself I want it to be understood that I shall facilitate the disposition of the bill in every way I can consistent with a fair discussion of the various questions which will arise. I agree with the Senator from South Carolina that it is a subject that ought to be not only carefully considered but speedily disposed of, for we are now in a state of great uncertainty and some confusion, and it will continue until this bill is passed.

Mr. SMITH of Michigan. May I ask the Senator from South Carolina a question? The Senator from Iowa says that he is in accord with the bill in so far as taking possession of the railroads is concerned. That leads me to inquire whether there was a unanimous agreement in the committee as to the time when the roads shall be returned to their owners?

Mr. SMITH of South Carolina. No; there was not. There was a majority of the committee, quite a large majority, favorable to the length of time indicated in the bill.

Mr. GALLINGER. A year and a half?

Mr. SMITH of South Carolina. A year and a half—18 months.

The VICE PRESIDENT. The bill will be placed on the calendar.

Mr. SMITH of South Carolina. I ask that the report accompanying the bill just reported by me may be printed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The report is as follows:

"Mr. SMITH of South Carolina, from the Committee on Interstate Commerce, submitted the following report:

"The Committee on Interstate Commerce, to whom was referred the bill (S. 3752) to provide for the operation of transportation systems while under Federal control, for the just compensation of their owners, and for other purposes, have considered the same and report thereon with the recommendation that the bill do pass without amendment.

"On August 29, 1916, Congress enacted the following:

"The President in time of war is empowered through the Secretary of War to take possession and assume control of any system or systems of transportation or any part thereof, and to utilize the same to the exclusion, as far as may be necessary, of all other traffic thereon for the transfer or transportation of troops, war material, and equipment, or for such other purposes connected with the emergency as may be needful or desirable.

"Under this statute and by virtue of all other power enabling him, the President, on December 28, 1917, took possession and control of the railroad systems of continental United States and the owned or controlled systems of coastwise or inland water transportation. He appointed Hon. William G. McAdoo Director General of Railroads.

"Since December 28 he has been operating those systems of transportation for war and national purposes. There was no provision in the act of August 29, 1916, for determining the just compensation due as a constitutional right to the owners of the properties thus taken over for public purposes. It therefore became necessary to provide the proper legislation to meet the two very important needs; first, the proper judicial machinery for determining the amount of just compensation thus accruing; secondly, to give to the President the authority to offer the owners of the property thus taken just and reasonable terms for compensation, which, if accepted, will determine finally and completely all rights as between the Government and the owners, thus avoiding the delays incident to litigation and giving strength and stability to the security market and rendering assistance to our future war financing.

"The President, in his proclamation, instructed the Director General to—

enter upon negotiations with the several companies looking to an agreement for just and reasonable compensation for the possession, use, and control of their respective properties on the basis of an annual guaranteed compensation above accruing depreciation and the maintenance of their properties, equivalent, as nearly as may be, to the average of the net railway operating income thereof for the three year period ending June 30, 1917.

"Your committee were of opinion that this is the time for war emergency legislation and not the time to settle the many controversial and vexed questions concerning our future transportation policy.

"With these preliminary observations your committee submits a brief explanation of the various sections of the bill:

"SECTION 1.

"Section 1 authorizes the President to agree with the carriers whose property has been taken over that during the period of Federal control each carrier may receive as just compensation—in lieu of all rights arising under due process of law—an annual sum not exceeding its average annual railway operating income for the three years ended June 30, 1917, plus a return at a rate to be fixed by the President upon the cost of additional facilities made during the last six months of 1917, the amount of such net earnings and the cost of such additional facilities to be determined by the Interstate Commerce Commission and certified to the President. This is in substance the President's suggestion. The certification of the commission is to be taken as conclusvie for the purpose of such agreement. Any operating income in excess of such standard return is to be paid into the Treasury of the United States and placed in the revolving fund provided by section 6 of this act.

"About 75 great operating railroads do over 90 per cent of the railroad business. It is believed by your committee that most of these great railroad carriers will accept these terms as a just and fair measure of their constitutional rights. Section 1 further provides that ordinary taxes, National and State, shall, as now, be paid out of operating revenue; but war taxes accruing under the act of October 3, 1917, are to be paid by the companies out of their own funds, or charged against the standard return. In other words, the holders of railroad securities are by section 1 (like holders of other securities) to bear their own just portion of the war burden. Section 1 also requires that each agreement shall contain adequate and appropriate provisions for the maintenance and depreciation of the property and the creation of any reserves or reserve funds found necessary in connection therewith; so that the properties may at the end of Federal control be returned to the owners in a condition substantially equivalent to their condition when taken over by the Government; and that proper adjustments both in the standard return and in the terms of final settlement may be made. Thus even-handed justice will be worked out as between each company and the Federal Government.

"If the rights of all the railroads making returns to the Interstate Commerce Commission are fixed under the provisions

of this section, the Government will guarantee approximately $945,000,000 a year.

"Since the preparation of this summary, however, the committee has amended section 1 by inserting a provision authorizing a return, at such reasonable rate as the President may determine, upon the cost of additional transportation facilities made during the last six months of 1917. This addition, of perhaps ten to fifteen millions, is made in the interest of equality, it appearing that two hundred to two hundred and fifty millions of additional capital has during the last half of 1917 been put into transportation facilities by a comparatively few of the carriers taken under Federal control.

"There has, of course, been much discussion as to the fairness and justice of the proposed amount of the standard return. It should not be overlooked that the gist of the question is, What would these companies be likely to receive from the courts as just compensation? The amount of just compensation is not a legislative question—it is a judicial question. (Monongahela Navigation Co. *v.* U. S., 148 U. S., 312.) It follows, in the opinion of your committee, that much of the evidence and discussion concerning the so-called surplus is irrelevant. It is plainly in the public interest—and indeed a war need—that the President be authorized to offer to settle with the owners of these properties on a basis approximately equivalent to that which sound-thinking men would advise the owners they would be likely to receive by court decision. The rights of such owners must be tested by present conditions—not by some theory of capitalization never made operative under Federal or State law or generally followed by the courts.

"Questions of value are always difficult questions. It is highly probable, if not certain, if the whole question were remitted to the courts, they would take as the basis for determining just compensation the actual net earnings for a reasonable period. During the last three years new investment in the properties now under Federal control has been at the rate of approximately three hundred and seventy-five millions a year. The year ended June 30, 1915, was one of the poorest in recent railroad history. The other two years have been prosperous years. The average of the three years therefore reflects neither poverty nor riches. The purchasing power of the dollar accruing to the stockholder, as well as to the wage earner, has decreased. Dividends in industrial companies have largely increased. The rate of return upon Government bonds, both abroad and in the United States, has largely increased.

"The percentage of return upon the value of the railroad property taken under Federal control can not be accurately stated; for until the Federal valuation, now in process, is completed, no one knows the value of that property. The book value may be taken, for certain comparative purposes, as of some significance; it must not be regarded as accurate. The proposed standard return, figured upon the book value of all the companies, will give a return not far from 5.32 per cent. Comparing this return to that which accrues to the purchaser of Government bonds, it seems large; but Government bonds run for a period of 25 or 30 years. The proposed guaranty to the owners of railroad securities may run for only a few months. The Government is practically a tenant at will.

"After the most careful consideration your committee are of the opinion that the owners of these properties would not be unlikely to receive an award from a court at least equal to the proposed offer; that it is therefore the duty of Congress to authorize the President to make such offers as will prevent patriotic and fair-minded American citizens from resorting to litigations in time of war in order to determine their rights against their Government.

"The standard return thus provided for will, if accepted by the various operating companies, be disposed of substantially as hitherto; that is, for the payment of their fixed charges (and war taxes which remain a burden upon the standard return), for dividends, and if any balance remains, for so-called surplus. The fixed charges ordinarily fall into interest on bonds and other debt obligations, and leased line rentals, generally in the form of interest and dividends on outstanding bonds and stock of leased companies. These rentals are not, as is sometimes thought, properly a part of operating expenses. They are really disbursements for the use of capital; for it makes no practical difference whether the operating company is consolidated with the leased companies and pays interest and dividends upon its own bonds and stock issued in payment for the subsidiary companies' property, or whether it pays interest and dividends upon the stock and bonds of the leased companies. In either event, the disbursement is a disbursement on capital account and not on operating account.

"The foregoing makes it clear that the railroads accepting the suggested terms will be fully able to make all their usual disbursements to their security holders. In effect, this regular income is guaranteed by the Government to the security holders during the period of Federal control.

"The stabilizing, confidence-producing effect of such guaranty will, as your committee believe, be of great assistance in future war financing.

"The terms above indicated will probably be found just and fairly applicable to the security holders of most of the railroads of the country. But there are certain undeveloped and reorganizing roads whose operating income for three years will not fairly test their right to just compensation. Some special provision to meet the just demands of these companies seems requisite. Section 1, accordingly, provides in the last paragraph thereof that, when the President finds that the condition of nondividend paying carriers is because of nonoperation, receivership, or other undeveloped or abnormal condition such as to make the basis of earnings provided for the other carriers 'plainly inequitable,' as a fair measure of just compensation, then the President may make with such carrier such agreement as under the circumstances of the particular case he shall find just.

"SECTION 2.

"Section 2 provides in case the agreement provided for in section 1 is not made, the President is authorized to pay not exceeding 90 per cent of the estimated amount of just compensation.

"This, in the opinion of your committee, would tend to stabilize conditions for the security holders of the newer struggling companies, whose rights may not be easy of speedy ascertainment.

"Section 2 does not require the President to make any payment at all to such owners, thereby avoiding the danger of offering a premium to unreasonable and greedy litigants.

"SECTION 3.

"Section 3 provides easily available facilities safeguarding the constitutional rights of owners to have their just compensation determined by due process of law. It also furnishes another opportunity for settlement of cases which may not be satisfactorily disposed of by agreements in accordance with the standard return, or under the special power of section 1.

"Section 3 provides that the Interstate Commerce Commission shall, on the application of the President, or of any carrier, appoint boards of referees, the commission and its forces being made not ineligible as such referees. These referees are armed with the usual powers of judicial tribunals—to summon witnesses, require the production of books, etc., and may hold hearings in Washington and elsewhere, as convenience may serve. They may consolidate and classify cases. These boards are to give full hearings, consider all pertinent facts, and report their findings to the President in a form convenient and available for the making of such agreements as are authorized by section 1. The President and such company may then make an agreement for compensation not in excess of that reported by the referees. Failing such agreement, either the United States or the company may file a petition in the Court of Claims; and in the proceedings in this court such report is prima facie evidence of the amount of just compensation and of any facts reported.

"It is the confident opinion of your committee that section 3 not only effectually guards the constitutional rights of all owners but that the proceedings before the referees will be found so complete and satisfactory that few, if any, cases will ever reach the Court of Claims.

"SECTION 4.

"Section 4 provides that the agreed or ascertained just compensation may be increased during Federal control by an amount reckoned at a reasonable rate per centum to be fixed by the President upon the cost of additions made while the Government is in possession. Manifestly an increase in the property used requires a corresponding increase in the compensation for the use. No increase is allowed for additions paid for out of surplus during the period of Federal control. Whether a denial of any return upon surplus earnings invested in additional facilities will result in throwing an unnecessary burden of financing upon the Federal Government and in the accumulation of a dead surplus will require careful consideration by the Senate.

"SECTION 5.

"The main purpose of section 5 is to give stability to our financial conditions. From the standard return the railroad companies may without permission pay their regular dividends. Conceivably it may be desirable that some of the prosperous carriers should be permitted somewhat to increase their regular dividends; if so, the President's prior approval must be obtained. Nondividend payers or irregular dividend payers, whose standard or ascertained return warrants dividends, may

with the President's permission be put in the dividend-paying class at such rate as the President may determine.

"This section goes upon the theory that during the war the railroad-security holders ought to receive certain, regular, and moderate dividends; but that extra, unexpected dividends—a common source of speculation and manipulation—should not be permitted.

"SECTION 6.

"Section 6 is a very important section. It provides for a revolving fund to be made up from an initial appropriation of $500,000,000, together with any excess earnings of any of the carriers. This fund is to be available to the President for the purpose of paying the expenses of the Federal control, supplying any deficit in the just compensation accruing to any carrier, and to provide for rolling stock and terminals, to be used and accounted for as the President may direct, and to be disposed of as Congress may hereafter by law provide. This contemplates that engines, cars, and perhaps terminals will be purchased or constructed by and will belong to the United States. This rolling stock will be used wherever war and national needs demand—precisely as the Pullman and other private car lines are now used on the lines of the various carriers as the needs of industry or the demands of the seasons require. The ultimate disposition of this rolling stock must await post-war legislation. This section contemplates that such rolling stock, although owned by the United States, will be used on the lines of the various railroads and the use charged for upon the books of the companies, so that at the expiration of Federal control the bookkeeping of each railroad company will reflect, as hitherto, the traffic which has moved over each road and the cost of operation.

"The section further provides that the President may, on or in connection with the property of any carrier, make or order any company to make additions desirable either for war purposes or in the public interest. Doubtless it will be necessary in connection with Army camps and shipyards to make substantial extensions of railroad and other carrier property. Your committee believes that such additions and extensions should become and remain the property of the separate carriers; that there should be no confusion of title as to real estate, tracks, and other fixed property between any railroad company and the United States. As it is possible that some such additional facilities thus made to the property of various carriers will in times of peace be found worth less than the cost thereof, this section provides that claims for loss or damage accruing from such compelled investment shall be settled either by agreement between the carrier and the President, or, failing such agreement, shall be ascertained by due process of law, as provided in section 3.

"As some of the companies may not have the requisite funds to pay for such extensions and additions, the President is authorized from the revolving fund to advance all or any part of such cost, these advances to bear interest at rates and to be payable on such terms as the President may determine, so that the United States may ultimately be fully reimbursed for such advances.

"Section 6 also provides that the President may, from the revolving fund, expend such sums as he deems necessary or desirable for the utilization or operation of canals and for the purchase, construction, utilization, and operation of boats and other water carriages on the inland and coastwise waterways. It is believed by your committee that much relief may be afforded the rail carriers by a further development of the water carriers and of facilities on these natural water highways.

"SECTION 7.

"Section 7 provides for financing the maturities of carriers during the period of Federal control. It authorizes the President to purchase for the United States, at prices not exceeding par, any securities issued by the railroads, roads approved by him as consistent with the public interest. Such securities may be sold without loss to the Treasury whenever the President deems it desirable, the proceeds of such sale to go back into the revolving fund. The estimates of the maturities for the next four years are as follows:

1918	$182,606,528
1919	188,213,052
1920	186,526,253
1921	440,905,528

"SECTION 8.

"Section 8 provides in general terms that the President may execute his powers with relation to the Federal control through such agencies as he may determine and fix the reasonable compensation for services rendered in connection therewith, using also the personnel and facilities of the Interstate Commerce Commission and all other governmental bodies.

"SECTION 9.

"Section 9 is simply to the effect that nothing contained in this act shall be deemed to restrict the powers heretofore given to the President to take possession and assume control of any and all systems of transportation. It also provides that this act shall apply to any carriers to which Federal control may be hereafter extended.

"SECTION 10.

"Section 10 provides that so far as not inconsistent with Federal control, each of the carriers shall remain subject to all laws and liabilities whether arising under statutes or at common law. It also provides that the President may, whenever in his opinion the public interest so requires, initiate rates by filing the same with the Interstate Commerce Commission, such rates to be fair, reasonable, and just, and that upon complaint the rates thus initiated by him may be reviewed by the Interstate Commerce Commission. In such review the Interstate Commerce Commission may consider all the facts and circumstances existing at the time of the making of the rate. After full hearing the commission may make such findings and orders as are authorized by the act to regulate commerce as amended.

"Your committee were of opinion that the commercial organizations of the country should be disturbed as little as the emergency would allow, and that every safeguard would be thrown around the great productive activities of the country, everything possible to inspire confidence in their being protected from unnecessary embarrassment.

"SECTION 11.

"Section 11 provides penalties for violation of this act or orders of the President made thereunder.

"SECTION 12.

"Section 12 has been inserted at the request of the Department of Justice and is intended to provide for continuing the life and status quo of cases pending under the antitrust and interstate commerce acts.

"It requires no comment.

"SECTION 13.

"Section 13 provides that the Federal control shall continue not to exceed 18 months after the declaration of peace. It is possible that certain conditions may arise from Federal control which will need adjustment before the properties are returned to their owners, and a reasonable period should intervene in which these conditions may be met and adjusted. It may be that the nation will be unwilling to return to the conditions obtaining before the assumption of Federal control. Legislation may be demanded radically changing the relation of the Government to the railroads from that now existing in the interstate-commerce act as amended.

"These problems will require time for careful and deliberate consideration. Therefore your committee has suggested a period of 18 months, and they believe it will be found adequate for that purpose.

"In section 13 there is also a provision to the effect that the President may, prior to July 1 next, relinquish control of such transportation systems as he may deem not needful or desirable, and may, thereafter, on agreement, relinquish all or any part of any system of transportation.

"Your committee also recommends that at any time after July 1, 1918, the President may agree with the owners of all or any part of any system of transportation when in the opinion of the President further Federal control of the same is unnecessary, to relinquish such control to the owners.

"The section also contains a general provision that the President may relinquish all railroads at any time when he shall deem such action needful or desirable.

"Your committee have adhered to the set purpose to limit this legislation to war-emergency purposes, and to avoid all contentions and controversial questions. We believe that the bill will accomplish these results. It follows closely the President's recommendations. It has in its main provisions and purpose received general approval and comparatively little criticism."

Mr. POINDEXTER. I desire to submit, from the Committee on Interstate Commerce, a disagreeing report upon Senate bill 3752 (S. Rept. No. 246, pt. 3), which I ask may be printed in the RECORD.

There being no objection, the views submitted by Mr. POINDEXTER were ordered to be printed in the RECORD, as follows:

"I can not agree to the report of the majority of the committee in two particulars:

"First, I disagree to the provision of the committee bill providing a certain date at which the railroads will be turned back to their private owners, without making any provision

whatever for removing the notorious abuses and inefficiencies of the present system of private competitive ownership and operation.

"Second. I disagree to the provision of the bill divesting the Interstate Commerce Commission of its existing powers of rate regulation, and transferring the primary rate regulation authority to the President, and creating in the commission appellate or supervisory power to set aside or modify rates fixed by the President.

"As to the first disagreement, I think the general consensus of well-informed and disinterested public opinion is that the present system by which the railroads are forbidden by law to coordinate or combine transportation facilities and resources and are compelled to operate as rival competitors for business under private ownership, with very limited governmental regulation is a failure. Out of it have grown scandals and abuses which have been set forth in sworn testimony given before subcommittees or agents of the Interstate Commerce Commission and committees of Congress and embodied in reports of these tribunals. It is a great mistake, in my judgment, for this committee to recommend, as it does in the majority report, that on a certain date the railroads should be restored to private owners without in any way changing the dangerous and unscientific conditions which existed up to the time the transportation systems were taken over by the President under authority given him by Congress.

"Everyone who has studied the question knows the practical difficulties in securing affirmative legislation affecting so great an interest as that of the railroads of this country, even when the legislation is needed to remove abuses which are perfectly obvious. To illustrate this, the Senate is familiar with the futile efforts which have been made in recent years to secure some reasonable governmental supervision and regulation of the stock and bond issues of these public-service corporations. The rate burdens which have been imposed upon the people on account of the inflation of railroad capitalization—vast issues of 'watered' stock, and the distribution of this stock, in many instances, as bonuses or rewards to promoters and bond buyers—have been equal almost to the direct taxes levied upon the people for the support of the Government. A bill to remedy this great evil passed the House of Representatives and got so far as to be favorably reported by the Interstate Commerce Committee of the Senate, and yet, although it has been pressed for several years since that time in succeeding Congresses, it has not been possible to get favorable action or even consideration of this essential measure. With that and similar experiences in mind, it is impossible to say when positive legislation may be enacted putting the transportation business of the country upon such a basis as that the railroads can be operated as one public system, with the public interest as the primary consideration, and with such governmental control or outright governmental ownership—if that should prove to be necessary as a last resort—as would insure the foregoing results. Until these problems are worked out and enacted into law there should not be a certain date fixed for the return of the railroads to private ownership and control and practically unrestricted private competitive operation.

"Under the system existing before the roads were taken over by the President the fundamental rule of rate making was not at all that which is contemplated by the interstate-commerce act, namely, a reasonable rate for the service rendered, but, according to the sworn testimony of railroad official rate makers, it was 'what the traffic would bear.' In other words, the governing principle was to take in rates all that could be taken without crippling or destroying the industry which produced the commodies of transportation. In practical application, of course, in view of variations of cost of production and of local conditions, the principle was not always worked out in practice.

"Under the old system, which is to be restored by this bill 18 months after the close of the war, the railroads, being operated with the view of making the greatest returns possible to the private owners of each particular road or system, and without any actual regard whatever to the larger public economies and public interests, instead of so arranging routes and shipments as to require the least transportation and to get commodities to their destination by the shortest and most direct line; in general, the opposite policy has prevailed, namely, to carry them by the longest possible route, with a consequent waste of public resources, but of private gain to railroad operators. The long haul has been favored over the short haul under the guise of meeting water transportation. Water transportation has been destroyed. Public interest would require the fostering and development, to meet the growing transportation needs of a growing country, of every natural water route. Through a system of so-called terminal rates, often put lower than a reasonable amount for the service rendered, and through difficulties placed by the railroads in the way of transfer and connection with the water route, this great national resource has perished as though struck by a deadly blight.

"To compensate the railroads for any reduction in rates, which it may have been necessary for them to temporarily make in order to destroy competing lines of water transportation, discriminatory higher rates have been charged to intermediate points and for the shorter haul—a much greater charge for a much less service—contrary to every fundamental principle of just compensation for service rendered. In this way the greater part of the country has been retarded in its development and subjected to an unjust tribute by the railroads. The consequence has been not only the paralysis of shipping and of the great industry of water transportation and the deprival of the people of the benefits of these great arteries of trade which they would have enjoyed if, instead of being discriminated against, they had been, in the public interest, nurtured and encouraged, but crowding and congestion in certain terminals has been the inevitable result, so that when the country was recently confronted by a great crisis its entire transportation system was paralyzed.

"I do not think that public opinion will tolerate a return to these conditions. It is obviously unscientific, from a public standpoint—and this question should be from every point treated with the public interest as a primary one—for several parallel competing lines between great producing centers to so struggle among themselves as rivals for business that while one, through superior terminal facilities or advantages of location, secures more business than it can adequately handle, another, not so advantageously situated, but equally capable of transportation of commodities, may not be utilized to more than one-third of its capacity. The interests of the public require that these lines should be regarded as a part of the transportation system of the country, and that business should be so distributed between them as to afford, on the whole, the cheapest and best service to the public. At the same time it is not possible, from a political standpoint, at least, to allow a consolidation of the railroads of the country under private ownership and control—not even with the inadequate and limited regulations heretofore interposed by the Federal and State Governments.

"Such a colossal power concentrated in private hands would lead to abuses that, if not remedied in any other way, probably would produce political revolution. It would be a most dangerous experiment, and outside of a few interested circles probably would not receive serious consideration. Yet it is equally agreed that the competitive system is a demonstrated failure. The only alternative is a more adequate and extensive Government control or operation in the interest of the people, with due regard at all times for vested private interests which the laws have allowed to be built up in these public-service agencies. Until this is done it is the height of unwisdom, in my judgment, to provide, as the committee bill proposes, to restore these properties at a certain date to the old conditions.

"Under private control and operation, with one system competing against another for business, those systems which have been able to secure powerful backing in the great financial centers have been able to restrict and curtail the development of other systems in other sections of the country whose principal potential business was in the transportation of similar commodities. In this way certain coal fields have been favored and promoted, while others which should have served great sections of the country have been held back from development by high or discriminatory rates. The consequence has been not only the loss of this business to adjacent railroad lines, but the killing of industry and development in the section which those lines should have served; and in the illustration mentioned, that of coal, it has been one great contributing cause of the scandalous coal famine this winter. I say 'scandalous' because the death of many of our people, the suffering of more, the checking of our industries at a time when they are most needed, the weakening of our efforts in the vital crisis of a war, due to inadequacy of fuel supply, in a country with such natural resources of coal and such transportation facilities as our own, is scandalous.

"Under the system, which it is proposed by the committee bill to restore 18 months after the close of the war, some railroads earned as high as 50 per cent upon their capitalization, inflated as it is; while other roads, which were equally necessary to the communities which they served, earned no profits at all; and yet our system of rate making has, so far, worked out no principle by which this inequality could be adjusted. Under Government operation, with profits and losses of all the railroads going ultimately into one account, such inequalities would adjust themselves. Under private ownership it is obvious that this inequality of returns is inequitable and unjust. It

may be possible to find some plan of rate making by which, even under private operation, but with a larger measure of governmental control and supervision, these discrepancies could be adjusted so that those engaged in the public business of transportation on the highways of the Nation, with efficient management, would receive more equitable relative returns. This inequality of return inevitably, of course, affects the quality of the service rendered, and as a result deprives certain sections of the country of public facilities with which they should be provided. Until a basic policy is worked out which would have the effect of cutting down excessive returns on certain lines and permitting adequate returns upon others, the day for the return of the roads to their private owners ought not to be fixed.

"This bill makes no provision for the prevention in the future of such wholesale looting of public transportation systems as were perpetrated in the cases of the Chicago & Alton, the Rock Island, the New York, New Haven & Hartford, the Pere Marquette, the Frisco, the Cincinnati, Hamilton & Dayton, and others, as disclosed by testimony on record as mentioned above. Probably no greater financial crimes or ruthless destruction of private property under the apparent permit of the law were ever perpetrated than in these and similar instances, possible under the old opportunities for stockjobbing and stock control by interested private operators, which this bill would restore. Families have been ruined by the thousand, untold misery and many deaths, with far-reaching consequences, both direct and indirect, of business depression and the suffering of whole communities have been produced by these unscrupulous enterprises. In my judgment, it would be a breach of legislative trust to provide for the restoration of these properties to the old conditions without legislation which would make such crimes of private railroad finance impossible.

"Perhaps $300,000,000 a year could be saved to the people of the country by doing away with the multiplication of officials and the cutting down of overlarge salaries if the roads were consolidated and operated as one transportation system. The maintenance of multiplied complete official organizations on numbers of competing lines serving the same area imposes a wholly unnecessary economic burden upon the people. No attempt, even, has been made to provide for the elimination of this waste. The Post Office Department gives a very good example of excellent and efficient public service which can be obtained from men of ability and integrity for salaries far less than those paid by private transportation companies for services of the same grade and quality under private management. It is difficult to estimate the saving which would accrue in this direct way by cutting out the useless extravagance of salary, multiplication of officials, the superfluous elegance of equipment and material used in catering to the luxurious tastes of a portion of the traveling public by rival competitors for their business but which adds nothing whatever either to the comfort or efficiency of the service. All of this could be effected under a system of permanent Government control. Until these questions are studied and worked out on a permanent basis no law should be passed fixing positively a date for the return to private operation.

"The revenue received by the railroads, and which is provided in this bill as a measure of their compensation temporarily pending the war and until the date for the return of the roads fixed by the bill, is as to many of the roads entirely too high, while as to some of them perhaps it would not be adequate. In another form this has been mentioned above. It is extremely doubtful whether this condition could be readjusted in the midst of the present war, with the financial and transportation crisis with which the country is confronted, with necessity of maintaining the credit of existing securities; and for that very reason no definite time should be fixed for the reestablishment of the system under which these revenues were permitted. On the contrary, an entire readjustment of the whole basis and fabric of the control and operation of the transportation of the country, including rates and revenues, should be established; and no date at all for a return of the old unjust and intolerable system should be fixed. It is impossible, perhaps, in the midst of the crisis of the war to adequately deal with many of the problems mentioned above, and for that very reason no time limit should be fixed for the return of the roads to their private owners. The status quo should be preserved, whether for 18 months after the close of the war or longer, until these problems have been solved and enacted into fundamental law.

"As to the second point of disagreement, it is necessary to say only a few words. The bill of the committee vests the primary governmental making of rates in the President and undertakes to give to a commission composed of members appointed by the President supervisory control over the President in this matter of rate making. Of course the arrangement is illogical and unworkable. It is a little too much to expect of human nature that officials who owe their official existence to the President will be able, however much they may try, to exercise any real independent judgment or action in setting aside the President's orders in the matter of rates. The fact of the case is that the established rate-making bodies—the Interstate Commerce Commission and the State commissions—should be left just as they are at present, empowered to make orders respecting rates, which orders should have the same force and effect as at present, with the proviso that where the President, acting through the Director General, may deem it necessary, in the exercise of the war powers under which he has taken control of the roads, to modify or change a rate he may do so. In this way the Director General and the President will be relieved of the overwhelming duty of fixing all rates which will devolve upon them under the bill as reported by the majority of the committee, and for which neither the President nor the Director General have any adequate facilities or equipment or training or experience whatever. On the other hand, the President and the Director General would have the necessary knowledge and equipment and official facilities to enable them in certain special, obvious cases, where it may be necessary for them to act in the execution of their duties relative to transportation devolving upon them as a war power under existing legislation, to modify or change a particular rate. This is all that would be needed for the full exercise of the war power referred to, and my understading is that it is all that is desired. To impose upon the President and the Director General the complicated and laborious business of initiating all rates is unnecessary and involves such a vast amount of labor that it could not be properly exercised. To provide that a commission appointed by the President may set aside the rates made by the President is wholly illogical and will be unworkable in practical application."

WAR-RISK BUREAU.

Mr. SIMMONS. From the Committee on Finance I report back favorably without amendment the joint resolution (S. J. Res. 128) granting to certain persons in the active war service an extension of time within which application for insurance may be made under section 401 of the act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, as amended by the act approved October 6, 1917, and I submit a report (No. 253) thereon. I ask unanimous consent for the immediate consideration of the joint resolution.

The VICE PRESIDENT. Is there objection to the present consideration of the joint resolution? The Chair hears none and it is before the Senate as in Committee of the Whole. Does the Senator from North Carolina desire to have the joint resolution read?

Mr. GALLINGER. I request that the joint resolution shall be read.

The VICE PRESIDENT. It will be read.

The Secretary read the joint resolution, as follows:

Resolved, etc., That the time within which application for insurance may be made as set forth in section 401 of the act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, as amended by the act approved October 6, 1917, is hereby extended, with respect to every person in the active war service as to whom the time for making application would expire before the 12th day of April, 1918, so that every such person may make application for insurance up to and including the said 12th day of April, 1918: *Provided*, That nothing herein shall be construed to effect an extension of the automatic insurance provided for in the said section 401 beyond the 12th day of February, 1918.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

LINCOLN HIGHWAY RIGHT OF WAY.

Mr. SMOOT. From the Committee on Public Lands I report back favorably without amendment the bill (S. 3983) granting to the Lincoln Highway Association, incorporated under the laws of the State of Michigan, a right of way through certain public lands of the United States, and I submit a report (No. 252) thereon. As it is the desire that the work shall be commenced at a very early day and it is a right of way on lands in Utah that are next to worthless, I ask unanimous consent for the present consideration of the bill.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. GALLINGER. I request that the bill be read. I think passing bills without reading is rather a dangerous practice.

The VICE PRESIDENT. The bill will be read.

whatever for removing the notorious abuses and inefficiencies of the present system of private competitive ownership and operation.

"Second. I disagree to the provision of the bill divesting the Interstate Commerce Commission of its existing powers of rate regulation, and transferring the primary rate regulation authority to the President, and creating in the commission appellate or supervisory power to set aside or modify rates fixed by the President.

"As to the first disagreement, I think the general consensus of well-informed and disinterested public opinion is that the present system by which the railroads are forbidden by law to coordinate or combine transportation facilities and resources and are compelled to operate as rival competitors for business under private ownership, with very limited governmental regulation is a failure. Out of it have grown scandals and abuses which have been set forth in sworn testimony given before subcommittees or agents of the Interstate Commerce Commission and committees of Congress and embodied in reports of these tribunals. It is a great mistake, in my judgment, for this committee to recommend, as it does in the majority report, that on a certain date the railroads should be restored to private owners without in any way changing the dangerous and unscientific conditions which existed up to the time the transportation systems were taken over by the President under authority given him by Congress.

"Everyone who has studied the question knows the practical difficulties in securing affirmative legislation affecting so great an interest as that of the railroads of this country, even when the legislation is needed to remove abuses which are perfectly obvious. To illustrate this, the Senate is familiar with the futile efforts which have been made in recent years to secure some reasonable governmental supervision and regulation of the stock and bond issues of these public-service corporations. The rate burdens which have been imposed upon the people on account of the inflation of railroad capitalization—vast issues of 'watered' stock, and the distribution of this stock, in many instances, as bonuses or rewards to promoters and bond buyers—have been equal almost to the direct taxes levied upon the people for the support of the Government. A bill to remedy this great evil passed the House of Representatives and got so far as to be favorably reported by the Interstate Commerce Committee of the Senate, and yet, although it has been pressed for several years since that time in succeeding Congresses, it has not been possible to get favorable action or even consideration of this essential measure. With that and similar experiences in mind, it is impossible to say when positive legislation may be enacted putting the transportation business of the country upon such a basis as that the railroads can be operated as one public system, with the public interest as the primary consideration, and with such governmental control or outright governmental ownership—if that should prove to be necessary as a last resort—as would insure the foregoing results. Until these problems are worked out and enacted into law there should not be a certain date fixed for the return of the railroads to private ownership and control and practically unrestricted private competitive operation.

"Under the system existing before the roads were taken over by the President the fundamental rule of rate making was not at all that which is contemplated by the interstate-commerce act, namely, a reasonable rate for the service rendered, but, according to the sworn testimony of railroad official rate makers, it was 'what the traffic would bear.' In other words, the governing principle was to take in rates all that could be taken without crippling or destroying the industry which produced the commodities of transportation. In practical application, of course, in view of variations of cost of production and of local conditions, the principle was not always worked out in practice.

"Under the old system, which is to be restored by this bill 18 months after the close of the war, the railroads, being operated with the view of making the greatest returns possible to the private owners of each particular road or system, and without any actual regard whatever to the larger public economies and public interests, instead of so arranging routes and shipments as to require the least transportation and to get commodities to their destination by the shortest and most direct line; in general, the opposite policy has prevailed, namely, to carry them by the longest possible route, with a consequent waste of public resources, but of private gain to railroad operators. The long haul has been favored over the short haul under the guise of meeting water transportation. Water transportation has been destroyed. Public interest would require the fostering and development, to meet the growing transportation needs of a growing country, of every natural water route. Through a system of so-called terminal rates, often put lower than a reasonable amount for the service rendered, and through difficulties placed by the railroads in the way of transfer and connection with the water route, this great national resource has perished as though struck by a deadly blight.

"To compensate the railroads for any reduction in rates, which it may have been necessary for them to temporarily make in order to destroy competing lines of water transportation, discriminatory higher rates have been charged to intermediate points and for the shorter haul—a much greater charge for a much less service—contrary to every fundamental principle of just compensation for service rendered. In this way the greater part of the country has been retarded in its development and subjected to an unjust tribute by the railroads. The consequence has been not only the paralysis of shipping and of the great industry of water transportation and the deprival of the people of the benefits of these great arteries of trade which they would have enjoyed if, instead of being discriminated against, they had been, in the public interest, nurtured and encouraged, but crowding and congestion in certain terminals has been the inevitable result, so that when the country was recently confronted by a great crisis its entire transportation system was paralyzed.

"I do not think that public opinion will tolerate a return to these conditions. It is obviously unscientific, from a public standpoint—and this question should be from every point treated with the public interest as a primary one—for several parallel competing lines between great producing centers to so struggle among themselves as rivals for business that while one, through superior terminal facilities or advantages of location, secures more business than it can adequately handle, another, not so advantageously situated, but equally capable of transportation of commodities, may not be utilized to more than one-third of its capacity. The interests of the public require that these lines should be regarded as a part of the transportation system of the country, and that business should be so distributed between them as to afford, on the whole, the cheapest and best service to the public. At the same time it is not possible, from a political standpoint, at least, to allow a consolidation of the railroads of the country under private ownership and control—not even with the inadequate and limited regulations heretofore interposed by the Federal and State Governments.

"Such a colossal power concentrated in private hands would lead to abuses that, if not remedied in any other way, probably would produce political revolution. It would be a most dangerous experiment, and outside of a few interested circles probably would not receive serious consideration. Yet it is equally agreed that the competitive system is a demonstrated failure. The only alternative is a more adequate and extensive Government control or operation in the interest of the people, with due regard at all times for vested private interests which the laws have allowed to be built up in these public-service agencies. Until this is done it is the height of unwisdom, in my judgment, to provide, as the committee bill proposes, to restore these properties at a certain date to the old conditions.

"Under private control and operation, with one system competing against another for business, those systems which have been able to secure powerful backing in the great financial centers have been able to restrict and curtail the development of other systems in other sections of the country whose principal potential business was in the transportation of similar commodities. In this way certain coal fields have been favored and promoted, while others which should have served great sections of the country have been held back from development by high or discriminatory rates. The consequence has been not only the loss of this business to adjacent railroad lines, but the killing of industry and development in the section which those lines should have served; and in the illustration mentioned, that of coal, it has been one great contributing cause of the scandalous coal famine this winter. I say 'scandalous' because the death of many of our people, the suffering of more, the checking of our industries at a time when they are most needed, the weakening of our efforts in the vital crisis of a war, due to inadequacy of fuel supply, in a country with such natural resources of coal and such transportation facilities as our own, is scandalous.

"Under the system, which it is proposed by the committee bill to restore 18 months after the close of the war, some railroads earned as high as 50 per cent upon their capitalization, inflated as it is; while other roads, which were equally necessary to the communities which they served, earned no profits at all; and yet our system of rate making has, so far, worked out no principle by which this inequality could be adjusted. Under Government operation, with profits and losses of all the railroads going ultimately into one account, such inequalities would adjust themselves. Under private ownership it is obvious that this inequality of returns is inequitable and unjust. It

may be possible to find some plan of rate making by which, even under private operation, but with a larger measure of governmental control and supervision, these discrepancies could be adjusted so that those engaged in the public business of transportation on the highways of the Nation, with efficient management, would receive more equitable relative returns. This inequality of return inevitably, of course, affects the quality of the service rendered, and as a result deprives certain sections of the country of public facilities with which they should be provided. Until a basic policy is worked out which would have the effect of cutting down excessive returns on certain lines and permitting adequate returns upon others, the day for the return of the roads to their private owners ought not to be fixed.

"This bill makes no provision for the prevention in the future of such wholesale looting of public transportation systems as were perpetrated in the cases of the Chicago & Alton, the Rock Island, the New York, New Haven & Hartford, the Pere Marquette, the Frisco, the Cincinnati, Hamilton & Dayton, and others, as disclosed by testimony on record as mentioned above. Probably no greater financial crimes or ruthless destruction of private property under the apparent permit of the law were ever perpetrated than in these and similar instances, possible under the old opportunities for stockjobbing and stock control by interested private operators, which this bill would restore. Families have been ruined by the thousand, untold misery and many deaths, with far-reaching consequences, both direct and indirect, of business depression and the suffering of whole communities have been produced by these unscrupulous enterprises. In my judgment, it would be a breach of legislative trust to provide for the restoration of these properties to the old conditions without legislation which would make such crimes of private railroad finance impossible.

"Perhaps $300,000,000 a year could be saved to the people of the country by doing away with the multiplication of officials and the cutting down of overlarge salaries if the roads were consolidated and operated as one transportation system. The maintenance of multiplied complete official organizations on numbers of competing lines serving the same area imposes a wholly unnecessary economic burden upon the people. No attempt, even, has been made to provide for the elimination of this waste. The Post Office Department gives a very good example of excellent and efficient public service which can be obtained from men of ability and integrity for salaries far less than those paid by private transportation companies for services of the same grade and quality under private management. It is difficult to estimate the saving which would accrue in this direct way by cutting out the useless extravagance of salary, multiplication of officials, the superfluous elegance of equipment and material used in catering to the luxurious tastes of a portion of the traveling public by rival competitors for their business but which adds nothing whatever either to the comfort or efficiency of the service. All of this could be effected under a system of permanent Government control. Until these questions are studied and worked out on a permanent basis no law should be passed fixing positively a date for the return to private operation.

"The revenue received by the railroads, and which is provided in this bill as a measure of their compensation temporarily pending the war and until the date for the return of the roads fixed by the bill, is as to many of the roads entirely too high, while as to some of them perhaps it would not be adequate. In another form this has been mentioned above. It is extremely doubtful whether this condition could be readjusted in the midst of the present war, with the financial and transportation crisis with which the country is confronted, with necessity of maintaining the credit of existing securities; and for that very reason no definite time should be fixed for the reestablishment of the system under which these revenues were permitted. On the contrary, an entire readjustment of the whole basis and fabric of the control and operation of the transportation of the country, including rates and revenues, should be established; and no date at all for a return of the old unjust and intolerable system should be fixed. It is impossible, perhaps, in the midst of the crisis of the war to adequately deal with many of the problems mentioned above, and for that very reason no time limit should be fixed for the return of the roads to their private owners. The status quo should be preserved, whether for 18 months after the close of the war or longer, until these problems have been solved and enacted into fundamental law.

"As to the second point of disagreement, it is necessary to say only a few words. The bill of the committee vests the primary governmental making of rates in the President and undertakes to give to a commission composed of members appointed by the President supervisory control over the President in this matter of rate making. Of course the arrangement is illogical and unworkable. It is a little too much to expect of human nature that officials who owe their official existence to the President will be able, however much they may try, to exercise any real independent judgment or action in setting aside the President's orders in the matter of rates. The fact of the case is that the established rate-making bodies—the Interstate Commerce Commission and the State commissions—should be left just as they are at present, empowered to make orders respecting rates, which orders should have the same force and effect as at present, with the proviso that where the President, acting through the Director General, may deem it necessary, in the exercise of the war powers under which he has taken control of the roads, to modify or change a rate he may do so. In this way the Director General and the President will be relieved of the overwhelming duty of fixing all rates which will devolve upon them under the bill as reported by the majority of the committee, and for which neither the President nor the Director General have any adequate facilities or equipment or training or experience whatever. On the other hand, the President and the Director General would have the necessary knowledge and equipment and official facilities to enable them in certain special, obvious cases, where it may be necessary for them to act in the execution of their duties relative to transportation devolving upon them as a war power under existing legislation, to modify or change a particular rate. This is all that would be needed for the full exercise of the war power referred to, and my understading is that it is all that is desired. To impose upon the President and the Director General the complicated and laborious business of initiating all rates is unnecessary and involves such a vast amount of labor that it could not be properly exercised. To provide that a commission appointed by the President may set aside the rates made by the President is wholly illogical and will be unworkable in practical application."

WAR-RISK BUREAU.

Mr. SIMMONS. From the Committee on Finance I report back favorably without amendment the joint resolution (S. J. Res. 128) granting to certain persons in the active war service an extension of time within which application for insurance may be made under section 401 of the act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, as amended by the act approved October 6, 1917, and I submit a report (No. 253) thereon. I ask unanimous consent for the immediate consideration of the joint resolution.

The VICE PRESIDENT. Is there objection to the present consideration of the joint resolution? The Chair hears none and it is before the Senate as in Committee of the Whole. Does the Senator from North Carolina desire to have the joint resolution read?

Mr. GALLINGER. I request that the joint resolution shall be read.

The VICE PRESIDENT. It will be read.

The Secretary read the joint resolution, as follows:

Resolved, etc., That the time within which application for insurance may be made as set forth in section 401 of the act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, as amended by the act approved October 6, 1917, is hereby extended, with respect to every person in the active war service as to whom the time for making application would expire before the 12th day of April, 1918, so that every such person may make application for insurance up to and including the said 12th day of April, 1918: *Provided*, That nothing herein shall be construed to effect an extension of the automatic insurance provided for in the said section 401 beyond the 12th day of February, 1918.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

LINCOLN HIGHWAY RIGHT OF WAY.

Mr. SMOOT. From the Committee on Public Lands I report back favorably without amendment the bill (S. 3083) granting to the Lincoln Highway Association, incorporated under the laws of the State of Michigan, a right of way through certain public lands of the United States, and I submit a report (No. 252) thereon. As it is the desire that the work shall be commenced at a very early day and it is a right of way on lands in Utah that are next to worthless, I ask unanimous consent for the present consideration of the bill.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. GALLINGER. I request that the bill be read. I think passing bills without reading is rather a dangerous practice.

The VICE PRESIDENT. The bill will be read.

The Secretary read the bill, as follows:

Be it enacted, etc., That right of way 500 feet in width through the public lands of the United States, beginning at or near Orr's ranch, Tooele County, Utah, thence via Broad Hollow Pass and the North point of Granite Mountain to a point known as Black Point, thence westerly to the mouth of Overland Canyon and for 10 miles into said canyon, is hereby granted to the Lincoln Highway Association, incorporated under the laws of the State of Michigan. There is also granted the right to take from the public lands adjacent to the right of way, material, earth, stone, and timber necessary for the construction of the highway.

Before the grant of the right of way herein provided for shall become effective a map of location of the route of said highway and an outline of the general rules and regulations under which the Lincoln Highway Association will govern said highway, must be filed with and approved by the Secretary of the Interior: *Provided*, That all or any part of the easement herein granted may be forfeited and annulled by the Secretary of the Interior for failure to construct the highway within five years after the approval of maps of location or for nonuser after construction, or for abandonment, without further legislative or judicial action.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, and was read the third time.

Mr. SIMMONS. I should like to inquire of the Senator from Utah why it is necessary to grant 500 feet in width for a right of way through the public lands of the country?

Mr. SMOOT. It is asked for this reason. It is intended to be an automobile road from the Atlantic Ocean to the Pacific. This right of way is over a desert, and at certain places along the road there must be houses and garages built, and they will be built on the highway. I will say to the Senator the most of it is over a tract of land that used to be the bed of Salt Lake. Nothing can grow there; it is useless for farming purposes or for any other purpose that I can think of. The proposed right of way is the worst piece of road on the Lincoln Highway. The Lincoln Highway Association has interested a certain man in the United States to give the association $125,000 to make this part of the highway passable for automobiles going from any part of the country to the Pacific coast. I will assure the Senator——

Mr. SIMMONS. Is there no other place where they can have a right of way there?

Mr. SMOOT. I can not say as to that, because I do not know.

Mr. SIMMONS. I do not think we generally grant railroads more than about 100 feet to build such necessary houses as may be required for section hands and purposes connected with the operation of the road.

Mr. SMOOT. If the land was of any value at all, we should perhaps take that into consideration.

Mr. SIMMONS. If the lands are of no value, of course it does not amount to very much in this particular case; but it is a very bad precedent for the Government in granting a right of way through the public domain to grant two or three times as much as is absolutely necessary.

The VICE PRESIDENT. Shall the bill pass?

The bill was passed.

COLVILLE INDIAN RESERVATION, WASH.

Mr. MYERS. From the Committee on Public Lands, I report back favorably with an amendment the joint resolution (S. J. Res. 92) to defer first payments upon homestead entries for lands in the Colville Indian Reservation, Wash., and I submit a report (No. 247) thereon.

Mr. JONES of Washington. Mr. President, that joint resolution relates to an emergency matter. The payments therein referred to are overdue, and the department is withholding action, awaiting the action of Congress. I therefore ask unanimous consent for the present consideration of the joint resolution.

The VICE PRESIDENT. Is there objection?

There being no objection, the joint resolution was considered as in Committee of the Whole.

The amendment was to strike out all after the resolving clause and to insert:

That the Secretary of the Interior is hereby authorized to extend for a period of one year the time for the payment of any annual installment due, or hereafter to become due, on the purchase price for lands sold under the act of Congress approved March 22, 1906 (34 Stat., 80), entitled "An act to authorize the sale and disposition of surplus or unalloted lands of the diminished Colville Indian Reservation, in the State of Washington, and for other purposes," and any payment so extended may annually thereafter be extended for a period of one year in the same manner: *Provided*, That the last payment and all other payments must be made within a period not exceeding one year after the last payment becomes due, by the terms of the act under which the entry was made: *Provided further*, That any and all payments must be made when due, unless the entryman applies for an extension and pays interest for one year in advance at 4 per cent per annum upon the amount due as herein provided, and patent shall be withheld until full and final payment of the purchase price is made in accordance with the provisions hereof: *And provided further*, That failure to make any payment that may be due, unless the same be extended, or to make any extended payment at or before the time to which such payment has been extended, as herein provided, shall forfeit the entry and the same shall be canceled, and any and all payments theretofore made shall be forfeited.

The amendment was agreed to.

The joint resolution was reported to the Senate as amended, and the amendment was concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "Joint resolution providing additional time for the payment of purchase money under homestead entries within the former Colville Indian Reservation, Wash."

SAN DIEGO WATER SUPPLY.

Mr. PHELAN. I am in receipt of a telegram from the Senator from Montana [Mr. WALSH] requesting the recommittal to the Committee on Public Lands of the bill (S. 3646) to grant rights of way over Government lands for reservoir purposes for the conservation and storage of water to be used by the city of San Diego, Cal., and adjacent communities. I move that the bill be recommitted to the Committee on Public Lands.

The motion was agreed to.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JONES of Washington:

A bill (S. 3773) to provide compensation for employees of the United States separated from the service on account of injuries received while in the performance of duty, and for other purposes; to the Committee on the Judiciary.

A bill (S. 3774) for the relief of volunteer officers and soldiers who served in the Philippine Islands beyond the period of their enlistment; to the Committee on Military Affairs.

A bill (S. 3775) setting aside certain lands in the District of Columbia as a site for memorials to women; to the Committee on the Library.

A bill (S. 3776) granting a pension to Nancy L. Miller (with accompanying papers); to the Committee on Pensions.

By Mr. HENDERSON:

A bill (S. 3777) to amend section 4 of the act entitled "An act to regulate commerce," approved February 4, 1887, as amended June 18, 1910; to the Committee on Interstate Commerce.

Mr. SHEPPARD. Mr. President, the chairman of the Military Affairs Committee, the Senator from Oregon [Mr. CHAMBERLAIN], is unavoidably absent. He has asked me to introduce for him certain bills and a joint resolution, which I send to the desk, and which are introduced at the request of the War Department.

By Mr. CHAMBERLAIN:

A bill (S. 3778) to amend an act entitled "An act providing for an Assistant Secretary of War," approved March 5, 1890, and for other purposes;

A bill (S. 3779) to create in the Army the grades and establish the pay of first-class bugler and corporal bugler, to increase the pay of buglers, and for other purposes; and

A bill (S. 3780) to authorize the appointment of officers of the Philippine Scouts as officers in the militia or other locally created armed forces of the Philippine Islands drafted into the service of the United States, and for other purposes; to the Committee on Military Affairs.

A bill (S. 3781) to give indemnity for damage caused by American forces abroad (with accompanying papers); to the Committee on Claims.

By Mr. SMITH of Georgia:

A bill (S. 3782) to authorize the President of the United States to advance officers on the retired list, now on active duty, who were wounded in battle in the service of the United States; to the Committee on Military Affairs.

By Mr. SMOOT:

A bill (S. 3783) to amend an act entitled "An act granting pensions to certain enlisted men, soldiers, and officers who served in the Civil War and the War with Mexico," approved May 11, 1912; to the Committee on Pensions.

By Mr. JAMES:

A bill (S. 3784) to create a commission on illiteracy, to be known as the American illiteracy commission; to the Committee on Education and Labor.

By Mr. HALE:

A bill (S. 3785) granting an increase of pension to William P. Hodsdon (with accompanying papers); and

A bill (S. 3786) granting an increase of pension to Lewis Graves; to the Committee on Pensions.

By Mr. CHAMBERLAIN:

A joint resolution (S. J. Res. 129) granting to certain persons in the active war service an extension of time within which applications for insurance may be made under section 401 of the act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, as amended by the act approved October 6, 1917 (with accompanying paper); to the Committee on Finance.

MUNITIONS OF WAR.

Mr. LODGE submitted an amendment intended to be proposed by him to the bill (S. 3311) to increase and expedite the supply of munitions of war, which was ordered to lie on the table and be printed.

AMENDMENT TO AGRICULTURAL APPROPRIATION BILL.

Mr. FLETCHER submitted an amendment proposing to appropriate $10,000 to enable the Secretary of Agriculture to cooperate with and make an exhibit illustrative of the investigations, products, and processes relating to farming in the United States at the Pan-American International Farm and Live Stock exhibition to be held at Jacksonville, Fla., etc., intended to be proposed by him to the Agricultural appropriation bill, which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

TEACHERS' RETIREMENT BILL.

Mr. HOLLIS. Mr. President, I desire to give notice that the so-called teachers' retirement bill for the District of Columbia is on the calendar, and that it is my intention, if the Senate is in session to-morrow, to move to take it up for consideration. I make this statement so that the friends of the bill and its opponents, if there are any such, may be here at that time.

ADJUDICATION OF PRIVATE CLAIMS.

The VICE PRESIDENT. Morning business is closed.

Mr. SMITH of Georgia. I move that the Senate proceed to the consideration of the bill (S. 1795) to relieve Congress from the adjudication of private claims against the Government.

The VICE PRESIDENT. The question is on the motion of the Senator from Georgia that the Senate proceed to the consideration of the bill named by him.

Mr. GALLINGER. Mr. President, I am going to occupy a few minutes in opposing the motion that has been made by the Senator from Georgia, and, as a preliminary, I ask that the Secretary read the extract which I send to the desk, which I clipped from the Washington Times of last evening.

The VICE PRESIDENT. There being no objection, the Secretary will read as requested.

The Secretary read as follows:

WAR COSTING UNITED STATES $277 PER SECOND, TREASURY REPORTS.

Uncle Sam is almost ready to qualify as the greatest spender in the world.

A single item—war—costs Uncle Sam $277 a second. His expenses do not stop on Sundays and holidays, nor does he observe the eight-hour law that his employees enjoy.

During the 10 months the United States has been at war it has cost Uncle Sam a round $7,000,000,000, to-day's Treasury report shows.

This means an expenditure of about $24,000,000 a day or $1,000,000 an hour.

In addition to this, Uncle Sam has his current expenses to meet, which means another billion a year.

Mr. GALLINGER. Mr. President, I trust that the Senators who are present have listened to the reading of that newspaper extract, which, I assume, accurately describes the conditions of our finances at the present time. I am not an expert on finance; in fact, the most I have ever been able to do has been to take care of my own finances to a sufficient extent to pay my debts and my running expenses. So it is barely possible that the facts presented in the newspaper extract startle me a little more than they do men of big business or Senators who have been engaged in business occupations; but in reading that article it seems to me that this is a very inopportune time to engage in legislation that will further burden the Treasury if it can be avoided. The bill that the Senator from Georgia has moved to take up is a measure that, in my judgment, ought to be defeated, or, if not defeated, at least it ought to go over to a more appropriate time and occasion.

Mr. SIMMONS. Mr. President——

The VICE PRESIDENT. Does the Senator from New Hampshire yield to the Senator from North Carolina?

Mr. GALLINGER. I yield to the Senator.

Mr. SIMMONS. Mr. President, as I understood the reading of the newspaper extract which the Senator sent to the Secretary's desk, it refers to the amount of money that has been spent by the Government of the United States?

Mr. GALLINGER. Yes.

Mr. SIMMONS. I think $7,000,000,000 was the amount mentioned in that article, but of that a large part, involving something like half of it, was loaned to our allies. I will ask the Senator if that is not the fact?

Mr. GALLINGER. I confess, Mr. President, I did not analyze the article sufficiently to acquaint myself with that fact, if it exists; but even if that be so, we have got to ask ourselves the question whether or not that money is ever going to be returned to the United States. I know that one Senator, at least, has argued on this floor, with a great deal of fervor and eloquence, that the advances we have made to France, in view of what France did for us in a great emergency, ought not to be returned; and if any Senator is rash enough to believe that there is a certainty that the millions we have advanced to Russia will be returned, he takes a more optimistic view of the situation than I do. But, Mr. President, however that may be, the fact remains that we have already, outside of the advances we have made to the allies, created an indebtedness twice as much, certainly, as was created during the entire Civil War; and we are notified, and have every reason to believe, that we are to be asked to add a good many billions of indebtedness to the amount that is already on the wrong side of the ledger. It is a serious matter, and while I may be an alarmist, while I may not have the information that some of the other Senators have as to the capacity of this Government to bear this enormous strain, I can not help feeling, Mr. President, that we are burdening future generations with a load that will be very heavy for them to carry.

When the Civil War closed our national debt was $2,900,000,000 in round numbers, as I remember it. It took 50 years to reduce that debt to $900,000,000, which was about what we owed when we declared war against Germany. We have already appropriated, outside of what we advanced to the allies, two or three or four times as much money as the Government owed at the close of the Civil War, and that is to be multiplied, very likely, three or four times before we get rid of the necessary appropriations to carry on this war. If this war continues two years longer, is any Senator optimistic enough to believe that we will not have incurred an indebtedness of from thirty billion to forty billion dollars—an amount that staggers the imagination, which will impose a burden upon future generations that will be very hard, indeed, for them to meet?

Now, Mr. President, as I have suggested, it strikes me that in these days, when we are appropriating billions of dollars to meet the obligations of the war in which we are engaged, it is an inopportune time to repeal a statute that was agreed to by both sides of the Chamber and which proposed to halt the payment of claims that at least have a questionable title.

Something was said yesterday about an agreement that was reached when the so-called Crawford amendment was adopted, when a bill carrying 1,032 war claims for alleged destruction of property in the South was under consideration, nearly $2,000,000 of money being included in that bill; and it was questioned whether any such understanding was had at that time. Mr. President, I had something to do with that matter. I was opposed to the bill; I had reason to believe then, as I have reason to believe now, and as the late Senator Clarke, of Arkansas, so pointedly expressed it, that not more than 1 or 2 per cent of the claims probably are honest claims which ought to be paid by this Government. I had on my desk at that time an amendment which I proposed to offer to that bill, and which, if this bill shall be considered by the Senate, I propose to offer to this bill—an amendment proposing to pay the claims of the men who worked overtime in our navy yards and in other activities of the Government, every one of which has been passed upon by the Court of Claims and declared to be honest. They were claims that were easily substantiated by testimony, as every one of them was substantiated by testimony. I proposed to include in the amendment, as I shall include in the amendment that I shall offer if this bill is to be considered, claims that the soldiers of this country, officers of the United States Army, have and which ought long ago to have been adjudicated; and I shall include in the amendment one or two other classes of claims that have been passed upon by the Court of Claims and declared to be honest debts of the Government of the United States.

Mr. President, I am one of those who believe the Government ought to pay its debts. I have declared on this floor more than once that if there were a law on the statute books of the United States under which the Government of the United States could be put in jail for not paying its debts the Government of the United States would be in jail all the time; and that is true. The honest claims of the citizen are neglected to an extent that is not to the credit of this great Government of ours, and the classes of claims to which I have alluded are in that category.

Why, Mr. President, it is a remarkable fact that we have had very strange legislation and very strange decisions by some of the officers of the Government in connection with so-called longevity claims. It may not be known by the Senators generally what has happened in relation to those claims, which will be included in the amendment that I shall offer, if I have an opportunity to do so, and which I trust I may not have an opportunity to do. By various decisions of the Comptrollers of the Treasury—two or three of them—the fact is, Mr. President, that the longevity claims of the Confederate generals, Beauregard, Ewell, Hood, Stonewall Jackson, Johnson, Lee, Stuart, and Pickett, have all been paid by the Government of the United States, while the claims of the Union generals, Reynolds, Pope, Henry, Phil Sheridan, Carr, and Thomas, have not been paid by the United States, notwithstanding they have been pending before the accounting officers of the Government for a long time.

The Supreme Court of the United States said that these claims were valid and honest claims; but a Comptroller of the Treasury—to his discredit, it may be said, a Republican—decided that he could make himself immortal by saving a million or two dollars to the Government of the United States; and he decided that the Supreme Court was wrong, and that those claims ought not to be paid, and they have not been paid. Another comptroller came in—likewise a Republican, as I remember, from Indiana—who decided that Comptroller Gilkerson was wrong, and that the mandate of the Supreme Court ought to be obeyed; but in that decision he said:

> But these claims that Comptroller Gilkerson disallowed are not to be considered again and I am of opinion that they ought not to be paid. They are res adjudicata.

Under that second decision these claims of the generals in the southern army were filed and allowed, and the claims that were disallowed by Gilkerson are unpaid to the present time, notwithstanding the Supreme Court decision that they ought to be paid.

Mr. SMITH of Georgia. Mr. President, a large amount of claims of officers in the Union Army were paid.

Mr. GALLINGER. Well, I am stating facts.

Mr. SMITH of Georgia. There was not any effort to discriminate. I should like to say to the Senator that I should be delighted to support any bill to pay these claims that were turned down by that comptroller.

Mr. GALLINGER. I am glad to know that.

Mr. SMITH of Georgia. I just can not conceive of the justice of not paying them.

Mr. GALLINGER. There is not any justice in it at all, and I am glad the Senator agrees with me on that point.

Now, Mr. President, to come to the bill under consideration, I had a good deal that I intended to say along a different line that I will not say, because I have no disposition to protract this debate. There is a great deal of very important legislation coming before Congress at this session. I have an impression that the question as to whether or not we are going to abdicate the functions of Congress entirely, and whether or not we are going to turn this Republic of ours into a monarchy, and turn democracy into autocracy is a question that we shall have to debate before we adjourn for the holidays next summer, if we get any holidays. Hence I have no disposition whatever to delay the consideration of a measure of this kind.

Mr. SMITH of Michigan. The principle of res adjudicata would apply to that.

Mr. GALLINGER. There are, however, one or two things that I feel constrained to say.

In those so-called claims for the occupation of churches and schools during the Civil War, and for the payment of claims for fence rails and razor-back hogs and mules, the question of loyalty was to be considered. It had to be proven to the satisfaction of the Court of Claims that the men who made these claims were loyal to the Government of the United States during the Civil War. Why, Mr. President, that is an easy matter to do 50 years after the war or 25 years after the war. There is no trouble about that. If there was any soldier on the Union side during the Civil War who was not a good soldier, who has not received a pension, I do not know who he is. He can always find men of his own type, equally poor soldiers, who would swear that they knew that he had been in the hospital at a certain time, whether he was or not—the records did not show it, but they knew it was so—and who would also swear that they knew he had received a shock which affected his hearing during a certain battle, or that something else happened to him; and so all those pension claims, many of which are utterly worthless, have been allowed by the Government, because they were "proved."

So far as these southern claims are concerned, what is the parallel? The parallel is that there is no difficulty in getting a man 50 years after the war or 30 years after the war to swear that he knew that 862 fence rails were taken by the Union Army and consumed as firewood, or that more mules were taken in one State than were used during the entire Civil War during those four terrible years of conflict. Such testimony has been given. There is no trouble in getting men to say that they know that a drove of hogs—it may have been 10 or it may have been 10,000—were captured by the Union soldiers and consumed as food, and that the men from whom they were taken ought to be compensated. That is an easy matter to do.

Why, look at the so-called Methodist Book Concern claim. Just give a moment's thought to that, Senators who were here when that bill was passed. The Methodist Book Concern—I think of Nashville, Tenn.—came in here with a claim of seventy-odd thousand dollars, as I remember, for the occupation of the building that they employed as a publishing house, and it was sworn before the Court of Claims that they were loyal men, every one of them devoted to the Union cause; that there was not a Confederate among them. It was further testified upon the authority of a very distinguished man that that claim was so honest that they had not employed any attorney to prosecute it, and upon those representations the claim was passed. But it developed shortly afterwards that in that concern they were printing Hardie's Military Tactics for the Confederate Army, and that they were actually making munitions of war also for the Confederate cause; and it further developed that in place of there being no attorney employed, almost one-half of the amount of that claim went to an attorney, the matter becoming so notorious that the Methodist Church demanded that that money should be returned to the United States; but it was not returned. Now, that is a notorious case; but when that case could be proven by sworn testimony, it can be readily seen how easy it is to prove that a mule or a hog was taken by the Union forces, or that a church now valued at three or four thousand dollars was occupied for a little time, when the evidence submitted by the Senator from Utah in one case at least is that they never had a church in the town that was worth $1,000.

That is the class of cases with which we are dealing. There were 1,032 of them in the bill that was passed when the amendment which it is now attempted to repeal was agreed to. It was agreed to by both sides of the Chamber, and there is no question about it; and there was not a vote against it on the Democratic side here or in the House of Representatives when it was submitted to the House in the nature of a conference report.

The Senator from Georgia [Mr. SMITH] said yesterday—I may not quote him with entire accuracy, but I think I will quote him with substantial accuracy—that he thinks we ought to repeal this law and give the people for a couple of years longer an opportunity to submit their claims, and then he would be in favor of cutting it off. Well, Mr. President, if we did not do right in cutting it off three or four years ago, would we do right in cutting it off two years from now? Supposing we had an agreement of that kind made with the Senator from Georgia, and allowed his bill to pass, what evidence have we that in another year or two some ardent friend of these war claims would not again make a motion to repeal the law? And if he summoned a majority of the Senate to his aid, he would secure the repeal, and they would go on like Tennyson's Brook. That is about what we have done since the close of the Civil War; and if we do not stop it they will certainly emulate Tennyson's Brook, and go on forever.

We have 1,342 claims passed upon by the Court of Claims for overtime work in the navy yards of the United States, every one of which has been proven to be an honest claim. When this agreement was made, Mr. President, I had an amendment on my desk covering two or three classes of claims, due to people mostly in the Northern States, and I had the assurance that if we allowed the bill to pass the bill that I proposed to offer as an amendment would be seriously taken up and considered by the Senate. I submitted it to the Committee on Claims last year and again this year, and it is lying dormant in that committee. I am not finding fault with the committee, because I presume that committee are overworked. Possibly they may get to the time when they may give consideration to it, and these claims may be paid.

As I say, there are 1,342 of these claims. Why, Mr. President, I know an old man in my own city bearing the distinguished name of William Shakespeare. He has a claim for about $300, I think, for overtime work in one of the navy yards of the United States, passed upon by the Court of Claims years ago, and he is being taken care of partly by charity. He has appealed to me over and over again to get the claim allowed. He came to see me when I was home last, evidently not well nourished, tottering, saying: "Senator, for Heaven's sake, can I not get that little claim allowed? It would be of a great deal of as-

sistance to me at the present time." Well, it has not been allowed. It was reported upon by the Court of Claims years and years ago. I have tried to get it allowed, but it has not been allowed, and I do not know when it will be allowed. That is only one case out of 1,342, very likely one-half of them in the same situation.

Mr. President, I shall press for the consideration of these claims if the Senate takes up this bill, but I think we ought to stand by the agreement we made when the Crawford amendment was put on the bill that carried over 1,000 war claims of this kind, involving the Government in an expenditure of nearly $2,000,000, which has been paid. I wish some Senator had taken the time to ascertain, and yesterday I asked the Senator from Utah [Mr. SMOOT] who is so apt in figures and who delights in that kind of work, if he had taken any pains to ascertain how many millions of dollars have been paid by the Government of the United States for claims of this nature. He said he had not done it; hence, I can not state it; but I venture to say that it would go well up toward forty or fifty million dollars, perhaps more. We have passed bill after bill. Some Senator said we have not passed any bills of this kind. Well, we have passed probably half a score of them, certainly, since I have been a Member of this body, and they have carried enormous amounts of money which the Government has paid for claims of this nature which the late Senator from Arkansas, Mr. Clarke, said have no merit; that it was pure benevolence on our part to pay them, and that they ought not to be paid, and that he would join with me and others in stopping them, which we did in 1915.

Mr. President, as I said a moment ago, I have no disposition to prolong this debate. I have said all that I care to say. I regret that I have had to say it. I have been one of the Senators from the North who have kept out of their minds anything of a sectional nature; certainly I have tried to do it. I have not drawn the line as between claims from the South or claims from the North when I believed they were honest and just claims; and I would not have said a word to-day if I had believed that we ought to reopen the floodgates and allow the attorneys in Washington and elsewhere to invade the South again, and hunt up a new list of similar claims.

Mr. SMITH of Georgia. Mr. President——

Mr. GALLINGER. I yield to the Senator from Georgia.

Mr. SMITH of Georgia. Would not the Senator, then, be willing to amend this bill so as to prevent any new suits being brought, and allow the Court of Claims to dispose of the cases now pending there?

So far as I am concerned I wish to say to the Senator that I am perfectly willing to strike out the provision allowing new suits to be filed; but I do think the parties who have brought their suits and prepared their testimony, practically by the invitation of the United States, having been authorized to do so, ought to have an opportunity to let the Court of Claims pass on them.

Mr. GALLINGER. No, Mr. President; I would not be willing to make that agreement. I am afraid some other Senator later on would move to repeal the law, if we agreed to it.

Mr. SMITH of Georgia. I am not asking the Senator to make an agreement, I am asking the Senate to take up the bill in order that it may be passed at least in a shape to let those suits that are now pending, where the parties have taken their testimony, go to final judgment.

I should just like to say to the Senator that I entirely deny that an agreement was made that bound more than a few men who were parties to it. I do not think it would have been fair for men who were getting their claims paid by the bill then pending to make an agreement that would prevent men who had suits pending that had not been decided from having their cases passed on; and if the Senator will pardon me, I just want to add that I do not know a constituent of mine who has a case pending in the Court of Claims.

Mr. GALLINGER. No; but Georgia had $48,000 in that bill that we agreed to allow to be passed. I want to say furthermore that most of these claims that the Senator says have been proven up have been proven up since the Crawford amendment was adopted, and they were proven up in the face of an inhibition by the Government of the United States against the consideration of any further claims of the kind.

Mr. SMITH of Georgia. No; I think the Senator is mistaken. The court dismissed all those cases within a few days after the passage of the Crawford amendment, and they could not have taken any more testimony.

Mr. GALLINGER. Why did not these diligent men get them on the bill that we passed at that time?

Mr. SMITH of Georgia. Why, the court had not adjudicated the cases. They could not have put them into that bill until the court had adjudicated that they were entitled to the amounts of their claims. Their suits were pending in the Court of Claims, waiting to be heard when they could be reached.

Mr. GALLINGER. I think more likely they were held back for the purpose of making another omnibus bill a little later on.

Mr. SMITH of Georgia. Oh, no.

Mr. GALLINGER. But however that may be, I am not going to make any agreement with any Senator. I am going to vote against taking up this bill; and if the Senate, in its profound wisdom, concludes to take it up and concludes to repeal this statute, I, of course, shall have to surrender, as I always do, to the verdict of the Senate.

I will close by expressing the fervent hope that the effort which the Senator from Georgia is making to get consideration for this bill may not receive the sanction of the Senate, because I think we have more important matters to attend to, and we have more important legislation, involving the appropriation not of a million dollars but of billions of dollars, that we will have to consider very seriously before this session shall adjourn.

Mr. THOMAS. Mr. President, my recollection regarding the circumstances under which the law of 1915 was passed has been strengthened by the discussion of yesterday, as conducted by the Senator from Utah [Mr. SMOOT] and the Senator from Michigan [Mr. TOWNSEND]. I am not a member of the Committee on Claims and hope I never shall be. The experiences of the members of that committee I can imagine by what was said yesterday by the Senator from Utah, they are overwhelmed with applications for the consideration of claims of every conceivable character, and the older the claims are the more vehemently they are pressed, and, of course, the more difficult it is for the Government to confront and oppose them.

I recognize that no Congress can bind the action of its successor, either by legislation or by any other form of agreement, but there is an equity, Mr. President, in the arrangement which culminates in the enactment of a measure that depended for its enactment entirely upon that understanding. I think it is perfectly safe to say that the omnibus claims bill of 1915 could not have passed but for that understanding, and, consequently, it strikes me that there are considerations independent of the question of the power of Congress to bind one of its successors, or any of its successors, that should cause Senators to hesitate before voting to take up this measure. Indeed, I can not conceive myself how anyone listening to the statement of the junior Senator from Michigan yesterday as to the record made should vote either to take up this bill or to pass it in the event that it should be taken from the calendar for consideration.

The Senator from New Hampshire [Mr. GALLINGER] referred a few moments ago to a class of pension claims which are entirely worthless, in all probability, but which, nevertheless, have been sustained because of the character of the proof offered in their support. I have no doubt the Senator could have stated with equal truth that in proportion as those claims were old—that is, in proportion to the lateness of time that they were presented—the more easy it was to establish them by appropriate testimony and the more difficult for the Government to offer countervail testimony, the lapse of time having made it impossible.

As a member of the Committee on Military Affairs, Mr. President, I am somewhat familiar with many applications to set aside the records of desertion and dishonorable discharges from the service, and I have been struck by the fact that in nearly all these applications the applicant expresses an ignorance of the character of the record in the War Department, the same having been brought to his attention quite recently. Of course the witnesses upon whose testimony the record was made are in their graves, and unless you discount entirely the testimony offered for the applicant it is almost impossible to overcome it.

The very fact that these claims have failed, Mr. President, is to my mind the strongest reason why they should not be considered at all. If they are genuine, they ought to have been presented years ago when all the witnesses to the transaction on both sides were available, and where in consequence a fair hearing could be had and justice done to both sides.

I do not think, Mr. President, this bill should be taken up, even if there had been no such agreement as that to which the Senators have referred. We ought to call a halt some time upon the right of the citizen to apply to the Government for the payment of stale claims, and of all times this seems to me to be the one when no door that can be closed should be opened which has for its purpose the obtaining of money from the Treasury of the United States. We are spending and we are raising more money by taxation than any nation in history was ever called upon to expend or to raise before. Instead, therefore, Mr. President, of pressing claims like these and other claims against the Government, the Congress of the United States should in every

instance set its face against them and postpone them to days of peace. They are not necessary to be considered now. Every possible drain upon the Treasury it is our duty to prevent as far as possible.

I cordially agree with practically everything that has been said by the Senator from New Hampshire, and I hope the bill will not be taken up.

Mr. STERLING. Mr. President, while I am a member of the Judiciary Committee, from which this bill was reported, I had some misgivings in the committee when it was briefly considered there. There was no record vote, however, in the committee on the bill, and the Senator from Georgia was authorized to report it.

I have been at some pains, Mr. President, since I came to the Chamber this morning, to examine the previous expressions of Congress in regard to claims of this kind. I find that as far back as 1883 an act was passed barring the claims which I understand will for the most part be covered by this bill and to secure the ultimate payment of which, indeed, this bill is introduced. I refer to section 3 of the act of March 3, 1883, which is entitled "An act to afford assistance and relief in Congress and the executive departments in the investigation of claims and demands against the Government." Section 3 has reference to a particular class of claims and is as follows:

The jurisdiction of said court—

The Court of Claims—

shall not extend to or include any claim against the United States growing out of the destruction or damage to property by the Army or the Navy during the war for the suppression of the rebellion, or for the use and occupation of real estate by any part of the military or naval forces of the United States in the operations of said forces during the said war at the seat of war; nor shall the said court have jurisdiction of any claim against the United States which is now barred by virtue of the provisions of any law of the United States.

Now, that is the law of 1883, 18 years, or a little more, after the suppression of the rebellion. But it is not the only expression of Congress. In 1887 an act was passed entitled "An act to provide for the bringing of suits against the Government of the United States." In the first section of that act there is this proviso:

Provided, however, That nothing in this section shall be construed as giving to either of the courts herein mentioned jurisdiction to hear and determine claims growing out of the late Civil War, and commonly known as "war claims," or to hear and determine other claims which have heretofore been rejected or reported on adversely by any court, department, or commission authorized to hear and determine the same.

Then comes after that the Crawford amendment of 1915. The Crawford amendment is very similar to section 3 of the act of 1883, only it includes one other class of cases which shall not be the foundation of any claim. The Crawford amendment, which is section 5 of the act of 1915, is as follows:

SEC. 5. That from and after the passage and approval of this act the jurisdiction of the Court of Claims shall not extend to or include any claim against the United States based upon or growing out of the destruction of any property or damage done to any property by the military or naval forces of the United States during the war for the suppression of the rebellion; nor to any claim for stores and supplies taken by or furnished to or for the use of the military or naval forces of the United States.

That clause relating to claims for stores and supplies is new. It is not in the previous acts or either of them, but in other respects it is the same as the act of 1883. The concluding clause of the act of 1915 is "nor shall said Court of Claims have jurisdiction of any claim which is now barred by the provisions of any law of the United States." This was enacted more than 50 years after the suppression of the rebellion.

So it would seem, Mr. President, from these various expressions of Congress, first in 1883, next in 1887, and next in 1915, that Congress had determined, and rightly determined, after full consideration, that these claims should be forever barred.

Now, what does this bill propose to do? Look at the sweeping provisions of the concluding section. Time surely is not of the essence of things in this bill. Section 8 provides as follows:

That jurisdiction is hereby conferred on the Court of Claims to consider, hear, determine, and adjudicate all questions of law and fact and equity, notwithstanding the bar of statutory limitations or any other statutory bar, all claims covered by this act brought within two years from the approval of this act.

So, Mr. President, after all this period of time since the end of the Civil War, after a long interval, during which the Court of Claims had jurisdiction, and after these three successive acts of Congress, with long intervals of time between them, it seems to me it is little short of the absurd that we should be asked now to throw down the bars of every statutory limitation, time or otherwise, to permit of the presentation of these claims. I hope the bill will not be considered.

Mr. SMITH of Georgia. Will the Senator allow me to interrupt him?

Mr. STERLING. I am ready to yield the floor.

Mr. SMITH of Georgia. Then probably I might as well go on in my own right.

Mr. STERLING. Very well.

Mr. SMITH of Georgia. Mr. President, by what has been said the impression might be created in the Senate that there was an opportunity freely given for claimants to bring suits in the Court of Claims. There was no such opportunity. These parties have not had the right to bring their cases into court. When the Tucker Act was passed it was necessary to get the approval of Congress to a bill before the bill allowing suit was referred to the Court of Claims. I hope the Senator from South Dakota will catch what I say. These claimants have not had the right to sue. When the Tucker Act was passed it was still necessary for Congress to refer to the Court of Claims each claim by a separate bill before a claimant could bring suit, and for 10 years after the passage of the Tucker Act only 10 cases were referred by Congress to the Court of Claims, when there were applications to the number of 450 for the privilege of bringing suit.

Mr. POMERENE. If I may interrupt the Senator, he has just stated that the claimants did not have the opportunity to appear in court. What does the language mean in section 2 which provides the right to reinstate a claim which has been heretofore dismissed?

Mr. SMITH of Georgia. I will explain that in a moment. This is what I was stating, that the right to bring suit in the Court of Claims was never broadly given to litigants. They were compelled to come to Congress for a special bill, and in each instance have a bill passed referring to the Court of Claims each separate claim. After the passage of the Tucker Act, in 16 years' time, with 493 bills pending in Congress, only 10 permissions to sue were given, and not until 1897 were these parties generally authorized by Congress to bring their suits.

Mr. POMERENE. In what year?

Mr. SMITH of Georgia. In 1897. It was 20 years ago that bills were for the first time passed quite freely to allow suits in the Court of Claims. The Court of Claims proceeded to hear a number of cases. Congress stopped making appropriations to pay any of the amounts awarded by the Court of Claims. The result was that the Court of Claims stopped hearing cases. When the Crawford amendment passed there were a number of cases pending in the Court of Claims which had not been decided, where the parties had gone to the expense of preparing their testimony, after Congress referred them to the Court of Claims and authorized them to take testimony.

Mr. POMERENE. Mr. President, my mind has been attracted by the language in section 2 of the bill:

That all suits in the Court of Claims which have heretofore been dismissed by the said court by reason of the provisions of section 5 of the said act shall, on motion of the claimants made or filed within one year from the passage of this act, be reinstated.

Mr. SMITH of Georgia. The Crawford amendment was passed in the act of 1915 withdrawing jurisdiction from the Court of Claims to hear the cases already referred to it by Congress. Thereupon the Court of Claims dismissed the cases that were there pending brought under authority of Congress.

Mr. STERLING. If the Senator from Georgia will permit me right there, it does not withdraw the jurisdiction of the Court of Claims from all claims that may be brought against the United States, but claims of this class, claims arising out of the Rebellion.

Mr. SMITH of Georgia. I understand that perfectly. The Tucker Act had reference only to that class of claims. There were certain claims authorized by the Tucker Act to be brought before the Court of Claims, provided Congress referred them to the Court of Claims by special bills, and the procedure was to present a special bill in Congress for the reference of each claim to the Court of Claims. The party followed it up by filing a petition in the Court of Claims if specially authorized by Congress to do so.

In 1915 there were a number of claims that had been adjudicated by the Court of Claims and that Congress had not paid. It was an accumulation of a number of years; certainly at least 10. The Court of Claims had adjudicated that certain parties were entitled to certain compensation for losses caused or property taken by the Government during the Civil War, yet Congress failed or refused payment.

Mr. STERLING. Will the Senator from Georgia permit me?

Mr. SMITH of Georgia. Gladly.

Mr. STERLING. How would the act of 1915 affect the claims that had already been adjudicated by the Court of Claims? It only relates to claims presented from and after the passage of the act; it takes away jurisdiction as to those.

Mr. SMITH of Georgia. I did not say it applied to adjudicated claims. There were adjudicated claims, and, after gaining their cases before the Court of Claims, the parties came to Congress and asked Congress to appropriate the money to pay off the claims. For quite a large number of years—for more

than 10 years—Congress had declined to appropriate any money to pay off these judgments which had been rendered by the Court of Claims. Thereupon the Court of Claims stopped hearing the cases. They did not dismiss the cases; they were pending in the Court of Claims; the parties prepared their testimony and were ready to proceed to judgment in the Court of Claims; but the Court of Claims said, "Congress will not pay if we decide the cases, and it is no use taking up our time to hear them."

The act of 1915 has been construed by the Court of Claims to require the dismissal of the cases pending in that court in 1915. It has been stated the act of 1915 was only intended to prevent future suits.

Mr. POMERENE. Now, Mr. President, may I ask the Senator from Georgia another question?

Mr. SMITH of Georgia. Yes; I am glad to be asked questions.

Mr. POMERENE. How long were the cases pending in the Court of Claims which were dismissed and which are referred to in section 2 of the bill?

Mr. SMITH of Georgia. Well, they were brought along at different times after 1897. Congress began very freely to allow suits to be brought, and within the next 10 years practically all or most of these cases were brought in the Court of Claims. In the period between 1897 and 1907, I should say, substantially all of them were brought. There accumulated quite a number of judgments, but Congress refused to appropriate any money to pay those judgments. Then the Court of Claims said, "We have other business to attend to, and we will just pass over the claims referred to under this provision and try more important business, because Congress does not pay off the claims even if we decide them." This, I am advised, was the position of the court. For quite a long time, as I am informed, before 1915 the Court of Claims merely passed over the cases on the docket and did not dispose of them.

Mr. POMERENE. But the bill does not speak of passed-over cases which were on the docket, but it speaks of cases which have been dismissed.

Mr. SMITH of Georgia. How were they dismissed? In 1915 we withdrew the jurisdiction of the Court of Claims over these cases, and thereupon the Court of Claims dismissed them all.

Mr. POMERENE. Well, that may be true; but still they were pending from the time the cases were begun until 1915.

Mr. SMITH of Georgia. Precisely; yes. They were pending for a number of years. For several years the Court of Claims had declined to hear them because Congress had stopped paying the claims, but quite a number of them were pending there in 1915, with the testimony taken, and they were pending because Congress permitted the parties to take their cases to the Court of Claims for trial. It has been claimed that the cases moved slowly in the Court of Claims because the Department of Justice, defending the cases, could not be hurried. Those who brought their suits in pursuance of this authority, it does seem to me, ought to have a right to obtain an adjudication by the Court of Claims.

Mr. McKELLAR. Mr. President, will the Senator yield to me for just one moment?

Mr. SMITH of Georgia. Yes.

Mr. McKELLAR. In further answer to the Senator from Ohio [Mr. POMERENE], I call his attention to a report of the Committee on War Claims of the House of Representatives, which was made recently on a bill pending there. That report states:

> It is but fair to state the circumstances surrounding the adoption of this amendment—

That is, the amendment in 1915, which is known as the Crawfor amendment—

> The bill was considered in the Senate the afternoon preceding the day on which Congress adjourned and was not reported to the House until quite late that night, and therefore did not receive at the hands of the committee the careful consideration it would have received at any time other than the closing hours of the session. It is fair also to say that there was no debate by the House. It was the opinon of this committee—

That is, the War Claims Committee of the other House—

> after a casual consideration that the amendment would take from the court jurisdiction to hear and determine all cases referred to the court after the passage of the amendment, but would not affect cases then pending before it.

The Court of Claims construed the amendment as depriving it of jurisdiction over cases then pending, and thereupon dismissed a great number of cases. It was in that way that the cases were dismissed in the Court of Claims.

As I recall, I took an active part in the passage of that legislation, and it occurred to me that as to the cases then pending before the court where the proof had all been taken, where the findings had been made under the law and the cases had merely been laid aside because Congress had refused to appropriate the money to pay the claims that had been allowed, it would not take away the jurisdiction to hear and determine those cases where the court had already had charge of the matter. The Court of Claims, however, decided to the contrary.

Now, it does seem to me that it is nothing but fair as to those cases that have been prosecuted to a judgment, or prosecuted almost to a judgment, where all the proof had been taken, where the litigants had been put to the expense of prosecuting those claims, that surely such claims ought to be reinstated on the docket of the Court of Claims and passed upon. I think that proposition would commend itself to the Senator from Ohio beyond question.

Mr. POMERENE. Well, Mr. President, I do not want to do anybody an injustice; but in nearly all if not in every State of the Union we have statutes of limitation; statutes covering the question of torts, limiting the right to begin an action to two, three, four, five, or perhaps six years at the outside; there is a limitation of a right to begin an action on account or on an oral contract, usually limited to six years; there is a limitation usually upon a right of action on a promissory note to 15 years after it becomes due; and now we are presented here with a lot of cases that originated during the Civil War. Inasmuch as we have a Committee on Revolutionary Claims in the Senate, would not that be a very good place in which to bury these claims?

Mr. SMITH of Georgia. But those claimants did not have the right to sue; there was no court to which they could go.

Mr. POMERENE. But the Senator has already called attention to the fact that they were later given the right to sue.

Mr. SMITH or Georgia. Yes; in 1897; and they brought the suits, and those suits are pending. After they brought their suits in pursuance of this authority, we suspended the jurisdiction of the court and caused them all to be dismissed.

Mr. KENYON. These claimants had 20 years in which to bring their suits?

Mr. SMITH of Georgia. Yes.

Mr. KENYON. And they could have pursued them for 20 years?

Mr. SMITH of Georgia. I explained the fact that for 10 years Congress declined to pay any judgments rendered by the Court of Claims, and that thereupon the court did not strike the cases from their docket, but suspended hearings, and for about 10 years these claimants could not get a hearing in the court. The court merely let them wait there.

Mr. KENYON. Yes; the Court of Claims evidently felt that the cases were not such that anybody would suffer by delay.

Mr. SMITH of Georgia. If Congress was not going to pay the claims, what was the use of the court adjudicating them?

Mr. McKELLAR. The Senator from Iowa, however, will remember that for 18 years after the Civil War the court was not open to any of these cases at all.

Mr. SMITH of Georgia. Mr. President, I only wish to say a few words more. I am anxious for the Senate to dispose of this bill. I think that is the fair and just thing to do. It is suggested that we have plenty of other business; but we are adjourning from day to day and doing nothing, because the other business is not ready. I think the Senate ought to take up this bill, if there is nothing else pressing, and vote on it. Personally, I am willing to allow a vote to strike out the provision authorizing any more suits to be brought; but I do think that the suits which are pending in the Court of Claims, which were brought there by authority of Congress, occupy a status where the claimants ought to be permitted to go to judgment on their claims.

This bill simply gives the right within six months to move to reinstate the cases where they were before they were stricken from the docket under the Crawford amendment. As suggested by the Senator from Tennessee [Mr. McKELLAR], when the Crawford amendment was adopted, it was not understood by at least Members of the other House that it withdrew from the Court of Claims jurisdiction of the cases then pending in that court; nor was it suggested on the floor of the Senate, I think, that the cases pending in the Court of Claims would be dismissed. I do not think anyone would have favored that. Now, let us take up the bill and dispose of it. We have nothing else before the Senate. If the bill is defeated altogether, that ends it; my responsibility is over. I hope, however, the Senate will not do that. I think the cases that were pending in the Court of Claims, especially where the parties had prepared their testimony, ought to go to judgment. I think they ought to have a hearing; but surely we ought to dispose of the bill one way or the other. If the Senate declines to take it up, then we are going to adjourn; we have nothing else to do, and the motion to take up the bill will have to be made again. Let us dispose of it; that is my plea to the Senate. We have nothing else to

do, and let us get rid of it. I do not desire to discuss its merits to any further extent.

Mr. SMOOT. Mr. President, will the Senator yield to me?

Mr. SMITH of Georgia. Yes.

Mr. SMOOT. Would the Senator feel that it was a personal affront to him if some Senator should move to indefinitely postpone the bill? That would bring the question to a head.

Mr. SMITH of Georgia. Not the slightest, if the Senate wants to kill the bill.

Mr. SMOOT. I think that is, perhaps, the best way to proceed.

Mr. SMITH of Georgia. I do not see that that is the best way.

Mr. SMOOT. But I do not wish to make that motion if it is not agreeable to the Senator from Georgia. Of course if the Senator moves to take up the bill, then such a motion could be made.

Mr. SMITH of Georgia. Mr. President, I do not consider any motion to dispose of a bill a personal affront if the parliamentary rules justify the motion.

Mr. SMOOT. Yes; but the Senator knows what I mean.

Mr. SMITH of Georgia. I would not like to see a motion to lay the bill on the table if any Senator wanted to speak on it, but just as soon as Senators are ready to vote I should like a vote on it.

Mr. SMOOT. I am perfectly willing, Mr. President, so far as I am concerned, to vote, first, on taking up the bill, and then, if the Senate votes to take up the bill, I think the proper thing to do would be to make a motion to indefinitely postpone it.

Mr. GALLINGER. Or to refer it to the Committee on Claims.

Mr. KENYON. Would not the vote to take up the bill be in the nature of a test vote?

Mr. SMOOT. I will say to the Senator it certainly would if Senators had been in the Chamber and listened to the discussion.

Mr. SMITH of Georgia. I hardly think it would be a test vote, because I can see very well how a Senator would vote to take it up who might not be for the bill. If I were not for this bill I would vote to take it up, because if it is not to pass it ought to be disposed of. There is another reason why it ought to be disposed of. There are a number of individual claims still pending in the other House, but the committee of the other House have declined to consider individual bills, because they are in favor of this general bill.

Mr. KENYON. I myself would welcome any kind of a test vote, Mr. President, that would give an opportunity to those who want to vote to bury this bill to cast that vote.

Mr. McKELLAR. Let us have a vote on the motion to take up the bill.

Mr. GALLINGER. I think that is best.

Mr. KENYON. I was about to suggest the absence of a quorum.

Mr. GALLINGER. Just one moment, if the Senator will yield.

Mr. KENYON. Very well.

Mr. GALLINGER. Replying to the statement of the Senator from Georgia that there is no business before the Senate, I should like to remind him of the fact that my colleague [Mr. HOLLIS] has given notice that he has reported a bill doing in the District of Columbia what most of the progressive States have done; that is, pensioning the teachers who are instructing our youth in patriotism and other subjects of importance. He would like to have that bill taken up either to-day or to-morrow. I think that is a much more important bill than is this one. It was my privilege to report a bill of that kind some years ago, and I was fortunate enough to get it through the Senate, but it "fell outside of the breastworks" when it reached another body. The teachers meanwhile have been getting along as best they could, and while Massachusetts, New York, New Hampshire, and various other States have pensioned their teachers, the District of Columbia has not done so. I should like to have that bill considered at the earliest possible moment.

Mr. President, I am quite in favor of taking a direct vote on the motion made by the Senator from Georgia. I think that is the fair thing to do, and, so far as I am concerned, I am ready for a vote. I think, however, a quorum ought to be called before the vote is taken, and I therefore suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. SHAFROTH in the chair). The absence of a quorum being suggested, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Cummins	France	Harding
Beckham	Curtis	Frelinghuysen	Henderson
Borah	Dillingham	Gallinger	Hitchcock
Calder	Fernald	Gronna	Hollis
Chamberlain	Fletcher	Hale	James
Johnson, Cal.	New	Shields	Tillman
Jones, Wash.	Norris	Simmons	Townsend
Kellogg	Nugent	Smith, Ariz.	Trammell
Kenyon	Overman	Smith, Ga.	Underwood
Kirby	Phelan	Smith, Md.	Warren
Knox	Poindexter	Smith, Mich.	Watson
McCumber	Pomerene	Smoot	Wolcott
McKellar	Shafroth	Swanson	
McNary	Sheppard	Thomas	
Martin	Sherman	Thompson	

Mr. CURTIS. I desire to announce the absence of the Senator from West Virginia [Mr. SUTHERLAND] on account of illness, and will let this announcement stand for the day.

Mr. BANKHEAD. I am requested to announce the absence of the Senator from Georgia [Mr. HARDWICK] on account of illness. This announcement may stand for the day.

Mr. GRONNA. I wish to announce that the Senator from Wisconsin [Mr. LA FOLLETTE] is absent, due to illness in his family.

The PRESIDING OFFICER. Fifty-seven Senators have answered to their names. There is a quorum present. The question is on the motion of the Senator from Georgia to proceed to the consideration of Senate bill 1795.

Mr. SMOOT. On that motion I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. MYERS (when Mr. WALSH's name was called). My colleague [Mr. WALSH] is necessarily absent on account of ill health. He is paired with the Senator from New Jersey [Mr. FRELINGHUYSEN].

The roll call was concluded.

Mr. WOLCOTT. I wish to inquire if the senior Senator from Indiana [Mr. WATSON] has voted?

The PRESIDING OFFICER. He has not voted.

Mr. WOLCOTT. I have a general pair with that Senator, which I transfer to the Senator from Oklahoma [Mr. OWEN] and vote "yea."

Mr. BECKHAM (after having voted in the affirmative). I have a pair with the junior Senator from West Virginia [Mr. SUTHERLAND]. In his absence, I inadvertently voted. I transfer that pair to the Senator from Illinois [Mr. LEWIS] and will allow my vote to stand.

Mr. CHAMBERLAIN (after having voted in the affirmative). I withdraw my vote, in the absence of my pair, the junior Senator from Pennsylvania [Mr. KNOX].

Mr. CURTIS (after having voted in the negative). I have a pair with the junior Senator from Georgia [Mr. HARDWICK]. I transfer that pair to the junior Senator from Vermont [Mr. PAGE] and will let my vote stand.

Mr. TILLMAN. I transfer my pair with the senior Senator from West Virginia [Mr. GOFF] to the junior Senator from Louisiana [Mr. BROUSSARD] and vote "yea."

Mr. FRELINGHUYSEN. I have a general pair with the junior Senator from Montana [Mr. WALSH]. I transfer that pair to the senior Senator from Connecticut [Mr. BRANDEGEE] and vote "nay."

Mr. MYERS. Has the junior Senator from Connecticut [Mr. MCLEAN] voted?

The PRESIDING OFFICER. He has not voted.

Mr. MYERS. I have a pair with the junior Senator from Connecticut, which I transfer to the senior Senator from Arkansas [Mr. ROBINSON] and vote "yea."

Mr. JAMES. I transfer my pair with the Senator from Massachusetts [Mr. WEEKS] to the Senator from Missouri [Mr. STONE] and vote "yea."

Mr. CURTIS. I desire to announce that the Senator from Arkansas [Mr. ROBINSON] and the Senator from Delaware [Mr. SAULSBURY] are detained on official business.

I have been requested to announce the following pairs:

The Senator from Rhode Island [Mr. COLT] with the Senator from Delaware [Mr. SAULSBURY];

The Senator from New Mexico [Mr. FALL] with the Senator from Wyoming [Mr. KENDRICK]; and

The Senator from Pennsylvania [Mr. PENROSE] with the Senator from Mississippi [Mr. WILLIAMS].

The result was announced—yeas 24, nays 35, as follows:

YEAS—24.

Bankhead	James	Pittman	Smith, Md.
Beckham	Jones, N. Mex.	Ransdell	Swanson
Fletcher	Kirby	Sheppard	Tillman
Henderson	McKellar	Shields	Trammell
Hitchcock	Myers	Simmons	Underwood
Hollis	Overman	Smith, Ga.	Wolcott

NAYS—35.

Borah	France	Johnson, Cal.	Lodge
Calder	Frelinghuysen	Johnson, S. Dak.	McCumber
Cummins	Gallinger	Jones, Wash.	McNary
Curtis	Gronna	Kellogg	New
Dillingham	Hale	Kenyon	Norris
Fernald	Harding	Knox	Phelan

Pomerene	Smith, Mich.	Thomas	Wadsworth
Shafroth	Smoot	Thompson	Warren
Sherman	Sterling	Townsend	

NOT VOTING—35.

Ashurst	Gore	Nugent	Smith, S. C.
Brandegee	Hardwick	Owen	Stone
Broussard	Kendrick	Page	Sutherland
Chamberlain	King	Penrose	Vardaman
Colt	La Follette	Poindexter	Walsh
Culberson	Lewis	Reed	Watson
Fall	McLean	Robinson	Weeks
Gerry	Martin	Saulsbury	Williams
Goff	Nelson	Smith, Ariz.	

So the Senate refused to proceed to the consideration of the bill.

Mr. SMITH of Georgia. Mr. President, I desire to submit to the Senate, and to have printed in the RECORD, a letter from ex-Attorney General Wickersham in reference to these claims, which I think corrects a good deal of the misinformation that has been brought before the Senate to-day with reference to them. I ask leave to have the letter printed in the RECORD.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The letter referred to is as follows:

DEPARTMENT OF JUSTICE,
Washington, January 7, 1911.

Hon. J. T. WATKINS,
House of Representatives, Washington, D. C.

DEAR SIR: I am in receipt of your communication of the 29th ultimo, wherein you request certain information relative to congressional cases disposed of in the Court of Claims.

In reply to your first question, as to the number of congressional cases tried by the court, I may say that up to the beginning of the present fiscal year the court disposed of about 14,700 cases.

In answer to the third inquiry, of the total number of cases tried, 8,825 were dismissed and findings of dismissal certified to Congress, while findings were made favorable to the claimants in about 5,875 cases.

As to the fourth inquiry, the total amount claimed in the 14,700 petitions aggregates about $116,901,000, while the total amount of findings favorable to the claimants are in the aggregate about $9,877,000. Thus it may be seen that findings favorable to the claimants were somewhat less than 8½ per cent of the total amount claimed.

I may say further, that in the cases wherein findings were made favorable for the claimants the amount claimed was about $28,493,500, but the findings show that of this amount a little less than 35 per cent was awarded by the court.

In reply to the second inquiry, namely, as to whether "nearly all of the congressional cases tried are war claims," while it is true that so-called war claims make up the bulk of congressional cases, there are a number of claims so referred arising since the War of the Rebellion and classed as congressional cases, such as claims for overtime by a large number of employees at the various navy yards throughout the United States. Of this latter class there has probably been referred some 2,500 to 3,000 claims. These claims, however, are not docketed as general numbers but appear under one general number, each claim taking a subnumber, and the foregoing report deals with general numbers only.

The same may be said of a class of cases for overtime work on public buildings.

Other claims are referred that may be classed under the head of receiving-ship cases, claims for overpayment on imports, excess cost for building of torpedo boats, and other vessels are frequently referred under the Tucker Act.

In reply to the fifth inquiry of your communication, all cases involving war claims, in fact all cases of every kind in the Court of Claims, are made the subject of active defense on the part of the Government. All witnesses are cross-examined by Government counsel and all war claims are made the subject of investigation in the field.

I trust this will furnish you the required information.

Very respectfully,

GEO. W. WICKERSHAM,
Attorney General.

Mr. SMITH of Georgia. I have also a further memorandum on this subject that I think will be valuable when I again bring this bill to the attention of the Senate. I ask that it be printed in the RECORD. I will not stop to present it to the Senate.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The matter referred to is as follows:

Memorandum of bills referred by Congress to the Court of Claims under Tucker Act.

Congress.	By Senate.	By House of Representatives.
Fiftieth	10	1
Fifty-first	3	13
Fifty-second	2	6
Fifty-third	3	5
Fifty-fourth	12	.....
Fifty-fifth	132	49
Fifty-sixth	280	5
Fifty-seventh	[1]286	[2]79
Fifty-eighth	[3]490	.....
Fifty-ninth	[4]648	[5]49
Sixtieth	[6]328	3
Total	2,194	310

[1] Including 78 churches.
[2] Including 4 churches.
[3] Including 171 churches.
[4] Including 203 churches.
[5] Including 13 churches.
[6] Including 80 churches.

RECAPITULATION.

By Senate	2,194
By House	310
Total	2,504

The above shows that during 21 years after the approval of the Tucker Act a total of only 2,504 bills were referred by both Houses of Congress to the Court of Claims. The figures also indicate that during the first 10 years after the approval of that act only 55 bills were referred to the court by both Houses of Congress, thus showing the encouragement given to claimants.

Examination of the record shows also that during the Fiftieth Congress, when but 10 bills were referred to the court by resolution of the Senate, there were 493 bills pending before the Committee on Claims of the Senate. In short, only 10 bills out of 493 then pending were referred to the court during the Fiftieth Congress.

During the Fifty-first Congress 693 bills were pending before the Committee on Claims of the Senate, while but 3 of said bills were referred to the Court of Claims.

Analysis of the facts stated above shows that for all practical purposes claimants were afforded no relief under or by the provisions of the Tucker Act until 10 years after the passage of the act, and that the only relief afforded was given after 1897, and it is also to be noted that while the total number of bills referred is 2,504, this number includes 555 church, school, and lodge claims, or over one-fifth of the total number.

So far as concerns the general subject of war claims, it is to be borne in mind that a considerable number of the bills which have been referred to the Court of Claims were of classes other than war claims. Of the war claims which have been referred to the court under the Tucker Act, quite a number were claims which had been originally presented to the Southern Claims Commission, or to departments of the Government many years ago, but which had been rejected either for lack of jurisdiction or because presented by mistake in the name of the wrong person, thereby precluding the Court of Claims from reporting the facts of the claims under the provisions of the earlier Bowman Act.

It has been sometimes suggested that a claimant is subject to censure for not having presented his claim to Congress immediately after the passage of the Tucker Act, in 1887, if he had failed for any reason to previously present his claim to the Southern Claims Commission. It has been sometimes suggested that ever since 1887 a remedy has been open to claimants under the Tucker Act, but the figures show that this remedy really existed only in theory until about 1897, 10 years after the passage of that act. Can it be said with any degree of reason that a claimant had a remedy at a time when only 10 bills of 493 were referred to the court? Can it be said that a claimant had a remedy open to him when but 3 of 693 bills were sent to the court? Yet that was the extent of the consideration given to pending bills in the Fiftieth and Fifty-first Congresses, a period of four years after the passage of the Tucker Act, and the table of figures shows that no greater consideration was given during the Fifty-second, Fifty-third, and Fifty-fourth Congresses.

The Tucker Act was so nearly a dead letter during the first 10 years of its existence that claimants were not even reasonably and in fact chargeable with notice of its existence.

After Congress really began making use of this law claimants became apprised of its existence and asked for an opportunity to prove the facts of their claims before the Court of Claims. Many were pending before Congress for years, without any consideration, and it is entirely unfair to take from them any possible chance of securing consideration of their claims. If the claimant has sufficient faith in the righteousness of his claim to be willing to subject it to the rules of proof of the Court of Claims, which has never been charged with any bias in favor of claimants, then the Government should not hesitate to permit the claim to be so proven and judicially examined.

As to claims that were dismissed by the Court of Claims under the Crawford amendment to the war-claims act of March 4, 1915, here is the condition:

Claimants had asked Congress for relief, and private bills were introduced, not with view to direct appropriation for payment of their claims, but in order to have a basis for reference of the claims to the Court of Claims.

Owing to the rules followed by the Committee on Claims of the Senate it often happened that at the end of a session each Senator would be asked to designate not more than two or three, or possibly four, bills for reference to the Court of Claims. No matter how many meritorious claims were pending, only this limited number could be designated for reference.

Ultimately, and in very recent years, however, that rule was not adhered to with the former rigidity, and that fact permitted the reference of a larger number of the pending claims.

The claimants were practically sent by Congress to the Court of Claims to there establish in judicial form and manner the facts of their cases. They did so; they found witnesses by whom to establish the facts. Often at great expense testimony was taken in widely separated parts of the country. The testimony was taken in presence of counsel for both the claimant and the Government. In many such cases the briefs were filed in the Court of Claims. That was all at great expense and labor.

Then, about 1910, the Court of Claims openly stated that it did not invite the further trial of Civil War claims and did not care to devote further time to them until Congress disposed of the claims already tried and reported by the court.

That statement of the position of the Court of Claims naturally deterred claimants from trying their cases, and they marked time, hoping Congress would make an appropriation to pay the claims previously tried and allowed.

Then, when Congress did make that appropriation by the act of March 4, 1915, it incorporated the Crawford amendment, which has resulted not only in the cutting off of new claims, but also in the dismissal of many cases by the Court of Claims, which were all ready for trial, in which the testimony had been taken under the rules of the court at the invitation of Congress.

Certainly, argument would seem unnecessary to show the utter injustice of sending these citizens to the Court of Claims to prove their cases, and then, before they could secure an adjudication, drive them out of court and bar the door after them.

The very least that can be suggested in the way of right and justice would be to restore the jurisdiction of the court to entertain and pass judgment on those claims which were pending in the court at the adoption of the Crawford amendment and thus permit these citizens to conclude the trial of their claims which were then pending.

If citizens are denied justice by their Government, what can the Government expect of its citizens? The sense of an injustice suffered is a feeling which rankles and stays in the heart, and that is so regardless of whether that injustice deprives a citizen of a small sum or of a large one. The Government can not afford to be unjust to its own citizens.

INFORMATION FROM SICK SOLDIERS.

Mr. TOWNSEND. Mr. President, a matter has been called to my attention, and I suppose to that of every Senator, affecting the question of obtaining information from soldiers who are sick in camps and cantonments. The other day I received a letter from a distinguished citizen of Michigan inquiring relative to his son, who was reported to him as being ill at Waco, Tex. The father informed me that it was impossible for him to get official information relative to his son. From a friend of his son he learned that the latter was sick. I took up the matter with the War Department, submitting the letter of Mr. Darnton, and to-day I received a reply which I desire to read. It is as follows:

WAR DEPARTMENT,
Washington, February 6, 1918.

Hon. CHARLES E. TOWNSEND,
United States Senate.

DEAR SIR: In response to your letter of the 2d instant, inclosing a communication (returned herewith) from Mr. Robert Darnton, of Adrian, Mich., who, after making a statement to the effect that from outside sources he has received information that his son, Sergt. F. B. Darnton, Company B, One hundred and twenty-sixth Infantry, is sick in the hospital at Camp MacArthur, Waco, Tex., but not a single word has come from any officer of his company or the Government as to his real condition, or any notification whatever that he is ill, asks if there is anything in the rules and regulations governing the Army that prohibits the Government from giving such information to parents, I am directed by the Secretary of War to advise you that the Army Regulations provide as follows:

"No information will be furnished by any person in the military service which can be made the basis of a claim against the Government, except it be given as the regulations prescribe to the proper officers of the War, Treasury, or Interior Departments or the Department of Justice. Information concerning sick and wounded officers and enlisted men may be freely conveyed to allay the anxiety of friends; and, in time of peace, when, in the opinion of the surgeon, the condition of an officer or enlisted man, by reason of injury or disease, is such as to indicate the probability of fatal termination, the surgeon will report the circumstances to the immediate commander, who will promptly communicate the fact to the nearest relative. The fact of death may be communicated to relatives, but not circumstances connected therewith which could be made use of in prosecuting claims against the Government."

Very respectfully, H. P. MCCAIN, *Adjutant General.*

I give this information, Mr. President, because it occurs to me that there is something in that order which attempts to measure the interest of the parent or the wife in the loved one by dollars; that there is a fear that information may get out in some way which may give the soldier an opportunity, possibly, of obtaining a pension later.

I think that this order is not in keeping with the general sentiment of the American people at this time. I believe that the parents and other loved ones interested in these soldiers, who are making the supreme sacrifice to the Government at this time, should be furnished information, at least upon inquiry, as to the condition of the soldiers, and that it should not be necessary to go through any system of red tape to supply this information, and that there should not be a possibility that this information may be withheld. The order does not contemplate withholding knowledge as to the sickness or death of soldiers on account of injurious effects which communication to the soldier's family would have upon the outcome of the war, but, forsooth, because in conveying the information an officer or comrade of the sick soldier might by stating the fact render the Government subject to a claim for a pension. It seems to me that the fullest possible information should be given the parents as to the health of their sons who are in the Army.

I put this letter in the RECORD because it answers questions which have been put to me, and I presume will answer similar questions which have been submitted to other Senators.

WATERS OF THE COLUMBIA RIVER.

Mr. CHAMBERLAIN. Mr. President, some time ago Senate bill 1484, which was then on the calendar, was indefinitely postponed. It was a bill ratifying the compact and agreement between the States of Oregon and Washington regarding concurrent jurisdiction over the waters of the Columbia River and its tributaries in connection with regulating, protecting, and preserving fish. I ask unanimous consent that the bill may be reinstated on the calendar. I understand that a bill that has been indefinitely postponed may be reinstated on the calendar.

Mr. SMOOT. Only by introducing the bill again and having it pass through the regular course.

Mr. CHAMBERLAIN. I am frank to say that I am not familiar with the parliamentary status of the matter, but I supposed that a bill which had been indefinitely postponed could be taken up and restored to the calendar for final disposition if it should come up again. If I am mistaken about that, I will withdraw the request.

Mr. SMOOT. The indefinite postponement of a bill is a final disposition of the bill at that session of Congress. The only way in which it can be gotten back upon the calendar is to introduce the bill again and let it go through the regular course.

Mr. CHAMBERLAIN. I ask for a ruling of the Chair. If that is the parliamentary status, I have no desire to depart from it.

Mr. FLETCHER. I think it depends on when the action of indefinite postponement was taken.

Mr. CHAMBERLAIN. It was done at the first session of the Sixty-fifth Congress, before we convened in December.

Mr. GALLINGER. Mr. President, it will be observed that in the other House, which is pretty careful to observe parliamentary law, when a bill is passed a motion is always made to reconsider it, and that motion is voted down, and that ends it. The indefinite postponement of a bill absolutely ends the consideration of that bill for the session. There is no question about that under parliamentary law. Of course the Senator can reintroduce it and report it again. I think that is the only way by which it can be done.

Mr. CHAMBERLAIN. I am perfectly willing, in view of the situation before us, to withdraw the request and I shall introduce the bill again.

Mr. MCCUMBER. Mr. President, right on that same question I should like to propound a parliamentary inquiry as to whether an exact bill can be reintroduced in the same session? My understanding is that it can not be done.

Mr. WARREN. But it can be changed.

Mr. MCCUMBER. If it is substantially changed, it would not be the same bill.

Mr. WARREN. There might be a specific change made which would not alter the character of the bill.

Mr. MCCUMBER. It is quite important that we should know just what our rights are. I have desired many times when a bill was defeated to reintroduce it at the same session, and I have always been informed that under the rules it could not be done. I think it is quite important that we should have a definite ruling upon that point.

The PRESIDING OFFICER. It has been ruled by the Vice President that where a bill has been voted upon and defeated the bill could not be reintroduced at the same session in the same terms and under the same title.

Mr. HOLLIS. Mr. President, that ruling was made by the Vice President, I am very sure, on the woman-suffrage amendment. There was no precedent for it. No such ruling has ever been made on a bill that I can find in either House, and I doubt if it is controlling in the consideration of a bill. I shall myself refuse to follow it on the adoption of the amendment. That is the only precedent I can find.

Mr. GALLINGER. At any rate, if I may be permitted a word, if the Senator from Oregon, who is an experienced legislator, finds any difficulty in preparing his bill so that it will not be in the exact terms of the former one I shall be mistaken, even if the ruling, which is somewhat questionable, should stand. We are very much in the habit of changing the phraseology of a measure to suit an emergency; that arises oftentimes on points of order, and I feel sure the Senator from Oregon can easily frame a bill so that it will even escape the ruling that has been cited, to which my colleague very properly calls attention, upon a matter different from an ordinary bill.

Mr. MCCUMBER. I have looked over the rules several times, and I can find nothing in the rules that prohibits the reintroduction of exactly the same bill at the same session. If there is a rule that has escaped my attention, I certainly would be glad to have my attention called to it prohibiting the reintroduction of a bill that has been indefinitely postponed.

The PRESIDING OFFICER. The ruling of the Vice President was with relation to the equal-suffrage amendment, where the measure had been defeated. That is not the status in this case.

Mr. MCCUMBER. In either case it would be a final disposition of the bill, and therefore it would seem to me as if the same rule would apply; but the point I want to get at is not what the Vice President may have ruled, but what standing rule of the Senate prohibits the reintroduction of exactly the same bill at the same session and its consideration.

Mr. GALLINGER. If I may be permitted an additional word, I will suggest that we are discussing a moot question. Let the Senator present his bill, and then the question might well be raised whether it shall be received or not.

Mr. CHAMBERLAIN. I withdraw my request, and I shall reintroduce the bill. My only reason for asking to have it rein-

stated to the calendar was to save time and expense. It is a bill local in nature and there is no particular hurry about it.

The PRESIDING OFFICER. The Senator from Oregon withdraws his request.

Mr. FLETCHER. Mr. President, on that point I will say to the Senator from New Hampshire that the precedent is laid down in Gilfry's Precedents, page 221, where a motion was made to take up a bill which had been indefinitely postponed at the previous session, and it was held by the Senate to be in order. The question was left to the Senate and it was held to be in order by the Senate.

Mr. GALLINGER. If the bill had been indefinitely postponed, how could it be taken up? It did not exist. That was a most extraordinary ruling, whoever made it.

Mr. FLETCHER. In Gilfry's Precedents it is given as follows:

JANUARY 28, 1869.

* * * * * * *

The President stated that the bill proposed to be taken up, having been postponed indefinitely by a vote of the Senate on the 25th of July last, at the last session, and returned to the House of Representatives, in which it originated, with the action of the Senate thereon, which he believed, by the uniform practice of the Senate, was regarded as a rejection of the bill, and that the bill, not now in the possession of the Senate, the motion to take it up did not appear to him to be in order, and that the effect of the indefinite postponement of the bill being involved in the question of order, he would prefer to have it decided by the Senate, and therefore submitted the question of order to the Senate: "Is the motion to take up a bill which has been indefinitely postponed by a vote of the Senate at a previous session of Congress in order?"

After a somewhat lengthy discussion the Senate decided, by a vote of 27 yeas to 18 nays, that the motion of Mr. Morton was in order. (See Cong. Globe, pp. 568, 569, 570, 590–593, 623–625, 665–667.)

Mr. SMOOT. That had been done at a previous session. It was not at the same session of Congress.

Mr. FLETCHER. That would only make the case stronger.

Mr. WARREN. It was also a House bill, as I understood the Senator.

Mr. SMOOT. It was a bill that came over from the House.

Mr. FLETCHER. I merely referred to it to show what the Senate has done.

Mr. HITCHCOCK. Mr. President——

The PRESIDING OFFICER. The Chair recognizes the right of the Senator from Oregon to withdraw his request. There is nothing before the Senate.

Mr. HITCHCOCK. If there is no further business, I was going to move that the Senate adjourn. I make that motion.

The motion was agreed to; and (at 2 o'clock and 7 minutes p. m.) the Senate adjourned until to-morrow, Friday, February 8, 1918, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

THURSDAY, *February 7, 1918.*

The House met at 12 o'clock noon.

The Rev. William Couden, of Washington, D. C., offered the following prayer:

Almighty Father, strong to save, be with all who ride in peril on the sea. Guard our ships and transports and enable us to overcome the threatening dangers of the elements and of our military enemy. Comfort those who are in anxiety and sorrow. Increase our determination for the right and our bravery to endure, to dare, and to do.

Of old Thou didst encourage the saints with unusual evidences of Thine approval. We are far from laying claim to be saints, dear Lord. Yet we sincerely and humbly believe that in our stand for justice and humanity we are supporting a cause that is precious to Thee. Give unto us, therefore, courage and cheer and tokens of Thine approval and signs of sure victory. We ask this in the name of Jesus Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

ADDITIONAL MESSENGER, HOUSE POST OFFICE (H. REPT. NO. 290).

Mr. PARK. Mr. Speaker, I present a privileged resolution.

The Clerk read as follows:

House resolution 240.

Resolved, That the Postmaster of the House be, and he is hereby, authorized to employ an additional messenger in the House post office, who shall be paid out of the contingent fund of the House at the rate of $100 per month during the remainder of the second session of the Sixty-fifth Congress.

Mr. PARK. Mr. Speaker, this is the same resolution introduced about 10 days ago, but was withdrawn at the request of the Committee on Appropriations, and amended according to their request.

Mr. WALSH. Will the gentleman yield?

Mr. PARK. Yes.

Mr. WALSH. Will the gentleman state the necessity for this additional messenger?

Mr. PARK. I can only state that the Postmaster said that he is necessary for the business of the office. The Postmaster appeared before the committee and made a complete statement, and the committee unanimously reported the resolution.

Mr. WALSH. It is the hope that the employment of this extra messenger will give us a more prompt delivery of mail matter and obviate the delays that have heretofore occurred?

Mr. PARK. It will have a tendency to do that.

Mr. WALSH. In what way?

Mr. PARK. By giving more help.

Mr. DOWELL. What position will this messenger occupy?

Mr. PARK. An assistant at the stamp and registry window, I understand.

Mr. STAFFORD. Will the gentleman yield?

Mr. PARK. Yes.

Mr. STAFFORD. This resolution, as I take it, is in lieu of the resolution that the Committee on Accounts reported providing for an additional register and stamp clerk, who was to receive a salary of $1,500?

Mr. PARK. Yes.

Mr. STAFFORD. I may say in the consideration of the legislative, executive, and judicial appropriation bill the subcommittee had occasion to call upon the Postmaster of the House, and it was agreed that this official should be appointed as a messenger rather than assistant to the clerk at the window for the sale of stamps and looking after registered matter. This is a substitute in lieu of the former resolution.

Mr. DOWELL. Does this in any manner relieve others of the work they are to do?

Mr. STAFFORD. No; it simply provides an additional clerk. The Postmaster stated that at times during the day there was such a large demand for stamps and registering matter and business connected with the parcel post that it was necessary to have two clerks at the window rather than one, and, while it was his desire to have an additional clerk at $1,500, it was the judgment of the committee that it could be done by a clerk at $100 a month.

Mr. DOWELL. And this messenger is to act in that capacity?

Mr. STAFFORD. It is proposed that he will act in that capacity.

The SPEAKER. The question is on the resolution.

The question was taken, and the resolution was agreed to.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, its enrolling clerk, announced that the Senate had passed with amendments bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 6361. An act to extend protection to the civil rights of members of the Military and Naval Establishments of the United States engaged in the present war.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 3317. An act providing for the removal of snow and ice from the paved sidewalks of the District of Columbia; and

S. 1735. An act to create an additional judge in the southern district of Florida.

ADAH B. SAUER (H. REPT. NO. 292).

Mr. PARK. Mr. Speaker, I present another privileged resolution.

The Clerk read as follows:

House resolution 238.

Resolved, That the Clerk be, and he is hereby, authorized to pay, out of the contingent fund of the House, to Adah B. Sauer, widow of Charles L. Sauer, late an employee on the roll of the House, a sum equal to six months' compensation as a messenger on the soldiers' roll, and an additional amount, not exceeding $250, to defray the funeral expenses of said Charles L. Sauer.

The SPEAKER. The question is on the resolution.

The question was taken, and the resolution was agreed to.

SENATE BILLS REFERRED.

Under clause 2, Rule XXIV, Senate bills and joint resolutions were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 2180. An act to approve mutual cessions of territory by the States of Wisconsin and Minnesota and the consequent changes in the boundary line between said States; to the Committee on the Judiciary.

S. 1004. An act to provide for a retirement system in the Lighthouse Service; to the Committee on Interstate and Foreign Commerce.

S. 1005. An act to regulate the salaries of keepers of lighthouses; to the Committee on Interstate and Foreign Commerce.

S. 993. An act to authorize aids to navigation and for other works in the Lighthouse Service, and for other purposes; to the Committee on Interstate and Foreign Commerce.

S. 932. An act to provide for stock-watering privileges on certain unallotted lands on the Flathead Indian Reservation, Mont.; to the Committee on the Public Lands.

S. 934. An act authorizing the State of Montana to select other lands in lieu of lands in section 16, township 2 north, range 30 east, within the limits of the Huntley irrigation project and the ceded portion of Crow Indian Reservation, in said State; to the Committee on the Public Lands.

S. 936. An act to authorize the Secretary of the Treasury to convey to the city of Bozeman, Mont., certain land for alley purposes; to the Committee on the Public Lands.

S. 937. An act to amend an act entitled "An act to amend sections 2291 and 2297 of the Revised Statutes of the United States relating to homesteads"; to the Committee on the Public Lands.

S. 955. An act providing for noncontiguous homestead entries within the former Fort Peck Indian Reservation, Mont., of land of the character described in the enlarged homestead act of February 19, 1909; to the Committee on the Public Lands.

S. 44. An act granting additional rights to settlers on reclamation projects; to the Committee on the Public Lands.

S. 26. An act authorizing the cutting of timber for mining purposes by corporations organized in one State and conducting mining operations in another; to the Committee on the Public Lands.

S. 1555. An act to repeal the last proviso of section 4 of an act to establish the Rocky Mountain National Park, in the State of Colorado, and for other purposes, approved January 26, 1915; to the Committee on the Public Lands.

S. 95. An act to provide for agricultural entries on coal lands in Alaska; to the Committee on the Public Lands.

S. 102. An act relating to the temporary filling of vacancies occurring in the offices of register and receiver of district land offices; to the Committee on the Public Lands.

S. 352. An act granting pensions to certain members of the former Life-Saving Service; to the Committee on Interstate and Foreign Commerce.

S. 994. An act extending the benefits of care and treatment by the Public Health Service to seamen on vessels used in the service of the United States; to the Committee on Interstate and Foreign Commerce.

S. 1462. An act to establish a fog signal at the Port Washington Pierhead Light Station, Wis.; to the Committee on Interstate and Foreign Commerce.

S. 1463. An act to establish aids to navigation at Fond du Lac Harbor, Wis.; to the Committee on Interstate and Foreign Commerce.

S. 1849. An act permitting minors of the age of 18 years or over to make homestead entry of the public lands of the United States; to the Committee on the Public Lands.

S. 940. An act to provide for the payment for certain lands within the former Flathead Indian Reservation in the State of Montana; to the Committee on the Public Lands.

S. 1084. An act for the relief of J. G. Seupelt; to the Committee on the Public Lands.

S. 2886. An act for the relief of Albert O. Brown; to the Committee on Public Lands.

S. 2487. An act permitting Frances Mack Mann to purchase certain public lands; to the Committee on the Public Lands.

S. 3470. An act to amend section 35 of the Criminal Code of the United States; to the Committee on Military Affairs.

S. 3471. An act to authorize the Secretary of War to grant furloughs without pay and allowances to enlisted men of the Army of the United States; to the Committee on Military Affairs.

S. 3472. An act to authorize the Secretary of War to provide and issue distinctive buttons or badges to men drafted or volunteering for enlistment in the military forces who are exempted or rejected, and to provide a penalty for unlawfully wearing, procuring, or manufacturing the same; to the Committee on Military Affairs.

S. 3526. An act to amend section 11 of an act entitled "An act for making further and more effectual provision for the national defense, and for other purposes," approved June 3, 1916; to the Committee on Military Affairs.

S. 935. An act for the relief of settlers on certain railroad lands in Montana; to the Committee on the Public Lands.

S. 302. An act authorizing the Secretary of the Navy to make donation of condemned naval guns and cannon balls to the John Wanneho Camp, No. 9, United Spanish War Veterans, Everett, Wash., to be placed in public parks; to the Committee on Naval Affairs.

S. 3446. An act to amend an act entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1918, and for other purposes," approved March 4, 1917; to the Committee on Naval Affairs.

S. 179. An act for the relief of Fred C. Konrad; to the Committee on Naval Affairs.

S. 2784. An act to authorize the purchase by the city of McMinnville, Oreg., of certain lands formerly embraced in the grant to the Oregon & California Railroad Co. and revested in the United States by the act approved June 9, 1916; to the Committee on the Public Lands.

S. 3225. An act to reserve as a part of the Oregon National Forest certain lands that were revested in the United States pursuant to the decision of the Supreme Court of the United States in the case of the Oregon & California Railroad Co. against the United States; to the Committee on the Public Lands.

S. 2315. An act to extend the time within which final proof is required to be submitted upon any lawful pending desert-land entry made prior to July 1, 1915, such extension not to exceed three years from the date of allowance thereof; to the Committee on the Public Lands.

S. 97. An act authorizing the exchange of certain lands in the State of Utah for the protection of the water supply of Salt Lake City; to the Committee on the Public Lands.

S. 94. An act to amend section 3 of an act entitled "An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1902, and for other purposes," approved March 3, 1901 (31 Stat. L., p. 1133); to the Committee on the Public Lands.

S. 2931. An act for the relief of Thomas Sevy; to the Committee on the Public Lands.

S. 972. An act to authorize an exchange of lands with Henry Blackburn; to the Committee on the Public Lands.

S. 388. An act for the relief of Alfred Cluff, Orson Cluff, Henry E. Norton, William B. Ballard, Elijah Hancock, Mrs. Susan R. Saline, Oscar Mann, Celia Thayne, William E. Cox, Theodore Farley, Adelaide Laxton, Clara L. Tenney, George M. Adams, Charlotte Jensen, Sophia Huff, Peter H. McBride, David Edward Adams, Mrs. M. J. Ellsworth, and the heirs of J. H. Frisby; to the Committee on Claims.

S. 101. An act to authorize the consolidation of Government lands and of privately owned lands, and for other purposes; to the Committee on the Public Lands.

S. 3128. An act to amend section 1422 of the Revised Statutes authorizing additional pay for enlisted men of the Navy, and Marine Corps, detained beyond the expiration of their terms of enlistment; to the Committee on Naval Affairs.

S. 714. An act providing for an additional judge for the district of Arizona; to the Committee on the Judiciary.

S. 922. An act for the relief of Orion Mathews; to the Committee on Military Affairs.

S. 3403. An act for the relief of Paymaster Alvin Hovey-King, United States Navy; to the Committee on Claims.

S. 92. An act to authorize the Secretary of the Interior to issue patent for certain lands in the State of Utah to E. D. Partridge; to the Committee on the Public Lands.

S. 387. An act for the relief of John Flanigan; to the Committee on Claims.

S. 2865. An act for the suspension of payments on public lands by entrymen in the military or naval service of the United States; to the Committee on the Public Lands.

S. J. Res. 24. Joint resolution to permit of the disposition of certain lands in Montana ceded by the Crow Indians; to the Committee on the Public Lands.

S. J. Res. 104. Joint resolution authorizing the assistant to the Secretary of the Interior to sign official papers and documents; to the Committee on the Public Lands.

EUGENE J. HOLLAND (H. REPT. NO. 291).

Mr. PARK. Mr. Speaker, I present another privileged resolution.

The resolution was read, as follows:

House resolution 177.

Resolved, That the Clerk of the House of Representatives be, and he is hereby, authorized and directed to pay, out of the contingent fund of the House, to Eugene J. Holland, clerk to Charles Martin, a Representative from the State of Illinois at the time of his death, October 29, 1917, the sum of $166.66, being an amount equal to one month's salary of a clerk of a Representative in Congress.

The SPEAKER. The question is on the passage of the resolution.

The resolution was agreed to.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. FLOOD. Mr. Speaker, before moving to go into Committee of the Whole House on the state of the Union for the further consideration of the Diplomatic and Consular appropriation bill, I desire to submit a request for unanimous consent. The day before yesterday, when we adjourned, it was agreed that the general debate on the bill should continue for 2 hours and 10 minutes, 20 minutes of that time to be controlled by myself and 1 hour and 50 minutes by the gentleman from Wisconsin, Mr. COOPER. Since that time both of us have had requests for additional time. I ask unanimous consent that that unanimous-consent order be set aside and that the time for general debate be set at 5 hours; 2 hours and 50 minutes of that time to be controlled by the gentleman from Wisconsin and 2 hours and 10 minutes by myself.

The SPEAKER. The gentleman from Virginia asks unanimous consent that the time for general debate upon the diplomatic and consular appropriation bill be extended so as to make it 5 hours, 2 hours and 50 minutes to be controlled by the gentleman from Wisconsin and 2 hours and 10 minutes to be controlled by himself. Is there objection?

Mr. COOPER of Wisconsin. Mr. Speaker, that, of course, is exclusive of the time granted to the gentleman from Connecticut, Mr. TILSON.

The SPEAKER. Certainly; that has nothing in the world to do with it. Is there objection?

There was no objection, and it was so ordered.

THE OLD SOLDIER.

Mr. WALSH. Mr. Speaker, I ask unanimous consent that the gentleman from Ohio, Gen. SHERWOOD, may be permitted to extend his remarks in the RECORD by inserting therein two communications, one from the William McKinley Post, Grand Army of the Republic, of Canton, Ohio, and the other from the General Canby Post, at Hood River, Oreg. When Gen. SHERWOOD yesterday made the request to extend these in the RECORD I objected. Since that time I have found that the communications are of an exceptional order, and I do not think objection should be made to them.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent that the gentleman from Ohio, Mr. SHERWOOD, may be permitted to extend his remarks in the RECORD in accordance with his request made yesterday. Is there objection?

There was no objection.

The communications referred to are as follows:

WILLIAM MCKINLEY POST, No. 25, G. A. R.,
Canton, Ohio, February 2, 1918.

Hon. ISAAC R. SHERWOOD, M. C.,
Washington, D. C.

DEAR SIR AND COMRADE: William McKinley Post, No. 25, of which you were a member once, have been watching your conduct in and out of the Halls of Congress to bring a greater measure of relief to the old veterans who are striving to maintain homes of their own during these days of high cost of living. We have your remarks in the CONGRESSIONAL RECORD about the soldiers' homes and those who are compelled to go there and those who have been and are receiving benefits of these homes who have property, money, and even farms outside, besides their pension, to live upon. We commend your remarks along these lines and the fight that you are so gallantly making for the amelioration of the old "boys," who are now feeble and in ill health. Permit us to thank you on behalf of William McKinley Post, No. 25, Grand Army.

Yours in F. C. L.,

WILLIAM W. PUMPHREY,
HENRY R. PACKER,
CHAS. T. OLDFIELD,
Committee.
ALFRED GARNER,
Commander.

HOOD RIVER, OREG., *December 23, 1917.*

Gen. SHERWOOD,
House of Representatives, Washington, D. C.

DEAR SIR: Through the courtesy of the Representative from this district, Hon. N. J. SINNOTT, your bill (H. R. 6883) was received and read at the regular meeting of Canby Post, Grand Army of the Republic, yesterday.

The bill amending the pension law of May 11, 1912, meets with the hearty approval of the comrades of the post. We have many old and feeble comrades in this department who need help, and to whom the amendment, if it becomes law, will prove a blessing.

As adjutant of the post I was instructed to write both you and Mr. SINNOTT and tender the thanks of Canby Post for the deep interest both of you have always taken in the welfare of old soldiers.

Pardon me for not writing your initials. The name of Gen. SHERWOOD is known to every Union soldier living, but, like myself, probably not one in a thousand could call your initials.

Thanking you personally, I am,
Yours, truly,
SAMUEL F. BLYTHE,
Adjutant Canby Post, No. 16.

TORPEDOES.

The SPEAKER. The gentleman from Connecticut [Mr. TILSON] is recognized for 40 minutes.

Mr. TILSON. Mr. Speaker, the story is told of an old professor of Greek who had spent his long life in a somewhat thorough study of the dative case in the Greek language. When he came down to die and reflected upon the work of his life he expressed the one regret that he had scattered his efforts too much by not confining himself to the dative of cause. For a long time I have given considerable study to the subject of war munitions. For the most part my efforts have been directed toward the arms and ammunition used by our land forces. It might have been wiser had I continued to confine my labors to that rather ample field. However, the subject of my remarks to-day is so closely related to my pet subject that I may be excused for venturing to enter upon it. The awful disaster to the *Tuscania* yesterday makes it timely.

I purpose to talk to you on the torpedo. I shall not attempt to consider its tactical use or its place in the naval program, for I am not a naval man and do not feel competent to discuss the subject from that angle. I shall treat it as ordnance—a weapon, a projectile. The fact that water is the medium through which it is directed on its deadly mission is only incidental so far as my purpose in concerned.

For many months after the outbreak of the present war in Europe the world was flooded with a stream of publications called Red Books, White Books, Blue Books, Yellow Books, Orange Books, Gray Books, all sorts of books telling the causes of the war and trying to locate the blame for it. After reading all of these different books different people came to different conclusions. When the United States entered the war, we issued a Red, White, and Blue Book telling "Why America is in the war." There may be those so impervious to truth that even our book may not be accepted as conclusive. However, in my opinion, the cause of our being in the war now lies here in front of the Speaker's desk.

DESCRIPTION OF TORPEDO.

This is the afterbody, with engine and steering gear of a full life-size torpedo, though it is not alive, I assure you. The use of this death-dealing machine in a manner contrary to international law and in contravention of the long-established usage of civilized nations forced us into the war. By the courtesy of Admiral Earle, and by the help of Lieut. Commander Hoover at the navy yard here in Washington, this torpedo is here for the inspection and information of the membership of this House. I shall attempt to explain it briefly, though in large measure it explains itself.

This particular type of torpedo is 45 centimeters in diameter and 5.2 meters long. There has been a wise and well-directed effort to standardize torpedoes, especially as to diameter, so that they have been reduced to practically two sizes, 45 centimeters (a little less than 18 inches) and 21 inches. You will see how important this is when you consider the torpedo tubes and other launching problems. The largest torpedo now made is 21 inches in diameter and 21 feet long. These figures are easily remembered.

The head of this weapon, called the war head, is here [indicating]. It is filled with about 250 pounds of guncotton, T. N. T., or some other fiendish explosive. By far the greatest weight and length are here in the air flask [indicating]. It is a forging made of a very high grade of nickel steel, and costs in the rough-turned forging, without any finishing work, about 47 cents a pound. The forging for the largest type weighs about 3,300 pounds. The flask contains air under very high pressure, which, when heated, is the propelling force of the torpedo.

Here is the bulkhead [indicating] between the air flask and the afterbody, and to it are attached the engine and heating device.

This is the engine [indicating], and it is one of the finest pieces of mechanism made. It weighs about 100 pounds and develops about 150 horsepower.

This is the afterbody [indicating] and here inside of it is the gyro steering gear. Through the afterbody runs the shaft, or the two shafts, one running inside of the other.

Last of all come the two propellers [indicating] arranged tandem, but they are not twins, and they revolve in opposite directions. The slight difference between the two is made necessary by the different character of the water in which they work.

Mr. MOORE of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. TILSON. I yield for a question.

Mr. MOORE of Pennsylvania. Why are those propellers moved in opposite directions?

Mr. TILSON. In order to stabilize the torpedo. If you had but one propeller the reaction from the working of it would roll the torpedo over.

I have here a photograph of the launching tubes used on our destroyers. It was not practical to secure a photograph of the launching tube used in battleships and cruisers. I did have made a very fine photograph of the torpedo tubes used on submarines.

It was so fine, in fact, that the Navy censor declined to allow me to use it.

The single torpedo tube is used in the larger ships. It is below the water line, under the protection of the armor plate, and in the side of the ship.

Destroyers are practically the only boats that now use overwater tubes. It is too dangerous on the capital ships to have the torpedo exposed in this way, as I shall explain more fully in another connection.

I am very much disappointed in not having a picture of the torpedo tubes used on the submarines, but, as I have just explained, my photograph brought out every detail, so that the Navy censor was unwilling for me to make it public. There is a nest of four tubes built into the bow of the submarine, pointed in the same direction that the submarine is pointed, so that there are four torpedoes ready at all times to discharge.

Mr. HAMLIN. Will the gentleman yield right there?

Mr. TILSON. Yes.

Mr. HAMLIN. When a torpedo is projected from the tube, is it not the momentum with which it travels that holds it on a level course at a certain depth under the water or on top of the water? In other words, when it ceases traveling it would sink, and is it not the momentum that holds it up, or is there some mechanism that holds it on a level?

Mr. TILSON. There is a depth rudder, just the same as the rudder of any boat, except that it is horizontal instead of vertical.

Mr. HAMLIN. That is on the rear end of it?

Mr. TILSON. Yes. There is one horizontal rudder and one vertical rudder.

Mr. HAMLIN. What holds up the front end? Is it not the speed at which it travels? It is the momentum that keeps it on a level, is it not, or is it that air flask?

Mr. TILSON. The air flask helps to balance the torpedo in the water; but, as a matter of fact, it is so made as to sink when it stops.

Mr. HAMLIN. That was my understanding, and that it was the momentum of the torpedo that kept it going on the straight line.

Mr. TILSON. I do not so understand it.

Mr. HAMLIN. Then what keeps it from sinking before it stops if it is not the momentum that holds it on its level course?

Mr. TILSON. It is because it is balanced. It will lie like a log in the water.

Mr. HICKS. I rather think that torpedo will float at all times.

Mr. TILSON. It will, normally.

Mr. HICKS. I thought the gentleman said it would sink.

Mr. TILSON. It is made to sink. A war torpedo is made so that when it stops running it will sink.

Mr. HICKS. I beg to differ with the gentleman——

Mr. TILSON. There is a sinking valve for that purpose. If it floated on the surface after it stopped, it would be dangerous to all comers. It is so arranged that when the torpedo stops its sinking valve automatically opens and allows it to sink.

Mr. HICKS. I did not understand about the valve. The way the torpedo is constructed, it will float unless there is some device to make it sink?

Mr. TILSON. Oh, certainly.

Mr. HICKS. That is the point.

Mr. TILSON. Undoubtedly.

Mr. NEELY. Will the gentleman yield?

Mr. TILSON. Yes.

Mr. NEELY. What is the motive power that turns that propeller?

Mr. TILSON. It is the compressed air in this air flask, heated to a high temperature, with water injected into it to form steam; superheated air, with the injection of water. The air flask contains the motive power to run this engine [indicating].

Mr. KNUTSON. When is the air put into the air flask, and when is it heated?

Mr. TILSON. The air is put into the air flask in advance, and it is not heated until after it starts on its journey, as I will show presently, or I can show it now, for that matter. When the torpedo is projected out of the launching tube by the force behind it, either black powder or compressed air, it enters the water. In sliding out of the tube this lever is tripped by striking against a projection on the launching tube. That sets the engine inside going, the heating device is lighted up to heat the air, and the air, which is under great pressure, is forced from the air flask through the engine. That is the way it works.

Mr. HAMLIN. How deep under the surface of the water can these torpedoes be projected from the submarine?

Mr. TILSON. They can be projected at practically any depth. Naturally they are set to aim at the most vital part of the ship, and the depth is determined somewhat by the size of the vessel at which the torpedo is aimed.

Mr. HAMLIN. Then, a submarine can fire these torpedoes even though submerged? It does not have to come to the top to fire them?

Mr. TILSON. Oh, no; not at all. It does not matter how deep it is when it fires the torpedo or how near the surface, because this rudder [indicating], controlled by the pressure diaphragm, will soon bring the torpedo up to the proper level or down to the proper level, as the case may be. It is determined by the depth for which it is set originally.

Mr. STEPHENS of Nebraska. How is it aimed under water?

Mr. TILSON. It is aimed by the aid of the periscope. The boat itself is aimed, because, as I have described to you, this nest of torpedo tubes is built right into and is part of the boat.

Mr. PARKER of New Jersey. Will the gentleman permit me to ask what keeps the torpedo upright and prevents it from getting on one side so that the wrong rudder comes into play?

Mr. TILSON. Gravity, in the first place.

Mr. PARKER of New Jersey. Is there more weight on one side than the other so as to keep it upright?

Mr. TILSON. Yes.

Mr. PARKER of New Jersey. I mean is there more weight on the bottom so as to keep it upright?

Mr. TILSON. Oh, yes; it balances the torpedo in a right-side-up position.

Mr. POU. Will the gentleman yield for a question?

Mr. TILSON. Yes.

Mr. POU. Would the gentleman prefer to complete his statement and then answer questions?

Mr. TILSON. Thanking the gentleman, I should like to proceed with the history of the development of the torpedo for a few minutes. I promise to be brief, and then I will submit to any questions which gentlemen may wish to ask me.

HISTORY OF DEVELOPMENT.

The development of the torpedo is a very interesting story, to which I shall refer briefly, but only to the comparatively recent part of it. In 1890 the Secretary of the Navy entered into a contract with John Whitehead & Co., of Fiume, Austria, under the terms of which that firm agreed to assign the Whitehead torpedo rights for the United States, on a royalty basis, to such firm or corporation in the United States as the Secretary of the Navy might select. The E. W. Bliss Co., of Brooklyn, N. Y., having agreed to equip a plant suitable for making the torpedo, was designated by the Secretary and acquired the rights accordingly. Lieut. T. C. McLean, on behalf of the Navy Department, and Mr. Frank M. Leavitt, representing the Bliss Co. proceeded to Fiume for the purpose of studying the weapon and its mode of manufacture.

WHITEHEAD TORPEDO.

The Whitehead torpedo of that day was a cigar-shaped affair carrying an explosive charge of guncotton in its head, which charge was exploded by contact with the target. It was propelled through the water by means of a three-cylinder engine known as the "Brotherhood" type. The motive power was compressed air carried in a strong steel storage flask occupying the middle body of the torpedo and extending about half its length. The driving engine was located in the afterbody and connected directly to the propeller shaft with two propellers arranged tandem, as in this one. One of the propellers was made to revolve in the opposite direction from the other by means of a system of gearing located in the tail of the torpedo. The reason for this arrangement is that if one propeller is used the reaction of the driving shaft will roll the torpedo over in the opposite direction. By having a second propeller turning the other way these forces are balanced.

The propeller shaft was made hollow and the exhaust air from the engine passed through it and clear of the torpedo abaft the propellers. A pair of horizontal rudders steered the torpedo down to the proper depth and kept it there throughout its flight.

The main driving engine was placed in a compartment of the afterbody, which was open to the sea, so that in operation the engine was submerged in water. This arrangement was made necessary by the fact that air in expanding through an engine has the property of losing heat, so that the engine in a short time would be frozen solid. The sea water supplied the necessary heat.

EARLY STEERING GEAR.

There was at that time no adequate means for directing the torpedo in a straight course. Two small rudders attached to the tail counteracted any marked tendency of the torpedo to deviate from the line, and the best position for these rudders

had to be established by a series of trial runs. This crude method would not have availed except for the fact that the effective range was not more than 800 yards.

In those early days the submarine had not been developed, nor had the submerged launching tube such as is now used upon battle ships and cruisers. The torpedo was launched from an overwater tube of practically the same type as that shown in this photograph. The launching tube may be described as a steel or bronze tube, having a rear door, mounted upon a swivel base, so that it may be trained upon the target. It somewhat resembles a breech-loading gun, though of course much lighter. The torpedo is placed within the tube and ejected by a light charge of powder or by compressed air. The powder charge is generally used in overwater tubes and compressed air in submerged tubes for obvious reasons. In order to start the engine of the torpedo a lever which operates the throttle valve extends through the shell of the afterbody, and as the torpedo moves out of the tube this lever strikes against a projection in the tube which opens the valve. The torpedo enters the water with its engine going and proceeds under its own power. Its horizontal rudders steer it down to the depth for which it is set to run and hold it at that depth until the engine stops at the end of the range. When headway is lost so that the rudders can no longer have control, the torpedo floats on the surface and can be removed.

SINKING VALVE.

In practicing with the weapon in time of peace there is of course no explosive charge used. Its place is taken by an equal weight of water. In a war shot, carrying the guncotton charge, should the torpedo miss its mark and not be exploded it would be a serious menace to friend as well as foe. A sinking valve is therefore provided, used only in an actual war shot, by means of which at the end of the run the torpedo is sunk.

The Whitehead torpedoes first introduced into the United States Navy had a length of about 11 feet and a diameter about the same as our present smaller type. It carried an explosive charge of 80 pounds and had an effective range of 800 yards at a speed of 26 knots. It was soon superseded by a larger type containing an explosive charge of 120 pounds with a speed of about 2 knots more at the same range.

During the years 1891 and 1892 the Bliss Co. equipped its plant and constructed 100 of these torpedoes, which were delivered to the Navy Department in 1893. The plant had a capacity of 100 torpedoes per year, this being the department's idea of the requirements of the Navy.

At that time expert naval opinion was very much divided in regard to the utility of the torpedo as a weapon of war. Perhaps a majority of naval men considered it little better than a pretty toy. The consequence of this widely prevailing sentiment was that the enterprise languished, and instead of the orders coming in for 100 a year, for which the company was equipped, they came in a desultory way; some years none at all.

The earlier cruisers in the service were equipped with overwater tubes, but these were discarded because the tactical value of the torpedo was not considered sufficient to equal the risk of disaster to the ship arising from a chance shot striking and exploding the air flask of a charged torpedo. The field of operation of the weapon became, therefore, restricted to the torpedo boats.

The combined result of all these adverse conditions would have relegated this weapon to the limbo of foregotten things had it not been for the introduction of three new factors which revived its spark of life. These were the submarine boat, the underwater launching tube, which enabled the torpedo to be kept below the water line under the protection of the armor plate and to be launched below water through the ship's side, and finally a new type of torpedo having a far greater range and efficiency.

OBRY GEAR.

While there had been no material advance in range during this period a decided improvement had been made by the introduction of a device for controlling the direction of the torpedo and insuring its traveling on a straight course. The "Obry gear," named for its inventor, an Austrian naval officer, consisted in the application of the gyroscope for the purpose of steering. In fact the gyroscope has made possible the present-day torpedo.

THE GYROSCOPE.

Mr. Leavitt, to whom I have already referred and upon whom I have drawn most freely for what I have been stating, says that the principle of the gyroscope seems intricate and mysterious to the lay mind, to which I fully agree. He also says that in reality, at least in so far as it is utilized in the torpedo, it is quite simple and easily understood. He admits that in its practical application there is much complex detail, which an examination of my exhibits here will prove. He insists that the general principle of the gyroscope is simple, so I shall insert here his explanation of it. "If a solid mass like a flywheel is revolved at high speed in any given plane of rotation, it will continue to revolve in that plane unless some outside force acts to deflect it. This seems to be a self-evident proposition, but it is the whole thing in a nutshell. If, therefore, we mount a flywheel in gimble rings within the torpedo in such a manner that it is absolutely free to turn in any direction and then spin it up to a high speed like a top, the torpedo may be turned in any direction, but the flywheel will remain in the same position as that in which it was spun up. It is exactly similar in this respect to the compass needle. The ship may be turned in any direction, but the needle still points to the north. Similarly, if our flywheel is spun up with its axis pointed toward the target it will continue to so point without regard to the direction which may be taken subsequently by the torpedo."

GYRO CONTROL.

Assuming the explanation of the principle to be thoroughly understood, he explains the application of the gyroscope to the steering mechanism as follows: "If the revolving flywheel is connected with the valve of the steering engine in such a manner that should the torpedo leave the original line in which it was aimed, thus changing its position in relation to the fixed position of the flywheel, a rudder is operated to cause the torpedo to turn in the opposite direction, it must needs travel in the direction in which the axis of the flywheel points."

The most important elements of the Obry gear may be described briefly under five heads. First, a flywheel mounted in gimble rings, very similar to the toy gyroscope sold on the street. Second, a mechanism for locking and holding it with its axis in the axis of the torpedo while it is being spun up. The torpedo being aimed at the target, the axis of the flywheel will be pointed in the same direction. Third, a mechanism which, at the instant the torpedo starts in the launching tube, spins the flywheel up to a high speed. Fourth, a mechanism which, after the flywheel has been spun up and before the torpedo is clear of the launching tube, withdraws the locking device, thus permitting the torpedo to turn in any direction without affecting the position of the flywheel which continues with its axis pointing toward the target. Fifth, a steering engine controlling the rudder and itself controlled by the position of the torpedo in relation to the position of the flywheel.

The Obry gear worked wonders for accuracy in direction and control, but added nothing to the range of the torpedo. In 1897 Mr. Leavitt began consideration of the subject of increasing the range and speed of the torpedo by heating the compressed-air charge. It was a well-known fact of physics that the ability of air to do work could be increased by the application of heat.

I do not know that the hot-air proposition would apply in the same way to our discussions here in the House, but it is so with the torpedo. [Laughter.]

Up to that time no means had been devised by which it could be practically accomplished in the torpedo. Other improvements were proposed, such as substituting the Curtis marine turbine engine for the old type of piston engine and a new design of gyro steering gear eliminating certain admitted defects of the Obry gear and better adapted for the longer range contemplated.

BLISS-LEAVITT TORPEDO.

Thus began the final stage of the evolution of the present Bliss-Leavitt torpedo now used by our Navy. Years elapsed before ideas and ideals became accomplished facts. Many minds, including naval officers and others, contributed to the final product. In my judgment, however, the highest credit of all is due to Mr. Leavitt and to the officers of the E. W. Bliss Co., who through evil as well as good report, through discouragement and threatened loss, persisted until success crowned their efforts.

Mr. WINGO. If the gentleman will permit in that connection, will the gentleman explain the principle of the mechanism by which they make what is called a curved shot? Take some vessels that have two tubes and they want to fire one torpedo at a ship over here and another torepdo at a ship over there and they have to set it at a given degree. Will the gentleman explain that?

Mr. TILSON. Yes; I shall be glad to explain it at this point in response to the very courteous request of the gentleman from Arkansas.

The first of the new torpedoes completed in 1899 contained an additional feature known as wide-angle fire. This arrangement enables one to shoot around the corner, as it were. The object is to enable the torpedo to be launched in a given direction, and upon its entering the water cause it to turn and run in any other desired direction. The value of this feature lies in the fact that the modern submerged tube can not be trained upon the

target, but is a fixture built into the ship under the water line. Consequently without the angle device, in order to bring the torpedo to bear on the target, it is necessary to maneuver the ship. With it the ship may be held on her course and the torpedo adjusted to turn and run in the desired direction.

To the lay observer these angle shots appear spectacular and somewhat mysterious. In fact, they are quite simple, if you have in mind the principle of the gyroscope. The flywheel is spun up with the axis pointed in the utimate direction desired. The initial launching force carries the torpedo in the direction in which the launching tube is pointed until the torpedo is clear of the ship. As this force is soon spent, the gyro control asserts itself and the torpedo responds to it by taking and holding the course upon which it is set.

HEATED-AIR CHARGE.

In this experimental torpedo no attempt was made to increase the efficiency through the agency of heat. Experiments in this direction were made with one of the old Whitehead torpedoes, the expense of the experiments being to some extent borne by the Government. Having become convinced by preliminary experiments that the system had merit, the Bliss Co. proposed that one of the Whitehead torpedoes be equipped with the new heating device. It was also agreed that a stated bonus above the contract price should be paid for each knot or fraction of a knot gained in speed due to the action of the heater, and that if no appreciable increase was obtained the company should remove the heating device and make no charge for the experiment. The trials resulted in an increase in speed of 4 or 5 knots at the 800 yards range.

You must remember, however, that naval experts generally were not at that time very enthusiastic advocates of the torpedo as a weapon. Some believed and so advised the Bliss Co. that they were wasting their money. The experiments were very costly and the outlook was so discouraging that for a year or two the matter was allowed to drop.

REAR ADMIRAL FISKE.

There were, however, a few officers of the Navy who took a different view of the matter. Prominent among these was Lieut. Commander Bradley A. Fiske, now rear admiral, retired. It was largely through his persistence that in 1901 an agreement was made between the Navy Department and the Bliss Co. under which the experiments were continued. Under this arrangement another torpedo embodying the heating device and other improvements was ready for trial in 1903. The board of officers conducting the test found "that the turbine torpedo under trial has an average speed of 30.28 knots at 1,200 yards range, which, considering the improvised character of the work and the novelty of many parts, is a remarkable performance."

In 1905 a new and larger type was decided upon having a diameter of 21 inches. The speed and range called for were 26 knots at 3,500 yards, but only 3,000 yards could be attained at the required speed.

While these developments were going on an English firm, Armstrong, Whitworth & Co., undertook to improve upon the heating device and finally succeeded in doing so, thereby adding to the possibilities of both speed and range.

Mr. LONGWORTH. Mr. Speaker, will the gentleman yield?

Mr. TILSON. I yield to the gentleman from Ohio.

Mr. LONGWORTH. Are all these improvements English and American inventions, and none of them German?

Mr. TILSON. It was, in fact, an Austrian that invented one of the most important features.

Mr. LONGWORTH. The gyroscope?

Mr. TILSON. Not the gyroscope, but the application of it.

Mr. LONGWORTH. Are these torpedoes the same as the Germans use?

Mr. TILSON. We do not know. We know the Germans used the Whitehead torpedo just the same as we did. We know they were and are working on it with all the ingenuity known to be possessed by that people. We know some of the results they have achieved with it, but they have managed to keep fairly secret just what the type is that they are using now. So far as we can ascertain by the uses to which we see them put, their range and accuracy, and so on, they do not in any way excel what we know we possess.

Gathering up all the improvements to date and all the results of prior experiments, still another torpedo was designed for which contracts were let in 1911. Two types were called for, one of about 18 inches diameter and 17 feet long, the other 21 inches in diameter and 21 feet long. In the latter part of 1911 the two torpedoes were tested. The smaller weapon showed a speed of about 33 knots at 4,000 yards range (since increased to upward of 35 knots) while the larger one covered 10,000 yards at a speed of over 28 knots.

The main factors which have contributed toward bringing torpedo performance up to its present stage may be classified, in the order of their importance, as follows:

First. Superheating of the air charge and the injection of water.

Second. Substitution of the turbine for the old type of piston engine.

Third. Development of a gyro steering gear capable of controlling the torpedo over the longer ranges.

Fourth. Enlargement in the dimensions of the weapon.

Fifth. Improvement in the quality of the steel of which the air flask is constructed, enabling higher air pressure to be carried.

Since the torpedo tests just referred to were made the range has been still farther lengthened and torpedoes of the 21-foot type are now constructed to run at least 12,500 yards. It would be rash to say that the end has been reached. If the fate of empires is to be decided by the performance of this weapon, it is safe to say that the limit of its effectiveness has not been reached.

Mr. RUSSELL. Will the gentleman yield?

Mr. TILSON. I yield to the gentleman from Missouri.

Mr. RUSSELL. The United States up to this time has not used any great quantities of these torpedoes, has it?

Mr. TILSON. You mean in this war?

Mr. RUSSELL. Yes.

Mr. TILSON. I do not understand they have had opportunity to use very many.

Mr. RUSSELL. Is there a very great quantity of them now being manufactured for probable use during the war?

Mr. TILSON. I understand that there is. In all the criticism we hear everywhere, I have not heard any criticism of the Navy in this regard. It is believed that the officers in charge of the Navy have taken the proper steps in this direction.

Mr. RUSSELL. Is there more than one factory engaged in making them?

Mr. TILSON. As I understand, they are made at the Washington Navy Yard, at the Newport Yard, and by the E. W. Bliss Co., of Brooklyn. I know that the Bliss Co. has considerable capacity.

Mr. RUSSELL. Can you state about the cost of the torpedo when complete and ready for use?

Mr. TILSON. I can state it only approximately, because, as the gentleman knows, prices for material and everything else are changing so that it is impossible to state accurately. They cost anywhere from $6,000 to $9,000 or $10,000 apiece.

Mr. RUSSELL. Can the gentleman give any estimate of the additional cost of discharging one?

Mr. TILSON. There is practically no cost of discharging them. This little cartridge [indicating] can discharge one, or a little compressed air.

Mr. STEPHENS of Nebraska. Mr. Chairman, will the gentleman yield?

Mr. TILSON. Certainly.

Mr. STEPHENS of Nebraska. I want to ask a question in regard to the range. You stated that the maximum range is about 12,500 yards.

Mr. TILSON. I said we had attained a range of 12,500 yards in tests. I am confident we have attained considerably longer range than that.

Mr. STEPHENS of Nebraska. I wanted to inquire if there is any real advantage in such a range as that in view of the difficulty of hitting the mark?

Mr. TILSON. There is. If there should be a convoy, for instance—a convoy that you can fire among—you would be willing to expend even an expensive weapon of this sort in order to take a chance of hitting one of the convoy.

Mr. STEPHENS of Nebraska. But doing that at that distance would be a wasteful proposition, would it not, because of the remote chance of hitting?

Mr. TILSON. Well, the torpedo is now so perfect that you feel rather certain of its going where it is aimed. There is no question about that. The only question is to find out just where to aim it; that is, to know at what time the ship you wish to hit will be in a certain place. There is the real difficulty.

The SPEAKER. The time of the gentleman from Connecticut has expired.

Mr. STEPHENS of Nebraska. Mr. Speaker, I ask that the gentleman's time be extended.

Mr. TILSON. I thank the gentleman, but I prefer to stop here and thank the Members of the House for their most courteous attention. [Applause.] Mr. Speaker, in order to answer the questions of gentlemen when asked, my remarks have

been somewhat disconnected. I therefore ask the privilege of revising, extending, and somewhat rearranging my remarks.

The SPEAKER. The gentleman asks unanimous consent to revise and extend his remarks in the RECORD. Is there objection?

There was no objection.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. FLOOD. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the Diplomatic and Consular appropriation bill.

The motion was agreed to.

The SPEAKER. The gentleman from Mississippi [Mr. HUMPHREYS] will please take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 9314) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1919, with Mr. HUMPHREYS in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the Diplomatic and Consular appropriation bill, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 9314) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1919.

Mr. FLOOD. Mr. Chairman, I yield 10 minutes to the gentleman from Missouri [Mr. HAMLIN].

The CHAIRMAN. The gentleman from Missouri is recognized for 10 minutes.

Mr. HAMLIN. Mr. Chairman, on day before yesterday, late in the afternoon, just before adjournment, the chairman of the Committee on Foreign Affairs, the gentleman from Virginia [Mr. FLOOD], made this statement as it appears in the RECORD:

Mr. Chairman, I want to say for the benefit of gentlemen who heard the clear and able speech of the gentleman from Missouri [Mr. HAMLIN] that I called on the State Department a moment ago, and they stated to me, through Mr. Woolsey, the Solicitor, that they had got Mr. HAMLIN's letter of yesterday and immediately took the matter up with the President, and the President had given authority to give Mr. HAMLIN all the information he desired; that they had prepared a letter this morning and sent it down, and it was supposed to be in Mr. HAMLIN's office at the time he was addressing the committee.

That statement is hardly fair to me. Of course, I know that the gentleman from Virginia was simply repeating information that he had got over the phone. However, the statement is not accurate. The truth is that as soon as I finished my remarks I went immediately and directly to my office in this building, and when I got there my secretary informed me that the State Department had just at that moment called up and said they had the information which I wanted ready and were sending it to me. That was around 4 o'clock or later in the afternoon. The information did not reach me until the next morning. It came to me in my mail, brought by the mail messenger.

I only speak of that because I do not want to be put in the attitude of pretending in my remarks on this floor that I had not got the information which I wanted when it might have been in my office at the very time. I repeat that it did not reach my office until the next morning. In fact, when I made that speech I did not know that the department would ever furnish it.

Mr. FLOOD. The statement I made intended to convey the idea that the letter had been sent to the gentleman; not that he had gotten it, but that it probably reached his office after he had taken the floor.

Mr. HAMLIN. Of course the gentleman did not mean to put me in a false light at all. I am quite sure of that. I only wanted to make this statement so as to make the actual facts clear. My somewhat desultory and innocent remarks seem to have been misunderstood in some quarters. I was not leveling criticism at anyone in particular; certainly not at the State Department as at present officered. I was seeking to call attention to the fact that some years ago there had been a practice in the department that I regarded as extremely pernicious and dangerous, that of spending money out of the emergency fund and other funds and covering these expenditures in settlement with the Treasury with these so-called secret certificates, so that the public could not know what this money had been expended for. I expressed the hope in my remarks the other day that when we got the information from the present administration of the State Department we would find that that pernicious practice had been changed. And I think I ought to say right here, in justification of the administration in charge of the department at the time that we made the investigation, the department being at that time presided over by a distinguished gentleman [Mr. KNOX] who is now a Senator from the State of Pennsylvania, that he, when his attention was called to these bad practices by our committee, sought to remedy and change the methods so as to put an end to them.

I feel that I ought to make this a little plainer in justice to Mr. KNOX and to the party that he represents. There is no politics in this. I spoke of the department expending $20,000 in 1909 to participate in the Lake Champlain celebration, and then covering those expenditures by these secret certificates, when there was, in fact, no secrecy about it. I have here the hearings that were held by our committee on that question, and I find that we subpœnaed Mr. Secretary KNOX and asked him to produce those vouchers. He declined to do so until he got permission from the President. He had us insert in the hearings a letter which he addressed to President Taft calling his attention to our request and asking permission to present the vouchers. In that letter, after detailing to President Taft the facts in regard to the appropriation and expenditure of the $20,000, he said:

I have been thus detailed in my explanation in order that the entire facts and circumstances might be clearly before you. In my judgment, it was improper to cover the account under section 291, and there was no sufficient reason to make a certificate to the effect that it was not advisable to specify the purpose for which said money was expended. The money was appropriated "for expenses of the proposed celebration." It was a specific appropriation for a specific purpose, and at most and under any proper theory all that it was necessary for the Department of State to ascertain was whether, as a fact, that amount of expenditure had been incurred, which seems to have been carefully ascertained from the vouchers on file. It does not seem to me that the money was expended for foreign intercourse. It was expended to encourage and aid a celebration in the United States of the discovery of a lake, around which were clustered historic memories and associations in which two other nations were concerned, and the fact that the United States extended an invitation for the representatives of these nations to be present did not make it international intercourse within the meaning of the statute. If Congress had indicated in the appropriation that it had appropriated the money for the payment of the expenses of the representatives of Great Britain and France, then to the extent that the appropriation was used for that purpose it probably would have been proper to cover the expenditure under section 291, but you will note that the appropriation as made was for the purpose of paying the expenses of the celebration and not the expenses of the guests invited by the United States, the fact being that the guests invited by the United States, like all other guests who were invited by the local authorities having in charge the celebration, incurred no expense except such as was paid by the celebration authorities themselves, and it was to enable the celebration authorities to pay all the expenses of the celebration that the appropriation was evidently made.

He then asked permission to present the vouchers and that permission was granted by President Taft. When he presented those vouchers to our committee, together with his letter to the President, I, as chairman of the committee, said to him:

Mr. Secretary, I certainly congratulate you upon getting around to our view of this matter.

Secretary KNOX. I had not the slightest hesitation in getting there when I got started.

The CHAIRMAN. We have certainly done some good if we have convinced you that these expenditures should not have been covered by secret certificates under section 291.

Secretary KNOX. There was no excuse for it whatever.

The CHAIRMAN. I do not hesitate to say, speaking for myself, that it was not so much this particular item as it was the principle of the thing for which I have been contending. We felt that you had a practice in the State Department of covering in settlement with the Treasury expenditures out of appropriations that ought not to be covered by certificates under section 291, and it was for the purpose of settling the question as to whether you could legally do that, that you have been called upon to produce these vouchers.

* * * * * * *

Secretary KNOX. Under the operation of that order no vouchers are passed under section 291 unless they are brought to me in a separate envelope printed on the back in legible type, "These vouchers are for the personal inspection of the Secretary of State," for the purpose of considering whether they are proper to be passed under section 291; they are not brought to me with the mail, and the chief clerk is directed to deliver them to my private secretary with instructions that these are vouchers proposed to be passed under section 281 and are to be handed to me personally, so that I am trying to do everything in my power at least to see that proper practice is followed.

The CHAIRMAN. I am very much obliged to you for that statement, and I will say, furthermore, that I am sure it is not the purpose of this committee to try to get hold of information that we ought not to have; but we had reached the conclusion—some of us at least—as I said awhile ago, that the practice in the State Department had been such that many dollars of the public money was being expended and information in regard to the expenditures denied to Congress and to the public that ought not to be denied to the public. I feel, of course, that Congress being the body that appropriates the money it is entitled to all the information as to how it is expended, and that if there is anything that ought to be kept secret we can keep it as well as anybody else. It will be noted at this point that the vouchers requested have been filed with this committee and are printed as an appendix to this hearing. Your disbursing officer was requested to produce before the subcommittee vouchers showing how the fund given to the State Department in 1906 to pay the expenses of bringing home criminals was expended and he declined to produce those vouchers. I assume that now you take no issue with the proposition that that fund ought not to have been covered by section 291 and would be willing to produce those vouchers?

I think that I ought also to say that Secretary KNOX told our committee that he had given orders that not one single dollar should be taken out of the secret fund and expended until every item of the expenditure was specified and laid on his desk and

his attention specifically called to it, so that it could be passed upon by him. That is what I spoke of the other day. I talked to Secretary Bryan, when he took charge of the department, about this same matter, and he told me he would follow the practice outlined by Mr. KNOX. To put a stop to that loose practice has been my only purpose for calling attention to this so frequently for some years past.

I know that the departments must have a secret fund that they may expend and not be compelled to account for specifically, but I was astounded to find that they had fallen into the habit some years ago of covering by these secret certificates almost everything they chose and then saying to Congress and everybody else, "Hands off. We will not explain. We do not have to explain."

The other day when I spoke I was unable to give you the information as to the methods followed by the present administration of the State Department, but I am more than pleased to say now that in the statement which they have furnished me for the years 1912, 1913, 1914, 1915, 1916, and 1917, inclusive, and which I did not have the other day, they have kept separate the amount of money that they have expended for purely secret purposes, the expenditure for which has been covered in settlement with the Treasury by secret certificates, and the amount that they have expended from this fund that they have accounted for in the ordinary and usual way by filing vouchers, as all the other departments do, and can be seen by anyone interested. So I think there can be no criticism, I am glad to say, of the department since Mr. KNOX issued that order up to and until the present time. And I am hoping, with this matter being again called to their attention, the bad practice about which I have complained will never again prevail.

Mr. DENISON. How can the gentleman tell whether there could be any criticism unless he knows what is in those secret vouchers? Of course he must assume that those expenditures were proper.

Mr. HAMLIN. Of course, we have always got to assume that; but what I was specially emphasizing is that prior to the time when we made this investigation and called the attention of the department to this bad practice they never made any separation of the expenditures. They covered all that suited their convenience best by secret certificates under section 291, Revised Statutes. Now they are not doing that, I am glad to say.

Mr. COOPER of Wisconsin. Will the gentleman permit a question?

Mr. HAMLIN. I will.

Mr. COOPER of Wisconsin. If when peace is concluded we are to have no more secret diplomacy, can the gentleman think of any reason which would justify, in time of peace, the keeping secret of the purposes for which the public moneys are expended—any purpose whatever?

Mr. HAMLIN. I do not hesitate to answer that I think the necessity for that in time of peace is extremely small, and that is why our committee recommended that the appropriation for this found, some years ago when we were at peace with the world, be cut down from $90,000, the ordinary amount, to $50,000. It seemed to us that that was quite sufficient to meet any unforeseen emergency in times of peace.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MOORE of Pennsylvania. The gentleman said he was going to ask to extend something in the RECORD. I want to ask him a question in connection with that before leave is granted.

Mr. HAMLIN. Mr. Chairman, I ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Missouri asks unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. MOORE of Pennsylvania. Reserving the right to object, I should like to ask the gentleman what he proposes to extend in the RECORD?

Mr. HAMLIN. I am willing to put in, and glad to put in, among other things, the order issued by Mr. KNOX in relation to the handling of this fund. It is as follows:

REGULATIONS GOVERNING EXPENDITURES FROM THE APPROPRIATION FOR "UNFORESEEN EMERGENCIES ARISING IN THE DIPLOMATIC AND CONSULAR SERVICE, AND TO EXTEND THE COMMERCIAL AND OTHER INTERESTS OF THE UNITED STATES."

1. Expenditures from the appropriation for emergencies will be made solely upon written authorizations signed by the President or by the Secretary of State, or, in his absence, by the Acting Secretary of State, in all cases prior to the making of an expenditure or the issuing of any instruction placing a charge upon the appropriation.

2. All authorizations when submitted for signature shall set forth, except as hereinafter ordered to the contrary, (1) the purpose of the expenditure; (2) the rate of compensation if for services; (3) the period of employment or expenditure, if for a fixed term, or, when not definitely known, the approximate term; (4) the total charge to be made against the appropriation, if it can be ascertained, and if not, an approximate estimate; (5) the available balance of the appropriation at the time of authorization (the balance to be inserted in the authorization by the Chief of the Bureau of Accounts over his initials prior to the signing of the authorization by the Secretary of State).

3. Persons traveling or on special detail in connection with the objects of the appropriation, whose accounts are payable from the appropriation, shall receive reimbursement for actual, reasonable, and necessary expenses in addition to their regular compensation provided by law or regulation. Persons not in the employ of the Government may be given a stipulated rate of compensation and actual and necessary expenses, or a per diem in lieu of compensation and expenses according to the direction of the President or the Secretary of State in each case. A per diem allowance for expenses in addition to salary provided by law is prohibited. A copy of the appointment, designation, or contract in each case must be annexed to the account when submitted for approval.

4. The disbursement of moneys from the appropriation shall ordinarily be made by check, but cash payment may be made in those cases authorized by Treasury Regulations when the payment is made by the disbursing officer in person or by his deputy and the exchange of money and the receipt therefor is simultaneous.

5. When for any reason the President or the Secretary of State may deem it inexpedient in the public interest to make known the purpose or manner of a proposed expenditure from the appropriation, the authorization will be so drawn for the amount stipulated and the money will be paid over to the President or the Secretary of State upon the execution of a receipt therefor, which shall be filed as a voucher.

6. When presented for approval, all accounts for moneys chargeable to the appropriation shall have attached thereto the authorization in each case, and shall be itemized and supported by vouchers according to the usual practice required by law and the regulations of the Comptroller of the Treasury, except in cases where from the nature and method of the expenditure it is impracticable or inexpedient in the public interest to do so, and in such cases the personal certificate of the person expending the money may be accepted in lieu of vouchers in support of the account, when approved by the Secretary of State.

7. All accounts for moneys payable from the appropriation for emergencies that are not of a confidential nature shall be settled with the accounting officers of the Treasury by submitting the original paid vouchers in the same manner as expenditures from other appropriations, but such as may be considered confidential will be settled upon a certificate signed by the Secretary of State, or in his absence by the Acting Secretary of State, under section 291 of the Revised Statutes.

8. All authorizations, accounts, and certificates relating to the aforesaid appropriation will be presented for the signature of the Secretary or Acting Secretary of State through the Director of the Consular Service or such other officer as shall have been designated by the Secretary of State to supervise the finances of the department.

9. The authorizations given shall be numbered and filed numerically by the Bureau of Accounts and separate from the paid voucher, the number and date of each authorization being noted upon the account to which it relates.

10. All correspondence in relation to expenditures from the appropriation for emergencies shall be signed by the Secretary of State, or in his absence by the Acting Secretary of State.

These regulations will become effective on and after June 15, 1911.

P. C. KNOX.

DEPARTMENT OF STATE,
Washington, June 1, 1911.

Mr. MOORE of Pennsylvania. Mr. KNOX was then Secretary of State?

Mr. HAMLIN. He was then Secretary of State. I thought it was due to Secretary KNOX to make this statement.

Mr. MOORE of Pennsylvania. Secretary KNOX came before your committee and stated his disapproval of the system to which you have referred?

Mr. HAMLIN. He came before our committee in obedience to a subpœna issued to him, and after we had gone over this matter he agreed that we were right about it, and thanked us for calling attention to the practice and issued this order.

Mr. MOORE of Pennsylvania. Then it was Secretary KNOX who coincided with the gentleman's view on secret expenses?

Mr. HAMLIN. Absolutely.

Mr. MOORE of Pennsylvania. When the gentleman addressed the House day before yesterday he inserted a letter from Secretary Lansing, in which Secretary Lansing told your committee that he could not give you the information desired until he had conferred with the President, thus continuing the practice to which the gentleman objects.

Mr. HAMLIN. The gentleman from Pennsylvania [Mr. MOORE] must understand that the thing to which I have so long been objecting to was the manner of accounting for the expenditure of this money, and that is the thing on which Mr. KNOX and I seemed to agree. I did think the other day, and I am still of the same opinion, that the present Secretary was not justified in his attitude toward my request, for I asked not for the items for which the secret fund was expended but only for the amount expended each year. This could not be confidential.

Mr. MOORE of Pennsylvania. I compliment the gentleman for what he has done. I have no objection, Mr. Chairman.

Mr. FLOOD. Mr. Chairman, I yield one hour and a half to the gentleman from Virginia [Mr. GLASS].

The CHAIRMAN. The gentleman from Virginia [Mr. GLASS] is recognized for 1 hour and 30 minutes. [Applause.]

Mr. SWIFT. Mr. Chairman, I make the point of no quorum present.

The CHAIRMAN. The gentleman from New York makes the point of no quorum present. The Chair will count.

Mr. FLOOD. Mr. Chairman, can we not have tellers?

The CHAIRMAN. The gentleman from Virginia can move that the committee rise.

Mr. FLOOD. I understand that the bell will be rung when we call for tellers.

The CHAIRMAN. The gentleman from Virginia can move that the committee rise.

Mr. FLOOD. I withdraw my demand, Mr. Chairman.

The CHAIRMAN. The gentleman from New York [Mr. SWIFT] makes the point of no quorum. Eighty-four Members present; not a quorum. The Clerk will call the roll.

The Clerk proceeded to call the roll, when the following Members failed to answer to their names:

Booher	Fairchild, B. L.	Key, Ohio	Robinson
Britten	Fairchild, G. W.	Kiess, Pa.	Rodenberg
Butler	Flynn	Kreider	Rowland
Caldwell	Focht	LaGuardia	Russell
Campbell, Kans.	Fuller, Mass.	Lazaro	Sanders, La.
Campbell, Pa.	Gallagher	Lea, Cal.	Sanders, N. Y.
Candler, Miss.	Gard	Lee, Ga.	Saunders, Va.
Cannon	Garland	Lobeck	Schall
Capstick	Godwin, N. C.	McCormick	Scott, Pa.
Carlin	Goodall	McCulloch	Scully
Carter, Mass.	Gregg	McKinley	Shackleford
Chandler, N. Y.	Hamill	Maher	Sherley
Copley	Hamilton, N. Y.	Mann	Smith, T. F.
Costello	Haskell	Martin	Steagall
Crago	Hayes	Mondell	Stedman
Crosser	Heintz	Montague	Stiness
Curry, Cal.	Hollingsworth	Nicholls, S. C.	Sullivan
Dale, N. Y.	Houston	Olney	Templeton
Davidson	Hull, Iowa	O'Shaunessy	Vare
Dempsey	Husted	Polk	Watson, Pa.
Dewalt	Johnson, Ky.	Porter	Wilson, La.
Dooling	Johnson, S. Dak.	Powers	Winslow
Doughton	Johnson, Wash.	Price	Wright
Drukker	Jones, Va.	Ragsdale	Zihlman
Dunn	Kahn	Ramsey	
Edmonds	Keating	Randall	
Estopinal	Kelley, Mich.	Riordan	

Accordingly the committee rose; and Mr. HUMPHREYS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having under consideration the bill H. R. 9314, the Diplomatic and Consular appropriation bill, finding itself without a quorum, had caused the roll to be called, when 323 Members answered to their names, and he presented a list of the absentees.

The committee resumed its sitting.

Mr. FLOOD. Mr. Chairman, I now yield one hour and a half to the gentleman from Virginia [Mr. GLASS].

Mr. GLASS. Mr. Chairman, may I not, at the outset of what I shall presently say, appeal to the record of 16 years' service in the House to attest the assertion that I have never in all that time sought occasion nor availed myself of the privilege to speak here on any topic with the consideration of which I was not specially charged by reason of committee assignments? And now, when I am about to deviate momentarily from the rule, I would very sincerely regret to have it supposed for one minute that it was with any degree of eagerness that I reached the conclusion to address myself to-day to a subject with which many of my colleagues have much greater familiarity; but in which, I may venture to hope, no Member has a keener or more imperative interest. Indeed, it is a problem which comes home to the bosom of every American citizen, and while some Members of the Congress, by reason of long and intimate association with military affairs, are mentally trained in the technique and terminology and intricate details of our war-making establishment, and will, at an appropriate time, present and elucidate for us the things which we shall be asked to consider and approve, there are, nevertheless, some matters of such common knowledge and general concern that any of us might feel warranted in discussing them. It is a thing of this description that has recently arrested the attention of the country and it is upon this I am constrained to talk.

On the 19th day of January the chairman of the Committee on Military Affairs of the United States Senate made an address in New York City before an association called the National Security League, and among the deductions presented to the assembled audience, amid manifestations of applause, was that contained in the remarkable declaration that—

> the Military Establishment of America has fallen down. There is no use to be optimistic about a thing that does not exist. It has almost stopped functioning, my friends. Why? Because of inefficiency in every bureau and in every department of the Government of the United States.

LIKE A FIRE BELL AT NIGHT.

Mr. Chairman, the country was aghast at that terrific impeachment of the Government of the United States. It was a passionate, a comprehensive, arraignment; and, coming from such a source in such circumstances, it startled the nervous system of the Nation as the clanging of a fire bell in the night. Instantly public interest became tense. Immediately it was realized that the Oregon Senator in that New York speech had done what Edmund Burke said he could not do; he had drawn an indictment of a whole people. I say the Oregon Senator had indicted a whole people, Mr. Chairman, because this is a representative Government, equally free from the impedimenta of heredity and the constraints of autocratic power. And if it truthfully may be said that the American people have erected a Government that fails to function in the face of imminent peril, what more accursed accusation could be written in the book of fate? If, with good reason, it may be charged that the people of the United States, with their constitutional freedom of speech and of the press, have been so indifferent to their liberties and so insensible of their own security as to commit "every bureau and department of Government" to incompetent hands, would we not better welcome, rather than resist, the invasion of Teutonic kultur? If what Senator CHAMBERLAIN said at New York is true, it denotes the irretrievable breakdown of democracy at a time when only the triumph of democracy in arms may compensate for the glorious oblation of men who have died and men who yet shall perish that heaven may be kind to those who hereafter will inhabit the earth. [Applause.]

ASPERITY! YES.

Was any Member of the Congress surprised that the President of the United States pursued the unconventional course of making swift and direct answer through the medium of the public press? I think the country would have been pained and disappointed had not the President, charged with the administration of the Government and the conduct of the war, taken the quickest way to reassure the American people. It was a grave situation that the Oregon Senator had created, one which could not endure hesitation or fine phrasing; and I venture to think the President met the exigency in pretty good degree. Asperity! Yes; there was asperity; but, Mr. Chairman, there come occasions when benignity itself is challenged to aid the right by assuming an aspect of reproof.

The President characterized the extraordinary indictment of the Government by the Oregon Senator as a distinct "distortion of the truth," and for convenient reference I shall here append the statement from the White House:

THE PRESIDENT'S STATEMENT.

> Senator CHAMBERLAIN'S statement as to the present inaction and ineffectiveness of the Government is an astonishing and absolutely unjustifiable distortion of the truth.
>
> As a matter of fact, the War Department has performed a task of unparalled magnitude and difficulty with extraordinary promptness and efficiency.
>
> There have been delays and disappointments and partial miscarriages of plans, all of which have been drawn into the foreground and exaggerated by the investigations which have been in progress since the Congress assembled—investigations which drew indispensable officials of the department constantly away from their work and officers from their commands and contributed a great deal to such delay and confusion as has inevitably arisen. But by comparison with what has been accomplished, these things, much as they are to be regretted, were insignificant, and no mistake has been made which has been repeated.
>
> Nothing helpful or likely to speed or facilitate the war tasks of the Government has come out of such criticism and investigation—I have not been consulted about them, and have learned of them only at second hand—but their proposal came after effective measures of reorganization had been thoughtfully and maturely perfected, and inasmuch as these measures have been the result of experience, they are much more likely than any others to be effective, if the Congress will but remove a few statutory obstacles of rigid departmental organization which stand in their way.
>
> The legislative proposals I have heard of would involve long additional delays and turn our experience into mere lost motion.
>
> My association and constant conference with the Secretary of War have taught me to regard him as one of the ablest public officials I have ever known. The country will soon learn whether he or his critics understand the business in hand.
>
> To add, as Senator CHAMBERLAIN did, that there is inefficiency in every department and bureau of the Government is to show such ignorance of actual conditions as to make it impossible to attach any importance to his statement.
>
> I am bound to infer that that statement sprang out of opposition to the administration's whole policy rather than out of any serious intention to reform its practice.

A GROSS PROVOCATION.

That is a distressing thing to be said by a man of exalted station about the utterances of a man of a little less distinguished rank. It is a condemnation in tenor and terms that may be justified, in propriety or in fact, only by the extremity of the offense and the indubitable necessity of drastic treatment. In this case was not the provocation inconceivably gross? Did not the sweeping charge of the Oregon Senator asperse indiscriminately the integrity of the administrative officials of the Government and invite popular suspicion and discontent? Was it not, indeed, calculated to create alarm among the timid everywhere and dejection even among the stout of heart who should very naturally impute to the speaker intimate knowledge of every detail in the sum of military preparation?

I can not say how the incident impressed other Members of the Congress, but I certainly experienced at first a feeling akin to personal affliction that the chairman of the Military Affairs Committee of the Senate, without warning or apparent justification of any kind, amid the felicitations and applause of adversary revilers and critics, should thus have bitterly assailed an administration of which he was a part, and, without distinction, have mercilessly pilloried as wretched incompetents grim veterans of the American Army who have spent their lives and expended their energies in the service of the country! [Applause.] And, Mr. Chairman, when an earnest quest for the truth carried me painstakingly to the end of nearly 2,000 pages of responsible testimony only to find revealed the utter insufficiency of proof to sustain the astounding censure distress gave place to amazement, and I wondered whether anything the President or anybody else could have said in resentment would have more aptly depicted the episode than what the President actually did say.

THE RECORD RIGHT.

We have been asked to search the record, Mr. Chairman, and it is to the record that I appeal. I have seen it with mine own eyes and with mine own ears have heard it expounded. From the testimony I have turned away, not with tears nor with trembling apprehension for the well-being of my own sons or the sons of other fathers, but with a firmer faith in my country, praising God for the quiet courage of the men and the ineffable fortitude of the women of America who are to win this war. [Applause.] And for those who impeach their fidelity and deride their capabilities and seek to decry or obscure their achievements we should invoke the imprecations of every loyal citizen. [Applause.]

"VICIOUS PATHOS."

Were every specification marshaled by the critics of the Government really founded in fact, all of them taken together would not expiate the offense of Mr. CHAMBERLAIN'S New York indictment. The incontestable facts do not at all justify his conclusions, but he must have recourse to utterly hostile inferences. Take the criticisms, for example, directed against the Ordnance Bureau with respect to artillery supply. The Government is blamed for an alleged shortage of guns and bitterly reproached for its momentary dependence upon our allies in the war. The criticism assumes the guise of pathos when it is said that our own impotency necessitated an appeal to poor, bleeding France for assistance. The United States, we are asked to believe, presents to the world the humiliating spectacle of taking from the depleted stock of a struggling comrade nation! But, Mr. Speaker, the pathos of the illustration but intensifies the vice of it. Who of us is not familiar with the facts? What Member of the Congress does not very definitely know that France is furnishing the American Army with guns, not because we sought to deplete her "meager stores" but because her chosen ambassadors and picked experts asked the privilege of arming our expeditionary force from her oversupplied arsenals. [Applause.] It was the wise thing for France to have proposed and the only effective thing for America to have done. [Applause.]

JOFFRE CALLED TO WITNESS.

Many of my colleagues will distinctly recall the memorable evening spent by some of us at the home, in this city, of an ex-ambassador to France when we had the privilege of hearing the accredited military and naval representatives of the French Government describe the situation and tell us what it was necessary for this Government to do. Marshal Joffre, for the army, and the French admiral, for the navy, talked to that company of Congressmen for three hours, telling them, cautiously, of course, what at the moment the finest experts of France were pointing out in elaborate detail to every important bureau of the American War Department. Placidly, and with characteristic military precision, Marshal Joffre warned against the folly of hurriedly attempting to throw into France an army of untrained and untested American troops. He pointed out how such a thing would violently disrupt trans-Atlantic traffic; how ships thus would be used which might more profitably be devoted to the transportation of necessary munitions and other supplies to the armies of the allies; how futile and inoperative an untrained army would be in France; how necessarily ignorant even our Regular Army was of modern instrumentalities of war, the character of which was changing even as the war raged. Warfare had been literally revolutionized since the Battle of the Marne, and by those who knew we had to be told the things that we did not know. All through the French marshal's talk there ran a particular thought as a thread through a woven garment; and that was the warning against heedless haste. It was suggested that but a single division of the best trained troops of the Regular Army should be then sent to France, with a complement of Artillery. This division was there to be divided into two divisions of the French strength for intensive training behind the lines of battle, to be prepared later to train intensively the American troops that should follow. It had not been the plan of our General Staff to send over troops so early. It had taken Great Britain two years to prepare an effective army. But the representatives of the French Government stressed the point that the presence of this small expeditionary force would heighten the spirit of France and correspondingly depress the morale of the adversary. And, oh, how true one part of this at least turned out to be.

The Secretary of War on last Monday told the pathetic story in his masterly statement before the Committee on Military Affairs of the United States Senate. Said he:

> The people of France kissed the hems of their garments as they marched up the streets of Paris; the old veterans, wounded in this war, legless or armless, stumping along on crutches, perhaps, as they went up the streets of Paris with their arms around the necks of the American soldiers. Not a single man in that division was unaccompanied by a veteran. America had gone to France, and the French people rose with a sense of gratitude and hopefulness that had never been in them before.

[Applause.]

Mr. Chairman, in order to send even this contingent of troops from our pitiful little American Army it was essential to be assured of guns; and when it was suggested to Marshal Joffre that, having just entered the war, we had not immediate equipment, it was promptly replied that France had an overabundance; that her munition factories had caught up and exceeded the necessities of the French Army; that the gun wastage could not keep her arsenals to capacity; and that France could easily and would gladly supply the American expeditionary force. Marshal Joffre even suggested that this were better done by French than by American factories, since it would save the unavoidable delays, the pressingly needed cargo space, the tremendous cost of shipment, and other things which I do not now recall.

WAS CHAMBERLAIN IGNORANT?

Is it possible that the chairman of the Military Affairs Committee of the United States Senate did not come in contact with the French mission to this country and did not learn from the accredited agents of France the facts which I have here cited? Is it possible that Mr. CHAMBERLAIN was not advised of the testimony of Gen. Crozier before the Military Affairs Committee of the House of Representatives, in which the Chief of Ordnance, more explicitly than I could hope to do, presented these very facts in evidence to show the reason why France and Great Britain are supplying guns to our Army abroad? Is it because he was ignorant of these facts that he sought to have the country believe our Military Establishment is a myth? Is it because of gross ignorance of the truth that critics bemoan a condition which, in the circumstances, any discerning man must see is of tremendous advantage to France as well as to America? I hope it is ignorance, Mr. Chairman, because I would not like to shock my own imagination with the thought that any adversary of the Government is malevolent enough perversely to employ the fine sympathy of the American people for France in a prejudicial assault on the American Government. Yes; both France and Great Britain are supplying the American Army with guns; we are buying them and paying for them just as France and Great Britain bought munitions from us when they could not get them quickly enough or in sufficient quantities from their own factories. And the fact does not constitute an indictment of this Government. Rather is it a clear index of the purpose and a hopeful sign of the diligence which the War Department is applying to the situation. That the arrangemen[t] has worked well is convincingly evidenced by the fact that France and Great Britain have proposed its continuation for the current year, and Gen. Tasker H. Bliss, Chief of Staff of the American Army, has recommended such an agreement to this Government. This does not imply any abatement of our activities in this country, for we have already placed orders totaling $1,000,000,000.

THE ARMY SUPPLIED WITH ARTILLERY.

From it all we may deduce the comforting assurance that the War Department is more concerned to furnish the American Army in France with modern guns with which to train and fight than it is to haggle with ambitious statesmen over the source of supply. The thing which will most interest the American people and from which they will derive the greatest satisfaction is the fact that their Army on the battle front has modern guns—among the best in the world—guns that will destroy the enemy. This being the case, perhaps they may be persuaded to forgive the Secretary of War for getting these guns in the quickest possible way, at the least possible cost to the Government of the United States, with the least possible disturbance of the plans of the allied nations. And merely because the Secretary of War and his expert military advisers thus used their plain common sense in a perplexing posture of affairs, it is not to be inferred that the Congress of the United

States or the people of the country will be induced to credit the wild and foolish charge that the Government has broken down and needs to be frightened to its feet again by the distempered clatter of theatrical public men. [Applause.]

FRENCH OVERPLUS OF ARMS.

Here I shall put in the RECORD a statement by André Tardieu, former French high commissioner, now munition minister of France, showing conclusively how France welcomed the arrangements:

An important agreement has been concluded between the United States Government and the French high commissioner, M. André Tardieu.

According to said agreement the American Government adopts the two principal pieces of matériel of French artillery, the 75 millimeter field gun and the 155 millimeter rapid-fire howitzer.

The expeditionary corps of Gen. Pershing has received from the French authorities, on arrival, its field artillery, its rapid-fire heavy artillery, and its French artillery—which, of course, will accelerate its taking its place in the line.

At the same time the artillery production in France and in America has been organized so that the American Army of 1,000,000 men which is about to be recruited will receive without delay, as the units are formed, the necessary heavy and light guns.

The negotiations taken up for the first time at the end of May, between M. André Tardieu, French high commissioner; M. Ganne, chief of war munitions of the high commission; and Brig. Gen. Crozier, Chief of Ordnance, were characterized by two ideas.

On one hand the American Government wished to adopt the quickest solution, in order to realize in the shortest time the complete armament of its forces.

On the other hand, with great foresight they attached particular importance to realizing, for the American and the French Armies, called to fight on the same battle fields, uniformity of munitions, of such capital importance from a tactical point of view.

In view of these two desired aims, the French high commissioner was able, thanks to the development since 1916 of the machine equipment of our war munitions factories, to furnish Gen. Crozier with a detailed plan of industrial collaboration, which, by the united efforts of the French and American industries, will assure the complete realization of the American program.

The double certainty of rapid production and uniformity of munitions decided the United States Government, despite the incontestable value of its own matériel, especially that of the 3-inch field gun, of which the superior qualities are universally recognized, to adopt our 75 and our short 155.

The negotiations on these lines were rapidly completed; at the end of somewhat over one month they were concluded this week by a complete understanding, fixing the quantity and the price of the matériel to be furnished.

This understanding, susceptible of important further developments, is a precious proof of the esteem in which the most powerful industrial country of the world holds our engineers and our mechanical constructors. It has also a practical bearing of great value.

From the military point of view it is evident that uniformity of type of guns and munitions for armies fighting on the same battle fields is an appreciable guaranty of safety and efficiency. The supply and the volume of fire are thereby equally facilitated. Unity results spontaneously from identity of weapons. Finally all tactical results, obtained by the experience of three years of war, are without previous adaptation assimilated by the American Army.

From the industrial viewpoint the unity of effort created between the manufacturing plants of the two countries will produce happy results without precedent, not only during the war but also subsequently. Common action provides the best means of mutual acquaintance and for preparation of the close cooperation which it is desired to organize for the future.

From the financial standpoint it is possible to hope that the purchase by the United States of French artillery matériel will create an improvement in exchange, which under the existing relations of America and her European allies is as much to be desired by the United States as by France.

It is also likely that the adoption of the metric system, which has been officially requested by the American Bureau of Standards and which is much to be desired from the point of view of future Franco-American interests, may be thereby facilitated.

These are, briefly stated, some of the results, certain or probable of the agreement between the French high commissioner and the American Government.

The dominant note of the agreement lies in the proof it gives of the unshakable resolution of the American Government to achieve in the shortest time the maximum of military strength, and on the other hand it proves the intimate and active cooperation existing between the United States and France.

Mr. Baker, Secretary of War, and Gen. Crozier, Chief of Ordnance of the American Government, have given proof in this case of the broadest spirit of comprehension and decision and have succeeded in a few weeks in securing for the American troops artillery of the first order.

Our high commissioner at Washington speaks in unbounded praise of their cooperation with him.

MACHINE-GUN SQUABBLE.

Mr. Chairman, in support of the intemperate charge that the Military Establishment of the United States Government is a myth—that it has no existence—a charge contemptuously echoed only the other day by a German military expert in a German newspaper, the controversy over the Lewis machine gun and the Browning gun is revived, and in the very obvious attempt to discredit the Government and to "get Baker" the critics try desperately to convict the Ordnance Bureau of incapacity and the Chief of Ordnance of personal venom. I addressed myself to an examination of the evidence deeply prejudiced against Gen. Crozier; but there is not one particle of disinterested testimony in the hearings which does not abundantly acquit the Chief of Ordnance of blame. The final decision of the competitive tests between the two types of machine gun was delayed—the critics say inordinately delayed—but Gen. Crozier asserted, and the Secretary of War cheerfully assented, that the latter had full responsibility for the fact, so that the persistent contention that the personal pique of the Chief Ordnance Officer of the Government was responsible for the rejection of a superior gun, immediately available, has no evidence to sustain it. Moreover, the Lewis gun was not a superior gun. The preponderance of expert testimony to the superiority of the Browning gun for American use is overwhelming, and it is upon this fact that the Secretary of War relies to justify his opinion that the delay which was occasioned will be more than compensated by the superiority of the weapon secured.

The best experts are definite and emphatic in their judgment that the Browning is "the best machine gun in the world." The only prop on which the critics seek now to rest their case is the plea that the Lewis gun was immediately available, while deliveries of the Browning gun will be delayed; and they use this broken reed in face of expert testimony to the effect that in tests the Lewis gun "had utterly failed with American ammunition," which has tremendously greater pressure than British ammunition, and in face of the further fact that the Lewis gun was neither immediately obtainable nor remotely available for our operations in France. Indeed, Gen. Pershing sent word from Europe that the Lewis gun could not be used on his front for land fighting, and even the United States marines who went to France armed with this gun were rearmed with a different weapon.

But this is not important, Mr. Chairman, and the farthest thing from my thought is any desire to transfer the rival gun controversy to this Chamber. I pretend to no knowledge of machine guns. The whole point of what I am saying goes to establishing the fact that the Ordnance Bureau of the Government can not be discredited, even in this single detail, when we balance the testimony of experts against the self-interest of disappointed persons and the miserable bias of fretful politicians with a case to make out. One of the ablest arms manufacturers in the United States pronounced Browning as "probably the most remarkable gunmaker in the world," and expressed the belief that this opinion was shared "by every gun manufacturer in the world." So this is the kind of gun and the character of gunmaker with which and whom the Secretary of War dealt.

PERVERTING THE TRUTH.

Ah, but, they say, the testimony reveals that but nine Browning machine guns have been made, and the impression has gone abroad that the American Army has but nine machine guns to go up against the millions of Germany. Talleyrand tells us that language was invented to conceal our thoughts. I should hate to regard that as axiomatic. It is, of course, a witty French cynicism. But, at least, we do know that sometimes words are used to obscure the truth or skillfully employed to pervert it. The American Army in France has thousands of machine guns to go up against the enemy [applause]; it is as well equipped with machine guns as any army in Europe [applause]—perhaps better equipped than the German Army. And no set of malcontents should be permitted to deceive the people of this country into the disturbing supposition that our fighting forces in France are suffering in equipment of any kind. [Applause.]

On this very point Gen. Crozier said nearly two months prior to that extraordinary New York speech to which I have been referring:

I think here is the time to say something which I have not told the committee before in reference to these machine guns. Our number is so small, and the possibility of manufacture in this country was so limited, that when our troops went abroad we made, and were fortunately able to make, the same kind of an arrangement with the French Government with reference to the machine guns that we had made with reference to artillery, and we are getting from them quite a sufficient number of guns to arm our troops over there with the Hotchkiss type of the heavy gun and of the Chauchat type of the light guns.

ITCHING TO "GET BAKER."

All this raucous outcry apparently has its root, Mr. Chairman, in the itching desire to "get Baker." But it can not be done [applause], for the available expert testimony clearly indicates the discernment of the War Secretary. I venture to assert that no civilian could have been got in this country who, as head of the War Department in this emergency, could have exhibited a broader comprehension of policies or better have absorbed the multitude of details than Newton D. Baker. [Great applause.] It is absolutely convincing that delay, if any, occasioned by the retrial of machine guns and the selection of the Browning is much more than made up by the vastly superior qualities of the gun accepted. Talk to the contrary is mere inference—attenuated inference, amateur inference. It was not expected that deliveries of the Browning gun could be made before this spring, when they will be made in

ample time and quantities to supply our troops as they go abroad. It is by no means clear that haste could have been made had the department accepted the inferior gun; for every available American factory, when we entered the war, was crowded with contract work for foreign governments which engaged its output until past the date of the Browning gun decision. Experienced arms manufacturers insistently declared that no ultimate delay was involved in the discretion exercised by the Secretary of War under the advice of an Army board of high officers. And, aside from all this catching at pegs, the Secretary of War has pointed out that, owing to the decision, "for cogent reasons," to have the American troops cooperate with the French instead of the British the Lewis gun was not adapted for use by our land forces abroad. No such machine gun as the Lewis gun is used by the French and, as stated by the Secretary of War, it is "highly desirable, for military reasons, that the American Army should be organized and equipped as the French Army is organized and equipped." For aviation use and for training purposes, the Lewis gun has been ordered to the practical limit of available funds and is being made to the full increased capacity of the arms plant executing the contract. But, Mr. Chairman, the thing that can not too frequently be stressed—the real thing that the American people should know and will be glad to find out when we brush away the gossamer of excited declamation—is the solid fact so definitely stated by the Secretary of War last Tuesday, when he said:

All our units going to France will be completely equipped with what is taken with them and what is secured by them in France, and the organizations in training camps in this country will be supplied with sufficient weapons to acquire familiarity with them before going abroad.

In short, Mr. Chairman, all American troops in France are fully equipped, every unit going to France will be completely equipped, and every organization in training for France will have sufficient guns before going abroad to acquaint it with their use. That is the testimony; and over against it, on a stage set for the purpose, we have only the agitated exclamation of one public man that the American Military Establishment is a myth. [Applause.]

ARMY HAS FINEST RIFLES IN WORLD.

And they bring up the old rifle dispute, Mr. Chairman, and hang a complaint on that peg by seeking to have it appear that the Army experts did not know their business. Men like Scott, Chief of Staff at the time; Bliss, next in rank; Crozier, Chief of Ordnance; Kuhne, of the War College; Pershing, on his way to France, were unsafe advisers to the Secretary of War! They agreed without a single dissent, after a survey of the whole situation, to use the American Springfield rifle and, in conjunction with it, the English Enfield adjusted to American ammunition and modified as to the interchangeability of parts. It was also the unanimous recommendation of the arms manufacturers' experts. Of course, the change in the Enfield rifle took time; but, meanwhile, with 600,000 Springfields and 165,000 Krags in hand, the Army heads and experts judged that we could better endure the delay than to send our soldiers to France with a rifle dangerously defective—a weapon which Great Britain itself was arranging to radically alter when suddenly overtaken by war and which has been used chiefly for training purposes since the war began. It seems to be the idea of some distinguished gentlemen that we should have grabbed up any old instruments of warfare and sent a ragamuffin army across the Atlantic instantly to break the Hindenburg line. [Laughter.] They did not want us to have modern rifles, nor did they want us to have the best machine gun in the world. Their impatience ran away with their discretion.

I could wish every Member of the House would read the hearings on this point, that they might comprehend the question from the clear, cogent, conclusive reasoning of men of vision, men of great affairs, men of technical understanding, who know what they talk about when they talk. There was S. M. Vauclain, vice president of the Baldwin Locomotive Works, now a member of the Council of National Defense and chairman of the war industries board. I believe you know him, Mr. Speaker; I think he said you induced him to come to Washington. At all events, he is a manufacturer of long experience and a man of great ability, described at the hearings by Senator FRELINGHUYSEN as the real "driving force" in providing artillery and munitions. It is exhilarating to note his intimate knowledge of what is transpiring and to observe how sharply and completely he routed pertinacious critics of War Department operations.

NO APPRECIABLE DELAY.

On this rifle modification matter and the consequent delay charged, Mr. Vauclain was very explicit. He said:

I consider that the Ordnance Bureau was very wise in taking time to perfect this rifle. I think it is the finest rifle made to-day. I think it is a better rifle than the Springfield.

And, briefly explaining advantages of the change from the Enfield model, he said:

There is a great objection to using the rim cartridge in the field on account of jamming when you are working the shot in a rifle. These rifles now have rimless cartridges, the same as used by the Springfield rifle, interchangeable ammunition, absolutely no possibility of jamming in service. Their interchangeability is such that when we were putting English rifles together, if a man put 20 rifles a day together he thought he had done a good day's work. About 10 days ago one of our fitters put 128 of these rifles together, and 97 per cent of them targeted first shot. If this rifle was not of perfect design and perfectly made as to tolerance, it would be impossible for anybody to put 128 rifles together in 10 hours out of a miscellaneous heap of parts; so that I am satisfied that the rifles are an absolutely interchangeable piece of work.

Here I may add that the deliveries of these new model Enfields for the week ending February 2 were 42,932 and of the Springfields 7,900. And yet these hypercritics tell the country the Ordnance Bureau does not exist any longer.

Frustrated in the obvious desire to prove the inadvisability of the change from the technical viewpoint and "hell bent" on making out a case of disastrous delay, one of the hostile critics of the War Department asked Mr. Vauclain how many rifles would have been produced had there been no change of model, to which the witness made the heartbreaking response, "Not one more than we have to-day." And again and again this great captain of industry, this "driving power" of the Government's artillery and munitions force, vindicated the efficiency of the Ordnance Bureau and confounded his inquisitors.

DRILLING RIFLES.

But it is contended that some of the cantonments had not rifles enough with which to train. Gen. Crozier, as I recall, contests this proposition. The Secretary of War was disposed to concede that there was unavoidable delay in deliveries, which had been corrected, however, or was in process of immediate adjustment when Mr. CHAMBERLAIN made his fierce attack on the Government by charging that the Military Establishment had ceased to function.

Gen. Crozier in his testimony pointed out that while every man in every camp had not been furnished a rifle, it is not customary for all the men to drill at the same time, and that, for training purposes, rifles could be used over and over again. Of course there was inconvenience. We should have witnessed a miracle had there not been minor troubles and delays of this sort. But would anybody who hears me be willing to say that an inconvenience of this kind, already subjected to remedial attention, could justify the chairman of a great military committee of the Congress in charging before a public audience an utter breakdown of our Military Establishment? Who of us does not recall that the pictorial papers and magazines of this country for many months after Great Britain had gone to war teemed with illustrations portraying British recruits marching in silk hats, in shirt sleeves, and workman's blouse, and drilling on England's commons with broomsticks and walking canes? Did any responsible public man in Great Britain, because of this, charge that the British military establishment was nonexistent? Mr. Chairman, did the fact here cited betoken incompetence or slothful pace? On the contrary, it seems to me that it signified an indomitable spirit—a spirit that found expression at Neuchapelle and Passchendaele and other battle fields which will literally crowd the glorious pages of history. And I apprehend that the American people will not be dismayed nor agitated nor made afraid merely because at some camps some recruits were a little while without rifles. Many things are required to make a soldier before putting a rifle in his hands, and we would better have been a few weeks without rifles than without men to train in the other minutæ and movements of war.

WHAT THE TRUTH REVEALS.

What the American people will desire to know, and what these hostile critics of the Government have been unwilling to tell them, but what the testimony itself abundantly reveals, is that no appreciable time, after our declaration of war, was lost in turning out rifles for the American Army. The people should know that, weeks before Mr. CHAMBERLAIN made his monstrous indictment of his Government, Gen. Crozier, Chief of Ordnance, repeatedly testified before the Military Committees of Congress that "no American troops are being sent to France who have not had rifles which they have been using for some time" prior to sailing. Again he testified that "the troops which thus far have gone to France, and those which will for some time go, are those of the Regular Army and National Guard," for a long time supplied with Springfield rifles for target practice; and then again, with earnestness and emphasis that are perfectly manifest, Gen. Crozier declared on the witness stand:

I wish to say to you that no United States soldier has been or will be delayed five minutes in reaching the theater of war because of the absence of modern rifles.

THE REASON FOR UNPREPAREDNESS.

But, Mr. Chairman, I earnestly invite the attention of the House to this point: Backed by an incontrovertible record of events, I assert that if there was a shortage of modern rifles, or even of dangerously defective weapons, the responsibility is not with the Bureau of Ordnance. I have read in the papers that somebody somewhere suggested that any half-witted American citizen might have foretold that this country would be drawn into the European war. I assume that it was upon this supposition that the Chief of Ordnance in the investigation before the Senate Military Committee was asked what his bureau had been doing from August 4, 1914, when Belgium was invaded. I infer that this question was prompted by the supposition that any half-witted citizen should have known we would enter the war and, therefore, that the Ordnance Bureau should have instantly increased its activities. I infer that it was upon this theory that Mr. CHAMBERLAIN in his New York speech was provoked to put the stigma of utter failure upon our military managers.

I do not agree that any half-witted citizen might have foreseen in 1914 our participation in this tragedy. I disagree for the reason that the major sentiment in this country was against entering the war and the President of the United States, with surpassing patience was ceaselessly endeavoring to avoid the calamity. The Congress of the United States was opposed to war; and we witnessed in this Chamber the remarkable spectacle, in 1915, after the *Lusitania* was sunk, of 152 Members of the House so determined to avoid participation in the struggle that they voted practically to abandon the indubitable rights of the country to sail its ships upon the high seas or to prosecute commerce with belligerent or even neutral nations. I disagree, because as late as the closing months of 1916 one of the great political parties of the country, to which Mr. CHAMBERLAIN belonged, reelected Woodrow Wilson President of the United States because, among other considerations, he had been wise and brave enough to keep us out of war, and could confidently be relied upon to do all that mortal man might honorably do to avert the horrible affliction. [Applause.] I do not know what was the attitude or what were the utterances of the Oregon critic in the presidential campaign—whether he applauded the President or censured him. But I do know, Mr. Chairman, that if the Oregon Senator in 1914 or 1915 or 1916 had the prescience to foresee that we should enter the war, the weight of his culpability is such as no good citizen would like to endure.

CHAMBERLAIN DID NOT FUNCTION.

Why did not the Ordnance Bureau function? Why were we short of modern rifles and heavy artillery? Let the Chief of Ordnance tell the story of how the Ordnance Department of the Government did function to the fullest extent of lawful permissibility. I shall put into the record—for it can do no harm—extracts from Gen. Crozier's testimony bearing on the subject. But in contemplating the sweeping indictment of his Government by Mr. CHAMBERLAIN the astounding thing to which I invite your attention right now is the fact that, with all his prescience, Mr. CHAMBERLAIN did not function. He was and is chairman of the Committee on Military Affairs of the United States Senate, with access to every particle of available information. In a large sense he held the purse strings upon military expenditures, because the Senate nearly always increases and rarely ever decreases appropriations. For a long time this Government has owned two arsenals, one at Springfield and the other at Rock Island. Ten years before the war the appropriation for small arms in these establishments aggregated $1,700,000; a year later, $1,778,000; a year later, $1,700,000—at a time when nobody in America could have dreamed of war. And yet in 1915, practically two years after Mr. CHAMBERLAIN had assumed the chairmanship of the Senate Military Committee, when for seven months war had raged in Europe, the appropriation for small arms had gone down to the pitiful mark of $250,000, and that, Mr. Chairman, so far as the record discloses, without one word of protest or even admonition from these adversary critics and calamity shriekers. Furthermore, the fires at the Rock Island Arsenal had long been out; how long I do not know. The arsenal at Springfield, where the best rifle in the world is made, was running at one-eighth of its capacity. The war had reached its trench-fighting stage, furnishing a fair inference of a protracted struggle. Kitchener had predicted that it would last three years. Notwithstanding these things, Mr. Chairman, the men who now affect preknowledge of future events did not increase by one dollar the trifling appropriation for small arms, but reduced it from the preceding year by nearly 50 per cent. The expert foremen and skilled artisans at the Government armories had been scattered and the forces disorganized and demoralized, so that later, when operations were resumed, the Ordnance Bureau had to get these people back by bidding high against private establishments engaged on munitions for foreign governments. Was Crozier to blame for that? Is this soldier to be assailed and his reputation destroyed by the cruel imputation of inefficiency leveled by the Oregon Senator at this New York meeting against every bureau and department of his Government? I protest, Mr. Chairman, it is not just; for Gen. Crozier, we are told, did not know the truth. The President did not know the truth. Secretary of War Garrison did not know the truth. Tardieu and Lloyd-George, great ministers of munitions of foreign governments, Scott and Bliss, Pershing and Kuhne—none of these knew the truth. Only this world-wise Oregon critic knew the truth, and at the critical moment he failed to function! [Laughter and applause.] With a moving picture of America at war before his eyes, with strong conviction in his mind, distressed by his very contemplation of our utter inefficiency, he permitted the small-arms appropriation of the American Congress in the very year that the *Lusitania* was sunk to go down to the contemptible figure of $250,000!

FUNCTIONED THE WRONG WAY.

And, Mr. Chairman, if the Oregon Senator was inspired to make that savage indictment of the Government in his New York speech by the supposition voiced by somebody that any half-witted American citizen should have known as early as August, 1914, that this country might be drawn into the European war, I cite a circumstance now that painfully accentuates his own responsibility for our lack of preparation. In the military appropriation bill which passed the House in 1917, long after the war began, there was an appropriation of $50,000 for motor trucks for the Army; but, trifling as was the sum, contemptible as it must have seemed to anyone who was reasonably certain that the United States was on the brink of war, the distinguished Oregonian had it cut to $25,000! With what result upon our activities at this time the House may judge from this extract from the testimony of Maj. Gen. O'Ryan, of the Twenty-seventh Division, Camp Wadsworth, who said, in speaking of the difficulties of training down there:

> It is impossible for lack of mechanical transportation. For instance, we have not automobiles enough to haul wood from the depot to get it to our organizations.

And Maj. Gen. Greble, at Camp Bowie, testified that his division urgently required 245 motor trucks, but had not even 1. It required 46 motor cars and had just 1. The escort wagons, he testified, were drawn by mules, and Gen. Greble added:

> If we do not get those things until we get abroad, why, we won't have trained motormen to look after them.

Talk about functioning! Here is an instance in which the distinguished Oregon critic of the Government functioned the wrong way. [Laughter and applause.] He knew we should go to war—any idiot could have foretold that—but he imagined that the surest and quickest way to win the war was to cut the appropriation for rifles to a negligible sum and have the escort wagons of the Army drawn by mules instead of being propelled by motors! [Laughter.]

But, Mr. Chairman, what about the half-witted Congress of the United States—the Sixty-fourth Congress, I mean? Could not we see, as late as August, 1916, that we should inevitably be drawn into this maelstrom of hell-fire? That was only eight months before we actually were drawn into it. Had not we sense enough to see so short a time ahead a thing which our Oregon critic had so surely seen three years before? And if we could, why did we not? Why did we deliberately sit here and make out a war program and make up a war budget to be extended over a period of three years, knowing that we would be at death's grapple in a little more than as many months? If it was so plain that we should go to war at any moment, why did we not compact the whole program into an emergency scheme, making every appropriation immediately available, and starting every factor and every facility of our national being into operation?

VICTIM OF THE THING WE HATE.

Oh, Mr. Chairman, the utter proneness of poor human nature to evade just responsibility and to reprehend in others the ugly things that most afflict our own records and dispositions! Why not be strictly honest with ourselves and brutally frank with the country? Let us tell the unhappy truth, which is that, for a century and a half, we have emphasized the single warning of Washington against "entangling alliances abroad" and sadly neglected his admonition about a sane preparation against war. We have hated militarism with such a holy hate that now we constrain heaven and earth to avoid becoming its victim. Our aversion to a large standing army is traditional and constitutional—bred in the blood and bone of successive generations. The whole policy of the Nation for all these years has been antagonistic to preparation. No one group of men is to blame.

No one political party above another is to be censured. If anything, some of the most frantic protestants against our plight share tremendously the responsibility for our condition, and conspicuous among these culpable critics are the distinguished gentleman who made that New York speech and the distinguished gentleman who led the applause of the unbridled indictment. [Applause.]

A WANTON CHARGE EXAMINED.

But because we were unprepared is no reason to infer that we are not being prepared; and being prepared, Mr. Chairman, at a pace that has amazed the European nations in arms. Gen. Crozier's testimony, and that of other witnesses, shows conclusively that there is no particle of excuse for the charge that the Ordnance Bureau was indifferent to passing events, that it was supine, that it did nothing to anticipate trouble, that it fell down and has ceased to function. The testimony is to the contrary, the facts are the very reverse; and the evidence and ascertained facts together would warrant a characterization of the charge as wanton.

Gen. Crozier declared that prior to the entry of this country into the war "a good deal of thinking was done, and a good deal of discussion had among officers as to the form of expansion in the event of war." A competent officer was "assigned to the task of getting additional personnel, looking up methods, ascertaining the means of getting reserve officers and of listing these officers." Months before the war the Chief of Ordnance "commenced to inventory the manufacturers of the country who would be capable of doing the kind of work required." Drawings were made of the things that would be needed in largest quantities, photolithographed, and sent out from the mailing lists supplied by technical journals. Letters were written to appropriate industries to get their capacity and to ascertain their willingness to accept contracts, and the replies were card indexed for reference when needed. As far back as the summer before the war Gen. Crozier detailed a West Point officer, momentarily freed from his academic duties, to aid with technical advice the advisory committee of the Council of National Defense in compiling kindred information. Said Gen. Crozier:

We got some valuable assistance from the General Munitions Board in selecting establishments with which to place some of our large orders. That was another function of that board—I mentioned one of them in the early part of my statement. Another function was to inform us as to where there might be found people who could probably do our work and would probably be willing to do it—people who had not been in the habit of bidding for Government work, but might have been making shafting and locomotive axles, or something of that sort, which was allied to our work, so that they probably could do ours. Those gentlemen, from their knowledge of the industries of the country, were able in a number of instances to deliver to us supplies of that kind and to save time in opening negotiations with them.

Gen. Crozier and his little staff informed themselves about the troubles of the European nations and studied these problems with a view to the avoidance of mistakes. The artillery supply tables contemplated a much larger proportion of shrapnel than shells; but the blunder of the British in that regard was escaped by reversing the proposition. After funds became available, under our three-year program, contracts were let as rapidly as plans could be effected. The closed armory at Rock Island, which had been kept closed in spite of Mr. CHAMBERLAIN's prevision of war was reopened, the scattered operatives who could be gotten back were recalled and others secured, and activities at both arsenals greatly increased.

But what did the three-year plan amount to, Mr. Chairman, to a man who considered as imminent the participation of this country in the war? It was insignificant; it was a mere bagatelle. Prior to 1916 no appropriation by Congress for field artillery was as large as $3,000,000. In July and August, of 1916, Congress under the three-year plan set aside $16,000,000. But did that reflect the expectation of Mr. CHAMBERLAIN or anybody else that we would in a few months enter this world war? The direct, crushing answer to the question is found in the fact that when we actually did declare war $171,000,000 was immediately appropriated, and four months later $225,000,000 was appropriated for field artillery. If $396,000,000 was required for this purpose when we entered the war, whereas a few months before we made available only $16,000,000, why did the military genius who indicted his Government in New York stand for this act of imbecility in Washington? He confessedly knew we were going to war; why did he not tell those of us who did not know that we were paltering with a grave question and making ill provision for a desperate situation?

CROZIER'S WARNINGS UNHEEDED.

It takes a great while to build guns; it has taken as long as seven years to design and turn out a great gun in Germany. Gen. Crozier, as far back as 1906, warned the Congress and the country of our utter lack of preparation, and for years successively repeated the warning. In January, 1911, he pointed out that we were "worse off in this matter of field artillery than in anything else," and warned that "in case of an emergency of any importance, the field artillery of the United States would be found positively insufficient." The emergency has come, and not even an appropriation of $16,000,000 immediately before going to war nor of $396,000,000 immediately after going to war can provide all the guns we need as we need them. The Congress can not evade its responsibility, and to attempt to shift it to the War Department and thus to discredit by a charge of inefficiency every branch and bureau of the Military Establishment is an unspeakable injustice.

Over against the harsh and cruel opinions of these political critics I give you the judgment of a great business man, whose technical and practical training and familiarity with events render of real value what he says on the subject. Mr. Vauclain, of the Baldwin Locomotive Works, member of the War Industries Board, in his testimony before the committee, said in response to a suggestion that the Ordnance Department is a little too slow and disorganized:

I have lived with them since the war started and I have not found them disorganized. I do not think we have the maximum of efficiency in any department just at present because all of these departments have had to be expanded so tremendously; but they have maintained an efficiency that has been surprising to me and very satisfactory. I do not think we have a single department, taking them as a whole, that is under 90 per cent efficient. I think when they get their full stride there will be no more efficient organization in the world than we will have.

If anything, there is ground for commendation for the manner in which the officers in the Ordnance Departments of the Army and Navy have arisen to the situation. It is a tremendous task. It is only those who have lived with it as I have lived with it, day and night, Sundays included—I have given my entire time to it—who can realize what a tremendous proposition it is.

I do not care how much time has been lost or apparently lost in the first few months, we could not have been possibly any further ahead.

ENORMOUS CAPACITY NOW.

There is a great deal more, to the same effect, from this man, described by Senator FRELINGHUYSEN as the "driving power" up there. Mr. Vauclain built for the British Government in this country and operated the greatest munitions plant in the world, and we may put a higher appraisement on his definite judgment than on the sensational clatter of politicians who would turn our attention from the battle field to the forum—because they stand in the forum. Asked if the Ordnance Department "appreciated the great necessity of speed in replenishing the supply of heavy artillery along the French border," Mr. Vauclain in December said:

We will have an enormous capacity in that line before we are three months older, and we not only have capacity enough to manufacture all the guns we need for ourselves, but to manufacture forgings and other stuff to send abroad.

At present there are over 600,000 tons of military supplies and of steel forgings lying on the wharves to be sent to France.

I could detain the House with citation after citation from other responsible sources to confirm what Mr. Vauclain says, but what is the use? The Secretary of War himself in his great and inspiring statement last week smashed the line of adverse comment from end to end.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FLOOD. Mr. Chairman, I yield to the gentleman 15 minutes more.

OTHER FALSE CHARGES.

Mr. GLASS. Great outcry was raised about the texture and weight of the cloth supplied by the Government to the troops. I assume that this is another thing that prompted the distinguished Oregon Senator to indict the Government before that New York audience as inefficient in every bureau and department. It was said that the wool content in the uniforms had been diminished and shoddy introduced. The testimony established the incontrovertible fact that whereas, before the war, our 16-ounce melton uniform cloth was 75 per cent wool and 25 per cent cotton, it is now 100 per cent virgin wool, and thus that malicious disparagement was quickly disproved. [Applause.]

I assume that another reason for Mr. CHAMBERLAIN'S sweeping indictment of his Government in New York was the charge that shoddy, or reworked wool, had been introduced into the overcoat and blanket fabrics of the Army. And so it had been; but why did not the critics have the frankness to tell the public that it was done with a view to conserving the wool supply available to this country? When we entered the war there was an embargo on wool shipments from Australia. Our European allies had contracted for large stocks. In this matter, as in others, we entered upon an almost preempted field. It was necessary to be cautious, but the expert testimony is convincing that had there been an overabundant supply of wool the introduction of shoddy into the coarser materials of the Army improved rather than impaired the product. Col. William M. Wood, of

Boston, formerly a member of the Council of National Defense, vouched for by Senator WEEKS, of Massachusetts, as "president of the largest manufacturing establishment in the United States," likewise president of the American Woolen Co., in a letter dated January 28 of this year, says the action of the Government in this particular deserves praise rather than criticism. He says that from 90 to 95 per cent of all the overcoatings made in the world, including some of the finest fabrics, contain a measurable quantity of reworked wool. I shall append the letter of Col. Wood here, in order that we may put the expert judgment of a great wool manufacturer against the amateur opinion of the men who asperse the Government without knowledge of the things they criticize.

ADVANTAGES OF SHODDY.

The recommendation of the manufactures committee to the Council of National Defense looking to the utilization of reworked wool is, in my opinion, worthy of consideration and not to be disparaged, as it has been in some quarters. Reworked wool can be introduced into fabrics which are used for overcoats and blankets so as to improve rather than impair their usefulness. It gives a better fitting property to the cloth, makes a warmer, closer, tighter fabric, provided a judicious proportion is used.

The manufactures committee, composed of patriotic and practical men, gave the Government their best judgment, based on the knowledge and experience acquired through years of effort in practical manufacturing, in recommending the judicious use of reworked wool.

I am willing to venture the statement that in the construction of from 90 to 95 per cent of all the overcoatings made in the world, including some of the finest fabrics, there is used a measurable quantity of reworked wool or shoddy, so that the prejudice which appears to exist against the use of this kind of raw material is unfounded and unjust under modern conditions of manufacture.

As confirming this, I may mention that all the heavier military cloth used for export in this country under specifications given by their respective Governments contains a large percentage of reworked wool.

DELAY OF CLOTHING.

It is charged—and I assume that this furnished the basis of Mr. CHAMBERLAIN'S New York indictment—that there was delay in the delivery of blouses and overcoats to the cantonments. That is true. Gen. O'Ryan testified that his division, comprising 31,000 troops, had a shortage of 900 overcoats. Other officers testified to similar shortages. Undoubtedly there was delay—provoking delay. But, again I say, it would have been a miracle had there been no delays. In the first place, the estimates were for but 500,000 men, then 1,000,000, then 1,500,000. Contracts were promptly let, and the list of manufacturers secured to make these clothes fills 73 closely printed pages of the hearings. Orders were issued for over 2,000,000 overcoats and from April 1 to December 15, 2,000,000 were delivered or in process of delivery. There was delay, of course; but the critics magnify the fault and never tell the country any of the reasons for delay. They suppress the fact that time and again there were strikes among the mill operatives and the garment makers all over the country; that transportation was congested; and that other unforeseen and unavoidable things intervened. But, Mr. Chairman, when Mr. CHAMBERLAIN made his New York speech, I doubt if there was a cantonment in the United States that was not fully supplied with overcoats and blouses and other necessary equipage. Perhaps by that time Gen. Greble had gotten some motor trucks and could dispense with a few of his mules. So the departments here had functioned and were functioning, and the statement made by the Oregon Senator in New York had little, if any, justification in fact.

THE CAMP DEATH RATE.

I assume that Mr. CHAMBERLAIN'S New York indictment of the Government was founded on the charge that base-hospital facilities at the cantonments were incomplete and that the space allowance for the enlisted men was insufficient and that, because of an insufficiency of clothing and because of overcrowding, sickness ensued and the death rate was increased. Of course, it is distressing that our boys away from home should have to die at all; and it is for the very reason that parents everywhere have a keen regard to this situation, and a tender solicitude for their absent sons, that any criticism should have a sure basis of fact and no element of exaggeration. Sadly enough there has been illness in camps, aggravated in some degree by temporary overcrowding. But even this, Mr. Chairman, produced no abnormal death rate. Contrasts are disagreeable and not always fair, but at least some indication as to the utter indefensibility of the attack on the Medical Department of the Army may be derived from the statement that the death rate of the city of Washington is 17 per 1,000 persons between the ages of 20 and 40 years, while the death rate at the Army cantonments has been 8.2 per 1,000; and this rate at the cantonments contrasted with the death rate from disease in the War with Spain is 8.2 as against 20 per 1,000. I do not cite this circumstance with any view to reviving the scandals of the Spanish War, but merely to point out that inefficiency has no politics and the camp casualties of a great war enterprise no party.

FAULTS EXAGGERATED, ACHIEVEMENTS SUPPRESSED.

To begin with, the recommendations of the Surgeon General were strictly adhered to by the Army boards in designing the camps, and in the second place the record shows that the instant overcrowding at two or three cantonments was reported orders were issued to correct the evil by the immediate shipment of additional tentage and the exercise of other proper activities. But if this fact was known it was carefully suppressed by the critics. Scrupulous pains were taken not to give the country this tranquilizing information and every effort made to agitate the country by magnifying the consequences of these initial difficulties.

QUESTIONS SATURATED WITH PRECONCEPTION.

The Surgeon General of the Army is a professional man of international reputation, knowing which the adversaries of the War Department did not dare assail him directly; but it was sought to have it appear that Gen. Gorgas was ignored in all of these matters. I have here in a New York newspaper what I assume is the full stenographic report of the examination of Gen. Gorgas, making five columns of fine print; and I trust the Members of the House will read the testimony and ascertain for themselves whether the spirit of many of the interrogatories reflected a desire to elicit only the truth and all the truth or were saturated with preconception and a desire to reach a fixed conclusion. Let me illustrate what I exactly mean. Gen. Gorgas was asked if he had been "consulted as to the location of these camps," and responded by saying "no." Now, that question suggested two considerations, one related to military ethics and the other went directly to the question of efficiency. Having established an apparent discourtesy to the Surgeon General, what was the next natural question to ask? Should not the Surgeon General have instantly been asked if he approved the location of the camps and if they were in healthy localities? That was the vital point; that is what the people of this country wanted to know. But no such question was ever asked Gen. Gorgas. The direction of the inquiry was instantly shifted, and but for a statement by Gen. Gorgas, voluntarily made later on, nobody could have ascertained from the examination that Gen. Gorgas unqualifiedly indorsed the location of every one of these cantonments as suitable and healthy. [Applause.]

It may be added that in the subsequent examination of the Secretary of War that official declared that a personal representative of the Surgeon General's office was on the Army board of three members which located every one of these camps. The country is made to believe that there was no heat in any of the hospitals at these camps, and that patients are exposed to the full rigors of winter, whereas Gen. Gorgas explicitly stated that while the steam-heating apparatus in some of the camps was uncompleted all of them meanwhile were heated by stoves. And so with the question of pneumonia. The Surgeon General of the Army was asked if the scarcity of clothing and the failure of steam heat had not started the ravages of pneumonia, and he literally startled his inquisitors by telling them that the greatest epidemic of pneumonia he had ever known occurred at Panama, in the Tropics, and that pneumonia was not necessarily produced by cold or exposure.

ANONYMOUS CHARGES CONSIDERED.

Let me give the House one other incident of this investigation tending to show the hostile nature of the inquiry and exhibiting the readiness in some quarters to take as a basis of inquiry anonymous and irresponsible and indeed incredible rumors. When Maj. Gen. O'Ryan was being catechized this extract from a letter was brought to his attention:

I have had the privilege of reading a letter to his mother by a neighbor of mine, now a soldier in camp at Spartanburg. While making no complaint for himself, among other things, he writes the following:

"It is very cold here and trench duty has become nothing but needless exposure of the men. The battalion that relieved ours had 29 men frozen in the trenches, mostly from the hips down, but one man had his face so badly frozen so that when they took his helmet off they took the face flesh with it. Two of the men have died and the others are in the hospital."

If doings like this are whitewashed under Gen. Gorgas's report of "Epidemics of pneumonia" or if any system of censorship aims to prevent men from protecting themselves from utterly unfit officers by reporting it, it would seem that investigation should not stop until the officers responsible are executed for murder.

Gen. O'Ryan was asked what he knew "about that condition," and with the fine spirit of a real man and a soldier, he made this biting answer:

I think it is the duty of anybody who can get that letter and can give us the name of that man, to do it, and let us try him.

[Applause.]

No such incident ever occurred. Gen. O'Ryan pronounced it the mere gibbering of a letter-writing recruit desiring to pose among his people at home as a hero or a martyr. He stated that, from September 1 to December 22, there had been 14

deaths at the Spartanburg camp, 4 of them were of men in a motor truck struck by a train, 2 from tuberculosis, 2 from diabetes, 4 from pneumonia, 2 from myocarditis. Fourteen deaths in four months out of 31,000 men, which, as Gen. O'Ryan pointed out, "is a health record that is almost incredible." [Applause.] But Gen. O'Ryan's severe denunciation of this wanton rumor is buried in a committee hearing, while these monstrous inventions, with a few pathetic incidents that are true, find their way under sensational headlines to the newspapers of the country.

A HIDEOUS NIGHTMARE FLAUNTED.

I wonder if that gruesome fable of men frozen stiff in the trenches of South Carolina was typical of the complaints which incited the Oregon Senator to charge an utter breakdown of the Military Establishment of the United States? If not so, perhaps it was the "confidential communication" that was borrowed by him from another distinguished Senator and which, between the two, was treasured for three weeks in their breast pockets and never brought to the attention of any military authority charged with the investigation of such incidents and the application of the punative code of the Army. [Applause.] It is strange, Mr. Chairman, that Gen. O'Ryan's frank intimation as to the obvious ethics of such cases did not operate to avert the shocking spectacle involved in the subsequent use which was made of the unhappy episode at Camp Doniphan, where a sick soldier is alleged to have been subjected to cruel neglect, resulting in death. The excuse given for not instantly demanding an inquiry by the War Department, with the object of redressing the fault, is that the letter was "confidential." That plainly is not true. The very text of the letter itself shows that it is not so. The avowed purpose of the letter was to prevent the recurrence of such an incident. It was written to be brought to the attention of the War Department through the medium of a public man of rank and influence. It expressly was not written to instigate or to fortify a theatrical public indictment of the Government as both inefficient and brutal. [Applause.] On the contrary, the writer of the letter categorically disclaims any such belief or desire. It was only after its receipt in Washington that the letter was given a malignant interpretation and devoted to a wanton attack on the Military Establishment of the country. [Applause.]

Mr. Chairman, it is difficult to think of this episode in a spirit of moderation. It is impossible to speak of it in temperate terms. To take a single pitiful, tragic case, the like of which has not occurred and probably will not occur at any other camp, and without affording the least opportunity of inquiry blazon it in the public prints to affright the minds and wring the hearts of American mothers with the fear that their sons may be the victims of an inhuman military system, is a thing so inconceivably gross as to make one shudder at the contemplation. [Applause.] As the father of sons who wear the uniform of their country, I protest against the flaunting of this hideous nightmare before my fireside; and, in the name of the women of Virginia and the Nation, I repel the evil suggestion contained in this astounding assault upon the military arm of the Government. [Applause.]

WHAT A CONTRAST!

Contrast the spirit of those responsible for this method of attack with the fine sympathy and patriotism of Mary Roberts Rinehart, whose letter to the Secretary of War is an epic. Mrs. Rinehart, once a trained nurse, now a virile author of note, has great familiarity with Army hospital conditions; and, resenting the intimation that the one pathetic incident relied on to stir antagonism to the Government is typical of the general situation at the cantonments, she wrote Mr. Baker, among other things, as follows:

I do feel that some step should be taken to reassure our women just now. It is only fair to them. It is cruel to allow every mother in the country to judge the medical care that will be given to her boy while in the service because here and there, in the chaos of our readjustment, men have been given responsibilities they are unable or unwilling to fulfill. That we have such men is more than a national misfortune. That they have been placed in positions of trust is a national calamity. But the mothers of the country should know in fairness to themselves that the number of such inefficients is small. We will not rest, we women, until they have all been removed. But that, I know, will be at once. It must be at once.

I have a son in an Army cantonment. He enlisted as a private. He would receive, if he became ill, exactly the same treatment as any other enlisted man in our new Army. And I should have not only no hesitation in placing him in the cantonment hospital, but I should do it with absolute confidence.

* * * * * * *

One hospital I know well. It is typical of other cantonment hospitals. It is under the same Army medical department direction as the others, and it is only right to assume that conditions there are representative. The same rules govern all these hospitals. The same sums are spent on them. The same system is followed. The food is the same, the supplies, the medical staff, the nurses.

And I have never seen a better war hospital than the one at Camp Sherman. I will go further, and say that in its operating rooms, its X-ray department, its eye and ear department, its nose and throat department, its dental department; in short, in its facilities for caring for every emergency and every weakness, it will bear comparison with any civilian hospital.

And what is true of the base hospital at Camp Sherman is true of the others.

I have watched the development of the war hospital system from the beginning, when I saw it first on paper in the office of the Surgeon General up to two weeks ago. I watched because it was a vital matter to me. I had a husband and a son in the service. I am like the other women of this country. I would be content with nothing less than the best. And I feel that we are on the way to the best.

Faithfully, yours,

MARY ROBERTS RINEHART.

[Applause.]

Mr. Chairman, I fervently pray God, in all my public career, to spare me such a reproof as the letter of that noble woman conveys to those who would prefer to hinder their Government by aspersion rather than to help it by counsel. But, sir, that is the way the inquisition has gone. Every delay, avoidable or unavoidable; every minor blunder, defensible or indefensible; every one of the few pathetic cases of neglect, explicable or inexplicable—all these have been arrayed and tortured into proof of a total collapse of this administration. The idle tittle-tattle of irresponsible camp spectators in this country have vied for grave consideration with the startling impartations of the British prime minister to an itinerant American Congressman abroad who, unable to contain the confidential revelations of the great man, quickly "leaked" in the presence of the Government's adversaries. [Laughter.] We see, too, the trail and hear the lamentations of disappointed contractors, and witness the insufferable spectacle of congressional Johnnie Hooks running through the camp crying, "Contracts! Contracts!" when men are dying on the seas and on the battle fields for human liberty. [Applause.]

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. FLOOD. Mr. Chairman, I yield five minutes more to the gentleman.

A BIBLICAL ANALOGY.

Mr. GLASS. I have several times been told that the severest of these criticisms of the Government have emanated from gentlemen who protest an unaffected devotion to this administration, and by that I am reminded, Mr. Chairman, that once there was a lady in the play who protested too much. It also brings to me a vision of that memorable episode of the field of Gibeon, in the time of David, the King, when Joab met Amasa, whose face he caressed and whose body he despoiled. You remember the story. With the customary salutation of affection Joab, with his right hand, took hold of Amasa's beard and asked: "Is it well with thee, my brother?" And Amasa noted not the sword that was in Joab's other hand; and Joab smote Amasa under the fifth rib and laid his bowels in the dust! I might deduce from this scriptural incident that all salutations of personal esteem are not entirely unaccompanied by danger, but that is not the point of the recitation. The thing that chiefly interests me is the fact that the President of the United States has no beard, but has eyes keen enough to perceive the sword in the other hand of those who would savagely slash him in public rather than confer with him in confidence. [Applause.] The other thing about this biblical illustration which it is worth while to recall is the fact that pretty soon after that left-handed jab on the field of Gibeon Joab himself perished. [Laughter and applause.]

PRODIGIOUS ACHIEVEMENTS.

Mr. Chairman, as will have been observed, I have addressed myself so far solely to pointing out and answering some of the criticisms leveled at the Government. I have not intended to imply that no mistakes have been made. I have not meant to say that there have not been delays and inefficiencies and imperfections. There have been all of these, and had there not been the experience of this country in this war would have been vastly different from its experience in any other war, and vastly different from the experience of any other country in any war that ever cursed humanity. But I do mean to say, on the whole, that there have been marvelous achievements, and that we have done as well if not better than was thought possible in the circumstances. When I think of the stupendous nature of the task with which this Government was confronted I have literally a feeling of awe, and when I consider the prodigious progress that has been and is being made I wonder how it could have been done. The expansion in nearly every bureau and branch of the Government has been something almost inconceivable. Before the war the Chief of Ordnance had 10 officers on his immediate staff; now he has 700, nearly all drawn from civilian life, and his bureau has 3,000. For five years preceding the war the average expenditure of the bureau per day was $35,000; to carry out its program now the daily expenditure is $13,000,000. The office space of the bureau

before the war was 15,000 square feet; to-day it is 16 acres. So with other bureaus. In large degree the brains as well as the patriotism of the country have been mustered, and the war machine is getting its head of steam at a tremendous pace.

Some of these civilians who have come here to serve are men of great distinction in business and in the professions, men like Samuel McRoberts, executive manager of the National City Bank, head of procurement, and Guy E. Tripp, chairman of the board of directors of the Westinghouse Co., head of production, all working under the direction of that tested and accomplished soldier Brig. Gen. Charles B. Wheeler, Acting Chief of Ordnance, with an exceptional record in this country and in our insular possessions, himself surrounded by a corps of splendid young officers who have not their superior anywhere to be found.

There has been lack of coordination; there has been conflict of authority; there have been poutings and bickerings over rank and precedence; but still the machine is driving ahead. Its velocity will not be increased, but rather impeded, by perverse politicians pounding at its vitals as it goes along. [Applause.]

Not until the third year of the war could Great Britain venture to apply partially a conscription law. Not until a few months ago could Canada do it in opposition to the rebellious threat of one of its largest provinces.

The CHAIRMAN. The gentleman's time has again expired.

Mr. FLOOD. Mr. Chairman, as I have no more time, may I ask the gentleman from Wisconsin to yield some of his time?

Mr. COOPER of Wisconsin. I am very glad to yield the gentleman five minutes.

Mr. GLASS. I thank the gentleman.

It has not been done as to Ireland, and Australia has twice declined to attempt the system. And yet this Republic, with a clear realization of the situation, instantly applied the democratic method of selective draft, and the country responded with unparalleled spirit of patriotism. Ten million young men marched up and registered for enlistment. Such a thing never happened before in this or in any other country on the civilized earth. Great military cities, known as cantonments, were built almost overnight; and to these, without friction or hesitation, our boys went, offering their bodies and their lives in defense of human liberty. We have sent nearly ten times as many troops abroad as the French and English military missions had expected that we could do in the time required, and we have trained and are training an army far beyond the original estimates. This year we will have in France more than a million men. And what a stupendous work has been done over there in building great piers and wharves and miles of houses for the supply quarters of the Army! Six hundred miles of railroad reconstructed from ports to battle line, and a thousand other great things. Yet our Army is a myth!

Within the time at my disposal it would be impossible to enumerate in detail even the major items of this stupendous Military Establishment. That was done, in masterful fashion, by the Secretary of War on Tuesday of last week, and I wish every American citizen would read that compendium of things which the Government has done to prepare the Nation for this ordeal. And now to have men whose necks are sore from pulling against the tongue end of the war wagon stand up in public places and revile those who have done nothing but go forward is enough to excite popular indignation. Men who obstructed and voted against every shipping measure proposed by the Government have the audacity now to rage against our lack of shipping facilities. Men who wanted to put a stop to the industries of this country and who mercilessly flayed the munition manufacturers of America as murderers now affect alarm and indignation because the Government is not instantly supplied with guns and ammunition. Was it Napoleon or some other great general who said that "An army travels on its belly"? Let me read you this extract from the statement of the Secretary of War last week:

> I want to make but one further observation on this general subject of the Quartermaster and Supply Department. I think it is not unfair for me to say that in the matter of provision of food, no army ever assembled anywhere was fed as regularly, as well, as nutritiously, as appetizingly, as this Army. I think you gentlemen of the committee, and surely the men at the War Department, will agree that, while there have been complaints about other things, the almost unanimous testimony, so far as I know the unanimous testimony of this Army, is that its food has been of the highest quality; that there has been no suggestion of defective quality or insufficiency in the quantity; that its preparation has been of the highest character, and, generally, the very great problem of food supply for this vast and hastily organized group of men has been carried out with most extraordinary success.

[Applause.]

What is true of this department is measurably true of nine-tenths of the Army bureaus; yet every branch of the War Department was comprehended in that incredible assault upon the Government of the United States, in which it was proclaimed to the world that the Military Establishment of the country is a myth.

BLOODGUILTY.

I suppose these expositors of calamity imagine that by these criticisms they wash their hands of the blood of American soldiers! Mr. Chairman, they will wash, and wash, and wash again to no purpose. "The damned spot will not out." Not all the waters of Abanah and Pharpar, rivers of Damascus, with those of Israel combined, could cleanse them of the offense nor obliterate the frightful consequences of their heedless speech. The address of the President of the United States in behalf of a just and permanent peace, to reach the German people in uncensored form, must be flung from aeroplanes at eminent hazard; but these prophets of disaster will have no restrictive audience in the central empires.

Almost at the very moment that Von Hertling had appointed to state his terms, at a time when internal tumult and doubt and distress, reaching out for peace, were threatening to topple thrones and banish dynasties, Mr. CHAMBERLAIN, without warning of any description, projects this astonishing attack on the government of his country!

The CHAIRMAN. The gentleman's time has again expired.

Mr. LONGWORTH. Mr. Chairman, the gentleman from Wisconsin has promised me 10 minutes, and with his permission I shall be glad to yield it to the gentleman from Virginia. [Applause.]

Mr. GLASS. That is, indeed, gracious, and I thank the gentleman.

Without qualification of any sort, in unmeasured terms of reprehension, indifferent alike to titled consequence and to subordinate degree, to epaulet or bar, the Oregon Senator comprehended the entire Government of the United States, in all its branches and bureaus, in an accusation of utter impotency! The Military Establishment, he said, was a myth—it was nonexistent! That's what Reventlow and Terpitz had been teaching. That's the doctrine with which the scornful masters of the German people had been solacing their discontent and quieting their fears of disaster.

How obliged to Mr. CHAMBERLAIN and his kindred spirits will the Kaiser and his kindred spirits be for thus publicly confirming their contemptuous estimate of American willingness and American capacity to fight for American freedom! Every soldier in the German trenches will read the amazing indictment; every peasant in the land will know that, speaking from a high and responsible place, charged with intimate knowledge and not inconsiderable power, this Oregon Senator openly proclaimed a shameful breakdown of this Nation in war. By this speech the declining morale of German citizen and soldier will be retrieved; their courage to hold fast and fight on will be inspired; their resolve to dictate terms on a victorious field will be renewed; the struggle may thus be long protracted. Who can not foretell the sequel to this? Thousands of American boys who might have escaped may be maimed in battle; other thousands who might have survived may find their last resting place in the plains of Flanders or on the heights of the Argonne. Yet these mad soothsayers of evil, with dramatic unction, imagine that they are acquitted of bloodguiltiness! [Applause.]

THE REAL VISION.

Why may we not, Mr. Chairman, have an end of these bickerings, these petty divisions, these perverse attempts to retard the Government in its great and pressing enterprises? Why may we not, in the place of these, bend every effort toward a unity of spirit and purpose to win this war? I have in mind an incident which I shall remember to my dying day, and I could very earnestly wish that I possessed the facility of speech impressively to depict it to the House. When the Congress had under consideration the selective-draft bill the governor of my State came to Washington for an interview with the President to protest against requiring Virginia boys to be drafted, instead of permitting them to volunteer. He also desired that State military units with a history and traditions dearly cherished should be permitted to retain their identity. A kinsman of J. E. B. Stuart, the greatest cavalry leader of the Confederacy, the Virginia governor, with all the sentiment and tenderness of an ancient Commonwealth in his vision, presented his case to the President with pathetic earnestness. When he had finished, the President, touched and gravely considerate, told Gov. Stuart that the one thing we most needed to realize just then was the fact that this is a Nation. It is not Virginia's war, he said, nor New England's war; not a war of the East or of the West or the North or the South. It is America's war. There should be intermingling of troops from all the States. We should submerge provincialism and sectionalism and party

spirit in one powerful flood of nationalism, which would carry us on to victory. The vision as the President saw and interpreted it was full of heart and inspiration.

And, Mr. Chairman, why may it not be so? Why may not the fathers and mothers of sons who are going across the seas to fight the great battle for freedom have the precious privilege of feeling that their boys are flanked on either side by a brave American comrade? What matters it whether he be from Massachusetts or Virginia, from Maine or Mississippi, from the Atlantic seaboard or the Pacific, from the Lake region or the Gulf, just so he be a true American soldier, willing to die for his comrades and his country. [Applause.] And when in the providence of God they shall come back and march in grand review, why may not all of us praise Heaven that, since they equally shared the perils of the struggle, equally they shall merit the honors and gratitude of this great united Nation? [Great applause.]

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. HOUSTON having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Young, one of its clerks, announced that the Senate had passed joint resolution of the following title, in which the concurrence of the House of Representatives was requested:

S. J. Res. 128. Joint resolution granting to certain persons in the active war service an extension of time within which application for insurance may be made under section 401 of the act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, as amended by the act approved October 6, 1917.

The message also announced that the Vice President had appointed Mr. FRANCE and Mr. HOLLIS members of the joint select committee on the part of the Senate, as provided for in the list of February 16, 1889, as amended by the act of March 2, 1895, entitled "An act to authorize and provide for the disposition of useless papers in the executive departments," for the disposition of useless papers in the Department of Commerce.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

The committee resumed its session.

Mr. COOPER of Wisconsin. Mr. Chairman, I yield 30 minutes to the gentleman from Illinois [Mr. MASON]. [Applause.]

The CHAIRMAN. The gentleman from Virginia yields back three minutes of the time yielded him.

Mr. MASON. Mr. Chairman, I ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. Without objection, it is so ordered. [After a pause.] The Chair hears no objection.

Mr. MASON. Mr. Chairman and fellow Members of the House of Representatives, "With malice toward none and charity for all," I desire to speak to my colleagues for a very few minutes upon the very live questions that confront our people. If we ever had any doubt that Sherman was right when he said war was hell, that doubt has been entirely removed in the past six months.

The offensive war of the uncivilized is for land and other things of value. The defensive war of the civilized nation is for the purpose of securing an honorable peace. While we must not let up one bit in our preparations and prosecutions of this war, it would be barbarism to refuse to discuss peace, and it is wicked and undemocratic not to allow everyone who is interested and who must bear the burden of tax and blood to speak their honest convictions as to what would be an honorable peace for our country. I see no profit in faultfinding, except where immediate correction can be made without interfering with our preparation for this war, and I regard it as unwise to discuss in party caucuses anything that affects the successful carrying on of this war, nor do I intend, if I can master myself, to indulge in party claims or party criticisms. I pray God that during this war we may be big enough to wipe out this middle aisle which separates an American Republican from an American Democrat. [Applause.] But I am told there is to be a new party formed, that which places upon its banner "No peace without victory." Of course, our President will not join that party, for his greatest message, a milestone in the march of civilization, was that message which declared for "peace without victory," and none of us who seek reelection need be afraid of that party, for those who are willing and anxious to continue to give the life of every American and every dollar of American money to transfer the territory of one nation to another will not be here to vote, they will have sacrificed their lives in the trenches of Europe.

You will remember that when the great Gladstone made the treaty of peace after the defeat of the British of Majuba Hill, Sir Michael Hicks Beach accused him of perfidy; that he had made a treaty of peace after the defeat of the English arms, and therefore lost prestige for the English arms. Gladstone was a Christian statesman, and his answer was:

The world knows that England can conquer South Africa, but we want the world to know that England can do right.

We want to do right in this war, and we will do right in this war. We will not abandon for one moment the league of honor in which we, with our coworkers, fight the Imperial Government of Germany, nor will the American people allow our coworkers to drag us into interminable and unending war to settle the ungodly intrigues of royalty 50 years ago. [Applause.] The people of the United States are patient, there will be no riots that will shake our Government, for they know that in the cool, quiet days of next November they will be permitted to speak upon questions of life and death about which heretofore they have been silent. We are torn asunder now with plans for a new war board. The Constitution of the United States that gave life to this Congress and to the President and to the Supreme Court provides the war board to be elected by the people, and every one of you gentlemen are elected as a member of the war board under this provision of the Constitution which provides that Congress should make, "Rules for the government and regulation of the land and naval forces" of the United States. If you have surrendered that power it is no time now to complain in the face of the enemy. As one of those who voted against war and opposed conscription for foreign service but pledged to the support of my country I say, so far as my observation goes in visiting the great cantonments, that the work of the Secretary of War has been marvelous and almost past belief. [Applause.] We knew, of course, when we declared war that there would be mistakes; that there would be graft and boodling, which is as natural a part of war as breath is to life. For God's sake let us quit fighting each other and fight the Kaiser. [Applause.] This is my theory in this war. I have great honor for the Secretary of War, though I do not know him. There is one thing my colleague from Virginia [Mr. GLASS] omitted to say. The Secretary of War had the courage to admit that he had made a mistake or delay, and he went about correcting it. You can trust a man like that. [Applause.]

We, being civilized and in the war only for the purpose of peace under the rule ought to look for peace at the first possible moment it can be had with honor.

The accomplishment of this peace is not solely an Executive problem, for, while the President is Commander in Chief of the Army and Navy, as I have stated, Congress should make rules governing the Army and Navy, because we are the Congress, and the people in the last analysis govern Congress, and if the people do not govern this one they will the next one. Action by Congress in these circumstances is not without precedent. I remember somewhere in my reading when an amendment was offered to an appropriation bill fixing the salary of a minister to a country that the President would not recognize, and it was offered on the theory that the Congress wished the President to know what the desire of Congress was.

In his last message the President of the United States—and he has frequently so demanded—said that the German people should speak, but of course he did not mean that the American people should not be heard on this great question. He expects that they will be heard, and the Congress should have the courage to demand to be heard for themselves and for the people. While his suggestions open an inviting field for discussion, the real thing that stands in the way of peace to-day—look it in the face, tell the truth about it; I know we are great for conservation here, but, for God's sake, let us quit conserving the truth and give out a little of that old-fashioned commodity—the truth is, that the thing that stands in the way of peace to-day, that peace that would solve all of these questions that confront us, and which have put us in trouble is what disposition shall be made of Alsace-Lorraine. Our French coworkers, God bless them, in this work are demanding that that territory, including the people—95 per cent of whom speak German and 80 per cent of whom are German—and the right to govern shall be turned over to our coworkers, and our good President is of the opinion that unless that is done Alsace-Lorraine will still stand as a menace to the peace of the world.

I beg leave, very respectfully—I may say humbly—and in the spirit of friendly counsel and not in the spirit of fault-finding, to say that the determination of whether the German or the French shall govern Alsace-Lorraine or whether they shall govern themselves, as suggested by the despised socialist, is not an American question. It is a question for the people of Alsace-Lorraine. The Republic of the United States was not born when that territory was taken by the French from the Germans, and nearly half a century has passed since the Germans took it from the French. And you gentlemen may con-

vass your districts from one end to the other and you will not find one father or mother who is willing to give their sons to settle a title of real estate in Europe. [Applause.]

I know you will meet constituents who will say, and you will meet editors who will write, that we will give every drop of blood in America to put Alsace-Lorraine back into France, but you will find that they safely stand under the American flag, with no danger of being conscripted into the trenches. And when an editor writes an editorial to the effect that he is willing to give every dollar to his country and every drop of your blood and mine, he is easily and cozily settled in the editorial sanctum, exposed to no danger beyond, possibly, the gout or apoplexy. [Laughter.]

Now, let us be fair with ourselves and let us be fair with our President. Let no man say that we do not love France. We do. When we hear the Marseillaise it brings a throb to our hearts like the sound of the Star-Spangled Banner. We know, however, those of us who have studied history, that the Franco-Prussian War was brought on by the Emperor of France, and it was brought on for conquest. Of course, the French people have established now a Republic, and we are more in sympathy with it. That happened during the war; but, as a matter of fact, it is only natural that they should want to see Alsace-Lorraine returned, and we would like to see it done. Anything that France wants we are for, but we want them to be for something that we are for. We do not want them to ask us to sacrifice the blood of American youth and break the hearts of a million American mothers to correct the brutality and blunders of the Kaiser and the Emperor 46 years ago. [Applause.]

But our President says if it is transferred back to France it will be the means of establishing peace. Now, again, very humbly and very respectfully, I can not reach that conclusion, and I must be allowed to think. I stood in the Place de la Concorde, in Paris, where that great monument has been erected by the French people to Alsace-Lorraine, and on the monument it says, "Taken from the French by the Germans," on such a date, "in 1871"; and below it says, "Retaken by the French on —— day of ————, in the year ——."

And that monument has stood there for more than 40 years, a menace and a threat of war and encouragement to Krupp and other munition makers to keep their guns ready to "go to it" at any time.

Now, my colleagues, if for any reason this valuable territory should be forced back into France, look at it reasonably. Do not get mad about it. I will not get mad at you when you stand up here and say you are willing to give all the blood of this country except yours for that purpose.

I do not want you to get mad with me. But look at it! Just look at it! If you move it deliberately and against the will of the people of Alsace-Lorraine back into French territory, that monument that is a standing threat of war, will not be written in French. It will be written in German and moved from Paris to Berlin, a continuing threat of war. I believe that if the poor, "despised" Bolsheviki could have his way for a few minutes and those people be given self-government and allowed to govern themselves, Alsace-Lorraine would be neutral territory and thereafter an island of peace, and so far as that land is concerned the world would be at peace. There need be no threatening monuments either in Paris or Berlin.

But, Mr. Chairman, I did not intend to discuss, and shall not discuss further, the solution of the greatest stumbling block in our way to an honorable peace, but simply to emphasize the fact that its disposition is not an American question. You, my colleagues, are the custodians of the Treasury of this country, you are the custodians of the blood of the American youth, and I, as one of your Members being willing to support this Government and support my country in this great war, will never vote to give the life of one American boy in a war of conquest, not one drop of American blood to settle questions in which the United States has no interest and not one American life to correct the blunders and brutalities of the Kaiser and the Emperor 50 years ago.

If any of my colleagues wish to settle this question, I recommend that they read an editorial in the world's greatest newspaper, which, of course, is published in Chicago. This paper has been the most warlike of any of the great papers, and shows it is in earnest by the actual enlistment at the front of its editors and employees. That great war newspaper early in October last stated editorially that the return of Alsace-Lorraine to France might be a part of "British war aims as well as part of French war aims, but that it was not a part of the war aims of the United States." Since the publication of the secret treaties between our allies we have discovered that when we went into the war for democracy, our good friends, the English, the Russians, and the French, had agreed just how our English cousins and our French brothers were to slice up Germany, and that noble democrat, the Czar of Russia, was to have a slice of Turkey. We have also learned by the publication of the secret treaties that if we were successful in our fight for democracy that the King of Italy, that great commoner, could turn down the Pope and become sovereign over the farmers of a part of Austria.

And some of you may be were surprised when you discovered that our good friend, the Mikado, who does not want to own land in this country or send his children to the schools of California and does not want the Sandwich Islands or the Philippine Islands and who while in our fight for democracy has not found it convenient to send a man or a ship to help us while we are helping him. I say some of you may have been surprised that our Japanese friends, while expecting our assistance in this fight for democracy, had a secret treaty with the great democrat, the Czar, whereby they were to fight your Uncle Sam in the Far East in case action should arise and we need the whipping. Mr. Chairman and gentlemen, I give all honor to our President. In the very outset of his message he says that America stands against these secret treaties, and I call attention to them not for the purpose of showing any camouflage covering our cry for democracy but for the purpose of appealing to you as Americans to determine what are American questions that we are willing to sacrifice the lives of our sons for.

I have stated the great war newspaper in Chicago has for its leading editorial Saturday, October 13, 1917, the following:

THE UNITED STATES AND ALSACE.

The restoration of Alsace-Lorraine to France may be a British as well as a French war objective, as proclaimed by British leadership. It is not an American war objective.

Sentimentally many Americans would be glad of a result that would give back these Provinces. But, regardlesss of sentiment, the American Government could not rightfully offer one conscripted soldier to this cause.

Alsace-Lorraine must offer a value in American prospects before the life of an American conscript could be justly spent in such an issue.

* * * * * * * *

At least we are justified in thinking that it is not worth conscripted American soldiers. American sacrifices are for American values. Territorial adjustments in Europe concern us only as they may eliminate future war which may in turn involve us. If the return of Alsace-Lorraine meant that Germany would strive for 50 years to get it back, and in so striving put the world in hazard again, it were better that it remained under the German flag.

When the United States is safe—not when democracy is safe but when the United States is safe—the purpose of this war has been served.

Of course, this great war paper has published interviews by distinguished patriots of Chicago recommending the lynching of statesmen of my build [laughter], and for using the same argument that they use now. We have got a lot of brave fellows in America with their arms in the Treasury clear up to the elbows—fellows who call everybody a traitor who catches them stealing. Their mouths are thoroughly patriotic, but their legs are all pacifist. [Laughter.]

Mr. Chairman, again this great war newspaper has for its leading editorial Thursday, December 6, 1917, a clearly defined and well analyzed statement which shows the difference between fighting for the United States and fighting to help the downtrodden people of some other country. Let me read a few extracts from this truly great editorial:

THE UNITED STATES FIGHTS FOR THE UNITED STATES.

* * * Such things must be left to the individual selection of the citizens, to their consciences and sense of right. A nation must not compel citizens for other than the well-being of the nation to which they owe allegiance. The obligations of a citizen do not extend to other than his own nation. He may elect to further the cause of justice anywhere in the world, to fight for the downtrodden, and to be a champion of the weak, but no government founded upon fairness and trying to do justice to its citizens may force its citizens to give up their lives for other than the well-being and security of their own nation.

Therefore the United States seeks one thing in this war. That is the security of the United States. American volunteers by the million might go to war for Belgium, but no American conscripts could be employed in such a war unless the results of the war for Belgium would affect the United States.

* * * * * * * *

Altruistically and philosophically we may be interested otherwise than as conditions and products of conditions affect the United States, but we can not rightfully conscript soldiers to fight to change conditions that would not affect the United States.

When we are hung with those who thought with us six months ago, we will have a lot of excitement and a lot of editors will be hanging on the other rung. [Laughter.]

I think, Mr. Chairman and colleagues, that you will understand what I mean when I call attention to the difference between giving the lives of our sons for American ideals and the forcing of American youth to settle the ancient wrongs and territorial boundaries of Europe.

The President talks about the restoration of Serbia and that the King must be placed back on his throne. We have not forgotten that Serbia lit the match that set the world afire. We have not forgotten the Serbian hospitality that murdered a man and his wife. We have not forgotten that the Emperor of

Austria made demands upon Serbia which were wicked and outrageous as punishment for these two murders. Both Kings are wrong, neither of them stood for democracy. [Applause.] But again I say to you it is against the American doctrine, it is against the interests of America to entangle itself or endanger its life, the life of this Republic, in seeking to adjust European differences. Both Webster and Clay supported a resolution tendering the sympathy of the United States to Greece in her great struggle for democracy, but both of them disclaimed any idea that it was a part of the American policy to make war on account of that question. This same doctrine is announced in this very newspaper that I have quoted from, that stood so strongly for the declaration of war and stands for the prosecution of war until the causes for which we went to war have been accomplished.

As to Serbia and Belgium, the belligerents agree to return the territory and the amount of money to be paid for restoration is not an American question. Our American lives must not be sacrificed to the juggernaut of a collection agency.

Mr. FLOOD. Mr. Chairman, will the gentleman yield?

Mr. MASON. Yes.

Mr. FLOOD. I would like to ask the gentleman, if he will permit, when an agreement was ever made to return that territory?

Mr. MASON. The gentleman misunderstood me. I think this is true. This does not come out of my time, Mr. Chairman, because the gentleman from Virginia controls the time, and I have only a few minutes.

Mr. FLOOD. I have only a few minutes' time.

Mr. MASON. Then I will answer you in this way: In substance there can be a meeting on every proposition made by our President, and any man who has studied diplomacy can see that there can be a meeting of the minds of the United States and Germany, except upon the proposition of the surrender by Germany of the control of Alsace-Lorraine; and if I had the time I think I could convince the gentleman of that.

But I insist we are not to be used to collect the money. Our blood is too sacred for that. Let me illustrate as to Belgium. Our allies demand not only a return of territory, but an indemnity. Germany may say, "I will give you one billion." Our friends may say, "We demand five billions." Are we to be still continued in the war year after year to make sure that those four other billions will be collected?

The killing of our sons will not bring back the Belgian sons, and our boys will be of more use to poor Belgium in shop or between the plow handles at home than they will be in European graves. [Applause.]

I insert the messages of our Presidents, beginning with Washington and ending with McKinley and Roosevelt, showing the fixed policy of our Government to keep out of European entanglements. I beg leave to quote first from John Adams's diary in 1782:

It is obvious that all the powers of Europe will be continually maneuvering with us to work us into their imaginary balances of power. They will all wish to make us a make-weight candle when they are weighing out their pounds. Indeed, it is not surprising, for we shall very often, if not always, be able to turn the scale. But I think it ought to be our rule not to meddle, and that of all the powers of Europe not to desire us, or perhaps even to permit us, to interfere if they can help us. The public negotiations and secret intrigues of the English and the French have been employed for centuries in every court and country of Europe. Look back to the history of Spain, Holland, Germany, Russia, Sweden, Denmark, Prussia, Italy, and Turkey for the last hundred years. How many revolutions have been caused! How many emperors and kings have fallen victims to the alternate triumphs of parties excited by Englishmen or Frenchmen! And can we expect to escape the vigilant attention of politicians so experienced, so keen sighted, and so rich? If we convince them that our attachment to neutrality is unchangeable, they will let us alone, but as long as a hope remains in either power of seducing us to engage in war on his side and against his enemy we shall be torn and convinced by his maneuvers.

I also quote from Washington's Farewell Address, 1796:

Europe has a set of primary interests which to us have none or a very remote relation. Hence she must be engaged in frequent controversies, the causes of which are essentially foreign to our concerns. Hence, therefore, it must be unwise in us to implicate ourselves by artificial ties in the ordinary vicissitudes of her politics or ordinary combinations and collisions of her friendships or enmities.

Just a few words from Mr. Jefferson to the President in 1823:

I have ever deemed it fundamental for the United States never to take an active part in the quarrels of Europe. Their political interests are entirely distinct from ours. Their mutual jealousies, their balance of power, their complicated alliances, their forms and principles of government are all foreign to us. They are nations of eternal war. All their energies are expended in the destruction of the labor, property, and lives of their people. On our part never had a people so favorable a chance of trying the opposite system of peace and fraternity with mankind and the direction of all our means and faculties to the purposes of improvement instead of destruction.

One word from Mr. Madison to Mr. Monroe in 1823:

A participation in (a congress proposed by Mr. Canning for the settlement of the difficulties between Spain and her colonies) would not be likely to make converts to our principles, whilst our admission under the wing of England would take from our consequence what it would add to hers. Such an invitation, nevertheless, will be a mark of respect not without a value, and this will be more enhanced by a polite refusal than by an acceptance, not to mention that an acceptance would be a step leading us into a wildness of politics and a den of conspirators.

And a few words from President Monroe in 1824:

Separated as we are from Europe by the great Atlantic Ocean, we can have no concern in the wars of the European Governments, nor in the causes which produce them.

President John Quincy Adams, in 1826, says:

Compare our situation and the circumstances of that time (that of Washington's Farewell Address) with those of the present day, and what from the very words of Washington then would be his counsels to his countrymen now? Europe has still her set of primary interests, with which we have little or a remote relation. Our distant and detached situation with reference to Europe remains the same.

Mr. Van Buren, Secretary of State, to Mr. Moore, minister to Colombia in 1829:

It is the ancient and well-settled policy of this Government not to interfere with the internal concerns of any foreign country.

A word from Daniel Webster, Secretary of State in 1842:

And the perfecting of this system of communication among nations requires the strictest application of the doctrine of nonintervention.

President Fillmore claimed that in this doctrine of "neutrality and nonintervention the United States have not followed the lead of other civilized nations, but that they have taken the lead themselves and have been followed by others."

I refer you also to Secretary of State Cass, who in 1859 declined to interfere in Mexico, although he sympathized with the constitutional party.

I will not quote further, but recommend to the student of this well-established policy of noninterference Moore's Digest of International Law, volume 6, which includes opinions of many of the Secretaries of State and many of the Presidents, including messages from McKinley and Roosevelt. Just one sentence from President Roosevelt's message in 1904:

Ordinarily it is very much wiser and more useful for us to concern ourselves with striving for our own moral and material betterment here at home than to concern ourselves with trying to better the conditions of things in other nations.

We know we are at war and must go through. What does "go through" mean? We declared war for the freedom of the seas. That is now conceded by all belligerents in all propositions of peace. Does "go through" mean we shall let our children go cold and hungry, our people ground to death by taxation, that Great Britain, our coworker, may keep her "kill"? Shall we fill European graves with American youths that our Japanese coworkers may keep her democratic hold on German colonies?

Are we to continue to bear sacrifices? Are we to continue to bear what our boys yesterday received from a submarine? Are we to decide questions outside of American policies and outside of the interests of the United States?

We will "go through"; we will not stop, even while considering peace; but it is due the President that we let him know how our constituents feel, while he is considering these hard and new diplomatic questions. Every loyal man in America should speak. Some man husking corn in Illinois may have a good idea. Let us have it! Some man in the store, factory, or office may contribute to our needs. Some lone sentinel standing guard at night under the stars may give wisdom to our counsels. This city of Washington has no monopoly on brains and patriotism.

The closing words of the President's last message finds a responsive chord in every American heart. He said:

The hand of God is laid upon the nations. He will show them favor, I devoutly believe, only as they rise to the clear heights of his own justice and mercy.

It is for that mercy that I plead, mercy for the starving millions all over the world, not only for Belgium, France, and Germany, but for the cold and undernourished women and children of our own country; mercy for the American boys who have been forced into sickness and death in a foreign land; mercy for the unhappy mothers of our own land. One friend writes, speaking of his wife and of his son somewhere in France, he says:

Mary sets Jim's place at the table regularly. She knits and prays for him constantly and in the night calls to him in her dreams.

Mr. Chairman, there are hundreds of thousands—a million—Marys—mothers and sisters. They have some rights here. They are not cowards. They are not unwilling to sacrifice in defense of this land. They know, if they have been through

high school, that never before in the history of the United States have Americans been conscripted to settle ancient questions pending between other nations. They know as well as you and I that what our dear country has done for democracy outside of the United States, has been done by example and not by the sword. When the Bastille fell Lafayette sent the key to Washington, in no compensation for the sword, but on account of the illustrious example. The Statue of Liberty in the New York Harbor, was given by the French not because in their war with Great Britain we violated neutrality as laid down by Washington but because in all their struggle for self-government, when they made reprisal in one day for a century of kingly wrongs, they were fighting in the light of the American Declaration of Independence. In that light and by reason of our example, England, against whom we rebelled, has broadened into a constitutional government.

Kossuth, the Hungarian patriot, said here in Washington that in all his struggles he had before him our Declaration of Independence. Bolivar, who laid the foundation of self-government in South America, said he was led by the light of our Declaration of Independence, and all of the little republics that have sprung up and are prospering under the rule of self-government do it in imitation of the splendid example of our fathers and without the aid of the American sword.

I know that if you ask your constituents how they feel upon this question of giving American boys to settle a real estate title in Europe you will be branded as a pacifist, possibly as a traitor. Ask your people, and then let our President know. People are not for peace at any price, but for peace with honor.

In conclusion, Mr. Chairman and gentlemen, we went to war with an open declaration that we wanted no vengeance, no idemnities, but a demand for our ships—the freedom of the seas. That demand is answered by every proposition of peace made by all the belligerents conceding the freedom of the seas.

I believe that answer has been conceded by every proposition as to the terms of peace. We have had that victory. We have had a greater victory. We have seen the time come when the Kaiser has been obliged to consult the Reichstag before getting a man to accept the chancellorship of the Imperial Government of Germany. And I say to you, friends and colleagues, that the quicker we talk truthfully and fairly with our constituents, and the sooner we let the President know how the people feel about these things, the sooner we will have an honorable peace. Do not be afraid of being called a traitor or a pacifist. The people of all the world want peace, and it will come. Christ was a pacifist.

> And seeing the multitudes He went up into a mountain, and when He was set His disciples came unto Him, and He opened His mouth and taught them, saying:
> "Blessed are the merciful, for they shall obtain mercy.
> "Blessed are the peacemakers, for they shall be called the children of God."

[Applause.]

Mr. COOPER of Wisconsin. I yield 20 minutes to the gentleman from Ohio [Mr. FESS].

The CHAIRMAN. The gentleman from Ohio [Mr. FESS] is recognized for 20 minutes. [Applause.]

Mr. FESS. Mr. Chairman, members of the committee, at a time like this, when the whole world is at war and when there are statements made from responsible authorities, especially holding responsible positions in the Congress of the United States, that raise questions of whether we are utilizing all of our powers to the best of our ability, it is rather a serious matter for anyone to offer anything that might seem to be criticism. When the war got in full motion I was somewhat concerned whether any criticism ought to be offered at all. I realized that no one ought to say anything that might give comfort to the enemy. So about 10 days ago, upon my own invitation and solicitation, I had an interview with one of America's greatest engineers, whom I happened to know personally very well, and I asked him whether, in his judgment, we were lax in what we were doing in the matter of war machinery. He said to me very frankly that the first thing that was needed is a large vision, so that we might comprehend what we were called upon to do, and also a facility that could utilize in detail our wonderful resources which were at hand. He took a piece of paper and graphically illustrated to me what he thought could be done and should be done by requiring a weekly checking up of all the war activities to insure coordination to avoid what seems to me the result of inefficient methods so apparent to anyone who is willing to look at the facts squarely. I frankly say to you that the interview was sought because of the coal order of Mr. Garfield that indicated to me that we lacked from the outset a full comprehension of the situation on the one side, and a marked inefficiency in management on the other.

Mr. Chairman, I asked for time enough to have read to the committee one of the most illuminating and informing statements, not from the pen of the engineer whom I have mentioned, but from a staff writer of one of the greatest Democratic newspapers in the world, in which the condition as it exists to-day is most graphically pointed out in a spirit of helpfulness and not of criticism, conceding the greatness of the problem presented by the war as well as the great work that already has been done by the War Department, but also the most remarkable fertility in suggestion of what ought to be done now that is not being done. Here is a good example of what character of criticism should be employed, pointing out the weakness, the reason why, and the method of correction. I therefore am going to ask the Clerk to read in my time one of the fairest and most able statements bearing directly upon this situation about which Senators have spoken during the past few days and to-day one of our distinguished colleagues has addressed the House. I ask Members to pay special attention to it because of its fairness and its wholesome criticism, and especially the suggestions by which we could have avoided what we are now suffering.

The Clerk read as follows:

[From the New York Times Magazine, Feb. 3, 1918.]

AMERICA'S HIT-OR-MISS WAR METHODS—CRITICISM OF THE SYSTEM CONTINUES AT WASHINGTON, BUT IT HAS SHIFTED TO A BROADER BASIS—LACK OF REAL COORDINATION ON SCIENTIFIC LINES.

Criticism of the War Department has not stopped with Secretary Baker's defense of the charges brought against his administration, as convincing as that defense was in certain parts. But the line of attack seems to be shifted from the multitude of "details of delay," as the Secretary called them, to what is supposed to be the underlying cause of the country's troubles in getting ready for war.

The newer form of criticism is remarkably free from an appearance of partisanship. It is not captious. It passes beyond overcoats and blankets and lack of hospital facilities to a greater fundamental lack, of which all the miscellaneous defects have been the inevitable results—the lack of an organization working on a basis of ascertained facts and on the engineering methods indispensable to quantity production. This diagnosis of the difficulty comes from the engineers and the experts working within the Government, some of them in the War Department itself, who make a point of finding no fault with what is wrong without being ready to suggest a remedy.

It is a matter of professional ethics with them not to uncover a hole before they know how to fill it up. They take into full account the great things Mr. Baker has accomplished in their outline of methods by which he might have accomplished more. But they take in departments other than the War Department in their criticism, for they say Mr. Baker alone could not have done much more than he has done without cooperation of other war activities. His failure to get such cooperation is attributed more to his course as chairman of the Council of National Defense than to his administration strictly within the lines of his own department.

Military preparation, industrial preparation, rail transportation, ship tonnage, coal production, and so on, have never marched in step with each other for a moment since the beginning of the war, and at this moment the country is suffering from an industrial jam. The jam has been growing since last summer, and even in its early stages it was sufficient to account for a large part of the delay in having soldiers properly equipped.

The country has talked a great deal about this being an industrial war, a conflict of factory power, of food production. The phrases themselves have become hackneyed before the public has learned what they mean. The word "coordination" has been worked threadbare in the oratory and the private discussion of the war. But there has been no coordination comprehensive enough to keep all the activities in touch with each other. The war machine has done too much of this and too little of that, has gone ahead too fast on some things and lagged too far behind on others, apparently oblivious to the fact that many of the things produced by speeding up were useless impedimenta until they could be used in connection with the things in the production of which there has been delay.

Such, in brief summary, is the criticism of the engineers of production, not merely of the War Department, but of the entire administration of the business of war

"This war," said one of these engineering experts the other day in commenting on what he had seen from the inside, "should be a matter of quantity production, perfected as to the assembling of parts and not an accomplished fact until the finished product is delivered at the point where it is to be used. The finished product we have in mind is an American Army equipped for this sort of a war and delivered for use in France. The wide diversity of the industries and activities entering into the enterprise should not blind us to the fact that they are all vital parts of the same undertaking and that they should be in tune with each other as to time of delivery and putting together.

"The training of every soldier in every American camp and cantonment has a direct bearing on the mining of every ton of coal, the shearing of every sheep, the making of every pair of shoes, of every rifle, and with the laying down of every keel for a merchant ship. A regiment of soldiers held at an American port of embarkation because there is no troopship for them is of no use to France, no matter how well equipped it may be. A heap of blankets piled up in the factory because they can not be shipped are of no use to a lot of shivering soldiers in a remote camp, no matter how well the item of the blankets may look in a list of things that the Government has bought and paid for. There are no restorative qualities for a sick soldier in the cantonment contractor's blue-print plan of a base hospital. Gun carriages rushed ahead into the jam of commodities at the terminals long before there are guns for them will not help in the production of an American barrage on the west front. And so it goes, through all the long list of the parts to be produced for the finished product delivered and ready for use in France.

"Without forgetting for a moment that the American soldier is a human being with a soul and the inspiration of patriotism and loyalty, we must, for the purposes of this problem, think of him as a commodity as we think of his rifle as a commodity. The soldiers in the aggregate—that is, the man power—are also a commodity. So is railroad transpor-

tation and sea transportation and storage space, as well as all the munitions and supplies. They are all useless unless brought together at the right time and at the right place. With its present organization the War Department, and the Government as a whole, has no adequate means for the assembling and the delivery of its product, no matter how much partial excellence or efficiency there may be in this or that separate line of the whole work.

"There is no way to accomplish such assembly and delivery other than the engineering way of treating the whole thing scientifically as a piece of quantity production, with one executive with full authority over all. The appointment of Mr. Stettinius as surveyor general of supplies does not give us the solution by any means. The man is all right; he has so proved himself in a place of real authority as supply purchaser in America for our allies, but the job made for him in our war administration is all wrong. He can survey and advise, but he can not do. He can be only one more barrier in the thick line of entanglements between our Army and the one man who has real authority, the President.

"It is not difficult to imagine even now what will happen when a man like Stettinius, without real power, tries to get results by persuasion from a man like Quartermaster General Goethals, if the two do not happen to agree. We will have another Goethals-Denman situation, with nothing accomplished.

"Goethals, too, is a powerful man in a place that has not got sufficient power, for no matter how aggressive he may be in getting supplies produced, he has no authority to control all the activities necessary to get those supplies assembled and where they belong at the moment they are needed. And there is nobody above him who has that power. With all his engineering skill, Goethals never could have dug the Panama Canal if he had not had full authority over many things essential to the digging.

"To be more specific, we need, literally, a quantity-production chart in the War Department that will enable some man to see every day and every hour just where we are in every activity, and that man must have authority to say, 'Hold back there'; 'Speed up here.' We have no such chart anywhere in the War Department or any other department.

"The Government, through its War Department, should assemble in front of that chart a board consisting of its Quartermaster General, its Chief of Ordnance, its Chief of Aviation, its Chief Engineer Officer, the Director General of Railroads, the Chief of Embarkation, a chief in control of labor supply, the head of the Shipping Board, the Fuel Administrator—in short, every chief executive who has control of the production of a commodity or a force that is vital to the prosecution of the war. Over all these there should be a chief with absolute power and answerable only to the President. And, subject only to this chief, the authority of each man on the board should be absolute in the production and purchase of the particular commodity or force for which he is held responsible. The time and quantity and delivery factors in the production of each of them must be determined by the chief of the board, acting solely with reference to what the chart shows the needs of the whole enterprise to be. There you would have your war production board and your priority board in one body, as they should be. It is impossible to make two controls, one for priority and one for production.

"An engineer's chart for such a purpose is the familiar thing of horizontal and vertical lines, the most graphic, illuminating thing in the world for trained executives, but something not sufficiently valued by idealists whose far vision interferes with their seeing the foreground difficulties in the road which they must travel to get where they want to go. But the chart has one line, at least, that is ideal. It is the vertical line on the extreme right of the picture. It shows the goal, what it is hoped to attain at a given time. It alone is not enough to hang a working plan on. The other vertical lines show the divisions of time into weeks, beginning with the line at the extreme left of the picture, which stands for the present moment, and then placed at equal intervals across the chart, approaching always to the right-hand line of the supreme achievement.

"The horizontal lines represent every line of production, of commodity or power that is to go into the finished product, the combination of all the products to be delivered in France for use at a given time; in other words, the American Army. The horizontal lines must be extended from left to right every week to show just what has been accomplished in each activity. In that way the production and priority board with its controlling chief will see at least once a week, in one true picture, just what is behind, just what is ahead, and will know what to lag and what to speed so that all these horizontal lines may proceed across the chart toward the vertical of the ideal, with some approach to a company-front formation.

"Take a simple hypothetical case for illustration. Suppose the horizontal line showing the assembling of man power in the camps is shooting too far ahead of the horizontal line that shows the production and delivery of overcoats and getting to the vertical line that marks a week in midwinter, while the overcoat line is only approaching a vertical line of late autumn. The chart will actually show the discrepancy. If the member of the board responsible for overcoats is not able to catch up immediately, the member of the board responsible for bringing men to camp is told by the chief of them all to lag the process of assembling men until the business of protecting them against cold and disease can be brought up to where it should be.

"What actually has happened in place of such coordination and working with ascertained facts has been a hit-or-miss method of carrying on the various processes without reference to the progress of each other and in accordance with hoped-for facts at some period in the future. It was decided to have so many soldiers at certain places at certain times. It was known that they would need overcoats, blankets, and warm uniforms at a certain time. Contracts were awarded for such equipment, and for a brief period of mild weather early in the days of National Army mobilization the country reveled in the statistics put out by the Bureau of Public Information on the millions of this, that, and the other thing contracted for. But the people who were getting the men together never knew at what rate the clothing that had been contracted for was being produced and delivered. The discrepancy between men and supplies was not realized till the former needed the latter and the latter was not forthcoming in sufficient quantity. A production and a priority board working with a chart would have avoided that situation.

"Alongside the quantity-production chart I would hang a map of the United States. It is fair to assume from the muddle we are in that such a map has not been studied sufficiently. Because of that neglect and of the lack of the comprehensive plan for quantity production we are now suffering from an industrial jam that is holding back every phase of war work. We have not called it by its right name yet. We have called it a coal shortage, which only suggests a part of the story. There was a coal shortage because of congestion of transportation and there was congestion of transportation because all freight trains and all coal trains were headed in the same direction to the same two or three ports of embarkation when we had a dozen other ports that were practically idle.

"The holding up of an entire fleet of supply ships on this side of the Atlantic loaded with goods needed abroad, because they could not be coaled, could have been avoided by having some of those ships loaded at the South Atlantic and Gulf ports. We would not have had the rail congestion if half of the commodities rushed to northern ports in a struggle of conflicting priority orders, and piled up on docks and in warehouses, had been sent over other routes to the southern ports. We would not have had the 15 workless days' order if the jam it was intended to relieve had been avoided by a scientific zoning system, whereby all of our rail and port facilities could have been used to the utmost.

"This discussion of the industrial jam and the flow back to the factories and the coal shortage and the need of a zoning system is all relevant to the matter of a production and priority board and a production chart, because the Director General of Railroads and the Fuel Administrator should be members of such a board and under orders of its chief, for without the fuel and the transportation the whole thing falls down."

Mr. FESS. Mr. Chairman, I want to take a minute to say that the statement which has just been read to me is a capital comment on a situation in which we now find ourselves, and it is also a recommendation of a sane method of relieving it. It is not crimination or recrimination. Its virtue lies in the strength of detection of wrongs and the substitution of remedies which know no personal pique, but strives only for public good. I do not believe that any member of the committee or the House can be justly charged with either careless conduct or willful motive who refuses to close his eyes to wrongs and demands that they be speedily righted. Neither will he be subject to any unpleasant criticism for pointing out what is known to exist which ought not to be and recommending something that can and should be. It is far better than any personal attack or meaningless generality urged against the statements of facts as to the condition of the War Department, which up to this time, so far as I can see, have not been answered.

Mr. Chairman, this raises what is now a leading question before the country. There seems to be an attempt to silence all criticism of methods now in vogue in the War Department. The charge is made that criticism in time of war is unpatriotic if not treasonable. Those who have pointed out specific facts of weakness are charged with bad motives. Epithets have been hurled against them as ignorant, demagogic, and lacking in love of country.

Mr. Chairman, innuendo is not argument, neither is sarcasm logic; neither is condemnation of a bad system answered by personal abuse of the one making the condemnation. Not all the invective of our modern Mirabeaus, nor all the impassioned oratory of our Patrick Henrys, nor all the eulogies of our Websters, graphically detailing the wonders and grandeur of our establishments, will answer the unvarnished and simple record of sickness and death of our youth called to the colors who have thus paid the penalty of national inefficiency before ever having the honor to fire a shot in defense of their country's honor, nor the hit-and-miss methods which see complete paralysis of the Nation's resources in the face of its greatest crisis. Such fatalities when the result of conditions uncontrolled or uncontrollable will be overlooked by the American people; but when controllable and yet defended on the basis that there have been no unnecessary blunders, in the face of the most startling testimony of conditions that must not be permitted to exist, the country will demand an accounting, and that soon. Instead of our silencing all criticism upon the assumption that all that can be known in war we know, and all that can be done we have done, the country's responsible administration should recognize its inefficiency and be willing to accept constructive criticism in the interest not only of a united country but of an efficient government capable and willing to make any sacrifice necessary to do and to die for national honor.

Undivided council is wisely sought when based upon freedom of expression by men of ability and responsibility, but it is the height of unwisdom if the result of either mediocrity or servility. In this supreme crisis this Congress must hold itself bound to commend the good and responsible and to condemn the bad. Otherwise the country will and should demand its place given over to men who will exercise this responsibility. This war must be fought to a successful ending, otherwise the blood and treasure will be in vain. I wish again to commend a study of the salient recommendations of the constructive builder, the engineer, in the confidence that improvements will be made even though their suggestion may come from those not in official circles and offered without solicitation, but in the interest of a common cause which must depend upon our very best of resource. Let the country lift its gaze for a moment from what it has done and take one glance at what it has not yet done but must soon do.

Mr. COOPER of Wisconsin. I yield 20 minutes to the gentleman from Minnesota, Mr. KNUTSON.

Mr. KNUTSON. Mr. Chairman, on the 7th day of January I addressed this House upon conditions as I found them at Camp Cody, N. Mex. As the result of my remarks the governor of Minnesota directed the safety commission of that State to visit Camp Cody and other camps where Minnesota soldiers are encamped and make a first-hand investigation. I desire at this time to send to the desk a report made by that commission on its return, which I ask to be read by the Clerk and printed in the RECORD. To this report I desire to supplement by inserting a portion of the report submitted to Gov. Harding, of Iowa, by the committee named by him to investigate the great number of complaints received as to the unfitness of the location occupied by Camp Cody for training purposes.

The Clerk read as follows:

REPORT ON CAMP CODY, DEMING, N. MEX., AND OTHER CAMPS.

Camp Cody is located at Deming, N. Mex. Three railroads, the Southern Pacific, the El Paso & Southwestern, and the Santa Fe, run into the city. Its population immediately before the establishment of Camp Cody was 3,000. Its present number of inhabitants is estimated at more than 6,000. The altitude is approximately 4,300 feet. The air in this locality is very dry. The rainfall is less than 12 inches annually. The sun shines on about 320 days of the year. There are no flies, mosquitoes, or insects of any kind, and the water is excellent. The temperature varies greatly. The nights are cool and the days are usually quite warm. During the winter months the temperature of the night and day ranges from 30° F. to 80° F. and during the summer months from 40° F. to 90° F., showing a difference of 50° between the day and night.

CONDITIONS IN CITY.

On account of the crowded conditions at Deming it is difficult for visitors to procure rooms, but through the kindness of the residents many houses of the city have been opened to those who can not be accommodated at the hotels. Local organizations are doing everything within their power to accommodate those visiting the camp. From a moral standpoint conditions could scarcely be better than they are at Deming. There is excellent cooperation between local authorities and the military police in the enforcement of the laws. Very few venereal diseases have developed since the location of the camp. The sale of intoxicating liquors is prohibited. The comparatively small size of the city makes it possible to detect and eliminate prostitution. Such organizations as the Young Men's Christian Association, the Knights of Columbus, and the churches of the city make provision for religious services. A local war board, known as the Deming War Service Board, which is doing good work in many lines, has been formed to assist in promoting wholesome recreation and entertainment for the soldiers.

CONDITION OF CAMP GROUND.

The ground upon which the camp is located is very sandy, and the dust and sand where the Minnesota boys drill are several inches deep. Nearly every man spoken to criticized the location on this account. It was said that the air at times becomes so filled with this sandy dust as to almost completely obstruct one's vision. The floors of the tents and buildings become covered with it in such quantities that it is impossible for the men to keep their quarters clean. On days when the wind is not blowing and the men are not drilling the air is clear and agreeable. Those living in the city would not be affected to as great an extent by the dust as are the soldiers, who must drill daily and who by marching through it are continually raising and inhaling it.

CONVENIENCES AND SANITARY CONDITIONS.

The capacity of the camp is approximately 30,000 men. The present number located there is 24,867. The tents are 14 by 14. Some of the Minnesota companies had eight men in each tent, but orders have been issued to reduce the number to five as soon as sufficient tents arrive. The water supply of the camp is good, but the sewerage is not what it ought to be. The open system has been installed for drainage purposes. The toilet facilities are very poor. Incinerators are used to dispose of all kitchen waste and such other matter as can be burned. The tents are heated by the burning of wood in small stoves. The lighting system for the most part is very inadequate. Electric lights were found in the hospitals, officers' tents, and mess halls, but candles, which were furnished for illuminating the tents of the men, did not give sufficient light. It was also reported that there was an insufficient amount of hose for extinguishing fires that might occur.

FOOD AND ORDNANCE.

The subsistence was very adequate. No complaints were made as to the meals in the mess halls. The men in most cases had sufficient uniforms and the facilities for cleaning their clothing were ample. About 75 per cent of the men were fully equipped with rifles, belts, and other required ordnance. The Minnesota Field Artillery Regiment had not been provided with sufficient field-artillery equipment.

NUMBER OF DOCTORS.

There are several infirmaries for the incipient cases and one base hospital composed of several buildings. The hospitals were of the pavilion type. There are 174 physicians and 33 dentists in the camp. If all the physicians were available for medical service, the proportion of doctors to the number of men would be approximately 1 to 143, and the proportion of doctors to the number of sick would be 1 to 47. Actually the proportion attending the sick is only about 1 doctor to 40 patients, as most of the doctors are engaged in administrative and other work.

NURSES.

There are 49 registered woman nurses. The proportion of these nurses to the number of sick is about 1 to 24. There are 323 male attendants at the hospital, and 1,546 privates in the Hospital Corps, most of whom are available for service, but inexperienced in this kind of work. The camp is in great need of more graduate nurses.

HOSPITAL EQUIPMENT.

The hospital lacks adequate sewerage, as the hospital buildings are not equipped with baths and other necessary plumbing fixtures. Improvements are being contemplated and some new materials to be used for this purpose are now on the ground. None of the wards appeared to be equipped with diet kitchens, essential to the serving of food in the best manner. The men in certain wards, such as the erysipelas ward, are too crowded. Nearly every sick Minnesota man visited said he received very kind and efficient treatment from both doctors and nurses. There was very little complaint about the hospital food or clothing. A few said that the food was cold and unfit to eat, and one or two stated that the quantity was not sufficient.

SICK AND DEATH RATE.

The total number of men at the camp at the time of our visit, as above stated, was 24,867. The total number in hospital and quarantine was 1,191, which, of course, includes many who were not seriously ill. The sick rate was 43 per thousand. This is the lowest since camp was organized. The maximum was 64 per thousand for the week ending January 4, 1918. The total number of deaths from all causes since the opening of the camp was 83. With the continuation of this proportion for one year, the annual death rate will be about eight per thousand.

KINDS OF DISEASES.

The different and prevailing kinds of diseases and the number afflicted therewith were as follows:

	Total in hospital on Jan. 18.	Total number cases from Aug. 25, 1917, to Jan. 18, 1918.
Pneumonia	138	242
Measles	23	1,354
Scarlet fever	9	.....
Erysipelas	34	90
Acute otitis (ear infection)	43	136
Pleurisy	45	61
Rheumatic fever	190	300
Meningitis	2	.....
Chicken pox	2	.....
Surgical cases	175	.....
Venereal	32	.....
Unclassified	438	.....

VENEREAL DISEASES.

Only about 2½ per cent of the 24,867 men are reported to have been afflicted with venereal diseases. A total of 41 had syphilis before going to the camp. No new syphilis cases were reported since camp was established. Six hundred and thirty-eight men had other venereal diseases before arrival at Deming. Only 19 cases were developed at Camp Cody up to January 1 this year. Reports, therefore, relative to the venereal disease situation have been greatly exaggerated.

OFFICERS.

The commanding general and his staff are very efficient and doing excellent work. There was some evidence to the effect that certain officers were manifesting a spirit of exclusiveness which tended to create a dissatisfied feeling on the part of those in the ranks. Such attitude on the part of the officers should be eliminated. This is poor time for the showing of such autocratic spirit. The medical officers in charge of the hospitals and performing other duties are high-class men. They are, however, working under certain handicaps, such as the inconveniences herein referred to, the difficulties due to the sand and dust, and the extreme variation between night and day temperatures, together with the lowered vitality of the soldiers occasioned by the necessary intensive training, to which most of the men were not accustomed before entering the camp.

COMPARISON BETWEEN DIFFERENT CAMPS.

The comparison of conditions at Camp Cody with others, such as those at Camp Kearney, near San Diego, Cal.; Fort Winfield Scott, in San Francisco; Camp Lewis, at American Lake, Wash.; Camp Pike, Little Rock, Ark.; Jefferson Barracks, St. Louis, Mo.; and Camp Dodge, Des Moines, Iowa, shows that the hospital and equipment at Camp Cody have been neglected by the responsible authorities. The hospital buildings at Camp Cody were inferior to those in other camps. At Camp Pike, however, some wards were overcrowded. As heretofore stated, the plumbing and sewerage facilities at the Deming camp are entirely inadequate and incomplete, while those of the other camps appeared to be adequate and complete. In all places visited, except Camp Cody, the diet kitchens were equipped so that they could be used for cooking and heating purposes, enabling the attendants to serve warm and proper food to the patients at all times. Except at Camp Cody, electric lights were furnished to all the men. At Camp Kearney no artificial heat is required. At Camp Lewis and Camp Pike the barracks are provided with steam heat. At Camp Cody each hospital ward has a hot-air furnace at each end of the ward, and the tents of the men are heated with stoves. The wood used in them must be shipped in from long distances, and apparently much expense is necessary. The operating rooms of the other hospitals were generally superior to those at Camp Cody, being more commodious, better lighted, and more elaborately equipped. The same can be said of the dental departments. Certain complaints about conditions at Jefferson Barracks were due to the overcrowded condition, which continued for one week. The capacity of the barracks is 4,500, while the number there for a short time was 16,000, but now reduced to less than 4,500.

COMPARISON OF HEALTH CONDITIONS.

In comparing the different localities as to health conditions it is apparent that the contagious diseases are found in about the same proportion. There is very little difference, proportionately, in the number of men who contract venereal diseases after they reach the camp. When, however, one considers such serious illnesses as pneumonia, acute otitis, inflammatory rheumatism, and erysipelas the comparison between the camps on the Pacific slope and Camp Cody, Camp Pike, and Camp Dodge makes it appear that the climatic and other local conditions have some effect in causing these particular diseases.

PNEUMONIA.

At Camp Cody there are now 188 men out of 24,867 afflicted with pneumonia. In Camp Kearney there are 61 men out of 25,000. At Fort Winfield Scott there is 1 out of 2,930. In Camp Lewis there are 35 out of about 34,000. There are therefore proportionately more than three times as many suffering from pneumonia at Camp Cody than at any one of the places on the western coast. At Camp Pike, however, the number of pneumonia cases was larger by far than at any other camp.

RHEUMATISM.

In Camp Cody there were 190 men out of 24,867 afflicted with rheumatism. At Camp Kearney only 15 out of 25,000. There were no cases reported at either Fort Winfield Scott or Camp Lewis.

ACUTE OTITIS.

Of those suffering with acute otitis (ear infection) there were 43 at Camp Cody and only a very few, following measles, at Camp Kearney. At Fort Winfield Scott there was one and none was reported at Camp Lewis.

ERYSIPELAS.

We found 34 erysipelas cases at Camp Cody, 3 at Camp Kearney, and none was reported at Fort Winfield Scott, and only 6 at Camp Lewis.

DEATHS.

The number of deaths at Camp Pike exceed the number at any of the other camps. The total number was not given to the members of the committee visiting this camp. At Camp Cody 83 men have died since the opening of the camp. At Camp Kearney, which opened about the same time with an equal number of men, 60 have died. At Fort Winfield Scott, out of the 2,900 drafted and recruited men located there, there were 2 deaths in the one month during which they have been stationed at this fort. At Camp Lewis, with the largest number of men, there have been 59 deaths.

DEDUCTIONS.

From these figures one is led to believe that the dust and sand, the high altitude, and extreme variation of day and night temperatures at Camp Cody are more conducive to pneumonia, rheumatism, acute otitis, and possibly erysipelas than the climatic conditions on the Pacific coast.

THE EFFECT ON PNEUMONIA, ACUTE OTITIS, AND RHEUMATIC FEVER.

The dust and sand, which irritates the nostrils and throat, causing tonsilitis and bronchial affections, appear to be the source in a large measure of pneumonia, acute otitis, and rheumatic fever. The inhabitants of Deming, who have resided there for years, have not been afflicted with these diseases to any great extent, but the residents are acclimated and do not come into contact with the dust and sand to the same degree as do the soldiers, who, as has already been stated, by their marching in large bodies are continually raising this fine sandy dust and compelled to inhale it.

THE EFFECT ON VARIATION IN TEMPERATURE.

The great variation between day and night temperatures, due to the high altitude, may also be responsible in a large measure for pneumonia and the bad throat conditions which are direct precedents of acute otitis and inflammatory rheumatism. The cold nights spent in tents by men who, during the day, have been very warm must have a bad effect upon their health. The unusually large number of cases of acute otitis and also of rheumatic fever which constitutes one of the most distressing and often permanently disabling of all diseases can be accounted for only by reason of the excessive number of tonsilitis cases due in all probability to the causes hereinbefore stated.

ERYSIPELAS.

Since the opening of the camp there have been 90 cases of erysipelas among the men. It is impossible to say why so many should have been afflicted with this disease unless in this connection also the sand and dust cause an irritation of the nose and face, which thus opens an avenue for infection. It is of course recognized that erysipelas is a contagious disease and the grouping together of so many men might also be responsible for this epidemic.

CONCLUSION AS TO CAUSE OF DISEASE.

While the medical men at Deming differ as to which condition is the greatest factor in causing the prevailing illnesses, it is our opinion that conditions heretofore stated must be responsible in a large measure for the great number of those diseases, which are found at Deming to a greater extent than elsewhere.

SOME OBJECTION TO ANY CLIMATE.

We heard of some objection to the climate in all the camps we visited except at Camp Kearney. At Deming it was the dust. At Fort Winfield Scott it was fogs. At Camp Lewis it was the rain, which has been falling nearly every day for months. At Camp Pike it was slush. At Camp Dodge it was snow and cold. There appear, however, not to be such bad results in the West as the diseases herein indicated as at Camp Cody and in some of the other camps. The Minnesota boys at Fort Winfield Scott were especially pleased with the San Francisco climate and with the conditions generally at this fort. About 96 Minnesota men were discharged on the day of our visit because of physical disability. The officers in charge complained on account of the negligent examination of the men by local doctors. At Camp Kearney, near San Diego, Cal., we heard nothing but favorable comments about the climatic situation. Since the opening of the camp the men there had not lost one hour on account of weather conditions.

UNLESS CONDITIONS ARE REMEDIED REMOVAL IS RECOMMENDED.

Our soldiers who are willing to make the supreme sacrifice are entitled to the best location that can be found. To refuse to select a proper and healthy site for their training, or to fail to keep the established camps in a sanitary condition, would be criminal negligence meriting the severest punishment possible. The largest number of Minnesota troops is located at Camp Cody. There are some at Camp Pike and a smaller number in San Francisco. Unless the sickness at Camp Pike can be reduced, and unless something can be done at Camp Cody to eliminate the dust by the adequate oiling of all the streets and the open ground of the whole camp, or to relieve in some other way the serious and disagreeable conditions above referred to, the troops should, in our opinion, be moved from these places to Camp Kearney, where there are ample facilities for locating a new camp and for the training of hundreds of thousands of men, if necessary, with proportionately much less expense and with greater possibilities for the saving of life and the prevention of disease.

CODY CONDITIONS BETTERED—INVESTIGATORS REPORT IMPROVEMENT AT CAMP—SITE, ONLY, IS UNFAVORABLE—KENNEDY AND JEPSON, APPOINTED BY GOV. HARDING, FILE STATEMENT OF FINDINGS DURING VISIT TO NEW MEXICO ENCAMPMENT.

Administration of Army affairs at Camp Cody, Deming, N. Mex., where hundreds of Sioux City soldiers are stationed, yesterday was given the official "O. K." of the mission of investigators sent from Sioux City to Deming by Gov. W. L. Harding.

Only the location of the camp was criticized in the 10-page report which was submitted by J. L. Kennedy and Dr. William Jepson, the investigators, to the Sioux City chapter of the Red Cross and to the governor, and the criticism of that was moderately phrased as "not the most ideal."

The investigators noted a marked improvement in the conditions in the camp and blamed the system rather than officers in charge for the situation as it existed there several weeks ago.

TEXT OF THE REPORT.

The report follows:

"To his excellency W. L. HARDING, governor of Iowa:

"Pursuant of your instructions under date of January 14, we proceeded to Camp Cody, at Deming, N. Mex., arriving there on the 20th instant, and the following morning undertook the inspection of the camp, having first received the consent of the commanding officer, Gen. Blockson, who placed at our disposal every opportunity to make such investigation as we deemed necessary in the fulfillment of our mission.

"In the fulfillment of our mission as set forth in your instructions we were guided by the impression that it was your desire that our investigation should be carried on with a view of determining the existence of conditions inimical to the health and welfare of the troops stationed at the camp.

"Social environment: The social environment of the camps, in so far as furnishing any factor deleterious to the morale or health of the troops, is all that could be well asked for. The city of Deming, with a population not in excess of 3,000, would normally present but a limited opportunity for vice, except such as would directly surround the liquor traffic. As trafficking in liquor has been abolished in the city and strict regulations exist against its introduction into camp, the amount of liquor finding its way to the troops must be limited to that which can be clandestinely introduced, and this, by reason of the care exercised to prevent it, must be most limited in quantity. Similarly, every effort is apparently exercised to prevent contact with such of the opposite sex as would lead to moral deterioration, which statement is supported by the records of the division surgeon's office, which shows that of 679 cases of venereal disease appearing among the troops, 660 were contracted in civil life and 19 from exposure since arrival at the camp, and over one-half of said 19 cases—namely, 12—occurred during the first month of the mobilization, a period when the machinery of protection had not reached its maximum of efficiency. In the light of the foregoing facts, it is believed that it may well be questioned if an equal number of men anywhere are leading a more moral life than the troops at this camp, certainly nowhere in civil life. The Y. M. C. A. and K. C. organizations and provided buildings at the camp supply the men with the needed recreational amusements. Such as were visited by us were well filled and the entertainment of good quality.

PHYSICAL ENVIRONMENT.

"Camp site: The camp is located in a level valley, altitude about 4,300 feet, surrounded by low ranges of mountains distant some 15 to 30 miles and more. The soil is composed largely of sand, much of which is shifted from place to place by the winds, which at times leads to such clouds of dust as to obscure from view only objects a short distance away, in consequence of which troop movements at times must be temporarily suspended. Personally, we had no opportunity of observing these sandstorms, but all oral evidence was to that effect, while the drifts of the fine sand about the sparse vegetation of mesquite and Yucca plants gave evidence of this sand movement; furthermore, the depths to which vehicles and the feet of men and animals penetrated the sand in many places gave evidence of the great sand and dust movement possible.

"That at times the sand and dust-laden air is a factor to some degree detrimental to the health of the troops seems to us a reasonable assumption based upon the fact that workers in dust in civil life are well recognized to be especially prone to pulmonary affections, pneumonia kindred, in consequence of the damage done to pulmonary structures by the particles of foreign substances inhaled.

FLYING SAND CONTAMINATED.

"If the sand and dust is contaminated by pathogenic germs, the same may constitute an added factor of pathogenecity. That the soil must be contaminated from time to time by the excreta of animals and men when away from camp on maneuvers goes without saying, and as there has been no rainfall in amount sufficient to carry the organic material and germs away in surface water or into the soil to a depth where no longer capable of being carried about by the currents of air, the accumulations of five months, less such as have been destroyed by the sun's action, must at this time be present in the ever-shifting sand and dust.

"While the sun's action may suffice for the soil sterilization in the heated months of summer, it seems to us questionable whether the same holds true of the cooler months of winter.

"To the conception upon our part of sand infection and consequent aid infection at such times when moderate currents are produced, we would attribute in part the apparent tendency to infections in and about the respiratory tract.

"The question as of the degree of aid infection we reserve for a supplemental report.

CLIMATIC CONDITIONS IN CAMP.

"There is apparently nothing in the climatic conditions which would exercise a deleterious effect, unless it be the marked difference between diurnal and nocturnal temperatures increased in its effect by the rarity of the air, making it difficult for the men to adjust their clothing requirements to the changing needs.

"This difficulty would be accentuated when the men are undergoing marked physical exercise, especially at this altitude, as it is probably performed with more difficulty than in lower altitudes. The practically constant sunshine and aridity are in themselves beneficent.

"The water supply is abundant and of the best quality.

"Food: Our report upon the food, its preparation and serving, is based upon an examination of organizations selected at random by us. In our opinion, ample and wholesome food is issued to the men, perish-

able food being stored in company refrigerators after use. The food is well prepared by company cooks, who have been instructed in their duties, which is served to the men in mess halls, well heated and ventilated and equipped for the purpose. The food, as to quality and quantity, preservation and serving must leave little, if anything, to be desired, and nothing in connection therewith can act deleteriously to the health of the men.

QUARTERS OF THE SOLDIERS.

"The men's quarters consist of pyramidal tents, floored and with sides boarded up, heated with Sibley stoves, and adequately ventilated. Five men are quartered in each tent, which can not be in excess of the number which hygienic requirements would impose. Each man is now provided with a cot and four blankets, which number appears to be adequate to meet the men's needs in this respect. Inquiry of many men as to the adequacy of the bedding allowance elicited no complaints unless it be that the issue of additional blankets from time to time to meet the increasing needs with increasing cold was unduly tardy. We are of the opinion that the men can suffer but little, if any, from deficient shelter or bed clothing. There is, however, a possibility that the men may subject themselves to conditions in their tents which are not conducive to the greatest safeguarding of their health, in that they maintain heat in their tents until ready to retire, and possibly afterwards, until the wood burns up, with the result that their quarters when they retire may have a temperature of about 70° F., and as the fire goes out it will fall so by morning it may have dropped to nearly zero, as was the case while we were there. Under such conditions the men are either too warmly covered in the early part of the night or not sufficiently by morning. It is believed that it would be advantageous if the men were to retire in cold tents, so that when covering themselves for the night the temperature conditions might more nearly approximate those of the morning. Whether it would be practical to have the men retire in cold quarters, we may not say, as it would require that the men spend at least the latter part of the evening before retiring in the mess hall, so that their tent fires might be extinguished."

Mr. GLASS was given leave by unanimous consent to revise and extend his remarks in the RECORD.

Mr. FLOOD. Has the gentleman concluded?

Mr. COOPER of Wisconsin. Yes.

Mr. FLOOD. I thought that the gentleman would take up all the afternoon, and I was obliged to give 15 minutes time that I had promised to the gentleman from Illinois [Mr. RAINEY] to the gentleman from Virginia. I want to ask unanimous consent when we get into the House that Mr. RAINEY may address the House for 15 minutes to-morrow morning.

Mr. COOPER of Wisconsin. I might find some one that would want to use the balance of the time that I have. I will consent to the gentleman's request if the gentleman will agree that these men who are not here or some other person may have 15 minutes.

Mr. FLOOD. Very well. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. HUMPHREYS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 9314, the Diplomatic and Consular appropriation bill, and had come to no resolution thereon.

Mr. FLOOD. Mr. Speaker, I ask unanimous consent that when the House adjourns this afternoon it adjourn to meet at 11 o'clock to-morrow morning.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

Mr. STAFFORD. Reserving the right to object, I understand it is the purpose to take up the bill under the five-minute rule to-morrow.

Mr. FLOOD. Yes.

Mr. STAFFORD. I think there is no occasion to inconvenience Members by bringing them here that early, and I object.

Mr. FLOOD. Mr. Speaker, I ask unanimous consent that general debate on this bill may be concluded to-morrow in 30 minutes, 15 minutes to be controlled by me and 15 minutes by the gentleman from Wisconsin.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

Mr. LONDON. Reserving the right to object, the gentleman from Illinois [Mr. RAINEY] informed me that he was going to speak on the breaking up of the convention of Social Democrats in South Dakota. If he speaks on that subject, I want 5 or 10 minutes to reply. Will the gentleman make it 40 minutes?

Mr. COOPER of Wisconsin. Did the gentleman from Illinois [Mr. RAINEY] notify the gentleman from New York?

Mr. LONDON. The gentleman from Illinois was kind enough to let me know that he was going to speak on that subject and asked me to be present.

Mr. FLOOD. Then, Mr. Speaker, I make it 40 minutes, so that the gentleman from New York may have 10 minutes.

The SPEAKER. The gentleman from Virginia asks unanimous consent that general debate be limited to 40 minutes, he to have 15 minutes, the gentleman from Wisconsin 15 minutes; and if the gentleman from Illinois discourses on the North Dakota incident the gentleman from New York shall have 10 minutes. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. FLOOD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 41 minutes p. m.) the House adjourned until to-morrow, Friday, February 8, 1918, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Secretary of State submitting a supplemental estimate of appropriation required by the Department of State to complete the arrangements and provide for the entertainment of the Fifteenth International Congress Against Alcoholism, to be held in the United States (H. Doc. No. 920); to the Committee on Foreign Affairs and ordered to be printed.

2. A letter from the Acting Secretary of Commerce, transmitting list of executive papers not needed or useful in the transaction of current business of the department and have no permanent or historical interest (H. Doc. No. 921); to the Committee on Disposition of Useless Executive Papers and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. KEATING, from the Committee on Pensions, to which was referred the bill (H. R. 9641) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, reported the same without amendment, accompanied by a report (No. 287), which said bill and report were referred to the Private Calendar.

Mr. JOHNSON of Kentucky, from the Committee on the District of Columbia, to which was referred the bill (H. R. 9248) to prevent extortion, to impose taxes upon certain incomes in the District of Columbia, and for other purposes, reported the same with amendment, accompanied by a report (No. 288), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. SIMS, from the Committee on Interstate and Foreign Commerce, to which was referred the joint resolution (H. J. Res. 235) granting to certain persons in the active war service an extension of time within which applications for insurance may be made under section 401 of the act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, as amended by the act approved October 6, 1917, reported the same without amendment, accompanied by a report (No. 289), which said bill and report were referred to the House Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Claims was discharged from the consideration of the bill (H. R. 8125) for the relief of James W. Kingon, and the same was referred to the Committee on Military Affairs.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. MAHER: A bill (H. R. 9642) to authorize the Secretary of Labor to provide housing for war needs; to the Committee on Labor.

By Mr. COOPER of Ohio: A bill (H. R. 9643) to provide for the traveling expenses of soldiers in the United States Army when on furlough; to the Committee on Military Affairs.

By Mr. JOHNSON of Washington: A bill (H. R. 9644) authorizing the Secretary of War to remove or dispose of timber on the Three Tree Point Military Reservation and the Fort Canby Military Reservation, in the State of Washington; to the Committee on Military Affairs.

By Mr. CARY: A bill (H. R. 9645) providing for the appointment of inspectors to take the state of the meters for the gas and electric light consumers of the District of Columbia; to the Committee on the District of Columbia.

Also, a bill (H. R. 9646) to fix the price of gas in the District of Columbia; to the Committee on the District of Columbia.

Also, a bill (H. R. 9647) to provide for the issuing of circulating notes of the United States; to the Committee on Banking and Currency.

Also, a bill (H. R. 9648) fixing the maximum price of electric current to consumers in the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. AUSTIN: A bill (H. R. 9649) for enlistment and appointment of officers in the National Guard, District of Columbia, during the period of the war; to the Committee on the District of Columbia.

By Mr. CARY: Resolution (H. Res. 245) to direct the Commissioners of the District of Columbia to report to Congress immediately what steps, if any, have been taken by them to enforce section 11 of an act approved March 4, 1913, entitled "An act to direct the Commissioners of the District of Columbia to bring a suit in equity in the Supreme Court of the District of Columbia to dissolve the corporation known as the Washington Gas Light Co."; to the Committee on the District of Columbia.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. KEATING: A bill (H. R. 9641) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors; committed to the Committee of the Whole House.

By Mr. ASHBROOK: A bill (H. R. 9650) granting an increase of pension to Andrew C. Patterson; to the Committee on Invalid Pensions.

By Mr. AUSTIN: A bill (H. R. 9651) granting a pension to Marion Rosser; to the Committee on Pensions.

Also, a bill (H. R. 9652) granting a pension to Robert Donson; to the Committee on Pensions.

Also, a bill (H. R. 9653) granting an increase of pension to Hugh M. Costner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9654) granting an increase of pension to Abner D. Rutherford; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9655) granting an increase of pension to Luther S. Campbell; to the Committee on Pensions.

By Mr. AYRES: A bill (H. R. 9656) granting an increase of pension to Isaac S. Brundage; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9657) for the relief of Benjamin F. Burch; to the Committee on Military Affairs.

By Mr. DECKER: A bill (H. R. 9658) granting an increase of pension to Uriah Smith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9659) granting an increase of pension to Franklin Hereford; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9660) granting a pension to Elizabeth Munday; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9661) granting a pension to Colann Blakely; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9662) granting a pension to Elizabeth J. Points; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9663) granting a pension to Henry Borghardt; to the Committee on Pensions.

Also, a bill (H. R. 9664) granting a pension to Samuel D. Lee; to the Committee on Pensions.

By Mr. FERRIS: A bill (H. R. 9665) granting a pension to Flora A. Hubbard and her minor children; to the Committee on Invalid Pensions.

By Mr. HICKS: A bill (H. R. 9666) for the relief of Stephen J. Haff; to the Committee on Military Affairs.

By Mr. JOHNSON of Kentucky: A bill (H. R. 9667) granting an increase of pension to John M. Hall; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9668) to correct the military record of Alfred J. Carter; to the Committee on Military Affairs.

By Mr. MANN: A bill (H. R. 9669) granting an increase of pension to Newell S. Lord; to the Committee on Invalid Pensions.

By Mr. NEELY: A bill (H. R. 9670) granting an increase of pension to Isaac Boyce; to the Committee on Invalid Pensions.

By Mr. RUBY: A bill (H. R. 9671) granting an increase of pension to Lambert Conner; to the Committee on Invalid Pensions.

By Mr. SMITH of Michigan: A bill (H. R. 9672) granting an increase of pension to Warren F. Sherman; to the Committee on Invalid Pensions.

By Mr. CHARLES B. SMITH: A bill (H. R. 9673) for the relief of Nathan B. Wilber; to the Committee on Military Affairs.

By Mr. SWEET: A bill (H. R. 9674) granting an increase of pension to Alfred J. Skinner; to the Committee on Invalid Pensions.

By Mr. TAGUE: A bill (H. R. 9675) granting a pension to Stella Archer Simson; to the Committee on Pensions.

By Mr. WELTY: A bill (H. R. 9676) granting an increase of Pension to Daniel Ault; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Resolution of the grand jury of the United States district court at Juneau, Alaska, affirming their loyalty, and pledging their best efforts to bring the war to a successful termination; to the Committee on the Judiciary.

By Mr. DALE of New York: Memorial of the National Single Tax League, favoring legislation to raise Federal revenue through land-value taxes, and protesting against the Fletcher bill, appropriating $50,000,000 to pay landowners for what the club calls "legalized blackmail"; to the Committee on Appropriations.

By Mr. DALE of Vermont: Petition of the Vermont Dairymen's Association, favoring the bill authorizing an increased appropriation for the control and eradication of tuberculosis among live stock and food animals, and protesting against the removal of the tax on colored oleomargarine; to the Committee on Agriculture.

By Mr. FULLER of Illinois: Memorial of the Massachusetts Dairymen's Association, for repeal of the second-class postage provision of the war-revenue act; to the Committee on Ways and Means.

Also, petition of the La Salle Portland Cement Co., of La Salle, Ill., relative to improvement of inland waterways; to the Committee on Rivers and Harbors.

Also, memorial adopted by a convention of short-line railroads, relative to pending railroad legislation. Also a petition of the Westchester County (N. Y.) Commission of Safety, for the daylight-saving bill; to the Commission on Interstate and Foreign Commerce.

By Mr. GALLIVAN: Petition of Vincent Veprek, Boston, Mass., requesting that the independence of the Czecho-Slovaks be recognized and a Czecho-Slovak State be organized; to the Committee on Foreign Affairs.

By Mr. GOODWIN of Arkansas: Petition of the Delta Shakespeare Club, of Lake Village, Ark., favoring the repeal of zone rates system of postage on second-class periodicals; to the Committee on Ways and Means.

By Mr. GRAHAM of Pennsylvania: Resolutions of the Civic Club of Philadelphia, protesting against the zonal system as applied to postal rates for periodicals; to the Committee on Ways and Means.

By Mr. LINTHICUM: Memorial of Maryland State Board of Forestry, favoring S. 3344; to the Committee on Agriculture.

Also, petition of Oriole Branch No. 176, National Association of Letter Carriers, favoring H. R. 9414; to the Committee on the Post Office and Post Roads.

Also, petition of E. E. Jackson Lumber Co., Baltimore, Md., opposing the eight-hour law; to the Committee on Labor.

Also, petitions of P. Gallagher Realty Co. and J. A. Bokel Co., opposing repeal of zone system for periodicals, and of A. N. Fleagle, favoring such repeal; to the Committee on Ways and Means.

By Mr. RANDALL: Memorial of the Woman's City Club, of Long Beach, Cal., protesting against the zone postal amendment to the war-revenue bill; to the Committee on the Post Office and Post Roads.

By Mr. SANDERS of New York: Petition of citizens of York, N. Y., in public meeting, urging the passage by Congress of emergency war prohibition measures; to the Committee on Military Affairs.

Also, petition of the Ossian Church, Dansville, N. Y., urging the passage of emergency war prohibition; to the Committee on Military Affairs.

Also, petition of residents of Attica, N. Y., in mass meeting, urging the passage by Congress of a resolution to amend the Federal Constitution to prohibit polygamy and polygamous cohabitation; to the Committee on the Judiciary.

Also, petition of the congregations of the Methodist and Congregational Churches of Arcade, N. Y., urging the passage by Congress of national emergency war prohibition; to the Committee on Military Affairs.

Also, petition of Andrew Barber and 44 other residents of Greigsville, N. Y., urging the passage by Congress of immediate emergency war prohibition; to the Committee on Military Affairs.

Also, petition of Mr. J. W. Bray and 16 other gentlemen, urging the passage by Congress of an amendment to the Federal draft law permitting the sons of farmers to be furloughed for work on the farms during the summer; to the Committee on the Judiciary.

By Mr. SNYDER: Petition of various farmers in the thirty-third New York district for relief in the conditions surrounding the production of crops and the securing of adequate help; to the Committee on Military Affairs.

By Mr. STEPHENS of Mississippi: Papers to accompany House bill 8125, for the relief of James W. Kinzon; to the Committee on Military Affairs.

By Mr. TAGUE: Petition of William W. Cotton, forest commissioner, city of Newton, Mass., on Senate bill 3344; to the Committee on Agriculture.

SENATE.

FRIDAY, *February 8, 1918.*

Rev. J. L. Kibler, of the city of Washington, offered the following prayer:

O God, our heavenly Father, we come to Thee for Thy blessing. Realizing our position and our responsibility in the strife of the world to-day, we come to Thee for wisdom and we look up to Thee for Thy guiding hand. We are still dependent upon Thee, O God. Thou art the Creator of all worlds, the Ruler over all nations, and the Judge of all men. We humble ourselves therefore under Thy mighty hand and trust in Thy almighty power. May we seek our peace and safety, our successes and triumphs, only in harmony with Thy righteous laws. May Thy servants in the Senate to-day, in all their deliberations, reflect to the honor of Thy name in the accomplishment of Thy purposes, through Jesus Christ our Lord. Amen.

The Journal of yesterday's proceedings was read and approved.

NATIONAL PROHIBITION.

The VICE PRESIDENT. The Chair lays before the Senate the following communication, which will be inserted in the RECORD and placed on file.

The communication is as follows:

DEPARTMENT OF STATE,
Bismarck, N. Dak., February 4, 1918.

Hon. THOMAS R. MARSHALL,
President of the Senate, Washington, D. C.

DEAR SIR: Agreeable to a resolution adopted by the fifteenth legislative assembly in extraordinary session, I am inclosing a copy of resolution relating to the ratification of amendment to the Constitution of the United States regarding the manufacture, sale, and use of intoxicating liquors.

Yours, very truly,
THOMAS HALL,
Secretary of State.

UNITED STATES OF AMERICA,
Department of State, State of North Dakota.

To all to whom these presents shall come:

I, Thomas Hall, secretary of state of the State of North Dakota, do hereby certify that the attached resolution is a true and complete copy of a certain concurrent resolution adopted by the fifteenth legislative assembly in extraordinary session beginning January 23 and ending January 29, in the year of our Lord one thousand nine hundred and eighteen.

Dated at Bismarck, N. Dak., on this 30th day of January, A. D. 1918.

[SEAL.] THOMAS HALL,
Secretary of State.

A joint resolution (H. R. 8) ratifying a proposed amendment to the Constitution of the United States of America. (Introduced by Mr. Harris.)

Whereas both Houses of the Sixty-fifth Congress of the United States of America, at the second session, by a constitutional majority of two-thirds thereof, made and passed the following proposition to amend the Constitution of the United States of America, in the following words, to wit:

"Joint resolution proposing an amendment to the Constitution of the United States."

"*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein)*, That the following amendment to the Constitution be, and hereby is, proposed to the States, to become valid as a part of the Constitution when ratified by the legislatures of the several States, as provided by the Constitution:

"ARTICLE —, SECTION 1. After one year from the ratification of this article the manufacture, sale, or transportation of intoxicating liquors within, the importation therof into, or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.

"SEC. 2. The Congress and the several States shall have concurrent power to enforce this article by appropriate legislation.

"SEC. 3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by Congress."

Therefore be it

Resolved by the Legislative Assembly of the State of North Dakota, duly convened, That the said foregoing proposed amendment to the Constitution of the United States of America be, and the same is hereby, ratified by the legislative assembly of the State of North Dakota; and be it further

Resolved, That certified copies of this preamble and joint resolution be forwarded by the governor of this State to the Secretary of State of the United States of America, at Washington, to the presiding officer of the Senate of the United States and to the Speaker of he House of Representatives of the United States.

Approved 4.45 p. m., January 28, 1918.

LYNN J. FRAZIER, *Governor.*

PETITIONS AND MEMORIALS.

Mr. CURTIS presented a petition of Charles Herzer Camp, No. 22, of Dodge City, Kans., praying for the enactment of legislation granting pensions to widows and orphans of veterans of the Spanish-American War, the Chinese Expedition, and the Philippine Insurrection, which was referred to the Committee on Pensions.

He also presented petitions of sundry citizens of Kansas, praying for the submission of a Federal suffrage amendment to the legislatures of the several States, which were ordered to lie on the table.

He also presented petitions of sundry citizens of Kansas, praying for the enactment of legislation creating a pharmaceutical corps in the Army, which were referred to the Committee on Military Affairs.

He also presented a memorial of the Kansas State Board of Agriculture remonstrating against the repeal of the present rate on second-class mail matter, which was referred to the Committee on Post Offices and Post Roads.

Mr. TOWNSEND presented a petition of Forest Grange, No. 362, Patrons of Husbandry, of Big Rapids, Mich., praying for a repeal of the zone rate of postage on magazines, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of sundry citizens of Adrian, Mich., praying for the submission of a Federal suffrage amendment to the legislatures of the several States, which was ordered to lie on the table.

He also presented a resolution adopted by the Merchants' Association of Cadillac, Mich., favoring the enactment of legislation raising the rates on second-class mail matter, which was referred to the Committee on Post Offices and Post Roads.

Mr. McLEAN presented petitions of Slovak League, Local Branch No. 167, of New Britain; of the Bohemian National Alliance of New Britain; and of the Bohemian National Alliance Branch of Norwalk, all in the State of Connecticut, praying for the liberation and unification of the Czecho-Slovaks of Austria-Hungary into one independent Czecho-Slovak State, which were referred to the Committee on Foreign Relations.

He also presented a petition of sundry citizens of Milford, Conn., praying for the submission of a Federal suffrage amendment to the legislatures of the several States, which was ordered to lie on the table.

Mr. HENDERSON. I ask to have inserted in the RECORD a telegram signed by the mayor and a large number of prominent citizens of the mining district of Ely, in my State.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

ELY, NEV., *January 31, 1918.*

Senator CHARLES B. HENDERSON,
Washington, D. C.:

In common with the patriotic people of every community in this country, we are behind President Wilson to the limit. He should have an absolutely free hand in the conduct of the war. We oppose any legislation tending to hamper him in the slightest degree. We are likewise opposed to public investigations and public detailed criticisms at this time because of furnishing beneficial information to the enemy and material for publication in hostile countries, which will unquestionably prolong the war by giving people of those nations false impressions as to our unity of purpose. If investigations and criticisms must be had, we favor strict executive sessions. If any Congressman never makes mistakes, let him stand up. This is no time for public speeches denunciatory of the work of the administration in conduct of the war, but rather for the active aid and assistance of every patriotic citizen, including certain Members of Congress. Politics must not be allowed to interfere. This is going to be an unhealthy country

for those who even slightly serve the enemy or stand in the way of the people and their soldiers in winning this war by undivided and wholesouled support.

A. B. Witcher, mayor; Frank Callaway, rancher; Chas. S. Chandler, lawyer; Chas. A. Walker, lawyer; J. S. Bennet Telephone Co., superintendent; Alex. Baird, deputy mine inspector; C. A. Eddy, lawyer; Geo. P. Annand, postmaster; Mrs. W. R. Trusdale, postal clerk; C. J. McFadden, district judge; G. F. Boreman, lawyer; B. L. Quayle, lawyer; F. M. Clark, druggist; W. H. Bishop, jeweler; W. A. Leonard, editor of Record; A. C. Powell, deputy game warden; Miss R. Haney, postal clerk; V. J. Ruse, postal clerk; C. C. Whitmore, agent Wells Fargo; Thomas F. Chambers, restaurant; Clyde Hatch, merchant; Ed. Wilson, merchant; R. H. Richardson, physician; P. J. Jackson, deputy sheriff; W. S. Holmquist, physician; J. M. Collins, justice of peace; Anthony Jurich, lawyer; W. E. Watson, carpenter; Geo. A. Whitely, district attorney; J. M. Lockhart, lawyer; Joseph V. Murphy, merchant (and a thousand more if necessary).

REPORTS FROM COMMITTEE ON PUBLIC LANDS.

Mr. MYERS, from the Committee on Public Lands, to which was referred the bill (H. R. 5489) to authorize the Secretary of the Interior to exchange for lands in private ownership lands formerly embraced in the grant to the Oregon & California Railroad Co., reported it without amendment and submitted a report (No. 255) thereon.

He also, from the same committee, to which was referred the bill (S. 3391) to authorize the Secretary of the Interior to issue patent to G. H. Beckwith for certain land within the Flathead Indian Reservation, Mont., reported it with amendments and submitted a report (No. 254) thereon.

INCREASE OF PENSIONS.

Mr. SMOOT. From the Committee on Pensions I report back favorably without amendment the bill (S. 3783) to amend an act entitled "An act granting pensions to certain enlisted men, soldiers, and officers, who served in the Civil War and the War with Mexico," approved May 11, 1912.

I wish to give notice to the Senate that I expect to call up the bill just as soon as possible. In the meantime I shall either prepare a report upon the bill, as soon as I receive certain information from the Pension Bureau, or make a statement to the Senate in relation to the same.

The VICE PRESIDENT. The bill will be placed on the calendar.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JONES of Washington:

A bill (S. 3788) to pay certain taxes to the county of Stevens, State of Washington; and

A bill (S. 3789) to pay certain taxes to the county of Ferry, State of Washington; to the Committee on Indian Affairs.

A bill (S. 3790) providing for the establishment of a radio station on Unga Island, Alaska; to the Committee on Naval Affairs.

A bill (S. 3791) to aid in the erection of a monument to Indian Timothy at his grave near Alpowa, Asotin County, Wash.; to the Committee on the Library.

A bill (S. 3792) granting to the State of Washington public lands to aid in the construction and maintenance of public roads, to promote the study of forestry, to promote the study and development of horticulture, and to promote vocational education in the State of Washington; to the Committee on Public Lands.

By Mr. McNARY:

A bill (S. 3793) to provide for the leasing of lands in Alaska for stock breeding and other purposes; to the Committee on Public Lands.

By Mr. DILLINGHAM:

A bill (S. 3794) granting an increase of pension to Warren H. Rhoades (with accompanying papers); to the Committee on Pensions.

By Mr. SMOOT:

A bill (S. 3795) to secure greater cooperation between the United States Reclamation Service and irrigation districts organized under State laws; to the Committee on Irrigation and Reclamation of Arid Lands.

By Mr. HALE:

A bill (S. 3796) granting an increase of pension to Hiram N. Brann; to the Committee on Pensions.

By Mr. MYERS:

A bill (S. 3797) validating certain applications for and entries of public lands, and for other purposes; to the Committee on Public Lands.

FARM LABORERS.

Mr. JONES of Washington. I introduce a bill which has been prepared after consultation, as I understand, with the Secretary of Agriculture. It is rather crude, but it embodies an idea that I am in favor of. I do not know whether I favor the bill in all its particulars; so I desire to introduce it, by request, in order that it may have consideration by the committee and also by the department.

The bill (S. 3787) to provide competent farm laborers during the war, through Government training camps, and for other purposes, was read twice by its title and referred to the Committee on Agriculture and Forestry.

QUALIFICATIONS OF ELECTORS.

Mr. KENYON. I introduce a joint resolution providing for an amendment to the Constitution, and I want to intrude on the rules just enough to explain it.

Section 2 of Article I of the Constitution of the United States provides that—

The House of Representatives shall be composed of Members chosen every second year by the people of the several States, and the electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislature.

Mr. President, I think to those who have studied the question it is a matter of some interest and rather shocking that we have in this country at least seven States where men can vote for Members of the House of Representatives and electors to choose a President of the United States who are not citizens of the United States. That is up to the various States under this constitutional provision. Such a thing ought not to be, it seems to me. This amendment of mine will provide that section 2 shall be so amended that the electors of the States voting for Members of Congress must be citizens of the United States. At some later——

Mr. SMITH of Michigan. Has the Senator the names of the States that afford that opportunity to aliens?

The VICE PRESIDENT. There are nine of them.

Mr. KENYON. The Vice President says there are nine of them. He suggested that to me the other day. I followed it down and I found seven. The States I have found are Arkansas, Kansas, South Dakota, Nebraska, Missouri, Indiana, and Texas. The names of the two others might be supplied by the Vice President.

I trust that the Committee on the Judiciary will make a report on this amendment, so that we may start it going on its round through the States. It is time to correct the Constitution in this respect, and in the interest of Americanism, that men who vote for Members of Congress shall at least be citizens of the United States.

The joint resolution (S. J. Res. 130) proposing an amendment to the Constitution of the United States was read twice by its title and referred to the Committee on the Judiciary.

COMMISSION ON NAVY YARDS AND NAVAL STATIONS (H. DOC. NO. 1946, PT. 6, 64TH CONG., 2D SESS.).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on Naval Affairs.

To the Senate and House of Representatives:

I transmit herewith for the information of the Congress, Report No. 6 of the Commission on Navy Yards and Naval Stations.

WOODROW WILSON.

THE WHITE HOUSE, *February 8, 1918.*

TEACHERS' RETIREMENT BILL.

The VICE PRESIDENT. The morning business is closed.

Mr. HOLLIS. Mr. President, I understood that the Senator from Colorado [Mr. THOMAS] intended to address the Senate this morning. He is out of the Chamber for the moment. I wish therefore to move that the Senate proceed to the consideration of the bill (S. 3648) for the retirement of public-school teachers in the District of Columbia, with the understanding that when it is laid before the Senate, if the Senator from Colorado is here, we will give him an opportunity to speak. I make that motion.

The VICE PRESIDENT. The question is on the motion of the Senator from New Hampshire.

The motion was agreed to; and the Senate, as in Committee of the Whole proceeded to consider the bill.

Mr. HOLLIS. I am prepared at this time to explain the bill in as much detail as anyone may desire. I can give a synopsis of it in a few moments. If no one desires to have the bill read in

full. I will ask unanimous consent that the reading of the bill be dispensed with.

Mr. SMOOT. Mr. President, the Senator from Colorado [Mr. THOMAS] is in the Chamber, and I will ask him if he will not yield to me for about five minutes.

Mr. THOMAS. I do not see how I can yield when the Senator from Utah has the floor. [Laughter.]

A NATIONAL MONTHLY FAST DAY.

Mr. SMOOT. Mr. President, on Thursday, January 31, the junior Senator from Maryland [Mr. FRANCE] delivered a speech in the Senate that I wish every American citizen could read and I am sure could do so with profit. It was a remarkable statement, showing food conditions as existing in our country and they are such as to alarm the thoughtful.

Everybody recognizes that one of the most important things in this war is to secure food enough for the people of the world and in order to do so there must be some kind of systematic plan adopted for caring for the food and the saving of the same.

I wish to offer a suggestion, and I believe if adopted by the American people it will conserve the food of our country and will enable us to furnish our allies with the amount saved, and in so doing save the cost of the food and enable every man and every woman and every child in the United States to become the owner of at least one war-savings certificate and in many cases hundreds of them.

Mr. President, on April 8, 1916, while addressing the Senate, I called attention to the wicked waste of foodstuffs in America and to the fact that the American garbage can was the fattest in all the world and that the food consumption per capita in America was larger than that of any other country and nearly twice that of thrifty France. In speaking of the home and Nation, after showing that the increase of farm crops since 1899 had not kept pace with the increase of values, I said:

> We must not forget that the influences that affect the family to a degree affect the Nation. In my opinion, waste and extravagance in their thousand forms are among the curses of the age, and no people upon the face of the earth is so guilty of both of these evils as our own American people. The people of the United States—I bar no class—have been living at a higher and higher standard for the last 15 years. The time has arrived when further advances in the mode of living must cease, and it is really desirous from every point of view for a retrenchment. * * * Extravagance and waste, which devour so much of the substance of the people, have much to do with the cost that is severely felt; that is, the cost to people of small means, who find it hard to get on in comfort with such incomes as they possess.
>
> There is a fundamental principle of economics, so simple that it ought to be easily understood, and yet its significance is almost unheeded. It is this: Everything that goes to support life and to satisfy human wants must be continually produced for that purpose by human effort through the employment of capital and labor from the resources of nature. There is only what is thus produced to live upon; that is the supply. It is a question of how much is consumed in living, and it can not be more than the production, at least for any length of time. If products are squandered or wasted or thrown away after they are ready for consumption the supply will be diminished, while the demand remains the same and the cost of living will be higher than it would otherwise be. These are not questions of abstract theory, but are elementary facts within the comprehension of any ordinary man. We need to be reminded that whatever goes to waste and extravagance, which is reckoned in terms of money, is not a mere throwing away of dollars or depleting of bank accounts or getting away with inherited or accumulated property. It is using up the fruits of labor, which is going on from day to day. This is exceeding the supply of products and turning from the form of necessities and comforts to those of luxuries. It is largely the voluntary cost of high living that causes the involuntary cost of low living.
>
> Increased production from the soil and the problem of properly feeding our ever-increasing members will tax the abilities of our statesmen.

That is from a speech I made in 1916.

This statement was made by me a little less than two years ago, and to-day we find the people of most of the nations of the earth on the strictest sort of rations and in many are actually suffering from hunger. We have in our own country a Food Administration, asking our people to observe meatless days, wheatless days, porkless days, and to stop the waste of all kinds of food. Their warnings should and must be heeded. Not only must we conserve the food supply, but we must put in effect in our lives the principle of saving in order to assist in the purchase of our Government's obligations issued to meet the unusual demands made upon it to successfully carry on the war and extend financial assistance to our foreign allies.

The American people are to be congratulated for the liberal way in which they have responded to every call made upon them by our Government having for its object the carrying on of the present world war. They have given lavishly to the American Red Cross to be expended in foreign countries for the comfort of our soldier boys and for help and assistance to the suffering on European battle fields. They have oversubscribed every issue of liberty bonds and have donated billions upon special appeals to alleviate the sufferings, sore afflictions, and hunger of millions of the people of the world. All this will remain long after the close of the war as an everlasting monument to American loyalty to country and liberality and friendship to and sympathy for God's suffering children. Notwithstanding all that has been done and, as some people say, sacrificed, the work has only begun. If this war should continue two years longer, I am afraid there will be a scarcity of food in the world and many of our own people will be compelled to go short in order to assist in feeding our Army and Navy and the armies and navies and people of other countries engaged with us in this the bloodiest war of history. The American people must be made to understand that the responsibility of seeing that hunger is not allowed to dishearten our allies or to compel neutral countries to seek the absolute necessities of life from our enemies rests upon us.

Realizing the dangers of the situation, I want to call attention to what I know, if put into practice, will greatly assist in relieving the anxiety for the future. For 75 years the Mormon Church has designated one day in each month as fast day, the first Sunday of each month being the day so set apart. The members of that church are supposed to fast on that day by refraining from partaking of any food for breakfast and the noonday meal. The object of the fast is twofold: First, an occasion for acknowledgment of divine blessings and a day to remember the poor; second, in the interest of hygiene and health, which every good physician will testify to as effective. It is understood by every member of the organization that the amount saved by the fasting is to be given to an organization known as the relief society, and that organization in turn sees to it that with the fund so given the poor do not suffer from want or hunger. Nothing is lost by the giver, but, on the contrary, he is enriched in health and increased love of his fellow man.

Our country is now engaged in a thrift campaign for the purpose of inspiring in the hearts of the people patriotism and a spirit of saving, in order that every man, woman, and child in America may become the proud owner of at least one war-saving certificate. Why not have a national fast day once a month? If every American citizen would abstain from eating two meals upon that fast day, if figured at an average of only 25 cents a meal, or 50 cents per capita per month, would mean a saving of $50,000,000 that could be invested in war-saving certificates, and at the same time the health of 100,000,000 Americans would be benefited; and, further, we would have more of the necessaries of life to send to the people of Europe now compelled to live on the shortest of rations. Remember that the fighting man must be fed whether he be an American, Englishman, Frenchman, Belgian, Japanese, or Russian! Without sufficient food it is next to impossible to maintain the morale of an army. Let us have a national fast day, and by so doing place every man, woman, and child in a position to assist our Government by purchasing thrift and war-saving stamps, sometimes called "baby liberty bonds."

Mr. BORAH. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Idaho?

Mr. BORAH. I should like to ask the Senator a question.

Mr. SMOOT. Certainly.

Mr. BORAH. I am not about to take issue with the Senator from Utah upon the question of fast days; but is that the remedy for the difficulty we are now facing? There is any amount of food in this country which is going to waste because we can not get it to the point where those who desire to use it can use it. I do not believe that there is any shortage of food in this country if it could be properly distributed.

Mr. GALLINGER. And properly harvested.

Mr. BORAH. Yes. Take just one item—and I suppose that it could be added to by any other Senator in the Chamber: We have 4,000 carloads of potatoes in our State that will perish within the next 30 or 60 days if means are not found at once for their transportation. There is no use to talk to the people of Idaho about being economical in the use of potatoes while that condition of affairs obtains. There is also any amount of corn that is rotting and wasting throughout the country. While I am not debating the proposition which the Senator from Utah has presented, the real difficulty now is, and has been in this country for the last 10 years, the lack of some kind of a marketing system, some method and means by which to get the products from the farms to the points of the centralization of population, where they are desired.

Another thing, if the Senator will permit me——

Mr. SMOOT. Certainly.

Mr. BORAH. When the selective draft law was passed it was said that one of the great objects of that manner of organizing an army was to prevent the men on the farms and certain other places from being taken, so that they would be kept in the places where they ought to be. Without assuming to criticize the method at all by which that law was put into operation, the fact is that the man on the farm has been taken

and the farms of the country are depleted of their labor. They are asked to speed up, but they have not the labor with which to speed up. The farmers stand ready and anxious to help—to increase their acreage—but they are without the labor necessary to do these things. The situation is entitled to serious consideration, and at once. If the next execution of the draft law is to be the same as the last, we are going to see a most pronounced decrease in the production of the farms.

The farmer's boy is just as willing to go to war as is any other boy in the community; indeed, I think the figures will show that; and there is no reason under the sun why he should be exempted from serving his country in the trenches the same as others; but this proposition and this situation must be met: If he is to be taken from the farm under the next draft, if the remaining boys out upon the farm are to be drafted, there must be some means by which to supply the places of those boys on the farm; otherwise we are going to have a crisis which, in my judgment, will be far more effective in breaking down our participation in the war than we at this time contemplate.

I know that in my State, for instance, the crop acreage has been already tremendously decreased; and if the draft law is executed without any program with reference to the labor situation, to supply the man who is taken from the farm, that acreage is going to be further greatly decreased hereafter.

Mr. President, I suggest these two things for the reason that, while I am not at all criticizing the view of the Senator from Utah as a general proposition, the immediate situation is one of transportation and of labor. I am aware the Labor Department is dealing with the matter, and I hope for the best, but I know the situation is imminent and serious.

Mr. SMOOT. Mr. President, in answer to the Senator from Idaho, I will state that so far as certain foods are concerned there is no question but the Senator's statement is absolutely correct. Transportation is something that presents a very difficult question so far as transportation to market of perishable crops of the West are concerned. I was not very much alarmed over the wheat situation until about two weeks ago, when I held a conference with Mr. Hoover in relation to the food situation of the country. Mr. Hoover has had a survey made of the country showing the amount of wheat on hand and also the amount of wheat there is in the entire world. At that time, figuring a saving of 25 per cent in the consumption of wheat in the United States under the plan already adopted, there would still be a shortage of about 30 per cent to feed America, our allies, and the neutral countries. Mr. Hoover stated at that time that the only way to do would be to restrict the use of all-wheat flour; that substitutes to the extent of 30 per cent would have to be used in the flour used by the American people. An order to that effect is now in force.

So far as labor is concerned, Mr. President, the Senator from Idaho is right in reference to the situation in the West. I think I called the attention of the Senate one day to the fact that when I was last at home I rode through miles of apple orchards and saw carloads of apples which had been frozen on the trees, for the reason that the farmers could not secure help to pick the same; in fact, some of the fruit growers told me that they had paid as high as $10 a day for labor, and when it reached that figure, even at the high price for which apples were selling, would not pay for the gathering and the boxing.

Mr. President, there are certain foodstuffs that must be conserved; they are vital to the feeding of our own people and the armies of the allies. The principal ones are wheat and meats of all kinds, and they are being transported just as fast as it is possible and to the amount which we can spare.

Mr. GALLINGER. Mr. President, will the Senator permit me to interrupt him?

Mr. SMOOT. Yes.

Mr. GALLINGER. I simply want to add this suggestion to what the Senator is saying: The labor situation is just as acute in the East as it is in the West, and some method must be found, if it is a possible thing, to secure more labor on the farms if we are going to secure sufficient crops to take care of our own people and supply those who are looking to us for help.

Mr. SMITH of Michigan. The farmer is discouraged.

Mr. GALLINGER. Yes; the farmer is discouraged.

Mr. SMITH of Michigan. And he does not know where to turn for relief.

Mr. GALLINGER. There is one suggestion I have heard made, though I do not know that it has been uttered in this Chamber. Therefore I think it is well enough to state it. It is that the young men in the camps might be furloughed when the season comes for planting, or, if they are in camp when the season comes for harvesting, be permitted to assist, if they are willing to do so. That may be a source of relief if it is carefully looked into and, possibly, carried out.

But I have another thought in my mind, which has been crystallized from some material that I have received and referred to the Committee on Agriculture and Forestry, and that is to get rid of the senseless opposition to oriental farmers, and let us have some of those men brought here; not coolies, but real farmers from China, because they have there some of the best farmers there are in the world. I presume, however, that the opposition of the labor unions will make it impossible to do that.

Mr. JONES of Washington. Mr. President——

Mr. SMOOT. I yield to the Senator from Washington.

Mr. JONES of Washington. I want to suggest also that one influence that is depriving the farmers of eastern Washington, where they produce a great deal of wheat, of their labor is that on the coast, especially where shipbuilding is being pressed—and very properly so and very necessarily so—wages are so high that they are attracting a number especially of the younger and more able-bodied men from the farms and the small towns. So the farmer is not only being depleted of his labor by the draft but by the inducement of these high wages in these necessary occupations. I wondered whether or not the Senator had considered any suggestion to meet this very imperative situation. It has got to be met in a different way than by providing for fast days, which are all right, of course, in themselves; but observing fast days will not plow any ground, will not plant any wheat, and will not harvest it, or anything of that sort.

Mr. SMOOT. It will save it.

Mr. JONES of Washington. It will save it after we get it produced, but we have got to produce it first before we can save it.

I must say, if the Senator will permit me, that I do not feel the necessity of carrying out the suggestion of the Senator from New Hampshire [Mr. GALLINGER]. Independent of the labor unions, I am not in favor of that proposal and will oppose it very strongly until we get in more desperate straits than we are in now. But here is one thing that has impressed itself upon me: Go about our towns, and especially our cities, and you will see many, many men congregated upon the streets at all times of the day doing absolutely nothing, and if you stand in front of some of the theaters of this town and other cities when the performances have concluded, you will find hundreds, and possibly thousands, of men coming out of those theaters, spending their time apparently in the afternoon doing nothing. We ought to devise some way by which this class of men can be made to work and do something toward the production of food. It seems to me that Congress ought to be able to devise something along these lines to make this class of people available for the necessary work of the Government.

Mr. SMITH of Michigan. Perhaps the proposal to enforce fast days ought to be made to reach them.

Mr. JONES of Washington. They ought to be made to fast unless they are made to work.

Mr. SMOOT. I will say to the Senator that I undertook to draw a bill to take care of just the class of people to whom he has referred by drafting them and compelling them to work. I prepared two or three drafts of a bill, after examining the State laws upon the question, and submitted them to the best attorney that I could reach. I discovered the trouble was that we could hardly segregate one class of citizens and compel them to work, because the Constitution of the United States will not allow that to be done under the prohibition against involuntary servitude.

Mr. JONES of Washington. Mr. President, in line with that, does it not occur to the Senator that we are getting very near to the point where we ought actually to draft or enlist every man and woman in this country, and then designate where they are needed and put them to work there, no matter what their occupation may be?

Mr. SMOOT. I am quite sure, Mr. President, if this war continues much longer, that policy will have to be resorted to. I think that we passed the other a day a bill authorizing the Secretary of War to grant furloughs to our soldiers without pay. Under existing law that can not be done. I understand the object of that bill, in case it becomes a law, is to allow the Secretary of War during the harvesting period to grant furloughs without pay to soldiers at the different cantonments who wish to offer their services to the farmers of the country to help the farmers not only in planting but in gathering their crops.

Mr. GALLINGER. Mr. President, the Senator means the soldiers in the camps and cantonments?

Mr. SMOOT. Yes; the soldiers in the camps and cantonments.

Mr. SMITH of Michigan. Soldiers are now being made use of in the forests of the West, and are being used at the regular

wage that is paid a forester outside of the Army, and a high wage.

Mr. SMOOT. Then the Government is paying him his regular Army pay also. I have heard of no such practice.

Mr. SMITH of Michigan. I do not think the Government is paying him the Regular Army pay. My information is——

Mr. SMOOT. It would have to under the law.

Mr. SMITH of Michigan. My information is that they are receiving the wage that is paid to civilians in the Forestry Service. Am I right about that, I will ask the Senator from Washington? Is it not true that soldiers who have been drafted into the Army are now doing service in the forests in aid of shipbuilding and are now drawing the civilian wage for that service?

Mr. JONES of Washington. I can not say; I am not advised about that matter.

Mr. SMITH of Michigan. I am quite sure that that is so, and that they are drawing a very high wage, and appropriately so. I am finding no fault with that.

Mr. SMOOT. Two months ago I made a suggestion that the soldiers in the camps and cantonments during the planting season and the harvesting season be allowed to assist the farmers. Gen. Crowder told me that a furlough without pay was impossible to grant; that the military authorities had no right under the law to grant furloughs without pay. As I have said, the other day a bill passed the Senate giving the Secretary of War the power to grant such furloughs, the object being to allow the soldiers in the various camps to assist the farmers during the planting and crop-gathering season.

Mr. REED, Mr. SMITH of Michigan, and Mr. GALLINGER addressed the Chair.

The VICE PRESIDENT. The Senator from Missouri.

Mr. REED. I beg pardon, did the Senator from Michigan wish to speak at this time?

Mr. SMITH of Michigan. No; I was only going to interrogate the Senator from Utah, but as he has ceased speaking I will not prolong the discussion.

Mr. GALLINGER. Mr. President——

Mr. REED. I yield to the Senator from New Hampshire.

CONFERENCE OF REPUBLICAN SENATORS.

Mr. GALLINGER. Mr. President, as a preliminary to a few words that I will indulge in, I ask that the Secretary read the clipping which I send to the desk from the Washington Post of this morning, with the headlines.

The VICE PRESIDENT. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

MINORITY TO FIGHT BILL—SENATE REPUBLICANS TO CONFER ON PLAN TO BEAT WILSON MEASURE.

A move toward concerted Republican opposition of the new administration bill proposing to give President Wilson blanket authority to reorganize and coordinate Government agencies, a speech in the House by Representative GLASS, of Virginia, denouncing critics of the Government and temporary suspension of Senate debate were yesterday's developments in the controversy over war machinery reorganization.

A conference to-morrow morning of Republican Senators—the first held since the United States entered the war—was called late yesterday by Republican Leader GALLINGER to consider the new bill President Wilson sent to the Senate Wednesday. Bitter opposition to the measure is expressed openly by Republicans and privately by several Democratic leaders. There were 25 signatures on the call for the Republican conference.

TO CONSIDER OTHER BILLS.

The Republicans also expect to consider joint action on the administration measure to create a war-finance corporation, which is being urged by Secretary McAdoo, and upon other administration legislation.

Mr. GALLINGER. Mr. President, I shall not take time to point out the numerous inaccuracies in that newspaper article, which doubtless has been sent to the newspapers of the country. I will, however, say that the Republicans have not called a conference to consider any particular measure or to plan any particular procedure concerning the bills that are to be considered. They have not decided to fight any bill. A conference has been called, as is usual, to exchange views on a variety of subjects. The record which the minority has made during the consideration of bills relating to the war is sufficient proof that they could not be induced to band themselves together as a party and act in that capacity in the consideration of any measure that may be brought before the Senate. They will, as our Democratic friends will, exercise their individual judgment when any measure, emanating either from a Member of this body or elsewhere, comes up for consideration; but that they have any purpose of doing what this newspaper extract says is absolutely absurd and without any semblance of truth.

H. H. HOGAN.

Mr. REED. Mr. President, I wanted to ask the indulgence of the Senate for a moment to see if I could not secure unanimous consent to take up Senate bill 3689. It is a little private bill authorizing the Postmaster General to cancel or re-form a contract for hauling mail in Kansas City. The contract was taken at a time when prices were very different from the present ones, and it is simply ruining a man who has only a few thousand dollars. This bill merely gives the Postmaster General authority to cancel the contract or to re-form it in a manner that is consistent with fairness.

Mr. SMOOT. Mr. President, if the Senator will yield, I should like to ask him if there are not thousands and tens of thousands of such cases throughout the United States?

Mr. REED. I have no doubt there are, but this case is one of peculiar hardship. The man, to use a common figure of speech, is literally hanging by his eyebrows on the very verge of bankruptcy, and unless the bill can be passed within a few days he will be bankrupted. I want, if possible, to give him an opportunity to save himself. He is a poor fellow who has saved a few dollars by hard work, has gotten a little bit ahead, and is now being ruined.

I ask unanimous consent to have the bill considered at this time.

The VICE PRESIDENT. Is there any objection?

Mr. OVERMAN. Mr. President, I want to say that I am not going to object to the consideration of the Senator's bill, but there is general legislation on this subject pending in the House of Representatives.

Mr. REED. I know there is.

Mr. OVERMAN. And if we pass this bill it will show the sense of the Senate that something should be done.

Mr. THOMAS. Mr. President, I shall not object. I should like, however, to ask the Senator if he expects that the bill will be opposed?

Mr. REED. I think not. If it is, I will not interfere with the Senator's address.

Mr. FLETCHER. Mr. President, I only want to say that I not only do not object, but I approve of the bill, from the Senator's statement. I know of my own knowledge of cases that are somewhat similar. I have in my own town a case very much like this, where the man will be ruined if he has to complete his contract. It seems to me the department ought to exercise and have power to exercise some discretion to relieve these cases. They are absolutely cases of good faith, where circumstances have arisen so that the contractors will be ruined if they have to continue their present contracts. I am glad to know that some general legislation on the subject is pending. It seems to me that the department ought to have a little leeway to adjust this sort of thing.

Mr. REED. Mr. President, I introduced two bills dealing with this matter. One is a bill for the relief of this particular individual and the other is a general bill. The bill for the relief of the particular individual has been reported out and is here. The other is not here yet. I hope to have it here in a day or two. I should like very much to get this one little bill through, for the reasons stated.

The VICE PRESIDENT. Is there any objection to the consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes that, should the Postmaster General find as a fact that the screen-wagon contract of H. H. Hogan, of Kansas City, Mo., was entered into prior to the entrance of the United States into the war with Germany, and that the prices agreed to be paid in said contract are at the present time inequitable and unjust by reason of the increase in the cost of materials and labor employed in the performance of such contract, the Postmaster General is authorized, in his discretion, with the consent of the said H. H. Hogan and his bondsmen, to cancel the same or to readjust the terms of said contract in such manner as to relieve the contractor from the hardships being by him suffered on account of such increased costs and expenses.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CALLING OF THE ROLL.

Mr. THOMAS obtained the floor.

Mr. HOLLIS. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Curtis	Gerry	Hollis
Beckham	Dillingham	Gronna	James
Borah	Fernald	Hale	Johnson, Cal.
Calder	Fletcher	Harding	Johnson, S. Dak.
Chamberlain	France	Hardwick	Jones, N. Mex.
Colt	Frelinghuysen	Henderson	Jones, Wash.
Culberson	Gallinger	Hitchcock	Kellogg

Kenyon	Nugent	Sheppard	Tillman
King	Overman	Sherman	Townsend
Kirby	Penrose	Simmons	Trammell
Lodge	Phelan	Smith, Ariz.	Vardaman
McCumber	Pittman	Smith, Mich.	Wadsworth
McKellar	Poindexter	Smith, S. C.	Warren
McLean	Pomerene	Smoot	Watson
Martin	Ransdell	Sterling	Williams
Nelson	Reed	Swanson	Wolcott
New	Robinson	Thomas	
Norris	Shafroth	Thompson	

Mr. McKELLAR. I wish to announce that the senior Senator from Tennessee [Mr. SHIELDS] is absent on important business. I will let this announcement stand for the day.

Mr. GRONNA. I wish to announce that the Senator from Wisconsin [Mr. LA FOLLETTE] is absent because of illness in his family. This announcement may stand for the day.

The VICE PRESIDENT. Seventy Senators have answered to the roll call. There is a quorum present.

WAR CABINET.

Mr. THOMAS. Mr. President, inasmuch as the investigation conducted by the Committee on Military Affairs has provoked considerable discussion relating to the prosecution of the war, and inasmuch as the public is to a large degree in possession of the results of that investigation, although no report has as yet been made by the committee, this is an appropriate time for discussing the general subject.

The disclosures of this committee have not surprised me. Indeed, I might say that I am surprised that no greater degree of inefficiency has been disclosed, not because the War Department has not been active and vigilant in the attempted discharge of its duties, but because of the enormous and almost insuperable difficulty of shaping in so short a time a war machine efficient, vigorous, and perfect under institutions like ours.

We are not a military people, Mr. President, and therefore we were not prepared for this war when we entered upon it. I am glad that that was so, because our main purpose in engaging in this war, in pledging our lives and our fortunes to its success, is to destroy militarism and sweep it from the earth forever. If in April, 1917, we had been thoroughly equipped on land and sea for a great offensive or defensive war, we would have been guilty of the very thing which impelled us to enter it and for the suppression of which we shall continue to wage it. Not being prepared, Mr. President, not being equipped except as our skeleton organization may be said to suggest equipment, and being compelled as rapidly as possible, urged to a great degree by the force of public opinion and, of course, the necessity for waging the war effectively as soon as possible, it was necessary to speed up all the departments, and particularly those of War and of the Navy. What has been done by the War Department, what has been actually accomplished, is told in the story of the Secretary himself, a story so replete with successful accomplishment, so remarkable in the general sweep of its effectiveness, that I am astonished, in view of the agencies at the command of that department and of the comparatively short length of time which elapsed between the declaration of war and the beginning of this investigation, at the progress it has made.

Bills have been introduced, one reported favorably from the Committee on Military Affairs and the other in the possession of that committee, which have been prompted by the disclosures of the investigation. It is not necessary, Mr. President, for me at this time to go into the details of these disclosures. Primarily it would be presumptuous for me to do so, since I have given but little time and attention to the sittings of the committee, partly because of absence and partly on account of the pressure of other imperative duties. Those details, however, have been given to the public by the committee. They have been stated somewhat exhaustively more than once on the floor of the Senate. Yet I think the specific instances of departmental failure which have been disclosed are not typical but sporadic. They are not characteristic, but occasional. And while they are to be deplored, as many of them are of a most serious character, they should not obscure our vision to the extent of imagining that they present a composite picture of universal and far-reaching inefficiency. We should bear in mind in their consideration at all times what has been done and what is being done, and at the same time, appreciating these disclosures, see to it that the machine is made as much more efficient, as effective, as possible.

And yet, Mr. President, some of the delinquencies cited have not been stated fairly. I do not, however, in the slightest degree desire to reflect even indirectly upon the sincerity or the earnestness or the motives of those who have discussed them.

If the student of history will compare the exposés of this investigation with the activities of the department in previous wars, and particularly in the Spanish War, he must conclude that it has made great progress toward efficiency since then, for as compared with the mistakes, aye, the crimes, which disfigured the prosecution of earlier wars, we have approached as near perfection as we can be expected in a country like ours, thrown suddenly into a war in whose prosecution it designs to bear the most conspicuous part. I think it is gratifying, historically, that up to this time we have found ourselves so well equipped, that we have accomplished so much, and that we are in process of accomplishing so much more toward that ultimate victory which must rest upon our arms.

Some of the mistakes and blunders, Mr. President, which have been charged to the general conduct of the War Department are neither mistakes nor blunders. On the contrary, they evidence the very best business capacity for which the department should be praised and not condemned. For example, it has been stated here not less than twice that the Secretary of War and his subordinates were compelled to apply to poor, bleeding France for our ordnance supply; that it is so inefficient, that its work of preparation has been so retarded, that it has been forced to ask that ally which has made the hardest and most desperate resistance to the German arms to take upon itself the added burden of supplying the American Army with its artillery.

Mr. President, the facts are that this arrangement was made at the suggestion, if not by the request, of the French Commission headed by Marshal Joffre, which visited this country in the spring of last year, and also by the British Commission as the result of their joint consideraton of the general situation. Is this action one to be condemned when it was inspired and recommended by those connected with the war from its inception and thoroughly competent to advise us as to our methods of preparation?

Mr. President, France has been bled white, but her industries have never flagged from the day when the German Armies invaded Belgium down to this good hour. On the contrary, its capacity for producing munitions of war has been constantly expanding, and certainly it is good business wherever it is possible to secure the equipment for our Army at the front. In the first place, it helps our allies when we give them the orders. In the next place, we save that much cargo space for other and perhaps equally important articles needed for the prosecution of the war. It stimulates industry at the front; it aids in supporting the noncombatants constituting the larger portion of the population of our allies; and, what is more, it makes for efficiency in the production and perfection of the products which we must utilize.

To charge the War Department with inefficiency and maladministration in that particular, Mr. President, is not only unjust and uncharitable, but it is unfounded. Of course, I want the members of the committee who have listened patiently to all of this evidence to correct me if, forsooth, I misstate the facts, either in whole or in part, in my reference to their proceedings and to the testimony which was elicited before them.

Mr. HITCHCOCK. Mr. President——

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Nebraska?

Mr. THOMAS. I yield.

Mr. HITCHCOCK. I think there is force in some of the argument made by the Senator from Colorado that France and Great Britain both offered to supply our deficiencies in artillery and that there may have been some need for accepting those offers, but the Senator will realize, if he recalls the testimony, that those offers were made only because those countries saw our deficiencies, and saw that without their offers we would not be able to put an army in the field and supply it with the artillery and the machine guns.

Furthermore, I am sure the Senator can hardly argue that this saves cargo space, because much less cargo space is occupied in taking the finished product to France than in taking the raw material there of which the finished product is made.

Mr. BECKHAM. Mr. President——

Mr. THOMAS. I yield to the Senator from Kentucky.

Mr. BECKHAM. I do not agree with the statement made by the Senator from Nebraska [Mr. HITCHCOCK], for I do not think the testimony shows that France and England have been willing to furnish us with these supplies simply because they saw, as he says, that we were deficient in those products. As a matter of fact, both in France and England, the production of munitions has been brought to the highest point possible, and they have been producing munitions of war in many instances in excess of their current needs. Some of the witnesses before the committee stated that it was no burden upon the industries of those countries to supply us temporarily with our needs. Only recently the Chief of the Ordnance Department testified that in the matter of a certain very important munition of war the factories and industries in France were adequate to produce all

that the French Army needs now and all that we will need until about the 1st of October, and that it was no hardship whatever upon those French industries to supply us.

There is another point lost sight of, if the Senator will pardon me for calling attention to it. It is that so many of the industries in this country were engaged when we entered into the war and afterwards in the production of arms and munitions for the allies. It was certainly not good policy for us when we entered the war to stop that production which was going on for the benefit of the allies. There has been an agreement and an understanding among the French, English, and American commanders and officials in the matter of supplying arms and munitions and distributing them among the different armies, and it is a mistake, I think, to say that the French have in any way suffered or been deprived of a sufficiency of arms by the calls made upon them by our Army.

Mr. THOMAS. I am obliged to the Senator from Kentucky for the information which he has given the Senate upon the subject. I understand that the statement of the Chief of Ordnance was made yesterday before the committee, on which occasion he offered to exhibit telegrams showing that it was the desire of the French Government to furnish not only artillery but explosives up to some time in August or September.

Mr. BECKHAM. The 1st of October.

Mr. HITCHCOCK. I wish to state, however, that he said at the same time it was not possible for us to produce in America those things before that time.

Mr. THOMAS. I understand. I will come to that.

Mr. HITCHCOCK. Therefore he verified what I say, that their offer was merely to supply our deficiency.

Mr. THOMAS. Mr. President, the offer was to make good our possible deficiency, but it was not an offer that tended to deplete the French Army of supplies of a similar character. In other words——

Mr. BECKHAM. Let me correct the Senator from Nebraska.

Mr. THOMAS. I will yield in just a moment. In other words, the furnishing of heavy ordnance and artillery to the American Army in France did not impair the efficiency of the French manufacturers to the extent of stinting their manufacture of similar supplies for the French Army. I now yield to the Senator from Kentucky.

Mr. BECKHAM. The Chief of Ordnance did not say that we would not be able to manufacture and supply these things until October 1. He said, as I recall it, that by July 1 we would be supplying them.

Mr. HITCHCOCK. The Senator is mistaken. We are building the powder factory now, and will not begin to supply powder until August, and then only at one-third capacity. We shall not be able to supply gas shells in any quantity before fall.

Mr. BECKHAM. Before July.

Mr. HITCHCOCK. We shall begin in July on a very small scale, but it is not only that testimony but other testimony before the committee recited by me here formerly. Take the matter of machine guns. While we have provided for machine guns for the future not one-tenth of those machine guns will be delivered before fall. Therefore, of necessity, if we are to have machine guns they must come from some other source, and France volunteers to produce them.

Mr. BECKHAM. Did not the Chief of Ordnance say that in the matter of explosive shells there are more than enough to supply the needs of the French Army and our Army until the 1st of October?

Mr. HITCHCOCK. It has been said France has facilities for doing those things, and under those circumstances there is nothing for us to do but to accept those offers. I am not citing this to show that we shall be embarrassed but that we failed ourselves to produce them and are compelled to depend upon France.

Mr. THOMAS. We should have accepted that offer whether we were prepared to produce the articles ourselves or not, because it not only helps France and her civil population, but, I repeat with all due deference to my friend the Senator from Nebraska, it also saves cargo space, because much of the material is already upon the ground. Practically all of it must be, except perhaps the material needed for manufacturing the explosives or the French manufacturers could not comply with their contracts.

In that connection, Mr. President, I offer and ask to have inserted in the RECORD, without reading an Associated Press dispatch from New York, dated February 6, and published in the Washington Post of yesterday morning, containing an announcement by Mr. André Tardieu, the French high commissioner in this country, as to the ability of France to furnish and supply much of the material, the failure to produce which here is charged as one of the chief shortcomings of the Department of War.

The PRESIDING OFFICER (Mr. PITTMAN in the chair). Without objection, it is so ordered.

The matter referred to is as follows:

FRANCE PLEDGES GUNS—ARTILLERY FOR 500,000 AMERICANS BY JULY 1, SAYS TARDIEU—PERSHING HAS OVER 210,000—MILITARY EFFORT OF UNITED STATES "WONDERFUL AND SPLENDID"—JUST APPRECIATION OF RESULTS SHOULD BE STIMULANT, DECLARES FRENCH HIGH COMMISSIONER—DEVELOPMENT IN AVIATION "BEYOND ALL EXPECTATION"—FRENCH HAVE 4,725,000 MOBILIZED—HOLD 565 KILOMETERS.

NEW YORK, *February 6.*

Announcement that France will be able before July 1 to manufacture enough artillery to supply 20 American divisions, or approximately 500,000 troops, if the United States meanwhile adheres to an understanding by which France would receive the necessary raw material from America, was made here to-night by André Tardieu, French high commissioner to this country.

M. Tardieu made the statement also that there are in France to-day more American troops than comprised the American Army at the time the United States entered the war. At that time, he said the American Army contained about 212,000 officers and men.

The French official spoke at a dinner which was part of New York's celebration of the Jour de l'Alliance Française, which was observed throughout the United States and Canada to-day, the anniversary of the treaty between France and the American Colonies in 1778. Jules J. Jusserand, the French ambassador, also was a guest of honor.

RESULTS SHOULD STIMULATE.

Asserting that "secrecy ought to be a thing of the past, because our democracies want to know in order to will," M. Tardieu said that "just appreciation of the results achieved" by America in its war preparations "is a stimulant for effort, and nobody has the right to refuse to the American people this stimulant." The commissioner reviewed the nation's accomplishments and outlined what France had done in the way of manufacturing ordnance both for the United States and for France's other allies.

"We have in the line," he said, "about 15,000 guns of every caliber, and every day more than 300,000 shells are turned out by our factories. To get those guns, to produce those shells, we created an industry which did not exist before the war and which has enabled us not only to arm ourselves but also to arm our allies.

HOW FRANCE ARMS ALLIES.

"Without speaking of what we manufacture for you, and that is several hundred guns a month, we have during the past three years given to our allies in Europe 1,350,000 rifles, 15,000 automatic rifles 10,000 machine guns, 800,000,000 cartridges, 2,500 guns, and 4,750 aeroplanes. * * *

"The adoption without any modification of our various types of guns would certainly have saved some time to the benefit of American production, and some delays may be the consequence of the improvements you are looking for, always, and rightly at that, aiming at better results.

ARTILLERY SITUATION SAFE.

"But as we have agreed, it is understood that you should supply and transport to France the necessary raw materials; we will under such conditions be able, in France, to deliver to you before July 1 enough guns thoroughly to equip 20 of your divisions. The situation, therefore, is completely safe in that respect."

M. Tardieu described America's military effort as "wonderful and splendid," and asserted it had been "a surprise to the enemy."

"I have cooperated for nearly 10 months, hour by hour, with every part of your war organization," he said. "What you have done is magnificent, worthy of your allies, worthy of yourselves."

MORE THAN 200,000 IN FRANCE.

Alluding to the raising of the National Army, M. Tardieu declared that "no event of wider import has ever taken place since the beginning of the war." He continued:

"Thus your Government, with a clear and courageous view, has given you the strength of numbers, the first condition of military power. In April, 1917, you had 9,524 officers and 202,510 men. You have now 110,000 officers and 1,500,000 men, and the number of your men in France at the present moment is notably in excess of the establishment of your Army nine months ago."

France, he said, has taken "every necessary measure" so that America can complete in France the training begun here. Regarding aviation, American development has been "beyond all expectation," he declared. He outlined how America had helped the entente also financially and with shipping, food, and fuel—aid which he described as "immense and conclusive."

"Wherever, on special points," he added, alluding to his association with officials at Washington, "I believe that mistakes have been made, I say it frankly; the heads of the Cabinet or the heads of your departments know it from their own experience."

"I have the optimism of the satisfied," Mr. Tardieu said, discussing the situation generally, "and as long as I shall be here as the representative of my country I will ask from you every day a still greater effort. After 43 months of war our needs are huge indeed, and in order to supply them enormous sacrifices are required of you."

The speaker recalled that America, in order to equip its Army with guns and airplanes, called upon the allies for its immediate needs, at the same time inaugurating a program of American manufacturing.

WHY FRENCH AID WAS NEEDED.

"Some people in Europe as well as here," he said, "have been wondering why you should not in that respect have done everything by yourselves. This criticism shows that those people ignore, firstly, what time means in war, and, secondly, how infinitely complicated is the industrial war organization, which from the very start is required by the extensive production of ordnance and aviation. * * *

"I have drawn roughly the results of the military effort of the United States for a period of less than 10 months. I do not believe that any impartial man would say that this effort is now completed, but I declare that any impartial man must admit its wonderful extension and splendid achievements."

Money was the first aid needed by the allies, Mr. Tardieu went on, saying: "But it was not sufficient. Indeed, for lack of a general organization of production, the United States and the allies would have competed with each other in every factory, and sterility would have resulted from this anarchy.

PRAISES CENTRALIZED CONTROL.

"But in this respect I may state—and no one can be better informed than the representative of one of the allied countries—that the centralized organization realized for the allies by the War Industries Board and the War Purchasing Commission is excellent in every way. * * *

"During the month of December last the high commission called the attention of the Shipping Board to a crisis affecting very seriously our supply in gasoline and oil for the first two months of 1918. To-day the measures taken by the board allow me to state that this imminent peril is absolutely conquered for those two months.

COAL SUPPLIED TO SHIPS.

"Last January 17, when arriving in New York, I found 37 ships unable to sail for France on account of lack of coal; on January 18 the restriction orders for coal were issued by the Fuel Administration, and when I left New York on the 22d all our ships had coal.

"More recently I have found myself obliged, together with my allied colleagues, to draw the attention of Mr. McAdoo and Mr. Hoover to the insufficient arrival of cereals in the American ports. I am convinced that the measures which were immediately studied and decided upon unanimously will bring for the next month a decisive improvement. Their execution has already begun."

4,725,000 FRENCH MOBILIZED.

M. Tardieu reviewed what France is doing to-day. "Officers and soldiers mobilized on January 1, 1918, not including the native troops from the colonies and the workmen in the factories," he said, "amount to 4,725,000 men, of whom nearly 3,000,000 are in the army zone.

"The extent of the western front is 755 kilometers. Belgians hold 25, English 165, French 565. We hold, therefore, three-fourths of it. We have in front of us 80 German divisions; that means two-thirds of the German first-line troops and more than half of the German reserve divisions. The Germans do not intrust to any one of their divisions a front larger than 6 kilometers; ours often hold 9 kilometers each."

Ambassador Jusserand in his speech alluded to the determination of the allies to restore Alsace-Lorraine to France. "The Germans continued to say 'no,'" he said, "but we still say 'yes.'" He declared the Germans were past masters in the art of distorting history and had proven this in their writings on Prussian rule in Alsace-Lorraine.

"The Germans have issued many medals during the war," the ambassador concluded, "but when peace comes there is one medal only which the allies will strike, and that will bear but one word—'Liberty.'"

During the dinner Gen. Eli O. Hoyle, U. S. A., retired; Rear Admiral Colby M. Chester; and other Army and Navy officers were informed of the sinking of the *Tuscania*. None of them referred to it in their speeches.

Mr. THOMAS. I am not surprised, Mr. President, that we are not yet able to produce heavy artillery. I am not surprised that we are not yet able to produce powder to the capacity which may be demanded in the war. Those are patent facts, but who is primarily to blame for it? As far back as 1913 when, as a member of the Committee on Military Affairs, I first attended its sessions, as I have for every year since, we have been warned by the experts of the War Department not only of its inability to produce these very needed articles of equipment immediately but that it would take a long time to do so after its orders were placed.

Gen. Crozier has told us time and again that from the time of the placing of an order for heavy artillery to the time of its completion and delivery would require from 12 to 18 months. Now we—and I accept my share of the blame, if blame there be—should have heeded that and similar warnings, and should long ago have provided the means and enacted the legislation empowering the War Department to obtain this artillery and to place the orders for them. If we had done so, we should have had it in due season.

Our appropriations have materially increased year by year since the beginning of this great war, but these warnings were given long before then. They were repeated in 1915 and 1916, and not until Congress declared a state of war to exist between Germany and the United States did we actively cooperate with the War Department by enacting such legislation as enabled them to begin the gigantic task of improvising and equipping our Army.

So with powder. We have small manufactories, not sufficient, perhaps, even in time of peace. We have enormous private institutions producing explosives, but the combined product of both, when we consider outstanding contracts with the allies, is below the demand. This adds to the slow processes of the Government which has had to begin at the foundation to erect factories and secure the material for the manufacture of a sufficient quantity of explosives.

Instead of holding the War Department responsible for these things—I will say "wholly responsible"—we should be charitable enough to recognize and admit our own shortcomings in that direction.

Mr. HITCHCOCK. Mr. President——

Mr. THOMAS. I yield to the Senator.

Mr. HITCHCOCK. I fully agree with the Senator from Colorado on that point; we are all responsible for whatever dereliction of duty there was up to the outbreak of the war; but when the war broke out, Congress made abundant appropriations, and yet the War Department, which is charged with the duty of producing powder and knowing that we lacked a million pounds of powder a day, has not begun until now the construction of the factories that ought to have been begun last spring. So, instead of having the powder now we shall not have the powder until next August, September, or October.

Mr. THOMAS. Mr. President, it would be a blessed thing for us all if our foresight were as good as our hindsight. We appropriated money after the declaration of war; and if appropriations could win the war, Germany would have surrendered long ago; but something must be done with that money, and must be done effectively and efficiently. It may be that the War Department has been derelict in postponing the erection of powder factories. If so that is an important item which the committee has disclosed. Yet when we consider the enormous task placed upon the shoulders of the departments, not the least of which was the mobilizing of an army and the building in different parts of the country of shelter, and which they must have before they could be properly mobilized; when we consider the thousand and one problems immediately confronting the heads of the bureaus, the wonder is that they have not made more mistakes; that they have not exhibited greater deficiencies than those which now confront us, and which, thanks to the committee, I am sure will be very soon rectified.

My own view is that our mobilization of troops was premature; but public clamor insisted upon the early centralization of these boys in their various camps, without taking note of the enormity of detail necessary to be observed and accomplished if they were to be well taken care of and properly provided for after their assembly. Recall the utterances of the public press during last summer and fall, its complaints and charges of delays attendant upon the mobilization of our drafted men, and tell me whether the public can well escape some responsibility for the inconveniences, the occasional shortage of clothing, and the sickness which some of them suffered.

Mr. President, these influences in a country like this are potent. If, instead of the September mobilizations, we had waited for six weeks—if the public would have permitted a delay sufficient to thoroughly complete and equip the cantonments—much of the suffering and many of the lives which have been lost would have been spared. Therefore, let the public take its share of this burden, for much of it is due to its thoughtless impatience.

Another complaint relates to the shortage of ships for transport. I can not say to what extent that may be chargeable to the War Department, but I know that the scarcity of ships is the one great weakness in our general scheme of preparation and of actual warfare. It may prove to be the Achilles heel of our armor; I hope not; but here again, Mr. President, the Secretary of War can not be wholly chargeable with inefficiency or disregard of his duty, unless it be that he failed to get all the ships that he could. Some far-seeing men in this country, among them the Secretary of the Treasury and a number of Members of this body at the time, perceived the vast importance of this problem away back in 1914 and 1915. As a result the Committee on Commerce reported a shipping bill, empowering the Government, through a corporation which it should control, to utilize the appropriations therein proposed for the purpose of purchasing neutral bottoms and of building ships. That bill failed, and it was defeated, Mr. President, by a filibuster upon this floor carried on by night and by day. Some Senators now clamoring for ships and finding fault with the War Department because we have them not spoke for 6, 10, 12, and 13 hours against that great measure, thus preventing a vote upon it. With the reasons actuating that filibuster I am not at present concerned; with the motives of the gentlemen who defeated the measure I am not concerned. They no doubt were as conscientious as am I, as earnest in the conviction that they were discharging their duties to themselves and their country as I am that they were not. I challenge no man's motives, Mr. President, upon this floor, in the absence of cogent proof regarding them.

But I am justified in calling the attention of the Senate to the very short statement made by the junior Senator from Massachusetts [Mr. WEEKS] having the filibuster in charge, on the 3d of March, 1915, within 24 hours of the time when the Congress then in session expired by limitation. He said:

Mr. President, when the shipping bill was originally proposed it was announced that there were two purposes intended to be attained by it—one to provide for a temporary necessity and the other for building up a merchant marine. I understand that the conference report which has been presented and which is now on the table has eliminated the provision for the first of those two purposes; in other words, we have now before us a proposition to go into the shipping business permanently, the Government owning and operating lines of ships. It is to that particular phase of the question to which I wish to address myself this afternoon at considerable length.

Before doing so, however, I want to call to the attention of those in charge of the bill the fact that there are many Senators who had prepared themselves to discuss this measure before it was sent to conference two weeks ago. I have been handed a list of those Senators, and I wish to furnish the list to the RECORD, so that there may be no question about the desire of Senators on this side to discuss the bill, especially because it is probable that on account of the limited time all

of them will not be able to make the comments which they desire. The list includes Senators Burton, Root, Lodge, Oliver, Jones, Gallinger, Penrose, Townsend, Smoot, Lippitt, Poindexter, McCumber, Bristow, Cummins, Sherman, Clapp, Sutherland, Nelson, Sterling, Clark of Wyoming, Warren, William Alden Smith, and du Pont.

Those Senators have informed me that they wish to discuss the bill from one to several hours each, and I think that statement would justify—

At that point he was interrupted by the Senator from Florida [Mr. FLETCHER], who was compelled to withdraw the bill.

Mr. President, I would that the zeal for ships now so eloquently manifested by the junior Senator from Massachusetts had had its birth in the month of March, 1915.

Mr. LODGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Massachusetts?

Mr. THOMAS. I yield.

Mr. LODGE. If the Senator will permit me, since he has referred to the obstruction which led to the defeat of the shipping bill in 1915, as I said the other day, the controlling motive for the defeat of that bill was because it was known and believed that the purpose was to buy German ships and give $30,000,000 or $40,000,000 to Germany for them. I twice offered an amendment to exclude them, and twice that amendment was voted down. If the amendment had gone into the bill the bill would have passed, and everybody knows it.

Mr. LEWIS. Mr. President, will the Senator from Colorado allow me to interrupt him?

Mr. THOMAS. In just a moment. Mr. President, I do not know, nor does everybody know, that the bill would then have passed; on the contrary, I am satisfied that it would not have passed. The Senator having charge of the bill, the Senator from Florida [Mr. FLETCHER]—and I am sorry he is not here—had in his possession at the time and exhibited a statement from those having authority reciting that not a single ton of German shipping was for sale or could be bought; and, since the Senator has interrupted, I feel justified in asserting that the motives which prompted the defeat of that bill were two. One was that it committed the Government to the building of ships and the other that it would seriously injure, if it did not destroy, the monopoly of the coastwise traffic.

Mr. LODGE. Mr. President——

Mr THOMAS. I yield to the Senator.

Mr. LODGE. Mr. President, the Secretary of the Treasury in his hearing before the House committee stated in substance that it was the purpose to buy those ships. If there had been incorporated in that bill a provision against the purchase of belligerent-owned vessels—and I think I know something about the opposition to that bill—it would have passed; but an amendment incorporating such a provision was voted down twice at least. We could not get attached to the bill the provision that no belligerent-owned ships could be bought under the bill.

Mr. THOMAS. Mr. President, the RECORD, of course, will speak upon that subject.

Mr. LODGE. The RECORD will. I offered the amendment, and I spoke in regard to it.

Mr. THOMAS. I have no doubt the Senator offered such an amendment; I have no doubt that when he asserts that the bill would have passed under those circumstances, he says what he thinks is so. But I had some little information at the time also, for I stayed here night after night to aid in preserving a quorum and, if possible, to force the hand of the minority; and I am satisfied that the two causes which I have assigned are those which inspired the filibuster and led to the defeat of that measure.

I now yield to the Senator from Illinois.

Mr. LEWIS. Mr. President, I thank the Senator from Colorado for yielding at this time. My desire was to address myself to the Senator from Massachusetts and to remind him of the reasons which were then advanced for the opposition to the shipping bill referred to by the Senator from Colorado; but they have been anticipated by the Senator from Colorado, who has specifically called attention to that which it was my intention to present. Therefore, it is not necessary for me to interrupt the Senator.

Mr. THOMAS. Mr. President, it did not require——

Mr. POMERENE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Ohio?

Mr. THOMAS. I yield.

Mr. POMERENE. It may not be uninteresting to recall the fact that at the time we were trying to pass that bill American merchants and exporters were obliged to pay an increase in ocean rates, ranging from 100 per cent to 1,200, 1,300, and 1,400 per cent over the rates which prevailed during normal times.

Mr. THOMAS. That is true, Mr. President; but, as I have said, it was not my purpose to enter into the reasons which defeated that bill. My purpose was to emphasize the fact that it was defeated, and that, if it had been enacted into law then, in my humble judgment, there would be no scarcity of ships now, but the Secretary of War, the Secretary of the Navy, the Red Cross, and all the other agencies that are so sadly in need of bottoms to-day would be abundantly supplied. So let us not look too closely at the mote in the eye of the Secretary of War, but consider as well the beam in our own.

I was about to say when interrupted that the absence of coordination and the diffusion of authority in the departments of the Government were not revealed by the Committee on Military Affairs. That is an evil hoary with age and sanctified by antiquity. Neither is it confined to the War Department; it is everywhere in official Washington; it is popularly and properly known as "red tape." Senators from the Western States knew all about red tape years before the Committee on Military Affairs began its investigation. To use a common expression, they are "up against it" whenever they deal with the Interior Department upon any subject, however simple. A man has to visit more bureaus, consult with more officials, and confer with more divisions over a little water right——

Mr. SMITH of Arizona. And then not get it.

Mr. THOMAS. Than is necessary either to build a battleship or equip an army. We know all about it, and I might say that it is not without some pleasure that we see our friends of the East brought occasionally in contact with it, because perhaps it may result in some measure or policy that will enable us to minimize if we can not rid the country of it entirely.

Red tape is due in large part to our methods of legislation and in large part, perhaps, to the genius of our Government. Our methods of appropriations, Mr. President, are specific; they are not general. A general appropriation bill, an appropriation bill relating to the departments, contains from 175 to 200 pages, and specific appropriations are made for everything, even for the clerks and the employees. In the administration of that sort of a law, with responsibility necessarily fixed for expenditures in the way which it provides, red tape will ensue as naturally as maggots from a decaying carcass.

Moreover, Mr. President, scarcely anyone either now or heretofore occupying ordinary positions in the departments goes on any other theory than that, unless he makes himself appear indispensable he may lose his place; consequently he conducts the business intrusted to his care in such wise as to make these complications inevitable.

What has been accomplished by the committee is simply a nearness of perspective. The country has been brought close to this evil through its investigations. It is a cancer, Mr. President, that should be cut from the body politic, and the sooner the better. To do so not only makes for efficiency but it makes for economy, for speed, both in plan and in detail. Now, it shows itself in the new as well as in the old agencies.

Take some of these new bureaus—the Food Commissioner's office, the Fuel Commissioner's office, and two or three others. Why, Mr. President, from 40 to 50 per cent of the employees are nothing on earth but supernumeraries. They draw their salaries, of course, but they accomplish nothing. Their appointment and ostensible employment is a part of that system which is now so evident in the War Department. I am not blaming anybody for it. I am not blaming any party for it. It is the inevitable outcome of the manner in which this Government has been operating, and it will continue, no matter what the report of the Committee on Military Affairs may be, no matter whether the bills which they propose to report shall be enacted or not, until vigorous and summary measures are taken to do away with it. It can not be done by creating additional boards or councils.

Mr. President, one of the great weaknesses of our form of government is the tendency to create boards and bureaus whenever we think anything is wrong and needs rectification. We discover the existence of some evil, or find difficulty in securing this, that, or the other needed reform or change; and we at once legislate another bureau into existence, give it power to employ another horde of officeholders, and are apt to find that instead of furnishing a proper agency to administer the thing desired we have merely created an additional nuisance and endowed it with an additional expense.

A war council would simply add another link to the bureaucratic chains which now bind us. It would thus immeasurably increase the distance between efficiency and responsibility. It would not only do that but from two to three months would be consumed in organizing it; and after its organization, in all probability, if any of us had business with it we would play the game of battledore and shuttlecock down there, just as we do now, with Senators and Congressmen as the shuttlecocks.

Mr. President, the Taft Commission, appointed during the administration of that President, carefully investigated the subject and made a very full report upon it. It was supported by many of the Senators who are now here. Its recommendations were of the best. It was about that time that the senior Senator from Rhode Island [Mr. Aldrich] announced that if efficiency could be introduced in the administration of governmental affairs some $300,000,000 per annum could be saved. What has Congress done with that report? Has anybody in either House attempted to make it effective? Has any Democrat or Republican or Socialist or member of any other party been sufficiently concerned in the subject to utilize the report and seek to make its suggestions effective? Not one. Now we are blaming the War Department because of the existence of evils which existed then, and which, if we had acted after the expenditure of a large sum of money to obtain this investigation and report, would have been largely minimized and possibly done away with them long ago.

Moreover, Mr. President, I am not at all certain that either a director of munitions or a war cabinet or both are essential to the efficiency of the War Department. We have neither with the Navy. It required no munitions director or war cabinet to make the Navy efficient. Yet to-day it is universally conceded, justly so, that the Navy is in a very high state of preparedness.

How times change, Mr. President, and how opinions change with them. Three or four years ago the most abused and vilified man in the United States was the Secretary of the Navy. Every epithet that was printable was applied to him, the cartoonist went to the extreme of his genius to picture his inefficiency, his worse than uselessness. He was denounced as an impediment in the proper development of the Navy. His removal was demanded from many quarters. He stayed, fortunately for the country, and I believe some of his detractors, who are now critics of the War Department, draw contrasts between its inefficiency and the wonderful completeness of the naval machine. I took occasion to defend the Secretary of the Navy here at a time when every paragraphist in the country was heaping contempt and contumely upon his head. I tried then to show that he was doing his duty, and doing it well. Time has vindicated him, as, in my judgment, it will tend to vindicate the Secretary of War.

Mr. BECKHAM. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Kentucky?

Mr. THOMAS. I yield.

Mr. BECKHAM. I would suggest to the Senator that in comparisons between the Navy Department and the War Department since we entered this war one fact should not be lost sight of. I agree with him in what he says about the Secretary of the Navy and his splendid achievements in that service; but it should be borne in mind that when we entered this war the Navy was already a very large organization. There has been comparatively only a small increase in the Navy. The increase in personnel sometime ago was something like 100,000 men. It was easier for the Navy Department to expand to this increase than it was for the War Department to expand to the enormous increase placed upon it.

Mr. THOMAS. That is undoubtedly true.

Mr. BECKHAM. When we entered this war we had a Regular Army of approximately 150,000 men, and the War Department was organized to take care of that many men. In less than a year's time since war was declared between this country and Germany the Army has been increased beyond a million. There are a million and a half men now in training and under arms. Such an expansion of course put upon that department an enormous strain, and it was to be expected that mistakes should be made and that disappointments should occur in such a tremendous task.

Mr. THOMAS. I thank the Senator for his suggestion, Mr. President.

Mr. WARREN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Wyoming?

Mr. THOMAS. I do.

Mr. WARREN. I think, in addition to what the Senator from Kentucky has so well said, that he might mention the fact that the Navy was provided with extra funds much earlier than the Army. The regular annual naval appropriation bill for the year had something like $500,000,000 added to it in the Senate above what the House had proposed. This was quite a long time before we had appropriated and the funds were available on the other side for the Army.

Mr. THOMAS. I think that is true, Mr. President. My sole purpose in referring to the Navy is to emphasize the attitude which a considerable section of the public, and many who are now with the best of motives criticizing the efficiency of the War Department, then occupied toward the Navy. But, Mr. President, if this war council is to function as its sponsors propose, it must also take charge of an efficient department, the Navy, as well as an alleged inefficient department, the Army; otherwise it can not function; otherwise there will be a conflict of authority; otherwise it must be a failure ab initio; and yet that is precisely what the bill proposes to do.

Moreover, Mr. President, the efficacy of the scheme covered by this bill necessarily assumes the appointment of thoroughly competent and qualified men. They must be "distinguished men of proved ability." That is a very general term. A great many men might in the President's opinion measure up to the standards fixed by the law whom we would think undesirable, but he appoints them. Now, if he should appoint a man who should prove a failure, or three men who were not able to agree upon the general policies outlined in the bill itself, then the purpose of the bill must fail.

We must get back to the personal equation; and what warrant have we, Mr. President, in the event of the establishment of a war council, that the President's appointments will prove any more satisfactory than some he has already made for other positions? Many of these men have been very severely criticized here and in the House of Representatives—justly perhaps, but criticized nevertheless—Baker, House, Daniels, Garfield, Hoover, and that does not complete the list. It might be that the President would conclude to take some of these men and translate them from their present positions to seats around the war council table. Would anything be gained by that? When we consider that after all everything depends upon the man and that this bill merely adds another bureau, with all the expenses attendant upon it, with its numerous subordinates, why resort to it unless absolutely and overwhelmingly indispensable? Many Senators believe it is unquestionably. They may be right and I may be wrong; but I am unable to give my assent to the proposition.

Some legal problems are encountered by the proposed war council—which is not claimed as a new idea. If my recollection serves me right, the Constitutional Convention very seriously discussed the proposition of a privy council to aid the President and to share his authority and his responsibilities, and rejected it by an overwhelming vote, and for the very obvious reason, perhaps, that it tended to diffuse responsibility which in executive affairs, even in times of peace, should be concentrated as much as possible..

Mr. President, I have endeavored to find some adjudications regarding the powers of the President in times of war and as Commander in Chief. They are very few. The views of constitutional authors are equally sparse. It would seem that the war powers of the President, so nearly absolute and so very necessary, have been taken for granted, and as a consequence could not well become the subject of adjudication by the courts.

Mr. Hamilton, in No. 74 of The Federalist, disposes of the subject in a very short paragraph. He says:

> The propriety of this provision is so evident, and it is at the same time so consonant to the precedents of the State constitutions in general that little need be said to explain or enforce it. Even those of them which have in other respects coupled the Chief Magistrate with a council have for the most part concentrated the military authority in him alone. Of all the cares or concerns of government, the direction of war most peculiarly demands those qualities which distinguish the exercise of power by a single hand. The direction of war implies the direction of the common strength, and the power of directing and employing the common strength forms a usual and essential part in the definition of the Executive authority.

In his homely but comprehensive way, Mr. Lincoln, speaking on this subject, once said:

> As Commander in Chief of the Army and Navy in time of war, I suppose I have a right to take any measure which may best subdue the enemy.

Mr. SMITH of Michigan. That was not homely.

Mr. THOMAS. That is the philosophy of the subject in a nutshell.

Mr. SMITH of Michigan. Yes; that is the reason why it is not homely; but I do not quarrel with the Senator about that.

Mr. THOMAS. I think the Senator's criticism is just.

Mr. SMITH of Michigan. I think that is a marvelous inspiration.

Mr. THOMAS. Let me say that it is the simple expression of Mr. Lincoln, who had a natural command of pure and perfect English that ranks him with those literary geniuses whose English prose are models of classic expression.

Mr. SMITH of Michigan. Meaningful English.

Mr. THOMAS. I can refer those who may be interested in the subject to Willoughby on the Constitution, volume 2, sections 713 and 715.

In Ex parte Milligan, Fourth Wallace, the Supreme Court took occasion to briefly express itself upon the subject; and except as this has been approved by subsequent cases, I think it is the one concrete expression of the Supreme Court regarding the war powers of the President, wherein the court distinguishes between the authority of Congress and the powers of the Executive:

[Ex parte Milligan, 4 Wall., 139.]

Congress has the power not only to raise and support and govern armies but to declare war. It has therefore the power to provide by law for carrying on war. This power necessarily extends to all legislation essential to the prosecution of war with vigor and success, except such as interferes with the command of the forces and the conduct of campaigns. That power and duty belong to the President as Commander in Chief. Both these powers are derived from the Constitution, but neither is defined by that instrument. Their extent must be determined by their nature and by the principles of our institutions.

The power to make the necessary laws is in Congress; the power to execute in the President. Both powers imply many subordinate and auxiliary powers. Each includes all authorities essential to its due exercise. But neither the President in war more than in peace intrude upon the proper authority of Congress, nor Congress upon the proper authority of the President. Both are servants of the people, whose will is expressed in the fundamental law.

During the Civil War, Mr. President, Congress by resolution in December, 1861, created what was called the "Joint Committee on the Conduct of the War." I suppose its ostensible purpose was to aid the President in the discharge of his difficult executive duties, but if one will refer to the diary of Gideon Welles, and accept his conclusions, he will discover that it was a meddlesome and continuing nuisance, interfering with the President in many ways and ending its career by summoning the Hon. Benjamin F. Butler before it to testify upon subjects regarding which he was at variance with the President.

Mr. President, I want to refer to the bill for a moment. I do so because of a query from the junior Senator from Pennsylvania [Mr. KNOX] regarding its context when the Senator from Missouri [Mr. REED] was discussing its first subdivision. The Senator from Missouri contended that the first paragraph on the second page unquestionably trenched upon the constitutional prerogatives of the President as Commander in Chief, whereupon the Senator from Pennsylvania called his attention to the recitals on the first page, and inquired whether under the provisions there found the bill was not within the power of Congress to enact. The Senator from Pennsylvania is one of the great lawyers of the generation and any query of his with regard to a legal proposition is always worthy of the highest consideration, and especially before it is rejected. The recital to which the Senator from Pennsylvania referred is, as follows:

That there is hereby created a war cabinet, to be composed of three distinguished citizens of demonstrated executive ability, to be appointed by the President, by and with the advice and consent of the Senate, through which war cabinet the President may exercise such of the powers conferred on him by the Constitution and the laws of the United States as are hereinafter mentioned and described.

The query was whether the President might not utilize this as an agency which Congress could create for the discharge of his executive authority. It may be so, but, Mr. President, this bill either designs that the President must exercise his authority through that agency or it is practically innocuous. If the President may do as he likes about it, utilizing to its full or to its partial extent, or reject it entirely and use some other agency, why pass the bill? I must construe this word "may" as intending to mean "must" or "shall," that the President shall exercise the various prerogatives which are afterwards set forth in extenso through the proposed war cabinet, and through it only. If the President has a choice of agencies, if he may discharge this agency entirely and proceed on his own volition in other directions, then certainly we are not helping him at all. We may be exposing him to a hindrance in the sense that if compelled to utilize some other official, no matter what may be the reason, it may be the best of reasons, he will expose himself to public censure and criticism. Hence those who drafted the bill must have designed that the war cabinet when created should have supreme charge and control of the war, and this cabinet is authorized among other duties—

To consider, devise, and formulate plans and policies, general and special, for the effectual conduct and vigorous prosecution of the existing war, and, in the manner hereinafter prescribed, to direct and procure the execution of the same.

In other words, the war cabinet is designed, must be designed, to exercise the power of not only supervising but directing the strategy and the tactics of the war, taking out of the hands of the President through his generals that supreme control of both which must be centered in a single head if disaster is to be avoided.

Many of the criticisms now being made, much of the fault now being found, many of the proposals that we must consider, the general feeling of unrest and dissatisfaction which unquestionably is prevalent in the country, merely indicate, Mr. President, that history repeats itself. In 1862 the President of the United States was subject to the same trials; his administration encountered the same vicissitudes; he endured much harsher criticism than has yet been made of the War Department or the President. But his patience and his patriotism sustained him serenely through it all to a triumphant victory, and his martyrdom brought bitter self-reproach to those who had so maligned and misunderstood him.

Mr. Lincoln had many critics. Probably none of them published diatribes at a dollar a word or indicted their bitter arraignments for hire. They have that at least to their credit. But he encountered the contentions and recriminations of Greeley, Phillips, Henry Winter Davis, Wade, Vallandigham, and a host of others who were then well known, but most of whom are now covered with the mantle of oblivion. The chorus of their counsels and criticisms was louder and more sustained than the present one, which, however, is young and vigorous.

Shortly after the Battle of Shiloh public indignation against Gen. Grant was so aroused that his removal was imperatively and insistently demanded, and in that demand Members of both Houses participated. The Battle of Shiloh was a very bloody one. The Union losses were tremendous. Grant was said to have needlessly sacrificed the troops and his head was demanded. The incident may be most appropriately recommended to many clamorous patriots of the present day. I read from Lamon's Recollections of Lincoln:

A short time before the fall of Vicksburg great dissatisfaction became rife at Gen. Grant's tardiness in moving on the enemy's works. There was a pretty general feeling in favor of relieving Grant from his command and appointing some one who would make short work of that formidable stronghold of the enemy, and relieve the people from their state of anxiety. Mr. Lincoln had great faith in Gen. Grant. He was being constantly importuned and beset by the leading politicians to turn Grant out of the command. One day about this time he said to me, "I fear I have made Senator Wade, of Ohio, my enemy for life." "How?" I asked. "Wade was here just now urging me to dismiss Grant, and in response to something he said I remarked, 'Senator, that reminds me of a story.' 'Yes; yes!' Wade petulantly replied, 'it is with you, sir, all story, story! You are the father of every military blunder that has been made during the war. You are on your road to hell, sir, with this Government by your obstinacy; and you are not a mile off this minute.' I good-naturedly said to him, 'Senator, that is just about the distance from here to the Capitol, is it not?' He was very angry, and grabbed up his hat and cane and went away."

Lincoln then continued to say: "To show to what extent this sentiment prevails, even Washburne, who has always claimed Grant as his by right of discovery, has deserted him, and demands his removal; and I really believe I am the only friend Grant has left. Grant advises me (Mr. Lincoln had never seen Gen. Grant up to that time) that he will take Vicksburg by the Fourth of July, and I believe he will do it; and he shall have the chance."

The author's reflections are equally pertinent:

Had it not been for the stoic firmness of Mr. Lincoln in standing by Grant, which resulted in the speedy capture of Vicksburg, it is hard to predict what would have been the consequences. If nothing worse, certain it is that President Lincoln would have been deposed, and a dictator would have been placed in his stead as Chief Executive until peace could be restored to the Nation by separation or otherwise. Mr. Lincoln thus expressed himself shortly before his death: "If I had done as my Washington friends, who fight battles with their tongues at a safe distance from the enemy, would have had me do, Grant, who proved himself so great a captain, would never have been heard of again."

Another passage from this author, and from another chapter, acquaints us with what I hope is an extreme instance of the extent to which the animosity of Mr. Lincoln's opponents carried them:

As illustrative of the amenities of language with which, at this epoch of his life, the Chief Magistrate of our Republic was habitually characterized, it will suffice to adduce such an expression as this, "That hideous baboon at the other end of the Avenue, whom Barnum should exhibit as a zoological curiosity." Mr. Lincoln's existence was so cruelly embittered by these and other expressions quite as virulent, that I have often heard him declare, "I would rather be dead than, as President, thus abused in the house of my friends."

Mr. President, criticism and denunciation have not yet transgressed the limits of propriety. I trust they will not; but if I can judge from the encouragement given in some quarters to bitter criticisms of public characters, not in the Senate but elsewhere, it is highly probable that before this year shall have ended the President will have endured many of the bitter experiences which so saddened the closing years of the greatest of our Presidents. Conscious, however, as was he of the rectitude of his purposes and the wisdom of his policies he will proceed unmoved, except as his own judgment shall dictate, to that victory as certain to come as it was finally achieved by the martyred President.

Mr. President, let us be as charitable as possible. The War Department has its defects but is not the only nonefficient factor of the war. Congress has made its contributions to the cause of inefficiency. Fortunately it enjoys one peculiar immunity. In the general scheme of the American Government there is no power which can investigate it except the electorate, which does so every four years, and acts accordingly; but no probing com-

mittee can sit in judgment upon it, cross-examine its Members, expose its misdeeds, or expose their motives save as it may itself assume the task. That may be for the best; I am not prepared to say that it is not; yet I affirm, Mr. President, if an inquiry could be officially made of the conduct of the Congress of the United States such as confronts the War Department a report might be made of our own shortcomings which, while not excusing, would certainly palliate those of the War Department.

Let me illustrate this by a supposititious inquiry and assume that the National Council of Defense, invested with the power of congressional investigation, has conducted one and made the following report of its findings to the President:

The PRESIDENT,
White House, Washington, D. C.

SIR: The National Council of Defense, in the discharge of their official duties, and urged by a widespread demand therefor, have investigated the course of congressional legislation regarding our Military and Naval Establishments, with a view of determining what has actually been accomplished during the past few years and what omissions, if any, are justly chargeable to that illustrious body. In making this investigation we have been prompted by motives which are free both from partisanship and personal feeling. We have been actuated by the highest motives of duty and patriotism, prompted by the necessity of service to the country, of repairing mistakes where they have occurred, and also to prevent their recurrence, if possible.

As a result of this investigation, we herewith submit a report of some of the conditions disclosed, together with a suggestive remedy which we believe is imperatively demanded by the perilous conditions now confronting the Nation. Let us, at the outset, assure you that the responsibility for the methods, or to be more accurate, the lack of them, by which legislation is proposed and enacted, and by which it can be retarded, although highly objectionable, and especially in times of war, can not be placed upon the shoulders of anyone or of any particular Congress. It is the deplorable lack of system and of coordination which is the growth of years, and due in a great part to deficiencies in the form and structure of our Government. It is possible to operate under it in times of peace. In times of war it should be set aside by the Congress itself, if possible; by the Executive if necessary.

Introduction of bills and resolutions by Members of both Houses is a daily practice. The aggregate number of these in the last Congress was approximately 30,000.

It would be difficult for a Member within the space of a session to read the titles of these bills, to say nothing of their contents. They were all printed at enormous expense and then referred to committees, after which 95 per cent of them are never heard of, although their authors waste much valuable time in endeavoring to secure some action upon them.

The committees to which bills are referred are large and unwieldy. The Senate committees are so composed that each Senator is a member of two or more important ones, although the business coming before each is sufficiently engrossing to demand the unremitting time and attention of every member thereof. Hence these committees and their chairmen are becoming more and more identical in authority and in purpose.

In the Senate there is no limit to discussion. An amendment to the rules adopted last March and designed to put a curb upon this practice has thus far proven innocuous. Action upon bills, however important, is therefore, in this body, obtainable only by unanimous consent.

The needs and interests of the respective constituencies of Representatives and Senators seem to be, and long have been, paramount considerations. Those of the National Government, except perhaps in times like the present, are therefore subordinated to such interests to a degree that it is perhaps not too much to say that there is no real national Representative or Senator in either branch of our legislative body in the true sense of that term. Given the consideration of a measure national in its scope in conflict with one affecting some of the Districts or some of the States and the demands of the latter are apt to determine the fate of the measure. Dependence upon constituencies, the desire for their approbation, and the fear of their disapproval are the paramount influences in determining national legislation.

It can readily be seen that the prime result of such conditions is to decentralize legislative action and compel compromise between diversities of interest and purpose as a condition precedent to any legislation however important.

This preliminary statement of general congressional conditions is deemed essential to an appreciation of the specific instances of congressional mistakes or failures to which we are compelled to call your attention, and which, in our judgment, are the fruitful causes of many of the disappointments thus far accompanying the development of our military program. It will be noted that the instances to which we refer have transpired since the beginning of the great European war. Perhaps the first tremendous fact confronting the United States immediately after the declaration of war by Germany against the allies was the absence of an American merchant marine. With its causes we are not now concerned. The need of supplying ships and supplying them immediately was then so apparent that a so-called shipping bill was favorably reported from the Senate Committee on Commerce, under the terms of which it was proposed that the Government should directly or indirectly begin the construction of ships and their purchase from neutral nations. This bill at once encountered the active and implacable opposition of a large minority of the Senate, which, for various reasons assigned, began and maintained a successful filibuster against it. Some of the opposing Senators indulged in oratory by day and by night until the Senator having charge of the bill was compelled on the afternoon of the 3d of March, and about 12 hours before the Congress expired, to withdraw it from further consideration. It is interesting at this juncture to read the statement of the junior Senator from Massachusetts on that occasion.

I have read it.

Had the bill then become a law, and it would have been enacted but for this filibuster, it is reasonable to assert that there would not have been that shortage of ships so painfully apparent during the past 12 months and which if it continues may result in national disaster.

In 1914, 1915, and 1916 the attention of the Congress was called by the Secretary of War to the necessity of strengthening the military arm of the Government, and making due provision for adequate equipment. A plan of Army reorganization worked out by the General Staff and recommended by the then Secretary of War was submitted to both Houses in 1915. Ample hearings were had before both committees, in which the chiefs and experts of the Army in great detail explained our pressing military needs and requirements, and particularly the need of a National Army. The Army bill of 1915 differed but little from that of its immediate predecessors. The Army bill of 1916 contained little, if any, provision for the raising and equipment of a Regular Army. Under section 56 of the Senate bill as proposed, such an army might have been improvised. It was vigorously attacked, however, and was kept in the bill by the Senate by a very slender majority. It was rejected in toto by the conference committee. On the other hand, the bill as enacted was devoted to the expansion of the State Militia, or National Guard, notwithstanding the vigorous protests of the Chief of Staff and of the War Department. It is not too much to say that the Army bill of 1916 was dictated to the Congress of the United States by the organized officers of the National Guard through a lobby composed of its officers and the several States and through the political power which it assumed to possess. But whatever the cause, the recommendations and efforts of the military authorities of the United States for organizing and equipping a large and efficient army in anticipation of our entering into the war proved wholly unavailing. The aggregate appropriation for that year considerably exceeded that of its predecessor, but much of it was devoted to the proposed expansion of the National Guard as units of the States and for their incorporation into the Regular Army as might be required in national emergency.

Although the demonstrated success of the submarine had by 1916 justified the declaration of Sir Percy Scott in 1912 that revenues thereafter spent in the construction of huge battleships would be money wasted, Congress in the naval bill of 1916 established a so-called naval program, of which the battleship and the battle cruiser were the chief features. Scant provision was made for submarines, torpedo destroyers, transports, and other craft absolutely essential in modern sea warfare. Fortunately, the Navy Department had not, when war was declared, begun the construction of the battleships provided in that act and stopped construction of similar vessels then under way and has devoted itself to the building of such war craft as the necessities of the war demanded. In justice to the Congress, however, it should be said that the program then adopted was recommended by the experts of the Navy Department. Congress, therefore, may claim in that exceptional instance the merit of duly considering the counsels of those having sufficient experience to speak by authority. With regard to the Army bills of 1915 and 1916, the council believes that if the recommendations of the department then made had been duly heeded by the Congress, the Army would have been sufficiently reorganized and equipped to have proceeded without further delay to the trenches in Europe immediately after the beginning of hostilities.

The need of explosives in modern warfare is obvious. Nitrates are the basis of all modern explosives, the natural supply of which is confined almost exclusively to the Republics of Chile and Peru. Our inability to secure our supply from those countries would mean disaster. Appreciating such a contingency, the junior Senator from Alabama endeavored long ago to secure the passage of a bill providing for the erection by the Government of a suitable plant for the manufacture of atmospheric nitrogen under processes well known and easily obtainable. This measure, so evidently essential to the national welfare, was bitterly opposed, largely on the ground that it committed the Government to the manufacture of a commodity which should be left to private enterprise. Not until our troubles with Mexico in the summer of 1916 confronted us for the time with the actual presence of war did it become possible to crystallize this important subject into the legislation of the country. Even then it had to be offered and was finally accepted as an amendment to the Army bill of August 29, 1916, something like a year subsequent to its first consideration by the Senate. Had this bill been promptly enacted into law upon its introduction, the structure contemplated by it would now be well toward completion and its product available for the manufacture of explosives in the very near future, thus enabling us to devote a large part of our importations from Chile to the use of our allies and to the fertilization of the soil.

The prime need of our country is money available to the Government for war purposes. It is the duty of Congress to supply this need by legislation. It entered upon the consideration of a revenue bill designed to greatly increase the public revenues in the month of April, 1917. On the 6th of October of that year the bill became a law. The committees of the respective Houses, and particularly the Senate committee, devoted not less than four months to its earnest consideration. Yet it is not too much to say that this law constitutes a reflection upon congressional intelligence. It is involved, complicated, and complex to a degree seldom encountered even in modern legislation. It possesses all the bewilderment, with none of the fascinations, of Alice in Wonderland. It can be worshiped with impunity, for there is nothing like it in heaven, on earth, or in the waters under the earth. Immediately after its enactment the Secretary of the Treasury appointed an advisory council or body, consisting of wise and experienced gentlemen, to investigate, explore, and penetrate this law with their combined intellectual processes and then tell him what his powers and duties under it were.

Mr. SMOOT. The Senator, I think, ought to give credit to the conferees on that bill for making it to a large extent as described by him.

Mr. THOMAS. This is the report of a committee investigating the Congress.

Mr. OVERMAN. What report is the Senator reading? I did not catch it.

Mr. THOMAS. I am reading from an assumed report of an investigation of Congress by the Council of National Defense:

These gentlemen have patiently, conscientiously, and constantly endeavored to perform this arduous, if not impossible, duty, thus far without success. We only know that in its possible operation the law rests much more heavily upon the small man than upon the large one; that if literally enforced it will compel the average individual to resort to perjury as a last and solitary refuge from bankruptcy. It would seem to an ordinary observer that with a century of experience of this sort of legislation to guide it, an intelligible, if not a satisfactory, revenue statute might have been enacted. To add to this unfortunate outcome of congressional action, there seems to be little, if any, disposition to take up the question and either repair or remedy this remarkable compilation of statutory sections. The amount of revenue to be derived from it is problematical.

It would seem that in view of the Nation's present needs and expenditures Congress would realize not only the importance but the essential necessity of enforcing economies whenever and wherever possible, and especially with regard to subjects which belong to times of peace rather than to times of war, but no such spirit has thus far manifested itself. Indeed, the tendency to extravagant financial legislation seems to be more pronounced than ever before. Bills for pensions, claims, rivers and harbors, increases of salary, increases of officeholders, and multitudes of other subjects requiring appropriations are daily introduced, and their aggregate crowds the capacity of the committee rooms. We have made no compilation of the aggregate amounts called for by these measures, but it is safe to say that the sum total would be quite as great as the ordinary expenditures in recent years of peace. Whether they shall be enacted into law is for the future to determine. We make no prediction concerning them, but apprehend that the pressure of political and local interest behind them will, as usual, be too great for the Congress to resist.

It is unnecessary to cite further instances of congressional delinquency. We have selected a few from the list which are typical. In our opinion the so-called legislative system, in so far as war legislation is concerned, has broken down for lack of coordination and concentration of responsibility. This can not continue without grave peril to the further and future prosecution of the war. We have suggested some legislation which, in our opinion, would meet the crisis and tide us over the difficulty, but we are not at all optimistic about its acceptance.

In the performance of a grave and serious but imperative duty, we therefore recommend to the President, in the exercise of his war powers as Commander in Chief of the Army and Navy and to the end that the present war may be vigorously and successfully prosecuted to an early termination, that a war tribunal be appointed, consisting of distinguished citizens of known experience, charged with the duty of summarily enacting all legislative measures deemed necessary and vital to the public needs and safety, to the end that delays, diversity, and decentralization in matters legislative shall cease and efficient organization as above suggested be substituted therefor. This council shall perform the duties of the Congress of the United States until six months after the present war shall have ended, as announced by the President of the United States.

I submit, with all due deference to the superior information of my colleagues, that the remedy suggested in this document for congressional delinquencies is not more drastic nor more extraordinary than that embodied in the proposed bill for the creation of a war cabinet.

Mr. President, if this is burlesque, it is a burlesque of fact; upon our shoulders rests much of the responsibility which is shifted to other departments. Would it not be well to make frank acknowledgment of it, close ranks with the War Department, and strive with mutual zeal for a better record for the future.

Mr. President, there is a political aspect not to the investigation but to its manner and results to which I feel justified in referring. In doing so I reflect upon no Senator whether he is a member of the committee or not.

I believe that this investigation has been beneficial. I believe that it has been conducted by gentlemen inspired by the highest motives of patriotism. I am glad it has been made. I hope it may not, as some think from its recent character, degenerate into a petty cross-examination of a distinguished official.

The political aspect to which I refer is external. Its influences may penetrate here in time. In referring to it, let me say that I do so in no spirit of complaint. If conditions were reversed and a Republican administration were in power, the constituents of this side of the Chamber would be similarly actuated. That is human nature. Politics is largely identical, whether it springs from Republican or Democratic sources. A partisan advantage is taken quite as eagerly by one of the great parties as by the other. Hence, I refer to this subject because I think it is pertinent to the discussion.

Mr. President, if the press is to be credited—and I very seldom credit it unreservedly—there is no question but that partisanship will take advantage of alleged as well as of actual delinquencies in the War Department and make them the subject of a fall campaign. The New York Times is a fairly conservative journal; in my judgment it is the best newspaper in the United States. It is independent, or at least as independent as a newspaper having convictions can be; it is nonpartisan, or as nearly nonpartisan as a great journal can in the clash and conflict of opinion be. I think it desires and strives to publish all of the news that is fit to print. In its Sunday supplement of February 3 appears an article upon the subject, from which I quote:

Baker as a campaign issue for the Republicans.—Their plan is no longer a secret, and next week's meeting of national committee will launch fight for control of Senate and House.

I shall not read the entire article, Mr. President; it is not necessary. I wish it bore the name of the writer.

Mr. BORAH. Mr. President, there is a very good reason why the article does not bear the name of the writer, for no responsible Republican would assume to attach his signature to that proposition, in my judgment.

Mr. THOMAS. Well, that may be the reason. Another reason may be that the present purpose is to surround with an atmosphere of anonymity all reference to political conditions; but, nevertheless, in view of some things that have been said upon this floor, not in this discussion; in view of the visit to this city at a most opportune time of the most vociferous and prominent of all the candidates for the Presidency—about whom I would say much more were he not reported to be seriously am inclined to think that this article is not entirely unreliable. ill—and in view of some of his statements on that occasion, I The article states:

The war issue for the Republicans in the campaign of this year will be based on the manner in which the Democratic administration, especially the War Department, has managed the war. That much has been decided upon, and the details will be perfected at the session of the national committee to begin in St. Louis on February 12, the first meeting of the full committee since that held immediately after the national convention which nominated Hughes in 1916.

In brief, the Republican campaign is to be based on a Nation-wide attack on the Democratic War Department as the chief national issue. It will be placed before all local and State issues in every congressional district in the country. The campaign material will be drawn almost entirely from the facts disclosed by the Democrats themselves in the recent investigations by Senate and House committees, the Republicans taking the position that they have little need of campaign textbook ammunition in addition to that furnished by the Democratic Senator from Oregon, GEORGE E. CHAMBERLAIN. They will base their fight on the assumption that it is the patriotic duty of the Republican Party to give the people an opposition majority in Congress that will compel more publicity and impose a greater check on mismanagement in the executive departments of the Government.

What the Republicans hope to accomplish is, specifically, the conversion of the present Democratic majority of 10 in the Senate into a Republican majority of 8. The least they expect to get in the Upper House is a Republican majority of 2.

Then follows a consideration of the political prospects and conditions of the various so-called doubtful States. We come now to a question put to a member of the Republican national committee:

What likelihood is there that the midterm political reaction of normal times and the other factors the Republicans are depending upon for victory next fall will be offset or more than offset this year by a feeling on the part of the public that there must be no politics whatever in war time?

"There is no likelihood, no possibility of anything of that sort happening," he answered. "The Republicans of the United States also have a patriotic duty to perform in this war, and that is to exercise their legitimate function as a party in opposition to the administration to reduce to the minimum the war mistakes of the administration. The war itself will not be an issue, there will be no un-American, no unpatriotic issue. The big issue will be mismanagement of the war by the Democratic War Department. We will win on that and then use our restored power in Congress to compel better things."

"But suppose," the committeeman was asked, "our American troops get to France in large numbers; suppose they get their equipment and take over a sector of the fighting line and win a big victory against the Germans before the Congress elections of next fall? What will become of the mismanagement issue in that case?"

"It will continue to be a live and effective issue. If our troops get equipped and win a victory next summer it will be in spite of the present War Department, not because of it. No victory that may come to our armies at any time in the course of this war can offset the resentment of the public because of the men who have died from neglect and blundering before they could even get away from their training camps in America. The public will not stand for a long casualty list before there is a skirmish.

Then follows a criticism of deaths from overcrowding, and so forth. Then the gentleman, interviewed, is reputed to have said:

If we needed a cue in this matter, which we don't, there is an ample one in the action of a few of the Democrats themselves in the Senate—CHAMBERLAIN, of Oregon, and HITCHCOCK, of Nebraska. But these two men, with a few more of their party who may stand by them in the Senate, are not enough to meet the needs of the situation. No matter how hard these few truth-revealing Democrats may work, no matter how courageous they may be in the face of denunciation from the White House, they can not build up in Congress a sufficient barrier and check against a stupid War Department to protect the soldiers.

Not even an attempt at such a protection can be expected from the House of Representatives as it is constituted at present. The House is absolutely under the control of the President, and the President believes that Mr. Baker is the best Secretary of War we have ever had. The country never would have known of the blunders in the War Department, the blunders that have cost us many lives, if we had depended upon the House Committee on Military Affairs for the disclosures that have come from the Chamberlain committee in the Senate.

I might, Mr. President, refer to extracts from many other newspapers upon the same subject, but it would only burden the RECORD.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Idaho?

Mr. THOMAS. I yield.

Mr. BORAH. Mr. President, I am a very humble member of the party to which the Senator from Colorado has referred——

Mr. THOMAS. On the contrary, the Senator from Idaho is one of its most distinguished members.

Mr. BORAH. And I have no authority to speak for the Republican Party, although I presume I have fully as much authority to do so as has the gentleman who is supposed to have been interviewed in the article from which the Senator has read; neither am I a prophet, but I merely venture to say that the conduct of the War Department will not be in any sense whatever an issue in the next campaign; that it will not be a part of the campaign conducted by the Republican Party or

by any other party which may meantime spring into existence. I think the Senator from Colorado ought to bear in mind that this article appears in what is known as the magazine part of the New York Times.

Mr. THOMAS. It does.

Mr. BORAH. And I want to record my conviction that the last that that article will ever be heard of will be when it appears here in the CONGRESSIONAL RECORD, so far as it relates to the policies of the Republican Party.

Mr. THOMAS. Mr. President, I am satisfied that if the Senator from Idaho could mold the policies and shape the action of the great party with which he affiliates such would be its course, but no one man forms the general policy of the great political organizations of the country.

I want again to reiterate that I am not speaking in a sense of partisan criticism of this situation and that if conditions were reversed I have no doubt the party to which I belong would seek the same advantage. It is the consequence of the situation, however, which prompts me to mention it.

Mr. BORAH. Mr. President, I am not criticizing the manner in which the Senator from Colorado is using this article. I am perfectly aware that neither myself nor any other individual or small group of individuals can control the policies of the party. That is the reason why I know that that will not be an issue in the next campaign. The gentleman who was interviewed in reference to that matter is undoubtedly one of those antiquated gentlemen who still believe that the policies of the party are framed by a committee or by some State central committee or national committee or something of that kind. Most of those people, fortunately, have passed out of existence, and they cut very little figure any longer. The policies in these times, when the people are having their attention riveted upon these affairs, will be shaped by the rank and file of the respective parties of the country, and the rank and file of the Republican Party would not for a moment submit to an issue which was based upon a discussion of a past incident in the task of preparing the country for this war.

Mr. THOMAS. Mr. President, the rank and file of the Republican Party are just as patriotic as I am; there is no question about that. The leaders of the Republican Party are just as patriotic as I am; but it is in human nature in all political campaigns to take advantage of those defects and those conditions which seem to make for success. Unless that were so there would be no campaigns in this country; there would be no discussion of issues. While I know that the Senator from Idaho feels and believes what he has said, I still contend that there is outside of the Senate a disposition to utilize these things for political success, else I would not be warranted in referring to them here at all.

Mr. POINDEXTER. Mr. President——

Mr. THOMAS. I yield to the Senator from Washington.

Mr. POINDEXTER. Mr. President, I want to get the view of the Senator from Colorado as to the propriety of making a political issue of the matter to which he has referred. The most important question before the American people is the conduct of the war. It so happens in our political system that the conduct of the war is under the control of one political party and that there is an opposition political party. When an election comes and the issue is presented to the people whether or not we are to retain in control of the Government the party and the President who have been responsible for that great trust during the preceding term, does the Senator maintain that it is improper to present to the tribunal of public opinion the question of the diligence and the efficiency which have been used by the party in power, or the lack of those qualities, in the conduct of the war? Is it not, as a matter of fact, the duty of the opposing party to make the issue, and have not the American people the right to consider the question in rendering their verdict in the election? I ask the question because I am not quite clear whether the Senator contends that that would not be a proper issue; and I am saying this, if the Senator will permit me just a word, entirely apart from the expression of any opinion as to the merits of the particular controversies which have recently been engaging the attention of the country.

Mr. THOMAS. I have twice said, Mr. President, that I thought it was perfectly proper and legitimate to use this material in the next campaign. I go further and concede that of all times an opposition party is needed in time of war—a strong, vigorous, patriotic, healthy opposition. We have it now, and I hope we will continue to have it. I mentioned the subject for the sole purpose of emphasizing one consideration, which is that when it shall appear to the public, as I am afraid it is now appearing, that the investigations which we are conducting are not devoted to the sole object of discovering deficiencies and correcting them; that we are going beyond the limit of official propriety; that, having exhausted our legitimate functions, the investigations should be concluded. I do not intend to reflect upon the present investigation, but I am aware of the gradually growing public sentiment that the protracted examination of the head of the War Department discloses a purpose to go further than the announced objects of the investigation when it began.

Mr. CHAMBERLAIN. May I interrupt the Senator?

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Oregon?

Mr. THOMAS. Certainly.

Mr. CHAMBERLAIN. Mr. President, I think the Senator in making that statement, he being a member of the committee, ought to go further and say that the committee had the Secretary of War before it once and had practically completed his examination, and when he appeared again it was at his own request, and the examination was had in the manner that he requested. The second examination of the Secretary was, therefore, not had on the initiation of the committee.

Mr. THOMAS. That is undoubtedly true, Mr. President.

Mr. CHAMBERLAIN. Now, another thing, Mr. President——

Mr. THOMAS. Yet I am in receipt of telegrams, as I have no doubt other Senators are, protesting against what their authors think is an undue extension of the investigation.

Mr. CHAMBERLAIN. Mr. President, I want the Senator to put in the RECORD at the same time, as a member of the committee, that the Secretary of War appeared at the invitation of the committee only once, and that to suit his own convenience; and that the other times he appeared, and the only other times he appeared, were when he requested. Now, the Senator says——

Mr. THOMAS. The Senator ought also to put in the RECORD that the Secretary of War requested it because of the Senator's speech here two weeks ago when the Senator contended that the War Department had broken down.

Mr. CHAMBERLAIN. Well, possibly that is true; but it was on his initiative, at any rate, that he came again; and if he is being persecuted it was at his own request.

Mr. THOMAS. I did not say that.

Mr. CHAMBERLAIN. I hope the Senator did not mean to be understood as saying that.

Mr. THOMAS. I did not; but I do emphasize the fact that a sentiment is arising in different parts of the country that such is the case, if I may judge from the information I have received.

Mr. CHAMBERLAIN. I will say to the Senator that that is not the information I have received. The Senator himself admits that the investigation has done good.

Mr. THOMAS. It certainly has.

Mr. CHAMBERLAIN. And I understand that the Senator does not disapprove of the investigations by the committees of Congress?

Mr. THOMAS. I do not disapprove of this investigation, so far.

Mr. CHAMBERLAIN. Now, does the Senator feel that when an investigation has been decided upon by a majority of a committee they ought to hesitate in the discharge of their duty by any fear that the result may create an issue for one or the other party?

Mr. THOMAS. I think that after a man has been examined and reexamined and cross-examined, and again examined, there is some justification for the outside view that its continuance is not designed to accomplish any good purpose.

Mr. LEWIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Illinois?

Mr. THOMAS. I yield.

Mr. LEWIS. May I ask the Senator from Colorado, as a member of the committee and as a Member of this body, does he not feel that if the investigation was to be set afoot for the purpose of obtaining information as to what the department was doing it would have been a proper proceeding to have called the Secretary of War as the first witness, that he might disclose all the information he had, instead of calling witnesses or permitting witnesses to testify who made him the object of attack, and calling him later, as if he were a defendant answering an indictment?

Mr. THOMAS. I will not pretend to answer that question.

Mr. CHAMBERLAIN. May I answer that for the Senator?

Mr. THOMAS. In just a moment. It would be unbecoming for me to answer it, because I was away at the time this investigation began, and I have attended comparatively few of the sittings of the committee. I yield now with pleasure to the chairman of the committee.

Mr. CHAMBERLAIN. Let me say to the Senator from Illinois that it was at the request of the Secretary of War himself that he was not called first. He preferred that the men under him,

the officers of the department, should appear and testify as experts before he was called, and we suited his convenience rather than our own with reference to calling the Secretary of War.

Mr. LEWIS. If the Senator from Colorado will pardon the interruption, may I ask the Senator from Oregon, knowing he is the chairman of the committee, did the Secretary of War, as the Senator understood him, make a request when this investigation had been decided upon that he be not called as the first witness, but that others be called rather than himself, and that he be postponed to the time that he was postponed to?

Mr. CHAMBERLAIN. I understood that that was the request of the Secretary of War—that he preferred to have the others called first.

Mr. LEWIS. But the chairman of the committee does not say that he knows that to be a fact, does he?

Mr. CHAMBERLAIN. I state it as my entire recollection of the matter. We called the Secretary of War at his suggestion after some of the other witnesses from the department had been put on the stand.

Mr. LEWIS. If the chairman says that he knows that from any conversation he had with the Secretary of War, that would close the question with me; but if the Senator tells it because he heard it from others, then he deduces it.

Mr. CHAMBERLAIN. No, Mr. President; I do not state things on the hearsay of others; I state things as facts. The committee acted as it felt it had a right to act, and it intends to proceed upon that line, I will say to the Senator from Illinois.

Mr. LEWIS. But the Senator did use the expression that "he understood," leaving the impression with me conclusively that he understood it from others or from rumor.

Mr. CHAMBERLAIN. I understood it from the Secretary of War himself.

Mr. LEWIS. That is important to me to understand. Mr. President, I thank the Senator from Colorado [Mr. THOMAS] for giving me this opportunity to have made plain what otherwise there would have been confusion in my mind about, for I confess to have carried in my heart a feeling that an injustice had been done the Secretary of War by having him put on trial and witnesses appear against him as though he had been a defendant, and practically impeached, before he was called and questioned as to his own department.

Now, Mr. President, with reference to the magazine article to which the eminent Senator from Colorado, in his very full and illuminating speech has referred, the Senator from Idaho [Mr. BORAH] has alluded to the fact that the expression on the part of the committeeman quoted in the article must not be taken as an expression of the party. May I call the attention of the Senator from Colorado to the fact that there is one great injustice done in that article, indicating to himself and to myself, how unfair such emanations may be? A picture is presented of the Senator from Idaho in the first part of the article, and he is called a critic of the administration. While the Senator from Idaho has differed with some of the measures of the administration, to speak of him as a critic of the administration or as being one of those who could be so designated is so unfair to him and so unjust that it may indicate to the eminent Senator from Colorado that the whole article may be entirely colored by a misapprehension of what Republicans will do.

Mr. THOMAS. Mr. President, "one swallow does not make a summer." I should not have referred to the subject at all if the article had been a solitary one, nor for any other purpose than as stated; and so that I may not be misunderstood I will restate it: It is that when investigations go to such a point that it indicates to the country at large that it is being pressed for other than the purposes for which it was ostensibly begun it has gone far enough. If I have said anything of a political character which indicated that my purpose in so doing was beyond that statement I am unaware of it.

Mr. President, let me refer briefly to some other matters, and I am through. I want to emphasize what I believe to be more serious problems, more sinister conditions, than any which have been disclosed by the Committee on Military Affairs, and to which I think our attention should be summarily directed by way of curative legislation, if possible.

I do not minimize any mistakes that have been made in the War Department; I do not regard them as trivial, and I am sorry they have been so characterized; but as compared with some other conditions confronting us many of them are comparatively unimportant. We need ships; the crying need of the situation is ships. As Lloyd-George says, "Ships, and yet more ships." The burden upon us is to furnish them if we can, and if we do not we may lose this war. That fact has been emphasized on this floor many times, and particularly by the senior Senator from North Dakota [Mr. MCCUMBER], who spoke here one morning to empty seats, revealing conditions that, to my mind, were startling, and emphasizing them by facts which can not be challenged. To be effective in this war we must go to the front with men and with material, of which there must be an endless and continuing procession of both until peace is declared—more men and more material, and yet more men and more material—a task that can be accomplished, Mr. President, only by securing bottoms for transportation. If there is a lack of energy in the building of vessels, the supply of it is our first and prime consideration. We may have in America, Mr. President, the best army in the world; it may be equipped to the highest degree and officered by men of the most conspicuous ability, and yet it will be absolutely useless either as a determining factor in this war or as any factor at all. There is only one way to get them where they will be made effective and where the might, the power, and the resources of this great Government may be used to end autocracy and make democracy safe for the world, and that is to build and navigate ships.

Now, Mr. President, if we can depend upon the statements of those who are ostensibly reliable, the conditions in regard to labor in the shipyards are deplorable. We are working but one shift in many of the yards, and in some instances that shift does not put in full time. We have plenty of men; we have plenty of material; and if the men we have would work as they ought to work in this crisis and work three shifts, 24 hours every day, including Sunday, that problem would be disposed of; but that, Mr. President, is not the situation. I read a statement a few mornings ago, made before the Committee on Commerce, which I suppose to be authentic, that at a certain shipyard on the Pacific coast men were not only working less than eight hours but threatened to strike because an enemy suspect was discharged. The facts were disclosed to them without avail, so this man was restored to his position so as to continue the work then under way. This, Mr. President, smacks strongly of treason.

Mr. HOLLIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from New Hampshire?

Mr. THOMAS. I do.

Mr. HOLLIS. I hope the Senator will bear in mind the fact that that statement was an ex parte statement, made by a shipbuilder, and the other side of it has not yet been presented before the committee.

Mr. THOMAS. Mr. President, I hope it will be shown to be incorrect. That, however, is but one of the various instances to which I might refer, if I had the time, indicating a lack of interest in the workshops and shipyards of this country that constitutes the most sinister menace of the hour.

I have here an article clipped from yesterday morning's newspaper which gives me more concern than anything else connected with this subject. It is a purported statement of Mr. Charles Piez, the vice president and general manager of the Emergency Fleet Corporation, to the effect that at the present time the native-born American workman is not the mainstay of the shipyard, for he is there only in the proportion of 35 per cent of the men employed, and to the extent of 65 per cent we are forced to depend upon foreign-born labor.

Mr. President, it is humiliating—and yet I have no doubt it is true—that at this time, when our Nation is in the throes of the mightiest conflict in the history of civilization, when all that we have as a people and as a Nation is at stake, when our future existence as a Republic may depend upon an adequate supply of ships, only 35 per cent of the constructive work in the shipyards of the country is being done by Americans, and that we must depend upon foreign-born labor to the extent of the remaining 65 per cent for the attainment of that which is absolutely essential, or seems to be so, to our future existence. It is disgraceful; it is humiliating; it is intolerable, and something must be done, and done here, to bring Americans to a realizing sense of the impending crisis, to the end that they may be induced, of their own volition if possible, or forcibly if necessary, to do their duty on this mighty occasion.

Your sons are at the front, or are liable to be, and mine. There they can be effective for their country. Must their lives be sacrificed through lack of supplies due to deficiency in ships, due in turn to slackers calling themselves Americans mustering but 35 per cent in the shipyards?

Why, Mr. President, I sometimes wonder if in this country there really survives the old-fashioned sentiment called patriotism, that national spirit, that spirit of unity, without which no government can long endure.

Mr. President, many of the labor unions are doing their duty and doing it splendidly; perhaps the most of them. Railroad men, coal men, men in other lines of industry are giving the

best of their time and their energies to speeding up the necessary work of the war, but unfortunately many of them are not. Many seem to act upon the theory that the burning issue is not the German, but the scab, and suit their conduct to their convictions.

A recent address made to the boiler makers' convention by Mr. James O'Connell, its official head, well illustrates the fact. To an enthusiastic and applauding audience he said:

> You are meeting now, my friends, and you will be expected before this convention adjourns to make a declaration as to what the position of the Brotherhood of Boiler Makers, Iron-Ship Builders, and Helpers of America is, so that the world may know. It is not a mere question of being behind President Wilson. That is a sort of catchy expression, a catch phrase, sounds nice. The question is, Are you behind yourself? If you are, you will say so before you leave here. * * * We took advantage of the situation as we found it abroad, and before war was declared by the United States we saw to it that organized labor was going to get proper recognition and that conditions of employment and standards of living would not be interfered with, would not be lowered. * * * Nothing can take place, nothing can be done, unless we are consulted and practically give our consent to it. * * * You have the shipbuilding, and we are not talking about getting a penny an hour increase now. * * * Now we are striking for dollars. We have forgot there is such a thing on the market as a penny any more. * * * Out on the Pacific coast * * * Seattle, Portland, San Francisco, all asking for dollars, $2 a day increase, $3 a day increase. It doesn't frighten anybody any more. * * * We are just coming together and going to get dollars now instead of pennies. Now, I want you to get it in your heads * * * to talk about dollars, not pennies, in your organization. * * * The opportunity is presented for the first time in the history of the United States Government, practically a union contract signed between the Government and the officers of the department and affiliated organizations, practically requiring that the shipbuilders of America come to Washington and put their feet under the table with the labor leaders to settle their troubles. Uncle Sam is paying the expenses of union committees to come to Washington and meet the employers. Isn't that a pretty good union agreement? That is only the beginning.
>
> * * * * * * * *
>
> Now, I hope the Boiler Makers, in convention here, will get in their minds that beautiful thought of "more."

Suppose that the owner of a shipyard or munitions plant had made that statement. The whole country, Mr. President, would have risen in righteous denunciation. Indeed, they are accused, perhaps with justice in some directions, of taking advantage of their country's extremity to line their pockets. But unfortunately, Mr. President, if this wildly applauded speech can be taken as an expression of the attitude of this organization, it ranks with the most conscienceless profiteer in America:

> Place your officers in a position to go out and demand and then back them up. Give them your united and undivided support. And in this crisis, instead of our organization being wiped out, instead of our power being lessened, we will come out after the war is over bigger and greater and grander and better understood than we ever were before.

Ah, Mr. President, there is too much of that spirit in this country now. I am a friend of union labor. I have stood by it in season and out of season whenever I could in conscience do so. I shall continue to do so. But at this time, Mr. President, there should be no thought of union, no thought of profit, no thought of anything except the country's insistent needs and requirements. [Manifestations of applause in the galleries.] Our boys across the sea are in peril of their lives. Their perils may multiply through lack of the needed equipment and ammunition. Every lover of his country, rich or poor, high or low, laborer or capitalist, should forget everything else and give his best and his all to that supreme need which towers above and beyond all other human considerations.

Mr. President, the Senator from Washington [Mr. JONES] this morning called attention to the fact that upon the streets of the great cities, and I think he instanced the city of Washington, one may see on any pleasant day literally hundreds of men apparently doing nothing, idling in the sunshine, patronizing the picture shows, ogling the pretty girls, indifferent to the country's condition, every one of them a consumer, and possessing a potential energy which the country should utilize if possible. Mr. President, we should authorize the Government, if it is necessary—and I believe it is—to take over and commandeer every shipyard in America and conscript every man around it, no matter what position he occupies, and lay its heavy hand upon these idlers, and compel them to do their share in the accomplishment of the great war program.

> In the sweat of thy face shalt thou eat bread.

That is pretty good doctrine right now. The man who refuses to work should not be permitted to eat. If his services are needed, no difference what walk in life he occupies, nor what his view of the war may be, he should suspend, for the present at least, the consideration of minor conditions with a view to this supreme need, which, in my judgment, transcends all others. Without ships—the very foundation of our ability to take part in this war—we are as feeble and as helpless as any little Republic of South America.

I hope, Mr. President, that we will turn to the immediate consideration of this mighty subject and make it the prime purpose of our deliberations and of our favorable action. We take the young man whether he will or no, uniform him, put him in the ranks, and send him to the trenches. May we not take the man unaffected by the conscript laws and conscript him for the work at home, as much a part of the war campaign and as essential to its success as the soldier with gun in hand. If we hesitate to do the last we should not have done the first.

Mr. President, there were one or two other subjects connected with this general question to which I wish to advert. I have had the attention of the Senate, however, for three hours, and I am sensible of the fact that I have not only detained it unduly but that my strength is waning, therefore I shall not pursue the discussion further. I hope, however, that what I have said with regard to the need of an increased and continued activity in the workshops of the country, and particularly in the shipyards, will not be lightly dismissed. The Senator from North Dakota [Mr. MCCUMBER] three or four weeks ago introduced a bill covering the identical subject. It has been referred to the Committee on Military Affairs. We have not considered it because we are still investigating it. It should be taken up and acted upon favorably or we should report some measure of similar character. The Senator from Washington [Mr. JONES] has introduced a measure providing for the commandeering of all military clothing needed for our officers, who are and have been exploited by private dealers to their great disadvantage. These are subjects of consideration which Republicans and Democrats in their common patriotism, in their supreme realization of the crisis which we are facing, will, I am sure, unite to make the first business of this body.

TEACHERS' RETIREMENT BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 3648) for the retirement of public-school teachers in the District of Columbia.

Mr. HOLLIS obtained the floor.

Mr. KENYON. Mr. President, several Senators who are not here desire to be present when the Senator from New Hampshire discusses this measure. If he is ready to proceed now, I should like to suggest the absence of a quorum.

Mr. HOLLIS. If the Senator will withhold that suggestion for a moment——

Mr. KENYON. I will.

Mr. HOLLIS. I have not located any opposition to this bill so far. I see that most of those who are favorable to the bill, who have spoken about it, are present. There may be some difficulty in getting a quorum this afternoon. I am very anxious to get the bill through, and if the Senator will have those Senators notified who want to be here it may answer the same purpose. I do not expect any opposition.

Mr. KENYON. I feel rather in honor bound to suggest the absence of a quorum, because two Senators asked me to notify them. I think we had better have a quorum.

Mr. HOLLIS. Very well.

The PRESIDING OFFICER (Mr. ROBINSON in the chair). The absence of a quorum is suggested. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Hardwick	New	Swanson
Beckham	Henderson	Norris	Thomas
Borah	Hitchcock	Nugent	Thompson
Chamberlain	Hollis	Overman	Tillman
Colt	James	Pittman	Trammell
Curtis	Johnson, S. Dak.	Ransdell	Vardaman
Dillingham	Kellogg	Robinson	Wadsworth
Fernald	Kenyon	Shafroth	Warren
France	Kirby	Sheppard	Weeks
Frelinghuysen	Lewis	Smith, Ariz.	Williams
Gerry	McKellar	Smith, Mich.	Wolcott
Gronna	Martin	Sterling	
Harding	Myers	Sutherland	

Mr. HARDING. I wish to announce the detention, at a hearing before the Committee on Commerce, of the Senator from Illinois [Mr. SHERMAN], the Senator from Florida [Mr. FLETCHER], the Senator from Minnesota [Mr. NELSON], and the Senator from New York [Mr. CALDER].

Mr. MYERS. My colleague [Mr. WALSH] is still detained from the Senate by illness.

Mr. MCKELLAR. I desire to announce the unavoidable absence of the senior Senator from Tennessee [Mr. SHIELDS] on business.

Mr. VARDAMAN. I desire to announce the absence of the junior Senator from California [Mr. JOHNSON] in attendance on the hearing before the Commerce Committee.

Mr. SUTHERLAND. I announce the absence of my colleague [Mr. GOFF] on account of illness.

The VICE PRESIDENT. Fifty Senators have answered to the roll call. There is a quorum present.

Mr. HOLLIS. Mr. President, the pending bill, which is known as the teachers' retirement bill for the District of Columbia, applies only to the District of Columbia, for which, as Senators all know, we act as the local assembly.

The bill was introduced a year ago in December by the Senator from Ohio [Mr. POMERENE] and referred to the Committee on the District of Columbia. By that committee it was referred to its subcommittee on education and labor, of which I have the honor to be the chairman. That subcommittee held hearings and considered the bill very carefully, improved it, as they thought, in many particulars, reported it favorably to the full committee unanimously, and by the full committee it was reported favorably to the Senate about a year ago, toward the end of the session, and we were not able to obtain action at the last session before adjournment.

The subcommittee that considered the bill and amended it in a few particulars was composed of the Senator from Virginia [Mr. MARTIN], the Senator from Maryland [Mr. SMITH], the Senator from Vermont [Mr. DILLINGHAM], the Senator from Iowa [Mr. KENYON], and myself, being a fairly representative body from the Union, geographically considered. This year the bill was introduced by myself, and has been referred to the same subcommittee, and reported favorably to the Senate.

Mr. VARDAMAN. Mr. President, may I ask the Senator a question?

Mr. HOLLIS. I yield.

Mr. VARDAMAN. Has the full Committee on the District of Columbia considered that bill at all?

Mr. HOLLIS. My recollection is that a year ago the full committee did consider it, but I would not say that positively.

Mr. VARDAMAN. I am a member of that committee now, and it has not had a meeting at this session.

Mr. HOLLIS. That is true. The committee was polled, and more than a majority—I think 9 of the 14 members—reported favorably. The reason why the full committee did not meet was because the bill was carefully considered a year ago. I will say, of course, that if there is any objection by any Senator to having the bill considered because it has not been considered by the full committee, I should not feel at liberty to press it.

Mr. VARDAMAN. Mr. President, I desire to say that I know absolutely nothing about the bill. The bill was presented to me in this Chamber by the Senator from New Hampshire, who has it in charge, for my approval, prior to reporting the bill; and I withheld my approval of the bill, because I did not know anything about it. It had not been considered in committee, and personally I am opposed to any more pensions just now. I am not going to object to the consideration of the bill, however, if the Senate wants to consider it.

Mr. HOLLIS. I hope the Senator will remain in the Chamber and hear the bill discussed, and I hope its merits can be put before the Senate sufficiently so that he will feel that he can vote for it.

Mr. VARDAMAN. I want to say to the Senator that we have a very important hearing before the Commerce Committee, where we are now considering Hog Island, with all that the name implies; and I can not stay to hear the Senator's very able speech, because there is more involved in this other matter than would be involved in pensioning the teachers of the city of Washington for the next 100 years.

Mr. HOLLIS. I really believe that if the situation is as bad as the Senator says he would be justified in leaving the Chamber to attend the meeting of that committee.

This bill is modeled on what is called the contributory plan. That is, a certain amount is deducted from the salary of each teacher monthly to provide an annuity. To that, on retirement, the Government adds a certain amount, based upon the length of service of the teacher.

In order that the Senate may know something about the bill, I will now give a synopsis of it.

The first section provides that a sufficient amount shall be deducted each month from the teacher's basic salary, not to exceed 8 per cent, to provide, on retirement, a certain annuity.

Section 2 provides that the deductions are to be invested by the Treasury in bonds for the benefit of the teachers, and a board of investment is created, consisting of Treasury officials and two teachers, none of whom draw additional salary because of service on this board.

Section 3 provides that at the age of 62 the teacher may be retired at her own option or at the option of the Board of Education. At the age of 70 she shall be retired, unless the board for some particular reason thinks her services should be retained.

Section 4 provides that at the age of 52 the teacher, if disabled mentally or physically, may be retired.

Section 5 provides that when retired the teacher shall receive each month until her death a sum made up of two different accounts, the first being 1 per cent of the average basic salary for each year of service, and the second $6 for each year of service. To illustrate, a teacher retiring at 62, after 40 years of service, having had an average salary of $1,000 a year, would receive $10 multiplied by 40; that is, $400. That is 1 per cent of the whole thousand dollars is $10, multiplied by 40. Then she would get $6 for each year of service, which would be six times $40—$240—or a total salary of $640 a year. Of that amount, 63 per cent would be contributed by the teacher herself from her own savings and the remaining 37 per cent by the Government.

Section 6 provides that there shall be a minimum for the ages of 62 and 70 of $480, and for the age of 52 of $420.

Section 7 provides that $6 a year shall be paid from the District of Columbia appropriations, and that any deficiency in the annuity shall be so contributed.

Section 8 provides that credit may be given for service outside the District of Columbia not exceeding 10 years, and that the teacher must have been employed continuously in the District of Columbia since 52 years of age and for 10 years continuously prior to retirement.

Section 9 provides that if the teacher leaves the service before the age of 62, or before retirement, she shall receive her savings, with interest, in one lump sum.

Section 10 provides that in case of death the savings shall go to the family of the decedent.

Section 11 makes the act applicable to all teachers on the rolls of the District of Columbia in June, 1917.

Section 12 provides that continuance in the service after the passage of the act is declared to be consent to the provisions of the act.

Section 13 provides that teachers may be discharged as heretofore.

Section 14 gives certain definitions.

Section 15 gives directions for accounting and valuations.

Section 16 makes an appropriation of $50,000 for payments up to June 30, 1919, and $5,000 for the expenses of carrying out the system.

Section 17 provides rules and regulations to be provided by the Secretary of the Treasury, and section 18 provides that the annuity shall be exempt from attachment or execution for debt or taxes.

Mr. ROBINSON. Will the Senator yield?

Mr. HOLLIS. I yield.

Mr. ROBINSON. Is there any limitation in the bill on the length of time a teacher must have served before he or she may be entitled to the benefit of the act?

Mr. HOLLIS. Yes.

Mr. ROBINSON. What is that limitation?

Mr. HOLLIS. The teacher must have served at least 10 years in the District of Columbia continuously before the retirement to receive the benefit of the act. I will say that that provision was added at the suggestion of the Senator from Virginia [Mr. MARTIN] after the bill was introduced a year ago.

Mr. WOLCOTT. Mr. President——

Mr. HOLLIS. I yield to the Senator from Delaware.

Mr. WOLCOTT. The Senator in explaining the purport of section 8 said something to the effect that credit might be had for service outside the District. Will the Senator give more detail on that point?

Mr. HOLLIS. There will be very few teachers who will come in from outside the District, particularly at an advanced age. It would be some exceptional teacher, as a rule, who would be allowed to teach coming in from outside. The bill provides that where a teacher has taught 10 years in the District continuously before retirement she may have the benefit of not to exceed 10 years' service in some other part of the country in reckoning the amount that she is to receive. For example, if a teacher taught 20 years in Maryland and then came into the District and taught 10 years before her retirement, her annuity would be reckoned on the 10 years she had taught in the District plus 10 of the 20 years that she had taught outside the District. I will state that that provision was borrowed from most of the acts which have been passed in the United States. These acts have been passed in 33 States now. We limited it to 10 years and believe that that is wise.

Mr. ROBINSON. Mr. President——

Mr. HOLLIS. I yield to the Senator from Arkansas.

Mr. ROBINSON. Will the Senator state again the relative proportion of the fund that is to be contributed by the teachers and by the Government?

Mr. HOLLIS. It is not susceptible of exact measurement, but, based on experience in other States and on mortality tables, it is, roughly speaking, 60 per cent from the teachers and 40 per cent from the Government.

Mr. ROBINSON. Are the teachers in the District in favor of this legislation?

Mr. HOLLIS. They are, all except, I think, less than 1 per cent. Two or three teachers refused to sign.

Mr. ROBINSON. The contribution to the fund is compulsory?

Mr. HOLLIS. Yes.

Mr. ROBINSON. And not voluntary?

Mr. HOLLIS. Yes. I have done some work with the Committee on Civil Service on the general civil-service retirement bill. That bill as it has been framed to date and as it will be submitted to the Senate is based solely on contributions from the civil-service employees. I wish to point out the reason why school-teachers should be handled differently. In the first place, the civil-service retirement bill applies to all parts of the country. It will apply to a citizen of New Hampshire just as much as to a citizen of the District of Columbia. If employees are pauperized and come upon the community in the District of Columbia the District of Columbia would have to pay the entire support. If they should be pauperized in one of the States, then the State would have to support the person principally.

Mr. ROBINSON. Has the Senator investigated the question as to whether the compensation now paid teachers in the District of Columbia is adequate to enable them to make any saving out of their earnings, or is their entire salary required for maintenance?

Mr. HOLLIS. That is a very difficult question.

Mr. ROBINSON. As a matter of fact, the compensation paid teachers is somewhat inadequate as compared with the compensation paid persons in other spheres of activity requiring the same degree of intelligence, is it not?

Mr. HOLLIS. My own opinion is that school-teachers as a class are the best behaved, the most deserving, the most intelligent people in the community, and that they get smaller compensation for the services rendered than any other class. But I do not put it on that ground.

Mr. ROBINSON. I had not expected to put the Senator on record as to some of the comparisons he is making, but I am entirely prepared to agree with him in that particular.

Mr. HOLLIS. In a bill of this kind I can point out some distinctions, and there is a real distinction. If the ordinary clerk in a department is superannuated and can not do anything, he can at least sit at a window and look out and not do anyone any harm; but if a teacher is superannuated she is going to teach the little children in this District, and she will do them a positive injury. That is an injustice to the rising generation, something that the Congress of the United States ought to take into account. I mention these things to show why the committee felt justified in applying a little different standard in a teachers' retirement bill from the standard that has been adopted on the general bill.

I know there are Senators here who desire to speak, and whatever I have omitted they will fully cover. Unless there is some further question to be asked me, I yield the floor.

Mr. JOHNSON of South Dakota. Mr. President——

Mr. HOLLIS. I yield to the Senator from South Dakota.

Mr. JOHNSON of South Dakota. I wish to ask the Senator a question. I understand the bill only applies to the District of Columbia.

Mr. HOLLIS. It only applies to the District of Columbia, and it would never apply to anything but the District of Columbia until we change our Constitution or become much more advanced than we are now. In fact, we would not have a right to pension teachers in any other place than the District of Columbia at present.

Mr. JOHNSON of South Dakota. I wish to ask another question. I did not quite understand the effect of the appropriation to be paid by the Federal Government.

Mr. HOLLIS. I should have stated that. It will be readily seen that the teachers who will be pensioned immediately, if you call it a pension, will not have contributed anything to the Government so far, and in order to get started and take up the plan, it will be somewhat expensive. The estimate by the Bureau of Efficiency is that for the first year the Government cost will be about $35,000. That amount will gradually increase until it reaches a maximum of about $175,000 in 25 years. It will then gradually decrease until it will be approximately $90,000—that is, if this plan had been in effect in the District of Columbia long enough to get the loaded expense fairly distributed and fully in operation the expense of the Government would be substantially $90,000.

Mr. DILLINGHAM. In this connection, I wish the Senator would state to the Senate the advantage that the subcommittee derived from the Bureau of Efficiency in working out the insurance feature of the bill, which I think is most admirable.

Mr. HOLLIS. The Senator from Ohio [Mr. POMERENE] will be able to state whether it is true, but I think the bill was prepared in the first place by the Bureau of Efficiency of the Government.

Mr. POMERENE. The members of the board of education and some teachers in connection with some members of the Bureau of Efficiency prepared the bill originally. It was presented to me by a member of the board of education, and I had a number of conferences with him. Then it was referred to the Committee on the District of Columbia, and later it was taken up by a subcommittee of which the Senator from New Hampshire [Mr. HOLLIS] was chairman.

Mr. HOLLIS. I thank the Senator. I can state that when the subcommittee considered the matter, which they did very carefully, the Bureau of Efficiency appeared by its head, I think, Mr. Brown, a very competent man and an accomplished statistician, and worked with us on the bill and advised us about it and gave us the figures on which the final provisions of the bill are based.

Mr. DILLINGHAM. I should like to add to the statement of the Senator from New Hampshire that after that was done I took the scheme and submitted it to a very eminent insurance actuary, who, after having given it very careful consideration, expressed his opinion that it was most admirably worked out. I think the bill has been drawn in such a way that no one can complain of the insurance feature of it; it is equitable.

Mr. HOLLIS. I think perhaps I ought to state that since the bill was reported by our committee a year ago it has been made the model for bills that are now in operation in the cities of Boston, New York, Pittsburgh, and Harrisburg. Mr. Brown has been called to those different parts of the country to advise about the bill; he has taken this bill as a model, and it has been substantially adopted in those communities.

I might say that 33 States now have a teachers' retirement plan, and for the RECORD I will read the list of States. In 21 States there are State-wide pension systems, as follows: Arizona, California, Illinois, Indiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Montana, Nevada, New Hampshire, New Jersey, New York, North Dakota, Ohio, Rhode Island, Utah, Vermont, Virginia, and Wisconsin.

In the other States, which include Alabama, Colorado, Connecticut, Delaware, Pennsylvania, Kansas, Kentucky, Louisiana, Nebraska, Oregon, Tennessee, and West Virginia, the system affects only certain parts, usually the larger cities.

I ask unanimous consent that the reading of the bill may be dispensed with.

The VICE PRESIDENT. Is there objection? The Chair hears none.

Mr. POMERENE. Mr. President, before the bill is put to a vote I wish to say a word with regard to it. I feel that there is very great necessity for some legislation of this kind. I am in entire accord with what the Senator from New Hampshire has said in reference to the underpayment of the teachers generally. They have the most important work in the world to perform in the training of the minds of youth, and, generally speaking, after they have taken up the profession of teaching there is very little else open to them.

I do not myself know why teachers are so poorly paid. It is because of the fact that they are so poorly paid that I am willing to subscribe to one of the provisions of this bill. This pension, of course, is to be paid partly out of their own contributions and partly out of the public funds. As a statistician has estimated it, about 60 per cent will be paid by contributions and about 40 per cent out of the general fund.

I speak of this for this reason: I have been a good deal interested in the adoption of some plan looking to retirement from all branches of the civil service, and with the assistance of other members of the committee I think we have worked out a plan which is contributory in character. There are some students of this question who think that it should be wholly contributory, others who think that it should be partly contributory and partly at the public expense, and still others who insist that it should be wholly at public expense. If a plan for the retirement of Federal employees generally is adopted which is contributory in character, it is still going to cost the Government a very large sum of money, because there are many in the service of the Government who are so near the retirement age now that it would be impossible without great injustice to them to compel them to contribute enough to purchase a suitable annuity when they arrive at the retirement age. But after the plan is thoroughly established it will be upon a contributory basis only, and that is the extent to which

I feel that I can go when it comes to treating with Federal employees generally. However, I am quite willing to make the concession provided for in this bill for the teachers. Poorly paid as many of the Federal employees are, they are much better paid, considering the responsibility of the work, than are the teachers.

Mr. President, in view of the fact that I am supporting this plan which is partly contributory and partly at public expense I want it distinctly understood that I shall not favor that plan when it comes to the Federal employees generally. I feel that we need some retirement plan on the ground of superannuation, but in order to have my support as I now see it it must be entirely upon the contributory plan.

The VICE PRESIDENT. If there be no amendments offered as in Committee of the Whole, the bill will be reported to the Senate.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ADJOURNMENT TO MONDAY.

Mr. MARTIN. I move that the Senate adjourn until 12 o'clock meridian on Monday.

The motion was agreed to; and (at 3 o'clock and 50 minutes p. m.) the Senate adjourned until Monday, February 11, 1918, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

FRIDAY, *February 8, 1918.*

The House met at 12 o'clock noon.

The Rev. William Couden, of Washington, D. C., offered the following prayer:

Lord God Almighty, let the sense of Thine omnipresence pervade this august Chamber to-day. From Thine omniscience lend wisdom. By Thine omnipotence increase our national prowess against Thy enemies and ours. And endue us as a free people with more and more of the spirit of Thine infinite love revealed to us in Jesus Christ. In the great war task before the departments of our Government help them to unite in planning the work and in working the plan. And in the civic mind adjust rightly that delicate balance of rights and duties, privileges and obligations, liberties and responsibilities, so that the social life and ideals of our country may be true.

We ask all this that we of to-day may put no reproach into our history, no stain upon our flag, no shadow upon our hopes. In the name of Jesus. Amen.

The Journal of the proceedings of yesterday was read and approved.

PERMISSION TO ADDRESS THE HOUSE.

Mr. HICKS. Mr. Speaker, I ask unanimous consent that I may address the House for two minutes in order to read a patriotic poem by Mr. George Morrow Mayo, which I think is worthy of preservation.

The SPEAKER. The gentleman from New York asks unanimous consent to address the House for two minutes in order to read a poem. Is there objection? [After a pause.] The Chair hears none.

Mr. HICKS. The poem is as follows:

Here's to the blue of the wind-swept North
When we meet on the fields of France;
May the spirit of Grant be with you all
As the sons of the North advance.

Here's to the gray of the sun-kissed South
When we meet on the fields of France;
May the spirit of Lee be with you all
As the sons of the South advance.

And here's to the blue and gray as one
When we meet on the fields of France;
May the spirit of God be with us all
As the sons of the flag advance.

[Applause.]

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, its enrolling clerk, announced that the Senate had passed bill and joint resolution of the following titles, in which the concurrence of the House of Representatives was requested:

An act (S. 3083) granting to the Lincoln Highway Association, incorporated under the laws of the State of Michigan, a right of way through certain public lands of the United States; and

Joint resolution (S. J. Res. 92) providing additional time for the payment of purchase money under homestead entries within the former Colville Indian Reservation, Wash.

ORDER OF BUSINESS.

Mr. ASHBROOK. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. ASHBROOK. Mr. Speaker, this is Private Calendar day. I understand, however, that the gentleman from Virginia [Mr. FLOOD] desires to complete the Diplomatic and Consular appropriation bill. We have three bills on the calendar, and have no objection to the completion of the Diplomatic appropriation bill, providing our rights are reserved, and I should like very much to call up these bills this afternoon when the appropriation bill is passed——

The SPEAKER. Suppose the appropriation bill does not pass, then what?

Mr. ASHBROOK. Then, Mr. Speaker, if the bill does not pass to-day, I am willing that our rights should be yielded——

The SPEAKER. The gentleman from Ohio asks unanimous consent that the pension bills follow immediately after the completion of the consideration of the diplomatic appropriation bill.

Mr. ALEXANDER. Mr. Speaker, the bill providing housing for the employees for shipyards in which vessels are being constructed for our merchant marine has been given a privileged status to follow the disposition of the Diplomatic and Consular appropriation bill, and I would not care to agree to any arrangement that would interfere with that. As I understand it, the gentleman from Ohio is reporting private pension bills, and they are in order to-day. It will only take about 30 minutes to dispose of them, and I would rather he would dispose of them now and then let the consideration of the diplomatic bill proceed.

The SPEAKER. Does the gentleman object?

Mr. ALEXANDER. I object to that arrangement.

Mr. JOHNSON of Kentucky. Reserving the right to object——

The SPEAKER. The Chair knows, but the gentleman from Missouri did object.

Mr. FLOOD. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the Diplomatic and Consular appropriation bill.

Mr. ASHBROOK. Mr Speaker, reserving the right to object, I would like to inquire if an arrangement can not be made that these pension bills may be taken up the first thing after the passage of this appropriation bill and the housing bill.

The SPEAKER. That is exactly what the gentleman from Missouri objected to a moment ago.

Mr. ASHBROOK. No; my suggestion is that these private pension bills be taken up after the disposition of the appropriation bill and the housing bill.

Mr. DOWELL. Mr. Speaker, reserving the right to object——

Mr. STAFFORD. Mr. Speaker, may I suggest to the gentleman from Ohio that he defer his request until later in the day. There will be no difficulty, I think, in arranging to have the bills brought up for consideration either late this afternoon or to-morrow morning. I understand they will only take a half hour or so.

Mr. BORLAND. Mr. Speaker, let me make this suggestion to the gentleman from Ohio, that he ask unanimous consent to take up the bills at 5 o'clock, and they could probably be considered between 5 o'clock and 5.30.

Mr. FLOOD. Suppose the appropriation bill is not completed.

Mr. BORLAND. The chances are it will be completed; if not, it will go over.

Mr. BARNHART. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow for the consideration of these special pension bills until 12 o'clock.

The SPEAKER. Maybe it will not take until 12 o'clock.

Mr. GILLETT. Mr. Speaker, I shall be obliged to object to that.

The SPEAKER. The gentleman from Massachusetts objects.

Mr. ASHBROOK. Mr. Speaker, I would like to inquire of the gentleman from Virginia if he will not permit these bills to be taken up at 5 o'clock this afternoon.

Mr. FLOOD. Say 6 o'clock.

Mr. MADDEN. Mr. Speaker, I object.

The SPEAKER. The gentleman from Illinois objects.

Mr. WALSH. Mr. Speaker, I ask for the regular order.

Mr. DOWELL. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. DOWELL. What is the reason we can not take them up this afternoon?

The SPEAKER. None whatever.

Mr. WALSH. Regular order, Mr. Speaker.

The SPEAKER. The gentleman from Virginia moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the Diplomatic and Consular appropriation bill.

The question was taken, and the Speaker announced that the noes seemed to have it.

Mr. FLOOD and Mr. STAFFORD. Division, Mr. Speaker.

Mr. DOWELL. Mr. Speaker, I raise the question that there is no quorum present.

The SPEAKER. The gentleman from Iowa makes the point of order that there is no quorum present.

Mr. ASHBROOK. I would like again to inquire of the gentleman from Virginia——

The SPEAKER. But the point of no quorum has been made.

Mr. ASHBROOK. If he will permit these bills to be passed——

The SPEAKER. Does the gentleman from Iowa withdraw the point of order?

Mr. DOWELL. I do not, unless the gentleman will withdraw his motion and permit these pension bills to be considered.

Mr. FLOOD. I will not do that.

The SPEAKER. Evidently there is no quorum present.

Mr. KITCHIN. Mr. Speaker, I move a call of the House.

The SPEAKER. It is an automatic call. The Doorkeeper will close the doors and the Sergeant at Arms will notify the absentees. Those in favor of the House resolving itself into the Committee of the Whole House on the state of the Union for the consideration of the Diplomatic and Consular appropriation bill, will, as their names are called, answer "yea" and those opposed will answer "nay," and the Clerk will call the roll.

The question was taken; and there were—yeas 136, nays 199, answered "present" 1, not voting 92, as follows:

So the motion was rejected.

The Clerk announced the following pairs:

Until further notice:

Mr. DOUGHTON with Mr. HAMILTON of New York.

Mr. GALLAGHER with Mr. DUNN.

Mr. SCULLY with Mr. HOLLINGSWORTH.

Mr. STEDMAN with Mr. TEMPLETON.

Mr. WILSON of Louisiana with Mr. GEORGE W. FAIRCHILD.

Mr. OLNEY with Mr. CURRY of California.

Mr. FLYNN with Mr. SNYDER.

Mr. TALBOTT with Mr. BROWNING.

Mr. CLARK of Florida with Mr. SIEGEL.

Mr. CROSSER with Mr. GARLAND.

Mr. DALE of New York with Mr. GOULD.

Mr. DENT with Mr. COPLEY.

Mr. DOOLING with Mr. GOODALL.

Mr. CALDWELL with Mr. STINESS.

Mr. DOREMUS with Mr. DAVIDSON.

Mr. EAGLE with Mr. BRITTEN.

Mr. ESTOPINAL with Mr. DRUKKER.

Mr. GODWIN of North Carolina with Mr. COSTELLO.

Mr. BUCHANAN with Mr. BACHARACH.

Mr. GREGG with Mr. DAVIS.

Mr. HAMILL with Mr. FOCHT.

Mr. HASTINGS with Mr. CARTER of Massachusetts.

Mr. LITTLEPAGE with Mr. GRAHAM of Pennsylvania.

Mr. LOBECK with Mr. GREENE of Massachusetts.

Mr. MCKEOWN with Mr. MCARTHUR.

Mr. NICHOLLS of South Carolina with Mr. GRIEST.

Mr. O'SHAUNESSY with Mr. KELLEY of Michigan.

Mr. OVERMYER with Mr. MCKINLEY.

Mr. RIORDAN with Mr. MCLAUGHLIN of Pennsylvania.

Mr. SANDERS of Louisiana with Mr. HEATON.

Mr. THOMAS F. SMITH with Mr. HUSTED.

Mr. STEAGALL with Mr. MOTT.

Mr. SULLIVAN with Mr. MUDD.

Mr. VENABLE with Mr. KAHN.

Mr. WALKER with Mr. ROWLAND.

Mr. WHITE of Ohio with Mr. SANDERS of New York.

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present. So the motion that the House resolve itself in the Committee of the whole House on the state of the Union for the consideration of the bill H. R. 9314, the Diplomatic and Consular appropriation bill, is rejected. The Doorkeeper will open the doors.

PENSIONS.

Mr. ASHBROOK. Mr. Speaker, I call up the bill H. R. 9612, an omnibus pension bill, and ask unanimous consent that it be considered in the House as in Committee of the Whole.

The SPEAKER. The Clerk will report the bill by title.

The Clerk read the title of the bill, as follows:

A bill (H. R. 9612) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

The SPEAKER. The gentleman from Ohio asks unanimous consent that this bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The text of the bill is as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of John Blackburn, late of Company G, One hundred and forty-fourth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of George A. Porter, late of Company G, Seventeenth Regiment West Virginia Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The name of Jesse R. Mercer, late of Company A, First Regiment West Virginia Volunteer Cavalry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of George Bowery, late of Company F, One hundred and eightieth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Darius F. Bell, late of Company D, Third Regiment Wisconsin Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Michael J. Breyfogel, late of Company C, Ninety-ninth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Sarah E. Canton, widow of John Canton, late of Companies I and B, Eighty-eighth Regiment New York Volunteer Infantry, and pay her a pension at the rate of $25 per month.

The name of Joseph C. Gluck, late of Company G, Tenth Regiment West Virginia Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Peter Z. T. Lane, late of Company K, One hundred and thirtieth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Adaline L. Black, widow of John C. Black, late colonel, Thirty-seventh Regiment Illinois Volunteer Infantry, and pay her a pension at the rate of $50 per month in lieu of that she is now receiving.

The name of John M. Prouty, late of Company G, Twenty-seventh Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Daniel Plotner, late of Company F, Thirty-third Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of John Norfleet, late of Company F, Ninth Regiment Provisional Enrolled Missouri Militia, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Preston Carver, late of Company C, Forty-third Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of George W. Morton, late of Company K, Thirteenth Regiment Michigan Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Joseph F. Martin, late of Company B, Ninety-first Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Albert O. Dunning, helpless and dependent child of Lesner D. Dunning, late of the Provost Guards, Michigan Volunteer Infantry, and pay him a pension at the rate of $12 per month.

The name of Henry Cummings, late of Company A, First Regiment Oregon Volunteer Cavalry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Francis M. Withrow, late of Company K, Seventh Regiment West Virginia Volunteer Cavalry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of John W. Lanham, late of Company F, Thirteenth Regiment West Virginia Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of James Smalley, late an unassigned drafted recruit, tenth congressional district of Indiana, and pay him a pension at the rate of $24 per month.

The name of John Burns, late of Company I, Thirty-first Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of Isaac C. Pierce, late of Company L, Third Regiment Provisional Enrolled Missouri Militia, and pay him a pension at the rate of $27 per month in lieu of that he is now receiving.

The name of John W. Swanson, late of Company H, Thirteenth Regiment West Virginia Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of George W. Harrington, late of Company K, One hundred and sixth Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of William C. Waddle, late of Company I, Forty-ninth Regiment Kentucky Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of William J. Girdler, late of Company C, First Regiment Kentucky Volunteer Cavalry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Joseph D. Thach, late of Company A, Eleventh Regiment, and Company G, Ninth Regiment, Tennessee Volunteer Cavalry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Georgeanna McNatt Mills, former widow of William J. McNatt, late of Company D, First Regiment Delaware Volunteer Infantry, and pay her a pension at the rate of $25 per month.

The name of Abraham Gindlesparger, late of Company A, One hundred and forty-second Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Morton A. Pratt, late of Company A, Third Regiment Illinois Volunteer Cavalry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of John H. Simison, late of Company F, One hundred and fifty-first Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Erastus S. Bussell, late of Company C, Fifth Regiment Ohio Volunteer Cavalry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Thomas R. Henthorn, late of Company D, Forty-second Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of Simeon C. Shields, late of Company G, One hundred and forty-sixth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Charles Smith, late of Company A, Sixteenth Regiment Iowa Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Eliza H. Cooley, former widow of Newton S. Parker, late of Company B, Eighth Regiment Minnesota Volunteer Infantry, and pay her a pension at the rate of $25 per month.

The name of Edward Lewey, late of Company A, One hundred and forty-eighth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of George W. Anderson, late of Company I, One hundred and eighty-fourth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Andrew M. Graham, late of Company F, Eighth Regiment Maryland Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of John McKinney, late of Company G, One hundred and forty-seventh Regiment Kentucky Volunteer Infantry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of Alonzo A. V. P. McCoy, late of Companies K and M, Second Regiment California Volunteer Cavalry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Milton Smith, late of Company G, Eighth Regiment Kentucky Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of James R. Harris, late of Company A, Seventy-sixth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of Robert J. Clark, late of Company I, First Regiment Oregon Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Asa Gatton, late of Company A, One hundred and eighty-seventh Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Winfield S. Port, late of Company H, One hundred and forty-ninth Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of George W. Alms, late of Company K, One hundred and seventy-seventh Regiment Pennsylvania Drafted Militia Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Charlotte West, former widow of Edward A. Mickler, late of Company F, Twenty-seventh Regiment Iowa Volunteer Infantry, and pay her a pension at the rate of $25 per month.

The name of William V. Farris, late of Company K, Forty-eighth Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of William N. Green, late of Company I, Forty-fifth Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of John L. W. Hicks, late of Company I, Twenty-fourth Regiment Missouri Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of George H. Kimball, late of Battery G, First Battalion Maine Volunteer Light Artillery, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of John L. Baird, late of Company H, Twenty-second Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The name of William J. Beavers, late of Company G, Eighty-first Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Esais Laukhuff, late of Company K, Twenty-eighth Regiment Pennsylvania Volunteer Infantry, and pay him a pension at the rate of $27 per month in lieu of that he is now receiving.

The name of George S. Emery, late of Company A5, Sixteenth Regiment Vermont Militia Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Margaret E. Messing, helpless and dependent child of Henry J. Messing, late of Company G, One hundred and seventy-ninth Regiment New York Volunteer Infantry, and pay her a pension at the rate of $12 per month.

The name of John W. Rawley, late of Company H, One hundred and fifty-third Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Addison Blain, late of Company G, Forty-sixth Regiment Ohio Volunteer Infantry, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of David F. Pierce, late of Company I, Fourteenth Regiment Maine Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of David Hunter, jr., late of Company F, Forty-seventh Regiment Iowa Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

The name of Sanford T. Chapman, late of Company E, Seventeenth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of George Saunders, alias "Sandy," late of Company A, First Regiment United States Colored Heavy Artillery, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

The name of Amos A. Haskell, late of Company E, Fourth Regiment Michigan Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

The SPEAKER. The Clerk will read the bill for amendment.

The Clerk read as follows:

The name of Alonzo A. V. P. McCoy, late of Companies K and M, Second Regiment California Volunteer Cavalry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

Mr. WALSH. Mr. Speaker, I move to strike out the last word.

The SPEAKER. The gentleman from Massachusetts moves to strike out the last word.

Mr. WALSH. Mr. Speaker, I desire to ask some member of the committee how it happens that in several of these items in the report the post-office addresses are given and in others they are not, so that there is no way to identify from what part of the country these men come?

Mr. ASHBROOK. Where an original pension is granted, the post-office address is given. Where it is an increase, the post-office address is not given.

Mr. WALSH. And that is uniformly the rule?

Mr. ASHBROOK. That is uniformly the rule.

Mr. WALSH. Mr. Speaker, I withdraw my motion.

The SPEAKER. The pro forma amendment is withdrawn. The Clerk will read.

The Clerk read as follows:

The name of George S. Emery, late of Company A5, Sixteenth Regiment Vermont Militia Infantry, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

Mr. ASHBROOK. Mr. Speaker, I desire to offer an amendment.

The SPEAKER pro tempore (Mr. SAUNDERS of Virginia). The gentleman from Ohio offers an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. ASHBROOK offers an amendment: Page 11, line 1, after the capital "A." strike out the figure "5."

Mr. ASHBROOK. It is a typographical error.

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The Clerk will read.

The Clerk read as follows:

The name of John R. Lane, late of Company I, Seventeenth Regiment Indiana Volunteer Infantry, and pay him a pension at the rate of $40 per month in lieu of that he is now receiving.

Mr. ANTHONY. Mr. Speaker, is the Clerk reading the bill or just the names? I can not follow it.

The SPEAKER pro tempore. The Clerk is reading the names.

Mr. ANTHONY. I would like to have the bill read as it is written, so that we can follow it.

The SPEAKER pro tempore. The Clerk will read the bill.

The Clerk read as follows:

The name of Mary V. Rainsberger, widow of Joseph D. Rainsberger, late of Company C, First Regiment New York Volunteer Cavalry, and pay her a pension at the rate of $25 per month.

Mr. ANTHONY. Mr. Speaker, the Clerk is not reading the bill. I would like to ask that the bill be read.

The SPEAKER pro tempore. The Chair will state that the Clerk is reading the bill according to the usual practice in relation to these bills. If the gentleman from Kansas insists on all the details being read, of course the Clerk will be directed to read the bill in that way.

Mr. LANGLEY. Mr. Speaker, the phraseology of each paragraph is practically the same.

The SPEAKER pro tempore. The Chair understands that, and the Clerk is reading the bill according to the usual practice, but if insisted upon the Clerk will be required to conform to the request of the gentleman from Kansas.

Mr. ANTHONY. Mr. Speaker, I move to strike out the last word.

The SPEAKER pro tempore. The gentleman from Kansas moves to strike out the last word.

Mr. ANTHONY. The reason why I insist that the Clerk read this bill is that some of the Members of the House are trying to follow these pension bills in the effort to extract some little information from them, and if the Clerk glosses the reading over in this way it is difficult to follow it.

The gentleman from Massachusetts [Mr. WALSH] awhile ago asked a very pertinent question as to why the post-office addresses of the pensioners were not inserted in all these cases. I think the address should be inserted in each case, so that the pensioner may be identified. I was unable, however, to understand, from the gentleman from Ohio [Mr. ASHBROOK], why it was inserted in some cases and not in others, and why it would not be a good plan to insert it in every case, so as to aid in the identification of the pensioner.

Mr. ASHBROOK. I will say to the gentleman that the post-office address is inserted in an original pension for the benefit of the Pension Office.

Mr. ANTHONY. Would it not be a good idea to insert the post-office address for the information of the House?

Mr. ASHBROOK. That matter has been discussed here several times, some Members favor it and some believe it should not be, but it requires extra work for the clerk of the Pension Committee and for the examiner. A good many of these pensioners change their addresses frequently. I can see no reason for the change in the system.

Mr. ANTHONY. Well, all the more reason, because of the itinerant character of some of these pensioners that change their addresses so often it would be in the public interest that they give their post-office addresses, so that they can be identified by the community. It is charged that some cases reported out of this committee are not so meritorious, perhaps, as they should be, so that in order to protect the House and in order to protect the committee every means of identification possible should be thrown around these cases.

Mr. ASHBROOK. I will say to my friend that the report that accompanied the bill is full, and I believe it furnishes sufficient information.

Mr. ANTHONY. Does that give the post-office address of the pensioner?

Mr. ASHBROOK. I believe not.

Mr. ANTHONY. Then, in that particular the report does not clear up that point.

Now, Mr. Speaker, I want to continue along this line. I made a few remarks when the last pension bill was before the House, wherein I stated that I did not think these bills were being reported out by the committee in a manner that was exactly fair and equitable to the soldier population of the country, and also in a manner that was exactly fair and equitable to the membership of this House. I have since then caused to be made a little investigation in regard to the way these bills were being reported from the Committee on Invalid Pensions, and I am sorry to say that the result of that small investigation has been that it appears to me, and I believe it will appear to the membership of this House, that the Committee on Invalid Pensions, at least some of the members of that committee, are taking advantage of their membership of that committee to perpetrate a species of petty larceny in extracting the greatest possible number of these bills for their constituents.

Mr. GARRETT of Tennessee. Mr. Speaker, will the gentleman yield?

Mr. ANTHONY. Yes. Yes.

Mr. GARRETT of Tennessee. How long has the gentleman been a Member of the House?

Mr. ANTHONY. Ten years.

Mr. GARRETT of Tennessee. And is just now discovering that?

Mr. ANTHONY. No. It has been apparent to me all along that the evil has existed, but it is a growing evil. The fact that the evil exists is no reason why it should not be corrected now; and as one Member of the House I intend that it shall be corrected.

For instance, I want to call the attention of the membership to the fact that so far on the calendar in this short session of the House, one member of the Committee on Invalid Pensions has 18 bills reported out and passed by the House and now on the calendar. Another member of the Committee on Invalid Pensions has 17 bills, another 13 bills, another 18 bills, and that is the way it runs. The average number of bills which the entire membership of the House has received this session is perhaps 1, 2, or 3 per Member. I do not say that they should be apportioned to the membership, but I do say that the individual merits of each case should be considered by the committee, and the number of bills should be apportioned to the entire soldier population of the country, so that any soldier who is in necessitous circumstances can have an equal chance of having the merits of his case considered.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. GARRETT of Tennessee. Will the gentleman yield?

Mr. ANTHONY. I ask for five minutes more, and then I will yield to the gentleman.

The SPEAKER pro tempore. The gentleman from Kansas asks unanimous consent that his time be extended five minutes. Is there objection?

There was no objection.

Mr. RUSSELL. Will the gentleman state the names of the members of the Committee on Invalid Pensions who have these bills?

Mr. ANTHONY. I do not care to do that. I do not think it will be necessary to do that. I wish simply to state the facts as they exist, and trust to the individual membership of the Committee on Invalid Pensions to see that that evil is corrected. Now, I yield to the gentleman from Tennessee.

Mr. GARRETT of Tennessee. Is not the logic of the gentleman's argument that which some of us have heretofore tried to point out, namely, that the passing of individual bills ought to be abolished, and that we ought to pass a general law which would cover the cases?

Mr. ANTHONY. No; I think in some individual cases the necessity undoubtedly exists for a remedy by Congress; but as that power is now exercised by Congress, the merit of individual cases is not given the consideration it should have. Facts are not verified, and any soldier who prepares affidavits the validity of which is not even questioned by the committee, just so they are formally prepared, can secure a bill through the committee, if he stands close enough to favored Members of Congress. In my opinion that is wrong.

Mr. HOWARD. Will the gentleman yield for a question?

Mr. ANTHONY. I will.

Mr. HOWARD. The gentleman remembers when we had the prolonged debate over the Sherwood dollar-a-day pension bill?

Mr. ANTHONY. I do.

Mr. HOWARD. Does the gentleman remember that the most formidable argument made on both sides of this House when that bill was under consideration was the statement that the Sherwood dollar-a-day pension bill would eliminate the necessity for a continuation of these private pension bills, which were unjust in the inequalities practiced by the committee?

Mr. ANTHONY. Yes; I remember that; but I want to say to the gentleman that the Sherwood dollar-a-day pension bill does not remedy the situation that confronts the soldiers of this country. Those with a long service get the proper remedy, but many others are not adequately taken care of. Remedying individual cases of this kind now largely depends on how closely the soldier may be acquainted with a member of the Committee on Invalid Pensions.

I say that instead of resorting to such methods for relief, this Congress ought to pass an adequate general pension bill which will put every soldier upon a fair, liberal, and equitable basis.

Mr. LANGLEY. Will the gentleman yield?

Mr. ANTHONY. I yield to the gentleman, who is a member of the committee.

Mr. LANGLEY. I heartily agree with the gentleman's contention about the justice of general legislation giving all of them what a few get by special act. That has always been my contention. And let me say further that I think it would be fair for the gentleman to state in answer to the gentleman from Georgia [Mr. HOWARD] that when the Sherwood pension bill was under consideration, and when these arguments to which he refers were made, the conditions were entirely different from what they are now. Not only have the soldiers grown much older and, of course, more helpless but the cost of living is very much higher than anyone ever dreamed of then; and, in fact, we were then preparing to reduce the tariff, and the supposition and contention of our Democratic friends that the cost of living would go down.

Mr. ANTHONY. That is very true. I want to say, in addition, that this House in the last session passed a bill giving the widows of soldiers of the Civil War $25 a month. Yet there are a large number of veterans of the Civil War who gave splendid service in that war who are drawing much less than that.

Mr. KEARNS. I believe the gentleman from Kansas is a member of the Committee on Military Affairs?

Mr. ANTHONY. Yes.

Mr. KEARNS. I have had five or six bills in the gentleman's committee for three years and never have gotten action on one of them. Yet members of the gentleman's committee have told me that three of my bills, at least, have great merit. I would like to have one of them reported out.

Mr. ANTHONY. If they are for the relief of deserters or military offenders, it will be a long time before they will get my vote out of that committee.

Mr. KEARNS. You do report bills, however, favorably, do you not?

Mr. ANTHONY. The committee has reported some bills.

Mr. KEARNS. Yet you have not reported one of these.

Mr. ANTHONY. Mr. Speaker, there is one more observation I want to make. The Committee on Invalid Pensions ought to live up to the rules it makes. One of the rules made by the Committee on Invalid Pensions was that it would not consider an increase of pension by special bill for an inmate of a soldiers' home. As a matter of fact the Committee on Invalid Pensions has now reported special bills for members of soldiers' homes, introduced by members of that committee, violating that rule, while a bill introduced by any Member of the House not a member of that committee has that rule enforced against it. I have found that out.

The SPEAKER pro tempore. The time of the gentleman has again expired.

Mr. ANTHONY. I ask unanimous consent for five minutes more.

The SPEAKER pro tempore. The gentleman from Kansas asks unanimous consent that his time be extended five minutes. Is there objection?

There was no objection.

Mr. ASHBROOK. Will the gentleman yield?

Mr. ANTHONY. I yield to the gentleman from Ohio.

Mr. ASHBROOK. I would like to say to my friend from Kansas that so far as I know and so far as the chairman of the committee [Gen. SHERWOOD] knows, and so far as the clerk of the committee, who is here, knows, not a case of that kind has been reported. If any such cases have been reported, the chairman of the committee will thank the gentleman from Kansas to point them out and give the name of the soldier so that we may investigate the case.

Mr. ANTHONY. I will say to the gentleman that I have six cases in one soldiers' home that I can furnish to the gentleman, where that rule has been violated.

Mr. ASHBROOK. If there is a case of that kind in this bill, if the gentleman will give me the name of the soldier I will move to strike it out.

Mr. ANTHONY. Oh, no; we do not want to strike it out. I want to say to the gentleman that the committee was wrong in the adoption of such a rule. [Applause.] By the adoption of such a rule you put a premium on the practice of soldiers to evade the rule, and it is now the practice for a soldier in a soldiers' home to leave that home before he applies to the gentleman's committee for an increase of pension. It is a common practice all over the country for soldiers when they get a promise from a Congressman to put through a special bill before the gentleman's committee, to leave the home so that they can evade the rule. The pension is granted and the soldier may then return to the home. That is what is going on in the country.

Mr. RUCKER. Will the gentleman yield?

Mr. ANTHONY. Yes.

Mr. RUCKER. Soldiers at the soldiers' homes do not pay any board; they get their living from the Government?

Mr. ANTHONY. Yes.

Mr. RUCKER. Does the gentleman think they ought to be supported by the Government and get a pension, too?

Mr. ANTHONY. Most of the members of our soldiers' homes are in such a financial and physical condition that it is for them the last resort, and the men that go into these homes are for the most part the most deserving cases in the large class of soldiers that appeal to this committee for relief. I want to see these men put on an equality with those outside the home so that when they get a small increase of pension they can leave the home, as most of them desire to do, and live in their own home.

Mr. RUCKER. I think the gentleman is right as to the character of the soldiers who go to the homes, and in exceptional cases I think it would be right to give them a pension, but generally speaking I do not believe that a single man supported in the Soldiers' Home by the people of this country or those who are drawing a big salary from the Government ought to draw one dollar of pension.

Mr. ANTHONY. That may be the gentleman's belief. I want to express again the hope that the Committee on Invalid Pensions, when it reports the next bill, will place upon the bill the name of the member who introduced it and give the post-office address of the soldier, and if that is done I think the evils that we complain of will be largely done away with.

Mr. ROSE. Will the gentleman yield?

Mr. ANTHONY. Yes.

Mr. ROSE. The statements made by the gentleman from Kansas are startling. I understood at the opening of the session that no Member would be permitted to present more than five applications or bills for pensions.

Mr. ASHBROOK. I would like to know where the gentleman got that information.

Mr. ROSE. From Members of the House.

Mr. ASHBROOK. The gentleman never got it from any member of the committee.

Mr. ROSE. I did not; but I acted on that proposition.

Mr. ASHBROOK. There is no such rule, and I want to say in good humor to my friend from Kansas that I wish he would meet with the Committee on Invalid Pensions; it meets every Monday morning.

Mr. LANGLEY. That is the trouble. Many of the membership do not keep in close enough touch with the details of the committee's work.

Mr. RUCKER. Mr. Speaker, I want to express a few views with reference to pensions. I will preface my remarks by saying that I am not one of those Members opposed to pensions. On the contrary, I am in favor of pensions, and liberal pensions. Mr. Speaker, I think an effort is being made in the direction of raising the general level of rates in the Sherwood pension act so as to give all, or substantially all, soldiers $50 a month. I have not hesitated to write men in my district—some of them infirm, feeble, poor, needy, and meritorious—telling them positively and emphatically that I would not support a bill of that kind. I repeat here that I am not in favor of a bill of that sort. I am anxious to extend help where help is needed and merited.

Mr. KING. Will the gentleman yield?

Mr. RUCKER. Yes.

Mr. KING. The gentleman from Missouri a moment ago said that he believed that no soldier in a soldiers' home should have a pension.

Mr. RUCKER. I did not say exactly that.

Mr. KING. Did the gentleman make an exception of where the support is entirely by State funds?

Mr. RUCKER. I would not make an excetpion if the soldier is supported by the public. I want to state that I said, or intended to say, that there may be cases—and no doubt there are cases—in which it is proper to grant a pension to a man in the soldiers' home, but, generally speaking, I am opposed to granting pensions to inmates of soldiers' homes.

Let me say that when this Congress asserts itself and it does the courageous thing and strikes from the pension rolls those who ought not to be drawing pensions, when they strike from the rolls rich men who have abundance of income, and cease taxing poor people to pay more pensions to men who ought not to ask for pensions at all, then I will be in favor of giving to those who ought to have it, $50 a month, if they need it. I am opposed to paying pensions out of the money taken by taxation from the poor people—men, women, and children—to millionaires. I am opposed to paying any pensions, in most cases, to those who occupy soldiers' homes. I would not, if I had my way—and, of course, I realize that I can not have my way—I would not pay pensions to men who are in Government service drawing salaries from $1,500 to $2,500 a year. Therefore, I will never support—unless I change my mind, and I do not think I will—a bill authorizing a general increase of pensions up to $50 a month as long as that increase would inure to the benefit of the rich who need no pensions. I concede that there are many men who rendered faithful service to the country, whose present condition merit at the hands of a grateful people recognition in pensions sufficient to protect them from want, and I favor great liberality in dealing with them.

Mr. SWITZER. Will the gentleman yield?

Mr. RUCKER. Yes.

Mr. SWITZER. Does not the gentleman think that Congress is in an absurd situation when it gives the widow of a Civil War soldier $25 a month and there are 200,000 Civil War soldiers now on the rolls drawing a pension of less than $25 a month?

Mr. RUCKER. That is an inconsistent thing. A soldier ought to have more pension, speaking generally, than a widow. I want to say another thing. It seems pertinent to say it now and call the attention of the Committee on Invalid Pensions to the fact. We are paying a good many million dollars in the way of pensions to people who live in foreign lands. They may have gone there in the employ of the Government——

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. RUCKER. I ask for three minutes more.

The SPEAKER pro tempore. Is there objection to the request of the gentleman?

There was no objection.

Mr. RUCKER. They may have gone abroad without any intent to change their citizenship, but they have stayed there, and I have no doubt that to-day there are men in nearly every country on earth drawing pensions out of money taken from the taxpayers of this land who have not gazed on the Stars and Stripes for 20 years, and it may be that they will never see the Stars and Stripes again unless it is when Pershing carries the flag across the line on the western front into Germany and plants it in Berlin. [Applause.] I am opposed to paying these men pensions.

Mr. LANGLEY. Will the gentleman yield?

Mr. RUCKER. Yes.

Mr. LANGLEY. I agree with the gentleman about giving preference in granting pensions to those who need them, but what does the gentleman mean by his statement that he is opposed to any pensions being paid to those who are now living in foreign countries? Is it because they do not live in this country, or on the ground that they do not need the pensions?

Mr. RUCKER. I am opposed to their drawing pensions, because they do not live here. When they turn their backs on the flag of this country I am in favor of stopping the pension.

Mr. LANGLEY. Oh, there are lots of pensioners in foreign countries who have not turned their back on the flag.

Mr. RUCKER. But they do not live in this country and ought not to be pensioned by those who do live here.

Mr. LANGLEY. But there are lots of loyal Americans who do not live in the United States. I do not think domicile is an infallible test of loyalty to the land of one's nativity.

Mr. RUCKER. But they ought not to draw pensions.

Mr. LANGLEY. I disagree with the gentleman on that as a universal proposition.

Mr. RUCKER. Of course the gentleman has that right.

Mr. AUSTIN. Mr. Speaker, I have no complaint or criticism to make of the action of the Committee on Invalid Pensions. I have unlimited confidence in the fairness, the justice, and the square dealing of the chairman of that committee, our beloved colleague, Gen. SHERWOOD, and his associates on the committee.

Mr. GORDON. Mr. Speaker, will the gentleman yield?

Mr. AUSTIN. Yes.

Mr. GORDON. How many bills has the gentleman in this report?

Mr. AUSTIN. I have not a single one to my knowledge.

Mr. GORDON. The clerk of the committee just informed me that one-fifth of the bills in this report were introduced by members of the committee.

Mr. AUSTIN. Speaking for myself, I do not believe I have a single one in this bill. I think I had two in the previous bill, and the district I represent furnished more Union soldiers in proportion to population than any district in the United States. [Applause.] During the Spanish-American War my town, Knoxville, Tenn., stood next to New York City in the number of recruits, and the smallest county in my district, with a voting population of 2,200, furnished 500 private soldiers to the Army, and that section, including Knoxville, furnished the first and only volunteer regiment after the declaration of the present war; so I think I have a right to stand here and say something not only for the soldiers, but for this committee. And I resent the imputation of the gentleman from Ohio [Mr. GORDON] to attempt to discredit the Invalid Pension Committee with the membership of this House.

Mr. WALSH. Mr. Speaker, will the gentleman yield?

Mr. AUSTIN. Yes.

Mr. WALSH. Is the gentleman in favor of all claims being passed on their merits?

Mr. AUSTIN. Certainly I am.

Mr. WALSH. Then the gentleman is not advancing or setting forth the glory of his district in past days as a reason why his district should be given any preference in the matter of pensions, is he?

Mr. AUSTIN. I am absolutely satisfied with the treatment my district is receiving at the hands of this committee.

Mr. CARTER of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. AUSTIN. Yes.

Mr. CARTER of Oklahoma. The gentleman is not only in favor of passing pension claims that have merit but he is in favor of passing all of them, is he?

Mr. AUSTIN. Of course, I favor every just and meritorious pension case or bill.

Mr. MOORE of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. AUSTIN. I want a little more time if I am to be continually interrupted. I yield.

Mr. MOORE of Pennsylvania. The gentleman is entirely satisfied with the treatment that his district receives?

Mr. AUSTIN. Yes.

Mr. MOORE of Pennsylvania. Is not that due to the manner in which the able Representative of that district presents these various cases to the Pension Committee?

Mr. AUSTIN. Oh, do not say "the able Representative." Do not make me blush in this public place.

Mr. MOORE of Pennsylvania. It is the consensus of opinion in the House of Representatives that the gentleman's district is exceedingly well served.

Mr. AUSTIN. I thank my generous colleague for his compliment. I am pleased to know that my colleagues have bills in this omnibus measure, and I am ready and willing to help them put it through. [Applause.] What I desired to ask the members of the Committee on Invalid Pensions is this question: What action do they contemplate taking during this session of Congress toward reporting a general bill to increase the pensions of the soldiers? There is not a Member of this House with a soldier constituency who is not daily receiving letters from old soldiers desiring to know if Congress contemplates reporting and passing a general bill to increase the pensions of soldiers. We all admit it is unfair to pass a general pension bill which gives the widows of the soldiers $25 and at the same time leave on the pension rolls thousands of men who rendered faithful and efficient service who are drawing less than $25. I think this committee ought to report a general bill which will at least give every soldier a minimum pension of not less than $30 a month. The American people will stand for it, approve it, and indorse it. [Applause.] I would cheerfully support a bill making the rate $50 per month for every old soldier who actually needs it. Now, I would be glad to hear from the gentleman from Ohio [Mr. ASHBROOK], a member of the Committee on Invalid Pensions.

Mr. ASHBROOK. I would say to my friend from Tennessee that a meeting has been called of the committee for next Monday to consider a general pension bill, and I believe that some sort of a general pension bill will be reported at this session.

Mr. AUSTIN. I want the information, because we are all in the dark, and we do not know how to answer the old soldiers. I wanted a public statement on the floor of the House, so that we would know what was going on, and could intelligently advise our constituents who are interested.

Mr. BLAND. Mr. Speaker, I would say to the gentleman that as a member of the committee I am also in touch somewhat with the sentiment in the Senate on the same question, and I think a bill will come out of the Senate and also one out of the House Invalid Pension Committee that will be satisfactory on the subject, and come soon. [Applause.]

The SPEAKER pro tempore. The time of the gentleman from Tennessee has expired.

Mr. ASHBROOK. Mr. Speaker, I want to ask the indulgence of the House for just one moment. I regret that there is so much criticism on the part of some Members whenever one of these omnibus pension bills is reported, and I want to say to the House that the Committee on Invalid Pensions, so far as I know, and I believe I do know, acts fairly and impartially on these special pension bills. The trouble is that a great many Members of the House introduce bills, and then do not do anything more. They do not furnish the required evidence. When the omnibus bill is then reported out, they think they ought to have some items on the bill, but the fault lies at their own door. My good, sweet-tempered friend and colleague from Ohio [Mr. GORDON] has just left the Chamber, I believe, but he criticized somewhat the fact that the members of this committee were securing entirely too many bills themselves. The clerk of the committee informs me that there are 183 items in this omnibus bill. There are 17 members of the Committee on Invalid Pensions, and that of those 183 items members of the committee have 25.

Mr. RUCKER. Mr. Speaker, will the gentleman yield?

Mr. ASHBROOK. Yes.

Mr. RUCKER. In connection with the gentleman's statement, the effort of the committee is to be fair to the House, and in reply to some criticisms that have been made I want to say that I have no criticism of the Pension Committee whatever. I think it is fair to every Member of the House. The suggestion that all pension bills be passed is an absurd one; and while I fare as well as I ought to, I want to say to the House that the Committee on Invalid Pensions frequently turns down claims which I think are meritorious. I have had a number of them turned down, but I wanted to say that in vindication of the action of the committee.

Mr. ASHBROOK. I thank the gentleman.

Mr. GREEN of Iowa. Will the gentleman yield further?

Mr. ASHBROOK. I will yield.

Mr. GREEN of Iowa. With reference to what the gentleman said a moment ago in regard to a general bill, in support of the inclination of the committee which he seemed to indicate, I want to call the attention of the committee and the House further to the inconsistencies and absurdities which result from the present condition. I do not want to make any complaint against the committee, understand, but a short time ago I had a bill before the committee, which was put in one of the omnibus pension bills, in which a soldier was granted only $24 a month. Now, he and his wife, even after the special bill was passed for them, will only get $24 a month. If the poor old soldier should die, his wife alone will get $25 a month. Now, I think we ought not to tolerate such inconsistencies and absurdities any longer. I hope the committee will hasten its intention and put through a general bill of some kind.

Mr. ASHBROOK. I can assure the gentleman that I believe some legislation will be reported out of the committee to the House.

Mr. KEARNS. Will the gentleman yield?

Mr. ASHBROOK. I yield to my friend from Georgia [Mr. HOWARD] first.

Mr. HOWARD. I thought the gentleman had yielded the floor.

Mr. KEARNS. The gentleman wants to make a speech and I want to ask a question.

Mr. ASHBROOK. Oh, no; he does not.

Mr. HOWARD. I have one in my system of about five minutes long.

Mr. KEARNS. I desire to ask the gentleman in regard to this pension bill being contemplated by the committee. What is the minimum pension that will be received by a soldier under that bill?

Mr. ASHBROOK. Well, I can not undertake to commit the committee, but I would say——

Mr. KEARNS. The gentleman's personal views.

Mr. ASHBROOK. I would say personally that I believe no pension ought to be less than $25 a month, which is the amount now allowed soldiers' widows.

Mr. KEARNS. Does not the gentleman think it ought to be $30 a month?

Mr. ASHBROOK. I have expressed my own belief that no pension should be less than $25 per month.

Mr. TOWNER. Will the gentleman yield?

Mr. ASHBROOK. I yield to the gentleman from Iowa.

Mr. TOWNER. I would like to ask the gentleman if there are not several general pension bills pending before the Committee on Invalid Pensions?

Mr. ASHBROOK. There is quite a large number.

Mr. TOWNER. And it is expected that the Pension Committee will have hearings next Monday on those several bills, is it not?

Mr. ASHBROOK. A meeting of the committee has been called for next Monday to consider these several bills, but there will be no public hearings.

Mr. TOWNER. I did not mean in that sense; I meant to hear Congressmen who had those bills pending.

Mr. ASHBROOK. Oh, certainly.

Mr. TOWNER. I have no bill pending, but I would like, if an opportunity were presented, to say something to the committee on that line. Will the opportunity be afforded?

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. TOWNER. Mr. Speaker, I ask unanimous consent that the time of the gentleman be extended for five minutes.

The SPEAKER pro tempore. The gentleman from Iowa asks that the time of the gentleman from Ohio may be extended five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. TOWNER. In other words, would it not be well for the committee to hear Members of Congress briefly upon that matter at this time?

Mr. ASHBROOK. Well, my judgment is that if the committee hears Members who have introduced bills, that it probably would be unwise to give a general invitation for Members to come before the committee. A number of Members have general pension bills pending. I think 15 or 20 bills are before the committee, and the Committee on Invalid Pensions will, without doubt, take up all of those bills and give them serious consideration.

Mr. TOWNER. I am very glad indeed to hear that statement made, as I am quite sure all Members of the House are. The conditions are such as to require, almost imperatively, action of a general nature and character at this session of Congress. I think the sentiment on both sides of the House is practically unanimous upon that proposition. Now, I wish to say one word before leaving my feet, however, in justification of the action of the committee. Throughout my experience with the committee, they have in every case acted upon the cases favorably which were really meritorious. I have no complaint to find whatever with regard to the action of the committee.

In my judgment, while they have not given nearly as many pension cases which I thought they ought which I have presented—because, of course, I have never presented anything but meritorious cases—they have always been, I believe, determined upon their merits.

Mr. ANTHONY. Will the gentleman yield?

Mr. TOWNER. With pleasure.

Mr. ANTHONY. I recognize the gentleman as being one of the fairest-minded men in the House, and a man whose opinion I admire very much.

Mr. TOWNER. I certainly thank the gentleman.

Mr. ANTHONY. I want to put a question to him. Does the gentleman think it is fair for the Committee on Invalid Pensions, for instance, to grant two bills to soldiers in your district when the neighboring congressional district, the Congressman of which may be on the Committee on Invalid Pensions, is granted 18 of those bills in the same time? Is that fair to the soldiers in the gentleman's district?

Mr. TOWNER. I would say this to the gentleman, if I may be allowed to make the statement, that I think there ought not to be 18 pensions granted in any one district in any one of these bills; but I think all of these bills should be determined not by the fact as to whether or not Members of Congress were entitled to them, but they should be determined on their merits. In other words, no Member of Congress should be granted a pension bill that is not meritorious merely because it is his turn.

Mr. HOWARD. Why should not even an excess of 18 pensions be granted to a district if they are meritorious?

Mr. ASHBROOK. Mr. Speaker, I yield to my friend from Michigan [Mr. JAMES], and then I will be glad to yield to the gentleman from Georgia [Mr. HOWARD].

Mr. HOWARD. I have great respect for his opinions in regard to these things, and I want to get some light on them if you will permit me to pursue my question. If there are 18 meritorious pensioners in a district that are suffering and are asking for a gratuity from their Government and having served on the battle field, why should there not be even 25 pensions granted in a bill if they are meritorious?

Mr. TOWNER. I agree with the gentleman in principle, but if the gentleman will give me his attention I think he will agree with me that we all know that a certain amount of these pensions are, as a matter of fact, granted every year.

Mr. HOWARD. That is the iniquity of it, too, is it not?

Mr. TOWNER. Let me say this to the gentleman very frankly, if in order not to overlap the amount that they thought could be expended on this class of cases there were 18 meritorious cases in any one district, and there was not the same number of cases in others, I would say, yes; let the 18 cases go.

Mr. ASHBROOK. I will yield to my friend from Michigan [Mr. JAMES].

Mr. JAMES. Is the gentleman going to give the same kind of consideration to a millionaire in regard to increasing his pension as to a man who is penniless, or is there going to be a proviso which will not take care of the man who does not need it?

Mr. ASHBROOK. I can not answer that question. Of course a general pension bill is general in its nature, and all soldiers would be included therein.

Mr. JAMES. And your idea is to have it apply to everybody? At the last session of Congress a bill came over here from the Senate and was considered at 10 o'clock at night. The bill had been introduced——

The SPEAKER pro tempore. The time of the gentleman from Ohio [Mr. ASHBROOK] has expired.

Mr. JAMES. Mr. Speaker, I ask unanimous consent that it be extended three minutes.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. JAMES. It came over here at 10 o'clock one night. It had not been considered by your committee. An item was in there, introduced by the chairman of the Senate Pension Committee, which provided increase of pension for a man who was court-martialed in 1864 on five counts and sentenced to be shot by musketry, and then on account of political influence the sentence was commuted to about 30 years. Are you going to give that man an increase of pension, or are you going to provide for the taking care of those deserving pensions?

Mr. ASHBROOK. I do not think the House committee would grant that sort of a pension.

Mr. JAMES. I am not talking about the House bill. This bill was introduced by the chairman of the Pension Committee in the Senate.

Mr. ASHBROOK. I am just as much opposed as the gentleman is to that kind of a pension.

Mr. HOWARD. Mr. Speaker, I move to strike out the last word.

The remedy for the case that the gentleman from Michigan speaks of is to have a general review of that man's case, and shoot that fellow yet if he was guilty.

Let me say a word about the pension bills. If some of the younger Members of the House want to read an exposure of the iniquities of the private pension system, I respectfully refer them to the debates in the Sixty-second Congress, and especially the speeches made by the late lamented Congressman S. A. Roddenbery, of Georgia. He said everything that there was to be said, and from an impartial standpoint.

In five minutes it will be impossible for me to pay tribute to the abilities, to the activities, of these fair-minded men that are now on this committee. There has never been a better Committee on Pensions assembled under the dome of this Capitol since we have been a Nation than the present committee. They are impartial, they are just, and they try to do what is right between pensioners, but they can not do it under the system. I am dead against the whole business. It is wrong in principle from start to finish.

Now, let us see. Here are two cases. I have read the evidence in both of them. Here is an old gentleman by the name of Franklin M. Joines, 72 years old, and who was a private in the war. He served 1 year and 10 months, and he is now paid a pension at the rate of $21.50 a month. The medical testimony in this old fellow's case shows that he is suffering from a good many ailments that make him absolutely incapacitated to earn a living by his own labor. So they give him $40 a month. Now, remember that is my old friend Joines.

Right over on the next page here is my dear old friend Benjamin G. Young, 78 years old. He served exactly to the minute the same length of time as Joines. He is suffering from every complication known to medical science. [Laughter.] Not one has been omitted. Six years older, as poor as Job's turkey, not only an invalid, but a pauper, and the committee weighs all the evidence carefully, peruses the evidence with a microscope, and they go out and give my dear old friend over in Indiana $36 a month.

Mr. MADDEN. Will the gentleman yield?

Mr. HOWARD. With pleasure.

Mr. MADDEN. The gentleman said they perused the evidence and the affidavits in this case with a microscope. If they had done so, they might have enlarged upon the amount allotted.

Mr. HOWARD. Forty dollars is what they ought to have given this old man. I am going to introduce an amendment when they get to my old friend Young, and I am going to see that he gets that $4 a month additional, because he is six years older, he served the same length of time, he endured the same hardships, he suffers from the same infirmities, and yet the committee goes out and gives a younger man $4 more a month than they give this poor old fellow.

Mr. GOODWIN of Arkansas. Mr. Speaker, will the gentleman yield?

Mr. KEY of Ohio. Mr. Speaker, will the gentleman yield to me right there?

The SPEAKER pro tempore. Does the gentleman yield, and to whom?

Mr. KEY of Ohio. I would like to ask the gentleman from Georgia a question.

The SPEAKER pro tempore. Does the gentleman yield?

Mr. KEY of Ohio. I am not on this committee.

Mr. HOWARD. I know; but you are on the other.

Mr. KEY of Ohio. I would like to ask the gentleman if he has read the report and the evidence carefully, and whether it is not shown in the report that the soldier who has been granted a rate of $40 per month, while he might be younger, is confined to his bed a greater part of his time. And does not the gentleman feel that if a soldier is down and out, so to speak, he is entitled——

Mr. HOWARD. Why, he has got chronic trachoma of both eyes, and curvature of the spine, and every other thing. What else could a man have the matter with him unless he was kicked in the face by a mule? [Laughter.]

Mr. FLOOD. Which one was that?

Mr. HOWARD. My old friend Young.

Mr. KEY of Ohio. That man who is to get the $40 rate is confined to his bed, while the other man is not confined to his bed.

Mr. HOWARD. I am not taking these two cases merely. I am taking into consideration other cases. They are all alike. I claim that we should pay equally, and that exact justice should be done to these men on the evidence you gentlemen have had submitted to you. That is what we are passing on.

Mr. LANGLEY. Mr. Speaker, will the gentleman yield?

Mr. HOWARD. Yes.

Mr. LANGLEY. The gentleman is in error about the facts in these two cases. One of the most important elements in these cases is whether or not a man needs the aid and attendance of another person. In one of these cases he does, and in the other he does not.

Mr. HOWARD. One of the important elements is how many sons they have who can vote. That is one of the most important elements. [Laughter.]

Mr. LANGLEY. It may be so with the gentleman from Georgia, but I have never considered that. The old fellows are in need, and more so if they have no sons, and I want to help the needy.

The SPEAKER pro tempore. The time of the gentleman from Georgia has expired.

Mr. HOWARD. Mr. Speaker, I ask for five minutes more. I have been interrupted so much that I could not say what I wanted to say.

The SPEAKER pro tempore. The gentleman from Georgia asks unanimous consent to proceed for five minutes more. Is there objection?

There was no objection.

Mr. GOODWIN of Arkansas. Mr. Speaker, will the gentleman yield there?

Mr. HOWARD. Yes.

Mr. GOODWIN of Arkansas. My colleague speaks as though he were on intimate terms with his pensioner by calling this man Young his "old friend." Was the gentleman from Georgia a comrade in arms with Mr. Young? [Laughter.]

Mr. HOWARD. I will tell you. I come from the part of the country that fought these old fellows; my folks did. They did face the music, and these old fellows faced an army of as brave men as ever shouldered a musket. Now, if they served their flag and defended it courageously and discharged their duties conscientiously, at this late day when every infirmity that could be inflicted upon them has visited them, the gentlemen on these pension committees have got no right and they ought not to be given the power by an American Congress to discriminate between these old men and make fish of one and fowl of the other.

Mr. ASHBROOK. Now, Mr. Speaker, will my friend allow me a word right there?

Mr. HOWARD. That is the iniquity of your system. That is the reason it ought to break down. That is the reason why I prayed, when the Sherwood pension bill was passed—that it would break down. It ought to be stopped. I would cheerfully vote to-morrow morning for a general bill to pay all these old soldiers $50 a month in preference to having them dragged in here four or five times a year and having their cases hurriedly considered and having inequalities meted out to them. An injustice is done to them. Then, when the campaign comes on—let us be plain about this, gentlemen—here is my dear old Democratic friend running against my dear old Republican friend, and the issue is, "If you send me to Congress I will get that pension increased." The Democrat comes along and says, "You send me, and I will get you more money than the Republican got." That is the issue. It is a political football to play with.

Mr. ASHBROOK rose.

Mr. KEY of Ohio. Mr. Speaker, will the gentleman yield?

Mr. HOWARD. Yes.

Mr. ASHBROOK. I was endeavoring to get the gentleman to yield to me.

Mr. HOWARD. I will yield to the chairman, since he has much more superior knowledge of these bills than any other gentleman. [Laughter.]

Mr. ASHBROOK. I want to call my friend's attention to the fact that the soldier who received $40 served 1 year and 10 months, while the soldier who receives $36 served 1 year 1 month and 10 days. In addition to that the soldier who receives $40 requires the attention of a nurse, and he had a fractured skull. I think if the gentleman will carefully read the evidence in the two cases he will see that the soldier who is to receive $40 had a longer service and is worse off than the one who is to receive $36.

Mr. HOWARD. Well, I know some men who get along just about as well without any skull at all. [Laughter.]

But the question of inequality comes in here. That statement says that both these poor old fellows are down; they are bedridden; and you are discriminating against my old friend Young, and when that case is reached, as I said before, I am going to try to correct it if I can.

Now, there was some talk about these 17 or 18 cases coming in here, brought in by members of the committee. That is a perfectly natural thing. I had a similar experience, gentlemen, when I had the honor to serve on the Committee on Military Affairs two or three or four years ago. Because Members were on the Committee on Military Affairs they had brought to them many questions of clearing up desertions and putting soldiers in statu quo, on the list of the roll of honor, and putting on that roll an old man that ran like a scared cat and deserted his country and hid in a dry well and pulled the moss in on him during the conflict, and then wanted his record cleared. [Laughter.] I noticed that the members of the Committee on Military Affairs, from whereabouts these gentlemen existed, introduced more bills than all the balance of the House together. But that was natural.

Mr. MADDEN. They would get consideration?

Mr. HOWARD. Of course they would get better consideration and quicker consideration and more favorable consideration.

The SPEAKER pro tempore. The time of the gentleman from Georgia has again expired. The pro forma amendment is withdrawn. The Clerk will read.

The Clerk read as follows:

The name of Benjamin G. Young, late of Company C, Eighty-seventh Regiment Indiana Volunteer Infantry, and Company E, Thirteenth Regiment Iowa Volunteer Infantry, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

Mr. HOWARD. Mr. Speaker, I move to amend, in line 2, on page 18, by striking out "$36" and inserting "$40."

The SPEAKER pro tempore. The Clerk will report the amendment offered by the gentleman from Georgia.

The Clerk read as follows:

Amendment offered by Mr. HOWARD: Page 18, line 2, strike out $36 and insert $40.

Mr. HOWARD. Mr. Speaker and gentlemen, in support of my amendment I want to state to you that this is my old friend, Benjamin G. Young, of Indiana.

Now, gentlemen, this is a clear, clean-cut case of doing justice between these two men, and I want you gentlemen who have the report of this committee in your hands to turn to page 24 and page 35 of the report. You will see on page 34 the case of Franklin M. Joines, who is 72 years old, while this poor old man, Benjamin G. Young, is 6 years older.

The man who is 72 years old has a cracked skull, while this man 78 years old has a curved spine. Some of you medical men here—for instance, the distinguished gentleman from Illinois, Dr. FOSTER—can tell us which is worse, a cracked skull or a bent spine. [Laughter.]

Mr. FOSTER. It depends on the value of what a man has in his skull, does it not?

Mr. HOWARD. If it depended on the value of what a man has in his skull and what he has to protect by his skull, I know some folks who would be skull-less. [Laughter.] But that is not the question. It is a question that means a heap to this poor old fellow, and I appeal to you to open your hearts and vote for my amendment. Four dollars a month does not mean much to some of these bloated bondholders around here, but it means a heap to a poor old fellow over in the mountains of Kentucky or Tennessee, or the red hills of Georgia, who lives in a log cabin, and when he sees a piece of bread made out of flour, in the shape of a biscuit, puts a coal of fire on it to see if it will not crawl away like a terrapin, because it is so seldom that he sees one. Those are the fellows that this $4 a month means much to. It is an injustice and an inequality that ought to be corrected. I would like one time to see the ironclad rule of the infallibility of this distinguished committee defeated on the floor of this House. I will have something to say about the bill of the other gentleman from Ohio [Mr. KEY] when it comes in. He deals with a Spanish-American War veteran, but this gentleman is dealing with a class that are more infirm. They did not fight mosquitoes, like most of us did in the Spanish-American War, but they fought real men. In all seriousness, this is an injustice, and I ask you, gentlemen, to support my amendment and make the heart of our dear old friend, Benjamin G. Young, away over in the corn belt of Indiana, leap with joy at the news that a man who was not on the committee, a man who came from south of the Ohio and the Potomac Rivers, found his case stowed away among several others, presented it to the generous sunlight of the American House of Representatives, and that from all sections they rallied to his flagstaff and gave the old man this $4 a month. [Applause.]

Mr. ASHBROOK. Mr. Speaker, I dislike very much to oppose anything suggested by my charming and delightful friend from Georgia [Mr. HOWARD]. I dislike very much to oppose an increase in the pension of a worthy soldier; but in these two particular cases I want to invite the attention of the House to the fact that the soldier who is given the $40 served almost twice as long as the soldier who received the $36.

Mr. HOWARD. Excuse me, Mr. Speaker, I know the gentleman wants to be fair. He talks about "twice as long."

Mr. ASHBROOK. I said "almost twice as long." I qualified it by saying "almost." The $40 man served 1 year and 10 months and the $36 man served 1 year 1 month and 10 days.

Mr. HOWARD. I stand corrected. I misread it. I thought it was 1 year and 10 months in each case.

Mr. ASHBROOK. I want to say to the House that these bills are carefully prepared by an examiner detailed from the Pension Office. He goes carefully over the evidence submitted conscientiously and makes a fair, unprejudiced, and unbiased report; and the committee, unless it feels—as it seldom does—that an error has been made by the pension examiner as to the rating, accepts his recommendation.

I think it is a mistake to offer these amendments on the floor of the House. If such amendments are adopted and the bill is allowed to be amended on the floor of the House, in a very short time it will be an impossibility to pass an omnibus pension bill. And because the soldier who receives $40 served longer and requires an attendant, his case is a better one by far than that of the soldier who receives $36, and I hope the House will vote down the amendment offered by the gentleman from Georgia [Mr. HOWARD].

Mr. RUSSELL. The gentleman from Iowa [Mr. HULL] introduced this bill, did he not?

Mr. ASHBROOK. Yes.

Mr. RUSSELL. And so far as the committee knows he is perfectly satisfied with the action of the committee?

Mr. ASHBROOK. Yes.

Mr. HOWARD. Of course the gentleman from Iowa [Mr. HULL], who is a very active Member of the House, happens to be in some of the departments on official business, and I do not see him here at this moment, but if he were here I know he would be delighted to help in getting this old gentleman's pension increased. I do hope the House will agree to the amendment.

Mr. ASHBROOK. Let us have a vote, Mr. Speaker.

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from Georgia.

The question being taken; on a division (demanded by Mr. HOWARD) there were—ayes 35, noes 38.

Mr. HOWARD. I ask for tellers, Mr. Speaker.

Mr. ASHBROOK. I hope the gentleman will not do that.

Mr. HOWARD. I withdraw the demand. I will get the amount increased in the Senate, where all the increases are put on.

The Clerk read as follows:

The name of Samuel A. Bennett, late of Battery B, First Regiment Rhode Island Volunteer Light Artillery, and pay him a pension at the rate of $36 per month in lieu of that he is now receiving.

Mr. ASHBROOK. Mr. Speaker, I offer the following amendment.

The Clerk read as follows:

Page 20, line 18, after the word "First," strike out the word "Regiment."

The amendment was agreed to.

The Clerk read as follows:

The name of Silas C. Robbins, late of Company E, First Regiment Minnesota Volunteer Heavy Artillery, and pay him a pension at the rate of $30 per month in lieu of that he is now receiving.

Mr. WALSH. Mr. Speaker, I move to strike out the word "Regiment" in line 20, page 31. This would seem to be the same amendment offered by the chairman to the item on page 20, line 18.

Mr. ASHBROOK. This is a regiment of Heavy Artillery, and the other was a battery of Light Artillery. This is correct.

Mr. WALSH. Mr. Speaker, I withdraw the pro forma amendment.

The Clerk read as follows:

The name of Clem Bolan, late of Company E, Twentieth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $17 per month.

Mr. WALSH. Mr. Speaker, I move to strike out the last word. Can the chairman inform the committee how many of the cases included in this measure are cases of increase of pension and how many are original pensions which have heretofore been rejected by the Pension Department?

Mr. ASHBROOK. For soldiers' claims 2 are new, original, and 163 are increases. There are 15 original cases and 2 for helpless children.

Mr. WALSH. These facts do not appear in the report.

Mr. ASHBROOK. There is no summary.

Mr. WALSH. No summary of figures such as the gentleman has just given?

Mr. ASHBROOK. No.

The Clerk completed the reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ASHBROOK, a motion to reconsider the vote whereby the bill was passed was laid on the table.

Mr. KEY of Ohio. Mr. Speaker, I call up the bill H. R. 9506, granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors. I ask that the first reading of the bill be dispensed with.

The SPEAKER pro tempore. The gentleman from Ohio asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

There was no objection.

Mr. KEY of Ohio. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection?

There was no objection.

The bill is as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of Frank Smith, late of Company D, First Regiment Idaho Volunteer Infantry, and Company C, Thirty-sixth Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $24 per month

The name of Charles Devault, late of Company I, Ninth Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Commodore H. Steele, late of Troop D, Second Regiment United States Cavalry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of George V. Deacon, late of Companies F and K, Fifteenth Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Henry C. Lichten, late of Company E, Eighth Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of George W. Rathman, late of the United States Navy, Regular Establishment, and pay him a pension at the rate of $17 per month.

The name of John F. Hemsted, late of the United States Navy, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Andrew S. Pope, late of Company M, First Regiment Arkansas Volunteer Infantry, War with Spain, and pay him a pension at the rate of $30 per month.

The name of Pearley Rex Harbert (insane), late of the United States Navy, Regular Establishment, and pay him a pension at the rate of $30 per month. Pay to the duly appointed guardian.

The name of Harry E. Snyder, late of Company H, Eighth Regiment Pennsylvania Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of William D. Galligher, late of Troop F, First Regiment United States Volunteer Cavalry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Ambrose R. Kinley, late of Company C, First Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Henry J. Hopkins, late of Troop H, Fourteenth Regiment United States Cavalry, and Hospital Corps, United States Army, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Silas J. Shumaker, late of Battery G, Fifth Regiment United States Artillery, War with Spain, and pay him a pension at the rate of $17 per month.

The name of Byron W. Kash, late of Company D, Thirtieth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $17 per month.

The name of Hoyl N. Higdon, late of the United States Navy, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Mathias Kennedy, late of Company K, Tenth Regiment United States Volunteer Infantry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Thomas Regan, late of Company H, Second United States Infantry, Regular Establishment, and pay him a pension at the rate of $50 per month in lieu of that he is now receiving.

The name of Jacob A. Buffington, late of Company H, Fiftieth Regiment Iowa Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month in lieu of that he is now receiving.

The name of Leroy E. Cuckow, late of Company K, First Regiment South Dakota Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of Theodore J. Kountz, late of Company G, First Regiment Ohio Volunteer Infantry, War with Spain, and pay him a pension at the rate of $24 per month

The name of Frederick E. Ogle, late of United States Navy, Regular Establishment, and pay him a pension at the rate of $17 per month.

The name of Edward F. Connors, late of Company D, Eighth Regiment Massachusetts Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of James F. Connell, late of Company A, Eleventh Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Robert B. Bowie, late captain of Company A, Fifth Regiment Maryland Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of Jesse H. Hutto, late of the United States Navy, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Lory M. Powell, late of Troop H, First Regiment United States Volunteer Cavalry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of Mack Rittenberry, late of Company A, First Regiment Alabama Volunteer Infantry, War with Spain, and pay him a pension at the rate of $72 per month in lieu of that he is now receiving.

The name of James O. Singleton, late of Company B, Second Regiment Oregon Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of Charles F. Russell, late of Company E, Third Regiment Georgia Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of James E. Norman, late of Company A, First Regiment Alabama Volunteer Infantry, War with Spain, and pay him a pension at the rate of $24 per month.

The name of Gilbert R. Gardner, late of Company E, Sixth Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Walter R. Taylor, late of Company G, First Regiment Missouri Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Charles D. Skirdin, late of Troop I, Fourth Regiment, and Troop I, Second Regiment, United States Cavalry, Regular Establishment, and Quartermaster's Department, and pay him a pension at the rate of $12 per month.

The name of Lewis J. Prime, late of the band, Nineteenth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $17 per month.

The name of Edward L. Eaton, late of Company K, First Regiment Maine Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Malvern E. Rodgers, late of Battery C, First Regiment United States Field Artillery, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Wheeler Smith, late of Company B, Second Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of John H. Dorsey, late lieutenant and assistant surgeon, Fourteenth Regiment Minnesota Volunteer Infantry, also major, Second Regiment Minnesota Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of Calvin J. Newman, late of Company A, Second Regiment West Virginia Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of George Rice, late of Battery L, Sixth Regiment United States Artillery, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Fred O. Hamilton, late of Company M, Fourth Regiment Missouri Volunteer Infantry, War with Spain, and pay him a pension at the rate of $50 per month.

The name of Fred Silvey, late of Company C, Forty-first Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of William H. Wharton, late of Troop M, First Regiment Illinois Volunteer Cavalry, War with Spain, and pay him a pension at the rate of $17 per month in lieu of that he is now receiving.

Mr. WALSH. Mr. Speaker, I move to strike out the last word. Can the chairman of the committee state how many of these claims are original and how many are increases?

Mr. KEY of Ohio. I can not give the gentleman that information. I came over to the House hurriedly this morning and did not have the clerk prepare a statement to that effect. I will say, as a general proposition, that the bills from our committee are original claims. As a rough estimate I should say that three cases out of every four are original claims.

Mr. WALSH. Mr. Speaker, I withdraw the pro forma amendment.

The Clerk read the last paragraph of the bill.

Mr. WILLIAMS. Mr. Speaker, I move to strike out the last word, and I ask unanimous consent to proceed for three minutes out of order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. WILLIAMS. Mr. Speaker, I merely rise to call the attention of the committee to a notable letter, a most patriotic and inspiring letter, written by an American father to his son, who is now serving under the British flag in a Canadian regiment in France. This young man, following the invasion of Belgium, tendered his services, as did thousands of other patriotic young men of this country, to the cause of the allies. He went over into Canada and volunteered, went with a Canadian regiment to the French front, where for many months he has distinguished himself as a brave and gallant soldier. On Christmas of this last year his father, a minister of the gospel, living at Paris, Edgar County, Ill., wrote to his son the letter which I have mentioned and which I ask the Clerk to read in my time.

The Clerk read as follows:

FATHER'S LETTER TO SOLDIER SON—NOBLE EPISTLE.

Here follows the copy of a letter Rev. H. M. Brooks mailed to his son, Homer Brooks, in the Canadian branch of the English Army:

"My Son: This is the fourth Christmas you have been away from us. We all miss you; your friends often inquire about you. I am glad that you are still alive and able to fight the brutes. I am praying that your life may be spared to continue the work of fighting the beast. I do not pray that you may be spared and other boys taken. That would be selfishness. But I pray that you may do your whole duty. I want you to live like a soldier and die like a soldier, if need be. I want you to maintain all the traditions of those thousands of Americans who have given their lives for liberty. The place where lies the dust of an American is sacred, the place where an American falls is holy ground, for he fights only for liberty. Much as I would like to see you, I would not call you nor hinder you from your task. I want you to fight so long as you have breath, so long as you are able to pull a trigger, throw a bomb, wield a sword, or thrust a knife. I want you to stay with your task. Let there be no cessation on your part so long as there remains a brute to mutilate a child, to crucify an officer, to rape a girl, to murder an old man or woman, or burn out the eyes of the helpless.

"Hoping that you may be blessed with health and a disposition to fight to the last breath and that you will trust God, who is able and willing to care for you, and that you may be spared to finish your task and that you may return to us that we may see you again in this life, I am,

"Very kindly,

"H. M. BROOKS."

The pro forma amendment was withdrawn.

The SPEAKER pro tempore. The question now is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. KEY of Ohio, a motion to reconsider the vote whereby the bill was passed was laid on the table.

Mr. KEY of Ohio. Mr. Speaker, I call up the bill (H. R. 9611) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors. I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. KEY of Ohio. Mr. Speaker, I ask unanimous consent that the first reading of the bill be dispensed with.

The SPEAKER pro tempore. The gentleman from Ohio asks unanimous consent to dispense with the first reading of the bill. Is there objection?

There was no objection.

The bill is as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of Fred Tish, late of Company F, Seventh Regiment Ohio Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of James O. Carroll, late of Company K, Second Regiment Arkansas Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of William H. Hopkins, late of Troop E, Fourth Regiment United States Cavalry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Isaac Daniel Gibson, late of Troop C, Sixth Regiment United States Cavalry, War with Spain, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of William Hopkins, late of Company F, Thirty-eighth Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of J. William Lambright, late of Troop H, First Regiment Ohio Volunteer Cavalry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Pickens C. Cullum, late of Company I, Third Regiment Virginia Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Elizabeth A. Kells, dependent mother of Ralph W. Kells, alias Robert W. Kells, late of Company L, First Regiment Nebraska Volunteer Infantry, War with Spain, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The name of Grant Barnett, late of United States Military Academy detachment of Cavalry, and Troop B, Ninth Regiment United States Cavalry, Regular Establishment, and pay him a pension at the rate of $12 per month.

The name of Joseph Smolen, late of Battery F, Third Regiment United States Field Artillery, Regular Establishment, and pay him a pension at the rate of $17 per month in lieu of that he is now receiving.

The name of Leo Tucker, late of Company M, Sixth Regiment Illinois Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Peter Kanuk, late of Battery M, First Regiment United States Artillery, War with Spain, and pay him a pension at the rate of $12 per month.

The name of William B. Smith, late of Company G, Third Regiment Georgia Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Jessie G. Frier, late of Company L, First Regiment Florida Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Noah P. Janes, late of Company I, Eighteenth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $17 per month.

The name of Michael P. Connaughton, late of Company E, Sixth Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of George W. Sanders, late of Company E, Third Regiment, and Twenty-ninth Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of Charles H. Birley, late of Company I, Sixth Regiment Illinois Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of William A. Ellis, late of Company G, Fifth Regiment Pennsylvania Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of Sommers J. Love, late of the Seventh and Ninth Companies of the United States Volunteer Signal Corps, War with Spain, and pay him a pension at the rate of $24 per month.

The name of Franklin C. Weaver, late of Company B, Tenth Regiment Ohio Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Charles A. Walters, late of Company G, First Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $24 per month.

The name of Charles F. Burton, late of Company I, One hundred and fifty-eighth Regiment Indiana Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Clyde A. Klinger, late of Battery L, First Regiment United States Artillery, War with Spain, and pay him a pension at the rate of $17 per month.

This bill is a substitute for the following House bills referred to said committee:

H. R. 512. Fred Tish.
H. R. 893. James O. Carroll.
H. R. 993. William H. Hopkins.
H. R. 1142. Isaac Daniel Gibson.
H. R. 1192. J. William Lambright.

The name of Jessie G. Frier, late of Company L, First Regiment Florida Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Noah P. Janes, late of Company I, Eighteenth Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $17 per month.

The name of Michael P. Connaughton, late of Company E, Sixth Regiment United States Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of George W. Sanders, late of Company E, Third Regiment, and Twenty-ninth Regiment United States Volunteer Infantry, War with Spain, and pay him a pension at the rate of $17 per month.

The name of Charles H. Birley, late of Company I, Sixth Regiment Illinois Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of William A. Ellis, late of Company G, Fifth Regiment Pennsylvania Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month in lieu of that he is now receiving.

The name of Sommers J. Love, late of the Seventh and Ninth Companies of the United States Volunteer Signal Corps, War with Spain, and pay him a pension at the rate of $24 per month.

The name of Franklin C. Weaver, late of Company B, Tenth Regiment Ohio Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Charles A. Walters, late of Company G, First Regiment United States Infantry, Regular Establishment, and pay him a pension at the rate of $24 per month.

The name of Charles F. Burton, late of Company I, One hundred and fifty-eighth Regiment Indiana Volunteer Infantry, War with Spain, and pay him a pension at the rate of $12 per month.

The name of Clyde A. Klinger, late of Battery L, First Regiment United States Artillery, War with Spain, and pay him a pension at the rate of $17 per month.

Mr. WALSH. Mr. Speaker, I move to strike out the last word for the purpose of asking the chairman of the Committee on Pensions a question. Is it necessary before the Committee on Pensions will consider a claim for a pension under its jurisdiction that the claim should have been presented to the Pension Bureau and should have been rejected?

Mr. KEY of Ohio. Yes.

Mr. WALSH. The rule is the same then as with the Committee on Invalid Pensions?

Mr. WALSH. I can not presume to speak for the rules of the Committee on Invalid Pensions, but the Committee on Pensions has a rule that the claim must have been presented at the Bureau of Pensions and must have been rejected within a reasonable length of time—a year and a half or two years.

Mr. KEARNS. Mr. Speaker, I think that statement possibly is misleading. If the claim has ever been presented to the Pension Department and been rejected there because of no disability shown, then it is not necessary to present that claim at the Pension Department again, even if 15 years have elapsed.

Mr. KEY of Ohio. I had in mind and I took it for granted that the gentleman had in mind claims for increases.

Mr. KEARNS. If it is a claim for an increase, then it must have been heard within the last two years at the Pension Department.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. KEY of Ohio, a motion to reconsider the vote by which the bill was passed was laid on the table.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. FLOOD. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 9314, the Diplomatic and Consular appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the Diplomatic and Consular appropriation bill, with Mr. HUMPHREYS in the chair.

The Clerk reported the bill by title.

Mr. FLOOD. Mr. Chairman, I will ask the gentleman from Wisconsin to use his time.

Mr. COOPER of Wisconsin. Mr. Chairman, I yield 10 minutes to the gentleman from Washington [Mr. JOHNSON].

Mr. JOHNSON of Washington. Mr. Chairman, as one of the small number of Congressmen who went unofficially to the battle fronts in France and Belgium last fall, I am glad to make use of the few moments tendered to me by the gentleman from Wisconsin [Mr. COOPER] for the purpose of presenting a few statements as to the cost of the great war in men. Later, when the pressure of business on the floor and in the committee rooms is not so great I hope to secure time in which to make some general remarks as a result of my observations in England, France, and Belgium.

It will interest the Members to know that while our party was abroad we were informed that during the short period while Belgium checked and delayed the German invasion France raised and equipped an army of more than 7,000,000 men. Think of it! France had a population at that time of 39,000,000. She succeeded in placing 7,000,000 men under arms. Her total man power—that is, men between the ages of 18 and 45—at that time was 9,000,000. Seven men out of every nine in France took up arms during the first weeks of the war.

Since that fateful day in 1914, when the German Empire started to force the world to its belief that might makes right, France has added 2,000,000 men to her first stupendous enrollment, so that her total enlistments have been 9,000,000, or as many as her total man power—18 to 45—at the beginning. That means that France has placed in her armies almost every boy who has become of military age since the beginning of the war.

What is the enlisted strength of France now? Mr. Chairman and gentlemen, France now has, or rather had, at the end of three years' fighting, 6,000,000 men in her army. And that 6,000,000 represented 92.34 per cent of her present man power. Is not that a most astonishing statement? Of all the men available for war purposes in France at the present time, 92.34 per cent are with the colors. [Applause.]

France had lost in killed at the end of three years 1,580,000 men, or 17.56 per cent of her total enlistment. In permanently wounded, the French loss is given at 921,328, or 10.24 per cent of her total enlistment. Her captured or missing amounted, at about the 1st of last July, to 696,548, or 7.74 per cent. I doubt if the people of the United States, even with the knowledge that has come during the raising of our own great Army, can realize what France has done in putting men into her army or comprehend the losses which she sustained in checking the invading army of Germany, and which she finally turned back 20 miles from Paris.

Mr. Chairman, Gen. Joffre, after retreating slowly from the frontier, fighting all the way, told his men to stand and die at the Marne. His brave soldiers stood, but they did not all die. They turned the Battle of the Marne into a victory and forced the Germans to fall back. And when the Germans fell back there began the retreat of monarchies before democracies, which continues and shall continue until victory is ours. [Applause.]

Mr. LONGWORTH. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Washington. Yes; with pleasure.

Mr. LONGWORTH. The statement as the enormous percentage of men placed by France in her armies is most interesting. Has the gentleman similar figures with reference to Great Britain?

Mr. JOHNSON of Washington. Yes.

Mr. LONGWORTH. I would like to hear the comparison.

Mr. JOHNSON of Washington. I shall be glad to state the figures, but before doing so I think we should remind ourselves that Belgium and France were forced to do nearly all of the fighting the first year. Belgium stood against the invading hordes until she was well-nigh exhausted, reduced to a fighting force of little more than 160,000 men, and, mind you, Belgium had a population of 7,600,000 and fighting men in proportion.

Then France took up the great struggle, and in one year wrote the greatest page ever written in history. The Battle of the Marne will stand out as the great decisive battle of the world. [Applause.]

England sent to France as quickly as possible most of her regular army—an expeditionary force of 160,000 men—the "contemptible little army," as the German Emperor called it. That army was almost annihilated. It fought at Mons and at the first battle of the Ypres, and helped to roll the invaders back from the Marne. One division went into battle 12,000 strong, with 400 officers. It came out 3,000 strong, with 50 officers. By the end of November hardly a man of England's "old" army was left. But France was saved. England's expeditionary force played its part in checking the carefully prepared and long-premeditated invasion.

Now comes the winter of 1914 and spring of 1915; England's Army wiped out, Great Britain unprepared, just as the United States was unprepared last spring. France fought on almost alone that winter and nearly all that next year. The men of France died and, perishing, saved Europe.

As quickly as possible Great Britain raised a large army. The figures show that the man power of Great Britain at the beginning of the war—that is, men between the ages of 18 and 45—was 12,000,000. The present man power is 11,000,000. The total men enlisted by Great Britain are 6,000,000, according to calculations made about the 1st of last August; the present men enlisted, 5,000,000. The present enlistment percentage of present man power is 45.45 per cent. Those figures include Great Britain and not the colonies. When we come to the list of men killed the colonies are included. The number given killed for Great Britain and the colonies is 298,988; in round numbers, 300,000. That is a percentage of the total enlistment of 4.98; seriously wounded, 177,224, or 2.95 per cent; captured or missing, 184,452.

Let me clear up a misunderstanding which prevails concerning Great Britain and the colonies. How often do we hear it said throughout the United States that the British Empire has raised a great army, but that England has held back her troops and permitted the troops of Canada and Australia to do the fighting and the dying. Ah, gentlemen, the troops of the colonies have fought gallantly and died nobly, but have not been sacrificed out of proportion to the troops of the rest of the British Empire.

Our party of Congressmen abroad had the pleasure of hearing Mr. Lloyd-George in the House of Commons pay a tribute to the armies of the British Empire, and in the course of his remarks he said that of the great armies furnished by the British Empire England had contributed 75 per cent and England had sustained 75 per cent of the losses.

To make the words of that distinguished statesman quite clear in this country I think it well to say that when one says Great Britain one means the British Isles; when one says Scotland one means Scotland; when one says England he means England alone, not Scotland, Wales and Ireland; and when one says the Empire one means the British Isles, the dominions, Australia, New Zealand, South Africa, and all the possessions that go to make the entire British Empire. In passing let me state that Canada had contributed to August 1 last between 700,000 and 800,000 men to the Empire's force, or fully five times as many as the original expeditionary force sent from England to France.

What a treat it was to hear Great Britain's prime minister that day in his tribute. He said that since the beginning of the war 13,000,000 men of Britain and her allies had crossed and recrossed the seas and that the losses at sea had been only 3,500, with 2,700 of these alone due to action of the enemy. Great Britain has guarded well her transports. That statement is of particular interest to-day, when we have just learned of the torpedoing of the British ship *Tuscania*, with 2,100 brave American soldiers on board, all of whom, except 200, have been snatched from the sea by intrepid British destroyers. [Applause.]

Mr. Chairman, there sits in the gallery of this House to-day a visitor from the district I have the honor to represent. She is the mother of three boys who are with our armies. One was on the *Tuscania*. She has no news from him.

Her heartstrings are drawn tight. Her eyes are dry. She hopes he has been saved; but if he has gone to his long rest, she said to me that she would rather have him there at the bottom of the sea than alive and a slacker. Oh, gentlemen, with such mothers and such sons the United States can not fail to do its full part.

Mr. Chairman, some statistics are obtainable as to the man power and losses of Germany. At the beginning of the war the man power of Germany—men from 18 to 45—was 14,000,000; present man power, 9,400,000. Total men enlisted since the war began, 10,500,000; present enlistment, 7,000,000; present enlistment per cent of man power, 74.47; the number of men killed in the German armies amounted to 1,908,800 last July.

Mr. LONGWORTH. What was the last figure?

Mr. JOHNSON of Washington. The number of Germans killed up to about July 1, as best as can be computed, is given as 1,908,800.

Mr. LONGWORTH. That is about as much as Great Britain and France together?

Mr. JOHNSON of Washington. Just about. The figures show Germany to have lost about 30,000 more, on estimates to July 1, last year. Since August 1 the losses to all forces have been very heavy, but have not been reported except by Great Britain, which lost in killed, captured, and wounded 370,000 men in August, September, October, and November of last year.

Mr. FORDNEY. How many have the Germans lost in captured?

Mr. JOHNSON of Washington. Up to about July 1 last, captured, 704,000; seriously wounded, 958,000. Austria has had heavy losses also. That nation has enlisted 7,000,000 since the war began and now has 4,000,000 enlisted, or 35.87 per cent of her man power. She has lost in killed 849,000; seriously wounded, 540,673; captured or missing, 833,600.

Mr. Chairman, I have a statement of interest to make concerning the great number of men lost by France. I stated that the statistics show the French loss in dead alone to have been 1,580,000. Russia lost in dead alone 2,000,000. The combined losses in dead of all the armies, allies and enemies, are 6,829,576. So France and Russia have sustained more than one-half of all the losses in dead from three years of war.

Germany's greatest loss at one place was at Verdun. It is estimated that one-third of all her casualties occurred in and close around that great French fort. The party of Congressmen were privileged to visit that famous fort and the battle fields about it. We went down the slope on the far side of Verdun Hill, and as we were climbing the slope of Souville Hill, next beyond, the French general in charge stopped us, not far from the sky line, and said: "Gentlemen, this is as far as the Germans came in their tremendous assault on Verdun in February a year ago under the Crown Prince. If all those who fell dead in that terrible assault and all of those who perished in that magnificent defense were here now, dead on the ground, their bodies would be piled five deep on these slopes."

As he spoke, the general, with a wave of his arm, covered all of the ground within range of the eye. He said further: "The Germans are estimated to have lost 600,000 men in dead alone. The French lost in dead 400,000."

Gentleman, as we stood on those blood-soaked hills we were saddened beyond measure. We were not witnessing a battle, although the French were firing artillery shells over our heads, and from the other side of Souville Hill exploding shells were being sent our way. We were stunned at the statements of war's cost in human life. Two military cemeteries were there—one near the fort and one nearer the town. We were told that these cemeteries contained the bodies of 10,000 soldiers—all that could be found of that enormous number of dead. The rest, gentlemen, were shot away, either blown back to the elements by that tremendous fall of artillery shell or else lost under the scarred and pock-marked earth, which has been churned and turned over and over again to a depth in many places of 30 feet.

And yet, in spite of these tremendous figures which I have presented concerning loss of life, the actual death rate, as shown by the mortality records of the war, is not more than 45 per 1,000 per annum, or a loss of life of about 1 in 22 each year. The Committee on Public Information here in Washington recently gave out this statement:

Figures taken when the casualties were greatest in proportion to mobilized strength and combined with the highest proportion of deaths show losses to deaths from wounds and killed in action to be approximately 11 in every 1,000 of mobilized strength.

Mr. Chairman, one can not learn of these losses without being brought to deep reflection. One can not learn of the sufferings endured by Belgium without being saddened for a lifetime. One can not traverse the devastated portion of France and ever

expect to have that dreadful picture effaced from his memory. Our soldiers can not go and see and come back the same. Those whom God permits to return will come back to us saddened, deeply religious, and sympathetic for humankind as never before.

When one sees the horror of it all one cries out in anguish. One asks, Why must it be? Is it worth all the sacrifice? Yes; worth all that has been made and all that must be made. Oh, my friends, but for the heroism of Belgium, but for the sacrifices of France, but for the British Navy and the determination of Great Britain, but for the new vigor of Italy, but for the will of the United States to take up the fight for democracy in its last stand Prussia would now be mistress of Europe and by this very day have been hurling her spears at this hemisphere.

As we were leaving the Continent an aid to the King of Belgium gave us a little dinner in a shell-wrecked hotel in a Flemish town, which was even then being bombarded. The aid to Albert of Belgium proposed a toast to the President of the United States and the King of Belgium. The response was made by Representative STEPHENS of Nebraska. He spoke for all of the members of our party, and I believe that he spoke for all of the people of the great United States when he said:

> Now that the United States has drawn its sword, may that sword never be sheathed until the rights of these wronged peoples be restored to them and democracy made safe throughout the world.

[Applause.]

Mr. COOPER of Wisconsin. Mr. Chairman, I yield five minutes to the gentleman from Pennsylvania [Mr. MCFADDEN].

Mr. MCFADDEN. Mr. Chairman, I ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. MCFADDEN. Mr. Chairman, on Monday, February 4, the majority leader [Mr. KITCHIN] introduced in the House bill No. 9499, which is a bill prepared by the Secretary of the Treasury, to provide further for the national security and defense and for the purpose of assisting in the progress of the war and to provide credits, and so forth. Mr. Chairman, this bill was referred to the Ways and Means Committee of the House. It seems to me that this bill was referred to that committee in error. The bill is purely a banking proposition, and, in the opinion of many Members of the House, it should have been referred to the Banking and Currency Committee. The only claim that could possibly be put forward that this bill should be referred to the Committee on Ways and Means is that it carries with it some revenue legislation. I have carefully perused the bill and I fail to find wherein there is any revenue legislation in it. But in section 2 it says this:

> The capital stock of the corporation shall be $500,000,000, all of which shall be subscribed by the United States of America.

Mr. Chairman, I want to introduce a protest here against the reference of this bill. It would seem perhaps as if the Secretary of the Treasury, fearing opposition to this bill, saw fit to have it referred to the Ways and Means Committee. If the Secretary of the Treasury did that thing, and had that influence over the reference of a bill in the House, I think such action is subject to criticism.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. MCFADDEN. I will yield for a question.

Mr. MOORE of Pennsylvania. Does the gentleman think taking $500,000,000 out of the Treasury of the United States is a revenue proposition?

Mr. MCFADDEN. It is an appropriation, not a revenue matter.

Mr. MOORE of Pennsylvania. May I ask the gentleman whether he has any reason to believe that the Committee on Banking and Currency, or a majority of the members thereof, were in any way unfriendly to this proposition of the Secretary of the Treasury?

Mr. MCFADDEN. Well, it has been stated that perhaps there might be some opposition.

Mr. MOORE of Pennsylvania. Well, it has been observed that there will be some opposition to this measure. That has been publicly stated and some newspapers are editorially opposing it now, which, of course, have an influence when the time comes; but is there any reason to believe that a measure of this importance would not have been kindly received by the Committeee on Banking and Currency?

Mr. MCFADDEN. None whatever. I believe that that committee is the proper committee and to it this banking legislation should be referred. Now, I do not care to yield further, I have only a few moments.

Mr. MADDEN. I would like to ask one question. Will the gentleman kindly yield to me?

Mr. MCFADDEN. I will.

Mr. MADDEN. Does this corporation under the act, and the way in which it is to be organized, have the power to issue $4,000,000,000 of notes?

Mr. MCFADDEN. It would.

Mr. MADDEN. Which would be a charge on whom?

Mr. MCFADDEN. On the people of the United States.

Mr. MADDEN. Would it inflate currency to that extent?

Mr. MCFADDEN. It certainly would.

Mr. Chairman, I desire to point out that if the business enterprises of this country are in need of additional fixed capital, which they can not now procure because of the fact that the United States is monopolizing the entire money market, that if because of this reason the usual channels are closed and these industries are necessary to win the war and the United States wants to help finance their legitimate needs that it should be done by direct loan to such extent as the Congress of the United States may deem necessary, in the same way that we are financing our allies now. But to create an institution that will have the power to issue its notes to the extent of $4,000,000,000, such notes to be made for a period of from one to five years, and gives the privilege of rediscount by the Federal Reserve System, and thus through this process permit the issuance of Federal reserve notes which circulate as money, is nothing but the worst kind of inflation and will lead to ultimate disaster and ruin. If these needs which this bill aims to cover are for capital requirement, they should be restricted to capital, and no increase of credit facilities should be permitted which will provide so much inflation. Capital or credit used for the purpose of permanent investment, consumption, or waste, always has and always will lead to inflation, but used for the production of useful and necessary commodities will have precisely the opposite effect.

Please bear in mind that it is the use to which credit is placed that counts. The banker who lends his borrowed capital for the purchase of a permanent investment not only causes inflation but he also weakens the entire credit system, and if such unsound banking practice as is provided for in this bill be carried on extensively by the banking institutions of the country it is bound to result in the breaking down of our credit system, so also if a banker sells credit for the purchase of something to eat, something to wear, or something to have pleasure with, the result will be the same. That is consumptive credit, and it is something that is practically prohibited in Europe to-day.

The strength of the Federal Reserve System to-day is brought about mainly by the fact that its assets are liquid; that is to say, the bank confines its investments exclusively to short-time investments—15, 30, 60, and 90 day paper—and in some instances a small amount of paper on six months' time and acceptances. Now, the provision in this bill would permit these 12 Federal reserve banks to take directly and indirectly notes of this war finance corporation drawn on a much longer time, namely, one to five years. If the entire $4,000,000,000 worth of this paper were to be placed with our Federal Reserve System, and I believe this would be the ultimate result, to that extent the liquid assets of the Federal reserve banking system would be tied up in a slow investment which would represent fixed capital and is directly contrary to the whole principle of the Federal Reserve System.

The Federal Reserve System provides ample relief for just such emergencies as the present. Through the rediscount privileges—and I would now emphasize the fact that merchandise in its passage from its point of production to its point of consumption may be drawn against by successive holders in good faith, and each transfer may be made the basis upon which discount may be obtained through our present system. I therefore argue that through this source ample currency can be solely issued and no inflation will ensue. If the industries are in need of $4,500,000,000 at this time, it will be better that the Congress vote it direct and forbid the rediscount of notes issued for capital purposes, such as these notes certainly would be.

I would suggest that if the administration believes that inflation of this character is necessary to finance the war, that the more direct way would be to issue United States notes direct. Why attempt to deceive ourselves. This bill is just as wild a scheme as the issuance of United States notes would be.

Mr. FLOOD. Mr. Chairman, I yield 10 minutes to the gentleman from Alabama [Mr. HUDDLESTON].

Mr. HUDDLESTON. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. HUDDLESTON. I yield back the time to the gentleman from Virginia.

Mr. FLOOD. Mr. Chairman, I yield 15 minutes to the gentleman from Illinois [Mr. RAINEY]

THE SOUTH DAKOTA SOCIALISTS AND THE CITY OF MITCHELL.

Mr. RAINEY. Mr. Chairman, on Friday of last week, at the demand of the national secretary of the Socialist Party, the gentleman from New York [Mr. LONDON] proceeded to read into the RECORD a story of the alleged breaking up of a State Socialist convention in South Dakota and the violent deportation of one of its delegates from the city of Mitchell, where the convention was held. The national secretary requested the gentleman from New York, and he read his request into the RECORD, to denounce, to "unmask the capitalist anarchists who are parading under the mantle of democracy," and to do it here in the Congress of the United States. The gentleman from New York proceeded then to do it by reading into the RECORD the statement of W. C. Rempfer, the deported delegate, and then continued, in obedience to the command of the national secretary, to denounce the alleged breaking up of this convention as a "dastardly act," as the "act of scoundrels," and then referred to "ignorant merchants and their clerks" who assume to act as censors and direct the breaking up of Socialist conventions.

I am not informed as well as some Members of this body as to the status of affairs in the great State of South Dakota, and I waited all day for some better informed Member of this body to explain on this floor the Mitchell incident and to defend the officials of that city and its citizens against the charges hurled against them from this high place. But no defense came. The next morning I myself wired the mayor of the city of Mitchell and asked him for the facts with reference to this occurrence. And I have received from him a letter which ought to be read into this RECORD, and I will proceed now rapidly to read it. It is as follows:

CITY OF MITCHELL, S. DAK., *February 2, 1918.*

Hon. HENRY T. RAINEY, M. C.,
Washington.

DEAR SIR: Your telegram dated February 2, 1918, received. I am sending to-night copies of our local papers and one paper from Rempfer's home town. These papers are in two bundles.

I was in Sioux Falls, attending a State council of defense meeting, on date of Rempfer incident in Mitchell. My chief of police telephoned to me that W. C. Rempfer was to talk in Mitchell in the morning of the 23d. I instructed the chief not to allow Mr. Rempfer to talk in Mitchell; not only to refuse him the use of the city hall for that purpose, but not to allow him to talk anywhere in the city. Mr. Rempfer was refused the privilege of speaking in Sioux Falls a few weeks prior to the occasion of his attempt to do so in Mitchell.

Gov. Norbeck of South Dakota had given instructions to not allow him to speak, on account of his unpatriotic utterances, anywhere in the State.

Mr. Rempfer chose a time for his Mitchell visit when the State council of defense meeting had been announced for Sioux Falls, and when he knew that the mayors of the cities of the State, chiefs of police, sheriffs, and other peace officers would be away from their respective places of duty to attend the council of defense meeting.

There was not one person who knew that there was to be a State Socialist meeting held in Mitchell. Not one paper published the call for such a meeting in our city. In my opinion it was to have been a Rempfer meeting, pure and simple. Should you desire information as to my personal responsibility for the foregoing statements, I respectfully refer you to Congressman CHARLES H. DILLON and United States Senator EDWIN S. JOHNSON, of South Dakota.

Thanking you for your inquiry, I remain,

Yours, very respectfully,

J. E. WELLS, *Mayor.*

From an examination of papers published in South Dakota, some of which were sent to me and some of which I obtained from the files of the Congressional Library, I find that this alleged Socialist convention did meet in the city of Mitchell on the afternoon of the 22d day of January and transacted its business. Mr. D. C. Bond, who was nominated at the convention as the Socialist candidate for Member of Congress from the first district, announced that a complete ticket was selected and that a platform was adopted. The next morning there came the order from the mayor of the city to prevent Mr. Rempfer from speaking, and the next morning, the morning of the 23d, the doors of the municipal hall were locked. Twelve or thirteen Socialists climbed over the transoms and opened the doors. When that happened the chief of police requested Mr. Bond to come down stairs and advised him as to the order he had received from the mayor and told him that the meeting could not go on with Mr. Rempfer as the speaker. The convention had finished its work; there remained nothing to do except to listen to the speech of a Socialist who had proven his disloyalty in the State of South Dakota. The Socialists then quietly left the hall. There was no lawless mob as the national secretary charges.

Mr. Rempfer was requested by the authorities to leave town, and he started for the train and got on the train, but as it started he got off and defiantly came back to town again, denouncing what he claimed to be an outrage against the Socialist convention and against free speech. At this time five gentlemen—their names are known to Mr. Rempfer—drove up in an automobile, put him in the automobile quietly and without the use of force, and took him 5 miles out of town and stopped in the road and said, "The road is good from here on to Ethan, 8 miles away. You walk the rest of the way and never come back to Mitchell." And he did. [Applause.] From Ethan he comfortably rode in an automobile the rest of the way to Parkston, where he lives, and there he loudly complained of his treatment, to such an extent that his bank—he seems to be a banker and a lawyer—the next morning was painted yellow by his fellow citizens of Parkston. The next afternoon on a train going through South Dakota there were 89 passengers who voted on the proposition as to whether or not it was wrong to take him out of Mitchell, and of that 89, 73 voted that it was right.

Now, I want to read from the platform adopted on this occasion by this alleged Socialist convention. After putting in the usual planks, to which no political party in any Republic in the world was ever opposed, the planks with which Socialists camouflage the real things for which they stand, they conclude as follows:

The foregoing are merely our immediate demands. They are only a beginning of our aims and missions. The overthrow of the present industrial system is what we stand for.

Now, the little amenities, the tolerance, extended in times of peace to the disturbers of the peace and to disloyal elements—and in this country the Socialists are a disloyal element—no longer prevail in time of war. There will be no more socialistic speeches made upon this floor that do not receive the reply they ought to receive here in this place. [Applause.]

This Mitchell convention, this platform, does not disavow the principles announced in the St. Louis platform of last April, upon which all the Socialists of the United States stand, except those who have been good enough Americans to repudiate it, a platform which denounces our entry into this war as a crime against this Nation and a crime against all the nations, a platform which discourses upon the exploitation of socialism in the United States, and then announces that Socialists will never take up arms except against their own exploitation. The most disloyal utterances that ever came from any political party in the United States are contained in the platform of the St. Louis convention of last April, and upon that platform they all stand. I have not heard my friend, the gentleman from New York [Mr. LONDON], disavow here or anywhere else the principles of the St. Louis platform. John E. Spargo, of Vermont, the greatest of all the American socialistic writers, is too good an American to be longer an American Socialist and to stand upon that platform, and he has withdrawn from the Socialist Party. [Applause.] The Socialist mayor of the city of Milwaukee is too good an American to be longer an American Socialist, and he has withdrawn from the Socialist Party and disavowed the St. Louis platform. [Applause.] Clarence Darrow, of Illinois, brilliant orator and great lawyer, is too good an American to stand on this Socialist platform. He is supporting the administration and supporting this war. [Applause.]

I have heard no disavowal from the gentleman, who represents all the Socialists in the United States in this body, of the principles of the St. Louis convention; not one. It is not sufficient to say that that platform was adopted in the heat of passion and that it was ill considered. Such a declaration as the St. Louis declaration, especially on the part of Socialists who desire longer to pose as loyal American citizens, must be denounced, and denounced in no sparing terms.

We have had on this floor in the immediate past a situation of legislative sabotage extending over an entire week of time. During that period of time the gentleman who represents here all the Socialists in this country indulged in a demand for roll calls, consuming one-sixth of the hours occupied in the legislative work of the sessions of that week in a useless calling of the rolls. Why, on Tuesday, the 22d day of January, the very day this alleged convention met up there in South Dakota, he called the roll on the question of going into the Committee of the Whole on the Agricultural bill. It took nearly an hour to do it. There were 344 yeas. Nobody was against it, and he knew that nobody was against it, and he voted for it himself. Now, if that is not legislative sabotage, if this is not the methods of the Industrial Workers of the World and of the Socialists injected into this body, I do not know what it is. [Applause.]

Not long before that he proposed to go into the districts of Members of Congress who refused to vote in time of war as they had voted in times of peace, to resign his position and show them up in their own districts; direct action this is—the direct action which the Industrial Workers of the World stand for, when they throw pieces of steel into the machinery of expensive sawmills in the forests of the Northwest. [Applause.]

On the day this alleged Socialist State convention for South Dakota convened, without public announcement, in the thriving, prosperous city of Mitchell, the State Council of Defense for South Dakota, presided over by the governor of South Dakota, convened in Sioux Falls. In order to indicate some of the problems with which the loyal citizenship of South Dakota and the peace officers have to contend in the present emergency I read from an address of Col. E. B. Harkins, of Aberdeen, S. Dak., at this meeting, as reported in the Daily Argus-Leader, of Sioux Falls, S. Dak.:

Many people through the State have no conception of the I. W. W. plots. We were called to trace them through the jungles of their eastern lairs. We found letters which were sent to the fire gang around the country, giving complete instructions how to use the phosphorus and linseed oil. Berg, the Aberdeen secretary of the I. W. W., was trailed. Packages of phosphorus were sent through the mails, the covers removed at Aberdeen, remailed there to Aberdeen. One package broke and the secret was out. Cyanide of potassium, enough to kill hundreds, was found.

GERMAN PROPAGANDA.

But it is the German-language newspapers that need our attention. Five editors were seized by the Government in Aberdeen Saturday. They had been sending over $30,000 to Germany through Bernstorff, and we have the latter's signed acknowledgment. We found two letters ready to mail in their office with $500 each for Germany. We do not know what it was for or where it came from, but we do know they did not give to the liberty loans, and they only gave $1 to the American Red Cross. In the office was a wrapped up American flag, hidden in a corner. In the home of one editor a picture of Bismarck, a picture of the Kaiser, and German dum-dum bullets were found. From the finger of the assistant editor of the paper the Government agents took a silver ring with the German cross on it and this inscription in German, "I give gold for this cross to show my loyalty to the fatherland." But did they give any gold for our country? I want to see the resolutions committee to-day take steps to have Congress suppress the German-language newspapers, and I do hope that not another one can be published in South Dakota—at least not another issue of the Deutsches Frei Presse.

I might in this connection call attention to the fact that Mr. Rempfer is regarded in South Dakota as being a leader among the Russian-Germans of Hutchinson County, in that State, who have been hindering the operation of the selective-draft law, and some of them, on account of their disloyal conduct and the bad advice they have been receiving, are at present serving prison terms, having been convicted in the courts of South Dakota for grave offenses.

The mayor of Mitchell and the peace officers of Mitchell have clearly discharged their duty and have executed the orders of the governor of South Dakota, evidently most wisely issued. I do not propose that they shall be called capitalist anarchists by the national secretary of the Socialist Party without some defense on this floor, and I deny that any convention in South Dakota has been broken up by a lawless mob. I never saw the mayor of Mitchell, S. Dak.; I do not know the peace officers of that city; I have no personal acquaintance with a single citizen of Mitchell; but I do know they are not scoundrels, as they have been denominated by the gentleman from New York on this floor, who claims to represent all the Socialists in the United States. I am speaking for the purpose of repudiating and characterizing as outrageous the terms applied to them on this floor by the gentleman from New York. They are not "ignorant merchants." The citizens of Mitchell, S. Dak., are loyal, patriotic, law-abiding citizens of a typically prosperous South Dakota city.

Not many years have elapsed since South Dakota was a border State, infested as border States were by a lawless element, and in those early days it became necessary sometimes to resort to strenuous methods in order to protect the lives and the property of the honest men who lived there; and during the period of this awful war we will find the communities of South Dakota ready to vigorously uphold the high ideals of American citizenship for which they stand, ready always to defend the flag, and I am not going to outrage them if they spew out from their midst disloyal elements.

Mr. Rempfer knows the names of the gentlemen, or can easily find out who they were, who saved him a part of his car fare on his journey back to Parkston. He has his recourse in the courts, but if I am able to judge aright, the sentiment in South Dakota toward him and toward other like disturbers, as expressed in the South Dakota newspapers, he will be amazed at the small size of the verdict he will be able to recover. He has not been injured by the people of Mitchell, S. Dak; his property interests are not there; but the people of that loyal South Dakota city do not propose to permit him, or men like him, to flaunt their disloyalty in the halls or in the streets of that beautiful city, and I do not blame them for feeling that way about it. If Mr. Rempfer and others representing the Socialist-Bolsheviki-I. W. W. element in South Dakota refuse to obey the requests of the police to "move on," there will always be found, I am sure, men of determination and courage who will see that the flag of this Republic is not defiled and trampled under foot in Mitchell, and what I have said of Mitchell will be true of every loyal community in this prosperous country of ours.

Sixty-six hours ago, as the sun went down, a great ship sailed into the waters of the Irish Sea, bearing on her decks 2,179 of the young men of America, and as the night closed in there came a shock which carried to all of them the news that a murderous projectile, fired by an unseen enemy, was plowing its deadly way through the very vitals of the ship.

From young officers there came the quick, sharp word of command which insured order, and on the decks of the slowly sinking ship the khaki-clad soldiers of the Republic quickly assembled, each man at his post of duty. In all human experience there is nothing so potent to chill the blood of brave men as a night alarm at sea, but these boys just out of the offices and factories and just from the farms of America stood like veterans on the deck as the great ship slowly sank. They could not fight back at an unseen, cowardly, treacherous enemy; but as the awful list to starboard commenced, while from high up on the upper deck there came the sharp crackle of the electric current which transmitted out over the waves the call for help, high above the crash of exploding boilers, above the crash of shattered lifeboats, above the noise of orders shouted through megaphones, above the shrieks of the dying, from 2,000 throats there rang out in grand swelling chorus through the winter night over the stormy sea, the national anthem of this great Republic—the defiance of the fighting men of America hurled at a cowardly foe. In that hour the iron entered their blood and they became—every one of them—grim, seasoned warriors, ready all of them to avenge the murder of the 14 boys who never had a chance to show how brave they were, and whose broken bodies on yesterday morning were washed up on the rockbound shores of the Irish sea.

We know now that our boys can stand shoulder to shoulder with the veteran warriors of Europe, doing their part in the battle for democracy. Whenever, over the ruined villages of northern France, the sun rises to kiss the flag of this great Republic, it will shine down upon the only army of a million men and more who have sailed across 3,000 miles of ocean to engage in a war not for conquest but a war for the rights of men.

It becomes the duty of those of us who are too old, and of those of our citizens who are too young to go to the trenches of France, to uphold here at home the traditions and the institutions for which our young men are ready to sacrifice their lives in this awful war, and the patriotic city of Mitchell, in the great State of South Dakota, will at all times when the boys are gone be able to discharge its full duty in the emergencies of this struggle.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. FLOOD. Mr. Chairman, I yield to the gentleman from Texas [Mr. JONES].

The CHAIRMAN. The gentleman from Texas is recognized.

Mr. JONES of Texas. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. FLOOD. I yield 10 minutes to the gentleman from New York [Mr. LONDON].

The CHAIRMAN. The gentleman from New York is recognized for 10 minutes.

Mr. LONDON. Mr. Chairman, I am not going to make any attempt to analyze the Socialist program within these 10 minutes. There is entirely too much misunderstanding, too much prejudice, too much ignorance on the subject to be dispelled even by a man of my brilliance within the limit of 10 minutes. [Laughter.] I shall therefore on some future occasion during the general debate ask for an hour in which to discuss the fundamental principles of the Socialist philosophy. What I would like to say to the gentleman from Illinois [Mr. RAINEY] is this: I shall be happy to hear every Socialist speech that I may attempt to deliver replied to; but I ask one thing; and that is that a man who replies to it must know something about the subject.

Mr. RAINEY. I shall be glad to attempt to reply to any speech the gentleman makes.

Mr. LONDON. The gentleman started out his defense of the South Dakota disturbers of the peace by convicting that petty little mayor of Mitchell, S. Dak., out of the mayor's own mouth. The gentleman stated he was not familiar with the subject. The fact that he was not familiar with a subject did not evidently prevent him from discussing it. He has attempted

to discuss socialism. I am willing, for my part, to spend an hour each day in the next year in undertaking to teach him the principles of socialism. I expect to be able to convince him that the history of his own country, of the liberty-loving American people, teaches the unvariable lesson that only a country in which every man has an opportunity to live a full and free life, the life of a free man, is a genuine democracy.

And it will not take him long to discover that political democracy is worthless unless it strives toward industrial democracy. Industrial democracy is coming. Mightier men than the gentleman from Illinois will be incapable of successfully resisting that wave. The gentleman recites a plank from the platform of the South Dakota Socialists which speaks about overthrowing the industrial system. Of course, they advocate the overthrow of the industrial system, but how? Through legislation, through political education, through enlightening the masses. And that is the fundamental difference between a Socialist and an anarchist.

The man who breaks up peaceful meetings, the man who abuses his authority as a public official to prevent an American from speaking is an anarchist and a violator of the law.

Against that little mayor and his defender, the gentleman from Illinois, who did not have a word of disapproval of mob rule, I ask you to hear what President Wilson has to say. I read from a speech delivered by President Wilson before the convention of the American Federation of Labor at Buffalo in November, 1917. This is what he says about mob rule. Here is what President Wilson said:

I have been very much distressed, my fellow citizens, by some of the things that have happened recently. The mob spirit is displaying itself here and there in this country. I have no sympathy with what some men are saying, but I have no sympathy with the men who take their punishment into their own hands, and I want to say to every man who does join such a mob that I do not recognize him as worthy of the free institutions of the United States.

Those are the words of the President of the United States, to whom the world listens to to-day. But the gentleman from Illinois rejects the counsel of the President and takes for his authority the mayor of Mitchell, S. Dak.

The President, continuing, says:

So I want to utter my earnest protest against any manifestation of the spirit of lawlessness anywhere or in any cause.

Why, gentlemen, look what it means. We claim to be the greatest democratic people in the world and democracy means, first of all, that we can govern ourselves. If our men have not self-control, then they are not capable of that great thing which we call democratic government. A man who takes the law into his own hands is not the right man to cooperate in any formation or development of law and institutions, and some of the processes by which the struggle between capital and labor is carried on are processes that come very near to taking the law into your own hands.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. LONDON. Yes.

Mr. MADDEN. Does the gentleman read that language to mean a statement by the President of the United States that he objects to the enforcement of law by the law officer of any community in this country?

Mr. LONDON. I take it that the President means to say that the conduct of any man who abuses the law is reprehensible, that an officer who is the trustee of the law, and an executive officer of our administrative branch of the Government, should be the last person in the world to violate the law; and I submit it to be an elementary proposition that to prevent a person from speaking because he offended at some time in the past is wrong. The law provides a penalty for each offense. We have no right to assume that a person will keep on violating the law, and on that assumption prevent him from speaking.

Mr. MADDEN. Does the gentleman yield?

Mr. LONDON. Yes.

Mr. MADDEN. Does the gentleman adhere to the principles enunciated in the Socialist convention at St. Louis?

Mr. LONDON. I said to the gentleman that I will not attempt in 10 minutes to make clear my interpretation of the Socialistic attitude.

Mr. MADDEN. Then the gentleman does not deny his adherence to the policy laid down?

Mr. LONDON. I do not know how the gentleman from Illinois understands it. I shall make clear what I understand to be the proper attitude of the Socialist movement in this great crisis of the war. I am not bound to take either the reasoning or the language of the gentleman from Illinois.

Mr. MADDEN. I only asked the gentleman whether he believes in the policy laid down in the platform of the Socialistic Party in its convention at St. Louis. The answer to that is a very simple one.

Mr. LONDON. I will take an hour for the purpose of explaining the Socialist attitude on the war as soon as I get a chance, and the gentleman can not get me to attempt to enlighten him in two minutes on a subject that should take an hour.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

The committee informally rose; and Mr. HAMLIN having taken the chair as Speaker pro tempore, a message, in writing, from the President of the United States, by Mr. Sharkey, one of his secretaries, who also informed the House of Representatives that the President had, on February 8, 1918, approved and signed joint resolution and bill of the following titles:

H. J. Res. 174. Joint resolution for the purpose of promoting efficiency, for the utilization of the resources and industries of the United States, for lessening the expenses of the war, and restoring the loss caused by the war by providing for the employment of a discovery or invention called the "Garabed," claiming to make possible the utilization of free energy; and

H. R. 195. An act providing for the sale of the coal and asphalt deposits in the segregated mineral land in the Choctaw and Chickasaw Nations, Okla.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

The committee resumed its session.

Mr. MADDEN. The gentleman refuses to deny his participation in the principles laid down?

The CHAIRMAN. The time of the gentleman from New York has expired. All time has expired, and the Clerk will read the bill for amendment.

The Clerk read as follows:

For secretaries in the Diplomatic Service, as provided in the act of February 5, 1915, entitled, "An act for the improvement of the foreign service," as amended by the act making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1917, approved July 1, 1916, to be immediately available, $339,355: *Provided*, That not more than $45,105 of said amount shall be used during the fiscal year ending June 30, 1918: *And provided further*, That secretaries in the Diplomatic Service shall hereafter be graded and classified as follows:

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph, and before presenting it I wish to make an inquiry whether in the consideration of this bill, and particularly of this paragraph and every one of the following items after line 15 down to line 2, page 4, they are to be considered as separate paragraphs?

The CHAIRMAN. The bill is a general appropriation bill, and will be considered by paragraphs.

Mr. STAFFORD. The Chair will notice that the following lines after the paragraph just read relate entirely to the matter affected by the paragraph under consideration. Of course, we can have the whole matter considered as one paragraph, or each line separately.

Mr. FLOOD. Let us have it considered all as one paragraph.

Mr. STAFFORD. Then, Mr. Chairman, I ask unanimous consent that the bill, beginning with line 4, on page 3, down to and including line 2, on page 4, be considered as one paragraph.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent that the bill, beginning with line 4, on page 3, down to and including line 2, on page 4, be considered as one paragraph. Is there objection?

There was no objection.

The Clerk read as follows:

Secretary of class 1, $3,500;
Secretary of class 2, $3,125;
Secretary of class 3, $2,500;
Secretary of class 4, $2,000;
Secretary-interpreter of embassy to Japan, $3,600;
Secretary-interpreter of embassy to Turkey, $3,600;
Secretary-interpreter of legation to China, $3,600;
Assistant secretary-interpreter to the legation to China, to be appointed from the corps of student interpreters, $2,000;
Assistant secretary-interpreter to the embassy to Japan, to be appointed from the corps of student interpreters, $2,000;
Assistant secretary-interpreter to the embassy to Turkey, to be appointed from the corps of student interpreters, $2,000;

Mr. STAFFORD. Mr. Chairman, I reserve the point of order on the paragraph just read. We have here an attempt upon the part of the committee to increase the salaries of the secretaries in the Diplomatic Service over that provided in the act of 1905 to the amount of $500 each for each respective class. Under that act the secretaries were divided into five classes ranging in salaries from $1,200 to $1,500 to $2,000 to $2,625 and $3,000. It is now proposed to drop the $1,200 class as the initial class, which has already been done in practice, and also to drop the second class of $1,500, and make the initial class $2,000. This increase by the committee has a more far-reaching effect than merely on the Diplomatic Service. It affects the policy of the Government as to whether this Congress should increase the salaries of the higher-priced officials to the extent of $500, and not only $500 from the beginning of the fiscal year, but as this bill provides, which is something unusual in the history of legis-

lation on appropriation bills, that the increases shall take effect immediately upon the passage of the bill. I know of no instance in legislative enactment where we have provided for an increase in salary in an appropriation bill where the salaries are to become immediately effective and not at the beginning of the fiscal year to which the bill relates.

Mr. TOWNER. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. Yes; I yield to the gentleman from Iowa.

Mr. TOWNER. Is it not true this makes it permanent law?

Mr. STAFFORD. That is the purpose.

Mr. TOWNER. Because the provision is "hereafter."

Mr. STAFFORD. That is the purpose. It was a change of classification of secretaries which was established in the act of 1905 after full consideration by this House, and changing it in a most decided manner, not only by establishing the lower classes as I have indicated but making the initial salaries of $1,200 and $1,500, $2,000, and increasing all the subsequent grades $500. And more. It also provides for the creation of secretary interpreters at certain embassies, namely Japan, Turkey, and China, officers who are not now in existence, and they were to have a salary of $3,600. It also provides for assistant secretary interpreters at different embassies to receive $2,000 compensation, which positions are not created to-day.

Mr. FLOOD. Oh, yes.

Mr. STAFFORD. Did I understand the gentleman to make a remark?

Mr. FLOOD. Those are in the law now.

Mr. STAFFORD. I beg the gentleman's pardon; I may be in error as to their not being in the law as far as assistant interpreters are concerned.

Mr. MILLER of Minnesota. The name has been changed slightly so as to make it conform to the exact service, but there are no new places created or increases of salaries.

Mr. STAFFORD. There are increases of salary in the classification——

Mr. MILLER of Minnesota. Certainly, the gentleman is correct in that; but the gentleman was speaking about the secretary-interpreters to these various legations.

Mr. FLOOD. Mr. Chairman, this section is undoubtedly subject to the point of order, if the point is made against it. It is the enactment of a law. Under the act of 1915, not the act of 1905, as my friend from Wisconsin [Mr. STAFFORD] thought, the secretaries in embassies and legations were classified. There were five classes—1, 2, 3, 4, and 5.

Mr. STAFFORD. It is stated right here in the bill that it is the act of 1915, and it was merely an inadvertence on my part in describing it as being 1905. It only strengthens my position, because it is much more recent than I stated on the floor.

Mr. FLOOD. The first class get $3,000, the second class $2,670, the third class $2,000, the fourth class $1,500, and the fifth class $1,200. As the gentleman stated, it is a fact that the fifth class has not been utilized by the State Department for the past year or more. This recommendation for an increase was made on account of the extraordinary high cost of living in the countries to which these men are accredited. The gentleman can readily understand that the cost of living all over the world has gone up enormously since 1915. This enactment reclassifies the secretaries, abolishing the fifth class, and makes four classes, increasing each class $500 a year.

Mr. COX. Will the gentleman yield?

Mr. FLOOD. Yes, sir.

Mr. COX. The gentleman says this increase is designed to meet the increased cost of living. Are not these secretaries entitled to a part of the post fund that Congress appropriated last year to help them out?

Mr. FLOOD. They are entitled to it, and most of them get it. Those in belligerent countries and countries contiguous to belligerent countries get it now. The purpose of this is to permit the State Department to give it to all.

Mr. COX. We have no secretaries in belligerent countries, have we?

Mr. FLOOD. Neutral countries contiguous to belligerent countries, and this bill proposes to allow the State Department to make allowance to the secretaries——

Mr. COX. A minute more——

Mr. FLOOD. I want to say to the gentleman they did not think that was sufficient to meet the extraordinary cost of living at those places.

Mr. COX. The secretaries of class 1 last year received a salary of $3,000. This year you propose to give a salary of $3,500——

Mr. FLOOD. Yes.

Mr. COX. Can the gentleman give the committee how much of the post fund was paid?

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. STAFFORD. Mr. Chairman, I believe I yielded the floor and the gentleman from Virginia has taken the floor. I did not make any claim to the floor.

The CHAIRMAN. The gentleman reserved the point of order.

Mr. COX. How many of this class 1 got a part of the post fund last year, and how much did they get out of it? Does the gentleman know?

Mr. FLOOD. I do not know how many, because when you come down to consider the fact there are not a great many countries in the world, except in South America, that are not contiguous, and even some of those are contiguous, to some belligerent country. I suspect a larger portion of them got some of it.

Mr. COX. Does the gentleman know how much allowance was made to each of them?

Mr. FLOOD. It depends upon the increased cost of living at the particular places. At Paris I think they got about 50 per cent of their salary.

Mr. COX. Is there any system of making these allowances based upon their salaries, or anything like that?

Mr. FLOOD. An investigation was made as to the per cent of the increased cost of living, and when that was ascertained, then that per cent of their salary was added from the post fund.

Mr. COX. That investigation, I presume, was made by our consul or ambassador?

Mr. FLOOD. Made by our State Department, and they acted, of course, upon information received from the ambassadors and ministers.

Mr. COX. Was the allotment then made by the State Department or by our foreign representatives abroad?

Mr. FLOOD. The allotment is made by the State Department. The information that the department had came, of course, from our representatives abroad; that is, the information as to the increased cost of living.

Mr. COX. Last year, if I recollect, this committee appropriated or recommended, and it finally became a law, a lump sum of something like $400,000 for this purpose?

Mr. FLOOD. Three hundred thousand dollars.

Mr. COX. Was all that sum used up?

Mr. FLOOD. Oh, yes.

Mr. COX. Now, then, the committee proposes to recommend something like $800,000?

Mr. FLOOD. Eight hundred thousand dollars; yes.

Mr. COX. I want to ask the gentleman if he does not feel that it would be fair to let these salaries alone and give these clerks the benefit of this post-allowance fund, so as to enable them to live there? In other words, not increase their salary, but give them a chance to live out of this post fund?

Mr. FLOOD. I will say frankly to the gentleman that my view of the increase of salaries—and I am giving my individual view, because my view did not agree with the majority of the committee—my view was that no salary ought to be increased during the war. I recognize, as every Member of this House must recognize, that something ought to be done for the gentlemen occupying these positions, owing to the increased cost of living, and that that should come out of the post-allowance fund, and when the war was over then we could take into consideration the question of these salaries on the broad ground as to whether they should be permanently increased or not. That was my individual view.

Mr. COX. Does the gentleman feel that his committee has been liberal in making a sufficient allowance in the post fund?

Mr. FLOOD. I think we made what was a sufficient post-allowance fund.

Mr. COX. Have you allowed substantially what the State Department recommended for you to allow?

Mr. FLOOD. I think so; yes. The recommendation from the State Department was that these salaries in class 1 should be increased to $5,000 a year. That matter was very thoroughly discussed by the Committee on Foreign Affairs, and they reached the conclusion it was too much, but that there ought to be some increase, and they voted to increase to $3,500.

Mr. COX. It strikes me, Mr. Chairman—and I do not want to do anything wrong here, and do not know anything about it except the report of the committee—that the chairman's position is well taken and that these salaries ought not to be increased while this war is going on. I am willing to vote, so far as I am personally concerned, any reasonable post fund that will take care of those people over there in order to meet these unusual conditions, but I am not in favor of increasing the salaries where they are now being paid $3,000 a year and up.

Mr. FLOOD. I assume from what the gentleman says that he or the gentleman from Wisconsin [Mr. STAFFORD] would want to make a point of order in reference to these salaries? Let me make this statement.

Mr. MILLER of Minnesota. Mr. Chairman——

Mr. FLOOD. Let me make this statement, and then I will yield to the gentleman from Minnesota.

In addition to the increased salaries in this item there is an amount of money carried for the purpose of adding 25 new secretaries, and something, I think, was said by the gentleman from Wisconsin about it being immediately available.

Mr. STAFFORD. Will the gentleman permit?

Mr. FLOOD. Yes.

Mr. STAFFORD. The report of the committee shows that the amount appropriated by the committee takes care of these increased salaries from the very time that bill becomes a law. It never has been done before.

The CHAIRMAN. The time of the gentleman has expired.

Mr. FLOOD. Mr. Chairman, I ask unanimous consent that I may be allowed to proceed for five minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that he may be allowed to proceed for five minutes more. Is there objection?

There was no objection.

Mr. FLOOD. Mr. Chairman, this item also carries a provision for increasing the number of secretaries by 25 and an appropriation to pay their salaries from the time this bill becomes a law to the 1st of July, and then for the next year. And I trust that that part of the section will not be objected to.

Mr. STAFFORD. Will the gentleman yield?

Mr. FLOOD. Yes.

Mr. STAFFORD. There is no disposition on the part of anyone here, I take it, to cripple in any way the State Department in meeting the present exigencies, but it is believed by some that it is not a good time to increase salaries of high-grade officials.

Mr. FLOOD. I must say that I can not take issue with the gentleman on that point.

Mr. SISSON. Mr. Chairman——

Mr. FLOOD. I yield to the gentleman from Mississippi.

Mr. SISSON. I will state that I am heartily in sympathy with the position the gentleman takes in the whole matter. In the consideration of the deficiency bill that is now before our committee, the Secretary of State and others came before us and made a complete statement as to the condition of the foreign service, and it was unquestionably true that in some sections of the world, and especially in South America, to my great surprise, the cost of living has gone up more enormously than perhaps anywhere else. And the subcommittee of the Committee on Appropriations, dealing with this in a deficiency bill, thought it wise to take care of it by increasing the post allowance, so that the increased cost of living might be taken care of as a matter of administration throughout the State Department, so at those places where the cost of living was extremely high they might be cared for out of the post allowance, and the question of salaries of these men should wait, as the chairman of the committee suggests, until after the war is over and until everything settles down, but that we would not punish our representatives in the foreign service by not taking care of this enormous increase in the cost of living. So I agree with the chairman of the committee and with the gentleman from Indiana [Mr. Cox], who has raised the question, that it can be best taken care of by a post allowance and as a matter of administration, rather than by a permanent increase of salary.

Mr. FLOOD. Mr. Chairman, I yield to the gentleman from Minnesota [Mr. MILLER].

Mr. MILLER of Minnesota. I wanted to take the floor when the gentleman from Virginia had completed, but not before.

Mr. FLOOD. I have finished.

Mr. MILLER of Minnesota. Then, Mr. Chairman, I ask to be recognized.

The CHAIRMAN. The Chair understands that a point of order has been made. The time on that has been consumed. Does the gentleman ask unanimous consent for five minutes?

Mr. MILLER of Minnesota. I do.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. MILLER of Minnesota. Mr. Chairman, I would like the attention of the chairman of our committee if I may have it. I sincerely trust that the distinguished and able chairman of our committee will not invite somebody to make a point of order on this paragraph, and I do not think he has done so.

Mr. FLOOD. I had no idea of doing that.

Mr. MILLER of Minnesota. I do not think he has done so, or intends to do so, notwithstanding what the gentleman from Mississippi [Mr. SISSON] has just said. I would be greatly honored if I could have the attention of the distinguished gentlemen who have criticized this—I refer to the gentleman from Wisconsin [Mr. STAFFORD] and the gentleman from Indiana [Mr. Cox]. I ask unanimous consent to pause until I can have the attention of the two gentlemen I have referred to. I trust that neither of the gentlemen will make a point of order on this, and for two reasons. They are very serious ones. In the first place, the Department of State recommended that the first-class secretaries get a salary of $5,000.

Mr. COX. Mr. Chairman, will the gentleman yield there?

Mr. MILLER of Minnesota. And that the secretaries of class 2 get somewhat less than that, and on down. You will observe that the increase granted by the committee is extremely moderate, about 10 per cent, or less than 15 per cent; a little over 10 per cent, with the exception of the fourth class.

Now, there was a great deal said, and with much reason back of it, against any increase now. The suggestion was to wait until after the war is over. That would be true with respect to most things in this country, but we are now dealing with foreign affairs. Anyone conversant with conditions throughout the world knows that the cost of living is going to be high, abnormally high, not only during the continuance of this war, but for many, many years afterwards. That consideration was in the minds of the committee when it granted this very mild increase, which is about the same as you are going to give elsewhere in the service.

Now, one thing more. Many of these men are constantly being solicited to leave the Government service and are offered very attractive salaries by business concerns. That has come to be a serious matter in the State Department. These men much prefer to remain in the service of the United States—and I am speaking now of the whole of them—provided the compensation is reasonable. They do not ask as much as private concerns would give them, or anything nearly as much. They ask for enough to live on and to remain in the Government service. Unless we give them enough to live on, they are bound to leave. The evidence before the committee was that many of the best men are likely to leave the service at a critical time because they can not live on their salaries. I understand gentlemen say they can be taken care of out of the post allowance. That is true; but nobody knows what moment that post allowance will be cut off or may be inadequate. In fact at this very minute it is inadequate and there is a big deficit for the current year.

Mr. FESS. When the Secretary was asked if they would leave, and whether it was difficult to find men trained for the service, he answered unequivocally that it would be very difficult and that the service would suffer intensely?

Mr. MILLER of Minnesota. Yes; and common sense and the experience of us all would say it is impossible to replace them, because these men are not an ordinary class of men that you can pick up here and there and elsewhere. They are trained and skilled, all excepting those in class 4. A man in Petrograd or in London or in Paris or in Rome to-day who is a member of class 1 or 2 is worth his weight in gold for United States interests. Those men are invaluable when we have billions and national honor at stake.

Mr. LONGWORTH. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Minnesota. Yes.

Mr. LONGWORTH. These are men who are put in charge of affairs now?

Mr. MILLER of Minnesota. Yes. I was just coming to that. They are really the men who do the business for Uncle Sam. They are handling matters of the most delicate nature and of most tremendous importance.

Now, gentlemen, I wish you could know how many of these men for three years and more have been working night and day and have been going down in their own pockets, so far as they had private means at their disposal, to pay their living expenses. I have had man after man tell me——

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. MILLER of Minnesota. Mr. Chairman, I ask unanimous consent that I may have five minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. MILLER of Minnesota. They have gone down in their private purse, when they had a private purse at their disposal, time after time, more than half the time during the past three years, to pay their every-day living expenses.

Now, what influenced me strongly in favor of this moderate increase of $500, in the first instance, is the fact that in normal times, peace times, it is necessary to pay a man in charge of legation work, who is practically in charge of the embassy—in other words, a secretary of class 1—$3,500. No man called to the responsibilities, social and otherwise, of that position can live on $3,500 in any first-class country in the world in time of peace or in present times.

Mr. BORLAND. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Minnesota. I yield to the gentleman.

Mr. BORLAND. Are not these the men who are appointed after examination by the State Department and who enter upon this as a sort of career and are afterwards promoted from post to post?

Mr. MILLER of Minnesota. Absolutely.

Mr. BORLAND. And they enter upon it with the knowledge do they not, of what the conditions in the service are?

Mr. MILLER of Minnesota. That is true, of course. That is always so. That is, we are not picking up a man here and there for a particular post. We are promoting the man from class to class as he advances in the service. The man knew the conditions of the service when he entered. That entrance into the service occurred doubtless when living was not half what it is now and what it will surely be during your time and mine.

Mr. BORLAND. That will be taken care of.

Mr. MILLER of Minnesota. You can not get a man to do that work for $1,500 a year. You can not find him, unless he is willing to make a great sacrifice to enter the Government employ and the Diplomatic Service of the Government.

Mr. HARRISON of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Minnesota. Yes.

Mr. HARRISON of Mississippi. I would like to suggest that the British Government pays their men under the same class as our class 1, £900 and a house allowance of £200. That would be over $5,000. The German Government pays their officers of similar rank $6,000 and also a large allowance.

Mr. MILLER of Minnesota. I appreciate very much that which the gentleman from Mississippi has so pertinently inserted at this point. The United States, which is the greatest and richest country in the world, and is now facing the greatest crisis in its history throughout the world with international dealings, can ill afford to keep men on starvation wages in the performance of these services. I ask the gentleman not to make the point of order, because the amounts named are the lowest sums these gentlemen ought to have in peace times.

Mr. SLAYDEN. Will the gentleman yield?

Mr. MILLER of Minnesota. Certainly.

Mr. SLAYDEN. I would like to ask the gentleman, who seems to be uncommonly well informed about the matter, whether it is not true that conditions over there change with such lightning-like rapidity that what may be a reasonable allowance one year becomes inadequate the next year?

Mr. MILLER of Minnesota. That is true, and that is taken care of by the post allowance. These men are going to get more than $3,500; they must have more in order to live.

Mr. SLAYDEN. I happen to have a constituent attached to the embassy in Petrograd, or he is trying to be attached to it; I do not know whether it is moving or not; I had a letter from him recently, and he is longing for the fleshpots of home. He said it was quite impossible to meet his expenses there and contribute anything to the support of his wife. His wife remained in this country.

Lord Bryce said in an interesting book, written about South America, that the two most expensive capitals in the world were Buenos Aires and Petrograd, and he classed Washington as third. If that was true then, and he was speaking of normal peaceful times, how much more is it true now. Money in Russia has been decreasing in value by the excessive issue of paper money so that prices have been greatly advanced.

Mr. MILLER of Minnesota. I thank the gentleman from Texas for his statement.

Mr. COX. Will the gentleman yield?

Mr. MILLER of Minnesota. I will.

Mr. COX. I think the gentleman answered the question that I wanted to ask, whether or not if this is permitted to remain at $3,500, it is all that these secretaries will get, or will they still have to go to the post fund?

Mr. MILLER of Minnesota. They will.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. LINTHICUM. Mr. Chairman, I ask unanimous consent that the time of the gentleman from Minnesota be extended 10 minutes.

The CHAIRMAN. The gentleman asks unanimous consent that the time of the gentleman from Minnesota be extended 10 minutes. Is there objection?

There was no objection.

Mr. ROGERS. Will the gentleman yield?

Mr. MILLER of Minnesota. Yes.

Mr. ROGERS. I wonder if the gentleman is familiar with the case of the secretary of class 2, who under the present law is getting $2,600, and who, during the recent illness of his minister, the chief of mission to a country contiguous to the German Empire, for about a year exercised all the duties and responsibilities of the minister? In view of that fact, which is not an isolated one, does not the gentleman think that we ought to pay a man on the basis of the duties which he so frequently has to perform, and for which we pay a minister $12,000 a year?

Mr. MILLER of Minnesota. I agree entirely with the suggestion made by the gentleman from Massachusetts.

Mr. HAMLIN. Will the gentleman yield?

Mr. MILLER of Minnesota. Yes.

Mr. HAMLIN. In the case cited by the gentleman from Massachusetts, does not the clerk receive extra pay when he performs the duties of the minister?

Mr. MILLER of Minnesota. In some instances, yes; but not always.

Mr. HAMLIN. When he is designated to perform the services of his superior that is always done?

Mr. MILLER of Minnesota. Yes; it used to be the custom for the ambassador to leave for the week end three or four days, and during that time the secretary is not drawing any extra salary.

Mr. HAMLIN. But there is not much work going on when that is done.

Mr. ROGERS. My understanding is that the practice is to grant the extra allowance, which is equivalent to 50 per cent between the salary of the secretary and that of the minister, only when the minister is actually on leave. If he is ill at his home at the legation, even though the secretary may transact all the duties, the secretary receives no further compensation.

Mr. HAMLIN. I think they look after that and get leave granted the minister, so that the clerk can receive the extra compensation and that is all right. What I want to ask is this: Perhaps this increase ought to be made. I am not opposing the increase at the present time, for I am inclined to think it is warranted. But I do not like very well to make it permanent law. If the excuse for making the increase is the high cost of living in these abnormal conditions throughout the world, we all concede that conditions will return to normal after a while, and this makes it permanent law. You never heard of a salary being reduced. Why not strike out the word "hereafter"?

Mr. MILLER of Minnesota. As I endeavored to state a few moments ago, the main reason for making these salaries $3,500 in class 1, $3,025 in class 2, $2,500 in class 3, and $2,000 in class 4, is that the men ought to be paid these amounts in peace, in normal times. That is one reason why I am strongly for it. The gentleman from Indiana a moment ago desired information whether this will be all that they will get. It is not; they could not possibly live for that, and they will be given something more next year out of the post allowance, because in many places a single man can not live on $3,500.

Let me illustrate further. These gentlemen in class 1 are the ones that during the first year of incumbency of every ambassador are the men who do the work. The ambassador does not know the language or the customs or manners of the people. These are tried, true, and experienced men in charge, and during the subsequent years of the incumbency of the ambassador at that point the first secretary, and sometimes the second, is no small part of the brains that directs the difficult work of the embassy. That is not always true, but in a general way it is fairly true. Now and then a brilliant man, and we have some brilliant men now representing this Government abroad, shines out with great brilliancy and distinction and completely overshadows the secretaries beneath him, but that is not always true.

Mr. HAMLIN. This idea occurs to the gentleman: That if we are not very careful we may set a precedent of increasing salaries at this time that may plague us considerably when we come to consider the people here at home, victims of our extraordinarily high cost of living.

Mr. MILLER of Minnesota. That is all to be considered, but let me again repeat that the amounts named herein are not a bit higher, not one penny higher, than ought to be named for these classes of employees in peace, normal times. Let me speak of class 4. These men enter class 4 when they enter the diplomatic service, and then are promoted as experience and ability demonstrate their capacity for higher positions. Where

on earth are you going to get a man competent to represent the United States in a diplomatic post for less than $2,000 a year? That is the amount that you are paying the secretaries to your own selves right here, and you expect to get a man to go into the diplomatic service of the United States and make a life work of it, go abroad and live in a foreign country, and pay him the amount that you are paying your own secretaries at this hour. Can you afford to say that you will pay your own secretary $2,000 a year, and they are worth it, and you have made it permanent law, and I would even be willing to make it a little higher, and to say at the same time to men entering the Diplomatic Service that they have got to go abroad and serve this country and take their families with them for $1,500 a year? It can not be done. You will never get into the service of the United States in this highly important field the kind of men you want unless you at least give them $2,000—start out with that, and that is a starvation wage.

Mr. SLAYDEN. Does it not virtually force us to accept the rich young men who want to go into the service?

Mr. MILLER of Minnesota. That is precisely correct. By putting the figures down so low as the amount named you are closing the doors of opportunity to the worthy poor boys of this country—and they are the best we have—and opening those doors to just one class, and that is those with independent means, men who are capable of taking any of these positions, because the salary is but an incident of their lives. We can not afford to have the great country of the United States in its representation thus confined. So I ask with all the earnestness I can command, because I feel seriously about it, having observed conditions in the Orient and in Europe, that you permit these very modest and slight increases to be made.

Mr. PLATT. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Minnesota. Yes.

Mr. PLATT. Is it not the invariable fact that men enter this class 4 and then are promoted? The only secretary of legation I ever knew that I can think of went directly, as near as I can tell, into class 1 with a certain minister and went out with the administration.

Mr. MILLER of Minnesota. I never heard of a man entering class 1 who had not previously been in the Diplomatic Service.

Mr. PLATT. I am not sure that he had not.

Mr. FLOOD. Not since the law of 1915. The only way a man can enter the service now is in class 4.

Mr. STAFFORD. Of course, the lowest class is class 5, at $1,200, and the department does not recognize it. There is nothing in the law that prevents them from putting them in the higher class. They are doing it now. If they can not get desirable men at $1,500, which is the initial class, there is nothing to prevent them putting them in a higher class.

Mr. FLOOD. Oh, yes; the regulations in the department prevent that.

Mr. STAFFORD. But the report states that they do not observe the law.

Mr. FLOOD. They do not put any of them in the $1,200 class.

Mr. STAFFORD. There is nothing to prevent them from putting them in the higher class.

Mr. MILLER of Minnesota. They could not possibly do the work in class 1 or class 2.

Mr. STAFFORD. The department has the privilege of designating any class as the initial class.

Mr. MILLER of Minnesota. A man could not be put in class 1 or class 2, because he could not do the work.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. COOPER of Wisconsin. Mr. Chairman, I ask unanimous consent to speak for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. COOPER of Wisconsin. Mr. Chairman, I wish to direct the attention of the committee to some of the testimony that was taken before the Committee on Foreign Affairs on this particular paragraph. Here is what Mr. Phillips, of the State Department, said in speaking of young men looking forward to making the Diplomatic Service a career, as young men do in England and Germany and France, in which countries they have had, so it is said, the best diplomatic service in the world, and have made it such because of their habit of treating it as a service in which a man could ultimately make a life career. I read from the testimony taken at that time:

> They see that the Government pays them $1,500 and asks them to go abroad into the expensive capitals of the world, and most of them say to themselves that it is unreasonable and that they can not meet expenses on such a salary. We don't want to raise the salaries so high as to make the salary in itself attractive, so that young men will enter the Diplomatic Service because of the salary offered. We want a reasonable salary that will even require some sacrifice on the part of the secretaries. We think $2,000, on entering the service, is reasonable. The increase in class 1 from $3,000 to $5,000 we ask in order to make the service as nearly as possible equal to our foreign competitors. For instance, the British Government pays their counsellors (their class 1 secretaries) £900—

That, of course, as every Member of the House knows, is practically $4,500—

> plus a house allowance of £100 to £200. The German Government pays their officers of similar rank salaries of $6,000 and also very large allowances—house allowances and traveling allowances.
>
> Mr. HARRISON. That applies during the war as well as peace times?
>
> Secretary LANSING. This is their regular allowance. The Japanese service pays $6,000 plus extra allowances, so that we feel we are asking less than is paid by other countries to their officers.
>
> Mr. HARRISON. Do you know whether those countries have applied the income tax in proportion to what we have in this country to those officers?
>
> The CHAIRMAN. Yes, sir; the first secretary of the English Embassy here told me he got $2,500, and that $500 was taken in income tax, so that he really got only $2,000.
>
> Secretary LANSING. Who is that?
>
> The CHAIRMAN. The first secretary of the English Embassy here.
>
> Secretary LANSING. I think I might add to this that one difficulty we have found under our present rate of salaries is that it puts a premium on men of independent means entering the service, for a man that has no other means of support than his salary can hardly afford to make any career of our Diplomatic Service.

That last paragraph of the testimony of Secretary of State Lansing is apropos of the suggestion made by the gentleman from Texas [Mr. SLAYDEN], that in certain places only American citizens of wealth can afford to enter our Diplomatic Service.

And, gentlemen, it is an extremely unfortunate thing that we have looked upon our foreign service as a place where positions can be held only by the rich. To-day it is practically impossible for a man to do justice to himself and be modest in meeting social exactions in any foreign country as an ambassador of the United States of America unless he is a man of independent means outside of his salary. That ought not to be, because there is great talent, possibly diplomatic genius, in the rank and file of our people and because of utterly inadequate compensation we have not a chance to get it into the service of the Government.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. COOPER of Wisconsin. I will yield.

Mr. MOORE of Pennsylvania. I want to inquire whether the item of transportation of diplomatic and consular officers, in going to and returning from their posts, page 7, tends to relieve this situation in any way?

Mr. COOPER of Wisconsin. Not at all. It costs just as much to live in Paris or Petrograd, after you get there, as it would if the transportation to those cities was free.

The CHAIRMAN. The time of the gentleman has expired.

Mr. GREEN of Iowa rose.

Mr. COOPER of Wisconsin. Now, I want to say this: If the gentleman will pardon me for just a moment, I would like to have five minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. COOPER of Wisconsin. I want to call the attention of the committee to a bit more of testimony——

Mr. GREEN of Iowa. Will the gentleman yield?

Mr. COOPER of Wisconsin. Yes; I will yield at this point.

Mr. GREEN of Iowa. Which qualifications in general are required of these men who enter the service of which the gentleman is speaking?

Mr. COOPER of Wisconsin. He should be a well-educated man and have command of the languages of the country to which he is assigned. He must know the language of the country to which he is going.

Mr. FLOOD. In addition to his educational qualifications, he has to stand an examination?

Mr. COOPER of Wisconsin. Yes; he has to stand a rigid examination before he can enter the service at all.

Mr. FLOOD. And he has to stand an examination on a foreign language?

Mr. COOPER of Wisconsin. On a foreign language? Yes. Now, in Mr. Phillips's statement, he said:

> Mr. PHILLIPS. Under this item we are asking for two things: For 25 additional secretaries and an increase in salary of the old and the new secretaries. It has become perfectly clear, in spite of the fact that we have no longer any embassies in Berlin, Vienna, and Constantinople, and therefore that the secretaries ordinarily placed in those capitals have been distributed elsewhere, that we must have a considerable increase in the service, not merely a war increase. At the present time, of course, in addition to the secretaries we have to employ additional clerks for war duty, but when the war is over we feel perfectly satisfied that the new duties devolved upon this Government will make it essential to have very much larger staffs abroad.

And, gentlemen, I pause to say that he meets the vital point of this case in the next statement of his, which I am about to read, if we couple this statement with what I read a moment ago from the utterance of Secretary Lansing that under present

conditions poor young men are practically excluded from entering the service. Says Mr. Phillips:

It is the right time now to bring these young men into the service, because after the war is over the new duties coming on to the department will be enormous, and it seems wise that these secretaries should begin their training as soon as possible.

He says that it is the right time now to bring these young men into the service.

I believe, gentlemen, at this particular time we who are here to represent the taxpayers of the country should do our utmost to make the burdens upon their shoulders as light as possible; and yet I feel it also my duty, representing those taxpayers, to provide a reasonable increase in the salaries of those people who must go abroad to represent the country in order that all classes of our people, the rich and poor alike, may have an opportunity to enter this exceedingly important service. [Applause.]

Mr. ROGERS. Mr. Chairman, I ask to be recognized.

The CHAIRMAN. The gentleman asks unanimous consent that he may speak for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. ROGERS. Mr. Chairman, I think the points have been very thoroughly brought out by the Members who have spoken. There is just one further point I want to make, which I think has not been sufficiently emphasized. It was very clearly stated in the testimony submitted to the committee by the Assistant Secretary of State, Mr. Phillips. Mr. Phillips, as the Members of the House know, has been promoted to his present post from the Diplomatic Service. He was secretary of embassy at London and in China before he came to the State Department. In speaking for the secretarial side of the work of the Department of State he probably speaks with greater familiarity than any man in the United States. He emphasizes the importance of the increases in salary, not from the standpoint of the individual, but from the standpoint of the Diplomatic Service and of the Nation. Mr. Phillips says:

The Secretary has spoken about the necessity for raising the salaries of the secretaries in the Diplomatic Service. He mentioned that one of the chief difficulties with which we have to contend under the present schedule of salaries is that after a secretary of embassy or legation has been in the foreign service for seven or eight years and has reached class 1, commercial interests are naturally very anxious to secure him on account of the experience he had gained abroad. The fact is that many of the men whom we consider valuable men, and who have been in the service for a number of years, are being approached by commercial interests. They are tempted with high salaries, and then they come to the department and ask what they should do.

We beg them to remain in the service as a patriotic duty. They usually do remain if they have any independent means. But we have lost, and are continuing to lose, some of the best men we have. For instance, recently, within the last few years, we have lost six efficient secretaries on account of the low salaries. Four more excellent men are now remaining in the service only on account of the war. As soon as the war is over they will leave. They have all had offers from commercial interests.

In the Diplomatic Service, which in these days and in the days to come is increasingly to be charged with duties of the greatest moment and importance, we must pay these men a fair return for the services which they render. The State Department said that the salaries ought to be based on a salary of $7,000 for secretaries of class 1, and so on down. The State Department doubtless is dissatisfied with our recommendation that the salary of secretaries of class 1 should be $3,500, and so on down. We did not feel justified in going as far as the State Department said we ought to go in order to retain these men in the service. But we did think it was our duty, our duty to the country, not merely a matter of fairness to the secretaries themselves, that we should make a beginning to pay them a salary commensurate with the importance of the duties which they perform.

Mr. BORLAND. Will the gentleman yield?

Mr. ROGERS. I will yield.

Mr. BORLAND. I wanted to ask the gentleman to yield while speaking of secretaries being tempted by private offers. No scale of salaries that we could fix would entirely obviate that evil, as the gentleman well knows.

Mr. ROGERS. Undoubtedly.

Mr. BORLAND. And that is a thing that exists in every department of the Government to-day—that occasionally good men and experienced men are tempted away by the offer of high salaries by private interests. The gentleman recognizes that it would be virtually impossible to meet that condition either in the Diplomatic Service or in the Bureau of Standards or in any other department of the Government.

Mr. ROGERS. Of course that is true. But somewhere there is an amount which, while not a fair compensation to the man, will yet be a sufficient salary to enable him to feel that in fairness to himself and his family he can remain in the Government service. When the salary is so far below the essential expenditures of a secretary, of course, oftentimes in fairness to himself he can not remain in the service. We hope that these increases which are proposed in the bill, while not, in our opinion, adequate, will yet go far to meet the conditions complained of.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. COX. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. COX. I rise for the purpose of reserving a point of order. Later on I think I will make it.

The CHAIRMAN. The gentleman from Wisconsin [Mr. STAFFORD] has reserved a point of order. The gentleman from Indiana [Mr. COX] asks unanimous consent to proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. COX. Now, Mr. Chairman, I may be wrong in my position, in my viewpoint, on this increase of salary. I trust I am not. I recognize that it is impossible, or, in other words, that a Member is out of order who undertakes to get on the floor of the House these days and to say one word in behalf of the men and women of this country who in a year from next June will have been called upon to raise $40,000,000,000. I recognize, Mr. Chairman, we are at this time the wealthiest nation upon the earth, but in recognizing that fact I recognize that this country has its own limitations, so far as wealth is concerned.

Now, it is perfectly evident that you might pay these secretaries $10,000 a year, but that would not hold them unless they wanted to stay there. They would go into private life if they were offered more money. The argument is made that these men must be paid salaries enough to justify them to stay in the service, otherwise we have got to go to the extremely wealthy men in this country to represent us as ministers and ambassadors abroad. Are not we at that parting of the ways to-day? Do we not to-day have to go to the wealthy men of this Nation and from them select our ambassadors? How are you going to get away from that condition, gentlemen, unless you reform world-wide conditions? Now, there may come a time after this war closes—I do not know—when all these salaries ought to be increased in order to meet world-wide conditions. There may come a time after this war closes that not only the salaries of these secretaries but every official from the ambassador on down representing our country in all the foreign countries ought to have their salaries adjusted to meet world-wide conditions.

Now, I am going to make a point of order, Mr. Chairman.

Mr. HARRISON of Mississippi. Will the gentleman yield?

Mr. COX. I will.

Mr. HARRISON of Mississippi. The gentleman is on the Appropriations Committee, I believe. Is the gentleman in favor of giving some precentage of increases to certain employees in the State Department as well as in the other departments of the Government?

Mr. COX. Oh, yes.

Mr. HARRISON of Mississippi. Does not the gentleman think if those employees here in the District, in the State Department, are entitled to a reasonable increase, men who work for the Government abroad are entitled to an increase?

Mr. COX. But the men who work in the State Department here have no opportunity to get to a post fund like the employees of the State Department abroad have.

Mr. HARRISON of Mississippi. The gentleman recognizes this to be a fact, that a man in the employ of the Government in a diplomatic relation abroad has to spend more money than clerks here in the city?

Mr. COX. He may. But whether he would or not, I do not know.

Mr. HARRISON of Mississippi. But the gentleman knows that by virtue of his position he would do that?

Mr. COX. He might. I do not know it. I was never abroad.

Mr. Chairman, I make a point of order against line 14, down to and including line 19, on page 3.

The CHAIRMAN. The gentleman from Wisconsin [Mr. STAFFORD] has reserved a point of order on page 3, beginning with line 4.

Mr. COX. I make the point of order on the language from lines 14 to 19, inclusive.

The CHAIRMAN. Down to and including line 2, on page 4. Does the gentleman from Wisconsin make the point of order or withdraw it?

Mr. STAFFORD. I withdraw it after making the point of order to the words in lines 10 and 11, "to be immediately available." And I wish to say in that connection that it will not prevent the department from utilizing this amount, $45,105, as carried in the paragraph, for the employment of additional secretaries during the remainder of the present fiscal year.

The CHAIRMAN. What is the point of order now?

Mr. STAFFORD. On the words in lines 10 and 11, "to be immediately available," and those alone.

Mr. MOORE of Pennsylvania. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MOORE of Pennsylvania. At the outset of the discussion of this paragraph there was a point of order reserved?

The CHAIRMAN. There was.

Mr. MOORE of Pennsylvania. Then a point of order is now in order? It is not too late?

The CHAIRMAN. It is not. The gentleman is just making it, and the Chair sustains the point of order.

Mr. FLOOD. Now, Mr. Chairman——

The CHAIRMAN. Does the gentleman from Indiana [Mr. COX] make the point of order?

Mr. COX. I have made the point of order, Mr. Chairman, against line 14, down to and including line 19, on page 3, on two grounds, namely, first, it undertakes to make permanent law, and, second, it increases salaries.

The CHAIRMAN. The gentleman from Virginia, as I understand, concedes the point of order?

Mr. FLOOD. Yes. The gentleman from Wisconsin [Mr. STAFFORD] made another point of order.

The CHAIRMAN. The gentleman from Wisconsin made a point of order against the words in lines 10 and 11, on page 3, "to be immediately available."

Mr. FLOOD. I will ask the gentleman from Wisconsin this question: If I offer an amendment making $45,105 immediately available, will he have any objection?

Mr. STAFFORD. I have already stated to the gentleman that I do not make it against the proviso, so that amount, $45,105 now in the bill, to which no point of order was made, is immediately available during the remainder of the present fiscal year.

The CHAIRMAN. The Chair sustains it.

Mr. FLOOD. Now, Mr. Chairman, I move that the figures "$339,355," on line 11, be changed to "$256,000."

The CHAIRMAN. The gentleman from Virginia offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. FLOOD: Page 3, line 11, strike out "$339,355" and insert in lieu thereof "$256,000."

Mr. MILLER of Minnesota. Mr. Chairman, I would like to make an inquiry. Is that the exact amount carried last year?

Mr. FLOOD. No.

Mr. MILLER of Minnesota. Does it not take care of the deficit that already exists and is represented by the $45,105?

Mr. FLOOD. That takes care of 25 new clerks.

Mr. MILLER of Minnesota. But it does not take care of that item. That is necessary to be immediately available.

Mr. FLOOD. It comes out of that.

Mr. MILLER of Minnesota. The $45,105, as it stands right now, is a deficit in the appropriation made for the year ending June 30, 1918.

Mr. FLOOD. No. The gentleman is mistaken about that. The $45,105 is put in there to pay the expenses of 25 additional secretaries from the time this becomes a law until the 1st of next July.

Mr. MILLER of Minnesota. That is to say, there is a deficit in the prospective expenditures this year, independent of any increases in the salaries of secretaries. What I want to inquire about is whether the amount the gentleman has named takes care of this expected deficit?

Mr. FLOOD. It does.

Mr. STAFFORD. Mr. Chairman, if the gentleman will permit, I think that the gentleman is in error. I wish to direct the Chairman's attention to the report on page 5. For the payment of 84 secretaries for the fiscal year 1919 it is estimated that $186,000 will be needed. For the employment of 25 new secretaries during that year $70,000 additional is necessary, making a total of $256,000, which is the amount of the appropriation which the gentleman has just submitted. Now, to provide for the employment of these 25 additional secretaries during the remainder of the present fiscal year there would have to be $45,105 added to that amount, as I take it, making a total of $301,105.

Mr. FLOOD. I move, then, to amend it by changing it to "$301,105."

The CHAIRMAN. The gentleman changes the amendment. The Clerk will report it.

The Clerk read as follows:

Mr. FLOOD moves to amend by striking out "$256,000" and inserting in lieu thereof "$301,105."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. FLOOD. The total will have to be changed.

Mr. COX. Mr. Chairman, what became of my point of order?

The CHAIRMAN. The point of order was sustained.

Mr. STAFFORD. Mr. Chairman, may I ask that the Clerk be authorized to change the total to the bill?

Mr. FLOOD. I make that request.

Mr. FOSTER. Is not the gentleman going to make the secretaries first fixed by law?

The CHAIRMAN. It goes out on a point of order.

Mr. FLOOD. The secretaries will go in. We have been carrying them at $3,000 and $2,625.

Mr. FOSTER. They are fixed by law?

Mr. FLOOD. Yes.

Mr. FOSTER. So that you do not need to put them in?

Mr. FLOOD. No.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

RECEIVING INSTRUCTIONS AND MAKING TRANSITS.

To pay the salaries of ambassadors, ministers, consuls, vice consuls, and other officers of the United States for the periods actually and necessarily occupied in receiving instructions and in making transits to and from their posts and while awaiting recognition and authority to act, in pursuance of the provisions of section 1740 of the Revised Statutes, $65,000, or so much thereof as may be necessary.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Pennsylvania moves to strike out the last word.

Mr. MOORE of Pennsylvania. Mr. Chairman, I presume the consuls and vice consuls are paid through this appropriation, which looks small enough. I regret that a point of order should have been made against the paragraph just passed, and I trust that no such point of order may be made at any other point where it will affect the salaries of these worthy American representatives abroad.

We do not pay our consuls and vice consuls sufficiently to properly maintain themselves in their posts on the other side of the water. It is a standing disgrace to the United States that men presumed to speak for this great country of ours should be put into such a position with respect to those with whom they have to fraternize upon the other side, as to be ashamed of the backing they have back home.

I have knowledge of certain of our representatives over there now who are using funds apart from their salaries for the actual maintenance of themselves and their families and for covering certain expenses due to the increased cost of living, for which the United States Government does not provide.

Mr. TEMPLE. Mr. Chairman, will my colleague yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. TEMPLE. I would like to add that I have knowledge of a case in which men are going down into their own pockets for furnishing legations and embassies.

Mr. MOORE of Pennsylvania. I will say to the gentleman that I have accumulated information on that very point; and I am sorry a point of order has been made against an increase of the salary of American representatives abroad, which tends to embarrass them in the respectable and dignified position they must assume with regard to those with whom they have to deal.

Here are young men who receive less than the clerks who have safe berths here in the District of Columbia and elsewhere in the United States and for whose benefit we are constantly legislating. They are across the seas, over yonder, where everything is against them, where all is hostile, and where there are supposed to be the spokesmen of our Nation. Some of them have to send home for money to keep their expenses paid. I observe again that it is a disgrace to this Nation.

Mr. FLOOD. May I ask the gentleman a question there?

Mr. MOORE of Pennsylvania. Yes.

Mr. FLOOD. What would you propose as an increase of his salary?

Mr. MOORE of Pennsylvania. I would give them enough to live respectably, at least in a manner to comport with the other representatives with whom they must live.

Mr. FLOOD. How much in dollars?

Mr. MOORE of Pennsylvania. If a man was worth $3,000 or $4,000, I would not hold him down to $1,500, upon which he could not live.

Mr. FESS. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. FESS. If the Secretary of State, responsible for this service, would recommend upon his statement that $5,000 ought to be allowed, and the committee finally compromised on $2,500, do you think we would be justified on the statement of the Secretary of State in giving anything?

Mr. MOORE of Pennsylvania. If the Secretary of State would make a recommendation for an increase of these salaries

and it came through the committee, I would vote for it, and I would do it because of my knowledge of the work that these men do. I have seen them in foreign countries living in second stories of houses for which they had to pay the rent, holding offices up there so that American citizens had to go up the side way to see them, while the representatives of England or Germany and other nations had fine buildings, with offices on the front thoroughfare, properly representing the dignity of their countries. I want to say again that it is a disgrace to require these young men, anywhere from 21 to 35 years of age and over, who must speak one, four, five, and some seven languages, even dead languages, that no Member of the House, perhaps, could speak, to exist abroad in these expensive times on a paltry $1,500 a year.

The pro forma amendment was withdrawn.

The Clerk read as follows:

CLERKS AT EMBASSIES AND LEGATIONS.

For the employment of necessary clerks at the embassies and legations, who, whenever hereafter appointed, shall be citizens of the United States, $488,000, to be immediately available.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph. Last year this item carried $100,000. The appropriation carried in this bill is $488,000 for the employment of necessary clerks. I realize from the statement of the chairman that additional clerks are required at all embassies and legations by reason of our entry into the war and the additional legislation enacted by this Congress which has imposed additional burdens on the various embassies and legations, but I would like to inquire as to the need of such an extraordinary increase, amounting to nearly fivefold. And, further, as to how much is to be used during the remainder of the fiscal year and how much is estimated to be needed during the next fiscal year.

Mr. FLOOD. The gentleman will recall that the Appropriations Committee gave in an emergency deficiency bill $88,000 which is to be added to $100,000 in last year's bill. That was not found to be sufficient. The fund for this purpose is about exhausted now. That is, $188,000 has been used in seven months of the year, and it will take of this fund $150,000 more, making $338,000 for the present year, and this would be in addition to the hundred and thirty-odd thousand in the next year. The information the committee had from the Secretary of State and from his assistants, particularly Mr. Carr, chief of the Consular Bureau, was that they were short of clerks at the embassies all over the world; that it was absolutely necessary to have additional clerks in order to carry on properly the business of the embassies and legations. They furthermore said that this was the lowest amount that they could get on with.

Mr. STAFFORD. Does the gentleman say that the appropriation, including that in the deficiency appropriation bill, is about exhausted?

Mr. FLOOD. Yes.

Mr. STAFFORD. I made an inquiry of the deficiency subcommittee as to whether any estimate was included in the deficiency bill about to be reported, and they stated that there was not.

Mr. FLOOD. They expected that it would come out of this fund.

Mr. STAFFORD. I do not intend to make any point of order on the words "immediately available" because I appreciate that the department has to have this money.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last word. I do this for the purpose of approving the appropriation. It is well that the Department of State should have this money in hand to employ extra clerks if it needs them to assist in this consular work. The American consuls over there have had a great deal to do.

Mr. STAFFORD. Will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. STAFFORD. This does not refer to the clerks at the consular stations.

Mr. MOORE of Pennsylvania. It has to do with the Consular Service.

Mr. STAFFORD. No; it is for legations and embassies.

Mr. MOORE of Pennsylvania. Well, I will apply my remarks to the proper service. It makes no difference, so long as I get them in. The Secretary of State ought to have in hand sufficient funds to pay for the service he needs on the other side of the water. The gentleman from Wisconsin is a parliamentarian, but he may not be sufficiently versed in diplomacy to stop me while I am trying to get the facts before the committee.

Mr. STAFFORD. I do not claim to be a diplomat like the gentleman from Pennsylvania.

Mr. MOORE of Pennsylvania. But the gentleman is a parliamentarian, everybody concedes that from the Atlantic to the Pacific Ocean. The appropriation ought to be made, I say, because we ought to uphold the hands of the consular agents on the other side of the water. When this war in Europe broke out, long before America began to participate in it, when this country was still neutral, these consuls had a great deal to do. Take a young man in some remote section of the Old World, where dead languages have to be spoken, where riots were breaking out, where massacres were occurring, where consuls and vice consuls were needed who were big enough to represent us, and then think of that $1,500 per annum. Why, some of them were not only charged with the American interests but had to take over the interests of the French nation and of the British nation, and they did it. How can these brilliant young men, speaking the language of the country to which they had been assigned by the United States, get along without living well and mingling with the good people? That is what they have to do in order to properly protect the interests of this Nation and those of the countries who intrusted the welfare of their citizens to their care. These young men with this great responsibility are not receiving as much compensation as we pay in Washington to some of our friends who come here and get into the departments through the civil service.

Mr. WALSH. Will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. WALSH. Some of these gentlemen gather statistics at times in relation to waterways?

Mr. MOORE of Pennsylvania. Probably they do. The gentleman from Massachusetts is humorous, but when he comes around to vote for that which his constituents most desire, he will be a better Representative even than he is to-day.

Mr. WALSH. I asked the question seriously and I hope the gentleman will answer it.

Mr. MOORE of Pennsylvania. The gentleman asked it seriously with the purpose of being humorous.

Mr. WALSH. Will not the gentleman answer the question?

Mr. MOORE of Pennsylvania. I presume the collection of waterways statistics is included in the duties of American consuls. So long as the gentleman persists I will say that statistics on European waterways are of great value to the United States at the present time.

Mr. McKENZIE. Mr. Chairman, will the gentleman yield for a serious question?

Mr. MOORE of Pennsylvania. I yield.

Mr. McKENZIE. The gentleman is not on this committee?

Mr. MOORE of Pennsylvania. I am not, and that is the reason I am commenting on the bill. If I were on the committee I might be quiescent as some of the members of the committee are with respect to these things. They are bound by committee action. Not being on a committee, as the gentleman knows, a Member of the House can sometimes speak his mind to a committee, and I was saying that it is disgraceful to induce these young Americans to perfect themselves for this great national service, making themselves competent to take on their shoulders the care of the people of all the nations of the earth in time of war, and do it at the modest compensation of $1,500 a year. I am in favor of making a larger appropriation to a generous, open-hearted, patriotic Secretary of State, in order that through him justice may be done these young Americans who are serving their country abroad. Does the gentleman get the point?

Mr. McKENZIE. I get the point, and I want to ask the question. I want to ask the gentleman if he believes that the appropriations made in this bill are sufficient to take care of those young men of ours who are over there and have been compelled to borrow money?

Mr. MOORE of Pennsylvania. I do not. Judging from what they have already received I would say that these appropriations are not sufficient. That is the reason I regret we have been prevented by this point of order from putting them in position to obtain a decent living on the other side and to properly carry out the duties imposed upon them.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. MADDEN. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Illinois [Mr. MADDEN] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MADDEN: Page 4, line 17, after the word "States," strike out the figures "$488,000," and insert in lieu thereof the following: "$676,000."

Mr. MADDEN. Mr. Chairman, the reason I offer this amendment is due to the colloquy that took place a short time ago between the gentleman from Wisconsin and the chairman of the

committee. During the colloquy, it appeared that in the last appropriation bill $100,000 was set aside for this purpose, but later on $88,000 had been provided in the deficiency bill, making $188,000. And the chairman of the committee said that this $188,000 has already been expended and before the end of the present fiscal year $150,000 more is likely to be expended. The chairman of the committee said this $188,000 has already been expended, and for the present fiscal year $150,000 more is likely to be expended. That would make a total of $338,000 required for the conduct of this branch of the foreign service for the period ending June 30, 1918. That would only leave for the conduct of this service during the fiscal year 1919 $150,000. Now if it costs $338,000 to do this same work for the year 1918, it is fair to assume that it will not cost any less for the year 1919, and that is the year for which this appropriation is being made. So I submit that, according to the figures made by the chairman of the committee having charge of this bill, there ought to be $188,000 added to the figures already reported in the bill.

Mr. FLOOD. Mr. Chairman, may I interrupt the gentleman?

Mr. MADDEN. Yes.

Mr. FLOOD. I do not think the gentleman exactly caught my statement.

Mr. MADDEN. I heard exactly what the gentleman said, and I am analyzing what he said.

Mr. FLOOD. We appropriated $100,000.

Mr. MADDEN. That is what I said.

Mr. FLOOD. And there was a deficiency appropriation of $88,000. That makes $188,000.

Mr. MADDEN. That is what I said.

Mr. FLOOD. And I said it would take $150,000 to complete this year.

Mr. MADDEN. One hundred and fifty thousand dollars in addition to $188,000?

Mr. FLOOD. Yes.

Mr. MADDEN. That is exactly what I said. That will leave only $150,000 for next year.

Mr. FLOOD. No; it will leave $338,000.

Mr. MADDEN. No. The gentleman said, in response to the query of the gentleman from Wisconsin [Mr. STAFFORD], that it would take $150,000 in addition to $188,000.

Mr. FLOOD. Exactly.

Mr. MADDEN. To complete the work up to the 30th of June of this fiscal year.

Mr. FLOOD. And you take the $150,000 from the $488,000 and you will have $338,000.

Mr. MADDEN. The gentleman is mistaken. He said they had already expended $338,000. That must be deducted from the $488,000, leaving only $150,000.

Mr. FLOOD. We propose to appropriate $488,000, and of that we proposed to use only $150,000 during this present fiscal year, leaving $338,000 for the next fiscal year.

Mr. MADDEN. According to that calculation the gentleman is right, but that is not the statement he made before. I am making an analytical statement and commenting on it. If the gentleman's previous statement is correct, then he will need $188,000 added to the figures he has here. Of course, if his statement now is correct, you need only the amount of money here appropriated.

Mr. FLOOD. That is all.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was rejected.

Mr. MADDEN. Mr. Chairman, on the gentleman's statement I would withdraw the amendment.

The CHAIRMAN. The amendment has been voted on. The Clerk will read.

The Clerk read as follows:

Interpreter to legation and consulate general to Persia, $1,000.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out "$1,000" and make it "$999.99."

Mr. FLOOD. We accept the amendment.

Mr. MOORE of Pennsylvania. And in support of the amendment, Mr. Chairman—which I shall not vote for—I desire to observe that paying $1,000 to an interpreter who is capable of serving at the legation and consul general's office in Persia is a ridiculous figure. Any American boy who can master the English language first and the Persian language second ought to be permitted, in view of the expenses he incurs in living somewhere in Persia, to have a little more than $1,000 per annum. I would offer to make this salary $1,500 per annum, but I realize that the committee would make a point of order against it, in view of the record already established with regard to consuls, and therefore I can only offer to cut this salary down 1 cent, believing that whatever young man holds this position as interpreter for the legation and consul general in Persia will forgive me, in view of the fact that I am endeavoring to secure for him an increase of salary by reverse action.

I want to call the attention of the Department of State to the miserable salaries it pays men who have talents and ability. I want the country, through the Department of State and through Congress, to know that while we pay salaries running anywhere from $1,000 to $2,000 to all sorts of folks who come here to Washington hunting jobs and who work eight hours a day here we pay a miserable $1,000 to the brainy young American who can speak Persian and has resting upon him the responsibility of conducting business as between the Persian people and ourselves.

I call attention to this wretched salary of $1,000, because in the next paragraph I find that the brilliant young man who serves as interpreter to the legation and consul general at Bangkok, Siam, receives $1,500 per annum.

Possibly it is worth $500 more per annum to learn the Siamese language than it is to learn the Persian language; but, at any rate, that is a pitiable salary for a young man who has the qualifications of an interpreter at so responsible a post as this. I do not know whether these two young men, one at Teheran, Persia, and one at Bangkok, Siam, are American citizens or not. Probably they are not, because in the next paragraph, making provision for the 10 student interpreters to the legation to China, it is specifically provided that they shall be citizens of the United States. Now, think of it. These 10 young men who are going to serve their country as interpreters to the Chinese Legation and who must master the Chinese language are to get only $1,000 a year, and pay all their expenses.

Mr. ROBBINS. I want to ask if these are not native boys, and if it was not expected to pay them as such?

Mr. FLOOD. There is no requirement that this interpreter at the Persian Legation shall be an American citizen.

Mr. MOORE of Pennsylvania. I am glad the gentleman made that statement, because I think every one of them ought to be a citizen of the United States. There is another weakness of our Diplomatic and Consular Service, that we permit men in these foreign countries who are not citizens of the United States to occupy these important stations.

I almost forgot to say that my amendment, if carried, may save this young man a considerable sum in the way of income tax, but still I shall not vote for it.

Mr. COOPER of Wisconsin. Mr. Chairman, for the purpose of obtaining the floor I rise in opposition to the amendment. I have only a word to say. The gentleman from Pennsylvania [Mr. MOORE] made a remark which is of great force, when we reflect that the consular officers of the United States are not diplomatic officers—have no diplomatic functions—but are, at least in effect, only business agents. The consulates are great business agencies of the United States, and an interpreter interpreting for an American consul when business relations are discussed between a Persian customer and an Englishman, a Russian, and an American ought to be an American citizen.

Mr. SLAYDEN. Will the gentleman permit a question?

Mr. COOPER of Wisconsin. Yes.

Mr. SLAYDEN. Does the gentleman, out of his abundant knowledge, have any information as to the amount of service rendered at Teheran, the capital of Persia, where this young man is, or at Bangkok in Siam?

Mr. COOPER of Wisconsin. No; I can not say anything further than that in the publication New Europe the other day I saw what purported to be a synopsis of the secret treaty made by three or four of the belligerent countries, in which there was to be reserved to England the sphere of influence over Persia.

Mr. SLAYDEN. Yes. As a whole, Persia is probably important, and much more important to Great Britain than it is to the United States.

Mr. COOPER of Wisconsin. Therefore I do not know how much business Americans could do through the consulate at Teheran.

Mr. SLAYDEN. If the gentleman will permit, I think it is very likely that the State Department has fixed this compensation with some reference to the duties involved in the office—trying to make the punishment fit the crime, I suppose.

Mr. COOPER of Wisconsin. In reply to that suggestion I will say to the gentleman from Texas that it is not just compensation to pay a young American who obtains for himself a mastery of the Persian tongue which enables him with facility and accuracy to interpret conversation between business men of Persia and American citizens to pay him only $1,000.

Mr. SLAYDEN. Probably there are compensations. He can read Ali Baba in the original. There is some pleasure in that.

Mr. COOPER of Wisconsin. He ought to be paid according to the dignity of the position and the ability which its duties require.

Mr. HAMLIN. Will the gentleman yield for a question?

Mr. COOPER of Wisconsin. Yes.

Mr. HAMLIN. Does not the gentleman think this $1,000 paid to a native of Persia is in all probability a princely salary for a native over there?

Mr. COOPER of Wisconsin. It may compensate a native Persian, but it would not compensate an American.

Mr. HAMLIN. I agree with the gentleman in thinking that Americans ought to occupy these positions; but I presume this interpreter is not an American, and this salary is not being appropriated to pay an American, but a native.

Mr. COOPER of Wisconsin. My remark related simply to the suggestion of the gentleman from Pennsylvania that the interpreters at American consulates ought to be American citizens.

Mr. HAMLIN. I am very much in sympathy with the idea of paying just compensation; but does not the gentleman think we have overlooked one thing this afternoon in all this discussion as to increases in salaries? Is it not true that these boys in the Consular Service, and also the clerks, have a great incentive as well as a great opportunity presented to them for promotion to positions where the salaries will be increased as they are promoted throughout the service? The opportunities to get a better position and better pay puts them on a little different plane than it would the clerk who has no opportunity to go up.

Mr. COOPER of Wisconsin. Yes; but if the first year's salary is not sufficient to keep him one year, you are not going to get him into the service and take the opportunity for promotion.

The CHAIRMAN. The time of the gentleman has expired, and the question is on the amendment offered by the gentleman from Pennsylvania.

The question was taken, and the amendment was rejected.

The Clerk read as follow:

For 10 student interpreters at the legation to China, who shall be citizens of the United States, and whose duty it shall be to study the Chinese language with a view to supplying interpreters to the legation and consulates in China, at $1,000 each, $10,000: *Provided*, That the method of selecting said student interpreters shall be nonpartisan: *And provided further*, That upon receiving such appointment each student interpreter shall sign an agreement to continue in the service as interpreter to the legation and consulate in China so long as his services may be required within a period of five years.

Mr. MOORE of Pennsylvania. Mr. Chairman, I offer the following amendment, which I send to the Clerk's desk:

The Clerk read as follow:

Page 5, line 4, after the word "nonpartisan," insert the words "and in accordance with modern democratic standards."

Mr. MOORE of Pennsylvania. Mr. Chairman, I offer this amendment because we are engaged in the great task of democratizing conditions generally in the United States and throughout the world. You will observe that I did not use any capital letter in the use of the word "democratic." I am trying to make it as democratic in the popular sense as possible. These appointments are supposed to be nonpartisan and "democratic" with a small "d," and they ought to be in accordance with the modern democratic standards; that is to say, they should be free from political influence in the United States, because their business will be to study the Chinese language and interpret it for American purposes at the munificent salary of $1,000 per annum. The tendency is to appoint Democrats—I am using the big "D" now—to office in the United States; that is to say, that is the tendency, particularly where we provide by law that the appointment shall be nonpartisan. [Laughter.] If we wanted to make democratic—little "d"—appointments in the United States—and this has a relative bearing upon such foreign appointments—we provide specifically that such appointments shall, in the broader sense, be democratic appointments, nonpartisan.

I am surprised, however, to see these words in a Diplomatic and Consular appropriation bill. It might be different if we were providing for the employment of 30,000 employees now coming to Washington to fill the departments. In such a case under modern conditions I would esteem the use of the word "nonpartisan" as dangerous. It is not so serious as it relates to appointments in the foreign service to interpret the Chinese language. American politics has little to do with that, so that it seems to me we can now well afford that these appointments shall be made in accordance with "democratic standards."

Mr. MADDEN. Will the gentleman state what he means by modern democratic standards?

Mr. MOORE of Pennsylvania. The methods of making appointments in the United States.

Mr. MADDEN. What are they?

Mr. MOORE of Pennsylvania. The methods that provide that only deserving Democrats need apply. [Laughter.] Now, boiled down to the very residuum in the crucible, it is useless to put the word "nonpartisan" into a bill if by continuing modern Democratic standards you mean to appoint any Republicans to office at all. It is not to be expected in providing by law that appointments shall be nonpartisan it will follow that any other than a good Democrat will be appointed.

Mr. GILLETT. Will the gentleman yield for a suggestion?

Mr. MOORE of Pennsylvania. I yield to the gentleman.

Mr. GILLETT. I wish to suggest to the gentleman that he speaks of this method of appointing in the United States. I notice that he speaks of the minister to Siam, and I happen to know that the minister to Siam was appointed from the State of Connecticut, taken out of the office of the gentleman who was chairman of the Democratic State committee, which undoubtedly was sufficient to guarantee his excellence.

Mr. FLOOD. Will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. FLOOD. Is the gentleman aware that the ambassador to Mexico is a Republican and the ambassador to Brazil is a Republican?

Mr. MOORE of Pennsylvania. I had not heard of that. Those appointments were made before it was proposed to introduce the word "nonpartisan" in this bill.

Mr. FLOOD. I will say to the gentleman that so far as the permanent Diplomatic Service is concerned——

Mr. MOORE of Pennsylvania. I can not quite understand why it is necessary to introduce the word "nonpartisan" in a Diplomatic and Consular bill.

Mr. FLOOD. I will say to the gentleman that he is mistaken about that. The word "nonpartisan" was put in the bill on the motion of the very able, determined, and somewhat partisan representative, the gentleman from Massachusetts [Mr. ROGERS]. It was the fight he made to have it put in, and the rest of the committee, Democrats and Republicans, were glad to support his motion.

Mr. MOORE of Pennsylvania. In view of the gentleman's statement that he has at last discovered a Republican who has been appointed to office by the present administration, why should the gentleman object to this amendment?

Mr. FLOOD. I want to say that this is the first time in my experience in connection with this bill that I have heard complaints from a Republican source that the permanent diplomatic establishment did not have Republicans in it. I have heard complaints from Democrats that there are no Democrats in it.

Mr. MOORE of Pennsylvania. I grant the gentleman that there may be a few Republicans still remaining in the service who have not yet been discovered.

Mr. FLOOD. I would say to the gentleman that the permanent Diplomatic Service is largely made up of Republicans, and what I mean by the permanent Diplomatic Service includes the secretary. The ambassadors and ministers of course come and go with each administration.

Mr. SLAYDEN. Oh, I beg the gentleman's pardon, they do not. I wish they did.

Mr. HAMLIN. They have not gone in this administration.

Mr. FLOOD. The custom is for the ambassador or the minister, when a new administration comes in, to tender his resignation, and it is generally accepted. In this administration some of them have been retained, certainly in some of the highest ambassadorial positions. They have been given to Republicans, such, for instance, as Mr. Fletcher in Mexico.

Mr. MOORE of Pennsylvania. I am wondering whether the Republicans that have been retained are these $1,000-a-year interpreters.

Mr. FLOOD. No; they are the $17,500-a-year ambassadors, and the secretaries whose salaries we attempted to raise to $3,500, but which went out on a point of order made by the gentleman from Wisconsin [Mr. STAFFORD].

Mr. STAFFORD. Mr. Chairman, for the sake of historical accuracy, I wish the gentleman would insert there the gentleman from Indiana [Mr. COX].

Mr. FLOOD. The gentleman from Indiana.

Mr. MOORE of Pennsylvania. Will the gentleman name some of these Republicans who are retained at $17,500 a year?

Mr. FLOOD. There is the ambassador to Brazil, and the ambassador to Mexico, and secretaries all through the service, secretaries whom we call counselors, are nearly all Republicans.

Mr. MOORE of Pennsylvania. I am glad the gentleman has given us an opportunity to find out where to go in order to obtain these "nonpartisan" appointments.

Mr. FLOOD. I assure the gentleman these appointments in the State Department are nonpartisan.

Mr. LINTHICUM. Mr. Chairman, will the gentleman yield?

Mr. FLOOD. Yes.

Mr. LINTHICUM. I would like to suggest to the gentleman that Mr. John W. Garrett, who was appointed by Mr. Taft, and who was afterwards transferred to Argentina, I believe now is in Belgium.

Mr. SLAYDEN. Oh, no; he is in Holland on a new appointment.

Mr. LINTHICUM. And was indorsed by a solid Democratic delegation of Senators and Representatives.

Mr. SLAYDEN. Mr. Chairman, I rise to announce my support of the proposition made by the gentleman from Pennsylvania [Mr. MOORE] to strike out the word "nonpartisan." I think it is humbuggery and hypocrisy. I would be glad to have the service put upon a frankly partisan basis. In the first place, I believe you will get superior men in it. I believe that when you get men fixed in the Diplomatic Service they become so obsessed with the value of forms and precedents and things of that kind that they magnify them into supreme importance when they are mere social trifles. The question was raised as to the politics of people now occupying high diplomatic positions. My information has been, and the gentleman from Wisconsin, my friend Mr. COOPER, always frank and sincere in his statements, corroborates it, that Mr. Reinsch, now occupying the important post of minister to China, is a Republican.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. SLAYDEN. Mr. Chairman, I move to strike out the last word. Mr. Fletcher, ambassador to Mexico, is a Republican and the ambassador to Brazil, Mr. Morgan, is a Republican, and there are others, some of whom may have been considered Democrats, but who, if the facts were known, hardly voted the Democratic ticket between 1896 and 1912. I do not like to have things declared to be nonpartisan and then run on a partisan basis. My objection is there are too many Republicans. I shall never kick if the Republicans come in and frankly and honestly say that this is a time when the places are going to be occupied by Republicans.

Mr. HAMLIN. They always do it, whether they say it or not.

Mr. SLAYDEN. I would like to hear them say it—be honest in their statements as well as in fact. Mr. Chairman, "nonpartisan" here means nothing. The gentleman from Pennsylvania is right. I think it is a wise amendment and I shall vote with him.

Mr. AUSTIN. Mr. Chairman, I am not interested in Republicans holding office under a Democratic administration. When we Republicans come back, as we are surely coming back in the next Presidential election, we will put all the Democrats out and place Republicans in their places and have a better Government—a better administration of both our foreign and domestic affairs. But I did not take the floor to discuss political matters. I was in the Consular Service prior to my election to Congress 10 years ago, and at that time the great fault I found with the service was that it did not provide sufficient pay for the clerical force in connection with the American Consular Service. The wages or the salaries were so low that Americans could not afford to leave home and take those places, and as a result our clerical service was practically in the hands of foreigners who had absolutely no interest in promoting our trade against the interests of their own country. They were interested alone in their salaries. They naturally favored their own country over ours. After my election to Congress I made several talks in the House here in favor of Congress increasing those salaries with a view of substituting Americans at every place where the American flag was represented in a foreign port, either by our ambassadors, ministers, or consular officers. At that time in the service many of our consular agents and vice consuls were not Americans, they were foreigners.

Mr. FLOOD. Will the gentleman allow me to interrupt him——

Mr. AUSTIN. I want to ask the chairman of this committee if under the splendid administration of the present Director of the Consular Service, Wilbur J. Carr, he is increasing this appropriation with a view of substituting everywhere Americans for foreigners?

Mr. FLOOD. We have been doing that for some years.

Mr. AUSTIN. How many foreigners have we to-day in the Consular Service of the United States?

Mr. FLOOD. I will ask the gentleman from Massachusetts if he recalls it.

Mr. ROGERS. If the gentleman from Tennessee will consult the hearings——

Mr. AUSTIN. Life is too short for that.

Mr. ROGERS (continuing). Pages 47 to 49 and 60 to 64, he will find the whole story. All consuls general are American citizens. All consuls are American citizens; of 306 vice consuls only 29 are not American citizens, and of the consular agents, of whom there are about 138 in all, 62 are not American citizens.

Mr. AUSTIN. Now, the clerks.

Mr. ROGERS. There is no provision of law requiring clerks to be American citizens, and I do not recall that there has ever been any testimony on that point offered before the Committee on Foreign Affairs since I have been a member.

Mr. FLOOD. I will say to the gentleman that we proposed a very large increase in the appropriation for clerks for consulates this year, and this is for the purpose of Americanizing the consulates, not only as to consuls, but clerks also.

Mr. AUSTIN. In two classes there are nearly 100 foreigners, not counting clerks, in the Consular Service. As the gentleman has been reading the hearings in reference to the Consular Service from 1861 down to date, ancient and modern history, can he tell us definitely how many foreigners are on the clerical rolls of the consulates of the United States?

Mr. ROGERS. I have no information whatever on that point.

Mr. AUSTIN. It strikes me that would be a subject of interest to the Committee on Foreign Affairs.

Mr. FLOOD. There are still some, but they are decreasing in number every year, and this year we put in the appropriation bill almost double the amount of last year to enable——

Mr. AUSTIN. Would the gentleman accept an amendment to this bill that none but Americans shall be appointed in the consular or foreign service?

Mr. FLOOD. Well, we would have to put in an increase of appropriation a great deal more than we have, for the reason that some of these consulates would not be able to get American clerks for what the department can afford to pay them out of the proposed appropriation.

The CHAIRMAN. The time of the gentleman has expired.

Mr. AUSTIN. I ask unanimous consent that my time be extended for five minutes.

The CHAIRMAN. The gentleman asks unanimous consent to speak for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. FLOOD. I would say to the gentleman that the policy of the committee has been for a number of years, under the leadership of the gentleman from Massachusetts [Mr. ROGERS], to Americanize the Consular Service, and we will continue to do it from year to year, requiring the different grades of consuls to be American, and ultimately this will be done as to the clerkships. And the department has been working on the question of the clerkships and have been trying to get Americans to accept the clerkships, when they can pay them such salaries as will justify Americans accepting these places. At some places the clerical work is so simple that they can not afford to pay a salary that would justify an American to accept the position. And I do not believe it would be wise now to put in a provision requiring all these clerks to be Americans until that matter has been carefully considered and the necessary amount of money for the purpose of entirely Americanizing the clerical force of the consulates has been ascertained definitely.

Mr. AUSTIN. Now, Mr. Chairman, to my certain knowledge for nine years we have been working on this proposition to eliminate foreigners as our clerks, vice consuls, and agents and substituting Americans for them. We read now a good deal about "speeding up," and I suggest that term to our State Department and to our honored members of the great Committee on Foreign Affairs, and ask them to speed up this affair, and in our day and generation let us feel and know that we have Americans on guard in every foreign port. And if there is a necessity for an additional consular officer or foreign consular clerk, this great, rich, and prosperous country can afford to make an additional appropriation, so that American interests will be safeguarded throughout the world by true and tried Americans.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. AUSTIN. Always.

Mr. MOORE of Pennsylvania. It being reported from abroad, privately, at least, that almost every neutral country is honeycombed with enemy spies, would it not be wise, as the gentleman suggests, that only Americans be put on guard where they have to deal with the affairs of the United States?

Mr. AUSTIN. I have no doubt the record will show that in Germany and in Austria, and in the other countries which we are now fighting, they have had their citizens in many American consulates. And we ought to stop it, and the sooner the better. There is no excuse or explanation for continuing this policy, which is against the best interests of America.

Mr. COX. Will the gentleman yield for a question?

Mr. AUSTIN. Yes.

Mr. COX. Does the gentleman know what has been the practice of foreign governments, so far as our country is concerned, and whether they have employed only their own people?

Mr. AUSTIN. There is not a country in the world which is as reckless as we are on any subject. We trust everybody, and Uncle Sam is a Santa Claus for everybody.

Mr. COX. I agree with the gentleman on that. I am asking for information.

Mr. AUSTIN. I do not know.

Mr. ROGERS. It is the practice of foreign governments which have legations and embassies in Washington, and, so far as I know, in their missions in other capitals of the world, to employ a larger proportion of foreigners than we employ in our legations and embassies abroad. An interesting bit of evidence on that point as to the practice of Germany is contained in the disclosures which are now being made in the World's Work, and which indicate how Count von Bernstorff was repeatedly betrayed from within his embassy by men who were American citizens. While we may approve of the result in that particular case, if the shoe were on the other foot, we would not indorse it.

Mr. AUSTIN. The gentleman from Massachusetts has given a better and stronger argument in favor of my proposition than I have made myself, namely, that the employment of foreigners by the German Government led to the betrayal of the German Government and their interests in this country. And history will repeat itself if we permit the same thing to go on under our Government. We will have our interests betrayed. And therefore I want to make an appeal to the Committee on Foreign Affairs to write something in the pending bill or to report a bill which will put an end to this folly, in the interest of the safety of the Republic and the extension of our trade in foreign lands.

Mr. ROGERS. Will the gentleman yield?

Mr. AUSTIN. Yes.

Mr. ROGERS. Of course, it does not follow that a man is going to be a loyal employee because he is an American citizen or that he is going to be disloyal because he is not an American citizen. But on averages, the United States would doubtless be vastly better off if its Diplomatic and Consular Service were completely Americanized. I am in absolute accord with the gentleman from Tennessee.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ROGERS. I ask for two minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. ROGERS. I suggest to the gentleman the undoubted fact that the State Department is exceedingly anxious to Americanize the American Consular Service from the top position down to the bottom position.

That takes time. The Committee on Foreign Affairs, under the leadership of the chairman, the gentleman from Virginia, has done a great deal in the last two years. We have eliminated a very large percentage of the foreigners who were acting as our vice consuls and consular agents. There is still a good deal of work to be done along that line. But the work is being done, and it will continue to be done just as fast as it is practicable.

Mr. AUSTIN. I just repeat what I said a moment ago. I have been engaged in the effort of trying to eliminate these foreigners now for nine years. If you could eliminate so many of them in two years, you could eliminate them all in the twinkle of an eye by bringing in here a bill requiring that only Americans be appointed to these positions. Your committee is on record as being in favor of that, because you say they have been endeavoring to do it for two years past. The State Department is also on record as being in favor of it. If it ought to be done, why should it take 10 years to do something so important as this, which could be done at one session of Congress.

Mr. ROGERS. The gentleman says life is not long enough to read the hearings had before the committee. Nevertheless those hearings are what the committee which reports the bill must rely upon. I should suggest to the gentleman from Tennessee that he read three or four pages of the testimony of Mr. Carr, the Director of the Consular Service, which deals thoroughly with this situation and shows what has been done in the last year and in the last two years.

Mr. AUSTIN. Mr. Carr can not do it all himself. It is the duty of the Committee on Foreign Affairs to bring in an appropriation bill with a provision to substitute Americans for foreigners. If I were to read the hearings until I should be black in the face, it would not furnish the information I desire, because I have called on the gentleman [Mr. ROGERS] to know the number now of foreigners who are in clerical positions in our Consular Service, and evidently that subject had not been discussed or brought out in the hearings on this bill. So I commend to the Committee on Foreign Affairs this suggestion, that this matter is all important, and I am going to call attention to it as long as it is unsettled, and I am going to try to stay here a long time. [Applause.]

Mr. MOORE of Pennsylvania. Mr. Chairman, in view of the light that has been shed on this subject, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Without objection, that will be done.

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For 10 student interpreters at the embassy to Turkey, who shall be citizens of the United States, and whose duty it shall be to study the language of Turkey and any other language that may be necessary to qualify them for service as interpreters to the embassy and consulates in Turkey, at $1,000 each, $10,000: *Provided*, That the method of selecting said student interpreters shall be nonpartisan: *And provided further*, That upon receiving such appointment each student interpreter shall sign an agreement to continue in the service as interpreter to the embassy and consulates in Turkey so long as his services may be required within a period of five years.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Wisconsin moves to strike out the last word.

Mr. STAFFORD. I wish to inquire of the chairman of the committee what policy has been adopted by the State Department in withdrawing interpreters, clerks, and consuls in the countries with which we are at war, such as Germany, Austria-Hungary, Bulgaria, and Turkey?

Mr. FLOOD. The diplomatic and consular forces in those countries have been withdrawn. They have been withdrawn from Germany and Austria-Hungary, and from Turkey.

Mr. STAFFORD. Then at the present time none of these appropriations is being expended for these activities in these respective countries?

Mr. FLOOD. No.

Mr. STAFFORD. I assume the policy is to carry the appropriations so that on the cessation of the war the activity will immediately be resumed?

Mr. FLOOD. Yes.

Mr. STAFFORD. May I inquire what is the policy of the Government in so far as Bulgaria is concerned?

Mr. FLOOD. We have consular officers there. Our minister to Bulgaria is also accredited to other countries besides Bulgaria. We have no diplomatic representative in Bulgaria. We have consular officers in Bulgaria.

Mr. STAFFORD. They have not been withdrawn?

Mr. FLOOD. No.

Mr. STAFFORD. Mr. Chairman, I withdraw my pro forma amendment.

The CHAIRMAN. The pro forma amendment is withdrawn.

Mr. COOPER of Wisconsin. Mr. Chairman, how long does the chairman intend to run? Can we adjourn now?

Mr. FLOOD. Until 5.30 o'clock.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

CONTINGENT EXPENSES, FOREIGN MISSIONS.

To enable the President to provide, at the public expense, all such stationery, blanks, records, and other books, seals, presses, dags, and signs as he shall think necessary for the several embassies and legations in the transaction of their business, and also for rent, repairs, postage, telegrams, furniture, typewriters, including exchange of same, messenger service, compensation of kavasses, guards, dragomans, and porters, including compensation of interpreters, and the compensation of dispatch agents at London, New York, San Francisco, and New Orleans, and for traveling and miscellaneous expenses of embassies and legations, and for printing in the Department of State, and for loss on bills of exchange to and from embassies and legations, and payment in advance of subscriptions for newspapers (foreign and domestic) under this appropriation is hereby authorized, $1,005,585.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Wisconsin moves to strike out the last word.

Mr. STAFFORD. Here again we have a rather unusual increase of appropriations from $398,000 to $1,000,000. No deficiency is asked. Will the chairman of the committee inform the House the occasion for this abnormal increase in this item for contingent expenses?

Mr. FLOOD. Mr. Chairman, the principal item of increase is the matter of cables. Mr. Carr, for instance, who is in charge of the expenditure of that, says:

Mr. CARR. There is seemingly a large increase in the estimate. That appropriation last year was $398,585, but the first estimate which was submitted this year was $605,585. We have recently submitted a supplemental estimate raising the amount to $1,005,585. The reason

for that is this: The expenses paid from this appropriation for the fiscal year 1917 were $311,000; there was an additional sum of $132,000 that was paid for the same year from the so-called war relief fund, and which was provided for for the present year in the urgent deficiency bill of last fall. That would bring the total expense up to $443,000, without including the cost of telegraphing. The cost of telegraphing during the last year was $286,000, but the closest estimate I am able to make for this fiscal year, based upon the cost of telegraphing during the first seven months of this year, is about $540,000. We are asking that you increase this amount so as to include about $540,000 for telegraphing.

Mr. MILLER. What is the occasion for all this telegraphing?

Mr. CARR. The occasion for it is this: In the first place, mail correspondence is, for practical purposes, of no use. You never know when your letter is going to be delivered. Practically the entire important correspondence of the foreign service, and especially that part of the service stationed around the central power countries, is done by telegraph. That telegraphing covers all ordinary transaction of business; it covers agreements between the different Governments as to what they are going to do with respect to the war; it covers information as to what is going on; it covers what is being said in the press, as that is absolutely necessary to have; it covers economic information; and then there is also the enormous amount of telegraphing made necessary by reason of the fact that the diplomatic channel is the only channel through which certain classes of information can be transmitted with absolute certainty. We have to send many messages for the War and Navy Departments, the War Trade Board, the Shipping Board, and other establishments.

Mr. STAFFORD. As I understand, the department is obliged to communicate more and more by means of cable and telegraph, owing to the existing war, whereas formerly most of the communication was by mail.

Mr. FLOOD. Yes; the means of communication by shipping are so bad now that they have to communicate by cable.

Mr. STAFFORD. Mr. Chairman, I withdraw the pro forma amendment.

Mr. FLOOD. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HUMPHREYS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the Diplomatic and Consular appropriation bill, H. R. 9314, and had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. HASTINGS indefinitely, on account of illness.

INTOXICATING LIQUORS.

The SPEAKER laid before the House the following communication:

DEPARTMENT OF STATE,
THOMAS HALL, SECRETARY OF STATE,
Bismarck, N. Dak., February 4, 1918.

Hon. CHAMP CLARK,
Speaker House of Representatives, Washington, D. C.

DEAR SIR: Agreeable to a resolution adopted by the fifteenth legislative assembly, in extraordinary session, I am inclosing a copy of resolution relating to the ratification of amendment to the Constitution of the United States regarding the manufacture, sale, and use of intoxicating liquors.

Yours, very truly, THOMAS HALL,
Secretary of State.

—

UNITED STATES OF AMERICA,
DEPARTMENT OF STATE, STATE OF NORTH DAKOTA.

To all to whom these presents shall come:

I, Thomas Hall, secretary of state of the State of North Dakota, do hereby certify that the attached resolution is a true and complete copy of a certain concurrent resolution adopted by the fifteenth legislative assembly, in extraordinary session, beginning January 23 and ending January 29, 1918.

Dated at Bismarck, N. Dak., on this 30th day of January, A. D. 1918.

[SEAL.] THOMAS HALL,
Secretary of State.

—

H. B. No. 8, a joint resolution (introduced by Mr. Harris) ratifying a proposed amendment to the Constitution of the United States of America.

Whereas both Houses of the Sixty-fifth Congress of the United States of America, at the second session, by a constitutional majority of two-thirds thereof, made and passed the following proposition to amend the Constitution of the United States of America, in the following words, to wit:

"Joint resolution proposing an amendment to the Constitution of the United States.

"*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein)*, That the following amendment to the Constitution be, and hereby is, proposed to the States, to become valid as a part of the Constitution when ratified by the legislatures of the several States as provided by the Constitution:

"'ARTICLE —.

"'SECTION 1. After one year from the ratification of this article the manufacture, sale, or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and all territory subject to the jurisdiction thereof, for beverage purposes, is hereby prohibited.

"'SEC. 2. The Congress and the several States shall have concurrent power to enforce this article by appropriate legislation.

"'SEC. 3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by Congress.'"

Therefore be it

Resolved by the Legislative Assembly of the State of North Dakota, duly convened, That the said foregoing proposed amendment to the Constitution of the United States of America be, and the same is hereby, ratified by the Legislative Assembly of the State of North Dakota.

And be it further resolved, That certified copies of this preamble and joint resolution be forwarded by the governor of this State to the Secretary of State of the United States of America at Washington, to the Presiding Officer of the Senate of the United States, and to the Speaker of the House of Representatives of the United States.

Approved, 4.45 p. m., January 28, 1918.

LYNN J. FRAZIER, *Governor.*

COMMISSION ON NAVY YARDS AND NAVAL STATIONS (H. DOC. 1046, PT. 6, 64TH CONG., 2D SESS.).

The SPEAKER laid before the House the following message from the President, which, together with the accompanying documents, was referred to the Committee on Naval Affairs and ordered to be printed:

To the Senate and House of Representatives:

I transmit herewith for the information of the Congress report No. 6 of the Commission on Navy Yards and Naval Stations.

WOODROW WILSON.

THE WHITE HOUSE, *February 8, 1918.*

THE LATE REPRESENTATIVE HILL.—MEMORIAL EXERCISES.

Mr. MERRITT. Mr. Speaker, I ask unanimous consent that Sunday, March 3, 1918, be set apart for addresses upon the life, character, and public services of Hon. EBENEZER J. HILL, late a Representative from the State of Connecticut.

The SPEAKER. The gentleman from Connecticut asks unanimous consent that Sunday, March 3, 1918, be set apart for addresses on the life, character, and public services of the late Representative HILL. Is there objection?

There was no objection.

LEAVE TO EXTEND REMARKS.

By unanimous consent, Mr. LONDON was given leave to extend his remarks in the RECORD.

NITRATE PLANT AT MUSCLE SHOALS, ALA.

Mr. FLOOD, by unanimous consent, obtained leave to print in the RECORD the following concurrent resolution of the Virginia Legislature:

A concurrent resolution of the Virginia Legislature.

A resolution petitioning the President to proceed with the construction of the power dams at Muscle Shoals, Ala., so that this cheap power may be available for the production of fertilizer from the nitrate plants provided for, and for which $20,000,000 was appropriated by the Sixty-fourth Congress, and which are now building at that place.

Whereas in the long list of tremendous expenditures now being made to prepare for and carry on the present war, two programs only will have great permanent economic value to the Nation when the present war ends, namely, the building of an American merchant marine, but more especially the location and construction at Muscle Shoals, Ala., of large plants for the production of nitrates, which plants in peace times can be turned into the manufacture of fertilizers; and

Whereas the great contribution to the agricultural interest of the country in the operation of these nitrate plants in time of peace will only come through furnishing the farmers of the country not only an increased supply of nitrates, but by furnishing a more adequate and cheaper supply of nitrates combined with the phosphates from Tennessee located near by Muscle Shoals; and

Whereas the most economical and permanent production of fertilizers in times of peace from these nitrate plants, so wisely located at Muscle Shoals, Ala., can only be expected by the farmers of the country provided that the cheap water power at Muscle Shoals is made available and with the least possible delay: Therefore be it

Resolved by the house of delegates (the senate concurring), First, that we, the members of the Legislature of the State of Virginia, most earnestly appeal to the President to order the construction of the great dam and development of hydroelectric power at Muscle Shoals to be started at once, so that with this cheap power the great nitrate plants now being constructed there for war purposes can be operated at full capacity in times of peace in the production of cheap fertilizers and in order that these nitrate plants, with cheap water power, will come to the relief of the labor and fertilizer burdens now weighing so heavily upon American agriculture.

Second, that we hereby petition the United States Senators and Members of the House of Representatives from the State of Virginia to use their most earnest efforts and best influence to secure the consent of the President to as speedily as possible proceed with the construction of the great water-power dam at Muscle Shoals, in order that cheap hydroelectric power may be as promptly as possible available for the operation of these nitrate plants in the production of fertilizers when these nitrate plants are no longer needed for war purposes.

Third, that duly certified copies of this concurrent resolution be sent to each of the Senators and Members of the House of Representatives from the State of Virginia.

Agreed to by house of delegates January 30, 1918.

JNO. W. WILLIAMS,
Clerk House of Delegates.

Agreed to by the senate January 30, 1918.

O. V. HAUGER,
Clerk of Senate.

SENATE BILLS REFERRED.

Under clause 2, Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees as indicated below:

A bill (S. 1735) to create an additional judge in the southern district of Florida; to the Committee on the Judiciary.

A bill (S. 3317) providing for the removal of snow and ice from the paved sidewalks of the District of Columbia; to the Committee on the District of Columbia.

ADJOURNMENT.

Mr. FLOOD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 28 minutes p. m.) the House adjourned until to-morrow, Saturday, February 9, 1918, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speakers' table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of War submitting supplemental estimates of appropriation required for the War Department for the fiscal year 1918 (H. Doc. No. 922); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of Labor submitting supplemental estimates of appropriation required for the Department of Labor for the fiscal year 1918 (H. Doc. No. 923); to the Committee on Appropriations and ordered to be printed.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 8681) granting a pension to Louis Settles, and the same was referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred a follow:

By Mr. STEELE: A bill (H. R. 9677) authorizing the several district courts of the United States to appoint official stenographers and prescribing their duties and compensation; to the Committee on the Judiciary.

By Mr. SHERWOOD: A bill (H. R. 9678) to amend section 1 of an act entitled "An act granting pensions to certain enlisted men, soldiers, and officers who served in the Civil War and the War with Mexico," approved May 11, 1912; to the Committee on Invalid Pensions.

By Mr. CARY: A bill (H. R. 9679) to provide for the retirement of employees in the civil service; to the Committee on Reform in the Civil Service.

By Mr. HAMLIN: A bill (H. R. 9680) to prohibit the sale, manufacture, and importation of intoxicating liquors in the Territory of Hawaii unless the qualified electors thereof repeal the provisions hereof; to the Committee on the Territories.

By Mr. THOMAS F. SMITH (by request): A bill (H. R. 9681) to create a national board of water conservation, to define its powers and duties, and for other purposes; to the Committee on Water Power.

By Mr. HULL of Tennessee: A bill (H. R. 9682) to provide against the depreciation in the market prices of certain obligations of the United States on account of artificial causes; to the Committee on Ways and Means.

By Mr. BOOHER: A bill (H. R. 9683) to employ prison labor for the production of war supplies and to authorize their purchase by the Federal Government; to regulate the compensation and hours of prison labor and fix standards; to prohibit the purchase of war supplies manufactured by prison labor under private contract; to limit the effect of interstate commerce between the States in goods, wares, and merchandise wholly or in part manufactured, mined, or produced by prison labor or in any prison or reformatory; and to equip the United States penitentiaries and the United States Army prisons and disciplinary barracks and the United States naval prisons for the manufacture of supplies for the use of the Government; for the compensation of the prisoners for their labor; and for other purposes; to the Committee on Labor.

By Mr. MAHER: A bill (H. R. 9684) providing for a survey from Gravesend Bay to Sheepshead Bay and Rockaway Inlet; to the Committee on Rivers and Harbors.

By Mr. SIMS: A bill (H. R. 9685) to provide for the operation of transportation systems while under Federal control, for the just compensation of their owners, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. HOWARD: A bill (H. R. 9686) to establish engineering experiment stations in the States, Territories, and the District of Columbia in connection with State-supported universities or engineering schools for the promotion of engineering and industrial research as a measure of industrial, military, and naval preparedness in times of peace or war; to the Committee on Education.

By Mr. BRITTEN: A joint resolution (H. J. Res. 238) assigning to the various war appropriating committees of the Senate and House two Army officers and two Navy officers whose duty shall be to make personal observations of the military and naval operations in Europe and report same to said committees; to the Committee on Military Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. AUSTIN: A bill (H. R. 9687) granting an increase of pension to William R. Brummett; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9688) granting an increase of pension to B. Cecil; to the Committee on Invalid Pensions.

By Mr. DUPRÉ: A bill (H. R. 9689) for the relief of Celeste Doussan Bisset; to the Committee on Naval Affairs.

By Mr. FOSTER: A bill (H. R. 9690) granting an increase of pension to Christopher C. Estes; to the Committee on Invalid Pensions.

By Mr. GRAHAM of Illinois: A bill (H. R. 9691) for the relief of John J. Buckley; to the Committee on Claims.

By Mr. GRAHAM of Pennsylvania: A bill (H. R. 9692) granting a pension to Leontine M. Cremerieux; to the Committee on Pensions.

By Mr. HAWLEY: A bill (H. R. 9693) granting an increase of pension to George W. Justice; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9694) granting a pension to Thirza M. Dolph; to the Committee on Pensions.

By Mr. KEY of Ohio: A bill (H. R. 9695) granting an increase of pension to William B. Bowdle; to the Committee on Invalid Pensions.

By Mr. McFADDEN: A bill (H. R. 9696) granting an increase of pension to Rensselaer F. Delmot; to the Committee on Invalid Pensions.

By Mr. MAHER: A bill (H. R. 9697) granting six months' pay to Katharine Taylor Dodge, widow of Charles Dodge, captain, United States Army; to the Committee on Military Affairs.

By Mr. MOORES of Indiana: A bill (H. R. 9698) granting a pension to Olive K. Jeffries; to the Committee on Invalid Pensions.

By Mr. OSBORNE: A bill (H. R. 9699) granting a pension to Sarah A. Dow; to the Committee on Invalid Pensions.

By Mr. RANDALL: A bill (H. R. 9700) granting a pension to Hans W. Hansen; to the Committee on Pensions.

By Mr. RUSSELL: A bill (H. R. 9701) granting an increase of pension to Joseph Vincent; to the Committee on Invalid Pensions.

By Mr. SLEMP: A bill (H. R. 9702) granting a pension to William C. Crockett; to the Committee on Pensions.

By Mr. STEELE: A bill (H. R. 9703) granting a pension to Edward F. Stewart; to the Committee on Pensions.

By Mr. TALBOTT: A bill (H. R. 9704) granting an increase of pension to Charles N. Emich; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9705) granting a pension to Mrs. Louisa Moore; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9706) granting a pension to William Mason Jones; to the Committee on Pensions.

Also, a bill (H. R. 9707) granting an increase of pension to John R. King; to the Committee on Invalid Pensions.

By Mr. TIMBERLAKE: A bill (H. R. 9708) to remove the charge of desertion from the military record of Matthew Thomas; to the Committee on Military Affairs.

By Mr. VOIGT: A bill (H. R. 9709) granting an increase of pension to Eugene L. Haughton; to the Committee on Invalid Pensions.

By Mr. WHITE of Maine: A bill (H. R. 9710) granting a pension to John M. Flynn; to the Committee on Pensions.

By Mr. WOODYARD: A bill (H. R. 9711) granting an increase of pension to Peter Jennings; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Resolution of the Chamber of Commerce of the State of New York, urging severe penalties for spies and enemy agents; to the Committee on the Judiciary.

Also (by request), petition and argument, protesting against the Borland eight-hour day for Government clerks; to the Committee on Agriculture.

Also (by request), memorial of Missouri State committee, medical section, council of national defense, indorsing House bill 8937; to the Committee on Military Affairs.

Also (by request), resolutions of the Socialist Party, Local Queens, requesting the President and the Congress of the United States to take action to bring about an armistice among the warring nations on the basis outlined by the de facto revolutionary Government of Russia; to the Committee on Foreign Affairs.

Also (by request), resolution of the Pittsburg Hungarian Club, expressing sincere loyalty to the Government of the United States; to the Committee on the Judiciary.

Also (by request), resolution of the Thomas J. Clarke Branch, Friends of Irish Freedom, asking Congress to go on record as favoring the political independence in the form of the Irish Republic; to the Committee on Foreign Affairs.

By Mr. CAREW: Resolution of the Association of Lithuanian Patriots of America, urging the recognition of a free and independent Lithuania; to the Committee on Foreign Affairs.

Also, memorial of the Chamber of Commerce of the State of New York, urging more stringent legislation against spies and enemy plotters; to the Committee on the Judiciary.

By Mr. CLARK of Pennsylvania: Petition of Dr. N. C. Campbell, E. L. Hanson, C. G. Brevilier, F. L. Camp, and 25 others, praying for the passage of House bill 7995, for the preservation of the *Niagara*, Commodore Perry's flagship in the Battle of Lake Erie; to the Committee on Naval Affairs.

By Mr. CURRY of California: Petition of several city officers, well-known citizens, and other residents of Stockton, Cal., in favor of increased salaries of Government employees whose classification is that of watchmen and laborers in United States post-office buildings; to the Committee on the Post Office and Post Roads.

Also, petition of several residents of Stockton, Cal., in favor of the alien slacker bill; to the Committee on Immigration and Naturalization.

By Mr. DALE of New York: Memorial of the Chamber of Commerce of the State of New York, urging more stringent laws for the punishment of spies and enemy plotters; to the Committee on the Judiciary.

Also, memorial of Brooklyn Free Kindergarten Society, urging the creation of a kindergarten division in the Bureau of Education; to the Committee on Education.

By Mr. FOSTER: Resolution of the W. H. L. Wallace Post, No. 55, Grand Army of the Republic, of Centralia, Ill., urging increase of pension to $50 per month; to the Committee on Invalid Pensions.

By Mr. FULLER of Illinois: Memorial of the Chamber of Commerce of the State of New York, for more stringent laws for the punishment of spies and enemy plotters; to the Committee on the Judiciary.

By Mr. HAMILTON: Papers to accompany House bill 9474, granting a pension to George H. Roberts; also papers to accompany House bill 9583, granting an increase of pension to W. K. Wakefield; to the Committee on Invalid Pensions.

By Mr. KELLY of Pennsylvania: Petition of citizens of Oakmont, Pa., favoring constitutional amendment prohibiting polygamy; to the Committee on the Judiciary.

By Mr. ROGERS: Memorial of the Lithuanian Naturalization Club, Lowell, Mass., asking for the restoration of the political independence of Lithuania; to the Committee on Foreign Affairs.

By Mr. SNYDER: Memorial of the Chamber of Commerce of Utica, N. Y., praying for the conservation and development of the idle water power of the country; to the Committee on Rivers and Harbors.

By Mr. TALBOTT: Proof relating to pension of Charles N. Emich; also evidence in support of a bill granting a pension to Louisa Moore; to the Committee on Invalid Pensions.

By Mr. VARE: Memorial of State Board of Agriculture of Pennsylvania, supporting the Weeks bill for the embargo on the importation of plants; to the Committee on Agriculture.

HOUSE OF REPRESENTATIVES.

SATURDAY, *February 9, 1918.*

The House met at 12 o'clock noon.

The Rev. William Couden, of Washington, D. C., offered the following prayer:

Our Father who art in Heaven, as we approach another Sabbath we realize that all the blemishes on the closing week have been caused by man. How strange it is! Thou hast made plain to us Thy requirements and indicated the things of shame, and given us the freedom to obey Thee. Yet blindly or willfully Thy children dishonor their relationship to Thee. Vouchsafe Thy forgiveness for aught that any here have said or done that is sinful. And grant Thy continuing grace to help us to become clean and to reconsecrate our all to Thee. Build us up in moral fiber and quicken us in spiritual keenness, that through the work and influence of even the least of us Thy purposes may be carried on toward fulfillment.

Extend the answer to our prayer to all our fellow citizens and our governmental and military enterprises; to our friends, the allies; and even to our enemies.

And from each of us persons here present may there rise to Thee the spirit of the prayer of Dr. Bethune:

O God!
Pardon what I have been;
Sanctify what I am;
Order what I shall be;
And Thine
Shall be the glory;
And mine
The eternal salvation;
Through Jesus Christ, my Lord.

Amen.

The Journal of the proceedings of yesterday was read and approved.

DESIGNATION OF SPEAKER PRO TEMPORE TO-MORROW.

The SPEAKER. The Chair designates the gentleman from Ohio, Gen. SHERWOOD, to act as Speaker pro tempore to-morrow.

WAR-RISK INSURANCE.

Mr. SIMS. Mr. Speaker, I move to consider House joint resolution 235, extending the time for filing applications for insurance in the War-Risk Bureau from February 12 to April 12, 1918. I will say that a similar resolution, exactly like this in every respect, Senate joint resolution 128, has been passed by the Senate, and I ask that that Senate joint resolution be considered in lieu of the House resolution.

Mr. STAFFORD. I assume that the gentleman asks to have the Senate joint resolution taken from the Speaker's table and considered in the House.

Mr. SIMS. Yes. Let me state briefly that the time for filing applications under the War-Risk Bureau bill expires on the 12th of this month. On account of many applications not being received from the soldiers in foreign lands, it is necessary to extend the time.

The SPEAKER. The gentleman from Tennessee asks to have Senate joint resolution 128 substituted for House joint resolution 235. Is there objection?

Mr. STAFFORD. Reserving the right to object, I assume that the request of the gentleman is to have Senate joint resolution 128 taken from the Speaker's table and laid before the House.

Mr. SIMS. That is the request, and I was about to explain why it was necessary.

The SPEAKER. The matter is before the House, and the request is to take from the Speaker's table Senate joint resolution 128 and substitute it for House joint resolution 235. Is there objection?

Mr. STAFFORD. Let the Senate joint resolution be read.

The Clerk read as follows:

Joint resolution (S. J. Res. 128) granting to certain persons in the active war service an extension of time within which application for insurance may be made under section 401 of the act entitled "An act to authorize the establishment of a Bureau of War Risk Insurance in the Treasury Department," approved September 2, 1914, as amended by the act approved October 6, 1917.

Resolved, etc., That the time within which application for insurance may be made as set forth in section 401 of the act entitled "An act to authorize the establishment of a Bureau of War-Risk Insurance in the Treasury Department," approved September 2, 1914, as amended by the act approved October 6, 1917, is hereby extended, with respect to every person in the active war service as to whom the time for making application would expire before the 12th day of April, 1918, so that every such person may make application for insurance up to and including the said 12th day of April, 1918: *Provided*, That nothing herein shall be construed to effect an extension of the automatic insurance provided for in the said section 401 beyond the 12th day of February, 1918.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The question is on the third reading of the Senate joint resolution.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. SIMS, a motion to reconsider the vote whereby the joint resolution was passed was laid on the table.

House joint resolution 235 was laid on the table.

QUESTION OF PRIVILEGE—IMPEACHMENT OF A. C. WOLFE.

Mr. NELSON. Mr. Speaker, I rise to a question of high privilege.

The SPEAKER. The gentleman will state it.

Mr. NELSON. I offer the following resolution.

The Clerk read as follows:

Resolved, That A. C. Wolfe, United States district attorney for the western district of the State of Wisconsin, be impeached before the Senate.

POLITICAL PERSECUTION.

Mr. NELSON. Mr. Speaker, during the past few months I might have risen to a question of the highest privilege. Under the Constitution, as a Member of the House, I might have impeached a district attorney, who, being a Federal official, permitted his office to be used by others in a manner that I will not now characterize. I prefer to state the facts, and then leave it to Members to pass judgment upon them.

I have not so risen, and I do not now rise, to press this resolution of impeachment for the present. I introduce it now merely that I may discuss the case under the rules of the House.

So far as his removal from office is concerned, it is reported generally in the press of my State that the Attorney General has called for his resignation and named his successor.

I dislike exceedingly to invoke the ponderous impeachment machinery of the Constitution in a matter personal to myself, and I am loath to do anything that would look like taking petty revenge. But had any other person in my district been the victim of this political conspiracy I would have urged a congressional investigation looking to impeachment without a moment's hesitation.

WHY STATEMENT MADE.

I have delayed making any public statement until this case was definitely determined in the courts. The time has now gone by within which a writ of error might have been sued out. I did not wish to try my case in Congress or in the newspapers, but before a judge and jury. I would not make this statement in the House now but for the fact that the judge, in the proper discharge of his duty, found the indictment against me so utterly unfounded in fact and law that he directed the motion to quash, which gave us no further opportunity to present the facts to a jury.

I shall, therefore, do so now, generally, in order that by placing the facts on record I may more fully vindicate my character, the good name of my son, and inasmuch as I am a Member of this body, vindicate so far the honor of the House.

JUDGE QUASHES AND SQUASHES.

The proceedings in the case were interesting but brief. They were over in 20 minutes. An able, unprejudiced, and upright judge read the indictment against myself and my son, asked a few questions about the alleged facts and the interpretation of the law, and thereupon, with caustic comments, he proceeded promptly, pertinently, and peremptorily to put the case out of court. He understood the animus of the case. He not only quashed the indictment: He also squashed the district attorney. I will now read the decision itself that disposed of the matter. The court said:

In view of the fact that there is nothing in the act of Congress and in the proclamation of the President which calls upon citizens of the United States domiciled abroad, either temporarily or permanently, to come home, and, in view of the fact that all the activities of the defendants, so far as appears from the indictment, were prior to the passage of the draft law, it seems to me that a demurrer to this indictment or a motion to quash must prevail.

You have the order, Mr. Clerk, leave to withdraw the plea of not guilty and to file a motion to quash; and upon consideration of the motion to quash, and having heard the arguments of counsel, etc., the motion will be granted and the indictment quashed.

PROCEEDINGS IN COURT.

Let me first briefly describe the scene in court and then quote from the official record, so that you may understand the situation as it presented itself to the mind of an upright judge.

The trial was set for the morning of January 3, but Judge Carpenter had telegraphed that he could not arrive from Chicago until 1 p. m. He arrived promptly at that hour.

Looking around the court room, I saw that my friends had come from far and near, but I could see but few present of those who had worked so industriously to bring about my ruin. Perhaps conscience had told them to stay away. I think they also anticipated the outcome, for it was generally understood that it was "politics."

It was soon apparent that the judge, tall, stern, and commanding, with strong intellectual features, knew his business. No time was lost. He was there for justice and not for politics. He went through the long drawn conspiracy indictment like a prairie fire, making inquiries of the district attorney as to certain parts, and then, commenting aloud, he referred to one part as "inducement" and to another as "camouflage." He knew the law thoroughly. He met the district attorney on every fact and without quibbling or evasion made him face the law.

When the motion for continuance was made by Mr. Wolfe, the court interrupted:

The COURT. I assume that some of these gentlemen here are prospective jurors. Is it customary in this district to make motions of this sort in the presence of the jurors?

I think if there is any place for these gentlemen to sit temporarily that the jurors may be excused during this motion.

The district attorney then read a long affidavit alleging that a Miss Elizabeth Sweets was ill; that her testimony was necessary to prove that some time in April, more than a month before the draft law was passed, Byron had said in her presence that he did not believe in war and would not go to war. The district attorney also set forth that he wished further time to enable the Government to find out whether Byron Nelson had crossed the line when on his honeymoon in the Rocky Mountains near Watertown Lakes.

Mr. Jackman, who, with Mr. Crownhart, represented us, pointed out to the court briefly how immaterial and irrelevant these facts were and how the district attorney had used this same excuse about Byron's crossing the line to put off his trial on his first arraignment before Judge Sanborn. Mr. Jackman further told the court that the only reasons Mr. Wolfe gave a few days before the day set for the trial were that he was busy and wished to look after post-office sites in Madison and Mineral Point.

We asked leave to file counter affidavits setting forth the facts, and then this colloquy took place:

The COURT. Do you raise an issue of fact here?

Mr. JACKMAN. I raise the question as to the ground of this continuance.

* * * * * * *

Now, furthermore, the court undoubtedly is not familiar with the hodgepodge of politics up in the good State of Wisconsin, perhaps, but the facts with reference to that are set forth in these affidavits. This case has more or less of a political complexion.

The COURT. Not when I am here.

Mr. JACKMAN. I understand.

The COURT. These defendants are just like anybody else, and the Government is just like any other person.

Mr. JACKMAN. But it is being used for that purpose.

The COURT. Who is using it?

Mr. JACKMAN. It is being used by the press and other parties who are in politics.

The COURT. If the press is going too far we will have them in here.

Mr. JACKMAN. Well, I think they ought to be.

* * * * * * *

After a brief discussion as to the way to take up these cases, the court said:

Why not dispose of the Nelson, jr., case?

Mr. WOLFE. The evidence we are trying to get on his coming into the territorial limits of the United States is material.

The COURT. He is not charged here with anything except that on the 5th of June he failed to register in Madison.

Mr. WOLFE. But there is a question of fact and law to be determined, whether if he does come within the territorial limits of the United States, whether or not it is his duty or whether it is obligatory on his part to register.

The COURT. He is not charged with that. The grand jury have not charged here that he failed within five days after he returned to this country to register somewhere. You charge him with failing to register on the 5th of June in Madison.

Mr. WOLFE. Well, it is his duty to register in Madison.

The COURT. No; he was absolutely exempt, if the statements in the newspapers are anywhere near true that he was out of the country at the time the law was passed; then by the President's proclamation he did not have to be here on the 5th of June.

Mr. WOLFE. Well, there is a question of law there that ought to be determined.

The COURT. Well, that should be disposed of in advance of the trial, it seems to me.

Mr. WOLFE. The question of law should be disposed of.

The COURT. Well, what is the question of law? He is charged with failing to register. Now, what is the question of law? He did not have to register here, because he was not in the country when the act was passed. * * *

Mr. WOLFE. The question of law could come up on a demurrer to this indictment.

The COURT. The indictment is perfectly good. I assume that when the defense comes they will show that he was out of the country on the 5th of June.

Mr. WOLFE. Yes.

The COURT. That settles that case.

Mr. WOLFE. Well, I would like to have the court hold open that argument.

The COURT. What is the legal proposition?

Mr. WOLFE. The legal proposition is that the act of Congress requires citizens of the United States to register regardless of any——

The COURT. Supposing he had been in Paris.

Mr. WOLFE. Well, I say that is a question of law I would like to argue to the court.

The COURT. You can not dignify it by calling it a question of law.

* * * * * * *

Mr. WOLFE. The President's proclamation could not exempt him under the act of Congress.

The COURT. What did the act say?

Mr. WOLFE. The act made it obligatory on all persons to register.

The COURT. How about those outside the country at the time?

Mr. WOLFE. There was a matter of convenience given them to register.

The COURT. Just read the terms of that exception, if you have it there.

Mr. WOLFE. I have the letter of the Attorney General [handing same to the court].

The COURT. It is the act of Congress we have got to go on here.

Mr. WOLFE. The act of Congress we contend made it obligatory on all citizens of this country to register.

The COURT. The Attorney General seems to state it very plainly here: "The President may prescribe not inconsistent with the terms of the act. This language, of course, absolutely covers male citizens residing abroad as fully and to the same extent as it does male citizens residing in this country. Such persons are subjects of the United States, and as such owe it allegiance."

There is no doubt about that. They may be compelled to perform military service, and while the obligation can not be enforced against them, whenever and wherever the Government can lay hands on them. Now, they could not force this regulation of registration on the 5th of June last, because the Government could not lay their hands on him. They did not. Now, he was indicted for failing to register here. He did not have to, because he was not here and could not. It was a physical impossibility.

Mr. Jackman thereupon called the court's attention to the law, the regulations, and the rulings of the provost marshal. I now quote from the record:

The COURT. Let us take the second case first. I will call the conspiracy case the second case.

Mr. JACKMAN. Yes.

The COURT. Now, Mr. Wolfe, will you state briefly the things charged by the grand jury against the father and son, the Nelsons here, that amount to a crime against the United States? Just what did they do or fail to do? Assume that the young man did not want to go to war; assume that he hoped to evade serving his country and taking that part in the representing of her affairs that most young men would want to take; assume all that, that was his state of mind, and that he deliberately went up to Alberta with the knowledge, perhaps, that such a law would be passed—the draft law—and that he got there, the draft law was passed, it had certain provisions for registration in this country which it was a physical impossibility for him to comply with; and assume he stayed there a certain length of time, and that his father encouraged him; assume that the father knew all of this, and they went closely together as fathers and sons frequently do and should. Assume all that. Now, what is it they have done that has violated a statute of the United States? You see, I have got to look at this thing absolutely unclouded by what seems to be a very unfortunate state of affairs in Wisconsin—a state of affairs which makes it necessary for a Federal judge of a sister State to come here and hear matters that properly belong in this court. As I say, I am looking at this absolutely unclouded. There is no such thing as politics in it. A citizen of this district has been charged with a crime. Is he guilty or not guilty? If he is guilty, he will be punished. If there is no crime charged in this indictment I am going to set him free this afternoon.

Mr. WOLFE. That is the only attitude the Government assumes in this case, none other. The reason that the Government or the grand jury, perhaps, preferred an indictment against JOHN M. NELSON and his son Byron Nelson, is this: After April 6, when a state of war was declared to exist between the United States and Germany, under the act of June 3, 1916, all persons between the ages of 18 years and 45 years were members of the militia of the United States, and all citizens under the law not only owed allegiance but were subject at any time to be called into active military service as soon as Congress took such steps as it deemed proper and necessary to call the men into active military service.

The COURT. Are they charged with conspiring to violate that law?

Mr. WOLFE. No.

The COURT. Or the registration law?

Mr. WOLFE. No; but that comes in connection with the duty——

The COURT. That is inducement.

Mr. WOLFE. I am calling the court's attention to that law to show that at that time, after April 6, both the father and the son owed his duty to the Government.

The COURT. Oh, you can assume that every citizen of the United States owed that duty without any act of Congress—every normal citizen.

Mr. WOLFE. Now, the facts—the facts as the Government expects to prove them—were these: That after the declaration of war Byron Nelson and his father, with others, entered into this unlawful agreement to have Byron Nelson evade any duty that he owed to the Government under this law and any regulation or law that would be passed thereafter.

The COURT. Is there any statute which makes it a crime to conspire together to violate some law to be passed in the future?

Mr. WOLFE. No; but I mention this as the agreement, and this agreement was a continuing agreement from that time on. It continued in force after the draft law was passed on May 18, 1917.

The COURT. Well, now, what overt act do you charge done by either one of the conspirators after the passage of the draft law or the registration law? Because under our statute of conspiracy now there must be some overt act in pursuance of the conspiracy or there is no crime.

Mr. WOLFE. In pursuance of that unlawful agreement and conspiracy——

The COURT. Let us take the case of Nelson, sr. What do you expect to prove that he did after that?

Mr. WOLFE. He continuously after that time advised by letter and telegram, advising his son, both here, while the son was here in Wisconsin and after he left Wisconsin and went to Canada, to leave the State of Wisconsin.

This statement is absolutely untrue. See statement that follows.

The COURT. This was before the law was passed.

Mr. WOLFE. Enter into a partnership, as he called it, marry this young girl now his wife, and take a trip for the Northwest; that this not only might be sufficient to be successful in this enterprise, but it would furnish argument later on which might prove successful in evading the draft law.

This telegram related wholly to his marriage. Mr. Wolfe misconstrues and distorts its whole meaning and purport. See statement following.

The COURT. That is, a law to be passed in the future?

Mr. WOLFE. Yes.

The COURT. Let us assume all that. We have passed that point. We have got the law passed by Congress. What was done after that to carry out the conspiracy?

Mr. WOLFE. After that he sent a telegram to Canada, and while in Canada advised him not to register—a number of telegrams—not to take any steps until he had received his letter and had received further notice, and in one telegram he specifically said not to register.

Here Mr. Wolfe fails to tell the Court that these telegrams were sent in September because he was trying to browbeat and bulldoze Byron. Not one sent before June 5, 1917.

The COURT. Well, aren't we brought right face to face with this proposition, that in the absence of a direct call from the President or the Congress of the United States to our citizens domiciled abroad, under the terms of this act were they obliged to return to this country?

Mr. WOLFE. Yes; under the terms of this act——

The COURT. Now, just a minute. We have a lot of foreign residents; we had them in Mexico, we had them in France, in Italy, some in Germany, and a great many in Canada and in Great Britain. Now, was there anything in that law that required a man to come home, in the absence of a direct request from the President of the United States acting through some regulation of Congress?

Mr. WOLFE. It did not require him to come home, but it required him to register if he was within the draft age.

The COURT. It required him to register in some county in this country, and blanks for that purpose could only be found in this country. No provision is made there for putting his registration in a foreign mail box.

Mr. WOLFE. That provision is not in accordance with the act of Congress, if such an interpretation should be placed on that provision.

The COURT. Well, what is there in the act of Congress that operates outside of the confines of this country?

Mr. WOLFE. This provision right here, section 2.

The COURT. Supposing Congress provided that any American citizen who violated the police regulations in a foreign city should be guilty of a crime. Do you think that law would be good?

Mr. WOLFE. Well, that is probably of a different character.

The COURT. Well, now, wait a minute. Congress is now legislating for somebody that is in a foreign country, one of our own citizens to be sure. Now, what is there in that act that requires the citizen in a foreign country to come back here?

Mr. WOLFE. This provision is section 2, after speaking of the draft: "Such draft as herein provided shall be based upon liability to military service of all male citizens, or male persons not alien enemies who have declared their intention to become citizens, between the ages of 21 and 30 years, both inclusive, and shall take place and be maintained under such regulations as the President may prescribe not inconsistent with the terms of this act."

Mr. JACKMAN. What are you reading from?

Mr. WOLFE. Section 2, page 73.

Mr. JACKMAN. Of the selective-draft law?

Mr. WOLFE. Yes.

The COURT. Is it your contention that applies to citizens of the United States residing in foreign countries?

Mr. WOLFE. It makes no exception.

The COURT. I am asking you.

Mr. WOLFE. Yes; that is my contention.

The COURT. Suppose we had some in Australia. Would the district attorney in Madison, Wis., indict them because they failed to register?

Mr. WOLFE. If they willfully tried to evade the act.

The COURT. It is willfully attempting to evade the act if knowing the existence of the act you fail to carry out its purpose or conform to its provisions.

Mr. WOLFE. This is the provision in this particular case: that a person who leaves this country for that very purpose of evading this act, or has gone, that he is in a position where he can not complain; but the act of Congress makes no exception, but says: "Such draft as herein provided shall be based upon liability to military service of all male citizens, or male persons not alien enemies who have declared their intention to become citizens, between the ages of 21 and 30 years, both inclusive, and shall take place and be maintained under such regulations as the President may prescribe not inconsistent with the terms of this act." Now, there is not any exception made.

The COURT. But there is so much to be found in the balance of the act which indicates that it is meant to apply only to those citizens of the United States that are within her jurisdiction, that I can not see the foundation for your argument.

Mr. WOLFE. Section 5 continues: "That all male persons between the ages of 21 and 30, both inclusive, shall be subject to registration in accordance with regulations to be prescribed by the President."

The COURT. Suppose Congress said that every male citizen of the United States should pay a tax of $2 a thousand on his money in the bank; would that apply to citizens of the United States that were domiciled abroad—I mean in the absence of some specific language—even if it could be done? Would the general language cover it? Of course this is an unusual thing. Nobody dreamed that a thing like this could happen in this country. Now, we must construe that act with reference to normal conditions.

Mr. WOLFE. Section 5 continues: "And upon proclamation by the President or other public notice given by him or by his direction, stating the time and place of such registration, it shall be the duty of all persons of the designated ages, except officers and enlisted men of the Regular Army, the Navy, and the National Guard and Naval Militia, while in the service of the United States, to present themselves for and submit to registration under the provisions of this act; and every such person shall be deemed to have notice of the requirements of this act upon the publication of said proclamation or other notice as aforesaid given by the President or by his direction; and any person who shall willfully fail or refuse to present himself for registration or to submit thereto as herein provided shall be guilty of a misdemeanor."

Then it concluded with this proviso: "*Provided further*, That in the case of temporary absence from actual place of legal residence of any person liable to registration as provided herein, such registration may be made by mail under regulations to be prescribed by the President."

I submit that a person who, with the intent of that particular thing in view, leaves this country and goes to Canada and stays in Canada, as the indictment alleges, that he failed to register at any time after

that time—after June 5—that then he willfully violates the law, especially if he was able to comply with it. The regulations themselves that were issued, section 65, does not make any absolute exception, but uses the words "may be unable to comply with the regulations pertaining to absentees."

The COURT. What are the regulations? Just see what they are and how utterly impossible it would be for one in a foreign country to conform to those regulations, indicating, as I say, that the act of Congress was meant to cover only those citizens of the United States within the jurisdiction of the United States.

Mr. WOLFE. But supposing the Government would be in a position to show that after the issuance of those regulations Byron Nelson did enter the territorial limits of the United States, so that he was in the United States; then it became his duty under these regulations——

The COURT. But he is not indicted for that.

Mr. WOLFE. But he is indicted for failing to register at any time after June 5.

The COURT. Let's see [examining indictment].

Mr. WOLFE. "Or any time thereafter."

Mr. JACKMAN. The conspiracy limits the overt act up to the 15th of June.

Mr. WOLFE. The charge is, "So then and there"——

The COURT. I am sorry I can not listen and read at the same time.

Mr. WOLFE. Oh, I beg your pardon.

The COURT. Now, the charging part says that prior to the 15th of June and on the 6th of April, 1917, they conspired together for the purpose of evading the duty of the younger Nelson to do what he might thereafter be told to do by Congress. That is what this section on page 6 of the indictment amounts to; and the father advised him to go. Where in this indictment is the charge that he returned to the United States? (See statement following.)

Mr. WOLFE. It does not say that he did return to the United States.

The COURT. We have to test the legality of this document by what appears in the eight pages; not by any fact that the Government may have otherwise.

Mr. JACKMAN. May I——

The COURT. Just a minute. * * * I want to ask Mr. Wolfe to be sure and advise me if he has called my attention to every section of the act of Congress which has to do with the registration of citizens domiciled abroad, or is there—I suspect there is not—but is there a single clause in the act of Congress or a single section in the proclamation of the President which refers definitely to American citizens that are outside the jurisdiction of the United States and indicates that the act of Congress and the President's proclamation should affect them?

Mr. WOLFE. There is not a single provision that particularly mentions those persons.

* * * * * * *

Mr. WOLFE. But the way I construe this regulation it is a mere convenience to the person affected by this regulation. The duty to register is absolute, but for such persons' convenience this regulation was issued. I say that for this reason: That it seems to me inconceivable that Congress could have had in mind such a law that it would permit persons to come and go, leave the country and come back again without those persons being required to obey this law.

The COURT. Well, I presume that he is now registered, isn't he?

Mr. JACKMAN. Yes, sir.

* * * * * * *

The COURT. The only charging part in this joint indictment is that on and prior to the 15th of June and after the declaration of the state of war between the United States and Germany the defendants conspired and combined together that for the purpose of evading his duty as a member of the national forces of the United States and to avoid the performance of any active military service the said Byron C. Nelson should depart from the territorial limits of the United States and should go to the Dominion of Canada. Now, that you see, while it is very seductive to have the date the 15th of June in there, it is a sort of camouflage that makes us overlook for a moment just what these defendants really did, but when we get down a little further we find that all they did in pursuance of that conspiracy was to counsel the young man to depart the United States prior to the passage of the law, which we know was on the 18th of May. Therefore this all took place prior to the passage of the law, and that is the fact. What I want to find out is what they are charged with subsequent to that?

Mr. WOLFE. They are charged subsequently with a continuance of this agreement.

The COURT. Well, where is it? I can't find it.

Mr. WOLFE. It is in there.

The COURT. It says: "Having entered into the conspiracy and in furtherance thereof, the said Byron C. Nelson, upon the continued counsel and advice of his father, did continue to remain beyond the territorial limits of the United States from the 3d of May, 1917, and after the passage and approval of said act of Congress of May 18, 1917, and the proclamation of the President of the United States issued in pursuance thereof."

In other words, the father counseled the boy that once he was away to stay away. There is no charge here at all that he ever returned to the United States at any time. We get right back to the original proposition; that indictment charges the defendants with a conspiracy to violate a law to be passed at some time in the future by the Congress of the United States. That is the only definite thing in it.

Mr. WOLFE. And then the continuation of that advice after the law was passed.

The COURT. Advising him to stay there.

Mr. WOLFE. Advising him to stay there and not register as required.

The COURT. While he is over there. In other words, advising him that once he is out of the country that he can stay there.

Mr. WOLFE. Not to register, as we contend he must under this act.

The COURT. Nothing in that act from which we can anywhere near require the young man to register from a foreign port or from a foreign city—absolutely nothing.

Mr. WOLFE. In submitting that letter of the Attorney General, perhaps that more clearly states the fact.

The COURT. It is a very interesting letter, and, of course, is entitled to a great deal of respect, but I think he does not pass upon what I think is the controlling question in this case.

* * * * * * *

In view of the fact that there is nothing in the act of Congress and in the proclamation of the President which call upon citizens of the United States domiciled abroad, either temporarily or permanently, to come home, and, in view of the fact that all the activities of the defendants, so far as appears from the indictment, were prior to the passage of the draft law, it seems to me that a demurrer to this indictment or a motion to quash must prevail.

Mr. JACKMAN. Now, may it please the court, does that apply to both of these indictments?

The COURT. I do not know what the Government wants to do with this other case. As I said before, this indictment——

Mr. WOLFE. I suppose that the Department of Justice in Washington would like to have this matter heard before the higher court.

The COURT. It is a criminal case, and I am not familiar with it. Is there a statute here so that it can be reviewed?

Mr. WOLFE. Oh, yes; that is the reason I desired to have this put in a demurrer.

The COURT. It is a great deal better to do it in this way.

Mr. WOLFE. Because this is an important matter.

The COURT. Because if I should take this case away from the jury, as I undoubtedly would, being of this kind, then the Government could not appeal.

Mr. WOLFE. No; that was the point I made.

The COURT. So we will have a formal order here permitting the defendant to withdraw his plea of not guilty and demurring to the indictment or motion to quash.

Mr. JACKMAN. In the case of Byron C. Nelson and John M. Nelson——

The COURT. I think the other case I will leave for the Attorney General to dispose of by order of nolle pros, because, as I said before, it is a good indictment; you can not demur to it.

Mr. WOLFE. No; but it involves the same proposition of law.

The COURT. And it involves the same proposition of law and it involves the same facts.

Mr. WOLFE. And the Attorney General, I suppose, probably would like to determine that for himself; and if this is to be done this way, probably there ought to be a formal demurrer.

Mr. JACKMAN. I am now filing in the case of the United States *v.* John M. Nelson and Byron C. Nelson a motion to withdraw the plea of not guilty heretofore filed for the purpose of filing a motion to quash the indictment.

The COURT. That is all right.

Mr. JACKMAN. And I am now filing a motion to quash the indictment against Byron C. Nelson and John M. Nelson upon the ground that the indictment upon the face does not constitute facts sufficient to constitute a crime.

The COURT. That is just the same as a demurrer.

Mr. JACKMAN. I understand a demurrer is not proper.

The COURT. It is not under the equity rules, but I imagine that anything that properly raises the question and presents it to the court of appeals will be sufficient.

Mr. WOLFE. I would like to have the record in such shape so that the department——

The COURT. Oh, an exception will be preserved to the Government. I do not know as it is necessary.

Mr. WOLFE. No; it is not necessary, but I want to be in a position so that we can notify the Attorney General. In matters of this kind the United States attorney usually notifies the Attorney General, and the department determines whether——

The COURT. Whether they want to take it up or not.

Mr. WOLFE. Yes.

The COURT. The court of appeals is now in session in Chicago, and the record, I take it, would take less than a day to have printed.

Mr. WOLFE. But we have to get the ruling of the Attorney General before we take a step of that kind.

The COURT. You have the order, Mr. Clerk, leave to withdraw the plea of not guilty and to file a motion to quash; and upon consideration of the motion to quash, and having heard the arguments of counsel, etc., the motion will be granted and the indictment quashed.

Mr. WOLFE. And the Byron Nelson case——

The COURT. That will rest just the way it is. I will not dispose of that at this time.

Mr. JACKMAN. This young man is registered, and he has a large farm up there, and he is the active man in charge.

The COURT. Well, I think the Attorney General would not have any objection to his departing the jurisdiction of the court if the court did not. I certainly won't have any objection to his going back to Canada.

Mr. WOLFE. I haven't any.

Mr. JACKMAN. He is subject to a call at any time. Now, that case, as I understand, is to stand in statu quo.

The COURT. As I say, the Government may nolle this case in 2 days or 30 days, depending upon what happens to the other, because if the facts won't support the conspiracy case, they won't support the case against the boy.

Mr. WOLFE. They are all grounded on the same question of law.

The COURT. Yes.

This ended the case. The court adjourned. The judge was soon on his way back to Chicago. Newspaper men could hardly grasp, not to say write up, what had happened. Attorneys and clients alike could scarcely realize the full significance of the strange scene we had witnessed. Friends crowded around to shake our hands and to tell us with tears in their eyes how glad they were. Many denounced the persecution bitterly as "dirty politics." One thing is certain—I hope no friend of mine will ever go through an experience like it. In politics men do strange things, and I have gone through many campaigns where my political foes sought to win by using unfair means, but this far surpassed them all in heartless, unjust, and oppressive use of power.

THE BURDEN OF OUR OFFENSE.

Now what was the burden of our offense? My son has a father who is a Member of Congress. For this reason only he is singled out among thousands of Americans abroad of draft age for persecution. As his father is a Member of Congress, it is great stuff for sensational headlines. And that is my offense. Moreover, I vote as I think right, in the fear of God and not man, and, as it is suspected that I may be reelected, desperate means had to be resorted to, and were.

A district attorney was by various indirect and subtle means induced first to swear out a warrant, and then later to go be-

fore a grand jury that was influenced by unfriendly newspaper criticism, and ask for my indictment on a conspiracy charge under a distortion of the facts and an absurd statement of the law.

THE FACTS IN THE CASE.

Now, these are the facts in the case as we were prepared to prove them. I am president of the John M. Nelson Co. (Ltd.), and as such I am temporarily interested in a large farm in Canada. When I took hold of this project, more than five years ago, through my willingness to aid two brothers who had made unfortunate financial investments, I got so entangled with them that I had to get into this foreign business field far deeper than I had ever expected, in order to save them and myself from great financial loss. I thought that I was discharging a brotherly duty, but here was the beginning of this conspiracy.

During these five years in my connection with this farm I have learned some lessons. Among these I mention the fact that it is easier to get in than to get out of a foreign investment, and that farming by proxy 2,500 miles away through hired managers and workmen is not as profitable a business enterprise as to invite general envy.

Looking about, therefore, for some one upon whom I could rely to represent me I quite naturally turned to my son, now 24 years of age. Four years ago, with this thought in mind, I sent him to Canada to spend the summer. During his past three years at college I directed him to take up farm studies; and a year ago last fall when I returned to Madison, where he was attending the State University, I discussed with him quite fully our mutual understanding that he was to go to the farm after graduation in June to do farm work and to prepare himself as manager, so as to relieve me in large part of this burden.

Naturally, I thought that this was merely a family arrangement for sharing burdens and responsibilities, but according to the district attorney this was a continuance of this conspiracy.

HIS GOING NO SECRET.

In November, 1916, a graduate of the University Agricultural College by the name of P. C. Strelow was engaged by us as manager and Egbert Stondall and wife as assistant and cook on the farm. My son bought their railroad tickets for them, saw them off at the station, saying that he would be with them in the spring. After Mr. Strelow had been on the farm a month or two he reported to me that because of the drain upon men for the long war hired help would be high and scarce in Canada. He feared that he would have difficulty in getting the necessary labor to put in the crops. Thereupon, I wrote to my son, urging him to look up farm labor, so that we might send men there if needed; and I told him to arrange to take with him others when he went out in June after graduation.

In the meantime, Byron was enthusiastic over his going to Canada, not only because he wished to relieve me of this burden but also for the reason that the university physicians had told him the dry air would cure him of a throat trouble, and in our family circle it was thought that a few years on a farm would be most helpful, physically and otherwise, for his theological course. Byron had some years previously decided upon the ministry as his calling. With enthusiasm he discussed his going to Canada with all who would listen—his fellow students, his teachers, his relatives, and especially with the members of the family of the young lady whom he was engaged to marry.

If his going was the overt act in a conspiracy he certainly did not keep it secret; and at the trial a dozen witnesses were present to testify to the fact that his going to Canada was planned long before we ever dreamed that the United States would be drawn into the world war.

MARRIAGE PLANS AND WAR.

The district attorney failed to include a very notable person in this alleged conspiracy. In song and story he is called Cupid. He is the real culprit, for he put the secret service agents on the wrong scent.

During the month of August, 1916, Byron became engaged to a young lady with whom he had grown up and attended college. He became engaged with our consent and with the knowledge and consent of her parents. Formal announcement of the engagement was made in December, 1916, and was published in the papers of the city of Madison. It was no secret. His companions at the university all knew of it; the families knew of it; and their friends all knew of it.

It was arranged at the time that they should be married immediately after Byron's graduation from the university in the spring of 1917 and upon the completion of the contract which the young lady had for teaching in the Young Women's Christian Association at Indianapolis. She had graduated from the university in the spring of 1916. So the young folks planned, but "the course of true love never did run smooth" and great things were about to happen to disarrange their plans.

April 6, 1917, the United States went into the war.

STUDENTS IN WARTIME.

The events that preceded and followed the eventful day that the President read his message to Congress directing a declaration of war are known to us all. At the great universities of the land the students became restless and uneasy. My son wrote me that he could not study. No one was trying to do so. Good students who had formerly received high marks abandoned their work; companies were formed; the boys were drilling; the spirit of unrest permeated the classes.

APPEALS FOR FOOD PRODUCTION.

On the 14th of April the Hon. Emanuel L. Phillip, governor of the State of Wisconsin, issued a proclamation which was headed in the press: "Governor issues proclamation declaring man who works with hoe a patriot" and stating in substance that battles are won with bread and urged the farmers to plant every available acre of ground.

On April 16, 1917, President Wilson issued his "address to fellow countrymen," calling attention to the necessity for increased food supply and stating:

Thousands, nay, hundreds of thousands of persons otherwise liable to military service will of right and of necessity be excused from that service and be assigned to the fundamental, sustaining work of the fields, factories, and mines, and they will be as much a part of the great patriotic forces of the Nation as the men under fire.

UNIVERSITY ACTION.

Following this, and on the 17th day of April, 1917, the faculty of the College of Agriculture of the University of Wisconsin passed the resolution which reads as follows:

Whereas there exists a marked shortage of the world's food supply and our Council of National Defense is looking to the agricultural colleges in this crisis for help in increasing State and National crop production, the faculty of the agricultural college of the University of Wisconsin recommends action as follows:

That all senior, junior, and second year middle course agriculture students be released immediately from academic work for service in food-production campaign;

That all students who normally graduate either now or at the close of the summer session be given their diplomas at the appropriate times if they enter at once upon and continue up to the time of graduation in food-production activities; and

That any student, accepted for this service under the conditions specified below, may receive the total number of credits for which he is at present enrolled. Credit will not be necessarily given as for a particular course but when it is prerequisite for further work for the course later, for which he may receive additional credit. * * *

Any student enrolled in this service in order to receive credit must continue in such service until the opening of the college of agriculture in 1917, unless excused by the committee hereinafter provided. He shall furthermore make such reports and present such evidence as shall be necessary to determine the character of the service performed to be such as to warrant credit. * * *

It is also recommended that a committee to be known as the war council of the college of agriculture be appointed by the dean and that he shall be ex officio chairman of said committee. This committee shall administer the foregoing provisions and other pertinent matters. * * * It is further recommended that the faculty of the college of agriculture urge upon the other faculties of the university the seriousness of the food-supply situation and recommend to their consideration the possibility of such action as will stimulate the cooperation of individuals fitted to render specially valuable service in increase of food supply.

This resolution was printed and had wide circulation through the press in Wisconsin.

A few days later and on the 23d of April, 1917, the faculty of the college of letters passed the following resolution:

Resolved, That the faculty of the college of letters and science recognizes the public-service character of agricultural work at this time and approves of the release of students from attendance during the remainder of the semester under conditions substantially the same as those adopted by the college of agriculture. The administration of this grant of absence is left with the executive committee of this college acting in conjunction with the appropriate committee of the college of agriculture.

This resolution was likewise given wide circulation.

On the 25th day of April, 1917, the regents of the university adopted the following resolution:

Voted, That the action of the president of the university and the faculty in releasing members of the faculty and students of the university from their customary work in permitting them to work in the interest of better preparation for war in this State be approved.

STUDENTS RESPOND.

Immediately after the passage of the resolution by the college of letters and science my son, Byron, with about four hundred other students, made application to the proper authorities in the regular manner prescribed by the university faculty to be allowed to go on farms to work. The matter was taken up by the war council. He was granted permission to go on the farm. In the application he stated where he was going and what he expected to do. He filed his reports, sending them to the proper officers, down until the 1st of October, in compliance with the resolution of the faculty, and he was given his degree.

Furthermore, on the 10th of June, 1917, he received a letter from the president of the university which reads as follows:

The university has decided to give an insignia to all students who take part in war service, whether military, food production, industrial, or otherwise. In accordance with this plan there is inclosed herewith a badge to which you are entitled.

Very truly, yours, CHARLES R. VAN HISE, *President.*

This is the badge. It is of bronze in the form of a shield. In the center is the coveted initial W; around this W are the words "University of Wisconsin" and below in larger type "War service."

Previously my son's name had been published in the local newspapers on a "roll of honor."

LONG BEFORE LAW PASSED.

In response, therefore, to the appeals of the governor, the President, and other public men, my son, knowing the need of help upon the farm, after stating his purpose to me by letter and with my approval, under the direction of the university faculty offering him credits as if in attendance at the classes, left for Canada May 2, 1917, taking with him a friend and fellow student, William Chandler, to work upon the farm.

When Byron and Chandler left Madison for Canada they went for the good and sufficient reasons stated, and not as charged to avoid the draft. The draft law had not been passed. No one knew for certain that a draft law would be enacted. Certainly no one was advised as to the provisions of the regulations which were to be promulgated if the law passed, and therefore no one could possibly know the manner in which the draft was to take place.

YOUNG FOLKS WILL MARRY.

While, therefore, the war had not hindered but rather helped his going to the farm in Canada, Byron was nearly distracted over its serious disarrangement of his marriage plans. I voice a universally recognized truth when I say that no red-blooded boy at the age of 23 accepts with undisturbed emotions happenings, however grave, that threaten to postpone indefinitely his marriage day. My son was no exception to the rule.

He was frantic over the uncertainty of things. All sorts of rumors were afloat. He bombarded us with letters and telegrams—all about his marriage tribulations. One day I received a special-delivery letter and a telegram, because he had heard that Congress was about to pass a law prohibiting marriage by persons of military age until after the war. These telegrams the secret-service agents obtained and, of course, misconstrued. Sympathizing with the young folks in their distress, I at first advised marriage whenever her parents would consent, but subsequently, upon calmer consideration, I strongly dissuaded such a course, pointing out to the young folks how the newspapers would misrepresent their motives. In short, acting under the sober advice of the respective parents, and as the young lady disliked to break her contract as a teacher, they decided to postpone the marriage until after his return in June, if he was under the draft, as he expected, or if no conscription bill passed she would go to Canada to him, as they had fondly planned during the winter.

Subsequently it transpired, as I shall soon relate, that being a resident abroad, he was not required to register June 5, the time being wholly voluntary with himself, so upon the completion of her work as teacher, in order to save the loss of labor and the expense of his returning to the United States, and especially to keep his agreement with the university faculty to work on the farm until October, it was arranged that they be married in Lethbridge, Canada. Her parents attended the wedding, going from the farm to the Glacier National Park on a summer vacation. My son and his bride took a few days off for their honeymoon, and thereupon both returned to the farm, went to work, and remained there until he came back in October under circumstances which I shall state. At no time after he left the university on the 2d day of May, 1917, down until the time when he returned and registered was my son within the territorial limits of the United States.

BYRON TRIES TO REGISTER.

That my son did not go to Canada to avoid the draft, and that I did not direct him to do so, will now conclusively appear. Several letters were received by me at Washington from my son, asking what was necessary for him to do with reference to registering and urging us to keep him informed. I told my secretary, a Wisconsin man, subject to registration, to look up Byron's case as he attended to his own. When the President's proclamation was issued, providing for registration by absentees, I asked my secretary to go to the district board to procure a card for my son. As it takes six days for a letter to reach Spring Coulee, Alberta, Canada, from Washington, my son, without waiting for us, had written a letter to the county clerk of his home county asking that a registration card be sent him. His friend and fellow student, Chandler, had received a card from his father by mail. This card was shown Byron and Mr. Strelow, and on Sunday, May 27, Chandler filled it out. How this card was obtained under the regulations I do not understand. It was clearly contrary to the regulations for clerks to give out blank cards. Byron and Strelow sat down and each wrote a letter directed to the county clerk of Dane County, Madison, Wis., in which they stated in substance the facts called for in Mr. Chandler's card. Mr. Strelow took these letters, together with other letters written on the same date and the one inclosing the registration card of Chandler, and on the morning of the 28th of May mailed these letters at Spring Coulee, Alberta, Canada. Mr. Chandler's card reached his district board, but Byron and Strelow never received any response to their letters. At the trial this fact would have been proven by seven witnesses.

TOLD HE CAN NOT REGISTER.

In the meantime my secretary at Washington reported to me that he had obtained his card from the district board, but that he was unable to get any card for Byron, because of the fact that he was outside of the territorial limits of the United States. He said that he had been referred to the Provost Marshal's office, that he had made inquiries from that office, and had been informed that no card could be given him, for the reason that no provision had yet been made for the registration of Americans outside the territorial limits of the United States, and that consequently there was no method whereby they could register.

Three days later, the 25th day of May, in order to verify the statements of my secretary, I personally made inquiry from the office of the Provost Marshal General and was informed by the officer in charge exactly what my secretary had reported, and I was further advised that if I would look at section 65 of the regulations I would find that persons outside the territorial limits of the United States were not required to register until five days after their return to the United States.

I sent to my son a copy of the regulations, together with a statement as to what I had been told by the Provost Marshal's office.

If the writing of that letter and the sending of this information was a conspiracy, the Provost Marshal who framed the law and the regulations should have been indicted as the chief conspirator!

PROVOST MARSHAL'S RULES.

Later, on the 12th day of June, 1917, the Provost Marshal General issued what is known as Form 15, headed "Information as to registration of American citizens resident abroad," and to which form was signed the name of the Provost Marshal General. The first section of this form provides as follows:

At the present time (June 12, 1917) the registration of American citizens resident without the jurisdiction of the United States is not compulsory.

After the newspaper reports with reference to the action of the district attorney at Madison had been called to my attention, I personally went to the office of the Provost Marshal General, and on September 1, 1917, I received a letter from the Provost Marshal General signed by Harry L. Watson, captain of the Seventeenth Cavalry, which reads as follows:

With reference to the registration of persons residing in Canada or elsewhere without the jurisdiction of the United States, the statements contained in the bulletin, Form 15, hereto attached are still correct.

LAW AND REGULATIONS.

At the time of my inquiry at the Provost Marshal General's office, May 25, I was referred to certain sections of the registration regulations, and I examined these myself. Section 5 of the act of May 18 provides that all male persons between the ages of 21 and 30, both inclusive, shall be subject to registration in accordance with the regulations to be prescribed by the President. The latter part of the same section provides that—

In case of temporary absence from actual place of legal residence of any person liable to registration as provided herein, such registration may be made by mail under regulations to be prescribed by the President.

In the registration regulations promulgated May 18, 1917, by the President, section 2 provides, among other things:

These regulations pertain only to the registration of all male persons in the United States, the Territories, and the District of Columbia, between the ages of 21 and 30, inclusive, and are published for the direction and guidance of all concerned.

Section 6 provides that all correspondence relating to the execution of the act shall be addressed to the office of the Provost Marshal General.

Section 64 provides for the machinery whereby persons in the United States in States distant from their own State may apply to the proper officers in the county or city, but no provision is made of any kind in the regulations of the President in cases

where a person is outside the territorial limits of the United States.

Section 65 provides:

Registration of persons at sea or abroad: Male persons within the designated ages who, on account of absence at sea or on account of absence without the territorial limits of the United States may be unable to comply with the regulations herein pertaining to absentees, will, within five days after reaching the first United States port, register with the proper registration board, or as herein provided for other absentees.

My construction of these regulations and of the law at the time was in accord with the instructions received from the Provost Marshal, also a memorandum from the Secretary of War to the Secretary of State in which he says that registration on the part of citizens abroad has not been made compulsory, and the printed instructions to consuls by the Secretary of State, in which he informs them that registration on the part of citizens abroad is wholly voluntary.

This construction is further absolutely confirmed by the selective-service regulations prescribed by the President under date of November 8, 1917. Section 53 of these regulations provides, among other things:

Citizens or persons who have declared their intention to become citizens who have not hitherto registered on account of absence without the territorial limits of the United States are required to register within five days after their return to the United States.

Section 56, headed "Registration of persons residing abroad," contains, among other things, the following language:

Citizens and persons who have declared their intention to become citizens, residing abroad, are not required to register.

A REMARKABLE OFFENSE.

In short, Mr. Speaker, my son had gone to this farm in Canada before the draft law was passed, under the auspices of his university, responding to the call of the governor of the State and the President of the Nation to all patriotic citizens to produce food for the country and her allies, for which service my son received a letter of praise and an insignia in bronze from his university as a memento of his patriotism; yet he was indicted for a dereliction of duty, and I was indicted for transmitting to him rulings received from the Provost Marshal General, who was authorized to make such rulings by the President of the United States under the act of Congress.

NATURE AND PROGRESS OF CASE.

The question naturally presents itself, Why did the district attorney do it? Who were behind him, urging him on, and using him to accomplish their political ends? These questions have been put to me often by men who know that political persecutions of this kind are not carried on unless people in places of power or influence are back of them. I will, therefore, set forth the nature and the progress of this case in some detail.

WAR AND POLITICS.

I have the honor to represent the capital city, and I live at Madison, where the State capitol is located. It follows from this fact that in my home city are some goodly number of politicians, in and out of office, who take a lively interest in politics.

Some of these leading politicians, not friendly to me politically, served on the grand jury. The district attorney, of the opposite political party, was a stranger to me, but associated closely with my political opponents.

Until very recently there were only two daily papers in my home city, one of the opposite political party, and as such quite naturally takes a shot at me from time to time. The other used to be of my party and was edited by a friend, who turned against me because I did not fully share his views. He permitted my enemies to use his columns freely for hostile communications, and from time to time he directed his editorial batteries at me.

This hostility began soon after my vote on the so-called armed neutrality bill. A number of men who have been opposed to me in factional politics, representatives of the local public-service corporations and other financial interests, started an agitation that was taken up by this daily newspaper. This agitation resulted in organizing what they called the "Never-again Nelson Club," and these political enemies went so far as to have celluloid buttons made with the letters N. A. N. printed on them. This action was supposed to result from my vote against the armed neutrality bill.

As a result of this agitation the faculty of the university sent me petitions, a large parade was organized, lengthy resolutions were sent by wire, and generally the utmost pressure brought to bear to secure my vote for war. But I did not so vote.

After war was declared, it being now the question of being loyal to the law of the land and to the flag of our country, I supported, with one or two exceptions, the President's entire program. This fact was either carelessly overlooked or purposely ignored by these prejudiced people.

STIRRING UP SECRET SERVICE.

The opportunity that my political enemies were looking for presented itself in this way: During the month of August, 1916, this newspaper learned that my son, Byron, was in Canada; that he was not registered, and had recently been married. The account of his marriage was written up in a way to convey the suggestion that he had gone to Canada to escape the draft. This paper thereupon began to print statements alleged to come from the United States district attorney, Mr. Wolfe, with reference to my son being in Canada and not registered. These stories were continued from day to day, and finally the paper printed the sensational news item that the district attorney intended to swear out a warrant for my son's arrest.

Prior to that time, after war had been declared, a number of Secret Service men had been sent to Madison, the chief of whom was a Mr. Spencer. They sent a telegram to the Bureau of Investigation at Washington inquiring if my son had registered in the District of Columbia. I was called up over the telephone and gave them generally the facts that I have stated to you. Later, in answer to a letter, I sent the bureau a statement giving detailed information.

AT OFFICE OF ATTORNEY GENERAL.

A week or ten days later I learned from the Associated Press that the district attorney had sworn out a warrant for my son's arrest. I thereupon went to the Department of Justice to consult this Mr. Keen, with whom I had talked over the telephone. He took me up to the Assistant Attorney General, Mr. Fitts, who has charge of the criminal division of the department. After I had stated the facts to them, Mr. Fitts said:

Well, Mr. Keen, if this young man was in Canada more than two weeks before the law passed, how could he violate the law?

They asserted emphatically that the action of the district attorney had not been directed by them, and assured me that they would ask him to report on the case at once. Subsequently I presented a statement in the form of a letter to the Attorney General, stating the facts and the law in detail, citing the rulings of the Provost Marshal, the memorandum of the Secretary of War, and the instructions to consuls from the Secretary of State, and a copy of this letter was sent to the district attorney.

At my interviews with Mr. Fitts I found him frank, fair, and just. He gave me emphatically to understand that he failed to see how the district attorney could charge my son with violation of the law. He inquired of me who was back of this prosecution, advised me to go home, it being near the end of the session, to see who was stirring up the matter.

PATRIOTISM AND POLITICS.

My presentation of the law and the facts to the district attorney put an end to the persecution, so far as I could observe, for a period of six weeks. But during this time Mr. Wolfe and the secret-service agent, Mr. Spencer, were importuned by my political foes on the streets and over the telephone; newspaper reporters, unfriendly to me, came to interview them day after day on the Nelson matter, asking what they intended to do, and why they did nothing. Telegrams were sent to Washington to the Department of Justice by the chairman of the State Council of Defense for the State of Wisconsin, and by the secretary of the Dane County Council of Defense, urging the prosecution of my son. Both of these men have been for years members of a faction opposed to me. It is a most significant fact in this connection that on the 31st day of December, 1917, but a few days before the time set for the trial at Madison for conspiracy against Byron and myself that the chairman of the Dane County Council of Defense announced himself as a candidate for my seat in Congress. How much the chairman knew of the action of his secretary I can not say; but the fact is that the secretary telegraphed in the name of the Dane County council.

ANOTHER OPPONENT'S PLATFORM.

Previously another severe critic had announced his candidacy for my seat, using as a defense of his action an alleged newspaper interview. I present it here as an interesting specimen of the newspaper persecution I had to endure. The regular reporters of the newspaper associations were generally fair. I gave each of them a brief statement at the time the district attorney swore out his warrant against my son, showing his innocence of the charge. But two days later a reporter tried to interview my wife over the telephone on the subject of "conscientious objectors." She declined to be interviewed and told him to await my arrival. Upon my return home after a session of Congress this persistent fellow called me up. I told him that I would give out no interview. He said something offensive, and so I

promptly hung up the receiver. This is the dispatch that he sent out to the newspapers of the country and printed in my home paper:

WASHINGTON, *August 31, 1917.*

Congressman NELSON, Wisconsin, to-day said that both he and his son, whose arrest as a slacker is threatened by Government officials, are "conscientious objectors." Further, he admitted he gave his son money to go to Alberta wheat farm to escape military service.

Not only did this false interview bring out a candidate for Congress against me but I was threatened by a very prominent lawyer of my home city until I had explained to him by telegram that the item was sheer fabrication. This is the telegram I sent:

Statement false, defamatory, libelous—a willful reporter's deliberate lie.

GETTING BEHIND GRAND JURY.

My statement of the facts and the law had also put a stop to the newspaper propaganda. Very little was published about the case. But on the 20th of October, a month and 20 days after Mr. Wolfe had sworn out the warrant, he announced to the reporters that the grand jury, then in session, had indicted my son on the same charge.

Just why the district attorney did nothing after learning of the provost marshal's ruling, having sworn out his warrant September 1, and then presented the matter to the grand jury more than a month afterwards, I never could understand unless it be that he could not withstand the pressure. At any rate, I had gone home for the brief vacation taken by Congress, and at once, upon learning of the indictment by a grand jury, I decided that the best course was to end the matter by telegraphing my son to return, to register, and then to demand an early trial. Without any warrant being served on him, he returned, registered, and was assigned the serial No. 4456 and order 1284 A in full compliance with the act of May 18, 1917, and section 5 of the President's regulations.

A plea of not guilty was thereupon entered and an immediate trial asked for, to which the district attorney refused his consent.

REPORTERS AND POSTPONEMENT.

After I had returned to Washington for the December session I learned from the newspapers, November 28, that the district attorney had also secured from the grand jury an indictment of me and my son for conspiracy. Before either of these indictments were served or before any intimation to either myself or my attorneys, and before these indictments were actually filed in the United States court, the district attorney called the reporters and gave to them a full statement with reference to the indictments. My attorney had surmised from his talk with the district attorney and the secret-service agent that they were also trying to get an indictment against me, for it was rumored at the courthouse that the one they were after was not the boy but the father. District Attorney Wolfe was specifically asked by my attorney if any action was taken by the grand jury against me that notice be given to my attorneys immediately upon the return of the indictment. The district attorney made the promise to do so, but he failed to keep his promise. My attorneys learned of my indictment from the newspaper reporters. Upon being told by the newspapers of the action of the grand jury I immediately went to Madison and my son again immediately returned from our farm in Canada, where he had gone with full permission and knowledge of the local draft board and of the United States district judge. A plea of not guilty was entered, and a motion made for an immediate trial, not only in the conspiracy case but the motion was also renewed for an immediate trial in my son's case. Again the district attorney refused to give his consent.

CASE SET FOR TRIAL.

However, District Judge A. L. Sanborn stated that we were entitled to a speedy trial; that he did not think it proper for him to sit in the case by reason of the fact that his son, John B. Sanborn, who is an attorney in the city of Madison, had advised with reference to these cases with Mr. Spencer, of the Secret Service; that, therefore, he would call in another judge, and that he would go to Chicago on the following day to ask Judge Carpenter, of the northern district of Illinois, to sit in the cases at as early a date as possible. This was done. The date was set for January 3, 1918. Again the information was given to the newspaper reporters by the district attorney's office before my attorneys were notified.

ON EVE OF TRIAL.

On the 28th day of December, 1917, in the afternoon, one of my attorneys called up the district attorney and asked which case he would try first, and as to the return of Mr. Strelow, the former farm manager, who was then stationed at Jefferson Barracks, Mo.

The motive for this inquiry was the fear on the part of my attorneys that the district attorney might fail to keep his promise to subpœna Mr. Strelow.

It was during this conversation that my attorneys first learned that the district attorney sought a further postponement of the cases. He asked them to agree to a continuance, stating as his reasons that he was busy; that he had some matters which the department wanted him to take up immediately; that he had to look up some matters with reference to the post-office sites at Madison and Mineral Point.

My attorneys informed me that these were the only reasons assigned for any adjournment of the trial until the afternoon of the 3d of January, the day set for the trial. On the grounds assigned, my attorneys refused to consent to any adjournment.

It developed subsequently that the district attorney had sent the secret-service man, Mr. Spencer, to Chicago to interview Judge Carpenter with reference to a continuance, and no notice of any kind was given either to me or my attorneys with reference to the matter.

Before the day set for the trial my son again returned from Canada, where he was acting as manager of the farm. I returned from Washington. Witnesses were subpœnaed on our behalf from long distances. Some Members of this body and a member of the Cabinet came from Washington, and the young man who had been manager of the farm during the month of June, 1917, now in the United States Army, was brought back.

My attorneys prepared affidavits to resist postponement, which we feared, for it meant not only great expense and loss of time, but also holding the case over my head in the courts indefinitely.

ONLY SPECTATORS.

The proceedings in court have been set forth. The district attorney made the motion to put the trial off; my attorneys asked leave to file and to read counter affidavits. The judge asked for the indictments and that ended the case. My son and I were not subjected to the humiliation of a trial. With our attorneys we sat as spectators enjoying the skill and courage with which the judge legally, if not literally, wiped the court-room floor with the district attorney and then threw him out of court. The judge presented the law. Mr. Jackman whispered to Mr. Crownhart immediately after the court had made his first comment on the indictment: "We will find ourselves out of a job here in a few minutes." We were not surprised. My lawyers and I knew that no upright judge would let a case of this kind go to a jury.

A DISTRESSING EXPERIENCE.

Mr. Speaker, I have undergone a most distressing experience in being indicted for crime. No one can understand who has not experienced it how distasteful is the notoriety; how trying it is to mother, wife, and children; how heartlessly cruel are some newspapers and reporters; how quickly a large part of the public condemns before conviction; how unpleasant it is to know that detectives dog your footsteps, ransack your telegrams, open your mail and the mail of your attorneys; but we were sustained by the consciousness of innocence, by the confidence and prayers of many friends, and by a firm faith in the overruling providence of Almighty God.

PERSECUTION.

Persecution is after all no great misfortune. It is the price we must often pay for a clear conscience. It comes to every man who dares to stand true to his convictions when others weakly bend to the varying storms that blow. Suffering and persecution brings out of us the best that is in us, and is the hour of trial that tests the love and loyalty of those we call our friends.

GOOD FRIENDS.

I wish now to express publicly my deepest gratitude to my colleagues, HENRY ALLEN COOPER, the dean of the Wisconsin delegation in Congress; to EDWIN Y. WEBB, chairman of the Judiciary Committee of the House; and to Albert S. Burleson, the Postmaster General of the United States, who were on their way to Wisconsin to testify in my behalf. Mr. Burleson called me up over the telephone on the morning after my indictment to assure me of his sympathy and sincere friendship. He tendered me his services in any way that I might require them. I assured him that all I desired was a speedy trial. He readily expressed his willingness to go to Madison as a witness, and he reached Chicago before I could inform him of the abrupt termination of the case.

But for the death of a member of his family Senator OSCAR UNDERWOOD would also have made the journey. He offered gladly to make a deposition as to my character, loyalty, and patriotism. Likewise our honored Speaker, CHAMP CLARK, who gave me a copy of a letter he had previously written denouncing this prosecution in the strongest possible terms, would have

made the trip to Madison, if he could have appointed a Speaker pro tempore for more than a day. How strong the ties are that we form in this body I have tested in my own experience, and the recollection of the devoted friendships of these men and others whom I can not name will never be effaced from my mind and heart as long as life shall last.

FINAL DEFEAT.

Defeated in court, my political foes sought to convey the impression in the newspapers by announcing an appeal that justice had failed, but as the Attorney General has refused their demand, their purpose to hold this charge over my head in the courts has failed. Now they must come out in the open; now they must reveal themselves, their candidates, and their false issues. I shall meet them fearlessly on my whole record. I have had in mind but one goal, the public welfare; to that goal I followed but one pathway and one principle—the truth and the right—and I have but one motive—love of my fellow men, love of country.

With a faith, therefore, firmly founded on the knowledge of the rectitude of my intentions, the sanity of my convictions, and the unselfishness of my efforts in the discharge of my duties as a Member of Congress, I shall again await, as often before, the verdict of approval of the supreme court which, under God, passes final judgment upon our records as public servants.

Mr. Speaker, I ask leave to withdraw the resolution.

The SPEAKER. The gentleman does not have to obtain leave. The gentleman withdraws the resolution.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, its enrolling clerk, announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 3689. An act authorizing the Postmaster General to cancel or readjust the screen-wagon contract of H. H. Hogan at Kansas City, Mo.; and

S. 3648. An act for the retirement of public-school teachers of the District of Columbia.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

Mr. FLOOD. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 9314, the Diplomatic and Consular appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the Diplomatic and Consular appropriation bill, with Mr. HUMPHREYS in the chair.

The Clerk read as follows:

Emergencies arising in the Diplomatic and Consular Service.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word, and wish in this connection to make a parliamentary inquiry. I desire to know whether the paragraph that is about to be read ends with line 12, on page 9, or terminates on line 8. It will be noticed there is a proviso which directly affects the matter in the preceding lines, beginning on line 9.

The CHAIRMAN. The Chair would state that in his opinion the paragraph ends with line 12, page 9.

Mr. STAFFORD. Very well. I withdraw the pro forma amendment.

The Clerk read as follows:

To enable the President to meet unforeseen emergencies arising in the Diplomatic and Consular Service and to extend the commercial and other interests of the United States and to meet the necessary expenses attendant upon the execution of the neutrality act, to be expended pursuant to the requirements of section 291 of the Revised Statutes, $700,000, to be immediately available, together with the unexpended balance of the appropriation made for this object for the final year 1918, which is hereby reappropriated and made available for this purpose:

Provided, That in his discretion the President may employ part of this fund for payment for personal services in the District of Columbia or elsewhere, notwithstanding the provisions of any other law.

Mr. STAFFORD. Mr. Chairman, I reserve the point of order on the paragraph. We have two provisions here that are subject to points of order, that making immediately available this very large appropriation of $700,000 for an item where the appropriation last year was but $150,000, and the proviso leaving it in the discretion of the President to employ this fund for personal service in the District of Columbia or elsewhere, notwithstanding the provisions of any other law. I may say that in conference with the chairman of the Committee on Appropriations he advised me that the Department had not made any estimate for this service for the remainder of the present fiscal year, but that if it was urgently necessary it could be done when the urgent deficiency appropriation bill, which is to be reported in a few days to the House, would be considered in the Senate. I believe this appropriation of $150,000 has been increased by a deficiency appropriation running to several hundred thousand dollars already during the present fiscal year.

Mr. FLOOD. Mr. Chairman, the reason for this provision is that it is out of this fund that the State Department pays, to a great extent now, the secret service and proposes to pay all of the additional secret service that it will have to employ during the next year. That secret service, as the gentleman is aware, has done a remarkably beneficial work for this country and for our allies since the war began. This appropriation had been $200,000. Last year it was cut down to $150,000 upon the suggestion of the Secretary of State that he did not need any more than $150,000, but after this bill was passed last year the war broke out and a great deal more money has been needed in carrying on the secret-service work, and the secret-service work in the State Department is principally paid for from this fund.

Mr. STAFFORD. As I recall the testimony of Secretary Lansing, before the Committee on Appropriations, the President has allotted a considerable amount of the $100,000,000 emergency appropriation to the department for utilization for this very purpose of advancing the secret-service work and detecting spies and enemies of the Government.

Mr. FLOOD. He has; but the President dislikes to do that and they prefer to have it in this appropriation, and in order to make it effective the Secretary stated to the committee that it would be necessary to have some men of high class employed in the District who would stay here for the purpose of giving direction to the secret-service force of the State Department, and he was exceedingly anxious that he be permitted to employ a few men here, and that proviso was inserted to meet the provision of law that prevented that very thing.

Mr. STAFFORD. Can we have the assurance of the chairman of the committee, because it has been a moot question between the respective Committees of Foreign Affairs and Appropriations as to whether any appropriation in the Diplomatic and Consular appropriation bills should be utilized for the payment of clerical services in the District of Columbia, that in case this proviso is allowed to remain in the bill and the war is ended when the next Diplomatic and Consular appropriation bill is under consideration, that he will eliminate this proviso?

Mr. FLOOD. I give the gentleman the assurance that if I am on the committee I shall vote to do that, and I believe that will be the action of the committee.

Mr. STAFFORD. Has the gentleman any serious objection to having the words "immediately available" stricken out? I am pressing the point of order largely upon the suggestion of the chairman of the Committee on Appropriations, who stated that it could be submitted to the Senate and presented as a part of the urgent deficiency bill. I desire in no wise to restrict in amount or activity the work of the State Department in ferreting out spies.

The CHAIRMAN. The time of the gentleman has expired.

Mr. STAFFORD. Mr. Chairman, I would ask for three minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. FLOOD. When does the gentleman think that appropriation can be made?

Mr. STAFFORD. The urgent deficiency bill will be the next appropriation bill, I am informed, that will be brought in the House for consideration. It will be brought up very shortly and will likely pass before this bill is finally enacted.

Mr. FLOOD. Well, I think with that statement that there is no objection to striking those words out.

Mr. STAFFORD. Mr. Chairman, I withdraw the reservation of the point of order, except as to the words "to be immediately available."

The CHAIRMAN. The Chair sustains the point of order.

Mr. FLOOD. Mr. Chairman, I wish to offer an amendment. Page 9, line 6, strike out the word "final" and insert the word "fiscal." It is merely a typographical error.

The CHAIRMAN. Without objection, the amendment will be agreed to.

There was no objection.

The clerk read as follows:

Contribution to the maintenance of the International Bureau of Weights and Measures, in conformity with the terms of the convention of May 24, 1875, the same to be paid, under the direction of the Secretary of State, to said bureau on its certificate of apportionment, $2,895.

Mr. COX. Mr. Chairman, I move to strike out the last word. I ask unanimous consent, Mr. Chairman, for five minutes to speak on a subject not connected with this bill.

The CHAIRMAN. The gentleman from Indiana asks unanimous consent to speak for five minutes out of order. Is there objection? [After a pause.] The Chair hears none.

Mr. COX. Mr. Chairman, there has been some complaint throughout the press of the Nation and probably on the part of parents of soldiers abroad in respect to mail not being properly delivered to them. In view of the very splendid speech made by the able gentleman from Massachusetts [Mr. ROGERS] the other day, a little later on in my remarks I am going to ask leave to incorporate a letter which I have received from the Postmaster General to a very large extent explaining the delay. Of course the Post Office Department makes no denial of the fact but what there are delays, and I am going to call upon every Member of this House to read his statement. In my opinion the Postmaster General has done everything that is humanly possible in order to get the mails promptly to the soldiers abroad. He has selected Mr. John Clark, formerly of Cincinnati, Ohio, to be director of postal affairs on our fighting front.

It has been my pleasure to know Mr. Clark rather intimately for 15 or 18 years. I am sure in five minutes' conversation with Mr. Clark any Member of this House would be impressed with Mr. Clark's greatness. I am sure that in one hour's interview with him in regard to postal facilities, he could convince any Member of the House that few and far between are the men in this country who know more about the mails than he does. Mr. Clark was selected for this work; he did not seek it himself. He was selected solely because of his great ability to do this line of work. He is not only over there in person, but his own boy is fighting in the trenches side by side with other soldiers, and, if I mistake not, another son is in a cantonment in this country. Now, I am informed that there has been no complaint about mails failing to reach our naval forces in European waters. The director of mails of England, over here a short time ago, informed our postal authorities that England had the same trouble that we are having now, and they had it for six months. The trouble comes, gentlemen, because the troops as yet are not stationary. They are moving from point to point and place to place. After these mails are delivered at the distributing place, wherever that may be, the mail is then taken charge of exclusively by the military branch of our Government, and I am not going to say, nor does the Post Office Department say, that even the military authorities should be blamed or criticized in failing to get the mail properly to the soldiers——

Mr. MILLER of Minnesota. Will the gentleman yield for an inquiry?

Mr. COX. In a moment—because our troops are being shifted from point to point and place to place, and it makes it very difficult to forward the mail to the addressees. Now I yield for a question.

Mr. MILLER of Minnesota. Do I understand that the mail from here to our soldiers in France goes to Paris for redistribution?

Mr. COX. Not quite all of it——

Mr. MILLER of Minnesota. I did not know——

Mr. COX. I do not think quite all of it, but a majority of it probably does.

Mr. MILLER of Minnesota. I should think it would be wholly unnecessary for any of it to go there.

Mr. COX. Now, when we consider, gentlemen, for a moment that the mail which reached Paris between the 21st and 23d of December comprised 30,000 sacks of field mail, which required 90 freight cars to carry that mail from port of landing to the final distribution, we begin to get some idea of the tremendous task the War Department is up against in order to get this mail over there. The criticism carried in the press of the country I think has mainly been directed against the Post Office Department. I say the Post Office Department is not criticizing the military branch of the Government and I am not criticizing it, far from it; but if there is any fault to be found, and I do not think there is any, even in the remotest degree it is in the military branch because of the incapacity to get mail to soldiers who are constantly being shifted from point to point and from place to place.

The CHAIRMAN. The time of the gentleman has expired.

Mr. COX. Mr. Chairman, I ask unanimous consent to insert as a part of my remarks a letter which I received from Mr. Praeger, Second Assistant Postmaster General, a letter which he directed to Chairman MOON, of the Committee on the Post Office and Post Roads, and a resumé or explanation of the apparent delay of mail in reaching our forces abroad.

The CHAIRMAN. The gentleman from Indiana asks unanimous consent to extend his remarks in the RECORD by printing certain documents which he has indicated. Is there objection?

Mr. ROGERS. Mr. Chairman, reserving the right to object, I want to say that due to the great courtesy of the gentleman from Indiana [Mr. COX] I was permitted yesterday to examine the material which he proposes to insert in the RECORD. I think it is a valuable contribution to the somewhat voluminous literature on this subject, and I hope that it may go into the CONGRESSIONAL RECORD.

The CHAIRMAN. Is there objection?

Mr. MILLER of Minnesota. Reserving the right to object, I would like to ask the gentleman from Indiana [Mr. COX] a question.

Mr. COX. Yes.

Mr. MILLER of Minnesota. It will take but a moment. Of course mail addressed by any person in the United States to a soldier in France is simply addressed to the soldier, care of the American Expeditionary Force; rarely, if ever, is the battalion, regiment, or company placed on the envelope. Sometimes it is.

Mr. COX. That is true.

Mr. MILLER of Minnesota. Now, naturally that must go into the hands of a competent military person in France or they would never know where the man was. There is no such individual in Paris who does know. Now, I just assume that if the Post Office Department is sending all this mail to Paris it then has to be sent to some other place, because there is no one in Paris that knows where those men are, absolutely no one. That can be said without qualification. They may know where some of them are, but there is no place where they really know except in the Division of Intelligence on the General Staff, in one place. It is a problem we know nothing whatever about, and I am interested to know that this gentleman, Mr. Clark, who is said to be a very competent man, is going over to take charge of it. But I would like to suggest this, that if the Post Office Department sends a man over to take charge of it, let him have complete charge of it and organize the Post Office Department over there so that it will take into contemplation the peculiarities of the situation. Even that would not explain the long delays in mail coming from that country here. May I give an illustration?

Mr. COX. Surely.

Mr. MILLER of Minnesota. I wrote a letter in Paris. I think it was about the middle of October. I arrived here on the 30th day of November, and I got here the very day that letter arrived in Washington. I did not start until the middle of November. Now, there was a month that was lost somewhere. Possibly the letter may have been in the censor's hands. If I understood the gentleman from Massachusetts [Mr. ROGERS] the other day, most of the mail coming from Europe here is coming with reasonable celerity.

Mr. COX. That is what the Post Office Department says.

Mr. MILLER of Minnesota. There are many instances, however, quite to the contrary, but it is the mail from here over there and not the mail from there here. What observation I was able to make is entirely in harmony with the very exhaustive study of the question made by the gentleman from Massachusetts [Mr. ROGERS], and is clearly set forth in the House. And I think the Post Office Department has a lot to do.

Mr. COX. Will the gentleman yield?

Mr. MILLER of Minnesota. I will be pleased to, but I do not know anything about the subject.

Mr. COX. I want to put this query to the gentleman: Has the gentleman taken this subject up with the postal authorities down here?

Mr. MILLER of Minnesota. No; because I have no personal interest in it.

Mr. COX. I will say this—and I think I can speak for the Post Office Department—they would not only court criticisms but inquiries from the Members of the House and take these questions up with the proper authorities, and I think the gentleman from Minnesota could probably get considerable information, if he would make an inquiry, that he would not like to put in the RECORD, such as I have with me now, and if I would put it in I would probably strike it out for fear we might get up some friction between the Post Office Department and the Military Establishment until the two lines of work are thoroughly worked out between the Post Office Department on the one side and the military branch on the other.

Mr. ROGERS. Will the gentleman yield for a question?

Mr. COX. Yes.

Mr. ROGERS. I have just come from a hearing which is being conducted by the Committee on Expenditures in the Post Office Department on this general question, and the testimony, apparently from men who are thoroughly familiar with the inside of the postal situation, indicates that the delay in a large measure occurs at the Chelsea terminal in New York City after the letters and packages come in from their various points of mailing and before they are put upon the steamer and destined to Europe. Has the gentleman any information to that effect?

The CHAIRMAN. The time of the gentleman has expired.

Mr. COX. Mr. Chairman, I ask for three minutes more.

The CHAIRMAN. The gentleman from Indiana asks for three minutes more, out of order. Is there objection? [After a pause.] The Chair hears none.

Mr. ROGERS. This testimony continues that the delay involving censoring is sometimes a matter of weeks just in New York City before the letter or parcel starts on its way. Has the gentleman any information that is specifically directed to that phase of the situation?

Mr. COX. No; I have not. The Post Office Department does not seem to think the delay occurs there. We appropriated this year, as I recall now, $1,600,000 to take charge of our censorship bureau in the city of New York. I think if the gentlemen will read this statement that I am now putting in the RECORD they will find the Post Office Department clears itself of that charge.

Now, just one further thought. Some one stated here the other day that there were not enough postal employees abroad. There were not many who went over there in the first instance, probably less than 40, but in the last three weeks I think 26 additional have gone over, and it becomes a question of transportation to get the clerks in this country transported to France. So they are putting over there all the employees they can possibly get their hands upon and they can get transportation for to handle the postal affairs in France.

Mr. DILL. Will the gentleman yield?

Mr. COX. I will.

Mr. DILL. Does the matter to be put in the RECORD show the number of employees in the postal service in France?

Mr. COX. As I recall now by the evidence before the Committee on the Post Office and Post Roads, it was about 40.

Mr. DILL. I wondered whether what the gentleman is going to print would show the number.

Mr. COX. No; it does not show it. Since that time there have been some 25 or 30 who have gone over.

Mr. DILL. Does the gentleman know whether there has been any increase in the number of employees?

Mr. COX. Twenty-five or thirty have gone over in the last two or three weeks.

Mr. KEARNS. Is the Government experiencing any difficulty in finding means to transport 40 or 50 men to France?

Mr. COX. The transportation problem is a very serious one.

Mr. KEARNS. How, then, would they undertake to transport over there a million men, or 500,000 men, if they are having trouble in getting 40 or 50 over?

Mr. COX. The gentleman had better address that inquiry to the Secretary of War.

Mr. GREEN of Iowa. What explanation does the Post Office Department give for the enormous loss of packages sent over there?

Mr. COX. If the gentleman will read this statement, I think he will find that there are not many packages lost. Ordinarily a parcel-post package will not travel nearly as fast as a letter. A man over there gets a letter saying that a package has been sent. The package does not arrive at the same time as the letter, and the man writes back that the package has not come. There is a complaint. Before the department here can get out a tracer for that package, in many, many cases, to see where it was lost, a letter comes back from the receiver of the package stating that it has reached its destination all right.

Mr. GREEN of Iowa. I had a series of complaints from a number of parties, which indicated that quite a large percentage of the packages were lost.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana to extend his remarks as indicated?

There was no objection.

The matter referred to is as follows:

POST OFFICE DEPARTMENT,
Washington, February 7, 1918.

Hon. WILLIAM E. COX,
House of Representatives.

MY DEAR MR. COX: In view of the very great interest you have taken in the Army Postal Service abroad, I am transmitting herewith a copy of a letter, and its accompanying inclosures, which I have this day addressed to the Hon. JOHN A. MOON, chairman of the Committee on the Post Office and Post Roads, House of Representatives.

Yours, very truly,

OTTO PRAEGER,
Second Assistant Postmaster General.

FEBRUARY 7, 1918.

Hon. JOHN A. MOON,
Chairman Committee on the Post Office and Post Roads,
House of Representatives.

MY DEAR CONGRESSMAN: I am transmitting herewith some information on the handling of the expeditionary mails in France, which I think will interest you in view of the speech of Representative ROGERS, of Massachusetts.

We are sending more than a million letters and considerably more than a million pieces of parcel post and papers to the soldiers in France each month, and naturally there are complaints, especially in the first 60 days after arrival of the troops in the field. The extracts of letters I submit and the inspectors' reports show that these complaints arise only immediately after the arrival of each division sent abroad. The complaints about the mail first came from certain regiments of Regulars, the earliest troops sent across. The complaints from this source soon ceased. Next came complaints from certain units, such as Coast Artillery, Quartermaster Corps, and field clerks. Next, the railway engineers went across, and complaints were numerous and vigorous. Gradually they died out, and now we do not get one a week. Next, certain regiments from New England crossed to France, and numerous complaints followed. They have not yet ceased, as Representatie ROGERS's letter will show, but they are growing less. Since then the so-called rainbow division has gone to the front, and the Post Office Department is in the midst of complaints from that source, but it will pass over as soon as the division gets into a settled location and schooled in the handling of its own mail. Other divisions will go, and their mail communications will be temporarily disturbed. Does it not mean something that the Regulars are getting their mail, that the railway engineers no longer have reason to complain, and that the complaints of the later arriving troops are already beginning to fall off?

Again, complaints about mail from the boys at the front to the folks at home are few and far between, less than a dozen a month, and these sometimes deal with the censorship delays, as is disclosed by comparing the letter date within and the date of the postmark. The same force that is handling the mail to the soldiers is handling it from the soldiers. The difference is that the Post Office Department delivers the individual mail pieces into the hands of the addressees in the States, whereas it does not deliver mail to the addressees in France, but turns it over in bulk to the military authorities who distribute the mail to the individual soldiers. The mail passes out of the authority of the Post Office Department some time before it is delivered to the individual soldier. There is no significance in the fact that the postal authorities in France who handle the mail going to shifting military units at the front is the same force that brings the mail back to the home folks without giving rise to complaints?

It is necessary to bear in mind certain facts to arrive at a conclusion about the mail service to the troops in France:

First. That the Post Office Department does not deliver the mail to the individual soldiers, but to the properly accredited military authorities in bulk just as it comes from the United States.

Second. That mail to the soldiers is not distributed in France, but is made up to companies in New York and Chicago, and these lead-covered sacks are never opened after they leave New York until the military mail orderly opens them at the headquarters of the troops, when he delivers the letters, papers, or parcels to the individual soldiers. Only mail from the soldiers going to the United States is distributed by the postal clerks in France.

Third. That mail for the troops does not accumulate in any postal station, except such mail as the mail orderlies have not been able to deliver, or mail for such units as are on the move or whose location for war reasons the military authorities are not ready to disclose to the postal authorities.

Fourth. That mail for the troops is not sent to Paris except for such troops as may be located in Paris, but all mail for troops whose location has been furnished to the postal authorities by the commanding general of the lines of communication is sent from the port of debarkation direct to the points where the troops are located.

Fifth. That the mail is transmitted by every available steamer, by every available train in France, and should easily reach the regimental and company headquarters of the troops in from 15 to 30 days' time. The Post Office Department has no jurisdiction over the mail after the unopened sacks have been turned over to the military mail orderlies, but it is informed that the individual soldiers get their letters, parcels, etc., promptly, and that if there is any delay it is due to the fact that the soldier is not with his company at the time the mail arrives, or that the mail has been insufficiently or incorrectly addressed, or that the company itself shifted location shortly before the mail arrived.

The attached memorandum, with the excerpts from the inspectors' reports and from numerous letters of appreciation written by mail patrons who once bitterly complained about the service, may help to throw light on a subject so little understood.

Very sincerely, yours.

OTTO PRAEGER,
Second Assistant Postmaster General.

POST OFFICE DEPARTMENT,
SECOND ASSISTANT POSTMASTER GENERAL,
Washington, February 7, 1918.

MEMORANDUM OF MAIL SERVICE TO FRANCE.

Many obstacles have been faced and overcome by the United States Postal Service in establishing and carrying on the present mail service to and from the American Army in France. This difficult war service has been operated to date as expeditiously and efficiently as could be expected under the circumstances. By adding rapidly to the force of postal experts in France and by bettering, as fast as possible, the system of distribution at our camps and bases in France, the military mail service has been steadily improving.

The charges of delay and nondelivery of mail of all classes from the United States to soldiers and officers of our forces abroad, made in the House of Representatives February 5 by the Hon. JOHN J. ROGERS, of Massachusetts, it is easily shown, relate to a comparatively small part of this military mail. Such delays as have occurred have been due in the main to conditions over which the post office has no control.

This statement is made in order that some of the difficult factors entering into this postal problem may be fully understood. It is true, as stated by the Postmaster General January 31 in answer to House resolution 232, that the time in transit of the bulk of the mail from the United States to units of our Army in France has been from 15 to 30 days. But it is likewise true that after passing into the hands of the military authorities the mail has to be distributed and often readdressed and remailed before reaching the addressees, a process not in postal hands and one into which delays have at times entered. And it is also true that units have been frequently moved, and that considerable time has elapsed, amounting in instances to two weeks, before the United States Postal Service in France for war reasons has been advised of the new address of the regiment or unit thus moved.

It is admitted that mail from France is reaching addressees in this country as promptly as the present conditions of ocean transportation permit. This statement, therefore, deals only with the outgoing military mail.

Letters, papers, and parcels addressed to American soldiers and officers in France are made up at special terminals at Chicago and New York into direct sealed sacks and pouches addressed by companies to regiments or other units. These sealed pouches and sacks go direct by the first available dispatch from Atlantic ports to the port of debarkation in France, and thence direct to the postal station in France nearest the camp of the unit to which they are addressed. Each regiment or unit sends a military truck to this postal station for its mail. The mail is taken by this truck from the postal station to the military post office of each unit.

The bulk of the Army mail from the United States does not go through Paris but is taken direct, as stated above, from the port of debarkation either by military trains or regular train service to the postal station.

The opinion expressed by the Hon. JOHN F. MILLER, of Washington, while interrogating Mr. ROGERS in the course of the latter's speech, that this mail passes through Paris and is delayed by congestion there was evidently based upon Mr. MILLER'S observation of our large postal establishment in Paris. It is outgoing mail originating in Paris which is "worked" in Paris; not the incoming. A portion of the mail from the United States, consisting principally of that for special units, such as the Red Cross, the Aviation Service, the Medical Corps, Signal Corps, etc., all the general mail returned as undeliverable from postal stations near the American camps does go to or through Paris. Officers and men of the special services are liable to frequent change of assignment in our own Armies and in the armies of our allies. They are subject to call to any part of the line, from Italy to Belgium. Mail for them can be better and more expeditiously handled at Paris. The undeliverable letters pass through Paris to a special American postal station, where it is turned over to the Army and given what corresponds to "directory service."

The specific complaints cited by Mr. ROGERS class into two groups. The one group has to do with mail to members of the Medical and Signal Corps; the other, with mail addressed to New England regiments, the One hundred and first and One hundred and second and to the Rainbow Division. The reasons why mail to members of the Medical and Signal Corps is especially subject to delay are stated above. Officers and men in those particular services are transferred frequently, and entire units are often moved hurriedly. When a unit is moved, and this applies to Infantry and Artillery also, the Postal Service may not send mail for the units so moved to the new addresses until authorized to do so by the military authorities, as some of these movements of units have been part of secret plans. At times the Post Office Department has been compelled to continue sending mail to the old addresses, although postal men know the unit in question had been moved.

The complaints as to letters, papers, and parcels, addressed to New England troops, but repeat the experience of the department. When an American division lands in France, it is likely to be moved several times before being permanently placed in some one sector of the front. During this interval of movement through some three or four camps, the regular and prompt delivery of mail from the United States is not always possible. This is true both because of postal and military reasons.

Reports to the department show that frequently quantities of mail are received in France addressed to units not yet there. The senders, of course, can not have exact knowledge as to when the addressees, whom they suppose, or are informed, have sailed for France, may be expected to land there. Such mail is held until our Postal Service in France is advised by the military authorities of the address of the unit in question.

In his speech, Mr. ROGERS did not specify, in any one instance, whether mail, of which delay was complained, was properly addressed. The quantity of mail of all classes to our Expeditionary Forces, upon which the full military address—that is, name, company, and regiment, and branch of the service—does not appear, unfortunately is very large. All such mail must go to Army headquarters for "directory service."

Without in any way reflecting upon the Army, it is true that the actual delivery of letters to the addressee in France is in the hands of Army orderlies designated by their units for this purpose, and that these orderlies are not always efficient until they have had a training in the work. There should not be confusion between American postal stations in France and American military post offices in the field. In the former mail is not allowed to lie dead any length of time. If returned from Army field post offices to a postal station as undeliverable, or to be forwarded, mail is at once properly forwarded or sent to headquarters for directory service. Cases have been found by an American post-office inspector in which the orderlies at the field Army post offices did not handle their undeliverable mail as promptly as they should. It is proper to add here, also, that a number of highly trained postal men are in France and are endeavoring, to the best of their ability, to expedite the handling of mail, both at the postal stations in France and at the military post offices. There is no friction between the Army and the Postal Service; there is merely a condition to be met by cooperation and experience.

The Postmaster General stated on January 31, in response to House resolution 232, that letter mail clears entirely with every dispatch from New York, and that there has been very little delay at New York of parcel post or paper mail. That is true. It is also to be remembered, however, that vessels clearing from New York upon different dates are under special sailing orders and may arrive at the French port of destination on the same date. It is a fact that usually the mail arrives in France by a number of ships in lots varying from 5,000 to 15,000 bags and pouches. This presents a very large problem at the French port. It is a heavy undertaking to transfer these mails to trains, to route all of the bags and pouches properly, and to secure prompt dispatch. There have been difficulties in obtaining adequate labor and a sufficient number of hand and automobile trucks. The Post Office Department has done its utmost to surmount these difficulties and has succeeded beyond its expectations. Twenty-one thousands sacks of Christmas parcels for our soldiers abroad were dispatched from New York December 3 on one ship alone and arrived at a French port on December 20. All this mail was turned over from our 25 postal stations in France to the military authorities for delivery by December 24 and 25, as is shown by the following Associated Press dispatch from Paris on December 27:

FOUR CARS OF BELATED MAIL REACH TROOPS IN FRANCE.

"PARIS, DECEMBER 27.

"Four carloads of Christmas mail, which arrived at a French port from the United States, were forwarded to-day for delivery at the headquarters of the regimental units of the American expeditionary forces. The bulk of the Christmas mail, which consisted of 30,000 sacks and required 90 freight cars to move, was delivered at headquarters of the various units on or before Christmas Day, but a storm at sea delayed for three days the arrival of the mail sent forward to-day.

"Besides the mail delivered by the Army post office there were several carloads of large packages, each weighing more than 7 pounds, which were handled by the Quartermaster's Department."

The American Postal Service has been aided in reaching its high state of efficiency in the United States to-day by thorough consideration of complaints of inadequacy of service. When the complaints are found to be just, steps are taken to find remedies. Our present service in France is no exception. All complaints received are given thorough study by the proper postal officials. Following is a summarization of complaints which were referred to a post-office inspector assigned to the United States Army Postal Service. The text of the inspector's reports is given:

Subject: United States Army Postal Service in France. Complaints against the service.

POST OFFICE DEPARTMENT.
OFFICE OF INSPECTOR, ——— DIVISION,
Paris, France, December 4, 1917.

CHIEF INSPECTOR, *Washington, D. C.:*

In further reference to your letters of September 28 and October 2, transmitting a number of complaints relative to the alleged nonreceipt by addressees with the forces in France of letter and parcel mail, I have to submit herewith the correspondence in 18 of these cases which have been investigated by me. Twelve cases are still on hand, the answers to which have not been received, although ample time has elapsed. A subsequent report will be rendered on the cases still pending.

This report should be handed to the Second Assistant for his personal information. The results of the investigation show hardly without an exception that all mail has reached the addressees, and that the complaints are due wholly to ignorance of the prevailing conditions of slow transportation across the Atlantic and impatience on the part of senders and addressees. It is hoped that when the general condition of slow transportation is better understood throughout the United States that such complaints will cease or that the addressees will refrain from making a complaint until sufficient time has elapsed.

It is unnecessary to enter into detail in this report concerning each individual case, the file submitted as an exhibit fully explaining each complaint. The names and general details of each case are submitted, however, merely as a matter of record. A full idea of the complaint, however, will be obtained by reading each case. I suggest that the files in each case be retained at the department, and that if correspondence be had with the complainants that the result of the investigation be communicated only. This is suggested in order that the department may retain and be in possession of the files if needed at a later date for any purpose.

No. 1. Helmer J. Johnson, Sixteenth Infantry, wrote his mother that he was sending her money every month. His mother reported through Congressman J. H. DAVIDSON that she had never received any. Complaint was made as to the loss of mail, but investigation shows that Johnson never sent any money by mail, but made an allotment through the Army paymaster, which was handled in an entirely different manner.

No. 2. Mr. W. B. Clarkson, of San Antonio, makes complaint that he had sent his son, Lieut. W. P. Clarkson, of the Twenty-sixth Infantry, 10 parcels of cigarettes, and that his son reported he had received none of them. Investigation shows he had received to date eight packages of cigarettes and all were in good condition, and that he is now receiving all his mail. No reason to believe the other two parcels reported sent were lost, as they will be received in due time.

No. 3. Dr. V. J. Irwin, of Springfield, Mass., complains that his son, Corpl. Charles R. Irwin, of the Twenty-sixth Infantry, had not received any mail from home. The addressee advises that he received nine letters recently. He did not say how many he received before. No reason to believe any of his mail is lost.

No. 4. Mrs. J. McCurdy, of Chicago, complains that she has written to Pvt. H. E. McCurdy, of the Seventeenth Company, Fifth Regiment Marines, but he has received none of her letters. Pvt. McCurdy advises "I have every reason to believe I have received all mail sent me." No mail lost in this case.

No. 5. Frank R. Davies, of Sheepshead Bay, N. Y., complains that he has written to Pvt. Lester S. Davies, of the Quartermaster Department, but that the addressee has received none of his letters. Pvt. Davies advises me that he has received all of his letters up to date.

No. 6. Mrs. Annie J. Wharton, of Homewood, Ill., complains that she has written numerous letters to Lieut. James F. Wharton, Military Reserve Corps, who advises he has received none of her letters. Lieut. Wharton advises me that he has received 19 letters from her, and gives a list of them with dates. No delay and no loss in this case.

No. 7. Miss Kathryn M. Kehoe, of Brooklyn, N. Y., complains, September 12, that she has received only two letters from Pvt. John Addy, of the Eleventh Engineers, who left New York July 14. She hardly had time to receive more in that short time, as letters usually take 30 days. Addy says he has word from Miss Kehoe that she has received 6 of his letters. He says he received 24 from her. No loss and no reason for complaint.

No. 8. Miss M. Currier, of Haverhill, Mass, makes complaint that she has written to Patrick J. Lucey, of Company B, Fourteenth Engineers, and that he has received none of her letters. Lucey advises that he has received all letters and parcels from her and that none are lost.

No. 9. Miss Vernitta Eves, of St. Louis, complains that Edgar Dennison, Twelfth Engineers, left the United States on July 26 and that by September 8 (43 days) she had heard from him only once. Some transports take 22 days to cross. She is therefore getting good service if she heard from him that quick, and should commend the postal department rather than enter a complaint. Edgar Dennison says he has received all letters from her. No loss and no reason for complaint.

No. 10. Mary E. Boyle, of Flushing, N. Y., makes complaint, under date of September 24, that she has been writing to Sergt. Thomas P. Connors, Eleventh Engineers, and has not received a reply. I communicated with Connors and he states he received a letter from Mary E Boyle dated September 21, in which she stated she had received letters Nos. 1 and 2 from him. The complainant has, therefore, misrepresented the facts in her complaint. (See correspondence.)

No. 11. Mr. Frank Mahnke, of Brooklyn, N. Y., complains that he has written to his son, Pvt. W. Mahnke, Quartermaster's Department, but his son advises him that he has received no letters from home. Pvt. Mahnke advises me he has received three letters from home, one taking 20 and the other 30 days to reach him. He is getting good service, and there is no basis for complaint.

No. 12. Bernard White, of Watseka, Ill., complains that he has written to Irenus J. Feffer, of the Sixteenth Infantry, but that Feffer has not received his letters. Feffer advises he has received two letters from White recently.

No. 13. Mrs. D. B. Inman, of Havre de Grace, Md., complains that her husband, D. B. Inman, of the Medical Supply Depot, has received but one letter from her. Inman states his letters have been coming along very well during the past six weeks. One letter he received in 19 days and another in 34 days. The latter was due to infrequent sailings, the same thing happening to mail for postal headquarters and others. No mail lost and no basis for complaint.

No. 14. The complaint of Mrs. Virginia Neal, Tucson, Ariz., has no bearing on the French service and should be investigated at Tucson, Ariz.

No. 15. R. D. Rhodes, of Newcastle, Pa., complains that some music sent him from France by Harvey Bush, Fifth Engineer Corps, not received. Our records show no Fifth Engineers in France. We have about 34 sacks of mail awaiting this regiment, which has been held some time. Correspond with R. D. Rhodes and ask him where Harvey Bush is and with what outfit.

No. 16. E. D. Woisard, of Pittston, Pa., complains he has not heard from his son in France. He does not know whether his son has written or not, but just thinks so. He does not give the name of his son, so nothing can be done here in France. I suggest writing to him from the department and asking him if he has heard.

No. 17. Representative Steenerson complains that Mrs. Harry E. Gladman, Washington, D. C., has not heard from J. L. Stoddart, of United States Army, Base Hospital 10, who advises others he has written her. He advises me he has written her three letters. I suggest investigation at Washington to see if she has not received these letters by now.

No. 18. Mrs. J. W. Fuller, of San Antonio, Tex., complains that letters and parcels sent to Lyda C. King, a nurse in Hospital 2, France, have not been received. Lyda C. King states she has received two letters and two parcels. It is not stated how many letters were written, so there is no way to tell here if any were lost.

When answers have been received to the other few complaints on hand a supplementary report will be submitted, but it is believed some will not answer, as they are receiving their mail and pay no further attention to the investigation.

(Signed) W. A. KENYON,
Post Office Inspector, U. S. Army Postal Service, France.

Eighteen complaints and correspondence submitted herewith.

PARIS, FRANCE, *January 17, 1918.*

CHIEF INSPECTOR,
Washington, D. C.:

I have to submit herewith a supplementary report to that submitted December 4, 1917, relating to complaints as to the alleged nonreceipt by addressees with the troops in France of letters and parcels. This report covers investigation in 18 separate cases. Numerous cases are still on hand, the answers to which have not been received. A subsequent report will be rendered covering cases still outstanding.

The investigation in the 18 cases submitted herewith shows without a single exception that all mail has been received by addressees. The complaints are due wholly to lack of knowledge of prevailing conditions or impatience on the part of the complainants.

The complete file is submitted in each case. In this report, however, only a general outline is given in each instance. I suggest that the files be retained at the department, so that we will be in possession of all the facts if needed at a later date for any purpose. If correspondence be had with the complainants, the result of the investigation only should be communicated.

No. 1. Gall & Lembke, New York City, made a complaint on Form 1510 that they mailed a parcel containing gold-filled spectacles, valued at $16.50, to Capt. E. R. McFarland, U. S. R., Signal Corps, France, but that he reports not having received them. Inquiry shows that Capt. McFarland has received the glasses in good condition. No loss.

No. 2. Myrtle Buzan, of Pendleton, Oreg., complains she has written twice each week to Private Buzan, Company F, Eighteenth Railway Engineers, France, but that he reports having received only two letters from her. He states that up to the present time he has received all of his mail.

No. 3. Mr. A. W. Hurley, Pawhuska, Okla., complains that if the 40 or 50 letters that he has written Capt Thomas D. Hurley, United States Army Ambulance Corps, he, Capt. Hurley, has received none of them. Addressee states that he has received so far 29 letters from members of his family. No doubt in due time he will receive all the mail sent him.

No. 4. John L. Fitzgerald, Pittsfield, Mass., complains that he has sent a parcel containing miscellaneous articles to Corpl. W. F. Fitzgerald, Company D, Fourteenth Railway Engineers, but that the addressee reports that he received only the razor and strop, with many articles missing. Addressee advises that the parcel was received in perfect condition with no loss Absolutely no loss in this case.

No. 5. M. F. Kane, Shamokin, Pa., complains that he has written six letters and his friends nine letters to M. J. Kane, United States Army Ambulance Corps, Section 9, France, who reports having received none of them. Addressee states that he has received so far five letters from his father and five from his friends. No doubt he will receive all in due time. He complained of slow delivery of his mail upon first arriving in France. This delay is due, without doubt, to the fact that the United States Army ambulance service with the French and British have frequently had the numbers changed; also that all of this mail is handled by the American field office. Conditions in the mail room of the American field service in the early days of the war were not favorable, which no doubt accounts for the delay in the receipt of mail.

No. 6. Mrs. John S. Boyd, Pittsburgh, Pa., complains that John S. Boyd, Fifteenth United States Engineers, has failed to receive $10 in money which was sent him and also no packages of tobacco which have been sent him. The addressee advises that he has received the $10 and also all parcels sent to him

No. 7. William Nash, Chicago, Ill., complains that he has sent W. E. Nash, section 58, United States Army Aviation Service, about one dozen packages and many letters, of which but one letter has been received. The addressee advises that the delay to his mail was due to his having been changed from section 10 to section 58, but that he is now receiving his letters regularly, and that he has received many parcels. He complains, however, that he has not yet received all the parcels which he believes have been sent him. These parcels will no doubt reach him in due time.

No. 8. Mrs. W. C. Strange, Columbia, S. C., complains that she has written on several occasions since September 1 to her husband, Capt. Willis C. Strange, quartermaster, United States Reserves, and that he has received no letters from her. Investigation develops that Capt. Strange has received 25 letters. He states that several letters are at present outstanding, according to numbers. This is not unusual, as some mails reach France earlier than those previously dispatched.

No. 9. Mr. John A. Loughenry, St. Claire, Pa., complains that John J. Loughenry, Company E, Twenty-sixth Infantry, has failed to get papers and packages sent him. The addressee states that he has received three packages and one paper since being in France. Apparently some parcels are still outstanding.

No. 10. Mr. Davis Brown, Albany, Ga., complains that his son, Lieut. Jerome H. Brown, Company L, Twenty-eighth Infantry, has failed to receive letters written to him. Lieut. Brown states that he is receiving his mail regularly now, but that packages mailed on October 19 and November 17 have not arrived. No doubt Lieut. Brown will receive packages in due time.

No. 11. Mr. A. C. Baker, New York, complains that his son, Pvt. Baker, Company F, Nineteenth Engineers, has failed to receive any letters or parcels sent him from home. Pvt. Baker states that he has received all mail from home, including the packages, which is in all about 50 letters and 5 or 6 packages, and that he has written his folks every time he has received mail.

No. 12. Miss Marion Baum, of Elizabeth, N. J., complains that she has written many letters and sent one package to Pvt. Clayton Lockwood, First Trench Mortar Battery, and that none of her letters or the package has been received by him. Lockwood states that he has received about 15 letters and 2 packages from her.

No. 13. Mrs. S. L Littlefield, of Lankershin, Cal., complains she has frequently written Leon M. Littlefield, Headquarters Divisional Supply Company, and that he has received one letter from her. He replies that he has received at least 12 or 14 letters and one package of tobacco and has answered every letter. No loss.

No. 14. Mr. L. L. Rea, Auburn, N. Y., complains that he writes Corpl. L. Earle Rea, Seventeenth Company, Fifth Marines, and that no letters have been received by the addressee. Corpl. Rea advises that during the last few months his mail has been coming regularly, and that he has received all that was coming to him.

No. 15. The family of Lieut. Mettis, Ordnance Department, United States Reserves, complains from Severville, N. J., that they have written him many letters, including one registered, and that none of them has been received by him. Addressee advises that he has received to present date 14 letters, including the registered. He also expressed his opinion that delay to mail is not due to the post office in France. This matter has been taken up in France with the Army headquarters.

No. 16. Mrs. S. W. Musselman, of Perkasie, Pa., complains that Paul F. Musselman, formerly assigned to Medical Department, Casual Seventh Regiment, Coast Artillery, has not received any mail whatsoever. Paul Musselman advises that he is now attached to the Sixteenth Infantry, and that he has received all of his letters to date. One package of mail of November 1 he claimed he has not received, but this package was not due in France yet, as ships have just lately arrived. There is no just cause for complaint.

No. 17. William Luers, Cincinnati, Ohio, complains letters have been sent every week to John M. Luers, Company D, Sixteenth Railway Engineers, and that none of them have been received by the addressee. Addressee states that all of his mail is now being delivered promptly.

No. 18. Mrs. S. S. Weidmeyer, of Brooklyn, N. Y., complains that she has sent about 24 letters, cigarettes, and candy to Sergt. Harry C. Weidmeyer, Battery E, Seventh Field Artillery, but that he has received none of them. Harry C. Weidmeyer advises that he has received to date 12 letters and one package. He gives his address as Battery B, while the complainant has been addressing his mail to Battery E, which no doubt accounts for loss of some of the letters. The failure to deliver is therefore not due to delinquency on the part of the Postal Service, but to failure to properly address the mail.

(Signed) W. A. KENYON,
Post Office Inspector,
United States Army Postal Service.

The above was not prepared with any thought of its publication. These reports in the above circumstances tend to show that in by far the majority of cases mail of all classes is reaching the addressees in France as promptly as could be expected.

Other such reports received by the department state that "a large number of letters are returned from the chief surgeon's office, the chief quartermaster, the chief signal officer, and other such staff corps, whose men are detached and located all over France"; that "the French railroad lines are taxed to capacity and their own soldiers' mail is sent by military freight trains"; and that most of the "complaints are due wholly to ignorance on the part of the complainants as to the conditions of transportation."

Since American soldiers went to France more than 100,000 bags and pouches of mail have been dispatched to them and safely landed in France without the loss of a bag or pouch. Considering the enormous quantity, bulk, and weight of this mail, complaints of loss, damage, and delay have been surprisingly few. It is to be remembered that this statement deals only with the relatively small quantity of which complaint has been made. Some delay and possibly some loss, as has been shown, is inevitable under the circumstances.

The complaints of poor service are given prominence, whereas the reports of good service do not reach the public. The department could array an enormous bulk of testimony from our military forces in France showing their satisfaction with the service. As has been stated, complaints are frequent upon the arrival of troops in France, but in very many cases, sometimes a few days after the complaints were written, the complainants write again to thank the Post Office Department and to say that their correspondents were receiving their mail, as is shown by the following synopsis of letters:

EXTRACTS FROM COMPLAINTS RECEIVED FROM PERSONS IN THIS COUNTRY AS TO THE NONRECEIPT OF MAIL BY MEMBERS OF THE AMERICAN EXPEDITIONARY FORCES AND EXTRACTS FROM SUBSEQUENT LETTERS ADVISING THAT MAIL IS BEING RECEIVED.

August 27, 1917, Mrs. Mary Kaplan, 212 West One hundred and eleventh Street, New York City, advised that her son, David Kaplan, arrived in France July 8 for service with the Quartermaster Department; that a number of letters had been written to him, but that in a letter from him dated August 5 he stated that he had not received a single letter from home.

September 7, 1917, Mrs. Kaplan again wrote the department advising that since her former letter "my son has acknowledged letters received from home."

August 31, 1917, the postmaster at Chicago wrote that Mr. W. P. Quinby, 69 West Washington Street, Chicago, the father of Sergt. William Quinby, of the Quartermaster Corps, desired information as to why letters addressed to his son could not be delivered, and inclosed envelopes returned to the father.

November 7, 1917, Mr. Quinby wrote the postmaster at Chicago that it appeared there was another Sergt. William Quinby in Paris, to whom his son's letters had been delivered: that when this William Quinby learned his son's address he turned the letters over to him, and "since that time there has been no trouble."

—

September 7, 1917, Rev. Charles Trowbridge, 402 Cattell Street, Easton, Pa., advised that up to August 10 his son had received only 10 of 24 letters that had been mailed to him and that all mail had been addressed in the same way.

September 30, 1917, Mr. Trowbridge again wrote the department stating "word has been received to-day from my son and he informs me that my letters to him are coming regularly, or were up to September 8, the date of his last letter to me."

—

September 24, 1917, Mary E. Boyle, Flushing, N. Y., advised that Sergt. Thomas P. Connors, Company A, Eleventh Railway Engineers, United States Army, American Expeditionary Forces, was not receiving mail.

October 5, 1917, Miss Boyle advised that "since writing you I have received word that Sergt. Connors received on September 4 a letter mailed from Flushing to him on August 11."

—

September 27, 1917, D. S. Middleton, Jeffersonville, Pa., advised that his son had been in France since June 16; that on the 15th of July candy was sent him and a week later more candy and razor blades, addressed as he advised; that these things had not been received.

October 12, 1917, Mr. Middleton advised that in a letter from his son dated September 16 he stated that he received the box of candy sent him July 15 and the razor blades (Sept. 14) sent him on August 16, but not the candy sent him on the same day. "I guess it takes a little longer to censor candy than it does razor blades."

—

September 28, 1917, V. J. Irwin, 351 Main Street, Springfield, Mass., advised of the nonreceipt of mail by his son with the American expeditionary forces.

November 3, 1917, Mr. Irwin advised the department that he had received a letter from his son stating that he received within three days four of the letters sent to him. The reason for the delay was that the regiment and company were omitted from some of the addresses, the censor having erased both on the first letter sent.

—

October 3, 1917, a telegram was received from John E. Frenning, Boston, Mass., advising that since July 1 at different times he had sent approximately 30 packages by parcel post to Jack and Alfred Frenning, also Oliver Beebe, care of 21 Rue Raynouard, Paris, from Belmont and Boston, Mass., containing over $150 worth of clothing, but that up to September 4 none had been received.

October 22, 1917, Mr. Frenning advised, "Received word last week from our two sons that they have received much of the parcel-post matter that was sent to them last July."

—

October 4, 1917, Mrs. John J. Fowler, Grahamles, Spring Lake, N. J., advised that mail for her son, "Sergt. John C. Fowler," addressed "Headquarters Company, Motor Truck Group, American Expeditionary Forces," was not being received.

October 17, 1917, Mrs. Fowler advised the department: "Thank you so much for your information regarding mail and parcel-post matter for the boys in France. I have the extreme pleasure of letting you know that this morning I was the happy recipient of a letter from my son saying that mail had been received all O. K. Thanking you for your interest and lovely letter."

—

October 6, 1917, Mr. Armstrong, of Armstrong & Demarest, Lafayette, N. J., wrote regarding the nonreceipt of mail by his son, O. P. Armstrong, addressed "Care American Red Cross Ambulance, 7 Rue Francois Premier, S. S. U. 62, Paris, France."

October 18, 1917, Mr. Armstrong advised that his son had received the first two packages via parcel post.

—

October 13, 1917, W. John Crawford, Clifton Heights, Pa., advised that mail for his son, with the Seventh Field Artillery as a first lieutenant, Officers' Reserve Corps, was not being received. "I receive his mail very regularly, but he had not received any mail on the 24th of September."

October 22, 1917, Mr. Crawford advised that on the 29th of September his son received five letters, dated from September 2 to 12. "My last letter from him came through in 16 days."

—

October 22, 1917, L. F. Clark, care Aetna Life Insurance Co., Cincinnati, Ohio, advised that his father, Mr. John Clark, the postal agent in France, advised that he had received no word from home since his arrival in France.

November 22, 1917, Mr. Clark advised that "since receiving the information from you we have heard from him, and find that he is getting all the packages and letters regularly."

—

November 5, 1917, Justice Walter I. McCoy, District of Columbia Supreme Court, submitted to the department copies of letters written by him to the Secretary of War with reference to the nonreceipt of mail by his son, George B. McCoy, first lieutenant, Infantry, Officers' Reserve Corps, A. E. F. (par. B. C. M., Paris). Up to October 17 he had not received one letter from his family.

November 13, 1917, Justice McCoy advised that "we had a letter from my son this morning, dated October 22, saying that he had received several letters from Mrs. McCoy and myself and from others, the latest of which was dated September 27. I wish to thank you again for your attention to the matter."

—

November 12, 1917, the postmaster at Chicago submitted a letter from Arthur M. Heath, 1825 Seward Street, Chicago, advising that since August 29 at least 50 letters and 4 packages had been addressed to his son, "Lieut. Monroe Heath, unassigned, United States Army, Infantry United States Reserves, American Expeditionary Forces," and that under date of October 15 his son advised that he had not received any mail. In this letter he gave another address, "Infantry, United States Reserves, American Expeditionary Forces, B. C. M., Paris France." Request was made that attention be given the matter.

November 22, 1917, Mr. Heath advised "I wish to thank you * * * and to advise that we have received letters from our son, in which he states that he is now receiving mail, and at the time of writing had had a number of letters."

—

November 16, 1917, Hilton N. Brown, sr., care Indianapolis News, Indianapolis, Ind., advised: "We have utterly failed to reach by mail my son, Second Lieut. Hilton N. Brown, unattached, Field Artillery, United States Reserves, American Expeditionary Forces, via New York City." We have had letters from him dated as late as October 27, and up to that time he had not heard a word from this country since he sailed about the 1st of September. When we began to hear from him he advised us to send mail in care of "Field Artillery School of Instruction, American Expeditionary Forces," and packages were addressed in that manner.

December 1 Mr. Brown advises by telegraph: "My son is now beginning to receive letters, indicating communication lines are open. Thanks."

—

November 12, 1917, Miss Nettie White, 286 K Street, South Boston, Mass., advised of the nonreceipt of mail sent to Mr. Charles E. Ryan, Company B, One hundred and first Massachusetts Infantry, American Expeditionary Forces.

November 23, 1917, Miss White advised "Mr. Ryan has received some of my letters. Will receive all letters, I hope."

—

November 13, 1917, L. L. Rea, Auburn, N. Y., advised that in a letter dated October 27 from his son, Corpl. L. Earl Rea, Seventeenth Company, Infantry Battalion, Fifth Regiment, United States Marine Corps, he advised that he had not had a letter in six weeks. "We write him every week and sometimes several letters. We have sent him several packages and he has received but one."

November 30, 1917, Mr. Rea advised: "Am pleased to report that my son has advised that he has received a number of letters all in a bunch, and that he felt like a new man. I wish to thank you for your very kind letter to me. The spirit which ran through the letter and the information was most helpful to us all."

—

October 15, 1917, Mrs. Hedie MacDonald, Box 406, Marfa, Tex., advised that her husband, Pvt. John W. MacDonald, Quartermaster Corps, left for France on July 20, and that he was not receiving her letters.

October —, 1917, Mrs. MacDonald advised: "The letters to which I referred in my former letter have part been received so far."

—

November 1, 1917, David Brown, Albany, Ga., advised that his son, Lieut. Jerome H. Brown, Infantry Section, Officers' Reserve Corps, United States Army, Post-Office Box 703, American Expeditionary Force, reported that he had not received any letters from home, although he sailed from New York on September 7. "In our last letter received from him to-day he states that only one letter has been received at the training school which he is attending."

December 1 (?), 1917, Mr. Brown advises that some of the mail sent his son in September has been received, "and I trust, with your cooperation, that all of the mail will be forwarded to him promptly."

—

November 21, 1917, Mrs. George Brown, Box 267, Sutherland Springs, Tex., advised of the nonreceipt of mail addressed as follows: "Mr. Edwin Willingham, Headquarters Company 28, United States Infantry, American Forces, France."

December 14, 1917, Mrs. Brown advised: "Mr. Willingham has received the box you were having looked into which was sent September 14. He received it about the 19th of November."

—

December 1, 1917, Representative H. J. STEELE, of Pennsylvania, advised that Daniel McCarthy, of Easton, Pa., had informed him that his son, Corpl. Daniel McCarthy, Battery H, Sixth Regiment, Coast Artillery Guards, American Expeditionary Forces, had not received any of the mail sent him from home or from his friends in Easton.

December 5, 1917, Representative STEELE transmits a letter from Mr. McCarthy, in which he says that word has just been received from his son advising that he has received some of his mail.

—

November 22, 1917, the War Department transmitted a letter from Mrs. Marcus G. Evans, 953 Bryden Road, Columbus, Ohio, advising that about 20 boxes had been sent to her son, who landed in France August 20, also many letters; none received.

Later Mrs. Evans advised: "I wish to tell you how much I appreciate your kindness. I received a letter last week from my son, saying that the day before he wrote (November 6) he received five packages and three letters from me. I hope, through your efforts, he will receive the rest."

—

December 7, 1917, Mr. Rudolph Forster, The White House, advised that a friend of his had written that mail addressed to his son, J. W. McGrath, jr., Company E, One hundred and first Regiment Infantry, Twenty-sixth Division, American Expeditionary Forces, was not being received. The first package was mailed on September 27, and this had not reached him up to the 10th or 15th of November.

December 17, 1917, Mr. Forster quotes a letter from the friend dated December 14: "I want to say that I have just received word from the boy in France, and he has received two or three packages which I mailed him. I think that perhaps the others will reach him later."

—

December 6, 1917, F. A. M. Burrell, 1409 Albemarle Road, Brooklyn, N. Y., advised that his son, Harold A. Burrell, care Y. M. C. A., 31 Avenue Montaigne, Paris, was not receiving his mail.

December 12, 1917, Mr. Burrell advised, "I have just heard that my son, H. A. Burrell received the first package sent him on November 20. It was mailed in New York September 15.

December 21, 1917, Mr. Burrell advised that packages of tobacco and cigarettes sent to his brother, Charles S. Burrell, Sixth Battalion Canadian Troops, France, which he thought lost were beginning to arrive, and "I am finding the facts mentioned in your printed circular of November 27 are correct."

December 5, 1917, Charles V. Hilding, 307 Fourth National Bank, Grand Rapids, Mich., advised that mail for his brother, Pvt. Axel E. Hilding, Company C, Sixteenth Engineers Regiment, American Expeditionary Forces, was not being received.

December 13, 1917, Mr. Hilding advised, "I am very glad to advise you that day before yesterday I received a letter from my brother informing me that he had received some mail and had also received one package of tobacco. While there has been considerable delay, yet it is pleasing to know that the matters finally appear to be reaching destination. Thanking you for your prompt attention."

—

November 23, 1917, the secretary to the governor of Massachusetts forwarded a communication from Miss Lillie Copeland, 74 Homer Street, East Boston, Mass., advising that her brother, Charles William Copeland, sailed for France the middle of September, that she had been writing to him about three times a week since he left, but that in his last letter, received November 20, he advised that he had received no mail since he left New York.

December 10, 1917, Miss Copeland advised: "I am pleased to inform you that I received a letter this morning from my brother, Sergt. Charles W. Copeland, Quartermaster Enlisted Reserve Corps, that he had received a letter from me which I sent in September. * * * With many thanks for your trouble."

—

November 14, 1917, A. C. Barker, 607 White Building, Buffalo, N. Y., advised that his son, a private in Company F, Nineteenth Regiment Engineers (Railway), with the American Expeditionary Forces, is not receiving his mail. "I have written him regularly every week since they sailed in August and sent him tobacco and parcel post for four consecutive weeks starting the first week in September, and his last letter, dated October 23, does not acknowledge the receipt of them, and he states he has not received same or word from us for two weeks."

November 28, 1917, Mr. Barker writes: "I humbly have to state that since writing you that communication I have received several communications from my son acknowledging several of our letters and parcel-post packages sent him the latter part of September."

—

November 13, 1917, the postmaster at Belton, Tex., advised that a patron of the office, Mrs. Harry O. Ware, advised that since September 8 she had been mailing letters regularly addressed to Harry Otis Ware, second lieutenant, Cavalry, United States Reserves, and that he had never received any of her letters.

December 7, 1917, the postmaster writes, "I desire to state that Mrs. Ware has informed me that such mail is now being delivered.

—

November 21, 1917, Mrs. Nora Forbes, Hoboken, N. J., advised that her son, Pvt. George S. Forbes, Headquarters Troop, First Expeditionary Division, A. E. F. (later Company A, Twenty-eighth Infantry, A. E. F.), arrived in France August 22 and advised her October 23 that he had received no word from her. She wrote three times a week and sent papers and parcel-post packages, but received no reply.

December 10, 1917, Mrs. Forbes advised: "I received a letter to-day from my son, and he wrote it November 19. He was delighted in getting a few of the first letters and papers from me, written in September. I feel confident that he will send us word of receiving the balance."

—

November 21, 1917, Mrs. J. Knox, 88 Lynch Street, Brooklyn, N. Y., advised: "My husband is a lieutenant in the Cavalry division and has been on the other side since September 8, and I have sent him at least 14 letters. He writes and says that he has not received any mail from me since he has been there," a letter having been received that day.

December 1, 1917, Mrs. Knox advised: "I have received a letter from my husband stating that he has received one of my letters."

—

September 14, 1917, C. Henry Stinson, 317 Swede Street, Norristown, Pa., advised that letters and parcel post addressed to his son, Robert Stinson, 21 Rue Raynouard, Passy, Paris, France, care of American Field Service, were not being received; also that the same condition applied with reference to mail for Francis Harley Sheatz, secretary Groupe Americaine, T. M. 526, Peleton C. Convois Autos, par B. C. M., Paris. A list of articles sent to Mr. Stinson was later provided.

October 25, 1917, Mr. Stinson advised: "I would say that my son has received two packages of tobacco and one of candy at his last writing, October 3. Two of them were gotten at the Rue Raynouard by one of his friends who went there and hunted through a large amount of mail matter that was lying there undelivered."

October 31, 1917, Mr. Stinson also advised: "The letters to my son and all first-class mail matter has been received by him, comparatively speaking, with regularity."

—

December 3, 1917, B. F. Bourne, Cleveland, Ohio, advised that his daughter and two other young ladies, whose husbands are Volunteer officers in Europe, had been receiving cables and letters from their husbands, but that no letters or cables had been received by their husbands, although they landed on the other side at least a month ago, or longer.

December 11, 1917, Mr. Bourne writes: "I beg to advise that on yesterday my daughter received a cable from her husband to the effect that he had just received a large number of our letters, indicating that the channels necessary to secure delivery of mail from this country to such officers are now open. * * * I take this occasion to thank you for the kind interest which you have shown in my request."

—

December 9, 1917, A. G. Lano, Annandale, Minn., advised that in a letter from his son, Sergt. Arthur R. Lano, Thirty-first Aero Squadron, American Expeditionary Forces, dated November 14, he advised that he had received no mail from home. "He has been in France since September 14, 1917."

December 17, 1917, Mr. Lano wrote: "I was to-day advised by my son that he has received his mail on November 23 and 24 * * *. I take great pleasure in thanking you for the interest you have taken in this matter."

—

November 27, 1917, Postmaster Selph, of St. Louis, Mo., forwarded a letter from J. Carr Gamble, Third National Bank Building, St. Louis, Mo., advising that mail for his brother, Lieut. Clark R. Gamble, American Officers' Infantry School, A. E. F., France, was not being received, probably because such matter had omitted that part of the address, "American Officers' Infantry School."

December 17, 1917, Mr. Gamble advised: "I am pleased to inform you that my brother has received mail which was sent to him. His first letter was received November 25 and was mailed from St. Louis on October 3.

—

December 22, 1917, Representative KENNEDY, of Rhode Island, advised that Mr. C. D. McDermott, of Georgiaville, R. I., had complained to him concerning the nondelivery of mail to his son; that since October 29 he had written his son every week and had sent money, tobacco, and clothing, and that the son, Pvt. Charles D. McDermott, Company A, One hundred and first Regiment, United States Engineer Corps, had not received even a letter.

December 31, 1917, Representative KENNEDY, of Rhode Island, writes: "It gives me pleasure to inform you that Pvt. McDermott has received the first letter sent him by his parents. Word to this effect has been received by his father."

—

December 21, 1917, Mr. John Loughenry, Box 233, St. Clair, Pa., wrote concerning the nonreceipt of mail addressed to John J. Loughenry, Company C, Twenty-sixth United States Infantry, American Expeditionary Force, Paris; that he received his letters but not packages.

December, 1917, Mr. Loughenry advised that he had just received word from his son that he had received two of the five packages.

—

December 10, 1917, M. E. Golding, East Liverpool, Ohio, wrote that mail for his son, with the American Field Ambulance Service, in France, was not being received; that in a letter dated November 10, received December 9, he advised that he had received no money, although the father had sent several remittances.

December 27, 1917, Mr. Golding advised that he had word from his son stating that most of the mail complained about as being long overdue, some containing drafts, others having essential comforts, had most of it reached him. "Excepting some nonessentials, I think all mail has been delivered. I ought to say that by 'nonessentials' candies and suchlike are meant. And now his mother and I want to thank you for your prompt assistance and the comfort of your correspondence."

—

November, 1917, Miss Maude Jenkins, Ewing, Ind., wrote that Clifford V. Boofer, Twenty-ninth Aero Squadron, Signal Service Corps, Aviation Section, American Expeditionary Forces, was not receiving mail addressed by her to him.

December 20, 1917, Miss Jenkins advised that Mr. Boofer had received one letter from her.

—

December 17, 1917, Mrs. J. F. Lange, Harrison, N. Y., advised that mail addressed to her son, Pvt. John F. Lange, jr. (packages, papers, and magazines), was not being received.

December 27, 1917, Mrs. Lange advised that she had that morning received word that her son had received three of her letters, written early in October, and one package received December 5.

—

October 16, 1917, William T. Jennings, chairman committee on public safety, Harrisburg, Pa., advised as to the general unsatisfactory condition of mail service for his son who went to France from England about August 2; that no newspapers, which had been sent him regularly from June 28, had been received.

The case was put into the hands of a post-office inspector for investigation, who makes report on December 20, stating in part as follows: "On the 5th instant I again saw Mr. Jennings, when he informed me that he had recently heard from his son, who stated that a quantity of delayed mail had just been received by him, indicating that it had been accumulating at some point prior to receipt by the addressee."

—

November 15, 1917, Dr. D. L. Grayson, James Building, Chattanooga, Tenn., wrote concerning the nonreceipt of mail addressed to his son, Lieut. C. B. Grayson. He left this country somewhere in the neighborhood of September 8, "and I think you will agree with me that from September 8 to October 25 is such a delay in the delivery of mail as should be given prompt attention. * * * I was yesterday in receipt of two letters from him, one dated October 16 and the other October 25. In the first letter he distinctly stated that he had received nothing of any source in this country whatever. His letter of October 25 makes no reference to the receipt of any mail." A letter dated December 13, from Mr. Grayson, indicates frequent changes in his son's address.

December 21, 1917, Dr. Grayson writes: "I beg to advise that in a letter received, dated November 25, from my son, he advises that he has begun to receive his mail, having on that date received three letters from us. He is greatly elated in consequence. Thanking you very much for the interest you have taken in this matter and assuring you of my appreciation thereof."

—

November 23, 1917, Mr. T. J. O'Donnell, 822 Ernest & Grammer Building, Denver, Colo., advised of the nonreceipt of newspapers addressed as follows: "Capt. Ottomar O'Donnell, Fifth Field Artillery, American Expeditionary Force." A box of confections mailed early in September had not been received when he wrote.

December 19, 1917, Mr. O'Donnell writes, "I am to-day in receipt of a letter from Capt. O'Donnell, dated November 25, in which he acknowledges receipt 'during the last week' of papers, packages, and letters sent between September 29 and October 27.

December 22, 1917, Mr. O'Donnell advised that in a letter dated November 16 from his son he acknowledged receipt of cigarettes, candy, and papers. "I assume now that conditions are adjusting themselves."

—

December —, 1917, Mrs. Rollin M. Thomas, Klemme, Iowa, advised that packages for her husband, Second Lieut. Rollin M. Thomas, V. O. R. C., Base Section No. 1, A. E. F., France, were not being received, although he had received most of the letters.

December 22, 1917, Mrs. Thomas advised, "Have just received word that the most important packages have reached Lieut. Thomas."

—

December 9, 1917, Mrs. E. G. Tomlinson, Fort Howard, advised that on September 28 she sent her husband, Lieut. E. G. Tomlinson, First Division Ammunition Train, Motor Section, Track Company No. 2, A. E. F., a suit case containing various articles, and that she wrote to him daily, but that in his letters he complained of nonreceipt of mail.

December 26, 1917, Mrs. Tomlinson advised, "I received a letter from my husband and he tells me that he received the suit case, also 25 letters at one time, and it was not the fault of the post-office facilities that he was not receiving them on time. It was due to the fact of his being only one night in one town. Thanking you for your kind interest."

—

December 8, 1917, William D. Fullerton, Ottawa, Ill., advised that since the 12th of September some 25 letters had been forwarded to "Lieut. Charles B. Fullerton, U. S. R., unassigned, A. E. F." He sailed from Hoboken about the 13th of September. Up to the 10th of November he had received no mail except a bunch of newspapers mailed from Chicago.

December 24, 1917, Mr. Fullerton advised, "I have a letter from Lieut. Fullerton, U. S. R., Company K, Twenty-sixth Infantry, acknowledging receipt on December 1 of letter I mailed him October 19, and other mail. But letters mailed prior to October 19 had not yet reached him. It is apparent that some of his mail is still being held up at some point."

—

December 13, 1917, Miss Eva Blodgett, 527 Plainfield Street, Springfield, Mass., advised that Pvt. Fred C. Partch, Company M, One hundred and third United States Infantry, Fifty-second Brigade, Twenty-sixth Division, American Expeditionary Forces, had not received letters from her.

December 24, 1917, Miss Blodgett advised that Pvt. Partch had received some mail from home.

—

December 10, 1917, the postmaster at Dixon, Ill., transmitted copy of a letter from Sergt. Harold Lenox, Quartermaster Corps, National Army United States, Army Post Office 701, via New York, France, in which he advised his father (Nov. 12, 1917) that he had received no mail from home. The statement was made to the postmaster that a letter had been written him each week, giving the same address as that in his letter.

December 26, 1917, Ed. Lenox, Dixon, Ill., advised, "In reply to your letter, am pleased to say that Harold Lenox is now receiving mail, first on November 14. Thanks for your prompt attention and interest."

—

December 17, 1917, Mr. Pierce Timmie, 124 Elmwood Street, Woodhaven, Long Island, N. Y., advised that mail addressed to his brother, Pvt. Colin Timmie, headquarters Seventeenth Engineers, Railway, was not being received.

December 26, 1917, Mr. Timmie wrote: "In acknowledging yours of December 22, I wish to advise you that on Saturday last I received a letter from my brother in which he acknowledged the receipt of a letter I mailed him at the end of September. I wish to thank you for your prompt attention."

—

December 18, 1917, the postmaster at Manchester, N. H., advised that Arthur S. Brown, of Manchester, complained that he had sent 25 or more letters and packages to Howard Mark Brown, One hundred and fourth Field Hospital, One hundred and first Sanitary Train, Twenty-fifth Division, American Expeditionary Forces, and that none of these had been received by the addressee. He stated that this field hospital was formerly known as the Fourth Field Hospital.

December 27, 1917, Mr. Brown advises that Howard M. Brown received four letters "some three weks ago, but has not received any from me."

—

December 14, 1917, H. C. Zacharias, 231 Washington Lane, Johnstown, Pa., advised that September 24 he mailed to Pvt. Oliver W. Myers, Company C, Tenth Engineers Forestry Regiment, American Expeditionary Forces, a package containing various articles which had not been received by him.

December 19, 1917, Mr. Zacharias states that a letter has just been received from Pvt. Myers stating that the package reached him November 26, the date of his writing.

—

December 22, 1917, Mr. John H. Howard, Kingwood, W. Va., complains no mail reaches his son, First Lieut. F. C. Howard, Medical Officers Reserve Corps, United States Army, Two hundred and tenth Brigade, Royal Field Artillery, British Expeditionary Forces, France, stationed in France since August 1, 1917, and "well nigh a hundred letters" sent.

January 5, 1918, Mr. Howard states that he is communicating with The Adjutant General on the subject and that he received on January 5 letter from his son stating that 27 letters reached him at one time.

—

October 31, 1917, Mrs. G. W. Williams, Mercedes, Tex., states that according to letter dated London, October 10, her husband, with the American Expeditionary Forces, advises only two letters received from home, one dated August 12 and one August 26; believes some other "G. W. Williams" may have received rest of mail.

December 27, 1917, Great Britain, in reply to this department's letter on subject, advises that Mr. Williams states that all articles sent to him have been received.

—

December 15, 1917, Senator C. S. PAGE, Vermont, transmits letter of complaint from Mrs. S. B. Clark, St. Johnsbury, Vt., that her son, with the American Expeditionary Forces in France, is not receiving letters from home. States that son writes: "Mother, I can not think why I don't get a word from home."

January 7, 1918, Mrs. Clark now states letter received from her son in which he says he received two letters from home about December 10. Hopes other letters have now reached him. Mail from him reaches here in about 17 days.

—

December 22, 1917, Mr. Charles Bulda, Inspector of buildings, West Hoboken, N. J., writes in behalf of Mrs. Martin Gould relative to her son, Sergt. George F. Gould, quartermaster, Engineers' Reserve Corps, American Expeditionary Forces, France, attached to Ninth Bakery Company, also addressed "Sergt. George F. Gould, Quartermaster Corps, Det., unassigned, care of General Headquarters, American Expeditionary Force," not receiving any mail from home.

January 4, 1918, Mrs. Gould advises receipt of letter from her son in which he says that all his mail has been received. Thanks to the department for consideration shown her.

November 28, 1917, Mrs. A. E. Gauerke, 519 Oak Street, Abilene, Tex., wants to know why newspapers do not reach her son, George Miller, Company A, Twelfth Regiment Railway Engineers, American Expeditionary Forces, France.

January 2, 1918, Mrs. Gauerke reports her son now "getting his papers all right."

—

December 27, 1917, Mr. Gus O. Henderson, 79 Milk Street, Boston, Mass., transmits newspaper clipping stating that report that mail for American Expeditionary Forces is being held up is not true, and adds that if this is so, to explain why his son, Lieut. Elliott Henderson has not received a single letter from home since he landed in France, the latter part of September.

January 7, 1918, Mr. Henderson advises receipt of letter from his son dated December 8 stating he has received in one package 25 letters from home, "which includes practically all that have been written."

—

October 26, 1917, postmaster Delavan, Wis., reports complaint by Mrs. Frank W. Hall that letters sent to her husband, who is with the British Expeditionary Forces, are not reaching him.

January 7, 1918, postmaster Delavan, Wis., advised that Great Britain states Lieut. Frank W. Hall admits receipt of all correspondence and instructed to so inform Mrs. Hall.

—

December 28, 1917, Mrs. Fannie G. Horne, 360 East Two hundred and first Street, New York, states she sent, on October 3 package to her son, William J. Horne, Company F, Eleventh United States Regular Railway Engineers, American Expeditionary Forces, France, and one October 26, and three for Christmas, but from his last letter he has not received the first packages sent.

January 3, 1918, Mrs. Horne advises that her son writes, under date of December 5, acknowledging receipt of two packages and regrets any annoyance caused by her complaint.

—

November 26, 1917, Mr. Robert H. Dippy, Philadelphia, Pa., says he receives letters from his son in France, but at least 12 to 15 letters sent to France previous to November 1 have not reached addressee.

December 20, 1917, Mr. Dippy advises receipt of four or five letters from his son now stationed in Italy, but that only about three letters sent were received by his son.

January 5, 1918, Mr. Dippy advises receipt of five letters, dated from November 1 to December 14, in which his son says he received mail from this country sent during the month of October.

—

December 21, 1917, Mrs. Marc Thibault, 165 Nashua Street, Fall River, Mass., complains that her son, Alfred Thibault, Third Company, One hundred and first Ammunition Train, Twenty-sixth Division Motor Truck, American Expeditionary Forces, France, does not receive mail from home.

December 30, 1917, Mrs. Thibault advises word from her son that he now receives his mail.

—

December 5, 1917, Miss Madeline M. Morrison, Palouse, Wash., states that letter from Lieut. J. J. Lippincott, Eleventh Engineer Regiment, American Expeditionary Forces, France, informs that none of her letters received by him.

December 30, 1917, Miss Morrison writes, "I am happy to report that in a letter written by him, November 15, he acknowledged the receipt of several of my letters which had just begun to come."

—

December 5, 1917, Congressman H. M. JACOWAY, Arkansas, transmits letter from Mr. Morris M. Cohn, Little Rock, Ark., stating that out of some 40 packages sent to his son, First Lieut. Louis M. Cohn, with the American Expeditionary Forces in France, only 2 have reached him.

January 1, 1918, Mr. Cohn advises arrival at destination of a number of packages addressed to First Lieut. Louis M. Cohn, Battery M, Sixth Regiment, Coast Artillery Corps, American Expeditionary Forces, and advises, "He reports the receipt of eight or nine packages."

—

December 7, 1917, Mrs. James H. Reynolds, 17 South Pine Street, Lock Haven, Pa., asks why mail does not reach her son, H. B. Reynolds, American Naval Base, Pauillac, Gironde, France.

December 28, 1917, Mrs. Reynolds reports that her son is now receiving his mail from the States and, "I am very grateful to you for attending to the matter for me, and if I can at any time be of any service to you I sure will be at your service."

—

December 6, 1917, Congressman AUGUSTINE LONERGAN, Connecticut, submits letter from Miss Agnes N. Kelly, Hartford, Conn., in behalf of Mr. Marcell Lavoie, 72 Camfield Avenue, Hartford, Conn., respecting mail sent to his son, Pvt. Edward E. Lavoie, One hundred and second Machine Gun Company, American Expeditionary Forces, France. Mail sent to his boy once a week, but none received.

December 30, 1917, Mr. Lavoie writes that he has recently received word from Pvt. Lavoie stating he has received the mail in question.

—

December 20, 1917, Hill, Clarke & Co. (Inc.), Boston, Mass., write that letters are being received from Second Lieut. Henry Ware Clarke, American Expeditionary Forces, detached service, France, but none received by him from home. Packages have also been sent, with same address.

December 30, 1917, Mr. C. A. Clarke reports, "I am pleased to say that up to November 28 Lieut. Clarke had received 1 letter and 1 package; but since then, within a week or two afterwards, he received 20 letters in one bunch. There are missing, however, about 30 letters and a dozen or more packages, some of them important * * * but now that he is definitely located with the Regular Army I imagine he will receive his mail regularly."

—

December 2, 1917, Miss Nellie C. Creeden, 59 Bellevue Street, Lowell, Mass., asks why mail does not reach some of her friends over in France with the One hundred and first United States Infantry.

December 30, 1917, Miss Creeden advises that her letter dated October 21 was received by the addressee, Sergt. Thomas J. McDermott, Company M, One hundred and first Infantry, American Expeditionary Forces, on November 17. His letters, dated November 29 and 30, have just arrived here.

December 28, 1917, Mrs. Frank R. Potter, Rural Delivery No. 6, Amsterdam, N. Y., states that her son was sent to France about September 8 and she just received word that no mail from any source had reached him since early in October. Christmas box sent him November 13, and wants to know whether it reached the addressee.

January 8, 1918, Mrs. Potter writes: "Pvt. Henry B. Potter received 17 letters on December 18, so am in hopes he will received his mail in future."

—

December 28, 1917, Mr. F. M. Collins, 92 Line Street, Somerville, Mass., asks in re nondelivery numerous parcels sent his brother, Pvt. George Collins, Company E, One hundred and first Regiment Infantry, Twenty-sixth Division Overseas, Fifty-first Brigade, American Expeditionary Forces, via New York. By letter dated December 1 he makes no mention of articles sent to him, and it is therefore concluded that none have reached him.

January 8, 1918, Mr. Collins advises receipt of letter from his brother stating that several packages addressed to him have been received.

—

November 16, 1917, postmaster, Ashbury Park, N. J., advises complaint by Mrs. S. W. Hoffman, 703 Bond Street, Asbury Park, N. J., of nonreceipt of mail sent to her husband, First Lieut. S. W. Hoffman, Forty-seventh Company, Fifth Regiment United States Marines, in France.

January 3, 1918, Mrs. Hoffman writes: "Have received mail from Lieut. Hoffman. He also has received my mail. Thanking you for your interest."

—

December 19, 1917, Miss Ebba V. Anderson, 486 Elton Street, Brooklyn, N. Y., states that box containing knitted muffler and also letter sent about two weeks ago to her cousin, Carl H. Anderson, Fourteenth Engineers, Company E, American Expeditionary Forces, not received by him, as advised in his letter dated November 15.

January 10, 1918, Miss Anderson writes: "Since I last wrote you I received a letter from him stating he had received the package I sent him, also my letter. Thanking you * * *."

—

January 15, 1918, Mr. William H. Dechant, Reading Pa., states that his son, with the American Expeditionary Forces in France, in his last letter, dated December 14, advised the receipt of only one letter since he arrived in France November 3. He started for France about October 18, and 8 or 10 letters were written him since.

January 23, 1918, Mr. Dechant writes that he has heard from his son, who states he is receiving his letters and is in fine spirits.

—

November 13, 1917, Mr. Charles S. Turner, Wilkes-Barre, Pa., states that letters do not reach Lieut. Arthur H. Turner, Sixth Regiment, Marine Corps, American Expeditionary Forces, according to letters from him dated October 24 and 25, letters being mailed to him every day.

December 22, 1917, United States postal agent in France, respecting this case, advises that he took the matter up personally and has received a reply from Capt. A. H. Turner, stating that his letters are numbered consecutively and are being regularly received without any extraordinary delay. On January 22, 1918, the complainant, Mr. C. S. Turner, Wilkes-Barre, Pa., was advised of the postal agent's report.

—

January 24, 1918, Mr. J. B. Pratte, Bristol, Conn., complains no mail received from his son, Joseph V. Pratte, Company D, One hundred and second United States Infantry, American Expeditionary Forces.

February 2, 1918, Mr. Pratte writes: "I received four letters since January 30, dated January 2, 1918, and was very glad to receive them."

—

January 9, 1918, Miss Gertrude Peterson, San Francisco, Cal., advises word from Pvt. George L. Frye, Company A, Eighteenth Engineers, American Expeditionary Forces, that package mailed him October 11 by insured parcel post has not been received, but that two Christmas boxes mailed November 30 were received.

January 22, 1918, Miss Peterson advises the receipt of a letter from Pvt. Frye stating that package in question arrived, and thanks department for attention given her complaint.

—

January 5, 1918, Hon. AMBROSE KENNEDY, of Rhode Island, House of Representatives, transmits a letter from Mr. J. Frank Mara, Pawtucket, R. I., respecting nondelivery of mail to his son, Edwin M. Mara, Brigade Headquarters Detachment, Fifty-first Brigade, United States Field Artillery, American Expeditionary Forces. About 30 or 40 letters sent him, but not one received.

January 14, 1918, Mrs. J. Frank Mara reports receipt of letter from her son stating he had just received a letter from home dated October 9, 1917.

—

January 5, 1918, Ellen G. Greene, Pittsburgh, Pa., advises that her brother, Harold D. Greene, Company A, Twenty-sixth Engineers, American Expeditionary Forces, writes on December 15 that he has not heard from home since his arrival in France, letters being mailed him three or four times a week.

January 19, 1918, Ellen C. Greene states that her brother writes under date of December 28 that he has received several letters and packages from home.

—

December 27, 1917, Mrs. E. C. Chambers, Portland, Me., states she has written several letters to her son, Pvt. George L. Bradbury, One hundred and first Regiment United States Engineers, American Expeditionary Forces, Company A, Twenty-sixth Division, and has received seven letters from him asking her to write.

January 24, 1918, Mrs. Chambers advises her son has received all letters mailed him.

—

January 11, 1918, Mr. E. C. Cobb, Fremont, N. C., advises letters and packages sent since October 15 to Edgar E. Cobb, Aviation Section of the Signal Enlisted Reserve Corps, Second Aviation Instruction Center, American Expeditionary Forces, and that cablegram from him dated January 11 states he has not heard a word nor received a package.

January 17, 1918, Hon. GEORGE E. HOOD, House of Representatives, writes on the same case.

January 19, 1918, Mr. Cobb writes: "Am pleased to inform you that Edgar E. Cobb has at last received mail from us."

December 21, 1917, Mrs. M. Goulden, Chicago, Ill., states she has written her son, Pvt. Lewis A. Goulden, Company G, Second United States Engineers, American Expeditionary Forces, about a dozen letters and sent him packages, but on November 15 he wrote saying nothing received and wonders what is wrong.

January 9, 1918, Mrs. Goulden writes: "I want to say my son has received two of my letters, and, of course, he feels better now."

—

January 2, 1918, Mrs. John Hackett, West Allis, Wis., states her son, William J. Hackett, American Red Cross, Buffalo Motor Unit, American Expeditionary Forces, writes under date of December 12 that he has not received one word from home. About 20 letters and 6 packages sent him. Other members of the same unit seem to be getting their mail. Mrs. Hackett gives two addresses, one to American Red Cross, 79 Rue Langier, Paris France, and one to Chateau des Halles, par Sainte Foy Largetleve, Rhone, France.

January 23, 1918, Mrs. Hackett writes that her son, under date of December 24, advises he received some letters from home December 23 and two Christmas boxes.

—

January 11, 1918, Mr. William P. Hill, Providence, R. I., complains letters to P. W. Hill, Battery A, One hundred and fiftieth United States Field Artillery, Sixty-seventh Brigade, Forty-second (Rainbow) Division, American Expeditionary Forces, do not reach him.

January 21, 1918, Mrs. Hill reports receipt of letter from Mr. P. W. Hill dated January 18, 1918, saying he received two letters from her and one from his brother; also papers and magazines.

—

December 31, 1917, E. B. McGilvary, Madison, Wis., asks re nonreceipt of mail by his son, Paton McGilvary, American Aviation Detachment, American Expeditionary Forces, Italy. He heard from home before September 18 and not again until November 11, when he received two letters, one dated September 2 and one October 1.

January 14, 1918, Mr. McGilvary writes: "I am informed by my son that he has received the mail matter in question. Within the last few days I received a letter from him reporting that he had received on November 30 'quite a batch of mail.' I presume that what he had not received at the time I wrote he may have gotten since, now that communications seem to have become established again."

—

January 5, 1918, postmaster, Augusta, Ga., advises inquiry by Mr. William Frank re parcel mailed to his son, Corpl. William W. Frank, Marine Engineer Reserve Corps, American Expeditionary Forces, United States Army, base hospital No. 8, France.

January 15, 1918, Mr. Frank reports: "I made no complaint and have none to make, since all mail matter, letters as well as parcels, have been received by our son very regularly for the past three or four months; so also has his mail reached us promptly."

—

December 18, 1917, postmaster, Columbus, Ohio, advises complaint from E. M. Heller, that city, that six parcels of tobacco, candy, etc., mailed between September 10 and December 1, addressed to Frank E. Heller, Company E, Fourth United States Army, Forty-second Division, Camp Mills, Long Island, N. Y., and to Company E, Fourth United States Army, American Expeditionary Forces, have not reached addressee, but first-class mail has been delivered.

January 18, 1918, postmaster, Columbus, Ohio, writes: "Beg to advise that Mr. Frank E. Heller now states all mail is being properly delivered to him," and that this information was obtained from A. E. Heller, the complainant.

—

January 8, 1918, Mrs. Edna V. Weston, Edgartown, Mass., writes that letters to her husband, Lieut. A. D. Weston, Company A, Twenty-sixth Engineers, American Expeditionary Forces, mailed him from October 29 at the rate of six each week, have not reached him, according to letter received from him dated December 16.

January 20, 1918, Mrs. Weston writes that letter received from her husband advises that he received a bundle of mail on December 23.

—

CHAMBER OF COMMERCE,
Bloomington, Ind., January 24, 1918.

MERCHANTS' ASSOCIATION OF NEW YORK,
Division of Mail Inquiry, New York, N. Y.

GENTLEMEN: In regard to your request for the chamber of commerce to furnish you a statement concerning the local mail service, we are pleased to submit the following brief report:

The past two weeks we have experienced the worst winter weather in the history of Indiana, the temperature being below zero nearly every day, and some days from 14 to 20 degrees below. In addition to this, the deepest snow ever known here has hindered all traffic. The wagon roads have been blocked for days at a time with miles of snow drifts in many places on the level with the road fences, making transportation impossible, even on our main highway.

Our two railroads have also experienced great difficulty in running trains and are unable to make their regular schedules. For a few days all trains were annulled and on other occasions the trains were from 2 hours to 14 hours late, due to the deep snowdrifts on the tracks.

Any delay of mail in this locality has been due to the acts of Providence and not to the acts of the Postmaster General. We have heard no complaint from the business men, but, on the contrary, have heard many compliments on the prompt and efficient service rendered by the department even under adverse conditions of the weather. For instance, friends and relatives have mailed over 600 Christmas boxes to their soldier boys in France. Not one was lost so far as known, and the boys received their presents in time for Christmas.

Our local office is in charge of the most accommodating postmaster Bloomington ever had. He devotes his entire time to the duties of his office and does not permit politics to interfere with the efficiency of the service.

Very truly, yours,

(Signed) C. G. CREIGHTON,
Secretary-Manager.

The Clerk read as follows:

Contribution to the maintenance of the International Bureau of Weights and Measures, in conformity with the terms of the convention of May 24, 1875, the same to be paid, under the direction of the Secretary of State, to said bureau on its certificate of apportionment, $2,895.

Mr. DILL. Mr. Chairman, I move to strike out the last word. I want to say that it seems to me that the basis which

the President laid down in his address on peace, delivered to the House on the 8th of January, 1918, when he said that open covenants and open treaties were the first necessity, is a basis that can be indorsed not only by all Americans but by the free peoples of the world around. I do not believe history has ever shown a period when the world suffered so much from secret treaties and secret agreements as it has for the last three years and is now suffering. For that reason I ask unanimous consent to extend my remarks in the RECORD by printing certain documents and treaties recently published by the New York newspapers. They show what a wonderful work has been done by President Wilson since we entered the war in making this war really and truly a war for democracy and justice. By those treaties nations were to divide up conquered countries, but this Government's influence has been such that all that has been changed and the former territorial agreements renounced.

Mr. CHARLES B. SMITH. Reserving the right to object, I should like to ask how much space in the CONGRESSIONAL RECORD will be required to publish these treaties?

Mr. DILL. I do not know exactly; probably four or five pages. I do not think it will exceed that. I would not want to say definitely, as the documents were published in two or three installments in the New York papers. I am not certain; but not to exceed six or seven pages at most.

Mr. CHARLES B. SMITH. I have no objection to that, but I do not want to have three or four volumes put in.

Mr. STAFFORD. Mr. Chairman, in the absence of the gentleman from Massachusetts [Mr. WALSH], who is the censor of outside matter offered for printing in the RECORD, I ask the gentleman to withdraw his request for the present.

Mr. DILL. Mr. Chairman, these are Government documents of the Russian Government. If the gentleman from Massachusetts is not on the floor, that is his fault.

Mr. STAFFORD. I was busily engaged on another matter. Will the gentleman kindly inform the House again the character of the publication?

Mr. DILL. They are documents and communications to the Russian Government, which have recently been published, showing the secret treaties existing at the beginning of the war and before the war between the European nations.

Mr. STAFFORD. I withdraw the objection, Mr. Chairman.

Mr. BLACK. Does the gentleman have any fault to find, for instance, with the Italian treaty, by which our allies induced Italy to join them in the war against the Imperial German Government?

Mr. DILL. I may say to the gentleman that it is not for the purpose of criticism but for the purpose of furnishing information that I proposed to place these documents in the RECORD just as a matter of historic record. A number of Members have said they would like to read these documents if they were all collected in one place.

Mr. BLACK. Has the gentleman any assurance that this synopsis of these treaties is correct?

Mr. DILL. They are not synopses, but complete documents. They were given out by the Russian Government and published in the New York newspapers. I have no authenticated statement by the Secretary of State or by any of our own Government officials.

Mr. BLACK. Has the gentleman seen any acknowledgment by any of the allies that these treaties were in fact made?

Mr. DILL. No; I have not.

Mr. SAUNDERS of Virginia. What are these treaties?

Mr. DILL. They are a number of communications that during the war have been sent to the Russian Government, especially when the Czar was in power, and following his being deposed, and they have been recently published by the present Russian Government.

Mr. SAUNDERS of Virginia. Communications?

Mr. DILL. Yes; they were published in New York dailies some two weeks ago, I think.

Mr. SAUNDERS of Virginia. Were they authoritatively published?

Mr. DILL. As authoritatively as any treaty that is published in a newspaper.

Mr. SAUNDERS of Virginia. What I mean is, did they purport to be published on authority of any representative of the Government?

Mr. DILL. Oh, yes; they were given out by those in control of the Russian Government at the time of their publication in Petrograd.

The CHAIRMAN. The time of the gentleman has expired.

Mr. DILL. I ask for two minutes more so that I may answer the questions of the gentleman from Virginia.

The CHAIRMAN. The gentleman asks that he may proceed for two minutes. Is there objection?

There was no objection.

Mr. SAUNDERS of Virginia. Have they been in anywise verified by the representatives of the Government on whose behalf they purport to have been issued?

Mr. DILL. Not to my knowledge. They were simply given out by the authority of the Russian Government. I do not think there is any denial of them.

Mr. SAUNDERS of Virginia. Would we not be filling up our RECORD then with matters whose authenticity may be questioned?

Mr. CHARLES B. SMITH. As I understand their authenticity has not been denied.

Mr. DILL. I do not think there is any doubt of their authenticity. There is only one complete treaty. The rest are largely discussions by ambassadors back and forth, referring to treaties.

Mr. SAUNDERS of Virginia. What is to be gained by their publication?

Mr. DILL. It is simply a matter of putting them in the RECORD in order that they may be available to the House and to the country.

Mr. HARDY. Will the gentleman yield for a question?

Mr. DILL. Yes.

Mr. HARDY. These documents were published by Lenine and Trotzky, were they not?

Mr. DILL. Yes.

Mr. HARDY. And published together with a lot of criticism of the allies.

Mr. DILL. There is no criticism in the statement of the treaties which I have.

Mr. HARDY. They were published purporting to have been discoveries from the secret archives of the Czar.

Mr. DILL. I think so; yes.

Mr. HARDY. The whole motive was to throw blame on the allies in connection with this war?

Mr. DILL. I do not think that, but rather to throw blame on the Czar for the way he handled the Russian Government.

Mr. SAUNDERS of Virginia. Is it the desire of the Government that this material should be published?

Mr. DILL. I do not know about that.

Mr. HARDY. My recollection is that they came out with a lot of criticism by the Bolsheviki.

Mr. DILL. That may be, but I simply proposed to insert the documents. It has been said they show a number of agreements, which, in fact, they do not show.

The CHAIRMAN. Is there objection?

Mr. BORLAND. Reserving the right to object——

The CHAIRMAN. The gentleman from Washington asks unanimous consent to insert some remarks in the RECORD by printing certain documents. Is there objection?

Mr. BORLAND. Reserving the right to object, these are what purport to be copies of secret treaties entered into by the authority of the Russian Government and some other Government—the German Government, for instance?

Mr. DILL. No; there are none with the German Government or with any of her allies among those I have seen published in this series.

Mr. BORLAND. They are treaties purporting to be entered into by the Russian Government with other countries?

Mr. DILL. Yes.

Mr. BORLAND. They are not official copies, but newspaper or unofficial copies.

Mr. DILL. I think that is true of all treaties published in the newspapers.

Mr. BORLAND. With some comments on them?

Mr. DILL. No; I have no intention of including any comments, other than my own comments to show how President Wilson has lifted the purpose of this war to a fight for real world democracy.

Mr. BORLAND. Irrespective of the fact that secret treaties may violate our policy of the Government, inasmuch as Russia is a friendly power and these are not official, does not the gentleman think that, while it might have its proper place in the press, it would not have a proper place in the official records of Congress?

Mr. DILL. Not necessarily. I do not see how any injury can be done by printing them in the RECORD when they are already common knowledge. We would be revealing no secrets; we would be simply setting forth the records as given out by the officials of the Russian Government.

Mr. BORLAND. It seems to me, with all deference to my colleague, that they hardly deserve to be placed in our RECORD. They might be referred to in speeches, but I hardly think that they should be published in the CONGRESSIONAL RECORD.

Mr. DILL. I did not intend to place them in the middle of the RECORD, but in an extension of my remarks. I might have

gotten time in general debate and read them, but I thought that I would save the time of the House, and they would be there for the reference of Members of the House. Then no mistake could be made as to what they contain. That was my only purpose.

Mr. BORLAND. I believe, Mr. Chairman, for the present I will object.

Mr. STAFFORD. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 10, line 25, strike out the figures "47,500" and insert "20,500."

Mr. STAFFORD. Mr. Chairman, never in the history of this moribund Commission on International Boundary between the United States and Mexico have they ever had such a large appropriation in the 13 years of its existence as that recommended by the committee to-day. We all know that when once these commissions are organized they are mighty hard to get rid of. This is another exemplification of that rule. In fact, the work has been so futile and of such little value that the predecessor of the present commissioner, a former noted, painstaking, industrious, and capable Representative of this House, the Hon. John Wesley Gaines, resigned from the commission because he found there was no work to perform. He was ashamed to accept the salary of $5,000, and in order to justify some work for the salary he was receiving, as I was informed, he wished to indulge in some irrigation project utilizing the waters of the Rio Grande. The commission has been in existence for 13 years, and we never have appropriated more than $35,000 for it. I can understand how a new commissioner coming into this position wishes to magnify the work and present estimates—as the commissioner from Tennessee, Judge Lucius D. Hill, has—of $90,000 for extensive work in the ever-changing river bed of the Rio Grande. But I respectfully submit to the committee that this is not the time to increase appropriations. It is true that $25,000 is not much these days, when we are appropriating hundreds of thousands and millions of dollars. It is true that this commission, if it wanted to engage in the survey of the Colorado River or other rivers down there, could expend hundreds of thousands of dollars, but it is a question whether this is an appropriate time to engage in this outside work, especially in view of the pressure upon the Treasury by reason of the war conditions.

Mr. SLAYDEN. Will the gentleman yield?

Mr. STAFFORD. Yes.

Mr. SLAYDEN. The gentleman says this commission—and I suppose he was speaking sarcastically, as I suppose he was in some other remarks he made——

Mr. STAFFORD. No; I was speaking seriously.

Mr. SLAYDEN. He said something about the survey of the Colorado and other rivers. Does not the gentleman know the importance of the Rio Grande, and the reason for this is to remove possibilities for international complications with another sovereignty? That is the importance of it.

Mr. STAFFORD. I cited the Colorado advisedly and not sarcastically, because I examined the hearings before the Committee on Foreign Affairs, which includes an estimate by this distinguished gentleman, who wants to branch out all of a sudden, and in that estimate I find a survey of the Colorado River, $25,000.

Mr. SLAYDEN. Well, I will withdraw my observation with regard to the Colorado River and ask the gentleman to confine his attention for the moment to that part of my question which touched the value of the Rio Grande River as the boundary line between the two sovereignties, Mexico and the United States.

Mr. STAFFORD. There is no question but that we should have some well-marked line between Mexico and the United States, but I think, and the gentleman from Texas knows far better than I do, because I never saw the ever-changing bed of the Rio Grande, that it will be difficult under all circumstances to establish a boundary line.

But the time is not opportune, I take it, to engage in this survey work when the Treasury is in such need of additional funds for war activities. This work has been postponed all these years. Some commissioners have found it to be needless. Gentlemen know full well that when we create these commissions it is a most difficult task, even after their work is completed, to get rid of them. In this exigency, why should we increase this appropriation? I have no objection to continuing this deserving Democrat in office. It is spoils, and has been spoils for years. Grant that, but why should we increase the appropriation when it is not necessary?

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.
